"The National Reclamation Association and its allied organizations will ask the Federal Congress in December to pass a bill providing for the construction of a complete system of levees from St. Louis to the Gulf as a first step in preventing the drainage of 30 States overflowing the farms of the Mississippi Valley. * * * It is estimated that the dense population of Louisiana alone will be capable of producing from two to three crops each year on 10,000,000 acres of alluvial prairie, aggregating a billion dollars annually of agricultural wealth, to say nothing of the vast resources that will be conserved by the protection of the millions of acres in the watershed of the Missouri, the Mississippi, and Ohio Rivers, that are to-day being devastated by overflows or impoverished by the erosion of tributary streams at the time of high water."

[From the Times-Democrat.]

NEWLANDS AND RANSDELL PLANS.

NEW ORLEANS, *June 30, 1912.*

To the Editor of the Times-Democrat:

While it is not generally known, it can very easily be learned by anyone reading such essays as those of Judge R. S. Taylor, of the Mississippi River Commission, entitled "The Subjugation of the Mississippi," "Levees, Outlets, and Reservoirs," "The Present Aspect of the Mississippi River Problem," and "An Emergency in the Life of a River," that the ultimate state of the Mississippi River from Cairo to the Gulf would be that of a practically clear-water stream, after its banks had been revetted throughout this stretch, and after its tributaries and upper reaches had been cared for under the operation of such a Nation-wide policy as that contemplated by the present Newlands bill.

Judge Taylor shows what I believe is generally conceded by all the engineers who have had practical experience on the river, that nearly all of the silt carried in suspension by its swift-moving waters comes from the caving of its banks, and not from the mountain side or the farm. He shows that just as soon as these banks are mattressed, which he estimates would cost about $30 a lineal foot, or about $100,000,000 for the Cairo-to-the-Gulf section, the sand bar, once put out of business by the dredge, would practically be a thing of the past, when not only 14 feet, but probably 20 feet, would represent the shallowest portions of this stretch. Judge Taylor, like Gen. Bixby, Maj. Dabney, and other eminent authorities, while he does not condemn the reservoir system as this may be applied to the headwaters of the Mississippi, assumes, I believe, that no such storage system can ever be practicable in the great watershed of the Ohio River Valley, notwithstanding the Chittenden investigations and those of the Cairo flood commission show that reservoirs on all the tributaries of the Ohio River would reduce that river's flood level at Cairo by at least one-fifth of its maximum.

These distinguished Army engineers seem to all agree that as long as the river carries the amount of silt it does to-day the "outlet" which so many contend would lower the flood level is also impracticable as a means of accomplishing that great desideratum.

But once remove this silt, which even the layman may understand would not only fill up the "outlet," but would gradually also fill up the main river itself, through the slackening of the current which would induce its precipitation, there can be no question but that we could then have all the outlets we would need in order to lower said level, and at every point at least, where a lake or bay or the sea itself could be reached, into which this surplus water could be diverted.

And if this grand transformation of conditions can be accomplished, should it not follow that the amount of its cost should only be measured by the magnitude of its obvious advantages, to say the least? In other words, should $100,000,000 or twice that amount, between Cairo and the Gulf, stop the consideration of such expenditure for such a purpose for a single minute?

The Newlands bill contemplates the expenditure of $500,000,000, which, if placed in the shape of bonds, when added to the present debt of a country whose wealth is said to be some $120,000,000,000, and whose present debt is only $200,000,000 more than that of the city of New York, could hardly be felt, particularly when the tremendously increased earning capacity of these improved highways of commerce is considered. The question therefore presents itself as to whether the vastly larger amount contemplated by the Newlands bill, which would be expended all over the country, on all of our rivers, would not more likely appeal to the people of the Nation who could probably see the incalculable advantages of connecting our rivers in one grand system than would the smaller sum suggested by Mr. RANSDELL, which would be spent mostly in this southern section on the lower Mississippi alone.

PETER S. LAWTON.

The Nashville (Tenn.) Banner of July 8, 1912, prints this editorial comment:

"Estimates of engineers made to the National Reclamation Association of the cost of adequate protection from Mississippi River floods is $500,000,000, and the association is to ask Congress to spend that sum in strengthening the levees and building dams to hold back freshets in the tributaries. That is an enormous expenditure, more money, perhaps, than the Government can find for that purpose, but unless the work is undertaken on some such scale and planned for permanency, the Government will have spent, at the end of a generation, an even larger sum in making repairs and guarding against breaks in times of flood."

The Bangor (Me.) Commercial of July 8, 1912, says:

"The terrible losses of life and property resulting from the Mississippi floods having called the attention of the Nation to the need of steps to prevent or minimize the same, the request of the National Reclamation Association that Congress appropriate $500,000,000 to strengthen levees and build dams for regulating the freshets will not create the smiles that might have greeted such a request in times when the existent danger was not as fully appreciated. The task is no light one nor can it be done in a moment. But the investment is one that must ultimately be made, although the expenditure must, of necessity, be extended over a term of years."

[From the Chicago Tribune, July 12, 1912.]

The delegations in Congress of every Mississippi Valley State, from Pennsylvania to the Rockies, and from Minnesota to Mississippi, should insist that the problem of the Mississippi River system, including all the tributary systems of the Father of Waters, shall be attacked without delay.

Col. Roosevelt already has declared for this great task, and the necessity for a broad solution has never been more apparent than now in the wake of the devastation of 1912. Discussion is general on this topic and public opinion ready to be crystallized.

A compact statement of the situation and its possibilities, written by Mr. Walter Parker, of the Louisiana Reclamation Club, gives one of the best summaries.

"Four hundred million tons of silt, the surface soil, is washed from the lands of the Mississippi watershed into the Gulf of Mexico each and every year," writes Mr. Parker. "This is waste in so far as everybody now living is concerned, and the farmers and land owners of the Ohio and Missouri Valleys are paying the bill. Water enough passes down the Missouri when in flood stage to irrigate 15,000,000 or 20,000,000 acres of the dry plains or bench lands in the upper watershed of that river. More than enough water goes to waste down the Ohio River each flood season to supply dry season navigation and millions of electrical horsepower units. The same thing is true of the upper Mississippi River."

Here is conservation whose benefits are for the present generation.

"Harness the source streams," urges Mr. Parker. "Conserve the freshet waters for dry season navigation. Draw power from dams and reservoirs. Turn the floods of the upper Missouri out over the dry bench lands. Build strong levees from Cairo to the Gulf that will hold the partially controlled floods in the lower river. And what will be the result?

"The reservoirs will supplement the summer flow and thereby provide at all times an adequate supply of water for the system of locks and dams so that there will always be a navigable stage in the Ohio on which to float out to tidewater the coal, the iron, the steel, and the manufactured products of that portion of the country, while the power developed will go a long way toward increasing the economy of manufacture.

"In the upper Missouri River country hay will grow on millions of acres of land now devoted to grazing, and the production of cattle that will then thrive on that land will be increased tenfold. In addition, summer seepage will return enough water to the river to supply a navigable stage throughout the dry season.

"The upper Mississippi will enjoy all-the-year navigation and an abundance of power.

"From Cairo to the Gulf the floods will not then climb anywhere near so high as they have done in the spring of 1912, and with a complete and well-constructed levee system on both sides of the river the farmers and planters will no longer fear crevasses and overflows, and limit their investments for improvements accordingly.

"The silt waste will be checked because no adequate system of flood control can ignore soil erosion. Then the farms of the North and Middle West will not annually lose in fertility, and there will be fewer bars and mud lumps in the lower river to check the flow and obstruct navigation."

No nation has had a greater engineering problem than this, and the hopes of enthusiasts are to be discounted. Yet the problem should be attacked with breadth and foresight, and penny-wise caution or short-sighted fear of expenditure should not prevent careful expert consideration of the tremendous possibilities, to say nothing of the urgent necessities of the improvement.

The Houston (Tex.) Chronicle, of July 15, 1912, says:

"The Louisiana Reclamation Club, affiliated with the National Reclamation Association, advocates Federal action looking to the permanent prevention of floods. The Chronicle unhesitatingly indorses the broad principle of adequate Mississippi flood prevention, because it is necessary to national prosperity."

The Pittsburgh Chronicle-Telegraph of Saturday, July 20, 1912, says:

"The tremendous damage caused by recent floods in the Mississippi Valley has moved the Louisiana Reclamation Club to make a strenuous appeal for action by the Federal Government toward the execution of the plans advanced under successive administrations for the prevention of floods and the conversion to useful purposes of the huge surplus of water in the basins of the Mississippi, the Missouri, and the Ohio."

Speaking of the club, Mr. Walter Parker thus summarizes the work of conservation that is deemed possible: "Harness the source streams. Conserve the freshet waters for dry-season navigation. Draw power for dams and reservoirs. Turn the floods of the upper Missouri out over the dry bench lands. Build strong levees from Cairo to the Gulf that will hold the partially controlled floods in the lower river.

"Let these measures be taken," Mr. Parker goes on to say, "and the results will include a permanent navigable stage in the Ohio, the fertilization of millions of acres in the upper Missouri River country, all-the-year-round navigation, and abundance of power in the upper Mississippi region, abatement of floods from Cairo to the Gulf, stoppage of the waste of silt, and an ultimate addition to the value of landed investments that will afford manifold compensation for the outlay involved."

"These suggestions and deductions are not new, but they derive special force from the circumstances whereby they are prompted and whereby an ominous lesson has been given to the country. The conservation problem, in its relation to the rivers, is a pressing one, and it is clear that further postponement of action upon it will be a dereliction of national duty."

[From the Cairo Bulletin, Aug. 21, 1912.]

GET BUSY.

There is no city in the United States more vitally affected by floods than Cairo. With the Nation's two greatest rivers passing its doors, the city is doubly menaced every time the rivers rise, and that it has escaped inundation in the past doubtless could have been attributed to the fact that when the Mississippi and Ohio Rivers simultaneously reached the flood crest, relief was obtained through the breaking of levees above or below.

Cairo now plans to spend a half million and possibly more in raising and strengthening its levee system, while a movement is on foot to make the levees between the Ohio's mouth and New Orleans impregnable. What assurance has Cairo that posterity will be protected by the system of levees it is now planning to build?

G. H. Maxwell, executive chairman of the National Reclamation Association, which is fighting "tooth and nail" for the Newlands-Bartholdt river regulation bill, which provides for the expenditure of $500,000,000 in a period of 10 consecutive years for the building of source controls, addressed a joint meeting of the three local organizations Monday night. Less than two dozen members of the three organizations attended. Whether this was due to indifference or lack of knowledge of the importance of Mr. Maxwell's visit are matters of conjecture. However, Mr. Maxwell, who has been making a scientific study of the flood problem for a decade, and who is recognized as an authority, solicited an invitation to return to Cairo at a later date and address a larger meeting. The invitation was not extended Monday night, but it is to be hoped that no time will be lost in arranging for another meeting in the early future.

Men who have been studying the flood situation for years virtually agree that the building of an impregnable levee system would give only temporary relief, inasmuch, as the rivers flood, the channels would gradually fill up and necessitate the continual raising and strengthening of the levees until the time would arrive when every flood-menaced city in the Mississippi, Ohio, and Missouri Valleys would be surrounded by levees as high as mountains.

There are others, however, who pooh-pooh this idea, but strange as it may seem, they offer no explanation of the fact that the river beds

are ever filling, nor do they offer any solution for the correction of this condition. The main opposition to the reservoir system advanced by the advocates of impregnable levees, is the monstrous cost of construction. Five hundred millions of dollars is a vast sum, we will admit, but it is infinitesimal when compared to the vast losses in the past, and losses that must be borne by the people of the valleys in the future, unless some action is taken to control the floods at the river sources.

What is $500,000,000 to this great Nation of ours; the Nation that is building the Panama Canal; the Nation that can build $15,000,000 battleships? If the Government is to permit its rivers to overflow the valleys as it has in the past, it will not be long before the total losses will have passed to the $500,000,000 mark.

The Mississippi, Ohio, and Missouri Valleys are worth more to the United States than a dozen Panama Canals or a hundred $15,000,000 battleships, and a billion dollars would not be too much to spend to protect the lives and property of the people who live in these sections.

The Newlands-Bartholdt bill does not oppose any other river or levee improvement movements. The people of the valleys can continue to build their levees, and they may need them scores of times before the vast work contemplated in the measure is completed. What is needed for the future is a system of control, and if Cairo is possessed of a particle of good judgment, it will lend every effort to the successful passage of the measure.

There is no side-stepping the flood problem. We will have floods so long as man is powerless to prevent the falling of snow and rain. Man can not only control rain and snow after it falls if he will, but can turn it into the arid countries when it is most needed, and also release it at the river sources in such a manner that a navigable channel will be maintained at all seasons of the year.

We urge the local organizations to invite Mr. Maxwell to return to Cairo and deliver a second address. The cause he champions seems to be meritorious, and we desire to know more about it.

—

[From the Duluth News-Tribune, Sept. 10, 1912.]

THE MISSISSIPPI VALLEY.

The intertrade relations of Minnesota and the rest of the Mississippi Valley are such that the interest and well-being of every part of it are second only in importance to that within our own State limits. The floods of the lower Mississippi this last season caused a loss estimated at from $100,000,000 to $250,000,000. This means that the purchasing power, the investment power, the credit basis, and the property value of that section have been reduced by just that much.

There is that much less of all these forms of financial power and stability; the whole economic structure of the entire valley has been weakened to just that extent. Every part must feel the results of this. There will be that much less support for all the intertrade and commercial relations.

Minnesota wants waterway channels on the Minnesota and upper Mississippi Rivers that will give it connections with the lower valley. This State would have the Government make these channels and maintain them at very large expense.

Why? Because Minnesota believes that such channels would be of enough benefit to the people of this and the other valley States to warrant this expense; that the traffic between these sections is so large that the lower water carrying rates would justify the initial cost.

If this is true, or largely true; if it is warranted even by probable development rather than present conditions, it proves conclusively that the prosperity of the lower valley and of the upper valley are completely unified.

What is true of Minnesota is the fact as to every other State along the Mississippi, the Missouri, and the Ohio Rivers. All of this tremendous sweep of territory forms the Mississippi Valley, and a loss to one part is a loss to all, a gain to one part is a gain to all, and the interests of every part are woven together in an inseparable whole.

Outside of the motives of patriotism and humanity these are the concrete, the pocketbook reasons that Minnesota should stand with all this vast territory for any definite plan that will certainly prevent the recurrence of floods causing such enormous losses.

The upper and lower valleys have climatic differences that make each the other's market, both by season and by product. The loss of one is instantly the loss of the other; the lessening of the purchasing power of the one instantly acts on the other.

The upper valley can no more afford a $250,000,000 loss to the lower valley than can the lower valley itself. We prove this, as stated, by the very demand for greater and cheaper intertransportation facilities.

It is not, then, for the lower valley alone, but for the entire valley, to support a comprehensive and sufficient plan for flood prevention as a national project, as essentially national as is the preservation of the Great Lakes as a national highway.

—

[From the Agricultural Magazine, St. Anthony Park, St. Paul, Minn.]

CONTROLLING THE GREAT RIVERS.

If organized effort, the union of heretofore conflicting interests, and an inspiring leadership can accomplish it, then the improvements of the great rivers of the Mississippi systems along the lines of the broadest statesmanship, the greatest beneficence, and the truest economy seems now for the first time within sight.

The organized effort is seen in the cooperative work now being done by commercial bodies in the great cities, all the way up from New Orleans to Pittsburgh, Duluth, the Twin Cities, and Omaha. The union of diverse interests is illustrated in the fact that the irrigationists, the levee builders, and the men who are working mainly for the development of water transportation have now pooled their issues for a common object. The inspiring leadership is found in the person of George H. Maxwell, the author and chief promoter of the national irrigation act, the magnetic orator, and the apostle of the small farm as against the baronial estate. He kindled a flame of enthusiasm for the project wherever he speaks.

All the organizations, all the forces referred to, are to be represented in a grand river-regulation and flood-prevention conference, to be held at New Orleans January 6 and 7, 1913, to voice what is fast becoming a nation-wide demand for the passage of the Newlands-Bartholdt river-regulation bill.

This bill involves a frank recognition of the principle laid down many years ago by Gen. Haupt, one of the foremost of our Government engineering experts, that the place to begin the work of flood prevention and river improvement is at the headwaters, not on the lower stretches of the rivers. Hold back the floods by storing in great reservoirs along their higher reaches the extra feet of water constituting the crest of the floods and not only will the rivers no longer overflow the country along the lower levels, but the water thus held back will serve to maintain navigation in seasons of low water. And not only this, but the stored-up water in the reservoirs can be made also to serve at innumerable points the purposes of irrigation and the creation of water powers. The cost of levee building will be much reduced. And thus the water wealth of our great valley becomes one of the grandest of our material assets, whereas now its waste makes it an annual liability.

Minnesota is one of the States which will share most largely in the benefits sure to flow from the passage of this bill, especially in the establishing of cheap water transportation for the products of the farm. It is an American, not a partisan, measure. It plans a vast expenditure—$50,000,000 a year or more. But in carrying forward the work it is proposed to employ the same engineers and the same plant now engaged on the Panama Canal. This is a guaranty of efficiency and economy. Therefore it is to be hoped that the people of Minnesota will urge upon their Congressmen an energetic support of the bill.

—

[From the Reno (Nev.) Journal, Oct. 5, 1912.]

CURBING THE MISSISSIPPI.

The Democratic plan to harness the Mississippi is in response to a demand that has been made for years. It comes not alone from the people of the South, but the North and West as well. Every year disastrous floods sweep down through the channel, ruining crops worth millions of dollars, devastating the land, and inundating cities. Not infrequently the rush of waters claim a toll of human life.

The people who live on the lands that flank the great stream want the waters curbed.

The people of the West ask that the flood waters be impounded and held to irrigate their lands.

It is simply a question of the people of the South joining hands with those of the West and acting together, each to get what they want.

If the flood waters are held in great reservoirs they will be checked.

Woodrow Wilson's ideas meet with those of the people east and west. He is in accord with the progressive thought of the day. He is a man who responds to the wishes of the people. It is because he catches the drift of public sentiment that he is indorsed by men of all sections. He has enlisted in the movement long ago started by Senator NEWLANDS to save the water for those who need it and from those who do not.

This question of harnessing the waters of the Mississippi has been discussed for half a century. It has been dodged by men and candidates.

Now, after decades of agitation, it would seem that something shall be done by bringing together in a perfectly simple manner the people of the West and the South in an enterprise that will mean the saving of untold millions for each section of the country.

—

[From the Reno Gazette, Nov. 16, 1912.]

NEWLANDS DEVELOPMENT BILL.

The Newlands bill for the prevention of waste flood waters and the utilization of these surplus waters in the irrigation of millions of acres of highly productive land furnishes one of the most interesting proposals for national development ever suggested. It is practical. The assured beneficial results from it are such as to command widespread enthusiasm.

The resources of the United States are so vast and varied that thus far the country has prospered by gathering up what was lying about in profusion rather than through the thrifty development of less apparent sources of national wealth.

With millions of acres of the richest virgin soil awaiting the conservation of these waste waters, the duty of Congress is plain. We must have battleships for defense, but an even greater source of national security would be the cost of a few battleships applied to the development of lands capable under irrigation of supporting millions of prosperous Americans.

There are fully 10,000,000 acres of land right here in California that could be made productive through the conservation of waste water in the Sacramento and San Joaquin Valleys alone. The harnessing of the Colorado would add other millions to the productive resources of the State and Nation. Ten million prosperous people added to the Nation's reserve beats the construction of battleships as a means of national power and defense. (Los Angeles Express.)

—

[From the Los Angeles (Cal.) Cultivator, Nov. 21, 1912.]

STORE THE FLOODS.

The Newlands bill has such vast possibilities that many people are almost staggered in contemplating it, but almost the entire West favors it, and the East will favor it more and more as its real worth is understood. The Cultivator gives much more space to it this week. The question, Will the Newlands bill favor California? is answered by Mr. George Maxwell known to irrigators the world over as one of the greatest flood conservation enthusiasts. For $5,000,000 per year can be put into the San Joaquin and Sacramento Valleys flood storage works and a like amount along the headwaters of the Colorado, and it will mean wonderful advancement in material things for this State.

Mr. Maxwell touches upon some of the benefits to California of the North. The Colorado River work is only incidentally referred to, but there are said to be over 5,000,000 acres of lands along the Colorado, a liberal portion of them being in Arizona, and some below the Mexican line which would be directly benefited by the operation of this bill. We need not be concerned with that below the line except that under existing treaties Mexico is now entitled to one-half the normal flow of the river. The Imperial Valley asserts that she is entitled to all the waters now flowing during the drier season in the Colorado River. The Chuckawalla Valley, the Palo Verde Valley, and the lands in Arizona which can be supplied from the Colorado must go dry unless the floods are stored. The Government can invest its money no more profitably.

A great convention is to be held in Los Angeles this week to discuss this matter, and already vigorous action is being taken to arouse enthusiasm which will lead to action.

—

[From the Los Angeles Express, Nov. 22, 1912.]

SOUTHWEST'S OPPORTUNITY.

If the Newlands river-regulation bill is enacted into law in form to include the conservation of the waste storm waters of the Colorado, the Sacramento, San Joaquin, San Gabriel, and other streams, the multiplication of the productive resources of the Southwest would so far surpass anything heretofore experienced in land development as to be scarcely conceivable.

Any one who has seen the transformation worked through irrigation development in various parts of the country knows something of what it would mean to reclaim 10,000,000 acres of the richest virgin soil on the continent through the application of water under climatic conditions that are destined to convert a vast empire into a veritable paradise.

The plan is absolutely feasible. All that is needed is men of vision and business courage to take up the work of public education, money with which to carry forward an aggressive and successful campaign, and a public opinion that is alive to a great opportunity.

—

[From the Statesman, Austin, Tex.]

FOR FLOOD PREVENTION.

The cause of river regulation through source stream control, the use of now wasted flood waters, and the prevention of floods and overflows has been given great impetus through the consolidation of the National Irrigation Association and the National Reclamation Association, under the name of the latter, with C. B. Boothe, of Los Angeles, as president, and George H. Maxwell, of New Orleans, as executive director, and the announcement that a national conference will be held at New Orleans January 6 and 7, 1913, for the purpose of finally deciding upon the details of the campaign to secure the enactment of the Newlands-Bartholdt river regulation and flood prevention bill by the Federal Congress.

This conference will be held by the National Reclamation Association, under the auspices of the Los Angeles Chamber of Commerce. The New Orleans Progressive Union, the Pittsburgh Flood Commission, the Louisiana Bankers' Association, the Stockton (Cal.) River Regulation Association, the Arizona and California River Regulation Commission, the Louisiana Reclamation Club, and other organizations and delegates representing the commercial organizations of every State in the Union are expected to attend.

The primary object of the conference will be the consideration of the Newlands-Bartholdt bill as it affects the interests and needs of the several sections of the country.

This bill provides a continuing appropriation of $50,000,000 annually for 10 years and the organization necessary to enable the Federal Government to harness the source streams of the great rivers in such manner as is necessary to permit the use for irrigation, for power and for dry weather navigation of the flood waters that now go to waste in destructive torrents, for the building and maintenance of necessary levees, and for other works of a protective nature. Its application is general, and all of the great rivers come within the scope of its operations.

—

[From the Republican, Phoenix, Ariz., Nov. 23, 1912.]

PROOF AGAINST HARD TIMES.

One of the assigned causes for the financial disturbance of 1907 was the San Francisco fire and earthquake. That was undoubtedly a contributory cause, for when such a vast volume of property is utterly annihilated, the loss of it must be felt in all parts of the country.

Yet, all the property destroyed at San Francisco was of small volume compared with the annual waste by floods in this country. This great loss does not disturb the country for the reason that it is regarded as a matter of fact, something that can not be avoided, an overhead expense, incident to carrying on our business.

But this annual loss, great as it is, is small in dollars and cents compared with what we lose by neglect, neglect to avail ourselves of the means of creating wealth, neglect to reclaim wealth-creating lands, neglect to conserve and make use of other natural resources.

No attention whatever had been given this matter until it began to be hammered upon the country by Mr. Roosevelt, but before we were fairly awake he passed out of office, since when we have been conserving things in a most leisurely and haphazard way, hardly at all.

A nice thing about a genuine thorough conservation policy is that when properly executed its benefits will be threefold. For the prevention of the great annual devastating floods (the first benefit), control must be established over the headwaters of our streams. Thus, we will have means for developing power and electrical energy and for the irrigation of arid lands, these results being grouped under the head of the second benefit.

With the waters thus controlled at all times, there will be preserved a steady flow in the lower rivers for navigation, but never enough for floods, thus lessening the swamp area of the country and making easier the drainage of swamps not directly caused by the floods. Here we have the group of the third benefit.

Now, if this country in all its breadth and length could be disastrously affected by such a loss as that caused by the San Francisco earthquake and fire, how would it be affected by the prevention of the waste by floods and how would it be affected if we were to make use of the great natural resources which we are neglecting?

Senator FRANCIS G. NEWLANDS, to whom we of the West owe so much for what has been accomplished in the way of reclamation, has already taken up this still greater matter for the benefit of not only the West but the entire country. We wish him God speed in this new undertaking and hope that the same degree of success will crown his efforts as that which followed his movement for the reclamation of arid lands.

—

[From the Picayune, New Orleans, La., Dec. 26, 1912.]

THE CONVENTION FOR PROTECTION FROM FLOODS.

Early in January there will be held in this city a convention representing many States of the River Regulation and Flood Prevention Association.

This is a very important body, and while it will devote its energies to dealing with Mississippi River and its great tributaries it must not be confounded with the Deep Waterways Association that has held annual conventions in the cities along the river, several of which were in New Orleans.

The object of the first-named convention is to arrest and store up the flood water in the great tributaries of the Mississippi River, so as to prevent any and all floods in the lowlands of the southern tier of States, while the subject of river navigation is a secondary consideration, although not neglected. The object of the deep-waterway advocates is to provide first of all for the uses of navigation, while the measures necessary to obtain deep water in the channel are considerations of chief importance, while protection from floods is to follow as a necessary consequence.

The regulation of the river as the main factor in flood prevention is urged in the interest of the draining and reclamation of the lowlands of Louisiana, Mississippi, Arkansas, and other States, while the deep-water advocates are working in the interest of such river improvements as will clear out and maintain a channel for a great river commerce, and as a necessary consequence keep the river within its banks and thereby put an end to floods. It is necessary to distinguish between the two bodies so that all the objects and interests concerned may be understood without confusion or misapprehension, because all are important to the people of this city, the people of the lowlands, and the owners of the swamp region.

The movement for river regulation is in aid of a bill already before Congress which embraces among its chief provisions that since the destructive floods in the great continental river are caused by the waters that are brought down by the main tributaries, and since protection from these floods is a public duty, and since all the natural interstate waterways in the Nation are necessarily under the direct jurisdiction of the National Government, it is the duty of the National Government to prevent these floods.

This prevention, according to the terms of Senator NEWLANDS's bill, is to be accomplished by constructing great dams on all the chief tributaries and store up the superfluous waters of each tributary so that no flood can occur in the main river, and in seasons of low water the contents of the lakes or reservoirs formed by the dams are to be drained out by degrees, so that there can be no flood, while the water in the channel will be reenforced when needed for navigation. In the absence of flood waters in the Mississippi River the operation of draining the lowland swamps can go on undisturbed by any fears of future inundation.

But in order to carry out this plan of keeping the flood waters away from the southern lowlands, they will have to be stored up on the lands of Northern States. For every square mile of southern land protected by the proposed process a corresponding area of northern lands must be covered by the water stored up in lakes created for the purpose, and as these artificial inundations will necessarily be in the valleys of the tributary rivers they will cover up a large extent of valuable lands nearly equal in area to those it is designed to protect in the South.

The great tributaries on the east side of the Mississippi are the Ohio, the Tennessee, and the Cumberland. The Ohio takes water from the States of New York, Pennsylvania, Virginia, West Virginia, North Carolina, Ohio, Indiana, Illinois, Tennessee, and Kentucky. This is an immense area, with an annual rainfall of 40 to 50 inches. Many reservoirs or artificial lakes will be required to store up the excess of waters, and much of this land is of large value, much of it underlain, with coal, oil, and iron ore.

Then, there is the Tennessee River, as long and draining as great an area as the Ohio and taking water from Virginia, North Carolina, Georgia, Tennessee, Kentucky, and Alabama, carrying off as great a rainfall and requiring large spaces in which to store its surplus waters.

On the west side of the Mississippi is the Missouri, not less than 3,000 miles long and taking water from British America and a vast region of the United States, equaling a half million square miles of area. It is true the rainfall is not so great as on the east side of the Mississippi, but for all that the Missouri floods must be caught and stored up in great lakes.

Then there is the Arkansas River, taking water from Colorado, Kansas, Oklahoma, Missouri, and Arkansas. It will require large reservoir capacity to hold its floods.

It is to be remembered that the land upon which these mighty waters are to be arrested and imprisoned will have to be bought and a vast work of construction required, and the lands so covered up will be lost to agriculture and every other productive use.

On the other hand, experience in this country and for many centuries in Holland proves that the river floods can be fenced out from the lands, and in this country it has been done for years in the past to a large degree. There is no question of the efficiency of the levee system, provided the stability of the banks on which they are built can be assured, and that they can be has been demonstrated.

The Mississippi River Commission, a national body charged with the improvement of the river for navigation, worked out to a certainty that the current of the river would clear out its channel and maintain it for every purpose of commerce and navigation if the swiftly moving waters could be prevented from corroding and undermining the rich alluvial lands which formed the river's shores. Not having the funds to devote to bank protection, that sort of work was only done in short stretches and not in a connected, systematic way, as is required. There are localities in which the ordinary work of revetment has not proved efficient, but there is no trouble in meeting every local condition and difficulty.

The entire work, since it devolves largely on the National Government, should be left as to the methods to be employed to the United States engineers, since no mere uninformed, impractical theorist is competent to decide on it. It is a matter of experience and not of theory that levees properly built on properly protected banks will fulfill every demand for protection from floods, and the operation of draining and reclaiming the swamps of Louisiana and Mississippi can be carried on with as much security as that enjoyed by the people who live and have lived for centuries behind the dikes and embankments that keep out the high tides of the North Sea and the floods of the River Rhine.

What is of the greatest importance is that the entire subject of protection shall be fully discussed and made fully intelligible to all concerned and an agreement arrived at to leave the decision as to measures and methods to the United States Army engineers. The grand success made by those engineers in the construction of the Panama Canal has established universal confidence in their sound professional judgment as well as their scientific knowledge, and the final decision can be left to them with the assurance that the work will be faithfully and efficiently done.

—

[From the Stockton Daily Evening Record, Stockton, Cal., Tuesday, Nov. 26, 1912.]

MEN WITH A VISION.

The man with a "vision" is no longer championed by Y. M. C. A. orators alone. Like the man who was once considered soft-headed because he "stood for principle," the man with a vision is being called into the public service. In a hard-headed, practical age, society is turning for relief and hope to the dreamer of great dreams.

One was reminded of the fact last evening in listening to the closing words of Senator NEWLANDS'S address on our country's river problems.

Sentiment is not indigenous to levees. Landscape art is hardly expected to gather its inspiration from dams and ditches. Esthetic conceptions are not searched for in the reclamation of swamps. The figures that tell of the devastation wrought by floods do not sing in poetic strain. The possibilities of water conservation and distribution have never been the inspiration of epic or flowery prose.

But the human mind is breaking from the thongs of purely utilitarian conceptions of values. Senator NEWLANDS, in his plea for his

bill, urged it at once as a business measure and as one that would lend the people into easier, happier, and fuller enjoyment of the bounties of nature. His call was for men of vision, for men whose perspective could sweep far beyond the half billion dollars the Government is asked to spend for irrigation, flood protection, and navigation. He asked that man fix his mind not on piles of profits counted in shimmering gold, but on the desert that would be made to bloom as the rose, on the river running free and clean in the interests of peaceful commerce, on the mountain water storage lakes from which the thirsty valleys could drink deep and long for their nourishment.

It was a pleasure to hear the Nevada Senator extol a noble, humanitarian sentiment; it was a pleasure to learn that he bases his plea for his magnificent project on the good it would do mankind rather than the profits it would bring to "business." It was even more interesting to note that such sentiments found ready response in an audience composed largely of business men. Our citizenship seems to be far more receptive to great visions than it was a few years ago. The dull, dreary grind of the business man and the laboring man has not lessened, but both of them—equally victims of the system evolved by the sordid past—are looking forward to the day when the peace and plenty spread in the lap of nature by the Creator shall be the common, free, and full heritage of all mankind.

—

[From the Stockton Daily Independent, Nov. 26, 1912.]

NEWLANDS DOING GOOD WORK.

There is a growing interest being manifested by all classes of people in water problems, and throughout the country there is a general awakening to the fact that the land's greatest heritage has been negligently left to go to waste in its flow to the ocean and too frequently doing untold devastation and enormous damage to property in its path. That every ounce of water that flows to the sea should be made to serve a useful purpose is now dawning upon the people as sound business policy, and throughout the Nation conservation schemes are being given more attention than ever before. Stockton has been among the foremost in its efforts to harness the waters, and the progress made here in effecting an organization to that end and the public-spirited interest taken in the conservation movement bids fair to win for this section much earlier relief than may be gained in other parts of the country. Conservation of flood waters is now recognized as one of the most crying needs of the Nation, and until the waters have been made to serve all, with damage to none, the country's development will be held in check and the people deprived of the fruits of their greatest asset.

Senator NEWLANDS's plan of Federal recognition of the waterways problem is most logical, viewed in a general sense. How it may work out in detail may be debatable, but the general plan to have the Government, through appropriations, enable localities to deal directly with their waterway problems offers the greatest hope of any plan yet submitted to the people, and the educational work the Senator is doing throughout the country in the interests of the waterways, flood-water control, navigability of streams, and the conservation of all waters is accomplishing a great deal of good, and his efforts will stamp him among the foremost of conservationists and the author of one of the most important bills ever presented to Congress.

—

[From the Los Angeles (Cal.) Times, Nov. 27, 1912.]

CHECK THEM.

The workers of the Arizona and California river regulation commission have a great work before them at Washington in aiding, by their presentation of facts and arguments to the committees of Congress, to obtain the passage of a bill appropriating $10,000,000 per annum for reservoirs and aqueducts in California and Arizona. In this work they will have able allies, or, to speak more accurately, they will ably aid those who are already allied for the work. There is Senator FRANK NEWLANDS, of Nevada, who is the father and mother and uncle and aunt of the policy of Federal aid to irrigation. There is the poetical young Senator HENRY T. ASHURST, of Arizona, who in one term has leaped to the front as the blue-sky orator of the Senate. There is Senator SMITH of Arizona—good old Mark—who always knows what he wants and usually gets what he goes for. When the Secretary of the Treasury sees Mark coming with a demand for an appropriation for Arizona he places the key of the Government strong box on a desk and crawls under the office lounge. There are Senators SMOOT and SUTHERLAND, of Utah, who will leave their dinners at any time to explain to a New England Congressman the advantages of irrigation. There are our own Senators and those from New Mexico, from Colorado, from Wyoming, from Idaho, from Washington, and from Oregon. In all there are 20 Senators from the Pacific and Rocky Mountain States, and there are 24 Senators from States fronting on the Mississippi River who can be counted upon to push legislation for the impounding of flood waters and the irrigation of arid lands.

With the passage of the bill in behalf of which the Arizona and California river regulation commission will do stalwart work, the cry of "back to the farm" will no longer be a barren ideality, for there will be farms to "go back" to on both sides of the Colorado River. Parker will be the third city of Arizona, the lower San Joaquin Valley will be densely populated, and Los Angeles will be the depot and entrepôt of an additional million of people. The Arizona and California river regulation commission ought to be checked by our merchants and manufacturers and home owners—checks in three figures preferred, those in two figures gratefully received.

—

[From the Stockton (Cal.) Mail, Nov. 27, 1912.]

SPLENDID START FOR RIVER REGULATION.

The results that may be accomplished by thorough organization, persistence, and attention to detail are shown in the action of the realty dealers, who have assumed the initiative and taken up the responsibilities of a campaign for the Newlands bill. The sentiment was here; energy and influence were not lacking; but it needed the practical advice of George H. Maxwell to give proper direction to the work. Since he has handled similar conditions in practically every parish of Louisiana, and has organized scores of associations having in view the same ends, his cooperation was appreciated to the utmost.

How general is the desire for solution of the water problems of this section of the State will be indicated by the fund Stockton business men are raising to exploit the needs of the San Joaquin River and to assist in bringing about adoption of the Newlands bill. That California knows the situation and is fully conversant with the needs of this community is not sufficient. Mr. Maxwell wants the matter explained to the whole United States, so that there may be no interference because of congressional ignorance. The movement has a good flying start, the object is a most worthy one, and it is to be hoped that every Stockton business man will contribute toward the campaign fund.

—

[From the Los Angeles (Cal.) Cultivator, Nov. 28, 1912.]

RECLAIMING THE LANDS.

We doubt not that the communication in last week's Cultivator by Mr. George H. Maxwell will be considered a wild dream by many readers; wilder perhaps the one outlined in this issue calling for reclamation of the 5,000,000 acres along the Colorado River, but we trust the address made at the recent River Regulation Congress held in Los Angeles will attract attention to the benefits to this country should the dreams be realized. That they will be goes without saying, if the American people awake to the necessity of the realization.

For the Government to expend $500,000,000 will call for strenuous work; but with the party now in power committed to flood storage, and with the necessity more apparent than ever for parties standing on their platforms after election as well as before, we believe the greatest need is immediate action to bring before Congress and the East the necessities in the case.

Fortunately the Newlands Act will not only benefit California and Arizona and the whole West but much of the East.

—

[From the Redlands (Cal.) Review, Dec. 1, 1912.]

THE CAUSE OF NATIONAL RECLAMATION.

The cause of river regulation through source-stream control, the use of now wasted flood waters, and the prevention of floods and overflows has been given great impetus through the consolidation of the National Irrigation Association and the National Reclamation Association under the name of the latter, with C. B. Boothe, of Los Angeles, as president, and George H. Maxwell, of New Orleans, as executive director, and the announcement that a national conference will be held at New Orleans January 6 and 7, 1913, for the purpose of finally deciding upon the details of the campaign to secure the enactment of the Newlands-Bartholdt river-regulation and flood-prevention bill by the Federal Congress.

This conference will be held by the National Reclamation Association, under the auspices of the Los Angeles Chamber of Commerce, the New Orleans Progressive Union, the Pittsburgh Flood Commission, the Louisiana Bankers' Association, the Stockton (Cal.) River Regulation Association, the Arizona and California River Regulation Commission, the Louisiana Reclamation Club, and other organizations and delegates representing the commercial organizations of every State in the Union are expected to attend.

The primary object of the conference will be the consideration of the Newlands-Bartholdt bill as it affects the interests and needs of the several sections of the country.

This bill provides a continuing appropriation of $50,000,000 annually for 10 years, and the organization necessary to enable the Federal Government to harness the source streams of the great rivers in such manner as is necessary to permit the use for irrigation, for power, and for dry-weather navigation of the flood waters that now go to waste in destructive torrents, for the building and maintenance of necessary levees, and for other works of a protective nature. Its application is general, and all of the great rivers come within the scope of its operations.

The conference will pass upon the adequacy or inadequacy of the specific appropriation provided for the improvement of such rivers as the Mississippi, the Ohio, the Missouri, the Sacramento, the San Joaquin, and recommend such changes in the specific appropriations as seem wise in the light of the great flood of last spring. No attempt will be made to change the fundamental principle on which the bill has been created. In this way it is planned to safeguard the interests of those sections needing levees, of those sections needing water-power and dry-season navigation, and of those sections needing irrigation.

With the specific recommendations of this conference in hand, backed up by resolutions of indorsement by many leading organizations in all parts of the country which have already been secured, the combined forces of the allied organizations of the National Reclamation Association, headed by George H. Maxwell, will go to Washington to begin the fight for the bill at close range.

The Democratic Party is committed to a policy of river regulation through source-stream control, and in a telegram dated Sea Girt, N. J., September 29, to Senator FRANCIS G. NEWLANDS, president of the National Irrigation Congress, then in session at Salt Lake City, Gov. Woodrow Wilson, President elect, said: "Please express to the National Irrigation Congress my hearty approval of the policy it is met to promote, and especially of the policy of supplementing bank and levee protection by storage of flood waters above for irrigation and water power, turning floods from a menace into a blessing and at the same time abundantly feeding navigable waters."

With thousands of letters from manufacturers and business men in all parts of the country indorsing the Newlands-Bartholdt bill and promising full cooperation in its possession, the executive committee of the National Reclamation Association, which is domiciled in New Orleans, is of the opinion that opposition to the bill will be short lived once the fight for its enactment shall have been carried to Washington.

—

[From the Rochester (N. Y.) Times, Dec. 4, 1912.]

RIVER REGULATION.

The cause of river regulation through source stream control, the use of now wasted flood waters, and the prevention of floods and overflows has been given great impetus through the consolidation of the National Irrigation Association and the National Reclamation Association, under the name of the latter. The announcement is made that a national conference will be held at New Orleans January 6-7, 1913, for the purpose of finally deciding upon the details of the campaign to secure the enactment of the Newlands-Bartholdt river regulation and flood-prevention bill by the Federal Congress.

This conference will be held by the National Reclamation Association, under the auspices of the Los Angeles Chamber of Commerce, the New Orleans Progressive Union, the Pittsburgh Flood Commission, the Louisiana Bankers' Association, the Stockton (Cal.) River Regulation Association, the Arizona and California River Regulation Commission, the Louisiana Reclamation Club, and other organizations and delegates representing the commercial organizations of every State in the Union are expected to attend.

The Newlands-Bartholdt bill provides a continuing appropriation of $50,000,000 annually for 10 years and the organization necessary to enable the Federal Government to harness the source streams of the great rivers so as to permit the use for irrigation, for power, and for dry-weather navigation of the flood waters which now go to waste in destructive torrents, for the building and maintenance of necessary levees, and for other works of a protective nature. The application of the bill is general, and all of the great rivers come within the scope of its operations.

The conference will pass upon the adequacy or inadequacy of the specific appropriations provided for the improvement of such rivers as the Mississippi, the Ohio, the Missouri, the Sacramento, the San Joaquin, etc., and recommend such changes in the specific appropriations as seem wise in the light of the great flood of last spring. No attempt will be made to change the fundamental principle on which the bill has been created. In this way it is planned to safeguard the interests of those sections needing levees, of those sections needing water power and dry-season navigation, and of those sections needing irrigation.

With thousands of letters from manufacturers and business men in all parts of the country indorsing the Newlands-Bartholdt bill and promising full cooperation in its possession, the executive committee of the National Reclamation Association, which is domiciled in New Orleans, is of the opinion that opposition to the bill will be short lived once the fight for its enactment shall have been carried to Washington.

—

[From the Los Angeles (Cal.) Tribune, Dec. 5, 1912.]

WIDE INTEREST IN RECLAMATION MEASURE.

Interest manifested in the Newlands-Bartholdt river regulation bill is highly encouraging to its friends. A national conference, to be held in New Orleans January 6 and 7, in behalf of the movement to secure a $50,000,000 appropriation each year for 10 years from Congress for the harnessing of streams and prevention of floods promises to be one of the notable gatherings of recent times.

With the year's appalling destruction of property and life along the Mississippi fresh in mind, the folly of meeting the protective needs of river valleys by feeble levees or any other method than control of headwaters should impress Congress. The Mississippi flood and similar catastrophies in the Missouri, Ohio, and other valleys are monuments, so to speak, to American stupidity and waste.

With proper control of headwaters there need be no floods. There could be millions of blooming acres in California and elsewhere, now barren with thirst for water that not only goes to waste, but, gathering sudden volume, becomes an engine of terrible destruction. It is not too much to say that the Newlands-Bartholdt bill proposes the surest and most promising investment ever made by the Government.

Volumes of water that are a curse to humanity may be turned into a blessing. It will be done—if not by the next Congress, then by a later one. And when it is done and the fruits in the form of radiant land and mighty electric power are enjoyed by our children, they will marvel at our primitive stupidity that so long wasted the gifts of God right at hand and whined about the high cost of living.

—

[From the Brawley (Cal.) News, Dec. 6, 1912.]

MAKING HISTORY.

No movement more important to the Southwest has been ever undertaken than the conservation of the flood waters. If the Newlands bill, with an appropriation of $5,000,000 a year for 10 years for work on the Colorado River and its tributaries, becomes a law, the Imperial Valley will be the chief gainer.

As the largest irrigation system in the United States it commands respect; with the Mexican lands added, it will rival the largest in the world, with more than a million acres under water.

The local aspect of the movement alone is stupendous. When considered as a part of the whole the proposition reaches a magnitude placing the United States among the wonder workers of the world.

But not the lands along the river alone will benefit. Irrigated sections call for more of the necessities and luxuries of life, owing to the dense population, than any other section of the country. Instead of seeking new markets maintained precariously abroad the United States will provide them at home and dollar diplomacy will be outdistanced.

With such an aim the Imperial Valley can not fail to stand behind the Arizona and California River Regulation Association with all the vigor and money at its command.

—

[From the Philadelphia Inquirer, Dec. 7, 1912.]

TAFT ON THE MISSISSIPPI.

President Taft took unassailable ground when he declared that he was in favor of an appropriation of fifty millions to conserve the waters of the Mississippi so that the damage from the annual floods might be prevented, but was opposed to spending a dollar simply to dredge the channel for the sake of a commerce which does not exist and which is not likely to revive.

As the Inquirer has often pointed out, the Mississippi can never be made a great highway of transportation until more fundamental considerations are first given attention. At present the river has a small amount of local steamboat traffic, for which the channel is sufficient. Otherwise the Government maintains the lower reaches at the delta for the benefit of the great and growing commerce of New Orleans. It can do no more in this specific direction.

But it must be apparent that the channel should be looked after, not on transportation grounds but those of public safety and conservation of property. Every year the natural hindrances to drainage disappear and the floods become higher and shorter, with consequent damage of enormous extent.

The suggestion to create great reservoirs in Arkansas and elsewhere, to convert present swamps into lakes, so that the floods may be regulated, just as are the waters of the Nile, seems to be the only practical proposal. Congress would do well to have this consideration carefully examined and spend money on any good plan. The "pork-barrel" feature of the Father of Waters must disappear.

—

[From the Arizona Gazette, Phoenix, Ariz., Dec. 10, 1912.]

NEWLANDS'S RIVER REGULATIONS.

(By B. A. Fowler.)

There is now a bill before Congress which is attracting much attention North, South, East, and West. It was introduced April 6, 1911, by Senator FRANCIS G. NEWLANDS, of Nevada, is known as the Newlands river regulation bill (S. 122), and like the national irrigation act, with which Mr. NEWLANDS's name is inseparably linked, this also is a masterpiece of constructive statesmanship. For years the subject matter of this bill has been before the National Irrigation Congress for discussion and action. Some of our citizens will recall that the irrigation congress, held in Phoenix in 1896, passed a resolution calling on the Congress at Washington to appropriate money for the building of reservoirs, and the river and harbor bill of that same year provided for the examination of reservoir sites in the West to determine whether they were practicable and desirable for three things: First, for improving the navigation of navigable rivers; second, for providing water for irrigation of arid lands; and third, for preventing destructive floods.

Under that appropriation Capt. Chittenden, since advanced to rank of brigadier general, made an exhaustive report which was a model. He clearly demonstrated that reservoirs on the headwaters of navigable streams would regulate the flow of the rivers by holding back the water that otherwise would be wasted in time of floods and turning it into the stream at the low water season when it was needed both for navigation and irrigation. Thus navigation would be improved, irrigation water provided, and destructive floods prevented.

This was in 1896–97, but the Nation was not awake to the wisdom or necessity of such an economic policy. However, "all things come to them who wait" and "hustle while they wait," and the irrigation congress and others who believed in the Chittenden report hustled and waited.

In June, 1902, the national irrigation act was the first notable result of this hustling and waiting, and nine years later comes this "river regulation" by the Nation. As introduced, this is a bill "to create a board of river regulation and to provide a fund for the regulation and control of the flow of navigable rivers in aid of interstate commerce, and as a means to that end to provide for flood prevention and protection, and for the beneficial use of flood waters, and for water storage, and for the protection of watersheds from denudation and erosion, and from forest fires, and for the cooperation of Government services and bureaus with each other and with States, municipalities, and other agencies."

There is "reserved, set aside, and appropriated" $50,000,000 annually for each of 10 years, and "made available until expended, out of any moneys not otherwise appropriated." The "board of river regulation" will consist of the Chief of Engineers of the Army, the Director of the Geological Survey, the Forester of the Department of Agriculture, the Director of the Reclamation Service, the Chief of the Bureau of Plant Industry of the Department of Agriculture, the Secretary of the Smithsonian Institution, one civil engineer, one sanitary engineer, and one hydroelectric engineer. The last three shall be appointed by the President, hold office at his pleasure, and each receive $7,500 per year. All formal action taken and expenditures authorized by the board shall be reported to the President and by him transmitted to Congress.

Broad powers are given the board for cooperating with States, municipalities, corporations, towns, counties, districts, persons, and associations, as well as with the various scientific and constructive bureaus of the United States, for the encouragement of independent initiation and construction.

The board is also empowered to harmonize and unify and bring into correlation and coordination the investigations made and information and data obtained by the various bureaus and offices of the Government relating to questions involved in this act and with a view of securing unity of action, promoting economy and providing against duplication, unrelated or incomplete work.

The board must develop and prepare comprehensive plans for the conservation, use, and development of the water and forest resources in such manner as will best regulate the flow of source streams, navigable rivers, and a hundred other phases of the subject, like flood protection, drainage, reclamation of swamp and overflow lands, etc.

The Secretary of the Smithsonian Institution is to secure all obtainable knowledge concerning the problems involved, establish a museum of conservation to aid in the education of the public on these subjects.

The Chief of the Bureau of Plant Industry, the Forester, the Director of the Geological Survey, the Director of the Reclamation Service, and the Chief of Engineers of the Army shall each use all the resources of their offices to contribute to the vast work of this board, and the three engineers of this board, appointed by the President, are to supplement the above.

Should the current revenues be insufficient to provide the $50,000,000, the President is authorized to make up the deficiency by issuing 3 per cent 30-year United States bonds.

For carrying out the provisions of this act the moneys annually appropriated shall be apportioned as follows:

Smithsonian Institution, $1,000,000.
Bureau of Plant Industry, $2,000,000.
Geological Survey, $3,000,000.
Reclamation Service, $10,000,000.
Forest Service, $10,000,000.
Corps of Engineers, United States Army, $24,000,000.

Should this bill become a law it would save annually millions and tens of millions of dollars and thousands of lives, would multiply transportation facilities and solve vexing transportation problems, improve national sanitation, reclaim more than 80,000,000 acres of swamp lands, increase food production and decrease cost of living, and save this Nation from disastrous floods, such as are a curse to China to-day and which made of the surpassingly rich and fertile plains of Mesopotamia a "land of desolation" over which the jackal, the hyena, and other wild beasts now roam at will and alone.

—

[From the Stockton (Cal.) Independent, Dec. 12, 1912.]

CURRY FAVORS NEWLANDS BILL, PROVIDED IT IS AMENDED TO INCLUDE AN APPROPRIATION OF $50,000,000 FOR CALIFORNIA RIVERS.

Strong efforts will be put forth by Congressman Elect Charles F. Curry, of this district, to secure the passage of the Newlands conservation measure and to secure under that bill $5,000,000 per year for 10 years for the conservation of the flood waters of the San Joaquin and Sacramento Rivers. He defined his position yesterday morning, following a conference with George H. Maxwell, executive director of the National Reclamation Association, who chanced to be in Stockton yesterday.

Mr. Curry states that he had at first planned to introduce a bill asking $40,000,000 to be immediately available for the San Joaquin and Sacramento Rivers, but he agreed to withhold it provided the Newlands bill is amended to provide $50,000,000 for the two California streams, and to do all in his power to secure the passage of the bill embodying a nation-wide conservation plan.

[From the Pomona (Cal.) Times, Dec. 13, 1912.]

FLOOD WATERS.

Egypt is the creature of the Nile. In other words, the great valley and the level lands about the delta have for centuries been dependent on the flood waters of that great river. When the Nile poured its annual floods through the valley and inundated the fertile fields on either side, then Egypt had a year of plenty and the land brought forth by handfuls. If the floods failed, then Egypt had a year of famine.

It may never have occurred to our readers that right at the very doors of California we have another Nile and another Egypt. The great Imperial Valley and the Colorado River every year enact the same thing that has gone on for centuries in Egypt. With the great floods of the Colorado River comes the riches that have made the Imperial Valley the granary of the Southwest as well as the most wealthy agricultural district in the world. Every inch of available water that under the present system can be secured is now at work in the Imperial Valley, and yet there are thousands of acres that are ready to blossom as the rose if they can only receive the life-giving fluid. What is to be done? There is only one thing that can be done, and the great movement is already under way; it is no less than the conservation of the flood waters of the Colorado River. Every year hundreds of thousands of inches of water are emptied into the Gulf of California or poured in a flood over the fertile fields along its banks, just as often carrying devastation as prosperity to the lands on either side. Senator NEWLANDS has introduced into Congress a bill whereby millions of dollars are to be appropriated for the erection of great storage reservoirs, which shall be filled to the brim with the flood waters during the time of the annual freshet. These waters shall remain impounded until such time as they shall be needed, and then slowly conducted through canals to the thirsty fields of the great Imperial Valley to bring riches to thousands of ranchers and to raise food and clothing for a great multitude of people.

It is a great undertaking and worthy of the effort of a lifetime; for if Senator NEWLANDS accomplishes nothing more during the remainder of his life than to bring to a successful issue the great undertaking that he has inaugurated he will have reared to himself a monument that shall be almost as imperishable as time itself. It is to be hoped that every Congressman and the two Senators from California will give their very best efforts to support the bill that shall bring prosperity and millions of dollars to this great State of ours.

For many years past we have had a growing conviction that the future of the water problem of southern California was connected inseparably with the conservation of the flood waters of the country. We have a half dozen natural locations in this vicinity where, with the expenditure of a few thousands of dollars, great storage reservoirs could be built. These great impounding places can be connected with every acre of land and orange grove in these valleys by water pipes already installed and floods of gravity water be poured on our thirsty orchards at a price much less than is now demanded of the rancher. The use of these flood waters will serve several purposes; the problem of caring for them during the winter season will be greatly lessened; the ruin that they frequently accomplish will be avoided; their use early in the season will conserve the underground supplies and remove the anxiety of the men whose business it is to furnish from an ever-decreasing supply the life-giving fluid for an increasing acreage of citrus trees.

This move for the conservation of the flood waters is one in the right direction, and we see no reason why the matter should not have the hearty support of every Member of Congress. As to starting the work of flood-water conservation in southern California, we believe that the movement is worthy of serious consideration by practical men. The drilling of wells by small companies represents a makeshift necessary because of a scattered population and very limited capital. With our rapidly increasing population and the rapid growth of capital, there is no reason why we should not seriously contemplate the massing of our means and saving for our future prosperity that which at present is an annual source of waste aggregating hundreds of thousands of dollars.

—

[From the Stockton (Cal.) Mail, Dec. 16, 1912.]

MAXWELL, THE NEWLANDS BILL, AND THE OPPORTUNITY OF STOCKTON.

On behalf of northern California, the region most vitally interested in river control and flood prevention, Stockton has taken the initiative in support of the Newlands bill, and a week's effort has sufficed to demonstrate that the movement will be an unqualified success. For the time being there is no matter of more importance to the community, and even in this busiest of seasons it is not unreasonable to suggest that the bankers, merchants, and landowners contribute some portion of their time to getting fully acquainted with the plans and purposes of the campaign and the men who have had the enterprise to gain this credit for Stockton.

Because Los Angeles, having no rivers of her own, is interested in the improvement of the Colorado, several hundred miles away, the live and energetic commercial bodies of that city have formed their own association, thereby seizing the distinction of being the first California city to organize a branch of the National Reclamation and Irrigation Association. It needs no prophet to foretell that Los Angeles will take a prominent part in the campaign for passage of the Newlands bill, and it will be interesting to compare the methods of the south with the efforts of all the commercial bodies in northern California. This is a subject in which more than 50,000 citizens of the Sacramento and San Joaquin Valleys have been interested for nearly half a century. Without recourse to complicated legislation and without the danger of vexatious delay, there is to be procured through the Newlands bill for immediate use a fund of $50,000,000 for improvement of the two rivers, for prevention of floods from which Stockton has been the greatest sufferer, and for the construction and maintenance of canals and reservoirs that will irrigate millions of acres of semiarid land—an empire that will support its hundreds of thousands.

Sacramento would gladly have taken over the central organization that will campaign for the Newlands bill on behalf of California, but Stockton already had founded the river regulation commission, and George H. Maxwell, executive officer of the national association, came here to find a few public-spirited men already battling for recognition and already seeking relief from the annual dangers of floods. It is through the days and nights that Maxwell has devoted to the work, through his matchless energy and his long experience, that Stockton is to-day so well advanced in the preliminary work.

Maxwell has undertaken, in good faith, to do something that northern California, even in the hour of gravest danger and heaviest loss, has never attempted. He is endeavoring to get together the fund necessary for a campaign that will make an impression upon Congress, to be expended in the same manner and at the same time as the funds raised in Los Angeles, in Arizona, in New Orleans, and Pittsburgh. He knows the value of concentrated results and organization. He prefers to depend upon the voice of the Nation rather than upon the efforts of one Congressman or of one congressional delegation.

Out of the $12,000 necessary to launch the two-year campaign, Maxwell will not receive a dollar. The completion of this fund will simply obligate him to remain in California and direct another fund-raising campaign for $30,000 more, to be secured outside of Stockton, and from which is to be deducted one-third of his annual salary and expenses. At a meeting in the chamber of commerce last week President Nims of that organization intimated to Maxwell as broadly as possible that he might name his own salary and remain in Stockton as its chief booster, but Maxwell only smiled and shook his head. Maxwell's salary of $12,000 a year, in view of the work he has done, the experience and acquaintance he has gained, and the sacrifices he has made to continue this work in and out of season for many years past, is more than reasonable, since it is procured largely through his own efforts, the contagion of his enthusiasm, and the soundness of his advice. It is not more than is paid to-day to the manager of an interurban railway. It is exceeded by the remuneration of a dozen department chiefs of the Panama-Pacific Exposition, and it is the minimum for the executive heads of many California corporations who are not the equals of Maxwell in ability or enterprise.

It was Maxwell who analyzed the sentiment of northern California upon the river-control question, and it was Maxwell, the confidant and assistant of Senator NEWLANDS, who obtained his consent and the consent of all the eastern and southern river-improvement associations to incorporate in the pending bill the clause which provides for the Sacramento and San Joaquin Rivers an annual appropriation of $5,000,000 for 10 consecutive years—a fund that is admitted by all engineers to be adequate to solution of all the problems the people of this section have faced for many years.

That Stockton will gain prominence in this campaign can not be doubted. The work that can be done with $12,000 is laid out so that none may doubt its efficacy. The names of the hundred men who will compose the river-regulation roll of honor will be worth remembering when Stockton has a population of 100,000.

[From the El Centro (Cal.) Progress, Dec. 17, 1912.]

MAXWELL SHOWED US.

"Where does the money go?"

That was the main question put up to George H. Maxwell yesterday at the meeting called to hear the Newlands bill discussed.

The situation locally is almost identical with the situation nationally. Here the irrigation directors wish the people to express themselves as to their desires in helping to finance the campaign of education in favor of the Newlands bill. The directors themselves know the great benefits that would accrue to the valley should the bill with the Colorado River amendment attached be passed. They naturally want the O. K. of the people before acting in the matter. Congressmen are the same way. When it comes to making an appropriation of practically half a billion dollars, Congress wants to know if the people of the United States favor it.

This favorable sentiment must be created. To create it 20,000 editors must be converted; daily, weekly, and monthly mail must be sent out; tens of thousands of dollars must be spent for postage; more must be spent for literature, its composition and printing; the whole Nation must be aroused.

The Newlands bill must become a household word. It must be made popular. Its provisions must be heralded from Maine to California.

Men must be employed to do this work. Mr. Maxwell himself has given 20 years of his life to this work already. He is the foremost exponent of conservation of flood waters of various rivers; his time is valuable; he has drawn no pay for almost a year; he said he would continue this great effort even if he had to beg pennies on the streets to pay his expenses.

It cost a million dollars in honest effort to elect Woodrow Wilson President of the United States.

It surely is worth one-fifth of that amount to create a public sentiment that will compel the passage of the great Newlands bill, which is the masterpiece of legislation of the twentieth century.

Imperial Valley's part can surely be $5,000 if Stockton City can put up $12,000.

—

[From the New Orleans Item, Dec. 24, 1912.]

THE FLOOD-PREVENTION CONFERENCE.

The National Flood Prevention and River Regulation Conference set for January 6 and 7 should challenge the interest of every citizen of Louisiana and the greater area affected by the recurrent overflow of the Mississippi River. This meeting will bring together a good many of those who believe that the right way to attack the problem presented by the river is to begin at the headwaters and prevent floods, instead of taking hold at the bottom of the valley and trying to dam the floods as they sweep down. Those who advocate this course are opposed in political as well as in engineering policy to those who cleave to the present scheme of levee administration.

The cost of controlling the flow of great rivers is stupendous. So also are the damages continuously arising from failure to control their flow. The engineering problem which the process involves is tremendous and largely undeveloped. So also were the technical problems which beset the men who spanned the continent with railroads, irrigated the dry lands of the West, drove a plexus of rails through the rock beneath New York, tunneled the Hudson River, and severed the Isthmus of Panama. All these processes have resulted, and are expected to result, in gigantic benefits and profits, overwhelming even their own enormous costs. So also would the control of the great river which drains the continent between the Appalachians and the Rockies.

Not only would this stop the millions of dollars of loss sustained every year from high water on the Mississippi and its tributaries, and the tens on tens of millions of values destroyed now and again when high flood stages are attained, but it would also, say its advocates, fertilize and fructify great dry, barren areas now awaiting the waters which they propose to impound.

The proposals here outlined are given concrete shape in a bill now pending in both Houses of Congress. This was prepared by Senator NEWLANDS, one of the comparatively few men in Congress with the breadth and depth of real statecraft. Congressman BARTHOLDT, of Missouri, presented it in the House. The opponents of the plan it embraces call it a lunatic fancy. The very charitable among them say it is impracticable. These are precisely the same things which have been said about every large enterprise which the mind of man has conceived since man has had a mind. Sometimes they delay the consummation of great

conceptions, but they never prevented the realization of a single one. Soon or late NEWLANDS'S plan of river control, or some modification of it, will rule the streams of the United States, because the levees alone will not hold a flood that is constantly undermining them, or climbing over them, or doing both.

The acceptance of any such plan as this would mean the transfer of all control of the levees and all responsibility for them to the Federal Government, which is where their control belongs. This, however, is not a pleasant prospect for the numerous clans of levee patchers whose maladministration of the levees in the States along the lower course of the river has been characterized by dissipation, waste, and graft. Those who are absolutely conscientious never attain efficiency, because they lack the essentials of efficiency, and not all are either conscientious or capable. Whatever they attain or fail to attain is gained or lost at tremendous expense to a few States which ought not, in simple justice, to bear such a burden alone.

The people of New Orleans are more or less familiar with the old idea of river control. They have had the pleasure and profit of hearing Mr. RANSDELL a number of times. The last occasion on which they heard him, he addressed a large audience of them nearly two hours, after which another speaker presented the Newlands plan for 20 minutes, at the end of which the intelligent crowd indicated its very plain preference for the latter-day idea.

Our Representatives in Washington are now contending for a large appropriation for levees, with the enormous losses of this year's floods as their key to the country's consideration. We hope they get the money. Every little helps. The only way, however, to settle a question like this levee question is to settle it right. No amount of money piled into dikes will obviate the necessity of flood control. The higher they rise the harder they will fall when their foundations are scoured away.

Everybody in New Orleans has a pocketbook interest in the river and the levees. If you want to hear more about the proposals of Mr. NEWLANDS, the objections to it, and the answers to them, you should attend the conference which is to be held next month.

[From the Times-Democrat, Wednesday, Jan. 8, 1913.]

RIVER REGULATION AND FLOOD PREVENTION.

While the conference held in this city for river regulation and flood prevention has not been as well attended as was expected, it has none the less accomplished its purpose of presenting to the people of Louisiana and the Southwest, properly and strongly, the river problems and issues involved, and it has made them better acquainted with the Newlands bill, which the conference is so warmly advocating. The meeting was held in New Orleans for this very reason, to acquaint the State and city with what the River Regulation Association proposes to do to bring about a broader and better study of the problems in their broadest sense, and secure the cooperation of all who are interested in the regulation, control, and improvement of the Mississippi and its tributaries.

It is natural that the people living along the lower Mississippi should look at the question mainly or altogether from the standpoint of overflow, and that they should magnify the importance of levees, as this has been in the past the only way in which they have secured protection. To most of them the Mississippi and levees were regarded as one and the same problem. Latterly, even in this section, and especially after the experience of last year's floods, some doubts have arisen as to whether levees alone will assure us all the protection we need.

The conference in this city was for the purpose of calling attention to the other problems involved in river improvement, the use of reservoirs for retaining the flood, and thus preventing the freshet coming down in one gigantic wave; the use of water thus stored up to make the river navigable during low seasons; its utilization for irrigation purposes, and also for the production of water power.

All these points have been successfully presented in the speeches and resolutions; the plan of improvement urged has been launched before the community and will receive the consideration and study they deserve. The conference has also dwelt upon the importance of unity of interests, and insisted that by cooperation, acting together in all matters affecting the regulation of the river, we are most likely to secure the appropriation and legislation desired. An earnest effort has been made to prove that the interests having at heart the construction of reservoirs, irrigation of lands, etc., were not inimical to the demands of the people along the lower river, were not opposed to levees or failed to recognize the part they must play in any system of river regulation and improvement; and a number of changes and amendments have been proposed in the Newlands bill that will make it provide more liberally for the Mississippi south of St. Louis and for the construction of levees.

This, as we understand it, is what the conference was intended to accomplish—to present the question of river regulation more broadly than it has been presented before, to lead to the discussion of all the river issues, of all the plans suggested, and to show how all interests are affected, with the confidence that only by such general discussion and interchange of views will it be possible to reach a definite conclusion as to what ought to be done to secure united action.

Never has a better occasion presented itself than the present to secure favorable action from Congress and to protect the lower Mississippi Valley from overflow. The country realizes that this heavy loss must be prevented in future; it can not stand it without serious injury; that the Federal Government is responsible for the care of the river and its protection from overflow and must assume charge and control, and those along the river—the States, levee districts, and people—are now unanimous in favor of surrendering to the Federal Government all control of the rivers, all obligations in the matter of levee construction and the prevention of overflows. If we do not get all we want now it will be because we quarrel among ourselves and can not agree as to what we want done. The river regulation and flood prevention conference will, we believe, help to bring about an agreement by laying before the people of the lower valley many ideas and suggestions as to river improvement and regulation which have never been sufficiently considered here before.

[From the Daily Picayune, New Orleans, Wednesday, Jan. 8, 1913.]

THE IMPROVEMENT OF THE MISSISSIPPI RIVER AND THE PROTECTION OF THE VALLEY FROM FLOODS.

The bill proposed by United States Senator NEWLANDS, of Nevada, for the regulation and control of the waters of the Mississippi River and its tributaries, which has been offered in Congress, was considered at a meeting of delegates, chiefly from Louisiana, yesterday at the hall of the Progressive Union in this city.

The bill in question has not specially commended itself to the people of this city because it proposes to disregard the methods that have been employed in this part of the country, with a large measure of success, in protecting the lowlands of this State from the river floods, and have to a large extent been effective, and that is the building of levees. The people of this part of the country are confident that if the systematic protection of the river banks be added to the proper building of levees the problem of protection will be solved.

Senator NEWLANDS'S scheme, in brief, is to build dams on all the upper tributaries of the Mississippi River and store up the flood waters, only turning them loose gradually after the flood season had passed, and it was proposed that the entire burden of the work should be undertaken and maintained by the National Government. Such artificial lakes, established on the tributaries that have their rise in the Rocky Mountains and flow through the dry plains of the West, could furnish large quantities of water for irrigation, but the greatest part of our flood water comes from such eastern tributaries as the Ohio, the Tennessee, and Cumberland Rivers, and there is no need for irrigation in that region.

While the stored-up waters would cover large extents of land in West Virginia, Kentucky, and Tennessee, underlaid by coal and iron ore, the damage would be greater than the benefit. Moreover, it would cause the spending of all the public money in the highland States of the great valley and none in the lowlands. While this statement smacks of "pork-barrel" politics, there is at least some justice in the claim for a more equitable distribution of the money.

Moreover, what the Newlands bill proposed was a land reclamation scheme that had no reference to the improving of the rivers for navigation. It is not at flood tide that the banks are undermined and the caving occurs, but in the season of low water. The protection of the banks from caving and establishing their permanence and ability to support the levees is the grand object in view, and when that shall be accomplished, as it can and should be, everything that can be desired will have been done to protect the lowlands from overflow, so that the work of drainage and reclamation can be carried to the utmost limits.

At the meeting on Monday a committee was appointed to revise the terms of the Newlands bill, and the committee most properly insisted that all the proposed work should be carried on under the direction of the Mississippi River Commission, a national body charged with the care of the river and the improvement of its navigation, as well as protection from floods, and the entire work should be under the supervision of that body. It was also insisted that an appropriation of $10,000,000 a year be devoted to the care of the river from St. Louis to the Gulf of Mexico. With such amendments added to it and incorporated in the body of the Newlands bill, it can be made acceptable to our people and to assist in giving protection from floods to the southern lowlands and aiding in the development of the Mississippi Valley, besides improving the river as a channel for a great commerce. Then all interests will be promoted and the protection and development of the lowlands of the Mississippi River will be established.

Mr. NEWLANDS. Mr. President, I wish to add just a few words regarding the debate in which we have been participating for some days. What contentions have arisen during that time? First, the contention relating to the development of hydroelectric power near St. Paul, under the amendment introduced by the Senator from Minnesota [Mr. NELSON], and approved by the committee. The contention there was the same as the contention regarding the Connecticut River dam. The only difference between the two cases was that in the case of the Connecticut River dam it was constructed to serve the double purpose of navigation and the development of hydroelectric power by a private corporation acting under the authority both of the State and of the Nation, and it was sought to impose some charge upon the profits of the private corporation with a view to using the moneys thus received by the National Government in the promotion of navigation upon that river.

In the other case the dam was constructed by the National Government, but was to be constructed in such a way as to serve a double use, to serve the use for navigation and to serve the use for the development of hydroelectric power, a larger expenditure being acquired for the two uses than would be required simply for navigation. So the Government there was to impose a charge upon the corporation using the hydroelectric power compensatory in the shape of interest on the additional portion of the construction assignable to hydroelectric use.

Now, we had two contradictory votes, one striking out this charge as an invasion of State rights, the other approving the charge by the National Government as a reasonable charge for the extra expenditure made in meeting the requirements of the State.

I ask with reference to that specific matter, Is the time of the National Congress to be wasted year after year in taking up each one of these individual projects and dealing with it? Would it not be much wiser to have a board under whose general powers works could be undertaken covering both the use within the jurisdiction of the State and the use within the jurisdiction of the Nation under an apportionment of cost between them that will fairly distribute the burden?

Then we have another contention, a contention over the lower Mississippi River. We have there an Inland Waterways Commission, organized years ago, whose jurisdiction extended over the entire river. The jurisdiction there was so generally expressed as to embrace, in my judgment, not only the river itself but its tributaries.

Yet we found, as a matter of fact, the operations of that commission were confined to the lower reach of that river, from the Passes to Cairo. Later we extended its work as far up as Cape Girardeau, a total distance from the mouth of a thousand

miles. The purpose of the amendment of the Senator from Missouri was to add nearly 500 miles to the area of its operations, so that they would extend up as high as Rock Island.

The Inland Waterway Commission is an example of cooperative action, and illustrates the principle for which I contend regarding the entire waterway system. That commission was composed of three men belonging to the Engineer Corps of the Army and one representative of the Coast and Geodetic Survey, thus insuring the coordination of these two engineering forces, whose jurisdiction pertained to our rivers, but whose jurisdiction varied in character, and to these officials were added two engineers and a lawyer, appointed from civil life, thus making up the seven members of the Mississippi River Commission.

So in its very organization it was a coordinated body, and in its work it was a cooperative body, for, under the organic act of that commission, it was to cooperate with the States on the Mississippi River with a view to dovetailing river regulation and swamp-land reclamation and protection. Their operations have been cooperative ever since, the commission undertaking the dredging of the river, the bank revetment and protection to prevent caving banks, and undertaking, in cooperation with and through a division of expense with the States and levee districts, the construction of levees, which, it was held, were a part of the scheme of navigation as well as of swamp-land reclamation, the levees serving to keep the river within its channel and to prevent it from practically losing its channel by spreading over vast areas of swamp land.

That commission had an expenditure of about $3,000,000 a year when it ought to have had the power to expend at least $10,000,000 a year between Cairo and the Passes, and while it has done much good work in cooperation with the States, the deficiency in its work has been the fruitful cause of enormous disaster to this great area of reclaimed land in five States, in itself an empire of unexampled productiveness. Every one of these overflows can be attributed to some deficiency in appropriation. We have gradually enlarged our vision upon this subject, and we are now expending $6,000,000 annually where formerly we expended $3,000,000.

Now, what was this area? An enormous area of swamp land, over which the Mississippi River was accustomed in the olden days to spread itself, composed of an inexhaustible soil, a soil equal in fertility to that of the Nile. That entire area came into the possession of the National Government through the Louisiana purchase as a part of the national domain. At the very inception of that ownership and title, if the statesmen of that time could have read the future, they would have realized the folly of parting with that great domain to any sovereignty or any individual incapable of dealing with it in a big and comprehensive way.

Yet the United States, not realizing the value of that immense area, but realizing only the burden that might be imposed upon it by the construction of the works necessary to reclaim it, granted it to the States upon the condition they should reclaim it. The weak States threw their burden upon individuals, and so this domain fell in large areas into the hands of individuals who were incapable of dealing with it in the scientific way that would be required to increase its productiveness and make its production certain. So they have been at work in a feeble and ineffective way exhausting their resources for a century in the development of that great region, the work of one year being entirely destroyed by the flood of another, vast areas devastated, and large populations deprived of the resources of life.

We have attempted in a half-hearted, ineffective way to recover the ground lost, and the National Government, not now the owner of this area, finds itself called upon to aid in its reclamation, and the question is as to the constitutional power of the Nation. We all know, of course, that the entire power of the Nation over navigable rivers arises from the commerce clause of the Constitution. The promotion of interstate transportation comes within the national powers, and so we have gradually built up a system there of cooperation between the Nation and the States with reference to that vast area, but a cooperation lacking sufficient funds, a cooperation lacking a sufficient area of operation; for instead of at the start regarding the Mississippi, with all its tributaries, the Ohio, the Cumberland, the Tennessee, and the Missouri, with all its tributaries, the Platte, and the Arkansas River, as a unit and undertaking the complete regulation and control of those waters from source to mouth in aid of navigation, with a view of checking the floods in such a way as to delay and spread out their operation over the regions below, the Nation took control only of the lower reaches of the river and waited for these enormous floods coming from nearly 30 States of the Union to gather in enormous volume in the Mississippi River below Cairo, and thence down it sought to restrain these floods after their accumulated force was directed against this unfortunate region, instead of harnessing the floods at their very source, arresting their flow to the regions below, and extending the flood season over a longer period, thus diminishing the crest of the flood and diminishing its destructive power.

Now, what can be done in the way of scientific arrest of these flood waters that fall during the spring and winter upon the Appalachian Mountains and the Allegheny Mountains on the east and upon the Rocky Mountains in the West, and on the whole intermediate region, and make their way through the small source streams and tributaries into the main river itself, receiving additional accumulations from the very region affected?

We have done nothing practically with reference to arresting those floods. Yet, if we would only arrest them, we could make them instrumentalities of benefaction instead of destruction. What benefaction can be secured from the arresting of the floods at or near that source? In the first place, in that Rocky Mountain region to the west of Kansas and Nebraska and Oklahoma, including parts of those States, we have a vast area of land that is thirsty for water every season of the year, and upon which it is impossible to raise profitable crops without artificial irrigation.

Mr. SIMMONS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Nevada yield to the Senator from North Carolina?

Mr. NEWLANDS. Certainly.

Mr. SIMMONS. Mr. President, I wish to make a suggestion to the Senator from Nevada, and I am sure the Senator will accept the suggestion in the spirit in which I make it. The Senator has offered this amendment to the river and harbor bill. The amendment is the subject of a bill introduced by the Senator some time ago in the Senate. That bill has been before the Committee on Commerce and has been reported and is now on the calendar.

The subject which the Senator is discussing is a very important and a very interesting one, and he is discussing it in a very lucid and interesting way; but it must be, I think, apparent to the Senator that the conditions here are not favorable to a real discussion and consideration of this subject. We are anxious to pass this bill to-day, if possible. The subject which the Senator suggests is one that ought to call for very extensive and very thorough and very full consideration. Senators naturally feel that the proposition which he makes is one that will change the policy of the Government in reference to the improvement of rivers and harbors, and if it were engrafted upon this bill it is probable the bill would be defeated and we would not get the river and harbor bill, and the Senator would not get what he wants.

I was going to suggest to the Senator, in these conditions, in view of the great importance of the subject he is discussing, and the fact that his bill has been reported and is on the calendar, would it not be better that this discussion be postponed, and that at an early day we take this matter up as a separate proposition, a proposition involving a change in the policy of the Government with reference to appropriations for river and harbor improvements, and give it a thorough discussion? I do not think that conditions are now favorable to the discussion or the real consideration of the important matters which the Senator is suggesting to the Senate.

I merely wanted to make that suggestion to the Senator. I fully appreciate the importance of the matter he is discussing, and I am anxious that the Senate should take it up as a separate proposition and give it full discussion. I hope he will not insist upon it as an amendment to this bill and a discussion of the matter at this time, because I think it is a matter that ought to be thoroughly discussed as a separate proposition, not as an amendment to a bill, especially in view of the fact that the amendment the Senator proposes would change the whole policy of the bill. It is at variance with the policy of the bill, and if it were adopted it must be apparent to the Senator that it would defeat the bill, and defeat his amendment along with the bill.

Mr. NEWLANDS. I am not insensible to the appeal the Senator makes to me. It is an appeal that has been made whenever I have addressed the Senate upon similar amendments proposed to the river and harbor bill.

Mr. SIMMONS. But, Mr. President, if the Senator will permit me, the Senator has never had his bill on the calendar where it might be considered as a separate proposition, as is the case now.

Mr. NEWLANDS. That is true; but it has been reported only recently and at a time when it can not possibly be considered. As I regard the amendment as entirely germane to the bill, I am disposed to urge it. At the same time I shall be very con-

siderate with my colleagues, and I shall endeavor to close my remarks in time to secure a vote upon the bill before the time fixed for the memorial addresses. But I understand that the Senator from Connecticut [Mr. BRANDEGEE] proposes to offer as an amendment the Connecticut River dam bill. I will ask him whether it will be possible to conclude the consideration of this bill before 2 o'clock?

Mr. BORAH. The interrogatory was addressed to the Senator from Connecticut, but I will state, if the original Connecticut River bill is offered as an amendment, of course, it will not be possible to dispose of the bill to-day, if there is any disposition to carry that amendment. If a Senator offers it for the purpose of offering it that is one thing, but if there is a disposition to put it on the bill, the bill will not be passed to-day.

Mr. BRANDEGEE. My attention was diverted when the Senator from Nevada referred to the matter.

Mr. NEWLANDS. I asked the Senator whether it was his intention to move as an amendment the Connecticut River dam bill?

Mr. BRANDEGEE. The Senator from Ohio [Mr. BURTON], I understand, gave notice last night that he would offer as an amendment to put the Connecticut River bill as it came from the committee on the river and harbor bill, and my colleague [Mr. MCLEAN] intends to offer the bill as it was passed by the Senate as an amendment to the river and harbor bill. What would develop in the way of language in the way of those two propositions I do not know. My experience would lead me to expect some expression of views.

Mr. NEWLANDS. So, it would not be possible to conclude the consideration of the bill to-day before 2 o'clock.

Mr. BRANDEGEE. That depends upon the staying qualities of long-distance talkers, and I can not guarantee anything about it.

Mr. NEWLANDS. I assume, then, the Senator does not intend to address the Senate upon his amendment.

Mr. BRANDEGEE. I would a great deal rather have a vote on it in quiet, because I should think it would be perfectly acceptable to the Senate to accept what it had already accepted. But if anyone objects, then I would like to answer him if he makes any points that I think need answering.

Mr. NEWLANDS. We shall doubtless hear from the Senator as we heard from him during that debate.

Mr. THOMAS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Nevada yield to the Senator from Colorado?

Mr. NEWLANDS. Certainly.

Mr. THOMAS. As I understand the situation, the Senator from Ohio [Mr. BURTON] proposes to offer the original Connecticut River bill as an amendment to the pending measure, and the Senator from Connecticut will offer as an amendment that bill as it was finally adopted by the Senate. The offer by the Senator from Ohio will certainly develop some language.

Mr. NEWLANDS. I therefore see——

Mr. MYERS. Will the Senator yield to me?

Mr. NEWLANDS. Certainly.

Mr. MYERS. I am in favor of the amendment offered by the Senator from Nevada, and I hope he will go ahead and address the Senate on it and bring it to a vote. I have learned that the time to press a bill here is when one gets a chance to press it.

Mr. NEWLANDS. Mr. President, it does not seem probable therefore that we can reach a conclusion on this bill to-day, and I shall go on with my presentation of this subject.

I will state, in reference to the appeal of the Senator from North Carolina, it has been an appeal that has been made upon every occasion when I have presented the river-regulation bill in the shape of an amendment to the river and harbor bill. I have been compelled to present it as an amendment to the river and harbor bill because it is impossible to get for it serious consideration by the Committee on Commerce, the members of which are so bent on securing appropriations for individual projects that they have not time to consider a broad and comprehensive measure that will deal with this subject in such a way as to relieve Congress of a large portion of its burdens and at the same time secure enlightened administration of river and harbor development.

Mr. CLARKE of Arkansas. Mr. President, I submit a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state it.

Mr. CLARKE of Arkansas. The Senator from Nevada having indicated that it is his purpose to debate this matter at length, even to the extent of delaying the passage of the bill to-day, that presents a question of duty to those of us who are interested in its passage. His amendment is not in order. He is proceeding outside of the rules of the Senate.

Mr. NEWLANDS. Mr. President, I do not yield to the Senator from Arkansas.

Mr. CLARKE of Arkansas. He is trespassing upon the courtesy of those interested in the passage of the bill, and I think the time has arrived——

Mr. NEWLANDS. Mr. President, I decline to yield.

Mr. CLARKE of Arkansas. It is not a question of the Senator yielding to me. I am on my feet in my own right to make a perfectly proper point and to call attention to the fact that the Senator from Nevada is not addressing the Senate otherwise than by courtesy. There is no proposition pending that can be made at this time. His amendment never was referred to the Committee on Commerce.

Mr. NEWLANDS. I deny the right of the Senator to take me off the floor.

Mr. CLARKE of Arkansas. Except for parliamentary purposes and within the rules of the Senate.

Mr. NEWLANDS. I am discussing the bill in its general aspects.

The PRESIDENT pro tempore. The Senator from Nevada will suspend for a moment. The Senator from Arkansas has made the point of order that the amendment is obnoxious to the rule. The Chair, without expressing an opinion on that point at present, will suggest that the Senator from Nevada can not be taken from the floor in the midst of a speech on a point of order. The Senator from Nevada will proceed.

Mr. NEWLANDS. Mr. President, I was remarking that the Committee on Commerce has been so busy in considering the individual projects of the individual members of that committee that it has had no time to devote to the consideration of a broad and comprehensive measure, even though that measure would lighten their own labors and would more efficiently accomplish the purposes which they have in view.

We passed through the same conditions regarding the reclamation act. I entered Congress, in the lower House, over 20 years ago. For 10 years there we insisted upon it that the great work of reclamation of our arid lands should be taken up as a national enterprise by the Government in the development of its public domain. We sought there that, as a matter of river and harbor development, we should secure in the upper reaches of these great rivers the storage of waters, which would serve the double purpose of arresting the floods and of leading them over arid wastes, thus turning them into regions of productiveness. It was only by a constant iteration and reiteration, by amendments offered, by speeches made, by attacks made upon the very vitals of the river and harbor bill itself that we secured a hearing before the great American people, which resulted in the passage of the reclamation act—an inestimable boon to the entire intermountain region. Had it not been for the aggressive course which we took with reference to this very bill in its annual course we would have made no headway whatever in that legislation so essential to the welfare of some 15 States.

Mr. President, we are renewing the struggle that we then commenced, insisting upon it that the great and destructive agencies in the lower reaches of the river are the floods, and that the only proper way to deal with those floods is not only to protect the channel below, to protect the banks by revetment, to construct levees, but also in this vast watershed, covering 30 States, to arrest the flood waters, so as to put them to beneficial use.

We are renewing to-day the very argument that we made 20 years ago, not, as then, out of a selfish regard for the advancement and welfare of our section, but as a means of developing every interest in the Union, the development of waterway transportation as an aid to railway transportation and to our ocean transportation, and the development of the rivers, in the development of water transportation in such a way as to put them to every beneficial use that civilization affords. We, however, will get no hearing unless we finally take the very position which we then took with reference to the Reclamation Service, that we would hamstring the river and harbor bills until the claims of the region which we represented were recognized. No sectional interest now controls our views or our action. We are now working for the entire Union. We believe that there should be an efficient development of our waterways, such as there is in France and in Germany, so that inland waterway transportation and ocean transportation and rail transportation should be so coordinated and dovetailed together as to aid and promote both domestic and foreign commerce. So far as I am concerned, I intend to press this subject upon the attention of the Senate at every convenient moment.

The Senator has remarked that the bill which I have introduced has been reported by the Committee on Commerce. I admit that that bill has gradually gained converts there. The

Senator from Ohio [Mr. BURTON] was a qualified convert. He signed our Inland Waterways Commission report as the chairman of the commission. He indorsed in that report every principle for which I have contended in this bill, yet, for some reason or other, I have not his hearty cooperation in the passage of the bill. He has doubtless intended to amend the existing methods in order to accomplish the result which he has in view, but I am sure he has become hopeless regarding existing methods, for you find him here in the Senate the opponent of every river and harbor bill that comes in, instead of its advocate, as he was in the House of Representatives. The chairman of this committee [Mr. NELSON] is another convert. I can recall the time when the chairman of the committee resented the idea of turning over what he regarded as the functions of Congress to an administrative board, but he has now finally come to the conclusion that the functions of Congress are best exercised by the creation of a board acting as its servant in the scientific adjustment of these questions.

Only the other day he declared in committee—I made the statement the other day, and the Senator corroborated me—that he was tired of this piecemeal system of appropriation that has existed for so many years; that he was conscious it is full of abuses and is characterized by absolute inefficiency in many cases; and that, so far as he was concerned, he was for the creation of a board, to which large powers should be given, and to the prosecution of whose work an ample fund should be appropriated.

There are other converts upon that committee, but they are differing all the time as to details. If you should put it to the vote of that committee to-day as to the essential principles of this bill, I believe that it would have the votes of a large majority of that committee. They always differ as to details here and there, as to the segregation of this fund, as to whether it should be segregated at all between different waterways, or as to the proportion that should be segregated to this watershed and to that watershed; as to who shall compose the board; as to what its powers shall be; but whilst they agree upon the essentials as to a board, as to a large fund, as to continuous work, as to covering all the related uses of the river, covering cooperation with the States, they differ as to the details of the organization through which its work is to be effected. It will take a long time to concentrate the mind of that committee, as it will take a long time to concentrate the mind of Congress, upon a feasible and practicable method of administration. Therefore the friends of this measure must press it at every convenient opportunity. That is the reason why I am pressing it now. All the various amendments to the bill have been considered in detail; this amendment is reserved to the last.

Now, the appeal is made to me when I am presenting this matter to the consideration of the Senate that this bill contains large appropriations for needed work and that its passage may be imperiled if I should continue to debate this important question. I wish to be considerate always of the views and the demands and the requirements of my associates, but I do not think that it is my duty now to limit my discussion.

Mr. President, I was discussing the Mississippi River and its tributaries; I was referring to the use of this water for irrigation above. The practice of irrigation still is in its infancy. The time will come when irrigation will be universal throughout the entire Mississippi Valley, for nature, unfortunately, does not distribute the waters at such time in their fall from the heavens as to meet the scientific requirements of agriculture.

There is not a region in the entire Mississippi Valley, I do not care what its waterfall is, in which there are not periods of drought, periods in which growth is arrested, periods in which growth is sometimes destroyed. Why should we allow these productive waters, falling upon this vast area, to rush into the Gulf, where they will be unutilized, when by arresting their flow throughout the entire region, whenever it is practicable as an engineering matter to do it, we can hold those waters under control, available not only for irrigation, but for the development of water power?

Electricity is made with water power—a most valuable factor in the lives of our people. Electricity has more to do with the general comfort and convenience of the masses of the people of to-day than has almost any other force. It is used for lighting; it will be used for heating; it is used for power. It can be carried into the humblest cottage, and made there the instrumentality of production. Why should we allow these waters, which can be put to these beneficial purposes above, to drift down to the destruction of vast areas below? Why do we permit them to sink into the Gulf of Mexico and into the Atlantic and Pacific Oceans without any productive results? All of this, of course, requires cooperation, and for a hundred years we have been debating as to where was the dividing line between the jurisdiction of the Nation and the State, as if it were utterly impossible for these sovereigns to deal with each other. We have no difficulty in dealing with Canada upon matters relating to our waters; we have no difficulty in dealing with any foreign country; we have ambassadors and ministers through whom negotiations can be conducted; but we seem to have the greatest difficulties in dealing with sovereign States, component parts of the great Union that constitutes our Government. It never seems to have occurred to us that by the organization of a national board, empowered to deal with similar organizations in the States, we could, instead of debating endlessly as to the dividing line between National and State jurisdiction, bring them into partnership, so as to produce beneficial results to both classes of sovereigns existing upon the same soil.

So we have gone along in this ineffective, inefficient, and dribbling way, identifying the greatest constructive work of the country with the spoils system; turning over these individual projects, practically, to individual Members of Congress for their initiative; denying in every river and harbor bill itself the poor privilege to the Corps of Engineers of the Army of making a suggestion to make this system efficient. That seems an extraordinary statement. I recall that I was condemning the Engineer Corps of the Army for its lack of initiative, for its lack of suggestion. I thought that that corps had been in charge of the rivers and harbors of the country for a long period, that they ought to have framed and submitted to Congress an efficient method of administration, but, to my surprise, an eminent officer of the Engineer Corps of the Army pointed me to specific legislation in the river and harbor bill absolutely preventing them from making any such suggestion outside of the immediate matter intrusted to them for report. So we hamstrung our own servants, our own engineers, our own experts, and denied them the poor privilege of giving us advice.

It is hardly necessary to inquire what agency there was back of all this, of which agency Congress was the unconscious servant. We know that the railroads of this country for 40 years have been going through a period of phenomenal development, almost ahead of the requirements of the areas which they cover. They have been pioneers of civilization, reaching out in advance of the population, and hence greedy for freight; and so they have looked with hostility upon every waterway enterprise that affected any part of that which they regarded as their legitimate service. The great enemy of waterway transportation has been the railway systems of the country, with the instrumentalities of which only of late years has the transportation of the country caught up. They are not so hostile now, because they have enough business and many of them more business than they can handle, and so we do not find their hostility displayed to this great policy in as intense a manner as it was years ago. We find some broad-minded men among them even insisting upon the development of waterway transportation as supplemental to railway transportation; but to a large element, imbued with the old traditions, waterway transportation is the enemy of rail transportation and must be discouraged and suppressed. So they have permitted the development of our rivers, provided they were developed in such a way as not to make them efficient instrumentalities of transportation.

Take the entire region upon which most of the money has been spent between Cairo and New Orleans. Has there been any effort made in the prosecution of the development of that enormous waterway to develop it as efficiently as you would a railway? Would we think of constructing a railway without a terminal? Would we think of constructing a railway without a sidetrack? Would we think of constructing a railway without the station houses, freight sheds, and so forth, that accompany a great transportation system? Yet we have been planning the restoration of our rivers and waterways and not paying any attention whatever to transfer facilities, to terminals, to the freight establishments, and to cooperation, above all things, with the railways, so as to make both the railway and the waterway efficient public servants.

I apprehend the reason that we have such a defective system of river development is the fact that all the way along there has been a discouragement in the line of making the rivers effective for transportation. How is it in Germany? There the waterway is just as efficient as the railway; there the waterway is protected and developed by the Government just as perfectly as the railway; connections with the railways are provided, and every stopping place upon the river is developed in such a way and with such facilities for the transfer of freight and passengers as to promote their highest efficiency. So Germany has developed a system of railway transportation and waterway transportation and ocean transportation, all coordinating with

each other as an efficient and scientific system of transportation, whilst we have allowed the waterway development of our country simply to drift into the protection of cultivable areas. You will find the appeal made by southern representatives in Congress to-day not so much in the interest of navigation as in the interest of large areas of cultivable lands which are threatened with destruction.

They are claiming now that it is the duty of the Nation to take care of the waters that fall upon the Nation's watershed and prevent those waters from taking their accustomed course. How is it the duty of the Nation? These waters from time immemorial have spread over the entire delta of the Mississippi. When we took them they were swamp lands, and how is it our obligation to turn them into cultivable lands?

It would have been our obligation had we maintained the ownership of that region; it would have been our duty as the owner and the proprietor of those estates to prepare them for settlement; but we parted with the ownership; we turned them over to the States, and threw upon the States the burden of reclamation. How is it our duty, then, to take care of their reclamation? It is not our duty, and yet I regret to say that our southern statesmen have made that practically our primary duty. I have heard little suggestion from the statesmen of the lower Mississippi River region regarding the efficient development of those waterways in aid of transportation, with transfer facilities and sidings and terminals and all the paraphernalia that belong to a complete waterway transportation.

Mr. WARREN. Mr. President, will the Senator from Nevada yield to me to present a brief conference report?

Mr. NEWLANDS. Certainly.

LEGISLATIVE, ETC., APPROPRIATION BILL (S. DOC. NO. 1102).

Mr. WARREN. I present the report of the committee of conference on the legislative, executive, and judicial appropriation bill.

The Secretary read the report, as follows:

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 26680) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1914, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 2, 27, 61, 68, 76, 77, 78, 139, 148, 149, 151, 152, 154, 155, 160, 161, 162, 163, 179, and 235.

That the House recede from its disagreement to the amendments of the Senate numbered 7, 8, 11, 23, 24, 25, 26, 37, 38, 39, 147, 180, 181, and 190, and agree to the same.

Amendment numbered 79: That the House recede from its disagreement to the amendment of the Senate numbered 79, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"Assay office at Boise, Idaho: For the following, including wages of workmen and contingent expenses, from July 1 to December 31, 1913, both dates inclusive: Assayer in charge, who shall also perform the duties of melter, $1,125; assistant assayer, $800; chief clerk, who shall also perform the duties of cashier, $750; assayer's assistant, $750; clerk, $600; in all, $4,025."

And the Senate agree to the same.

Amendment numbered 80: That the House recede from its disagreement to the amendment of the Senate numbered 80, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$1,770"; and the Senate agree to the same.

Amendment numbered 81: That the House recede from its disagreement to the amendment of the Senate numbered 81, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$1,125"; and the Senate agree to the same.

Amendment numbered 82: That the House recede from its disagreement to the amendment of the Senate numbered 82, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"Assay office at Charlotte, N. C.: For the following, including wages of workmen and contingent expenses from July 1 to December 31, 1913, both dates inclusive: Assayer and melter, $750."

And the Senate agree to the same.

Amendment numbered 83: That the House recede from its disagreement to the amendment of the Senate numbered 83, and agree to the same with an amendment as follows: In lieu of the sum named in the said amendment insert "$450"; and the Senate agree to the same.

Amendment numbered 84: That the House recede from its disagreement to the amendment of the Senate numbered 84, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$200"; and the Senate agree to the same.

Amendment numbered 85: That the House recede from its disagreement to the amendment of the Senate numbered 85, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "Assay office at Deadwood, S. Dak.: For the following, including wages of workmen and contingent expenses, from July 1 to December 31, 1913, both dates inclusive: Assayer in charge, who shall also perform the duties of melter, $1,000; clerk, $600; assistant assayer, $800; assayer's assistant, $700; in all, $3,100."

And the Senate agree to the same.

Amendment numbered 86: That the House recede from its disagreement to the amendment of the Senate numbered 86, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$1,500"; and the Senate agree to the same.

Amendment numbered 87: That the House recede from its disagreement to the amendment of the Senate numbered 87, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$750"; and the Senate agree to the same.

Amendment numbered 88: That the House recede from its disagreement to the amendment of the Senate numbered 88, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"Assay office at Helena, Mont.: For the following, including wages of workmen and contingent expenses, from July 1 to December 31, 1913, both dates inclusive: Assayer in charge, $1,250; chief clerk, who shall also perform the duties of cashier, $900; assistant assayer, $850; assayer's assistant, $700; clerk, $700; in all $4,400."

And the Senate agree to the same.

Amendment numbered 89: That the House recede from its disagreement to the amendment of the Senate numbered 89, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$2,300"; and the Senate agree to the same.

Amendment numbered 90: That the House recede from its disagreement to the amendment of the Senate numbered 90, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert: "$1,500"; and the Senate agree to the same.

Amendment numbered 93: That the House recede from its disagreement to the amendment of the Senate numbered 93, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"Assay office at Salt Lake City, Utah: For the following, including wages of workmen and contingent expenses, from July 1, to December 31, 1913, both dates inclusive: Assayer in charge, who shall also perform the duties of melter, $1,250; assistant assayer, $800; chief clerk, who shall also perform the duties of cashier, $800; clerk, $700; in all, $3,550."

And the Senate agree to the same.

Amendment numbered 94: That the House recede from its disagreement to the amendment of the Senate numbered 94, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$2,250"; and the Senate agree to the same.

Amendment numbered 95: That the House recede from its disagreement to the amendment of the Senate numbered 95, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$1,750"; and the Senate agree to the same.

Amendment numbered 150: That the House recede from its disagreement to the amendment of the Senate numbered 150, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$232,210"; and the Senate agree to the same.

Amendment numbered 153; That the House recede from its disagreement to the amendment of the Senate numbered 153, and agree to the same with an amendment as follows: In lieu of the number proposed insert "nine"; and the Senate agree to the same.

Amendment numbered 156: That the House recede from its disagreement to the amendment of the Senate numbered 156, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$78,740"; and the Senate agree to the same.

Amendment numbered 177: That the House recede from its disagreement to the amendment of the Senate numbered 177, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$9,000"; and the Senate agree to the same.

Amendment numbered 178: That the House recede from its disagreement to the amendment of the Senate numbered 178, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$13,000"; and the Senate agree to the same.

Amendment numbered 182: That the House recede from its disagreement to the amendment of the Senate numbered 182, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$23,000"; and the Senate agree to the same.

Amendment numbered 183: That the House recede from its disagreement to the amendment of the Senate numbered 183, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$26,000"; and the Senate agree to the same.

Amendment numbered 184: That the House recede from its disagreement to the amendment of the Senate numbered 184, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$17,000"; and the Senate agree to the same.

Amendment numbered 185: That the House recede from its disagreement to the amendment of the Senate numbered 185, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$20,000"; and the Senate agree to the same.

Amendment numbered 186: That the House recede from its disagreement to the amendment of the Senate numbered 186, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$10,000"; and the Senate agree to the same.

Amendment numbered 187: That the House recede from its disagreement to the amendment of the Senate numbered 187, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$13,000"; and the Senate agree to the same:

Amendment numbered 188: That the House recede from its disagreement to the amendment of the Senate numbered 188, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$17,000"; and the Senate agree to the same.

Amendment numbered 189: That the House recede from its disagreement to the amendment of the Senate numbered 189, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$20,000"; and the Senate agree to the same.

Amendment numbered 191: That the House recede from its disagreement to the amendment of the Senate numbered 191, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"For surveyor general of South Dakota, $2,000; clerks in his office, $4,500; in all, $6,500."

And the Senate agree to the same.

Amendment numbered 192: That the House recede from its disagreement to the amendment of the Senate numbered 192, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$600"; and the Senate agree to the same.

Amendment numbered 193: That the House recede from its disagreement to the amendment of the Senate numbered 193, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$16,000"; and the Senate agree to the same.

Amendment numbered 194: That the House recede from its disagreement to the amendment of the Senate numbered 194, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$19,000"; and the Senate agree to the same.

Amendment numbered 195: That the House recede from its disagreement to the amendment of the Senate numbered 195, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$20,000"; and the Senate agree to the same.

Amendment numbered 196: That the House recede from its disagreement to the amendment of the Senate numbered 196, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$23,000"; and the Senate agree to the same.

F. E. WARREN,
GEO. PEABODY WETMORE,
LEE S. OVERMAN,
Managers on the part of the Senate.

J. T. JOHNSON,
ALBERT S. BURLESON,
FREDK. H. GILLETT,
Managers on the part of the House.

The PRESIDENT pro tempore. The question is on agreeing to the conference report.

Mr. BORAH. Mr. President, I want to ask the Senator in charge of the bill what is the status with reference to the assay offices?

Mr. WARREN. They are provided for until the 1st day of January next; otherwise there is no legislation which changes their status. We simply appropriate for them until the 1st day of January, 1914.

Mr. BORAH. What effect will that have upon the offices when the time comes when the fund is exhausted?

Mr. WARREN. There will have to be some legislation, either before or after, or the officers will be without salary.

Mr. BORAH. And the offices would likely disappear, then, if Congress did not affirmatively act?

Mr. WARREN. That might be the effect, but not through this legislation. There is nothing in the report that closes the offices, but it fails to provide for them in the same manner as in previous years. It stops the appropriation at a given time, which, as I have stated, is the 1st of January. Congress will again meet in December, and, of course, it can then take care of the matter by an urgent deficiency bill, if it shall so desire.

Mr. BORAH. Does the Senator want this bill to go through to-day?

Mr. WARREN. Well, the conference report has been agreed to in the House, and I should like to have it acted upon by the Senate.

Mr. BORAH. I know the conferees have agreed, but the report has not been adopted.

Mr. WARREN. Does the Senator wish to have it go over?

Mr. NEWLANDS. Mr. President, if I may make an inquiry. I should like to inquire regarding the mint or assay office at Carson City, Nev.

Mr. WARREN. The mint at Carson City had to be dropped out, and in the matter of the removal of silver coin we had to take the House provision, but the assay offices referred to are provided for until January.

Mr. NEWLANDS. The mint at Carson City, as the Senator well knows, some time ago was reduced to a mere assay office. Do I understand that that is continued until next January?

Mr. WARREN. It is only provided for until the 1st of July.

Mr. NEWLANDS. May I ask why the distinction between that assay office and the assay office in Idaho?

Mr. WARREN. There are other offices which also went out, but not of the particular class of which I was speaking. One was under the name of a mint and the others were designated as assay offices.

Mr. NEWLANDS. Mr. President, I shall have to object to this method of legislating out of existence on an appropriation bill an office that is authorized by law.

Mr. WARREN. I wish to say only a word because I do not desire to interfere with the consideration of the pending bill. This is the first appropriation bill that was passed by both Houses, and the conferees have struggled——

The PRESIDENT pro tempore. The Chair will suggest to the Senator that there is a special order for 2 o'clock.

Mr. WARREN. I so understand. The conferees have for a long time struggled over the amendments in disagreement between the two Houses, and the conferees on the part of the Senate have done the best they could to secure the retention of the amendments made to the bill by the Senate, but could accomplish no more than this conference report shows. If, however, it is sought to have the report go over, that action can be taken. Having submitted the report, as the hour for the consideration of the special order of the day has arrived, I shall ask that the report go over and that it be printed in the RECORD and as a public document and shall call it up at the first seasonable opportunity.

The PRESIDENT pro tempore. In the absence of objection, that order will be made.

UNITED STATES V. JOSEPH H. PATTERSON ET AL.

Mr. SMOOT. Mr. President, I ask that the remarks of District Judge Hollister, in imposing sentence on defendants in the case of United States against Joseph H. Patterson et al., in the United States District Court for the Southern District of Ohio, be printed in the RECORD.

The PRESIDENT pro tempore. Without objection, that order will be made.

The matter referred to is as follows:

United States District Court, Southern District of Ohio.

UNITED STATES v. JOHN H. PATTERSON ET AL.

REMARKS OF DISTRICT JUDGE HOLLISTER IN IMPOSING SENTENCE ON DEFENDANTS.

The COURT (addressing counsel): I am not unmindful of the force of all that you say, and particularly of the fact of the punishment the

defendants have already undergone. It is a consideration of the last fact which causes me to hesitate to say what I had expected to say in anticipation of the overruling of the motion, because I did not see how, unless something new were urged, a different conclusion could be reached this morning than that which I had reached upon the conclusion of the case upon the coming in of the verdict.

Nevertheless, I think that, in order that the nature of the penalty may be understood, I am called upon to say something in connection with the nature of the offenses of which the defendants have been found guilty. While it is true, technically, there are three offenses, yet they are based upon the same facts, upon the application—a little different application of the same facts—and I would think a sentence upon each count would be, while permissible, unjust; and I have considered the matter as if there were but one offense charged and a verdict of "guilty" upon one only; that is to say, there will be no cumulative sentence in this case. I think it would be lawful to regard the maximum in this case as $15,000 fine and three years' imprisonment, but I do not think it would be just; so I regard it as one offense.

[Addressing defendants:] You have had a fair trial. You have been defended by counsel than whom there are no lawyers better equipped to perform such service. Throughout the long trial there has been no point or question which could possibly be availed of in your interests that has escaped their observation and presentation.

The jury was composed of men of high character and intelligence. The attention they gave to the evidence as it was presented was earnest and never failing. You could not have had a better jury, or one better qualified to do exact justice between the Government of the United States and yourselves upon the issues involved in this case if you had selected them yourselves. The testimony amply justifies their verdict of guilty.

My personal feelings toward each of you and all of you have been and are only of extreme kindliness and regret. I can not, however, regard any personal consideration in the matter, but regard the present duty as only a part of the day's work—a most disagreeable part of the day's work—of the kind of work in which I am engaged.

It now becomes my duty, and a very painful duty it is, however impersonal one tries to make it, to impose sentence upon you and each of you for having been convicted of conspiracy in restraint of trade in one count and of monopoly in two counts within the meaning and preventive purpose of the Sherman Antitrust Act.

However much that law has been misunderstood by many because of their ignorance and misrepresented by others or charged with uncertainty by designing persons who would cripple it, fearing its application to their own conduct, or for other reasons, it is nevertheless in itself a clear statement of its meaning, and it can not be misunderstood by anyone who really desires to obey it. It contains no standard of conduct other than the standard every fair-minded reasonably conscientious man applies to his conduct in the various relations of life. It seeks to protect the common right of every citizen, however humble, to enter into any lawful business he chooses, and there to exercise such talents as he has, his enterprise, his skill, and such capital as he can command; to lawfully develop in such ways as his judgment may dictate his business into a success, if he can accomplish it; but if he must fail, then to fail, whether through want of skill or sufficient enterprise, or capital, or bad judgment, or because of inferiority of product, or bad management, or misfortune of one kind or another; but not because of ruthless acts of oppression sometimes illegal in their very selves, and sometimes through the exercise by competitors of acts amounting almost to physical force, and in some instances amounting to assaults by putting his agents in fear.

Such acts as have been proved in this case show beyond peradventure, from the similarity of their character and from their occurrence in various parts of the country, that they could only have been done in pursuance of a plan to do them; but, more than that, it has been proved that the National Cash Register Co. actually had a department organized and continually maintained for a long period of years for the sole purpose of carrying into effect acts against competitors which any fair-minded man would say were outrageous.

The wonder to me is that some of the agents of the company did not lose their lives at the hand of some agent of a competitor whose lawful business was ruthlessly and relentlessly interfered with. So unfair and so harsh and so, at times, cruel, have been the acts of agents of this company, that the wonder is that any self-respecting man would have permitted himself to remain in the employment of a company which required its agents to produce results by such means as they in fact employed. I have no doubt that many a time many an agent of the National Co., and many of you, were ashamed of being a party to such things. I would like to believe this, and I do believe it. When I say the company required these things, I mean it. Nobody ever heard—at least I never did—of a concern doing a legitimate business having a competition department and a competitive committee, whose primary duty it was not to sell the product of the business but to prevent their competitors from selling their product, by any and whatsoever means, short of physical violence. The very maintenance of such adjuncts to a business was illegal and was a restraint of trade and was indefensible from any standpoint.

What was the purpose of the required reports from agents in the various parts of the country of the appearance of any competing cash register? And if that register seemed to be meeting with success, what was the purpose of sending to the territory special agents or company salesmen or "knockout men," as they were known among their competitors, and not unknown by that name, at least in the earlier years, at headquarters? These agents were not paid as salesmen were whose primary duty it was to sell cash registers by fair means and through their merits, but to assist those sales agents in directly destroying the business of their competitors. There is no doubt about it.

The things done were not only unkind—any man of reasonably tender sensibility would have shrunk from doing them; but they were petty and mean, and the pity of it all is that, in any event, if the cash registers of the company had the merit claimed for them—and they probably had—such acts would have been totally unnecessary and the National Co. could have still sold millions of dollars' worth of machines each year and their comparatively small competitors could at least have made a living pursuing their respective industries, as they were entitled to do, of common right.

Nor was it the number of patents or their comprehensive nature or their importance which drove many of the National Co.'s competitors out of business or caused them to sell out.

"Our organization is our best patent," said one of the conspirators at one of the conventions at Dayton. But if every competitor were indeed an infringer the National Co. had the right to pursue that competitor wherever it found him and to exclude him by exercising its right of exclusion through the suits authorized by Congress for the purpose, instead of trying to defeat every sale a competitor made by acts which at times were unlawful in themselves and at all times oppressive and unfair.

It is quite clear from the evidence that there were a number of competitors of importance who were not even sued for the purpose of testing the question of their infringement, but were sued in the process of oppressive measures, running over a period of time, as part of the plan to intimidate, discourage, and finally overcome and compel them to sell.

I think it is highly probable that some of those competitors did not infringe at all; or, if they used in their registers any principles embodied in the construction of a national register, it was the principle of an old patent the life of which had expired. This is to be gathered from the testimony of the case and from the lack of evidence of suits brought against those competitors to test in good faith the question of infringement and obtain an injunction.

All this sounds harsh, but there is much more that might be said. I forbear reference to the unconscionable transactions in which the contemptible Edgar Park (alias Foote) was concerned, who escaped only because of the operation of the statute of limitations.

I would like to believe that such acts as were done in various parts of the country—many were proved, we can only imagine how many more might have been proved if the witnesses could have been obtained—were done without the knowledge of those who managed and controlled the company, and were the acts of overzealous agents who wished to show results; but the evidence is conclusive that many of the defendants actually participated in some of the things; that all had notice, from circulars and publications of the company, and that most, if not all, of them attended the annual conventions at Dayton where the kind of competition under discussion was, for the most part, illegal competition, contemplating and inciting to illegal or unfair acts against competitors. The officers of the company, the district managers, the sales agents and the attorneys who were in touch with the management, and the directors must have known that that kind of competition was, which was continually under discussion, suggestively alluded to and encouraged at the conventions.

Each department of the business had its head in John H. Patterson, president and founder of the company. He early became possessed of the idea that the cash register business of the United States belonged to him and that anyone who came into that field was a trespasser and must be destroyed. The evidence shows that he and some of those in touch with him expressed views only capable of that interpretation. Whatever virtues Mr. Patterson had—and common report attributes many to him—whatever evidences of public spirit he has shown in his own town—and they are doubtless many—nevertheless, he set out deliberately to build his business up, not only through the merits of its product and through the extraordinary efficiency of his organization, but by harassing, annoying, interfering with, discouraging, and pursuing his competitors to the point that they would be compelled to give over the unequal struggle and to go out of business or to sell out to his company.

I can not but feel that many of the defendants would prefer it had been otherwise. I am aware that some of them did not personally participate in any direct act against a competitor, though they all conspired to do the acts, or some of them, alleged in the indictment. I am aware that a large salary will tempt a man to do things he would rather not do. I know that the thought of wife and children and the comforts which money will bring them, will sometimes lead a man into situations which he regrets.

While to some extent these considerations may excuse, yet they do not justify—they can not justify.

It is a proper inference to be drawn that such acts as are complained of by the Government, must have been done, or connived at, by each of you, through a more or less extended period of time, and by many of you for a great many years, or, as the alternative, you would lose your positions.

There is no evidence showing the salaries other than were paid to John H. Patterson, Edward A. Deeds, William F. Bippus, and William H. Muzzy, but from this evidence and from other circumstances in the case, it is a fair presumption that your various salaries must have been large, and probably more than you would have received for similar service rendered a competitor. There is evidence that in 1907 Mr. Deeds received about $18,00 to $20,000; Mr. Bippus, about $8,000, and Mr. Muzzy as much as $10,000 to $12,000; and there is evidence from which the deduction is irresistible, that agents of competitive concerns were offered large sums to desert their employers and enter the employment of the National Co.

You belong to the walks of life in which men are supposed to be actuated by considerations of humanity, whose conduct is controlled by high ethical standards and whose lives should be an example to their fellow men engaged in trade; walks in which success ought not to be measured by the number of dollars a man has, but in which the proper standard of conduct is patriotic service to country and kindly, generous service to fellow men not so wealthy and not so advantageously circumstanced. The lives of such men as you appear to be, should be examples, whether in social life or in trade, through which others may be inspired to the attainment of high standards of conduct; but you have, thus far, not only lost that opportunity, but through desire for gain and business success not worth the while, have contributed to the breaking down of the ancient standards of fair dealing among traders, not only required by law, but inspired by the finer instincts of every fair-minded man.

It is conduct such as has been shown in this case by you and others, some of whom have been reached and some of whom will be reached by prosecutions under the Sherman Antitrust Act, which has brought about the conditions of unrest and apprehension in the minds of millions of our fellow countrymen, and brought doubt to them of the stability and efficiency of our institutions, and the power of our Government to protect the individual and the man of small means, in the common right he has of entering into competition with any concern however powerful, and whatever the merits of its product.

Through the actions taken in very recent years by the Government of the United States in applying the Sherman Antitrust Act to many harmful situations, that doubt begins to fade away as the people realize that no man is above the law, whatever his condition in life may be.

This verdict is a vindication, not only of the wisdom and efficiency of the Sherman Antitrust Act, as it is written, but it is a promise to every man, however small his means, that if he engages in any lawful business which carries his product into interstate commerce the Government of the United States will see to it that he is protected and that the public are protected against conspiracies against his trade and monopolies built up upon its destruction.

By virtue of the provisions of the Constitution passed and adopted by the fathers, under the guidance of Providence, the arm of the Gov-

ernment is long enough and strong enough to protect the commerce between the States, whether from conspiracies of misguided workingmen, so called, to transport dynamite contrary to the laws of Congress for purposes involving results too awful to contemplate or from conspiracies of wealthy and powerful manufacturers and traders to crush out their competitors by illegal and unfair methods of competition.

I have thought it proper to say what I have just said, because all of it must be borne in mind in determining what penalty should be meted out to you upon your conviction of conduct which is made criminal by the Sherman Antitrust Act.

The object of a penalty is only incidentally to punish; its main purpose, its chief purpose is to afford an example to others, so that they may not engage in acts in infringement of the law in the future, or, if they are committing them, that they will abandon the practice.

MEMORIAL ADDRESSES ON THE LATE SENATOR ISIDOR RAYNER.

The PRESIDENT pro tempore (Mr. GALLINGER). The hour of 2 o'clock having arrived, the pending bill will be laid aside and the memorial services set aside for this day will be proceeded with.

The Chair lays before the Senate resolutions of the House of Representatives, which will be read.

The Secretary read the resolutions, as follows:

IN THE HOUSE OF REPRESENTATIVES,
February 2, 1913.

Resolved, That the business of the House be now suspended, that opportunity may be given for tributes to the memory of Hon. ISIDOR RAYNER, late a Senator from the State of Maryland.

Resolved, That as a particular mark of respect to the memory of the deceased, and in recognition of his distinguished public career, the House, at the conclusion of these exercises, shall stand adjourned.

Resolved, That the Clerk communicate these resolutions to the Senate.

Resolved, That the Clerk send a copy of these resolutions to the family of the deceased.

Mr. SMITH of Maryland. Mr. President, I offer the resolutions which I send to the desk.

The PRESIDENT pro tempore. The resolutions submitted by the Senator from Maryland will be read.

The resolutions (S. Res. 472) were read, considered by unanimous consent, and unanimously agreed to, as follows:

Resolved, That the Senate has heard with deep sorrow of the death of the Hon. ISIDOR RAYNER, late a Senator from the State of Maryland.

Resolved, That as a mark of respect to the memory of the deceased the business of the Senate be now suspended, to enable his associates to pay proper tribute to his high character and distinguished public services.

Resolved, That the Secretary communicate a copy of these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Mr. SMITH of Maryland. Mr. President, what we say within these walls to-day of our late colleague, Senator ISIDOR RAYNER, can avail little to mold the judgment of mankind as to his life, less to comfort those who so sincerely mourn his loss.

The achievements of his life were in the courts, in literature, in the halls of legislation. They are of record in the Maryland reports and in the journals of this body—monuments and memorials to his genius that all men may see. But perhaps after all they are most deeply engraved, if not as permanently perpetuated, in the mind and the memory of his friends and myriad admirers.

Any man might be pardoned for a feeling of overwhelming pride to have stood where RAYNER stood and to have done what RAYNER did. But so far from ministering to his vanity, the rarest and most sought honors, which came to him as if by magic, did not elate him, and were in no sense necessary to his happiness. In fact added honors and increased experience seemed to fill him with vague feelings of unrest and yearnings for hitherto untraveled fields of usefulness and power.

I do not wish to take up the time of the Senate in speaking of that which all men can learn of Senator RAYNER, and of what many know of him from the printed page. Nor shall I rehearse his rarely equaled triumphs at the bar, on the stump, in the field of letters, and in legislative halls. Better men than I have done this better than I can do at the memorial exercises had in the Court of Appeals of Maryland and in the House of Representatives within the past few weeks.

I want to sound such personal notes and touch the human chords in his nature which are not of record in books, nor apparent to all. Unfitted as I am, I feel that as his oldest friend on this floor I should attempt that task.

Few men, perhaps none I have known, had Senator RAYNER'S mental endowment and his natural gifts. Nature was prodigal in her generosity to him. So that it is not to be wondered that honors born of an intellectual supremacy were his from his boyhood. The wonder is they did not bring him more personal gratification and real satisfaction. It was almost pathetic to note that even in times of his greatest successes he always felt a minor touch of sadness and incompleteness in the present, and wistful hopes not unmixed with forebodings of the future.

Fortunately for the country, he was relieved of the necessity of devoting his time to actual bread winning, and thus enabled to gratify his ambition and serve his country by turning the full tide of his talents into the channels of public life—always in elective positions.

By reason of the exigencies of life occasions have arisen when I have fought with him, fought against him; been intimately associated with him in political and official relations for years, and again far from him in both. But during the 30 or more years I have known him I always cherished for him a personal understanding and esteem at no period affected by the varying gusts of political storms which several times swept us on divergent courses.

No one could know Senator RAYNER without being dazzled by his talents. As a student at the University of Virginia, a member of the Maryland Legislature, State senator, Congressman, attorney general of his native State, unpaid volunteer in the service of a misrepresented and oppressed gentleman and gallant warrior, Admiral Schley, he everywhere established a new and higher standard, alike the inspiration and despair of his fellows.

His career was indeed meteoric—his nature a paradox.

Incorruptibly honest, he was proof against all temptations of avarice. His life was uniformly distinguished by the purest and most refined morality. Dissipation and vice, even of the mildest order, were unknown to him—unwelcome to him. Still he knew and appreciated the temptations of others, the unworthy motives of others; and, in short, knew all classes of the world as they are. But he sympathized with the weaknesses, which he in no way shared, of those who fall.

With a voice that compelled attention and won the ear and heart and a power of logical argument which conquered doubt, a pen as easy and discriminating as Macaulay's, with wealth, power, admiration, applause, and position he was rarely at peace.

Unduly sensitive to the small annoyances of life, he bore in tranquil serenity the pains of death.

Shrinking, and in nervous dread of any sort of contest, none surpassed him in vigor of defense or bravery of attack when the fight began.

He shrank from giving pain to anybody or anything. He was always on the side of mercy, always first to urge forgiveness and charity.

So fine were his feelings, his sympathies so susceptible, and his heart so tender that he felt and bore the pains of others as if his own, especially when he could not afford relief.

Yet withal none could be more drastic, more inexorable than he in attacking corruption or moral weakness in official life, and none more unsparing in denouncing cowardice.

Twice he boldly bolted his party and repudiated his party's nominees. Yet within a few months his party tendered him the nomination as attorney general, a position of honor and trust entirely in line with his taste and which he filled with magnificent success.

Despising organized politics, decrying political clubs and organizations as pernicious, he received loyal and cordial support from his party and was elected to every political position, but one, he was willing to accept.

He single-handed swayed men and molded public opinion as he willed. The faith of the masses of the people in him, their admiration for him, their pride that his State was their State, was never surpassed. He always held the hearts of the people for his own. He could always get their ear.

Thus often defying the conventional methods, by his originality and personal power he won success—phenomenal success, in the general acceptation, as measured by achievments which are of record; but success of a quality far more vividly and accurately indicated by the affection and admiration of the people he served, whose ills he felt, whose battles he fought so long.

Always a prey to nervousness, accompanied by an inveterate insomnia, for years in physical pain, his insatiate energy drove him on. Rest he sought, and rest for his tired, pain-stricken body, or for his luminous mind, he never found above the sod.

He was fired with ambition, driven by a force which made no allowance for the limitations of physical endurance. His great mental powers, always alert, always accurate, responded to every call and every demand long after the time when it was evident that his physical frame was about to collapse and crumble under the rack and strain. But on he went until his last public appearance in joint debate in the last campaign at Baltimore. The cord snapped. He died in the hour of the triumph of principles he had long looked for, had long advocated, and which will long endure.

Small wonder the people of his State loved him, for he loved the people, and ended his life work in the battle for principles he conceived to be for the highest welfare of his country. He was indeed a statesman and a patriot.

But his life was not by any means all tinged with disappointment or crowded with care.

The sweetness and solace of his life was found in his family. He was the truest and most adoring husband and the kindest, most indulgent father. His pride and interest in his grandchildren was beautiful. His home was the refuge from his cares. The society of his devoted wife, the association with his only son and grandchildren, provided the balm which soothed his troubled spirit, sweetened his work, and drove away his cares. There he found his only happiness, which was free from all residuum or reaction of bitterness or disappointment.

He lived and died with his family about him. I am glad to think that their assiduous care and tender love were near to comfort him under the increasing weight of pain and weakness, which after weeks of suffering finally crushed him.

And while he has passed away, leaving in their lives a void none can fill, the same is true of the Nation and of this body. He has left no successor. No one in my State or in our Nation has arisen who can fill the place of ISIDOR RAYNER.

Mr. CLAPP. Mr. President, it is said that a man's character is what he is; his reputation is what others think of him. In my brief but earnest tribute to the memory of Senator RAYNER I shall deal with his character rather than his reputation.

The Senator from Maryland [Mr. SMITH] has well said of Senator RAYNER that he was a paradox. All great men are; and the greater the man the more apparent the antithesis of his nature seems to stand out irreconciled. Yet, this is due to a natural law. The greater the man, the more earnest the man, the stronger the projection from one source of divergent forces.

Senator RAYNER, in his advocacy of what he believed was right, in his opposition to what he believed was wrong, was so strong, so earnest that ofttimes it seemed to trench even upon bitterness, not alone against the thing to be assailed, but the person who stood for the thing he assailed. His assault upon the wrong was enriched with a wealth of invective, and yet not to reveal a wealth of expression; but every line and every word was simply the outward expression of the thought and purpose within. Reaching almost the point of bitterness in his opposition to the things against which he stood, at the same time I never knew a man more ready, more quick to respond to a sympathetic plea. This is accounted for by the fact that the shaft forged for combat and the throb for sympathy both came from one great, earnest nature, one great, earnest soul.

Perhaps nowhere in Senator RAYNER's life activities two thoughts stand out in antithesis more than in his relations to governmental problems. Senator RAYNER was in full accord, in deep sympathy with everything that tends for the betterment of humanity. He was in full accord with that great movement that to-day not only agitates our own Republic, but seems world-wide in its activities. Yet, upon the surface his sympathy for that cause seemed ever to find a limitation in a reverence that almost amounted to worship of whatever man may have uttered upon these questions, if that utterance came with the sanction of convention, legislature, or judicial decree. He inherited this. In fact, the Christian world, recognizing that in the dim mists of the past law first came in the commingling of the divine through the human instrument, man, has ever given and to-day gives a sanctity to human expression when that human expression relates to a certain function of government and forms a part of that abstraction which we call law, forgetting that, aside from the divine expression, every expression of authority reflects the infirmities of human nature. It may be the limitations of the mentality which pronounces it; it may be the limitation of environment; but so long as it comes from a human source, it partakes of the weakness of human nature.

Inheriting this as a part of his racial inheritance, his adherence to this thought was almost a worship. But, Mr. President, I am not certain but that it is well that we have great, strong characters like Senator RAYNER, who hold reverence for the past, because every step of human progress is a reflection upon the past—a reflection either upon the wisdom of utterances or the supineness of human nature in so long tolerating a condition from which man has ever been ready to make a sacrifice to escape. And perhaps it might come to pass that our eagerness to get away from the past would be prompted not only by a lack of reverence for the past, but perhaps would be somewhat hastened by a feeling akin to a lack of respect for the past in the light of its mistakes, were it not that here and there stands a great, strong character like ISIDOR RAYNER, holding man somewhat in reverence to the past.

I believe, in this hour and day, we require here and there a great, strong character like his; because, whether you take his sympathy for humanity at one extreme, or his adherence, his devotion to what he considered the law at the other, like those other two traits of his character which I have described, they are forces reaching out in divergent directions from the same great source, the great soul of a great, earnest man.

Mr. President, ISIDOR RAYNER has passed beyond. We shall miss him. I believe those who differ with me politically will feel that it is no trespass upon the courtesy or the solemnity of this hour when I say that the party the certainty of whose victory he lived only to see will miss him in its councils in the future. We will miss his association here; but we have the reflection that a great life is an inspiration, the study of a great man's career is a daily sermon from which we may gain inspiration and strength.

Mr. O'GORMAN. Mr. President, the Sixty-second Congress, which will close within a few days, has a mortality record perhaps unprecedented in the history of the Government. Of the Members who assembled in the Capitol two years ago to discharge their public duties, 6 Senators, 18 Representatives, and the Vice President of the United States have responded to the final summons which every mortal must obey; and "no man knoweth the day or the hour." Death is never so distressing, its chilly hand never so unwelcome, as when it withers one whose brilliancy and rare attainments set him above the ordinary level of mankind as a character to be emulated and admired. When nature blesses a man with unusual talents, when it invests him with nobility of mind and soul, his passing leaves a void difficult to bear, because so difficult to fill.

The Senator to whose memory we pay tribute to-day was such a man. Nature was generous with him in her endowments, which he well repaid by more than 30 years of patriotic public service. As a member of the Maryland Legislature, as attorney general of his State, as a Member of the National House of Representatives, and as a distinguished Member of the Senate of the United States, ISIDOR RAYNER devoted his talents and high character to the service of his country with an energy and enthusiasm that did honor to himself and to his native State.

He was an orator worthy of the best traditions of this or any other Chamber. He was a student whose books brought him sound counsel and that wide information which made his judgment universally respected. He was a statesman eagerly seeking the best interests of his country and the maintenance of its honor. Scion of a race whose history has been one of persecution, his life has given to the world another proof that this is a land where merit knows neither race nor creed—a Nation where honest achievement will receive its just recognition.

The late Senator from Maryland was able and brilliant; but he was more than that. Intellect without heart is cruel; brilliancy without human sympathy is vain; and our departed friend won his place in the affections of his colleagues and in the esteem of the country because the gentleness of his soul measured up to the strength and vigor of his mind.

He served his country long and faithfully. He was a lawyer of great ability, an orator of rare power, a citizen of stainless life, a patriot of high purpose and lofty ideals. Ever earnest in his purpose to fulfill the obligations of life in his home, in society, and in the Nation, he typified in all things courtesy, courage, honor, and fidelity.

Mr. President, Senator RAYNER has passed forever from this Chamber; his career is closed; his public record is part of the history of the Nation; and now his sorrowing colleagues pay him a last farewell. The eloquence that charmed and stirred is silent. His words have mingled for the last time with the shadowy troop of immortal voices whose echoes have resounded through the Halls of the Capitol.

We sympathize with his bereaved family, but no words of ours can assuage their grief. Yet in this solemn hour, devoted to a contemplation of his character and achievement, it must be comforting to those who loved him in his lifetime to remember that though his distinguished career is closed he has left behind him the heritage of a name respected and honored throughout the Nation.

Mr. SWANSON. Mr. President, I desire to pay a short tribute of warm regard and high esteem to our late distinguished colleague, Senator RAYNER. I do not purpose to deliver a studied eulogium. The incidents of his successful life have already been portrayed and eloquently presented to the Senate. My purpose is to bear testimony to his worth as a man, his noble and patriotic instincts, and his preeminent abilities as orator, statesman, and lawyer.

My acquaintance with Senator RAYNER began in the extraordinary session of Congress called by President Cleveland in 1893, of which Congress both he and myself were Members. Early in that session he delivered a speech urging the repeal of

the "purchasing clause" of the Sherman Act, which measure was then deeply disturbing the financial conditions of our country. His speech was eloquent, striking, and impressive. It made a profound impression upon me and upon the House of Representatives. In it was a rare combination of eloquence, knowledge of financial matters, and a clear, striking exposition of the evils which would accrue from the continuance of this policy. This speech exhibited the rare qualities possessed by Senator RAYNER in presenting dry and usually uninteresting questions with a vigor and eloquence to make them not only entertaining but convincing. That address convinced me that he was one of the most finished and able speakers upon public questions then in public life. This conviction continued during the many years I was associated with him in the public service, during which time I had many opportunities of hearing him speak.

He was preeminent alike in finished oratory and in the array of argument and facts. He possessed a fine voice, a splendid presence, and a magnificent delivery, which, combined with his eloquence of expression, his beauty of illustration, and the deep solidity of his speeches, made him one of the best parliamentary speakers of this Nation. In addition to these brilliant qualities, he was endowed with a logical mind and a great solidity of learning and judgment. His success as an orator was largely due to his rare ability of combining beauty and strength. In the House of Representatives and in the Senate, upon all important matters, whether foreign affairs, the tariff, or constitutional questions, he discussed them with preeminent excellence, exhibiting a thorough knowledge and a most attractive brilliance. His speeches will fully repay study by those who desire to succeed in oratory or to have models upon which to construct speeches.

He was, without question, one of the most learned and able lawyers of this body. His knowledge of constitutional law was deep, broad, and far-reaching in statesmanship and conviction. Conflicts in intellectual debate were ever pleasing to him, and he rarely indulged in them without coming out successful. The more difficult and important the questions the more they possessed interest to him and the more strenuous were his efforts to clear the mists surrounding them.

Few have surpassed him in intellectual attainments. A perusal of the great debates of the House and Senate while he was a Member of these bodies will bear testimony to his great ability, eloquence, power and strength of mind, and breadth of information. These splendid qualities of mind were united with noble purposes of heart. All of his instincts were patriotic and sought the betterment of State and Nation. His record as a public servant was clean and most honorable. No stain ever followed his footsteps. No whispering of suspicion ever clouded his name or record. His ambitions and ideals were high and lofty. It is by the lives and achievements of such men that the halls of legislation are made promotive of the moral, educational, and material development of the people.

His untimely death removed from this Chamber one of its most illustrious Members and one whose attainments pointed to a still greater life of usefulness. Well may we pause in the pressing activities of this body to pay tribute to one whose talents gave to this Senate distinction and whose life was consecrated to the public service of Maryland and the United States.

Mr. JACKSON. Mr. President, the death of ISIDOR RAYNER marks the passing of another of those illustrious men who, just as their splendid powers were in the full glory of perfect maturity, have gone to join that distinguished company of departed Senators, whose names are come to be numbered with those of Webster, of Calhoun, of Sumner, and of Hoar. It is not for me, his successor, to add new luster to the name of ISIDOR RAYNER or to perpetuate his fame, for his work, his life, are their own enduring monuments for posterity; but a feeling of profound respect for his ability and of sincere admiration for the man himself prompts me to pay this my tribute to his memory.

I know but little of his boyhood. If it be truly said that the "boy is the father of the man," then ISIDOR RAYNER, the youth, must have been as conspicuous among his comrades as was ISIDOR RAYNER, the man, among his associates—among whom he stood forth clothed in the strength of his own power. He was born on April 11, 1850, 10 years before the outbreak of the War between the States. Prior to 1866 he had attended the public schools of Baltimore and the University of Maryland. In that year he entered the academic department of the University of Virginia, the famous old institution from whose picturesque lawn and ranges have come those other distinguished Marylanders—Edgar Allen Poe and the late Maj. Venable. It is possible that here in the shadow of Monticello, in the university that Jefferson himself had founded, first grew the passionate admiration for Jeffersonian democracy that so distinguished his after life. Four years were spent at Charlottesville, during the last of which he studied in the law department. Already his oratorical powers had begun to develop, for at 18 he was the anniversary speaker of the Jefferson Literary Society. His subject was religious liberty. We know that this principle, the right to worship according to the dictates of one's conscience, free from the restraint of man-made laws, continued to be cherished by him as long as he lived, as, in fact, it has been by that remarkable race from which he sprang, whose sufferings from Christian intolerance have been no less noteworthy than the steadfastness of their adherance to the faith of Abraham.

In 1871 he was admitted to the bar. He became a brilliant lawyer. It was natural that his forensic ability should lead him to prefer the active trial table—the duties of the pleader—to the more somber office practice. He never hesitated to champion the cause of the weak or oppressed. His deeply sympathetic and emotional nature, those distinguishing characteristics of the race that has given the world the Bible and two great religions, was stirred most deeply when, as the champion of the downtrodden, he sought justice from the powerful. The late Admiral Schley selected him from a vast array of legal talent to insist that the history of the naval Battle of Santiago should go down to posterity correctly recorded. His work in that celebrated case did much to spread his well-merited fame throughout the Union. He displayed in that memorable inquiry after truth a remarkable knowledge of naval warfare, of the technique of sea fights, that could have been acquired only by the most earnest preparation. And if I were asked to name the distinguishing characteristic of ISIDOR RAYNER I should say without hesitation that it was earnestness, enthusiastic earnestness, the earnestness that is in fact the only true genius. His efforts in behalf of his fellow Marylander had at least this most satisfactory result—that the people of the United States, the great people, were enabled to judge for themselves who should rightly wear the laurels of the victory over Cervera.

Mr. RAYNER'S political career began with his election to the Maryland General Assembly in 1878. During this session he served as acting chairman of the judiciary committee. Even then his work indicated latent abilities that were ultimately to place him triumphant upon the lofty pinnacle of political fame. He was then, as throughout his life, primarily a friend of the people—the mighty average people who are struggling, sometimes foolishly, often misguidedly, but always sincerely and irresistibly, toward a larger measure of political happiness. He felt their sorrows; he sympathized with their endeavors; he saw through the sometimes absurd manifestations down to their sincere desire for better things. He espoused their cause with that same enthusiastic earnestness which I believe to have been his dominant trait.

In 1885 he was elected to the Maryland State senate and three years later to the House of Representatives of the United States. He was three times elected to that body, but I will not dwell at length upon his work in Congress. He was most active in his efforts to repeal the Sherman silver-purchase law in the panic-stricken days of the early nineties. His course was a fitting preparation for the senatorial career which marks the maturity of his ability, the splendid realization of the promise of early years. The climax of his career came with his election to this body in 1904. That was a memorable fight, a triangular battle for control, a struggle in which the tide slowly turned toward Mr. RAYNER, because public opinion, the resultant of the wishes of all the people, the force slow to move but irresistible when once aroused, demanded it. Gentlemen are familiar with his splendid services in this body. His consummate ability brought new luster to the State whose representative he was, new prestige to the Senate of the United States.

When he entered this body, Mr. RAYNER abandoned his law practice and devoted himself with singleness of purpose to the discharge of his public duties. And this is but an indication of his high conception of the office he honored by filling. He believed that it was worthy of the devotion of all his time and energy, and he plunged into his new duties with his own peculiar enthusiastic earnestness.

Senator RAYNER achieved distinction as a constitutional lawyer. I use the term to mean that he was a close student of the Constitution; that he applied his trained legal intellect to the mastery of its provisions; that he tested his own conception of its provisions by keeping in close touch with the interpretations of the courts; that his studies were based upon an abiding faith and belief in the Constitution as an efficient guaranty of the rights and liberties of the governed. In the early days

of the Nation he would probably have been called a strict constructionist. But nevertheless his views were tinged with the notion sometimes called modern or progressive, but really as old as the Federalist Party—that it is necessary to give the grant of powers to the Federal Government a more liberal interpretation than a literal construction would make necessary in order to accomplish for the people reforms obviously beyond the powers of the individual States. And thus he sympathized with the modern democracy that advocates an extension of the Federal power to the enactment of the so-called progressive measures of reform. While Jefferson and his party would secure liberty to the people by insisting that the powers of the Federal Government be not increased, the modern democracy would secure liberty by expanding the Federal power in order that there may be an effective agent to protect the people against themselves or certain of their number. And there is this difference in the result: For while the Jeffersonian idea looks to individual liberty, the modern democracy tends to a restriction of individual liberty and a relegation of individuals into certain, definite, and fixed classes.

That ISIDOR RAYNER was one of the great modern orators no one will deny. But he regarded his oratory as merely a means to an end, a fine tool at his command by which he might accomplish the ends dearest to his heart. As Plutarch says, "It is an ignoble thing for any man to admire and relish the glory of his own eloquence." Senator RAYNER combined somewhat the painstaking, studiously prepared style of Demosthenes with that more sparkling and satirical manner of Cicero. He was possessed of great natural ability, and this native gift he had cultivated by careful effort to the finished perfection we remember. There is a vast difference between mere public speaking and oratory. Anyone with a fair degree of intelligence may become a public speaker, but an orator is like a poet. He is an artist. He must have imagination. He must have intensive earnestness to make his audience see and feel his own visions. These qualities the late Senator had in high degree. He was possessed of the passionate earnestness of David, of the same racial qualities that matured so splendidly in Disraeli and Judah P. Benjamin. His masterful intellect was able to polish, to direct, to drive home the thoughts that could have arisen only in the mind of a true orator.

It is perhaps too early to estimate the exact place that Senator RAYNER will occupy in the lists of American statesmen. I believe his position will be high. He had the misfortune to belong to the minority party during the period of his greatest powers, and so there was not the opportunity for constructive statesmanship; but as a critic of dangerous tendencies, as a wise forecaster, as a balance wheel to constructive leaders, he certainly should go down to posterity as one of the typical statesmen whose efforts have so enriched and strengthened the institutions of this great Nation. I know of no single service he performed with more credit and which will result in more lasting good than his insisting that the President should not disregard the limitations of the Constitution; that he should not set in motion a dangerous tendency in order to accomplish a present and immediate advantage. He insisted that in government the means are quite as important as the end, for the means of to-day become the precedents of to-morrow.

But the RAYNER I admire is not so much RAYNER the constitutional lawyer, RAYNER the orator, or RAYNER the statesman, as RAYNER the man, the great kindly gentleman. I love to think of him in his family, in his daily contact with his fellow workers. I love to wonder at the perfection of the human qualities he possessed in such attractive form.

He was a man, take him for all in all,
I shall not look upon his like again.

MEMORIAL ADDRESSES ON THE LATE REPRESENTATIVE UTTER.

Mr. WETMORE. Mr. President, I ask the Chair to lay before the Senate the resolutions of the House of Representatives on the death of Mr. UTTER, my late colleague in that body.

The PRESIDING OFFICER (Mr. PAGE in the chair). The Chair lays before the Senate resolutions from the House of Representatives, which will be read.

The Secretary read the resolutions of the House, as follows:

IN THE HOUSE OF REPRESENTATIVES,
February 9, 1913.

Resolved, That, in pursuance of the special order heretofore adopted, the House proceed to pay tribute to the memory of the Hon. GEORGE HERBERT UTTER, late a Representative in Congress from the State of Rhode Island.

Resolved, That as a further mark of respect to the memory of the deceased, and in recognition of his distinguished career and his great service to his country as a Representative in Congress, the House, at the conclusion of the memorial proceedings of this day, shall stand adjourned.

Resolved, That the Clerk of the House communicate these resolutions to the Senate.

Resolved, That the Clerk of the House be, and he is hereby, instructed to send a copy of these resolutions to the family of the deceased.

Mr. WETMORE. Mr. President, I submit the resolutions which I send to the desk, and ask for their adoption.

The PRESIDING OFFICER. The resolutions submitted by the Senator from Rhode Island will be read.

The resolutions (S. Res. 473) were read, considered by unanimous consent, and unanimously agreed to, as follows:

Resolved, That the Senate expresses its profound sorrow on account of the death of the Hon. GEORGE HERBERT UTTER, late a Member of the House of Representatives from the State of Rhode Island.

Resolved, That the business of the Senate be now suspended in order that fitting tribute may be paid his high character and distinguished public services.

Resolved, That the Secretary communicate a copy of these resolutions to the House of Representatives and to the family of the deceased.

Mr. WETMORE. Mr. President, at his home in Westerly, R. I., on Sunday afternoon, November 3, 1912, the life of GEORGE HERBERT UTTER was suddenly terminated after a rather unsatisfactory condition of health extending over a period of several years.

Mr. UTTER was born in Plainfield, N. J., July 24, 1854, the son of George Benjamin and Mary Starr (Maxson) Utter. He was a direct descendant of the earliest settlers of the State of Rhode Island through his mother, who was the daughter of John Maxson.

Mr. UTTER received his early education in the private schools of Westerly, where he came with his parents in 1858, after which he spent two years in Alfred Academy, Alfred, N. Y. He then returned to Westerly and two years more were devoted to the pursuance of his course of instruction in the Westerly High School. The latter part of Mr. UTTER'S education was secured at Amherst College, Amherst, Mass., from which he was graduated with the class of 1877. He was a member of the Delta Kappa Epsilon Fraternity of that college.

Before entering upon his collegiate career Mr. UTTER learned the printer's trade, and after graduation became associated with his father and uncle, G. B. and J. H. Utter, in publishing the Narragansett Weekly. On the death of his uncle in 1886 he was taken into the firm, and on the death of his father in 1892 he became sole proprietor of the paper. Through his efforts the Westerly Daily Sun was started, the first issue appearing on August 7, 1893.

Mr. UTTER was engaged in public life for more than 30 years, first serving on the school board of the town of Westerly, with which he was so long identified. His political career was commenced in 1883, and for two years he was on the staff of Gov. Augustus O. Bourn. In the year 1885 he became representative in the general assembly, and when the Republican Party again came into power in the State in 1888 was chosen speaker of the house. From May, 1889, to May, 1891, he was a member of the State senate and served on the judiciary committee for both years, acting as chairman of that committee during the latter year. He was then the choice of the people of Rhode Island for secretary of state, in which office he served from 1891 to 1894, but was compelled to retire because of increased business demands upon him. Mr. UTTER again served the State in 1904, when he was elected lieutenant governor. The following two years, 1905 and 1906, he was chosen chief executive of Rhode Island, and in the fall of 1910 was the successful candidate for Representative in Congress from the second congressional district, which office he held until his death.

He received the unanimous nomination of his party for a second term in Congress, and would undoubtedly have been reelected had his life been spared, his death occurring only two days before the election, November 5, 1912.

He was always an active church worker and devoted a considerable portion of his time to the Young Men's Christian Association movement throughout the Eastern States, being a member of the Young Men's Christian Association executive committee for Massachusetts and Rhode Island. He was made a deacon of the Seventh-day Baptist Church of Westerly in 1894, and for 20 years acted as superintendent of the Sabbath school. For 15 years he was treasurer of the Missionary Society of the Seventh-day Baptist denomination.

I desire to read the following tribute to Gov. UTTER, which appeared the day following his death, in an editorial published in the Providence Evening Bulletin, a Democratic newspaper:

GEORGE HERBERT UTTER.

It is only the simple truth to say that no man in the public life of his time in Rhode Island occupied the same place in the affectionate esteem of his fellows as Representative UTTER, who died at his home in Westerly yesterday afternoon.

Mr. UTTER was a man of exceptional capacity for personal friendships. In his contact with other men he had a happy faculty of reaching their point of view, understanding their position on debated issues, and sympathizing with their difficulties. Nor could anyone be more loyally appreciative of their success.

Unassuming to an unusual degree, he was nevertheless a capable public officer in all the important places he was called upon to fill. He served in succession as a member of both branches of the general as-

sembly, as speaker of the house, as secretary of state, lieutenant governor, and governor, and finally as Representative in Congress. If he had survived, it is probable that the doors of the United States Senate would have opened to him.

Mr. UTTER was a growing man in his party. In the campaign now closing he had been drafted for service by the Republican national committee in many parts of the Union. He participated in the primary campaign of last spring as far west as Ohio, canvassed Vermont and Maine previous to the September elections in those States, and had since given too liberally of his strength to the national campaign. When he should have been recuperating he was on the speaker's platform instead, and his activities in this respect very likely accelerated the disease that has now caused his death.

A striking proof of the impression he made at Washington in the short period that was vouchsafed to him there may be found in the CONGRESSIONAL RECORD of June 17 last. Mr. RICHARDSON, of Alabama, the Democratic chairman of the Committee on Pensions, paid the following exceptional tribute to him in an address before the House:

"Mr. Speaker, I regret very much indeed that a very distinguished Member of this House, a member of the Pensions Committee, and, in my opinion, justly and worthily classed among the ablest lawyers on the floor of this House, from the State of Rhode Island, Mr. UTTER, is not present."

This is the tribute of an experienced Democratic legislator to a Republican serving his first term, and it is rendered the more striking by the fact that Mr. UTTER was not a member of the bar.

To many of his fellow citizens in Rhode Island the quality that chiefly commended him as a public servant was his courageous independence of thought and action. Devotedly loyal to the principles of his party, he could nevertheless not be persuaded into compromises and transactions which his conscience did not approve. He had a peculiar hold upon the Republicans of the State, because they trusted him to stand clear of unworthy partisan machinations. In his independence lay his largest strength, and even the party bosses realized that fact. He could not be bossed, and the people knew it.

Mr. UTTER was much more than a politician. He was earnestly interested in many goods works, both in his home town and elsewhere. He spoke throughout this part of the country in behalf of high causes and was gaining a continually wider reputation as a master of the art of easy and effective address.

The State is poorer for his death. It is no exaggeration to say that Rhode Island mourns for GEORGE UTTER, as he was familiarly and affectionately known, to-day. It saw in him the best type of public servant—efficient, modest, and industrious; a man of high ideals, blameless private life, instinctive friendliness, and stout convictions.

> Though modest, on his unembarrassed brow
> Nature had written "gentleman."

Mr. President, my acquaintance with Mr. UTTER extended over a period of many years, and I held him in the greatest esteem.

He had a high standard of political and civic conduct, which he exemplified in his life.

He was an orator of ability, always ready to give this gift of his to the Nation and his State, and it may be truly said his life was shortened by complying with the many demands of this nature made upon him.

His personality was attractive and his disposition lovable.

The world is better for his life.

Mr. GALLINGER. Mr. President, during the past year death has exacted a heavy toll from among the men in public life, included in the list being Hon. GEORGE H. UTTER, of Rhode Island, an able and influential member of the National House of Representatives, in honor of whose memory fitting words are to be spoken to-day.

My acquaintance with the late Representative UTTER was rather limited, but I knew him well enough to entertain the highest possible regard for him as a faithful, industrious, and able public servant. He was a strong party man, who could be relied upon to vigorously defend the principles and policies in which he believed. He was especially an earnest and able advocate of the Republican doctrine of protection, the beneficent results of which he had particularly noted in the industrial centers of his own State. His oratorical abilities were of a high order and his services were in great demand as a political advocate beyond the borders of Rhode Island, his voice being heard in many campaigns in other States than the one he so well represented in Congress.

Mr. UTTER was a man of strong religious convictions. He made many addresses before religious gatherings, being always ready to aid in every good cause. His predominant characteristic was courage, mental and moral as well as physical. He never shirked what he considered his duty as a public servant, his action on a measure being governed by his convictions rather than by considerations of policy. Having once taken his stand in a matter he did not hesitate to express his views with force and vigor, and to labor unceasingly to bring about what he believed to be for the public good.

Starting as a printer, Mr. UTTER rose through the various stages of the profession to be owner and editor of the Westerly Sun. Through the columns of that paper he found a means of impressing his high ideals upon the people of his home town, as well as upon the State at large. His newspaper was one of those which set a high moral standard, living up to it without regard to temporary financial losses occasioned through the rejection of news or advertisements which he considered unfit to be placed before the public. In that regard it is to be regretted that there are not more editors of that type.

Mr. UTTER was a strong Republican but free from any suspicion of narrow partisanship. As governor of his State he was uninfluenced by clamor, and his record in that office reflects the high tone of his private, business, and public life. He inaugurated many reforms in the laws of Rhode Island, which stand to-day as monuments to his broad understanding of the people's welfare, and which at the time they were enacted required an unusual degree of courage to support in the face of much powerful opposition.

The death of a man like Mr. UTTER is a great loss to not only the community in which he lived, but to the State and Nation as well. It is fortunate for him that his lifework left a monument more enduring than marble or bronze, which in the memory of those who knew him will always remain as the best possible proof of his high character and distinguished achievements. It can well be said of him that he made the most of his opportunities and that he did the best he could to advance the material and moral interests of those whom he so well represented. Measured by the standard of uprightness and integrity, Mr. UTTER left a priceless legacy to his family, a legacy in which his legion of friends in private and public life all share.

Mr. President, it is undeniably true that—

> 'Tis not the whole of life to live,
> Nor all of death to die.

Of this man it may truthfully be said that he lived his life well, and that in his death no clouds dimmed the sweetness and beauty of his earthly existence. We may well believe that he still lives amid environments free from the cares, the toil, and the vicissitudes of this world. For him the great mystery of death has been solved, and for us he has left the lesson of a life well spent—an example to the youth of the land, and an admonition and inspiration to us all. Mr. UTTER'S life was one of unselfishness, filled with genuine sympathy for all classes and conditions of our people. He strikingly illustrated in his life the thought of the poet expressed in these words:

> If men cared less for wealth and fame,
> And less for battle fields and glory;
> If writ in human hearts a name
> Seemed better than in song or story;
> If men, instead of nursing pride,
> Would learn to hate it and abhor it;
> If more relied
> On love to guide,
> The world would be the better for it.
>
> If men dealt less in stocks and lands,
> And more in bonds and deeds fraternal;
> If love's work had more willing hands
> To link this world to the supernal;
> If men stored up love's oil and wine
> And on bruised human hearts would pour it;
> If yours and mine
> Would once combine,
> The world would be the better for it.
>
> If more would act the part of life,
> And fewer spoil it in rehearsal;
> If bigotry would sheath its knife
> 'Till good became more universal;
> If custom, gray with ages grown,
> Had fewer blind men to adore it;
> If talent shone
> In truth alone,
> The world would be the better for it.
>
> If men were wise in little things,
> Affecting less in all their dealings;
> If hearts had fewer rusted strings
> To isolate their kindly feelings;
> If men, when wrong beats down the right,
> Would strike together and restore it;
> If right made might
> In every fight,
> The world would be the better for it.

Mr. President, this brief tribute to the memory of Mr. UTTER falls far short of doing adequate justice to the subject, but others, who knew him better than I, will tell more in detail of his high character, his great work, and his splendid public service.

Mr. LIPPITT. Mr. President, I esteem it a privilege to have this opportunity of speaking about the career of GEORGE H. UTTER, for, as I have studied his methods and achievements, I have been more and more impressed with the fact that his was an unusual character. I have known him for years as he has been known to a majority of the other people of Rhode Island, as a man who has occupied high office with credit to himself and with credit to the State. But of an exact knowledge of the type of man he was, of his motives, of the nature of his views upon public and private questions, I confess to have had until recently a somewhat vague idea. During the two years he was in Washington it was my privilege to come into somewhat close contact with Mr. UTTER and to obtain thereby a clearer knowledge of his individuality. It was his habit to frequently come over to the Senate wing of the Capitol to discuss with me the many questions that come before Con-

gress, and which, for a newcomer not yet thoroughly in touch with the accumulation of information upon national questions possessed by older Members, are difficult to decide. I was impressed in these conversations by the mental attitude with which Mr. UTTER approached such problems. I found that he always knew the exact question he wanted to discuss and the exact form in which that question was coming before Congress. I also discovered that in considering these questions what he wanted to arrive at were the facts in regard to them and the propriety and wisdom of the alternative courses which these facts offered for his choice, as they might affect the people particularly interested and the country at large.

I never knew him to be thinking about the effect his action might have upon his individual fortune. He never seemed to be concerned about whether his constituents would approve his course, but, rather, to so decide that he might have his own commendation. As time went on, it began to strike me as somewhat remarkable that a man of Mr. UTTER'S long experience in public life should come to me to discuss such public questions in the inquiring and modest manner with which he always seemed to approach them. It would have been ordinary human nature for a man who had behind him the successful public career that this man had to have acquired such confidence, or, perhaps, I might say such esteem, for his own judgment that he would approach these conferences rather with a disposition to teach than with the desire to learn, and I became interested gradually in the problems that such a disposition presented.

Mr. UTTER'S experience, I believe, is unique in the State of Rhode Island. There certainly has been no case in recent years of a man who has arrived at the high political positions to which he was elected by the gradual political steps that Mr. UTTER did. I am told that almost from his first appearance in Westerly, as a graduate from Amherst College, he began to take an active, if not important, part in the public questions of this community. It was in the days when town meetings were good training for public life. The questions there considered perhaps were not of Nation-wide importance, but they were those in which the local community took a strong and often bitter interest, and partisanship ran high; in fact, it has often been claimed that in the discussions and experiences of our New England town meeting the American people obtained that political training that has made the stability of this Republic such a contrast to that of many of our competitors in the art of government.

By what subtle process it is that in the daily association with each other it is gradually discovered that one man or another has the ability and the character that we want to see in public men is not always plain, but it is tradition that those qualities early made themselves apparent in Mr. UTTER, and once he had been put in the line of promotion his upward progress was rapid and almost uninterrupted. Appointed as a colonel on the personal staff of Gov. Bourne in 1883, when he was but 29 years of age, he went on two years later to fill the office of representative in the legislature, which culminated at his fourth term in his occupying the office of speaker of the house of representatives, then, as now, a position of such importance to the efficiency of that body and the comfort of its members that it is seldom acquired without merit. In this case the office was filled by Mr. UTTER with entire credit to himself and satisfaction to his colleagues. His talent as presiding officer made that session of the legislature unusual for the celerity with which the public business was dispatched, and the legislature adjourned at the appointed time with clean slates and without hurry.

For the next two years, 1890–91, he occupied the position of senator from Westerly, and as chairman of the judiciary committee was the majority leader in that body. The six years thus spent in the legislature made him generally known to the people, and so generally liked that he was nominated and elected secretary of state, which position he held for three years until the expiration of 1894. During the next 10 years, though not occupying public office, he was constantly speaking in different parts of the State upon political and other questions, and so constantly adding to his reputation that in 1904 he was elected lieutenant governor, and in the following year was promoted to the office of governor, to which he was reelected in 1906. In 1910 he became Representative in Congress, succeeding Mr. Adin B. Capron, the condition of whose health prevented him from again being a candidate. Many other men have held some of these offices, some other men have held several of these offices, but I believe there is no other man that has held all of them, and it becomes interesting to inquire into the type of man to whom this experience was given. I think that by such an inquiry you will find that the personal qualities that made it possible are as unusual and as admirable as the career itself is unique.

Mr. UTTER was an orator. Throughout his career he has been a pleasing and popular speaker in every part of Rhode Island. As a speaker his methods were those of a practical man talking to a practical people. His addresses were simple in their language, clear in their thought, direct in the way he treated his subjects. He was not profuse in oratorical illustrations. He did not have the imaginative flights of an Ingersoll or a Bryan, with their Plumed Knight and cross of gold, but he was full of ideas, that when he became interested in his subject poured forth in a rapid stream of well-chosen English and at a speed that could only be attained by a man of an active and well-filled mind. It was not easy for any but an expert stenographer to follow him.

"I like to hear you talk," said an old lady in New Hampshire to him one day, "for you never have to stop to think."

His manner on the platform was such as would naturally spring from the kindly nature of the man himself. He was vigorous and energetic, but not violent nor rasping. He did not excite opposition, but rather inclined men's minds to move along in the way in which his own mind was going, to receive acceptably the thoughts he was trying to put into their minds rather than to seek arguments in opposition. He was naturally inclined to affection. It was his disposition to seek for the things that he could admire in others and he attracted affection because he saw things in others to like. This disposition colored and stamped the character of his public appearances, and if he did not always convince his audience, he seldom failed to inspire that friendship among them that made the firm foundation for his popularity.

"As Jonathan would have been delighted to have presented the name of David to the people of Israel, so do I approach the pleasant duty which this opportunity affords," was the way in which Adin Capron offered Mr. UTTER'S name in nomination for the position of governor in 1904, and two years ago, when the Republican Party leaders were hesitating over the availability of several most eligible candidates to succeed Mr. Capron at Washington, the practically unorganized movement of his friends from all parts of the State drove his nomination through the convention with a rush that would not be stayed.

What, now, were the habits of thought, the mental characteristics, of the man of these achievements? For after all the true test is the man himself rather than what has happened to him. In a rough way men can be divided into those whose nature it is to seek something to commend and who commend it, and those who seek something to condemn and who condemn it. Men have achieved high positions and have produced important results by each of these methods, but if for Mr. UTTER to have been a member of the legislature, speaker of the house of representatives, leader of the senate, secretary of state, lieutenant governor, governor, and Representative in Congress, to have won the affection and esteem of his fellow citizens and kept it to the day of his death, it had been necessary for him to be a critic of individuals, to delight in exposing evil things, to be a man who pulled down rather than one who built up, he would never have occupied any of these offices, for all such methods were so utterly foreign to his nature that you will search his career and his speeches in vain for any sign of them.

Active as was his mind, it was active in the discussion of ideas not in the discussion of men, except so far as men could be helped. During a large part of the time—for nearly 30 years—he was actively engaged in the duties of public offices and of a political career; but the remarkable thing to me about this man is that he was no more interested and active in the subjects that pertain to a career of this kind than he was in the thoughts and activities that pertain to an entirely different side of human life. For during all this long period often as he spoke upon political questions no less often did he speak upon moral questions. During his two years as governor, week after week, in one part of the State and another, and before one class of religious thinkers and another, he was carrying the message of the broad and tolerant morality in which he so earnestly believed. It is rather unfortunate that but few of his public addresses have been preserved, and even these are only in fragmentary form, but there are enough to show clearly the kind of ideas upon which his mind loved to dwell.

"One of our failings is to find fault. It is human nature to overlook the multitude of good things and to see that which is evil. Let us have charitable judgment on our neighbors," is what he told the people at the Park Street Church.

"True friendship means that we must overlook our friends' faults and magnify their virtues" is the way he was talking a few days later at the Pythian celebration, and again he says:

There are three virtues that every man must cultivate toward his fellow man—forbearance, confidence, and help. The practice of these constitute the square deal.

Similar ideas, simply but emphatically expressed, is the message he was constantly carrying from one end of the State to the other.

If he was a practical politician, who discussed practical questions in a practical way, he was no less a man with lofty ideals of public and personal service, and if he felt and inculcated these ideas toward individuals, you may well believe that he was no less desirous of serving the State when he was called upon to serve her in a way that would redound to her glory and to the increase and upholding of her good name.

"I want to meet the people of this State and talk to them and of them, finding good instead of evil to speak of in the State and its institutions; I tell you Rhode Island is a State to be proud of," he said to a reporter just after his second election as governor, and this was no accidental state of mind. Continually, through all his public addresses, you will find ardent and eloquent expressions of his love and admiration for Rhode Island.

"Let no man throw discredit upon this State; let every man protect this State, her honor and all that pertains thereto," he said to the jewelers at their banquet in March, 1906; and on another occasion, speaking of Rhode Island, he says:

> Her richest inheritance is her glorious record throughout the history of this Nation, and the promise of her future is in the character of her sons.

However often in the active current of a busy community we may sometimes forget it or be inclined to doubt it there is such a thing as public spirit. There is that form of it which we call patriotism, and if the thoughts in this man's mind, if the constant trend of his teachings, if his lifelong acts and occupations are reliable guides he was on fire with it. Not as a noble sentiment to be eloquent about. I never happened to come across the word in his speeches, but as something that was constantly, though unconsciously pushing him on to praise and extol Rhode Island—her people and her institutions. I can imagine him hot with indignation when she was unjustly or ignorantly assailed—eager and keen to defend. His very first act as Representative in Congress was to speak in her praise, as to praise her had been the theme he loved the best through all his gubernatorial career.

Thus his speeches and acts bear testimony to his natural disposition to look for the good wherever it can be found, for to so do was his idea of service and service was the passion of the man, service to the men and women with whom he came in contact, service to the State which it had been given him to represent, service that would make the men and the State think better of themselves and would make their neighbors and associates think better of them also.

"There is no nobler motto, there is no greater wish that we each one can take to ourselves to-day than this and this only, 'I serve,'" is the conclusion of one of his inaugural addresses to the general assembly; and again, in one of his Sunday talks—

"Put into the thought of your children that the highest duty of an American is to be of service to some one else. It will have a good effect in some place and at some time."

"Let no man think he can advance himself by closing the door of opportunity to his neighbor," he tells the Master Carpenters' Association.

Still in his thought mere giving is not enough. The manner of the giving and the manner of serving must be as complete and as perfect as the service itself. There is a couplet of Lowell's which I am told was constantly in his mind and which he constantly quoted, so constantly that to some of those who knew him best its sentiments stand to them for the character of the man.

> Not what we give, but what we share,
> For the gift without the giver is bare.

I am aware that we sometimes associate the use of such sentiments as this with something of insincerity or with some tendency of character that fails to impress us as manly, but no man who followed the career of GEORGE H. UTTER, some of whose characteristics I am trying to bring before you, ever associated any such idea with his unpretending modesty, his unmistakable enthusiasm and force. There was nothing mawkish or effeminate about this vigorous and independent political fighter. If the ideals of human conduct were constantly in his mind, and they were, they were there as something not to be worshiped from afar, but as something to be used in the constant activities of daily life. They were not to him merely something to be talked about in the sacred surroundings of a Sunday evening church meeting, and forgotten during the week.

"The way to save the Nation is to keep on doing it day after day, and every day," is the energetic plan he urged upon his hearers.

"There is danger in the notion," he said, speaking of government, "that it can obtain equal results for all men. The only thing which the law can do is to give each man an equal opportunity," and he urged his hearers to look for and to use all their opportunities, for no one will do it for them.

This, then, is the portrait of the man as I see it revealed in his acts, in his thoughts, and in his speeches. That he had a remarkable and honorable career I have already said. That, combined with that career, there was the constant evidence of an admirable and unusual type of mind, of heart, and of conscience I think no one who may study Mr. UTTER'S record will deny. I will confess that I started to prepare this address gladly, but nevertheless, as somewhat of a perfunctory duty. I stand now as a great admirer of a career that I believe had its foundation in the loftiest ideals of human conduct. I believe that I have been studying the acts and thoughts of a man than whom no other is entitled to stand higher in the minds and hearts of the people of Rhode Island, so that what I began as a duty I now bring as a tribute of affection, of appreciation, and high esteem.

The archives of Rhode Island will preserve the list of his honors, and to his friends and neighbors his memory will long be dear. I think we may safely believe that he himself, with his clear and active mind, with his high ideals and his spotless record, has gone on to—

> Join the choir invisible
> Of those immortal dead who live again
> In minds made better by their presence; live
> In pulses stirred to generosity,
> In deed of daring rectitude, in scorn
> For miserable aims that end with self.
> In thoughts sublime that pierce the night like stars,
> And with their mild persistence urge man's search
> To vaster issues.

MEMORIAL ADDRESSES ON THE LATE REPRESENTATIVE WEDEMEYER.

Mr. TOWNSEND. Mr. President, I ask the Chair to lay before the Senate resolutions from the House of Representatives on the death of the late Representative WEDEMEYER.

The PRESIDING OFFICER (Mr. PAGE in the chair). The Chair lays before the Senate resolutions from the House of Representatives, which will be read.

The Secretary read the resolutions, as follows:

IN THE HOUSE OF REPRESENTATIVES,
February 16, 1913.

Resolved, That the business of the House be now suspended that opportunity may be given for tributes to the memory of Hon. WILLIAM W. WEDEMEYER, late a Member of this House from the State of Michigan.

Resolved, That as a particular mark of respect to the memory of the deceased and in recognition of his distinguished public career the House, at the conclusion of the memorial exercises of the day, shall stand adjourned.

Resolved, That the Clerk communicate these resolutions to the Senate.

Resolved, That the Clerk send a copy of these resolutions to the family of the deceased.

Mr. TOWNSEND. Mr. President, I offer the resolutions which I send to the desk.

The PRESIDING OFFICER. The Senator from Michigan offers resolutions, which will be read.

The resolutions (S. Res. 474) were read, considered by unanimous consent, and unanimously agreed to, as follows:

Resolved, That the Senate has heard with deep sorrow of the death of the Hon. WILLIAM W. WEDEMEYER, late a Member of the House of Representatives from the State of Michigan.

Resolved, That as a mark of respect to the memory of the deceased the business of the Senate be suspended in order that proper tribute may be paid to his high character and distinguished public services.

Resolved, That the Secretary communicate a copy of these resolutions to the House of Representatives and to the family of the deceased.

Mr. TOWNSEND. Mr. President, I fear that the custom of memorializing those who die while serving in Congress is coming to be more a perfunctory duty than a sad yet grateful opportunity, but in rising to speak at this time I am deeply impressed with the solemn privilege of expressing to my colleagues and to the friends of the late Congressman WILLIAM W. WEDEMEYER my appreciation of his high character and splendid ability. I realize, however, how futile it is for the mind to attempt to frame and the lips to utter thoughts which would adequately convey the feelings, confused and inexpressible, which overwhelm those who have not yet recovered from the shock of Mr. WEDEMEYER'S tragic and most distressing death.

Death is not a stranger. He has visited every home. He has knocked, or will knock, at every door, and neither love nor knowledge nor power nor any other thing can bar his entrance. He is no respecter of persons, and the wise and the foolish, the great and the small, the rich and the poor, the famous and the obscure he treats with merciless impartiality. All know this. Every thoughtful person understands that either to-day or to-morrow the grim reaper will call and strike him from the roll of the living, and yet he ever prays for a postponement until

to-morrow and tries not to think that to-morrow will come; but it will come.

As we grow older and get more tired we look upon death differently from what we did when we were younger. Then life meant much. The world was big and beautiful. Hope reigned supreme and death was the end of joy and gladness. In after years, however, when we had come through experience to know that life was a struggle and that its tasks could not be completed in time, we sometimes had longings for rest, and gradually we came to find comfort in the Psalmist's words, "He giveth his beloved sleep."

From the time the first intelligent man looked upon the vacant tenement of his companion until this hour, death has been regarded as a solemn mystery, and yet it is no more mysterious than is life. Who knows the origin of being? Who understands the relations between spirit and matter? Who can explain that strange phenomenon called thought? Every sentient being has a brain which the chemist can analyze, weigh, and measure, but who can discover its workings and find out how it paints pictures, builds houses, explores the stars, finds atoms, dreams dreams, loves, hates? Death itself is but an operation of life. Prior to so-called death we could see but could not understand the phenomena of life, because they were demonstrated through a body with which we were familiar, but death is only a name for that change from the finite to the realm of the infinite. Can we say that birth was the beginning of life, that it did not exist somehow, somewhere, before? Can we say that it does not exist somehow, somewhere, after the body dissolves? The million larvæ in the pond live their lives and one by one they vacate their bodies and leave their native home, the water, and disappear. We know they have been translated into a new world of light and air, but their fellows can not know this; to them the departed are dead.

This little span we call human life does not end with the dissolution of the body. It is brief when measured by earth revolutions, but it is eternity long in comprehension. Redwood trees now growing on the Pacific coast were there when Homer sang, when Socrates taught, when Alexander fought. They were centuries old on the first Christmas morning, and yet man in his infinitesimal day comprehends all that growth of trees which for 3,000 years have been climbing skyward and resisting the shocks of centuries. Man can read the record of development from swelling seed to giant tree. In a day he comprehends the experience of 30 centuries.

We are told that some of the stars are so far away that if one had been blotted out at the dawn of history its light, traveling with such tremendous velocity, would still be streaming on us, sufficient time not having elapsed for the last ray to reach the earth, and yet in a moment man traverses that appalling space and sees the star that was, but is not. He can pass through the eons of sun-building time and comprehend all from nebula to star.

Can we measure man by years? He is greater than matter, older than time, coexistent with God.

So runs my dream, but what am I?
An infant crying in the night;
An infant crying for the light,
And with no language but a cry.

Philosophy fails to relieve heartaches caused by death, but the departure of a good man with an untarnished record of honor and helpful usefulness does not leave the mourner so hopeless and miserable as does the going of one who has not contributed to the happiness and betterment of the world, and as we gather on this sad memorial occasion memories of our departed friend excite only beautiful and loving thoughts, for WILLIAM W. WEDEMEYER was a good and useful man. For a quarter of a century I knew him intimately and well. I met him first when he was a student in the University of Michigan. He was a poor boy and had to work his way through school. This was a blessed hardship, for it was the experience which develops character and makes men. As a student he gave promise of the orator which he later became. Few men in Michigan were his equal in presenting a cause to the public and none surpassed him. He possessed that necessary qualification of the true orator, sincere earnestness, and the later political history of his home county is the record of his triumphs. The cause he championed there seldom failed, and time has disclosed that he was, almost without exception, right. His friendly manner, his open honesty, his superior ability made him a natural leader in political thought and action, and coming from the people he understood them and became their advocate, and they loved and admired him. Few men in Michigan knew more people by name, and all familiarly called him "WEDE."

Soon after leaving the university he became a State character and every county committee of his party in the State besieged the State central committee for his services in every campaign. He was a Republican in politics and a progressive one. Gov. Pingree was the pioneer of modern political reform, and he selected Mr. WEDEMEYER, then a very young man, as his aid in the office of railroad commissioner. It was during the Pingree administration that Michigan changed her system of railroad taxation from the specific to the ad valorem plan, and Mr. WEDEMEYER was one of the governor's most effective advocates of the change.

He had little more than reached the constitutional age of 25 years when his home friends selected him as their candidate for Congress, and at the convention of 1896 he came within 1 vote of being nominated. In 1902 he was candidate for Congress again and received the unanimous and enthusiastic support of his county. He was twice defeated for the nomination for Congress, but after each defeat he entered the campaign and supported his successful rival with great zeal and ability. He had a happy faculty for making and keeping friends, and when in 1910 he entered the primaries he had enough admirers in all parts of the district to triumphantly nominate him over his strong and popular three-times opponent, the Hon. Henry C. Smith. At the November election following he was overwhelmingly elected, and he entered upon his congressional career backed by a proud constituency and possessed of high ideals for public service.

In the 10 years I have been in Congress I have met and known nearly a thousand Members and Senators, and I am sure I never knew a man who worked harder and more conscientiously to perform his full duty than did Congressman WEDEMEYER. No citizen of the second congressional district ever appealed to a deaf or careless ear when he wrote to Mr. WEDEMEYER. He accomplished much while in the House, and even his political opponents recognized in him a growing legislator who would soon take a prominent place among the leaders of the American Congress. His was the genius of industry. Every day, every night, he was at work upon matters appertaining to the duties of Congress, and those duties were exacting, frequently they were difficult, and often they were a great drain upon his nervous energy. He took life seriously. No duty came to him that he did not regard important, and somehow it seems to me now that he must have been impressed with the brevity of his time, for he could not consent to put anything off until to-morrow. He must do it at once.

Big in body and mind, he impressed the casual acquaintance as being a great, strong, kindly boy. His spirits seemed high and his genuine friendliness gave him a welcome everywhere. In whatever place he was he became an active, prominent figure.

As a citizen he had no superior. As a statesman few men in Congress have had a more promising prospect than was his. As a friend he was loyal to the core. The brightest spot in my memory of him, however, will be his devoted love for his family. He never wearied of telling me of his beautiful children. He carried their little letters to him about in his pocket, and however excited he might get in his conversation with me, he always closed with a joyful incident connected with the little ones. I recall that about the last time I saw him, and after he had dwelt to some extent upon his defeat for Congress last November, I told him that he ought not to feel badly, for with his energy and ability there were bigger and better things for him than a seat in Congress, and that he could be at home with his family more now. He brightened up and the old smile came back, and he exclaimed: "That's right. Don't think that I want to boast of my children, but they are nice youngsters, and I can see more of them hereafter. I'm all right, and have the finest family in the world."

He had a sensitive soul, tuned to the higher, better things of life. He was instinctively honest, and unjust criticism cut him to the heart. He had the keen and quick perception and the attractive personality which made him a natural political leader, but his sensitive mind was easily injured and the scars showed. With the ambitions of the politician was joined the sensitiveness of a child. He always fought in the open, and against the attacks of an honorable foe he was invincible. He knew how to parry the thrusts of the spear, but he was unskilled in avoiding the stabs of the stiletto.

I still recall the real suffering which he endured when he was flippantly criticized by some newspaper reporter who understood that the mission of the newspaper is to ridicule rather than to strengthen.

It is wicked to be false to a public trust, but it is more wicked to poison the public mind with suspicion about an honest Representative; and this is not so because of the evil effect upon society alone, but also because of the suffering and the weakness it brings to the faithful servant.

At this time, as I look back over the last few years, I can see that a change was being wrought in Congressman WEDEMEYER'S mental condition. He lived under continuous excitement.

Everything he did was done vigorously. His desire to be right always caused him to weigh all matters, great and small, with rigid exactness, and his fear of making a mistake bred doubts within his mind, and he who contracts the habit of doubting is lost. This is especially true of the legislator who is called upon to decide the many questions upon which honest and intelligent men differ. During the last year he was always fearful of making a mistake, and the destroyer Doubt was doing his work. I can see now that his nervous energy was being depleted and his overworked brain was showing strain. His defeat last November did not cause his death. It may have hastened it a few months, but eventually the effects of a mind diseased would have been fatal.

How much better for his friends and loved ones to remember him as we knew him—strong, vigorous, and complete—than to remain familiar with the splendid body which once was his, but out of which he had gone.

At about 7.30 on the evening of the 2d of January he stood on the deck of the steamship *Panama* and gazed out into the star-gemmed heavens. Who can say what thoughts passed through his mind? Who can tell what he saw and heard besides the stars and the music of the waves? Maybe he saw the light ineffable; maybe he heard the heavenly choir. We know that a moment later he cast into the sea the shell in which his cramped spirit had been confined and soared away to realms eternal.

O death, where is thy sting? O grave, where is thy victory?

Mr. JONES. Mr. President, there is a lesson for each of us in the tragic death of WILLIAM W. WEDEMEYER. Earnest, honest, sincere, ambitious, and serving his people well and faithfully, he put forth his utmost endeavor in their behalf and in behalf of the right as he saw it. Anxious to please his people, he was, nevertheless, steadfast to his convictions of right and duty. His action in some instances was not in accord with the views of some of his constituents and thoughtless partisan criticism was launched at him and his motives impugned. This grieved his sensitive nature. So honest and sincere himself, he could not understand why his motives should be questioned by those who did not approve his conduct. He brooded over this injustice, and this doubtless snapped the delicate cord that held reason to its throne and led to his tragic death. If there is one lesson for me and you and all of us to learn it is to look to the motive behind human action, and if that is good, honest, and pure, all honor is due the man for acting upon it, however much we may differ from him in judgment. Unjust, intemperate, partisan criticism brought pain, sorrow, ruin, and death to a man whose character was spotless, whose purposes were noble and ambitions high. Let us think before we speak or write the word of censure lest we unjustly wound. That man who may search his own acts or words and find in them the arrow that pierced the honest brain of our friend will surely suffer the tortures of hopeless remorse.

My first meeting with Mr. WEDEMEYER was the outgrowth of his friendly, sociable nature. I was stopping at his home city for a day or two when he came and introduced himself, and did what he could to make our stay a pleasant one. Our mutual interest in Alaskan affairs brought us into close contact here. He was a member of the Committee on Territories in the House, and we were both interested in securing local self-government for Alaska. I found him most earnest and active in behalf of this measure, and of everything else that was thought to be beneficial to our citizens in this far-away land. He could not have been more interested in a matter of vital benefit to his own people. He came to the Senate frequently and conferred with me after the bill passed the House, and I came greatly to admire his energy, earnestness, and good judgment. The people of Alaska owe much to this man who worked so faithfully for them and their interest without hope of reward save the approval of his own conscience. His action in this matter illustrated well his character and his idea of his duty as a legislator. He was, indeed, a servant of the people, not only of those of his own district, but of the whole Nation. All of his time, all of his energy, and all of his great ability was given to promote their welfare. He was an ideal public servant.

I have never forgotten the evening I spent with him at a meeting of the railroad employees of the Young Men's Christian Association, at the Union Station about a year ago. He radiated good nature and wholesome good fellowship. A giant in stature, a boy in spirit, a man in wisdom and intellectual attainments, he impressed all with his good humor, his strong intellect, and his lofty manhood. He delivered an address that charmed, pleased, and elevated everyone. It was witty, humorous, pathetic, lofty, learned, and inspiring, and fully justified all of the encomiums that have been said of him as an orator. His native ability, his breadth of intellect, his knowledge gained from books and travel, and his fund of apt and delightful stories, all displayed in a way that charmed and delighted his hearers, proved him to be a public speaker of rare attainment. Publicly and privately he drew you to himself almost unconsciously and made you love him.

It is often said to-day that a young man has no chance, no opportunity to make a name for himself, unless he has money or influence back of him. Let the young man who hears this read the life and achievements of our friend. He was born on a farm in Michigan in 1873. His parents were poor and he had no means. After working at whatever his hands found to do, going to school in the winter, he entered the University of Michigan in 1890. He paid his way by working at whatever he could find to do and living frugally. I was told that he and a friend lived in a garret and did their own work and cooking. He graduated with honor and distinction in 1894. He served in various positions of trust and confidence, and in 1910, at the age of 39 years, was elected to represent his congressional district in what is considered by many as the greatest legislative body in the world.

This brief statement of his life struggles and accomplishments is eloquent with encouragement to our youth. Without means and without influence, except that which always comes to honest toil and faithful endeavor and a steadfast purpose, he attained high distinction in a few short years. In his short life he proved that success and achievement do not depend upon birth or wealth, but largely on industry, thrift, and perseverance. He has left a rich heritage to his loved ones and friends and a brilliant example to our boys, teaching them that the day of opportunity to honest, faithful work has not yet passed.

My acquaintance with him, though brief, is a precious memory and an inspiration. In his death I have lost a friend, his family a loved husband and father, his country a splendid citizen, an earnest statesman, and a lofty patriot.

He has gone, gone to the higher life beyond. For him the mystery of mysteries is solved. With us his life is a precious heritage beckoning to better things. That he still lives we must not doubt. A character so great and with such promise is surely not so soon ended.

> Said one among them: "Surely not in vain
> My substance of the common earth was ta'en;
> And to this figure molded, to be broke,
> Or trampled back to shapeless earth again."

Mr. ASHURST. Mr. President, the Senate of the United States has not paused in its vast labors and arrested its attention to the public business for the purpose merely of indulging in formal eulogistic remarks upon the character of this deceased Representative. Services of this nature are for the living as well as to honor the memory of the dead. They are for the dead, because the stricken can no longer speak for themselves, and it must depend that friends who remain will see that justice is done to their memory.

They are for the living, because they serve as a monitor to teach how transient, how fleeting, how evanescent are fame, power, riches, and glory.

"Death," said one of the world's wisest men, "hath this also—it openeth the gate to good fame and extinguisheth envy." And that "to praise the dead is held proper, for only after a man is dead will the score of destiny be made even, as in life man is sometimes criticized, therefore in death man may be eulogized." It is not to be inferred that during life he whose memory we honor to-day was criticized, for I do not forget that he was quite generally praised, loved, and respected, and certainly no congressional district ever had a more faithful Representative than Mr. WEDEMEYER.

I became acquainted with Mr. WEDEMEYER some nine years ago, while in attendance as a student in the University of Michigan, and frequently spent a vagrant hour in his office discussing with him some mooted question of law.

He was well equipped for a congressional career. He was a brilliant and powerful orator and possessed a vast fund of rich and wholesome humor. He dealt with facts and figures in a charming manner, and could almost arouse an audience to enthusiasm even in discussing an auditor's prosaic report. When I first met him he was in the flush, strength, and pride of young manhood, and he incarnated the poet's lines—

> How beautiful is youth! How bright it gleams,
> With its illusions, aspirations, dreams!
> Book of Beginnings, story without end,
> Each maid a heroine and each man a friend!
> Aladdin's Lamp, and Fortunatus' Purse,
> That holds the treasures of the universe!
> All possibilities are in its hands;
> No danger daunts it and no foe withstands;
> In its sublime audacity of faith,
> "Be thou removed," it to the mountain saith,
> And with ambitious feet secure and proud,
> Ascends the ladder leaning on the cloud.

The news of his tragic death was especially shocking to all who knew him, for none suspected that his health had been impaired to the serious extent that was disclosed by information which subsequently came to light.

This public servant literally worked himself to death in honorable labor in behalf of his constituents.

He represented a proud constituency, a district long and ably represented by the present distinguished junior Senator from Michigan [Mr. TOWNSEND], and in Mr. WEDEMEYER's ardent desire to measure fully up to the high standard of excellence set by his predecessor, he did that which many new Members of Congress do when they become impatient with the periphrasis, circumlocution, prolixity, and delay which characterizes proceedings in Congress and the various departments of government—allowed himself no holiday, no moment of relaxation, no respite from work. This intense application to duty, with no playful interludes, reduced his vitality to a low ebb, while the heat, conflict, and tumult of the last election wore his strength away; and thus with his vitality reduced, with his nervous energy exhausted, the silver cord did not snap and break, but unraveled and fell to pieces, and he entered into that wide penumbra which lies between the sunlight of reason and the baleful shadow of insanity—that wide penumbra, Mr. President, in which there walk at times more men than the world suspects, as—

> Great wits are sure to madness near allied,
> And thin partitions do their bounds divide.

Hoping to regain his health and strength he sailed to Panama, but found no relief, for returning home, and while about 10 leagues out of the harbor of Colon, after sunset, pacing the deck of the steamer, he looked out upon the heaving billows, which the twilight of an early evening seemed to sow with orient pearl, looking down into the waters he saw reflected the quenchless stars and their shining trains, which had resumed for another night their eternal vigils of the sky; he saw mirrored within the waters the "floor of heaven thick inlaid with patines of bright gold." And our sick and weary friend, momentarily believing he saw a radiant place of refuge and of rest, where his heart would not be harassed, plunged himself instead into the airless meadows of the mysterious deep.

We know he suffered much, but let us believe his pangs are over; let us believe that the ocean's healing waters relieved his troubled brow, cooled his heated and accelerated pulse, and that "after life's fitful fever he sleeps well."

It is not given to mortal eyes to gaze upon the invisible, or to know the inscrutable, and thus the most vital problem of all, the problem of our own existence and our own death, is the one which is the most difficult for finite minds to try to understand. Faith alone vouchsafes a reply, for in the innermost sanctuary of every soul faith gives the assurance that after we shall have crossed what we call the frontier of the dark kingdom we shall find death is not a wall, but a door to a larger and more useful life. One of the most helpful and hopeful sentiments to be found in all our literature is the stanza from Bryant's Ode to a Waterfowl:

> He who, from zone to zone,
> Guides through the boundless sky thy certain flight,
> In the long way that I must tread alone,
> Will lead my steps aright.

Mr. KERN. Mr. President, my acquaintance with WILLIAM W. WEDEMEYER was comparatively short, but rather intimate than otherwise. During his term of service here we lived at the same hotel, and as he represented the district and resided in the city in which my alma mater, the University of Michigan, is situate, we found many subjects which we could discuss with mutual interest.

Of course, the marvelous growth and development of the great university, the personnel of the faculty, the mighty changes wrought by the lapse of years, and the great success attained by the alumni of that institution, scattered as they are throughout the Republic, were the subjects most frequently discussed, but on many occasions he sketched the story of his life and gave me glimpses of his hopes and aspirations.

Mr. WEDEMEYER took degrees in both the literary and law departments, and was deeply interested in everything pertaining to the university and always active in every movement looking to the advancement of its interests, and in return he received in a marked degree the appreciative confidence of the regents and the faculty.

Less than a year ago it was my privilege to attend a large meeting of the Alumni Association of the Mississippi Valley, held at St. Louis. That meeting was attended by the president of the university, the deans of the several faculties, and a number of other gentlemen prominently identified with that institution. All these men manifested the greatest interest in Mr. WEDEMEYER's career and expressed their highest appreciation of his services as Congressman and his loyalty at all times to his alma mater. They were proud of his accomplishments, and pointed to his career as illustrating the possibilities which are within the grasp of all young Americans who, with such energy as he possessed and such earnestness as he manifested, avail themselves of the opportunities that are presented to them on every hand.

WILLIAM W. WEDEMEYER was born on a farm not far from Ann Arbor. His parents were sturdy German people, who with many others of that nationality had settled in that county years before and had contributed largely to the development of that part of the country.

There was not much in the monotonous life of a German farmer's boy to encourage him in his desire for education and his ambition to occupy a higher and better position in society than his parents with their limited opportunities could hope to occupy; but the great educational institutions in his immediate vicinity, and the presence of the thousands of young men from every part of the Union whom he saw thronging the streets every time he came to his county-seat city of Ann Arbor with his marketing from the farm gave him inspiration for the effort to secure for himself the education he so much desired.

Surely the surroundings there were inspiring. Here in this county seat was the greatest university in the mighty West, attended annually by thousands of young men hailing not only from every State but every country in the civilized world. Here in the same town was the splendid high school in which so many sons of Michigan and adjacent States had been prepared for admission to the university. Here, too, in the same county—only a few miles away at Ypsilanti—was the great normal school of the State, also attended by thousands of young men and women who were preparing themselves for the noble profession of teaching. It is not strange that with these surroundings young WEDEMEYER should have been fired with that laudable sort of ambition which took him from the farm and led him into a field where he might prepare for a life of greater usefulness and lay broad and deep the foundations for that career in which in so short a time he achieved distinction.

But it is not my purpose to speak of the achievements of his public life nor of his many victories over adverse circumstances as he struggled on from year to year to the attainment of the success which finally crowned his efforts, but rather of his devotion to wife and children—of the discharge of his obligations as a husband and father.

During his term of service here I saw him every day in the company of his charming wife and three little children—one sturdy boy and two beautiful daughters. I could not fail to observe the affectionate interest with which he regarded them and the tender solicitude he always manifested concerning their welfare and happiness.

Everyone who knew of his devotion to this delightful little family and of the great love he bore them will sympathize deeply with them in this great calamity which has deprived them of that wealth of affection which he bestowed upon them, and of his aid, counsel, and support through that period of dependence and helplessness in which children most need a father's loving care.

While their loss is irreparable, their future lives will be blessed by the memories they will have of the sweet companionship of a father who has left to them the priceless heritage of a blameless life and an example of courage and energy which, followed by them, will carry them safely over every obstacle and enable them to achieve the same success which crowned his career.

Mr. SMITH of Michigan. Mr. President, to epitomize the life and character of one who had become very dear is indeed a difficult task when his death, so tragic and unexpected, has left such a void. But the eloquent words of the Senators who have preceded me and the brilliant, just, generous, and fitting tribute of my honored colleague make my task a very simple one.

Mr. WEDEMEYER had been my warm personal friend from his young manhood. I had been associated with him under circumstances so delightful and had learned to love him so much that his loss came with telling effect upon me.

When the ambition of his life had been realized and he was accorded a place in the House of Representatives all his friends throughout our Commonwealth looked forward with confident expectation to a career of unusual brilliancy, honor, and achievement. Brief though that career was, there have been few men in public service who have left a stronger impression upon their associates or accomplished more in real constructive legislation than the man whose memory we honor to-day.

He was young in years; he was strong and vigorous in mind and body, possessing those rare qualities that attract and

hold him in close communion with his friends. The congressional district that he represented was greatly honored by his service, while his personal friends could be numbered by thousands in every walk of life, a rare tribute to his magnetic genius and his attractiveness as a man.

His colleagues from Michigan looked forward with confidence to a continuance of his public service in this Capitol. His defeat was not personal and cast no stigma upon him. In the recent election he ran far ahead of the candidates upon his ticket, and indeed his candidacy greatly strengthened the party to which he belonged.

He was a man of unusual talent, and had the rare faculty of seeing clearly and distinctly the path of highest duty, and when convinced of his course nothing could influence or dissuade him to turn aside or falter in its performance.

Something has been said about his interest in Alaskan affairs. I know full well how deeply he was concerned in all the legislation intended to relieve those sturdy people in that distant Territory. Often he has come to me in this Chamber and urged that those people might have the right of self-government, and we worked together in the accomplishment of that result. When the bill was passed his happiness was unrestrained.

He was deeply interested in the Territorial bill before he entered Congress, and as I see my honored friend from Arizona [Mr. ASHURST] across the aisle I am again reminded of that contest in which our beloved friend was deeply concerned.

Mr. President, our friend has gone. We are overwhelmed by the catastrophe which ended a life of such singular usefulness. I do not pretend to comprehend it. I know that he had much to live for. He was rarely blessed in his home circle and devoted to his wife and children. His companions in life sympathized in his every aspiration. He had climbed the ladder from humble beginning without aid and had made for himself an enviable place in his Commonwealth and in his country.

His death cast a gloom over our entire State. Its darkness refuses to be dispelled. We hope it is for the best, but many of us can not understand why such a tragedy should have befallen our friend in the very vigor of his young manhood and at the time of his greatest usefulness to the State.

After the Battle of Lodi it is said that the soldiers of Napoleon noticed that his eyes were closed and that, overcome with the exactions and the labors of the day, he had fallen asleep upon the field. Those nearest to him formed a hollow square about him and stood with patient vigil until rest opened his tired eyes. In this awful calamity those who knew and loved our friend, inspired by his memory, have formed a hollow square about his loved ones and will guard with earnest vigil the fatherless little children and the stricken widow in her woe.

I love to think of WEDEMEYER, of his happy, cheerful, beautiful affection for his friends, of his loyalty and love for those who were dependent upon him, of the charm and grace of his manner, and the purity of his private and public life.

Mr. President, I offer the resolution which I send to the desk.

The PRESIDING OFFICER. The resolution will be read:

The Secretary read the resolution (S. Res. 475), as follows:

Resolved, That as a further mark of respect to the memory of Mr. RAYNER, Mr. UTTER, and Mr. WEDEMEYER the Senate do now adjourn.

The resolution was unanimously agreed to; and (at 4 o'clock and 20 minutes p. m.) the Senate adjourned until Monday, February 24, 1913, at 10 o'clock a. m.

NOMINATION.

Executive nomination received by the Senate February 22, 1913.

UNITED STATES DISTRICT JUDGE.

Samuel H. Fisher, of Connecticut, to be United States district judge for Connecticut, vice James P. Platt, deceased.

HOUSE OF REPRESENTATIVES.

SATURDAY, *February 22, 1913.*

The House met at 10.30 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

We thank Thee, our Father in heaven, that time has not diminished the admiration, gratitude, and reverence for the "Father of his Country"; that he still lives in the hearts of all true men the ideal patriot, soldier, statesman, Christian gentleman. "Taking him for all in all, we shall not look upon his like again." Wise, strong, pure, noble, brave, his deeds live in a Republic which has become the admiration of all peoples. We thank Thee that millions of hearts still beat in unison with his great heart, for so long as his influence shall thus live our Nation shall live and liberty widen its sweep among the peoples of the earth, to the honor and glory of Thy holy name. Amen.

The SPEAKER. The Clerk will read the Journal.

Mr. SISSON rose.

The SPEAKER. For what purpose does the gentleman rise?

Mr. SISSON. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The point of order is well taken. Evidently there is no quorum present.

Mr. UNDERWOOD. Mr. Speaker, I move a call of the House.

The motion was agreed to.

The SPEAKER. The Doorkeeper will close the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll.

The Clerk called the roll, and the following members failed to answer to their names:

Adair	Fitzgerald	Korbly	Prince
Aiken, S. C.	Focht	Lafean	Redfield
Ainey	Fornes	Lafferty	Reilly
Ames	Gardner, Mass.	Langham	Reyburn
Andrus	Gardner, N. J.	Langley	Riordan
Ansberry	George	Levy	Roberts, Nev.
Anthony	Gill	Lindsay	Rodenberg
Ayres	Glass	Littleton	Rucker, Colo.
Barchfeld	Godwin, N. C.	Longworth	Sabath
Berger	Goldfogle	Loud	Scully
Blackmon	Gregg, Pa.	McCall	Smith, J. M. C.
Bradley	Gudger	McCreary	Speer
Brantley	Guernsey	McDermott	Stack
Brown	Hamill	McGuire, Okla.	Stanley
Burke, Pa.	Hamilton, W. Va.	McKinney	Stevens, Minn.
Calder	Hardy	McMorran	Sweet
Carlin	Harris	Maher	Talbott, Md.
Carter	Harrison, N. Y.	Matthews	Taylor, Ohio.
Conry	Hart	Mays	Thistlewood
Cooper	Hartman	Merritt	Townsend
Copley	Heald	Mondell	Underhill
Crago	Hill	Moon, Pa.	Vare
Cravens	Hinds	Morgan, Okla.	Vreeland
Crumpacker	Howard	Needham	Warburton
Danforth	Howell	Olmsted	Watkins
Davenport	Howland	O'Shaunessy	Weeks
De Forest	Hughes, Ga.	Palmer	Wilson, Ill.
Dickson, Miss.	Hull	Parran	Wilson, N. Y.
Difenderfer	Johnson, Ky.	Patten, N. Y.	Wood, N. J.
Donohoe	Kent	Peters	
Evans	Kindred	Post	
Ferris	Konig	Pray	

The SPEAKER. On this roll, 257 Members have answered to their names, a quorum.

Mr. UNDERWOOD. Mr. Speaker, I move to dispense with further proceedings under the call.

The motion was agreed to.

The doors were opened.

The Journal of the proceedings of yesterday was read and approved.

PENSIONS.

Mr. RICHARDSON. Mr. Speaker, I call up from the Speaker's table the bill (S. 8275) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of wars other than the Civil War and to certain widows and dependent relatives of such soldiers and sailors, and move that the House insist on its amendments thereto and agree to a conference.

The SPEAKER. The gentleman from Alabama calls up the bill S. 8275, an omnibus pension bill, and moves that the House insist on its amendments thereto and agree to a conference.

The motion was agreed to.

The SPEAKER announced the following conferees: Mr. RICHARDSON, Mr. DICKSON of Mississippi, and Mr. WOOD of New Jersey.

WASHINGTON'S FAREWELL ADDRESS.

Mr. CLARK of Florida. Mr. Speaker, I ask unanimous consent that Washington's Farewell Address may be read to the House.

The SPEAKER. The gentleman from Florida asks unanimous consent that Washington's Farewell Address be read to the House. Is there objection?

There was no objection.

The SPEAKER. The Chair appoints the gentleman from Indiana [Mr. BARNHART] to read the address. [Applause.]

Mr. BARNHART read the address, as follows:

To the people of the United States:

FRIENDS AND FELLOW CITIZENS: The period for a new election of a citizen to administer the executive government of the United States being not far distant, and the time actually arrived when your thoughts must be employed in designating the person who is to be clothed with that important trust, it appears to me proper, especially as it may conduce to a more distinct expression of the public voice, that I should now apprise you of the resolution I have formed, to decline being considered among the number of those out of whom a choice is to be made.

I beg you, at the same time, to do me the justice to be assured that this resolution has not been taken without a strict regard to all the considerations appertaining to the relation which binds a dutiful citizen to his country, and that in withdrawing the tender of service which silence in my situation might imply, I am influenced by no diminution of zeal for your future interest, no deficiency of grateful respect for your past kindness, but am supported by a full conviction that the step is compatible with both.

The acceptance of and continuance hitherto in the office to which your suffrages have twice called me have been a uniform sacrifice of inclination to the opinion of duty and to a deference for what appeared to be your desire. I constantly hoped that it would have been much earlier in my power, consistently with motives which I was not at liberty to disregard, to return to that retirement from which I had been reluctantly drawn. The strength of my inclination to do this previous to the last election had even led to the preparation of an address to declare it to you, but mature reflection on the then perplexed and critical posture of our affairs with foreign nations, and the unanimous advice of persons entitled to my confidence, impelled me to abandon the idea.

I rejoice that the state of your concerns, external as well as internal, no longer renders the pursuit of inclination incompatible with the sentiment of duty or propriety, and am persuaded, whatever partiality may be retained for my services, that in the present circumstances of our country you will not disapprove my determination to retire.

The impressions with which I first undertook the arduous trust were explained on the proper occasion. In the discharge of this trust I will only say that I have, with good intentions, contributed toward the organization and administration of the Government the best exertions of which a very fallible judgment was capable. Not unconscious in the outset of the inferiority of my qualifications, experience, in my own eyes, perhaps still more in the eyes of others, has strengthened the motives to diffidence of myself, and every day the increasing weight of years admonishes me more and more that the shade of retirement is as necessary to me as it will be welcome. Satisfied that if any circumstances have given peculiar value to my services they were temporary, I have the consolation to believe that while choice and prudence invite me to quit the political scene patriotism does not forbid it.

In looking forward to the moment which is to terminate the career of my political life, my feelings do not permit me to suspend the deep acknowledgment of that debt of gratitude which I owe to my beloved country for the many honors it has conferred upon me, still more for the steadfast confidence with which it has supported me, and for the opportunities I have thence enjoyed of manifesting my inviolable attachment by services faithful and persevering, though in usefulness unequal to my zeal. If benefits have resulted to our country from these services, let it always be remembered to your praise, and as an instructive example in our annals, that under circumstances in which the passions, agitated in every direction, were liable to mislead amidst appearances sometimes dubious, vicissitudes of fortune often discouraging—in situations in which, not unfrequently, want of success has countenanced the spirit of criticism—the constancy of your support was the essential prop of the efforts and a guaranty of the plans by which they were effected. Profoundly penetrated with this idea, I shall carry it with me to my grave as a strong incitement to unceasing vows that heaven may continue to you the choicest tokens of its beneficence; that your union and brotherly affection may be perpetual; that the free Constitution, which is the work of your hands, may be sacredly maintained—that its administration in every department may be stamped with wisdom and virtue; that, in fine, the happiness of the people of these States, under the auspices of liberty, may be made complete by so careful a preservation and so prudent a use of this blessing as will acquire to them the glory of recommending it to the applause, the affection, and adoption of every nation which is yet a stranger to it.

Here, perhaps, I ought to stop. But a solicitude for your welfare, which can not end but with my life, and the apprehension of danger natural to that solicitude urge me, on an occasion like the present, to offer to your solemn contemplation and to recommend to your frequent review some sentiments which are the result of much reflection, of no inconsiderable observation, and which appear to me all important to the permanency of your felicity as a people. These will be offered to you with the more freedom as you can only see in them the disinterested warnings of a parting friend who can possibly have no personal motive to bias his counsel. Nor can I forget, as an encouragement to it, your indulgent reception of my sentiments on a former and not dissimilar occasion.

Interwoven as is the love of liberty with every ligament of your hearts, no recommendation of mine is necessary to fortify or confirm the attachment.

The unity of government which constitutes you one people is also now dear to you. It is justly so, for it is a main pillar in the edifice of your real independence, the support of your tranquility at home, your peace abroad, of your safety, of your prosperity, of that very liberty which you so highly prize. But as it is easy to foresee that from different causes and from different quarters much pains will be taken, many artifices employed, to weaken in your minds the conviction of this truth, as this is the point in your political fortress against which the batteries of internal and external enemies will be most constantly and actively, though often covertly and insidiously, directed, it is of infinite moment that you should properly estimate the immense value of your national union to your collective and individual happiness; that you should cherish a cordial, habitual, and immovable attachment to it, accustoming yourselves to think and speak of it as of the palladium of your political safety and prosperity, watching for its preservation with jealous anxiety, discountenancing whatever may suggest even a suspicion that it can in any event be abandoned, and indignantly frowning upon the first dawning of every attempt to alienate any portion of our country from the rest or to enfeeble the sacred ties which now link together the various parts.

For this you have every inducement of sympathy and interest. Citizens by birth or choice of a common country, that country has a right to concentrate your affections. The name of American, which belongs to you in your national capacity, must always exalt the just pride of patriotism more than any appellation derived from local discriminations. With slight shades of difference you have the same religion, manners, habits, and political principles. You have in a common cause fought and triumphed together; the independence and liberty you possess are the work of joint counsels and joint efforts, of common dangers, sufferings, and successes.

But these considerations, however powerfully they address themselves to your sensibility, are greatly outweighed by those which apply more immediately to your interest. Here every portion of our country finds the most commanding motives for carefully guarding and preserving the union of the whole.

The North in an unrestrained intercourse with the South, protected by the equal laws of a common government, finds in the productions of the latter great additional resources of maritime and commercial enterprise and precious materials of manufacturing industry. The South in the same intercourse, benefiting by the same agency of the North, sees its agriculture grow and its commerce expand. Turning partly into its own channels the seamen of the North it finds its particular navigation invigorated, and while it contributes in different ways to nourish and increase the general mass of the national navigation, it looks forward to the protection of a maritime strength to which itself is unequally adapted. The East in a like intercourse with the West already finds, and in the progressive improvement of interior communications by land and water will more and more find, a valuable vent for the commodities which it brings from abroad or manufactures at home. The West derives from the East supplies requisite to its growth and comfort, and, what is perhaps of still greater consequence, it must of necessity owe the secure enjoyment of indispensable outlets for its own productions to the weight, influence, and the future maritime strength of the Atlantic side of the Union, directed by an indissoluble community of interest as one nation. Any other tenure by which the West can hold this essential advantage, whether derived from its own separate strength or from an apostate and unnatural connection with any foreign power, must be intrinsically precarious.

While, then, every part of our country thus feels an immediate and particular interest in union, all the parts combined can not fail to find in the united mass of means and efforts greater strength, greater resource, proportionably greater security from external danger, a less frequent interruption of their peace by foreign nations, and, what is of inestimable value, they must derive from union an exemption from those broils and wars between themselves which so frequently afflict neighboring countries not tied together by the same government, which their own rivalship alone would be sufficient to produce, but which opposite foreign alliances, attachments, and intrigues would stimulate and embitter. Hence likewise they will avoid the necessity of those overgrown military establishments, which under any form of government are inauspicious to liberty and which are to be regarded as particularly hostile to republican liberty. In this sense it is that your union ought to be considered as a main prop of your liberty, and that the love of the one ought to endear to you the preservation of the other.

These considerations speak a persuasive language to every reflecting and virtuous mind, and exhibit the continuance of the Union as a primary object of patriotic desire. Is there a doubt whether a common government can embrace so large a sphere? Let experience solve it. To listen to mere speculation in such a case were criminal. We are authorized to hope that a proper organization of the whole, with the auxiliary agency of governments for the respective subdivisions, will afford a happy issue to the experiment. It is well worth a fair and full experiment. With such powerful and obvious motives to union, affecting all parts of our country, while experience shall not have demonstrated its impracticability, there will always be reason to distrust the patriotism of those who in any quarter may endeavor to weaken its hands.

In contemplating the causes which may disturb our Union, it occurs as matter of serious concern that any ground should have been furnished for characterizing parties by geographical discriminations—northern and southern, Atlantic and western—whence designing men may endeavor to excite a belief that there is a real difference of local interests and views. One of the expedients of party to acquire influence within particular districts is to misrepresent the opinions and aims of other districts. You can not shield yourselves too much against the jealousies and heartburnings which spring from these misrepresentations; they tend to render alien to each other those who ought to be bound together by fraternal affection. The inhabitants of our western country have lately had a useful lesson on this head; they have seen, in the negotiation by the Executive and in the unanimous ratification by the Senate of the treaty with Spain, and in the universal satisfaction at the event throughout the United States, a decisive proof how unfounded were the suspicions propagated among them of a policy in the General Government and in the Atlantic States unfriendly to their interests in regard to the Mississippi. They have been witnesses to the formation of two treaties—that with Great Britain and that with Spain—which secure to them everything they could desire, in respect to our foreign relations, toward confirming their prosperity. Will it not be their wisdom to rely for the preservation of these advantages on the union by which they were procured? Will they not henceforth be deaf to those advisers, if such they are, who would sever them from their brethren and connect them with aliens?

To the efficacy and permanency of your Union a government for the whole is indispensable. No alliances, however strict, between the parts can be an adequate substitute; they must inevitably experience the infractions and interruptions which all alliances in all times have experienced. Sensible of this momentous truth, you have improved upon your first essay by the adoption of a constitution of government, better calculated than your former, for an intimate union and for the efficacious management of your common concerns. This Government, the offspring of our own choice, uninfluenced and unawed, adopted upon full investigation and mature deliberation, completely free in its principles, in the distribution of its powers, uniting security with energy, and containing within itself a provision for its own amendment, has a just claim to your confidence and your support. Respect for its authority, compliance with its laws, acquiescence in its measures, are duties enjoined by the fundamental maxims of true liberty. The basis of our political systems is the right of the people to make and to alter their constitutions of government; but the constitution which at any time exists, until changed by an explicit and authentic act of the whole people, is sacredly obligatory upon all. The very idea of the power and the right of the people to establish government presuppose the duty of every individual to obey the established government.

All obstructions to the execution of the laws, all combinations and associations, under whatever plausible character, with the real design to direct, control, counteract, or awe the regular deliberations and action of the constituted authorities, are destructive of this fundamental principle and of fatal tendency. They serve to organize faction, to give it an artificial and extraordinary force, to put in the place of the delegated will of the Nation the will of party, often a small but artful and enterprising minority of the community; and, according to the alternate triumphs of different parties, to make the public administration the mirror of the ill-concerted and incongruous projects of faction, rather than the organ of consistent and wholesome plans digested by common councils, and modified by mutual interests.

However combinations or associations of the above description may now and then answer popular ends, they are likely, in the course of time and things, to become potent engines, by which cunning, ambitious, and unprincipled men, will be enabled to subvert the power of the people, and to usurp for themselves the reins of government; destroying afterwards the very engines which have lifted them to unjust dominion.

Toward the preservation of your Government and the permanency of your present happy state, it is requisite, not only that you steadily discountenance irregular opposition to its acknowledged authority, but also that you resist with care the spirit of innovation upon its principles, however specious the pretext. One method of assault may be to effect, in the forms of the Constitution, alterations which will impair the energy of the system; and thus to undermine what can not be directly overthrown. In all the changes to which you may be invited, remember that time and habit are at least as necessary to fix the true character of governments, as of other human institutions; that experience is the surest standard by which to test the real tendency of the existing constitution of a country; that facility in changes, upon the credit of mere hypothesis and opinion, exposes to perpetual change from the endless variety of hypothesis and opinion; and remember, especially, that for the efficient management of your common interests in a country so extensive as ours, a government of as much vigor as is consistent with the perfect security of liberty is indispensable. Liberty itself will find in such a government, with powers properly distributed and adjusted, its surest guardian. It is, indeed, little else than a name, where the government is too feeble to withstand the enterprises of faction, to confine each member of the society within the limits prescribed by the laws, and to maintain all in the secure and tranquil enjoyment of the rights of person and property.

I have already intimated to you the danger of parties in the State, with particular references to the founding them on geographical discrimination. Let me now take a more comprehensive view, and warn you in the most solemn manner against the baneful effects of the spirit of party generally.

This spirit, unfortunately, is inseparable from our nature, having its root in the strongest passions of the human mind. It exists under different shapes in all governments, more or less stifled, controlled, or repressed; but in those of the popular form it is seen in its greatest rankness, and is truly their worst enemy.

The alternate domination of one faction over another, sharpened by the spirit of revenge natural to party dissension, which in different ages and countries has perpetrated the most horrid enormities, is itself a frightful despotism. But this leads at length to a more formal and permanent despotism. The disorders and miseries which result gradually incline the minds of men to seek security and repose in the absolute power of an individual; and, sooner or later, the chief of some prevailing faction, more able or more fortunate than his competitors, turns this disposition to the purpose of his own elevation on the ruins of public liberty.

Without looking forward to an extremity of this kind (which nevertheless ought not to be entirely out of sight), the common and continual mischiefs of the spirit of party are sufficient to make it the interest and duty of a wise people to discourage and restrain it.

It serves always to distract the public councils and enfeeble the public administration. It agitates the community with ill-founded jealousies and false alarms; kindles the animosity of one part against another; foments occasional riot and insurrection. It opens the door to foreign influence and corruption, which finds a facilitated access to the Government itself through the channels of party passions. Thus the policy and the will of one country are subjected to the policy and will of another.

There is an opinion that parties in free countries are useful checks upon the administration of the government, and serve to keep alive the spirit of liberty. This, within certain limits, is probably true; and in governments of a monarchial cast patriotism may look with indulgence, if not with favor, upon the spirit of party. But in those of the popular character, in governments purely elective, it is a spirit not to be encouraged. From their natural tendency it is certain there will always be enough of that spirit for every salutary purpose. And there being constant danger of excess, the effort ought to be, by force of public opinion, to mitigate and assuage it. A fire not to be quenched, it demands a uniform vigilance to prevent it bursting into a flame, lest, instead of warming, it should consume.

It is important likewise that the habits of thinking in a free country should inspire caution in those intrusted with its administration to confine themselves within their respective constitutional spheres, avoiding in the exercise of the powers of one department to encroach upon another. The spirit of encroachment tends to consolidate the powers of all the departments in one, and thus to create, whatever the form of government, a real despotism. A just estimate of that love of power and proneness to abuse it which predominate in the human

heart is sufficient to satisfy us of the truth of this position. The necessity of reciprocal checks in the exercise of political power, by dividing and distributing it into different depositories and constituting each the guardian of the public weal against invasions of the others, has been evinced by experiments, ancient and modern, some of them in our country and under our own eyes. To preserve them must be as necessary as to institute them. If in the opinion of the people the distribution or modification of the constitutional powers be in any particular wrong, let it be corrected by an amendment in the way which the Constitution designates. But let there be no change by usurpation, for, though this in one instance may be the instrument of good, it is the customary weapon by which free governments are destroyed. The precedent must always greatly overbalance in permanent evil any partial or transient benefit which the use can at any time yield.

Of all the dispositions and habits which lead to political prosperity, religion and morality are indispensable supports. In vain would that man claim the tribute of patriotism who should labor to subvert these great pillars of human happiness, these firmest props of the duties of men and citizens. The mere politician, equally with the pious man, ought to respect and to cherish them. A volume could not trace all their connections with private and public felicity. Let it simply be asked, Where is the security for property, for reputation, for life, if the sense of religious obligation desert the oaths which are the instruments of investigation in courts of justice? And let us with caution indulge the supposition that morality can be maintained without religion. Whatever may be conceded to the influence of refined education on minds of peculiar structure, reason and experience both forbid us to expect that national morality can prevail in exclusion of religious principle.

It is substantially true that virtue or morality is a necessary spring of popular government. The rule, indeed, extends with more or less force to every species of free government. Who that is a sincere friend to it can look with indifference upon attempts to shake the foundation of the fabric?

Promote, then, as an object of primary importance, institutions for the general diffusion of knowledge. In proportion as the structure of a government gives force to public opinion it should be enlightened.

As a very important source of strength and security cherish public credit. One method of preserving it is to use it as sparingly as possible, avoiding occasions of expense by cultivating peace, but remembering also that timely disbursements to prepare for danger frequently prevent much greater disbursements to repel it; avoiding likewise the accumulation of debt, not only by shunning occasions of expense, but by vigorous exertions in time of peace to discharge the debts which unavoidable wars may have occasioned, not ungenerously throwing upon posterity the burden which we ourselves ought to bear. The execution of these maxims belongs to your representatives, but it is necessary that public opinion should cooperate. To facilitate to them the performance of their duty it is essential that you should practically bear in mind that toward the payment of debts there must be revenue; that to have revenue there must be taxes; that no taxes can be devised which are not more or less inconvenient and unpleasant; that the intrinsic embarrassment inseparable from the selection of the proper object, which is always a choice of difficulties, ought to be a decisive motive for a candid construction of the conduct of the government in making it, and for a spirit of acquiescence in the measures for obtaining revenue, which the public exigencies may at any time dictate.

Observe good faith and justice toward all nations, cultivate peace and harmony with all. Religion and morality enjoin this conduct, and can it be that good policy does not equally enjoin it? It will be worthy of a free, enlightened, and at no distant period a great nation, to give to mankind the magnanimous and too novel example of a people always guided by an exalted justice and benevolence. Who can doubt but, in the course of time and things, the fruits of such a plan would richly repay any temporary advantages which might be lost by a steady adherence to it; can it be that Providence has not connected the permanent felicity of a nation with its virtue? The experiment, at least, is recommended by every sentiment which ennobles human nature. Alas, is it rendered impossible by its vices?

In the execution of such a plan nothing is more essential than that permanent, inveterate antipathies against particular nations and passionate attachments for others should be excluded; and that, in place of them, just and amicable feelings toward all should be cultivated. The nation which indulges toward another an habitual hatred or an habitual fondness is in some degree a slave. It is a slave to its animosity or to its affection, either of which is sufficient to lead it astray from its duty and its interest. Antipathy in one nation against another disposes each more readily to offer insult and injury, to lay hold of slight causes of umbrage, and to be haughty and intractable when accidental or trifling occasions of dispute occur. Hence, frequent collisions, obstinate, envenomed, and bloody contests. The nation, prompted by ill will and resentment, sometimes impels to war the government, contrary to the best calculations of policy. The government sometimes participates in the national propensity and adopts through passion what reason would reject; at other times it makes the animosity of the nation subservient to projects of hostility, instigated by pride, ambition, and other sinister and pernicious motives. The peace often, sometimes perhaps the liberty of nations, has been the victim.

So, likewise, a passionate attachment of one nation for another produces a variety of evils. Sympathy for the favorite nation, facilitating the illusion of an imaginary common interest, in cases where no real common interest exists, and infusing into one the enmities of the other, betrays the former into a participation in the quarrels and wars of the latter, without adequate inducements or justifications. It leads also to concessions to the favorite nation or of privileges denied to others, which is apt doubly to injure the nation making the concessions, by unnecessarily parting with what ought to have been retained, and by exciting jealousy, ill will, and a disposition to retaliate in the parties from whom equal privileges are withheld; and it gives to ambitious, corrupted, or deluded citizens who devote themselves to the favorite nation, facility to betray or sacrifice the interests of their own country, without odium, sometimes even with popularity; gilding with the appearances of a virtuous sense of obligation, a commendable deference for public opinion, or a laudable zeal for public good, the base or foolish compliances of ambition, corruption, or infatuation.

As avenues to foreign influence in innumerable ways, such attachments are particularly alarming to the truly enlightened and independent patriot. How many opportunities do they afford to tamper with domestic factions, to practice the arts of seduction, to mislead public opinion, to influence or awe the public councils. Such an attachment of a small or weak toward a great and powerful nation dooms the former to be the satellite of the latter.

Against the insidious wiles of foreign influence—I conjure you to believe me, fellow citizens—the jealousy of a free people ought to be constantly awake, since history and experience prove that foreign influence is one of the most baneful foes of republican government. But that jealousy to be useful must be impartial, else it becomes the instrument of the very influence to be avoided instead of a defense against it. Excessive partiality for one foreign nation and excessive dislike for another cause those whom they actuate to see danger only on one side, and serve to veil and even second the arts of influence on the other. Real patriots, who may resist the intrigues of the favorite, are liable to become suspected and odious, while its tools and dupes usurp the applause and confidence of the people to surrender their interests.

The great rule of conduct for us in regard to foreign nations is, in extending our commercial relations, to have with them as little political connection as possible. So far as we have already formed engagements, let them be fulfilled with perfect good faith. Here let us stop.

Europe has a set of primary interests which to us have none or a very remote relation. Hence she must be engaged in frequent controversies, the causes of which are essentially foreign to our concerns. Hence therefore it must be unwise in us to implicate ourselves by artificial ties in the ordinary vicissitudes of her politics or the ordinary combinations and collisions of her friendships or enmities.

Our detached and distant situation invites and enables us to pursue a different course. If we remain one people, under an efficient government, the period is not far off when we may defy material injury from external annoyance; when we may take such an attitude as will cause the neutrality we may at any time resolve upon to be scrupulously respected; when belligerent nations, under the impossibility of making acquisitions upon us will not lightly hazard the giving us provocation, when we may choose peace or war as our interest, guided by justice, shall counsel.

Why forego the advantages of so peculiar a situation? Why quit our own to stand upon foreign ground? Why, by interweaving our destiny with that of any part of Europe, entangle our peace and prosperity in the toils of European ambition, rivalship, interest, humor, or caprice?

It is our true policy to steer clear of permanent alliance with any portion of the foreign world—so far, I mean, as we are now at liberty to do it—for let me not be understood as capa-

ble of patronizing infidelity to existing engagements. I hold the maxim no less applicable to public than private affairs that honesty is always the best policy. I repeat it, therefore, let those engagements be observed in their genuine sense. But, in my opinion, it is unnecessary and would be unwise to extend them.

Taking care always to keep ourselves, by suitable establishments, on a respectable defensive posture, we may safely trust to temporary alliances for extraordinary emergencies.

Harmony and a liberal intercourse with all nations are recommended by policy, humanity, and interest. But even our commercial policy should hold an equal and impartial hand; neither seeking nor granting exclusive favors or preferences, consulting the natural course of things, diffusing and diversifying by gentle means the streams of commerce, but forcing nothing; establishing with powers so disposed, in order to give trade a stable course, to define the rights of our merchants, and to enable the Government to support them, conventional rules of intercourse, the best that present circumstances and mutual opinion will permit, but temporary and liable to be from time to time abandoned or varied as experience and circumstances shall dictate; constantly keeping in view that it is folly in one nation to look for disinterested favors from another; that it must pay with a portion of its independence for whatever it may accept under that character; that by such acceptance it may place itself in the condition of having given equivalents for nominal favors and yet of being reproached with ingratitude for not giving more. There can be no greater error than to expect or calculate upon real favors from nation to nation. It is an illusion which experience must cure, which a just pride ought to discard.

In offering to you, my countrymen, these counsels of an old and affectionate friend, I dare not hope they will make the strong and lasting impression I could wish—that they will control the usual current of the passions or prevent our Nation from running the course which has hitherto marked the destiny of nations—but if I may even flatter myself that they may be productive of some partial benefit, some occasional good, that they may now and then recur to moderate the fury of party spirit, to warn against the mischiefs of foreign intrigue, to guard against the impostures of pretended patriotism, this hope will be a full recompense for the solicitude for your welfare by which they have been dictated.

How far, in the discharge of my official duties, I have been guided by the principles which have been delineated, the public records and other evidences of my conduct must witness to you and to the world. To myself the assurance of my own conscience is that I have, at least, believed myself to be guided by them.

In relation to the still subsisting war in Europe, my proclamation of the 22d of April, 1793, is the index to my plan. Sanctioned by your approving voice and by that of your Representatives in both Houses of Congress, the spirit of that measure has continually governed me, uninfluenced by any attempts to deter or divert me from it.

After deliberate examination, with the aid of the best lights I could obtain, I was well satisfied that our country, under all the circumstances of the case, had a right to take and was bound in duty and interest to take a neutral position. Having taken it, I determined, as far as should depend upon me to maintain it with moderation, perseverance, and firmness.

The considerations which respect the right to hold this conduct, it is not necessary on this occasion to detail. I will only observe that, according to my understanding of the matter, that right, so far from being denied by any of the belligerent powers, has been virtually admitted by all.

The duty of holding a neutral conduct may be inferred, without anything more, from the obligation which justice and humanity impose on every nation, in cases in which it is free to act, to maintain inviolate the relations of peace and amity toward other nations.

The inducements of interest for observing that conduct will best be referred to your own reflections and experience. With me a predominant motive has been to endeavor to gain time to our country, to settle and mature its yet recent institutions, and to progress, without interruption, to that degree of strength and consistency which is necessary to give it, humanly speaking, the command of its own fortunes.

Though in reviewing the incidents of my administration I am unconscious of intentional error, I am nevertheless too sensible of my defects not to think it probable that I may have committed many errors. Whatever they may be, I fervently beseech the Almighty to avert or mitigate the evils to which they may tend. I shall also carry with me the hope that my country will never cease to view them with indulgence, and that, after 45 years of my life dedicated to its service with an upright zeal, the faults of incompetent abilities will be consigned to oblivion, as myself must soon be to the mansions of rest.

Relying on its kindness in this as in other things and actuated by that fervent love toward it, which is so natural to a man who views in it the native soil of himself and his progenitors for several generations, I anticipate with pleasing expectation that retreat in which I promise myself to realize, without alloy, the sweet enjoyment of partaking in the midst of my fellow citizens the benign influence of good laws under a free government—the ever favorite object of my heart and the happy reward, as I trust, of our mutual cares, labors, and dangers.

GEO. WASHINGTON.

UNITED STATES, *17th September, 1796.*

ADDRESS OF PORTO RICAN FREE FEDERATION OF LABOR (H. DOC. NO. 1415).

Mr. WILSON of Pennsylvania. Mr. Speaker, I ask unanimous consent to have printed as a House document an address by the Porto Rican Free Federation of Labor relative to the tyranny of the House of Delegates of Porto Rico and setting forth legislation which, in the judgment of the federation, is essential to the welfare of Porto Rico.

The SPEAKER. The gentleman from Pennsylvania [Mr. WILSON] asks unanimous consent to print as a House document an address of the Porto Rican Free Federation of Labor. Is there objection?

Mr. EDWARDS. Reserving the right to object, Mr. Speaker, I would like to know how this document is to be distributed—whether through the folding room or document room.

Mr. WILSON of Pennsylvania. Through the document room.

The SPEAKER. Is there objection? [After a pause.] The Chair hears none.

LEGISLATIVE, EXECUTIVE, AND JUDICIAL APPROPRIATION BILL.

Mr. JOHNSON of South Carolina. Mr. Speaker, I wish to present conference report and statement on the bill H. R. 26680, the legislative, executive, and judicial appropriation bill, and I ask unanimous consent that the statement be read in lieu of the report.

The SPEAKER. Is there objection?

There was no objection.

Mr. JOHNSON of South Carolina. Mr. Speaker, I desire to say that there is one mistake as printed in the RECORD, and I send a corrected copy of the statement to the Clerk's desk.

The SPEAKER. The Clerk will read from the corrected copy.

The conference report is as follows:

CONFERENCE REPORT (NO. 1563).

The committee of conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 26680) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year ending June 30, 1914, and for other purposes, having met, after full and free conference have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 2, 27, 61, 68, 76, 77, 78, 139, 148, 149, 151, 152, 154, 155, 160, 161, 162, 163, 179, and 235.

That the House recede from its disagreement to the amendments of the Senate numbered 7, 8, 11, 23, 24, 25, 26, 37, 38, 39, 147, 180, 181, and 190, and agree to the same.

Amendment numbered 79: That the House recede from its disagreement to the amendment of the Senate numbered 79, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"Assay office at Boise, Idaho: For the following, including wages of workmen and contingent expenses, from July 1 to December 31, 1913, both dates inclusive: Assayer in charge, who shall also perform the duties of melter, $1,125; assistant assayer, $800; chief clerk, who shall also perform the duties of cashier, $750; assayer's assistant, $750; clerk, $600; in all, $4,025."

And the Senate agree to the same.

Amendment numbered 80: That the House recede from its disagreement to the amendment of the Senate numbered 80, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$1,770"; and the Senate agree to the same.

Amendment numbered 81: That the House recede from its disagreement to the amendment of the Senate numbered 81, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$1,125"; and the Senate agree to the same.

Amendment numbered 82: That the House recede from its disagreement to the amendment of the Senate numbered 82, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"Assay office at Charlotte, N. C.: For the following, including wages of workmen and contingent expenses, from July 1 to December 31, 1913, both dates inclusive: Assayer and melter, $750."

And the Senate agree to the same.

Amendment numbered 83: That the House recede from its disagreement to the amendment of the Senate numbered 83, and agree to the same with an amendment as follows: In lieu of the sum named in the said amendment insert "$450"; and the Senate agree to the same.

Amendment numbered 84: That the House recede from its disagreement to the amendment of the Senate numbered 84, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$200"; and the Senate agree to the same.

Amendment numbered 85: That the House recede from its disagreement to the amendment of the Senate numbered 85, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"Assay office at Deadwood, S. Dak.: For the following, including wages of workmen and contingent expenses, from July 1 to December 31, 1913, both dates inclusive: Assayer in charge, who shall also perform the duties of melter, $1,000; clerk, $600; assistant assayer, $800; assayer's assistant, $700; in all, $3,100."

And the Senate agree to the same.

Amendment numbered 86: That the House recede from its disagreement to the amendment of the Senate numbered 86, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$1,500"; and the Senate agree to the same.

Amendment numbered 87: That the House recede from its disagreement to the amendment of the Senate numbered 87, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$750"; and the Senate agree to the same.

Amendment numbered 88: That the House recede from its disagreement to the amendment of the Senate numbered 88, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"Assay office at Helena, Mont.: For the following, including wages of workmen and contingent expenses, from July 1 to December 31, 1913, both dates inclusive: Assayer in charge, $1,250; chief clerk, who shall also perform the duties of cashier, $900; assistant assayer, $850; assayer's assistant, $700; clerk, $700; in all, $4,400."

And the Senate agree to the same.

Amendment numbered 89: That the House recede from its disagreement to the amendment of the Senate numbered 89, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$2,300"; and the Senate agree to the same.

Amendment numbered 90: That the House recede from its disagreement to the amendment of the Senate numbered 90, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$1,500"; and the Senate agree to the same.

Amendment numbered 93: That the House recede from its disagreement to the amendment of the Senate numbered 93, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following:

"Assay office at Salt Lake City, Utah: For the following, including wages of workmen and contingent expenses, from July 1 to December 31, 1913, both dates inclusive: Assayer in charge, who shall also perform the duties of melter, $1,250; assistant assayer, $800; chief clerk, who shall also perform the duties of cashier, $800; clerk, $700; in all, $3,550."

And the Senate agree to the same.

Amendment numbered 94: That the House recede from its disagreement to the amendment of the Senate numbered 94, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$2,250"; and the Senate agree to the same.

Amendment numbered 95: That the House recede from its disagreement to the amendment of the Senate numbered 95, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$1,750"; and the Senate agree to the same.

Amendment numbered 150: That the House recede from its disagreement to the amendment of the Senate numbered 150, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$232,210"; and the Senate agree to the same.

Amendment numbered 153: That the House recede from its disagreement to the amendment of the Senate numbered 153, and agree to the same with an amendment as follows: In lieu of the number proposed insert "9"; and the Senate agree to the same.

Amendment numbered 156: That the House recede from its disagreement to the amendment of the Senate numbered 156, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$78,740"; and the Senate agree to the same.

Amendment numbered 177: That the House recede from its disagreement to the amendment of the Senate numbered 177, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$9,000"; and the Senate agree to the same.

Amendment numbered 178: That the House recede from its disagreement to the amendment of the Senate numbered 178, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$13,000"; and the Senate agree to the same.

Amendment numbered 182: That the House recede from its disagreement to the amendment of the Senate numbered 182, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$23,000"; and the Senate agree to the same.

Amendment numbered 183: That the House recede from its disagreement to the amendment of the Senate numbered 183, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$26,000"; and the Senate agree to the same.

Amendment numbered 184: That the House recede from its disagreement to the amendment of the Senate numbered 184, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$17,000"; and the Senate agree to the same.

Amendment numbered 185: That the House recede from its disagreement to the amendment of the Senate numbered 185, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$20,000"; and the Senate agree to the same.

Amendment numbered 186: That the House recede from its disagreement to the amendment of the Senate numbered 186, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$10,000"; and the Senate agree to the same.

Amendment numbered 187: That the House recede from its disagreement to the amendment of the Senate numbered 187, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$13,000"; and the Senate agree to the same.

Amendment numbered 188: That the House recede from its disagreement to the amendment of the Senate numbered 188, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$17,000"; and the Senate agree to the same.

Amendment numbered 189: That the House recede from its disagreement to the amendment of the Senate numbered 189, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$20,000"; and the Senate agree to the same.

Amendment numbered 191: That the House recede from its disagreement to the amendment of the Senate numbered 191, and agree to the same with an amendment as follows: In lieu of the matter inserted by said amendment insert the following: "For surveyor general of South Dakota, $2,000; clerks in his office, $4,500; in all, $6,500"; and the Senate agree to the same.

Amendment numbered 192: That the House recede from its disagreement to the amendment of the Senate numbered 192, and agree to the same with an amendment as follows: In lieu of the sum named in said amendment insert "$600"; and the Senate agree to the same.

Amendment numbered 193: That the House recede from its disagreement to the amendment of the Senate numbered 193, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$16,000"; and the Senate agree to the same.

Amendment numbered 194: That the House recede from its disagreement to the amendment of the Senate numbered 194, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$19,000"; and the Senate agree to the same.

Amendment numbered 195: That the House recede from its disagreement to the amendment of the Senate numbered 195,

and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$20,000"; and the Senate agree to the same.

Amendment numbered 196: That the House recede from its disagreement to the amendment of the Senate numbered 196, and agree to the same with an amendment as follows: In lieu of the sum proposed insert "$23,000"; and the Senate agree to the same.

J. T. JOHNSON,
ALBERT S. BURLESON,
FREDK. H. GILLETT,
Managers on the part of the House.

F. E. WARREN,
GEO. PEABODY WETMORE,
LEE S. OVERMAN,
Managers on the part of the Senate.

The Clerk read the corrected statement, as follows:

STATEMENT OF THE MANAGERS ON THE PART OF THE HOUSE.

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on certain amendments of the Senate to the bill (H. R. 26680) making appropriations for the legislative, executive, and judicial expenses of the Government for the fiscal year 1914 submit the following written statement in explanation of the effect of the action agreed upon by the conference committee, and submitted in the accompanying report, as to each of said amendments, as follows:

On amendment No. 2: Strikes out the name of Woodbury Pulsifer as an employee of the Senate.

On amendments Nos. 7, 8, and 11: Increases the salaries of two Assistant Doorkeepers of the Senate from $2,592 to $3,000 each, as proposed by the Senate.

On amendments Nos. 23, 24, 25, and 26, relating to the Capitol police: Appropriates for the number of police and for the contingent fund, as proposed by the Senate.

On amendment No. 27: Strikes out the name of George H. Carter as clerk to the Joint Committee on Printing.

On amendment No. 37: Appropriates, as proposed by the Senate, $300 to pay Etta J. Giffin, assistant in charge of the division for the blind in the Library of Congress.

On amendments Nos. 38 and 39, relating to the Copyright Office: Provides for an additional clerk at $1,800, proposed by the Senate.

On amendment No. 61: Appropriates $10,000, as proposed by the House, instead of $25,000, as proposed by the Senate, for freight on bullion and coin.

On amendment No. 68: Strikes out the provision proposed by the Senate, increasing the number of internal-revenue districts from 63 to 67.

On amendments Nos. 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 93, 94, and 95, relating to mints and assay offices: Omits the appropriations for the mint at Carson, Nev.; and appropriates for the assay offices at Boise, Idaho, Charlotte, N. C., Deadwood, S. Dak., Helena, Mont., and Salt Lake City, Utah, until December 31, 1913.

On amendment No. 139: Strikes out the appropriation, proposed by the Senate, for expenses of a national aerodynamical laboratory commission.

On amendments Nos. 147, 148, 149, 150, 151, 152, 153, 154, 155, and 156, relating to the Indian Office: Increases the compensation of the second assistant commissioner from $2,250 to $2,750, as proposed by the Senate; provides for nine clerks, at $1,400 each, instead of five as proposed by the Senate and three as proposed by the House, and strikes out all other increases in the clerical force of that office proposed by the Senate.

On amendments Nos. 160, 161, 162, and 163: Strikes out the increases, proposed by the Senate, in the force employed in the Patent Office.

On amendments Nos. 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, and 196, relating to surveyors general and their clerks: Appropriates $9,000, instead of $7,000 as proposed by the House and $11,000 as proposed by the Senate, for clerks, and $2,500 as proposed by the House, instead of $3,205 as proposed by the Senate, for contingent expenses, in the office in Alaska; appropriates $12,000, as proposed by the Senate, instead of $11,400, as proposed by the House, for clerks in the office in California; appropriates $23,000, instead of $23,590 as proposed by the Senate and $22,000 as proposed by the House for clerks in the office in Colorado; appropriates $17,000, instead of $17,500 as proposed by the Senate and $16,000 as proposed by the House, for clerks in Idaho; appropriates $10,000, instead of $11,400 as proposed by the Senate and $8,000 as proposed by the House, for clerks in Nevada; appropriates $17,000 instead of $18,100 as proposed by the Senate and $15,500 as proposed by the House, for clerks in New Mexico; appropriates $1,000, instead of $900 as proposed by the House, for contingent and incidental expenses in Oregon; appropriates $4,500, instead of $5,000 as proposed by the Senate for clerks, and $600, instead of $800 as proposed by the Senate, for contingent expenses, in South Dakota; appropriates $16,000, instead of $20,300 as proposed by the Senate and $14,000 as proposed by the House, for clerks in Utah; and appropriates $20,000, instead of $22,300 as proposed by the Senate and $17,000 as proposed by the House, for clerks in Wyoming.

On amendment No. 235: Strikes out the paragraph inserted by the Senate, appropriating for the Commerce Court from March 4 to June 30, 1913.

J. T. JOHNSON,
ALBERT S. BURLESON,
F. H. GILLETT,
Managers on the part of the House.

The SPEAKER. The question is on agreeing to the conference report.

The conference report was agreed to.

Mr. JOHNSON of South Carolina. Mr. Speaker, the conference report on the legislative, executive, and judicial bill just adopted is final and complete. As the bill passed the House it carried $34,899,583.50. As it passed the Senate it carried $35,403,040.62, an increase of $503,457.12. The Senate receded on amendments carrying $192,506.12. The House receded on amendments carrying $310,951. The bill as finally agreed upon carries $35,210,534.50. The amount appropriated for the current year for the items included in the bill just passed is $35,216,133.38. This bill, therefore, shows a net reduction under the current law of $5,598.88. This reduction is made without reducing a single salary. On the other hand we have provided for a considerable number of increases and promotions in the governmental service. This reduction is also made in spite of the fact that we were compelled to provide a much larger sum to pay the salaries of Representatives on account of the increased membership of the House after the 4th of March. We also appropriate in this bill forty-odd thousand dollars expenses for the Legislature of the Territory of Alaska, an item that has not heretofore been included in this or any other appropriation bill. We have brought into this bill items amounting to about $1,000,000 that properly belong here, but have hitherto been carried in other appropriation bills, and in so far as we have increased this bill on account of these items, we have correspondingly reduced the bills in which they have hitherto been carried.

On motion of Mr. JOHNSON of South Carolina, a motion to reconsider the vote by which the conference report was agreed to was laid on the table.

NAVAL APPROPRIATION BILL.

Mr. PADGETT. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 28812, the naval appropriation bill.

The SPEAKER. The gentleman from Tennessee [Mr. PADGETT] moves that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 28812.

Mr. PADGETT. Pending that motion, I ask unanimous consent that general debate may be limited to four hours and confined to discussion of the bill, two hours of the time to be controlled by the gentleman from Texas [Mr. GREGG] and one hour by the gentleman from Illinois [Mr. FOSS] and one hour by myself.

The SPEAKER. And pending the motion to go into the Committee of the Whole House on the state of the Union, the gentleman from Tennessee [Mr. PADGETT] asks unanimous consent that general debate shall be limited to four hours, and confined to the bill.

Mr. TRIBBLE. Mr. Speaker——

The SPEAKER. The gentleman will wait until the Chair can put the request.

Mr. TRIBBLE. I rise to a point of order. Reserving the right to object, I would like to ask the gentleman if he proposes to give those members of the committee who voted against the report on this bill in the committee room an opportunity to be heard?

Mr. PADGETT. I am giving two hours of the time to the gentleman from Texas [Mr. GREGG], who controls the opposition to the bill, reserving one hour for myself, and yielding one hour to the gentleman from Illinois [Mr. FOSS].

Mr. TRIBBLE. Then I would like to know if the gentleman from Texas [Mr. GREGG] will yield some time to those two mem-

bers of the committee who voted against the bill in the committee room?

Mr. GREGG of Texas. The gentleman has never asked me for any time. I would take great pleasure in giving him some time, but I can not, because I have promised all the time that I shall have.

Mr. TRIBBLE. Then I object, Mr. Speaker.

The SPEAKER. It is not debatable.

The question is on agreeing to the motion of the gentleman from Tennessee [Mr. PADGETT] to go into the Committee of the Whole House on the state of the Union.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 28812) making appropriations for the naval service for the fiscal year ending June 30, 1914, and for other purposes, with Mr. ALEXANDER in the chair.

The CHAIRMAN. The House is in Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 28812, the naval appropriation bill, which the Clerk will report.

The Clerk read the title of the bill, as follows:

A bill (H. R. 28812) making appropriations for the naval service for the fiscal year ending June 30, 1914, and for other purposes.

Mr. UNDERWOOD. Mr. Chairman, I ask unanimous consent to dispense with the first reading of the bill in the committee.

The CHAIRMAN. The gentleman from Alabama [Mr. UNDERWOOD] asks unanimous consent to dispense with the first reading of the bill in the committee. Is there objection? [After a pause.] The Chair hears none, and it is so ordered. The gentleman from Tennessee [Mr. PADGETT] is recognized.

Mr. PADGETT. Mr. Chairman, I shall not occupy a great amount of the time of the committee in the discussion of this bill under general debate. I realize, Mr. Chairman, that we have only about seven more working days before the adjournment of the Congress, and the state of the public business is such as to require the dispatch of business.

I have filed with the bill a report stating in detail the various items of the bill, explaining the increases and the decreases, and setting forth clearly and succinctly, yet completely, the character of the bill. The aggregate amount of the appropriations carried in the bill is $146,618,364.53. The bill last year carried aggregate appropriations to the amount of $123,151,538.76. This bill represents an increase this year of $23,466,825.77.

The bill is divided into three general parts. The first part relates to the maintenance of the Navy. The appropriations last year for the maintenance of the Navy were $102,655,634.28. In this bill the appropriations for that purpose are $105,387,948.53, which is an increase of $2,732,314.25.

The items of this increase are as follows: The pay of the Navy is increased $1,983,690.75. Last year we increased the enlisted force 4,000 men, and we added 400 marines. There is also an increase in pay on account of longevity of service, the pay of the enlisted men increasing with the length of their service.

Another item of this increase is equipment of vessels, $756,700. The department asked for one million three hundred and some odd thousand dollars, but the committee allowed only $756,700. We now have more vessels in commission and larger vessels than heretofore, and the demand for a large equipment is growing every year.

We increased the target-practice item by $300,000. The committee believed that the target practice is a very necessary and essential and important part of the effective administration of the Navy. Without an efficient personnel, a personnel that can handle the guns effectively and shoot accurately, the ships of the Navy would be useless in an engagement, and we felt that this $300,000 increase was required and was justified. The bureau chief wanted an increase of $800,000. The department recommended $400,000. But the committee, under the exigencies of the case, have reported an increase of $300,000.

Another item is an increase for experiments in the Ordnance Department, $100,000. The committee believed that it was very essential that as to our ordnance—the guns, the torpedoes, the projectiles, the powder, the high explosives—there should be tests and experiments in all of those matters which are very essential to the efficiency of the Navy.

Another item of increase is an item of $240,000 increase in the wages of the employees, the workmen in the navy yard at Washington, the gun factory, and at Indianhead.

There is a board authorized and appointed by the Secretary known as the wage board. The workmen appeared before the committee and insisted that their wages were not adequate and were not proper; that they were entitled to an increase. At the suggestion of the committee a joint board, consisting of representatives of labor and representatives of the department, took up the matter, made a thorough investigation here and in neighboring cities, and they reported a wage scale of increase. This was submitted for review and for approval or disapproval to the regular wage board, and they, with some modification, approved it, and the department submitted supplemental estimates for this increase, and we have included the amount of it.

Mr. SHERWOOD. How much is the per cent of increase?

Mr. PADGETT. Approximately 10 per cent. We have increased the coal and transportation $1,000,000. More coal is required, because of the enlargement of the Navy. There is an increased price of about 20 cents a ton now in coal over former prices. Transportation charges have increased largely, for the reason that heretofore we have been able to transport coal in foreign bottoms at a great reduction below the charge in domestic bottoms; but on account of the increased commercial demands the price of foreign transportation has largely increased, necessitating an increased payment for transportation of coal.

Mr. SHERWOOD. Is that increase on account of the transportation of coal to the Philippine Islands?

Mr. PADGETT. To the Pacific coast largely, and to the Philippines.

Mr. TRIBBLE. I notice, on page 5 of the hearings, that it is stated that the bureau is of the opinion that much of the coal purchased during the year 1912 was without profit to the contractor, and Admiral Cowie states "this I know to be a fact."

Mr. PADGETT. That was the statement of Admiral Cowie.

Mr. TRIBBLE. Does the chairman of the committee think it was any of Admiral Cowie's business whether or not the contractors were getting a profit on their coal, or was it his business to make the best deal he could?

Mr. PADGETT. He was making the best deal he could, and, as I understood his testimony, he drove a good bargain, and got it at a price which did not make any profit for the seller.

Mr. TRIBBLE. And he offered that as an excuse why they did not get it any lower?

Mr. PADGETT. No; he said they made no profit on the other sale, and that they wanted some profit now, and for that reason demanded the increased price. He says the increased cost will be about 20 cents a ton.

Mr. ADAIR. How much more coal will be required next year than was used last year?

Mr. PADGETT. He did not state the exact quantity, as I now remember it, but he said that there would be a slight increase in the quantity, and there would also be a slight increase in the price.

Mr. ADAIR. My purpose in asking the question was to ascertain how fast our Navy is growing, and how much more coal will be required each year by reason of new construction, and so forth.

Mr. PADGETT. The increase in the quantity of coal is not so great, but the increase in consumption of fuel oil is remarkable. Two years ago we were using about 12,000,000 gallons of fuel oil a year. It is estimated that for the fiscal year ending June 30, 1914, we will consume 30,000,000 gallons. Not only has there been an increase in the quantity of fuel oil, but the price of fuel has recently advanced 60 per cent, and a large amount of this is on account of fuel oil.

Mr. ADAIR. Our appropriations for fuel oil and coal will increase each year, as the size of our Navy increases.

Mr. PADGETT. Necessarily.

Mr. ADAIR. And that accounts very largely for the increase this year in the amount of coal and oil that will be required.

Mr. PADGETT. Yes. For instance, on page 6 of the report I have an itemized statement of the coal purchased at home. The estimate is $200,000; freight, $200,000; fuel oil, $500,000; handling coal, $35,000; coal purchased abroad, $15,000. Those are the items of the increase of $1,000,000 which I was stating.

Mr. TRIBBLE. Will the gentleman yield?

Mr. PADGETT. Yes.

Mr. TRIBBLE. The increase in this bill for coal and oil is about $1,000,000, is it?

Mr. PADGETT. Yes.

Mr. TRIBBLE. Over that of last year?

Mr. PADGETT. Yes.

Mr. TRIBBLE. Will the gentleman tell us what the increase was the year before?

Mr. PADGETT. I do not remember just now, but I can get it for the gentleman.

Mr. TRIBBLE. Let me ask the gentleman another question.

Mr. PADGETT. My recollection is that the coal appropriation last year and the year before was the same; but of that I am not sure.

Mr. TRIBBLE. The gentleman states that the oil is the principal cause of this increase; will he look at page 6 under this item and see if he does not find that oil in 1911 was $131,000

and in 1912 oil was $340,000? How does the gentleman use oil as an illustration of the increase with so much force now?

Mr. PADGETT. I stated that last year, for 1912, the value of the oil purchased was $340,387. That was for 14,146,714 gallons; but for the fiscal year 1914, on account of the increased number of oil-burning vessels, we will need 30,000,000 gallons instead of 14,000,000 gallons. And then, there was an increase in the cost of about 60 per cent over the price of the year before.

Mr. TRIBBLE. That being true, I will ask the gentleman if oil is taking the place of coal, why does not the coal cost decrease?

Mr. PADGETT. The coal-burning vessels we still have. We are not disposing of any of those, and the new vessels are burning oil instead of coal.

Mr. TRIBBLE. Is it not the contention on the floor of the House and in the Naval Committee that you are abandoning the old vessels because they are gone out of date and new ones are taking their place?

Mr. PADGETT. No; there are a few small boats, like tugs and things of that kind, which wear out, but all of our principal ships we still have.

Mr. TRIBBLE. How many battleships have we now?

Mr. PADGETT. Thirty-eight completed, building, and authorized.

Mr. ADAIR. Will the gentleman yield?

Mr. PADGETT. Yes.

Mr. ADAIR. According to the gentleman's statement, our expenditures for the item of coal and oil alone will increase about a million dollars a year if we go on increasing the Navy as we have.

Mr. PADGETT. No; not that much a year. We are increasing this year, but I hope the price next year will not be 60 per cent over what it is this year.

Mr. ADAIR. It is partially due to the price this year, then?

Mr. PADGETT. Very largely.

Mr. HOBSON. If the gentleman from Tennessee will allow me, it is the plan to put four battleships, beginning with the older battleships, out of commission, and when they are put in reserve, of course their consumption of coal will be nil.

Mr. PADGETT. Mr. Chairman, I will ask now that I may proceed consecutively with my statement. The provisions are increased $321,113.50 on account of the addition of 4,000 men that I stated were added last year. They were authorized last year, but they have not all yet been recruited. This bill takes effect on the 1st of July and runs until the 30th of June, 1914, and the department states that they are recruiting at the rate of about 300 a week and expect to have the full enlistment by the beginning of the fiscal year.

Mr. TRIBBLE. The first item of this appropriation includes pay of officers and retired officers?

Mr. PADGETT. Yes.

Mr. TRIBBLE. Does the gentleman know that in the increase of officers you are at the same time decreasing them and placing on the rolls retired officers by plucking them not over 30 years of age on retired salaries?

Mr. PADGETT. I do not know what their ages are?

Mr. TRIBBLE. I will furnish the gentleman with the information.

Mr. PADGETT. I will take the gentleman's word for it. We are plucking some every year in order that a young man who goes into the Navy as an ensign will not remain an ensign, but will have some hope of promotion and advancement.

Mr. TRIBBLE. Is there no other way to get them out?

Mr. PADGETT. The only other way I know is by death or resignation.

Mr. TRIBBLE. You have voluntary retirement.

Mr. PADGETT. I said for them to die or resign.

Mr. MURRAY. Mr. Chairman, will the gentleman yield?

Mr. TRIBBLE. I have the floor.

Mr. MURRAY. Why, the gentleman from Tennessee has the floor.

Mr. TRIBBLE. But he yielded to me. Officers are taken off the active list on account of incapacity?

Mr. PADGETT. Some are taken out on account of incapacity, and others are taken out who are capable officers, but who are taken out for the purpose of producing a flow of promotions.

Mr. TRIBBLE. I understand that. I will ask the gentleman now if he knows this condition to exist, that men voluntarily retire from the Navy as officers on account of incapacity, so certified by the surgeon, and that after those men retire they are again taken back on the active list as active officers and paid the same salaries again?

Mr. PADGETT. There was a provision of law in the personnel act of 1899 that allowed the Navy Department until the 30th day of this past June to employ men on the retired list in the active service. That expired, and in the last Congress a modified law was enacted providing for the retirement and for a reduced pay of retired officers doing active duty.

Mr. TRIBBLE. I will ask the gentleman if it is not a fact that on June 7, 1910, on account of physical disability incurred in the line of duty, under section 1453, Lieut. Oscar F. Cooper was retired, so certified, for incapacity, and if he was not immediately taken back into the service after he was retired, and if he is not in the service to-day drawing a salary at an increase of $1,323.68?

Mr. PADGETT. I do not know the exact salary. I understand that he was incapable of doing sea duty and was retired; but he was capable of doing clerical duty, and was put back to do that.

Mr. TRIBBLE. I ask the gentleman if that is not the case in a number of instances?

Mr. PADGETT. There may be some. I do not know how many.

Mr. TRIBBLE. If a man is incapable of doing official duty as an officer and is retired and placed upon a salary as a retired officer, incapable of service, does the gentleman stand here before this House and state to this House that such incapable officer has the right to be put back on the active list, to draw $1,200 and $1,500 a year more than he was receiving?

Mr. PADGETT. He can only be put back on the active list after he is retired by the express legislation of Congress, and that is a matter for the Congress. I have always opposed reinstatement by legislation of that character, but Congress has not always followed my wishes in the matter.

Mr. TRIBBLE. Has the gentleman joined me in the Naval Committee to reconstruct these laws and abolish the plucking board?

Mr. PADGETT. I have not joined the gentleman in abolishing the plucking board, because I do not think it ought to be abolished.

Mr. TRIBBLE. Then, I will ask the gentleman this: Does he not know that it is charged that the plucking board is an instrument that frightens officers, and that many resign and get out of the way of the plucking board, knowing that they will be put back again on the active list?

Mr. PADGETT. I know nothing whatever of that.

Mr. HOBSON. Mr. Chairman, will the gentleman from Tennessee permit me to ask the gentleman to specify one case or all cases?

Mr. TRIBBLE. Apply the facts as a general principle without being personal.

Mr. MURRAY. Mr. Chairman, will the gentleman yield?

Mr. PADGETT. In just one moment. When a man is once on the retired list he can never get back on the active list except by legislation of Congress.

Mr. TRIBBLE. How did these men get back?

The CHAIRMAN. The Chair will call the attention of the gentleman from Georgia to the fact that before interrupting a gentleman he must first address the Chair.

Mr. PADGETT. Officers who are on the retired list may be employed. They are not on the active list, but they may be employed, providing the salary does not exceed a certain amount. On the retired list they receive three-fourths of the pay of the grade in which they retire. If they are used in active duty, although on the retired list, the Government is getting the benefit of their services at a very little additional pay, and in the higher grades there is nothing additional, whereas if they were not employed they would receive the retired pay, and the Government would get no service.

Mr. TRIBBLE. Mr. Chairman——

The CHAIRMAN. Does the gentleman yield?

Mr. PADGETT. Yes.

Mr. TRIBBLE. Then, I will ask the gentleman if he does not think it would be better not to retire them at all?

Mr. PADGETT. No; I do not. It is necessary to provide for retirement if we are to have capable officers and an efficient Navy.

Mr. TRIBBLE. Will the gentleman yield?

Mr. PADGETT. I do.

Mr. TRIBBLE. Does not the gentleman know it is the mecca and hope of all officers to get back on land, and this is one scheme they have of doing it when they are retired to get back on the active list, and you can not then draft them for sea service?

Mr. PADGETT. They are not getting on the active list——

Mr. TRIBBLE. They are getting active pay.

Mr. PADGETT. While doing active duty they are getting pay which is less than active pay unless it is the pay in the lower numbers.

Mr. TRIBBLE. Does the gentleman espouse on the floor of this House the proposition of Mr. Cooper and Mr. Sorely and

Mr. Pryor, and a number of others which I have in my hand, drawing $1,200 to $1,500 more for having gotten back on this active duty? Does he think it is right?

Mr. PADGETT. I will simply say that these gentlemen were retired under the law that existed prior to the last appropriation bill, and I contributed somewhat in the last appropriation bill to the enactment of legislation to repeal the provisions under which those gentlemen were retired. It is no longer the law, and I would call the gentleman's attention to a speech which he made a few days ago upon the floor of the House in which he stated these matters, but he was in error with reference to the law. The law he referred to was repealed last year.

Mr. TRIBBLE. The gentleman does not mean to say that the plucking board has been repealed?

Mr. PADGETT. No; I said the law was repealed that advanced them one grade upon retirement.

Mr. TRIBBLE. I did not make that statement; Capt. HOBSON is the one who made that statement; I pursued the argument on the statement of the gentleman from Alabama.

Mr. PADGETT. It is in the gentleman's printed speech in the RECORD.

Mr. TRIBBLE. The gentleman is mistaken. Mr. HOBSON is the man who made that statement. I think I stand pretty close to the RECORD. I only accepted his statement as authority. I will quote the language of the gentleman as it appears in the RECORD, so that I may not do him any injustice in my understanding of his language:

Mr. SISSON. The gentleman from Georgia states that the incompetent officers are the ones who are plucked.

Mr. TRIBBLE. No; I did not state that. I say the department pretend that they are plucking incompetent officers, but I did not make that statement. I say they are competent.

Mr. SISSON. If the incompetent ones are the ones who are being plucked, then they are adopting a system of pensioning men for incompetency, are they?

Mr. HOBSON. It is worse than that.

Mr. TRIBBLE. I say it is a terrible arraignment of the Navy of this country and the officers of the Navy if 177 men have been retired for incompetency or something else; and still there are deadheads in the Navy yet who should be plucked for retirement, and you continue to retire them year after year. It is a terrible arraignment on the whole system as well as the men. What is the matter with them? The Secretary of the Navy says there is nothing the matter. Ah, yes; they want to promote officers to better pay.

Mr. HOBSON. The gentleman's arraignment is not as strong as he can make it, if he will allow me. I simply want him to lay all the facts before the Members, and to state that those who are plucked are promoted a whole grade in being plucked.

Mr. BEALL of Texas. Why are they promoted?

Mr. HOBSON. In order to retire them in the next higher grade.

Mr. TRIBBLE. Yes; I thank the gentleman; when they are retired they are promoted to another grade in order that their life salary may be increased—rewarded by promotion for so-called incompetency.

Mr. PADGETT. I now yield to the gentleman from Iowa.

Mr. KENDALL. The gentleman was discussing the increase carried in this bill by reason of the enlarged Navy, as I understood him, when he was interrupted by the gentleman from Georgia. I was correct in that, I think. I notice at the top of page 10 of the somewhat elaborate report that has been filed by the minority a statement that we now lack 3,000 officers and 6,000 enlisted men for the operation of the ships we now have in commission. I would like to ask the gentleman, the chairman of the committee, to address himself for a moment to that statement.

Mr. PADGETT. Well, the fact is we are about 3,000 officers short, on a war basis, to operate the ships we now have, but we are not that many short on a peace basis. Of course, if we were in war we would have to have every ship in commission with a full complement, but upon a peace basis many ships are in what is called a reserve, where they have about 25 or 30 per cent of a complement of men and officers.

Mr. KENDALL. I suppose that is ample during peace?

Mr. PADGETT. That is ample for a peace basis; and now, as a matter of fact, while the gentleman says about 6,000 enlisted men, on a war basis we are about 20,000 enlisted men short.

Mr. KENDALL. How is the compensation fixed for enlisted men, by Executive order?

Mr. PADGETT. It is fixed by Executive order, and the law provides for a certain increase for each enlistment, so much increase every time a man reenlists after a four years' enlistment.

Mr. KENDALL. I think it will be interesting to the committee if the chairman will explain how the compensation paid to the ordinary enlisted man in our Navy compares with that received by similar employees in the navies of the world, because that enters largely, I think, into the general budget for the Navy.

Mr. PADGETT. I think it is much higher; I can not give it in detail just from memory as to figures, but the men in our Navy are paid much higher than any foreign navies, as well as in all other occupations abroad, and the cost of living is much higher here than abroad.

Mr. KENDALL. And they are provisioned much better.

Mr. PADGETT. And ours are provisioned much better and they are clothed much better.

Mr. KENDALL. Is not that a circumstance that ought to be taken into account in instituting a comparison between naval expenditures here and abroad?

Mr. PADGETT. It must necessarily be so.

Now I will yield to the gentleman from Massachusetts [Mr. MURRAY], if he desires.

Mr. MURRAY. Mr. Chairman, I simply wanted the gentleman from Tennessee to have an opportunity to conclude his statement without interruption. It seems to be the purpose of certain gentlemen to question him paragraph by paragraph. He has only an hour, and may not be able to get more time than that.

Mr. KENDALL. I disavow any intention of unduly interrupting the gentleman.

Mr. MURRAY. Of course, I did not have in mind the gentleman from Iowa.

Mr. PADGETT. I wish to yield to all which the time I have will permit me to do.

Mr. MURRAY. But over half of your time is now gone, and you have not gone more than half through the bill.

Mr. PADGETT. Mr. Chairman, these items are mentioned, and all of them together total an increase of $4,667,679.25; but we made reductions of something like one million and six or seven hundred thousand dollars in other items of the bill, making the net increase, as stated, $2,732,314.25. And I have taken the pains and the time to call the attention of the House to the items which constitute this increase, showing that the amount that I stated to be $4,600,000, and in other portions of the bill we made decreases, reducing the net increase to $2,732,000.

Now, then, there is another part of the bill—the payment of the obligations for the increase in the Navy heretofore authorized, amounting to $22,284,091. These are on account of ships which have been authorized heretofore. Now, I thought it would be proper to make this statement: Something more than $4,000,000 of that is on account of the fact that at the last session of Congress, instead of appropriating, as customary, six million two hundred thousand and some odd dollars on account of a battleship authorized, we appropriated only about $2,000,000. For this reason, as the bill did not become a law until the 22d of August, and we were providing for a new type of ship, the like of which we did not have, and it was necessary to prepare plans and specifications and details, all of which would consume many months, and we knew that it would be up into this spring before they would be ready to submit bids for contracts. The bids, as a fact, were opened on the 18th of the present month, so that they would have not a full year, but would have only three or four months at the most in which to do work upon the vessel authorized. So we appropriated only $2,000,000, which the department said was sufficient for the time they would have to work upon the ship.

We have got to make up that $4,000,000 in the present bill. If it had been appropriated in the bill last year, the $22,000,000 carried in the bill this year would have been reduced to eighteen millions.

Now, in the present bill there is new authorization. Two battleships, six torpedo-boat destroyers, four submarines, one supply ship, and one transport are authorized, the total cost of which will be $41,710,611 instead of forty-six million and some odd, as stated in the report of the minority. They were about five millions excessive in the statement of the aggregate cost.

Mr. SHERWOOD. I would like to ask the gentleman a question. Why do you authorize more battleships when you have not enough officers now to man the battleships we have?

Mr. PADGETT. Speaking personally, in committee I favored only one battleship.

Mr. SHERWOOD. Why do you need any battleships when you have not the officers to man them?

Mr. PADGETT. I think the Navy ought to be proportionately increased, and our party says we want an adequate Navy.

Mr. SHERWOOD. Why have the battleships with no officers to command them?

Mr. PADGETT. It takes from 30 months to 3 years to build a battleship. We are increasing our officers 150 a year. The course at the academy is four years.

Mr. TRIBBLE. In the gentleman's explanation of the increase on account of battleships he did not mention the fact that we did not authorize but one battleship last year, and heretofore they have been building two, and we are taking care of one. Will he explain that?

Mr. PADGETT. I think the battleships we were building in early days were costing from four and one-half millions, in round numbers, to seven millions. The battleship we authorized last year, in round numbers, will cost $15,000,000.

Mr. TRIBBLE. The gentleman does not mean to say that the battleships authorized previous to last year will cost much less than the ship authorized last year? You mean the early construction and not the late ones.

Mr. PADGETT. I said it cost $15,000,000. I said from $4,500,000 to about $7,000,000 for the earlier ships, and then the later ones up to about $10,000,000.

Mr. SLAYDEN. At total cost?

Mr. PADGETT. Yes, sir.

Mr. ADAIR. The increase in this bill, outside of these battleships and the authorizations made heretofore, must be taken care of in this bill——

Mr. PADGETT. Is $2,732,000.

Mr. ADAIR. That is the increase outside of these other items?

Mr. PADGETT. Yes, sir; that is the increase outside of these items, and it is made up of the items which I stated at length to the committee.

Mr. ADAIR. Yes.

Mr. PADGETT. Now, then, the amount of the appropriations carried in the present bill on account of the new authorizations is $18,946,325. The amount for a battleship is in round figures $6,200,000 and for each of the other ships there is carried an amount which appears in the hearings, but I do not have them at my command at this moment.

Mr. BATHRICK. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. PADGETT. Yes.

Mr. BATHRICK. In the explanation of the bill I understand that $105,000,000 is appropriated for the purpose of keeping what we have—taking care of what we have?

Mr. PADGETT. Yes, sir.

Mr. BATHRICK. Does the gentleman think that any part of that $105,000,000 could be excluded from this bill and still enable us to take good care of what we have?

Mr. PADGETT. I do not. In fact I concur with that part of the statement of the views of the minority where they say that the committee has been so economical that we have failed to provide things which the real efficiency of the Navy would justify.

Mr. BATHRICK. Now, does the gentleman think that if there is a failure to provide such things as the real efficiency of the Navy might require it is because of a sinister purpose to increase the extension program?

Mr. PADGETT. There is no such purpose; none whatever.

Mr. BATHRICK. Now, let us take the second part of the bill. It is about $22,000,000, for the purpose of paying present obligations and those which were incurred before this Congress, were they not?

Mr. PADGETT. Yes; for several Congresses back.

Mr. BATHRICK. Yes; for several Congresses. That makes the bill $127,000,000?

Mr. PADGETT. In round numbers $128,000,000.

Mr. BATHRICK. Does the gentleman think that as to the second item of $22,000,000 anything could be taken away from that and the Government still be honest and fair with the people they have made contracts with?

Mr. PADGETT. As to that I will say that the gentlemen who filed their minority views so state, and state that that $22,000,000 must be appropriated.

Mr. BATHRICK. Then it is quite apparent, is it not, that the minority views agree on the question of the $105,000,000, which is for maintenance, and as to the $22,000,000, which is to pay our obligations?

Mr. PADGETT. Well, the minority in their views on the $105,000,000 insist that we should not make appropriations for the navy yards, for their maintenance and upkeep, because there have been some discussions, I presume, in the newspapers to the effect that some of those yards might be abandoned.

Mr. BATHRICK. Now, just one word more, if I can have the gentleman's attention. How much do these navy yards require or take in this bill?

Mr. PADGETT. The estimates submitted were $6,526,445, and we recommend in the bill $4,433,945; in other words, $2,000,000 less than the estimates and $189,000 less than was appropriated last year.

Mr. BATHRICK. Now, in reducing that amount, did you take into account and have in mind the fact that we might change or abandon some of these yards? Was that one of the reasons why you reduced it?

Mr. PADGETT. No, sir. We have got yards there, and we have got millions of dollars' worth of property involved. We have got men working there. We are doing repair work. We are doing manufacturing work. We have got these establishments, and we have provided only those things which are necessary for the upkeep of the yards and have recommended amounts which any prudent business man would expend in the maintenance and preservation of his own property.

Mr. BATHRICK. Now, in the total appropriations for these two parts, namely, that which is required for keeping what we have, and that which is required for the payment of contracts, how much did the committee reduce the estimates brought to it by the department?

Mr. PADGETT. We reduced the total estimates more than $22,000,000.

Mr. BATHRICK. That is all.

Mr. TRIBBLE. Mr. Chairman, may I ask the gentleman a question?

Mr. PADGETT. One moment; let me find out how my time stands. Mr. Chairman, how does my time stand?

The CHAIRMAN. The gentleman has 13 minutes remaining.

Mr. HENSLEY. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. PADGETT. I yield for a moment, and will reserve the rest of my time.

Mr. HENSLEY. I understood the gentleman to state that in his opinion none of the items could be taken out of this bill.

Mr. PADGETT. I said they could be taken out, but could not be taken out in justice to the yards.

Mr. HENSLEY. I call the attention of the gentleman to the item of $35,000 that previously was on page 34 of the bill, and will ask the gentleman if the original draft did not contain that item, and whether the gentleman and the other members of the committee who made up this bill did not confess that that was a duplication, and finally consented to let that item be stricken from the bill on the motion of the gentleman from Ohio [Mr. BATHRICK]?

Mr. PADGETT. That $35,000 item is not in the bill at the present time.

Mr. HENSLEY. No; but it was reported to the committee in the first draft of the bill.

Mr. PADGETT. It was in the first draft of the bill. It was for a duplicate air compressor at the Boston manufacturing navy yard, where we have a great number of men working who depend upon constant and unfailing power. The department said that if the existing air compressor should break down the men would be idle until it could be repaired, and they wanted $35,000 for a duplicate. But while the subcommittee felt that as a business proposition it would be well to have that protection for the yard, the proposition was eliminated in the full committee, because we desired to bring in as economical a bill as we could.

Mr. HENSLEY. May there not be other items in this bill that are duplications, just as it was shown by the testimony before the subcommittee that this was a duplication and not needed in the bill?

Mr. PADGETT. I do not recall any now. Mr. Chairman, I will reserve the remainder of my time.

The CHAIRMAN. The gentleman has 12 minutes remaining, and reserves the remainder of his time.

Mr. FOSS. Mr. Chairman, I desire to state that the members of the Naval Committee on this side of the House are substantially in favor of this bill. It has been carefully considered in the committee, and it comes before this House, in my judgment, a carefully and well-digested bill in every respect. What is more, it continues the naval policy which obtained in this country prior to the time that the present Congress came into power. There are a number of gentlemen upon the other side of this House who, I greatly regret, have made a minority report against this bill. And yet, if any one of you will read the minority report, you will find that very little objection is raised to most of this bill.

In the first place, they divided the bill into three parts and they say we appropriate in this bill $105,000,000 for the maintenance of the Navy as it is to-day. After making some objections they close their consideration of that part of the bill with these words:

> The only just criticism on that part of the bill which appropriates $105,587,948.43 for the maintenance of the Navy is that it embraces about $2,000,000 to be expended for various purposes on the navy yards, and this criticism is not that these items are too large, or that the improvements for which this money is sought to be expended are not useful and needed, but the objection is that the navy yards and stations in which this money is to be expended may be abandoned, in which case the expenditure would be useless.

Mr. O'SHAUNESSY. Will the gentleman yield?

Mr. FOSS. I regret that I can not yield.

The CHAIRMAN. The gentleman declines to yield.

Mr. FOSS. There is not a dollar of this $2,000,000 appropriated in this bill which is recommended for any navy yard which is abandoned to-day. It has been the policy of the present administration to close up a few yards, the yard at New Orleans and the yard at Pensacola, and some others; but not one single dollar of this $2,000,000 goes into those yards which

are closed up, or may be said to be temporarily abandoned. So there is no useless expenditure or appropriation of money here in this bill.

When the next administration comes into power they may perchance abandon or close up some of these yards. If so, that will be the policy of the incoming administration, but so far as the navy yards are concerned at the present time there are no appropriations recommended for any navy yards which are abandoned or closed to-day. The question of the abandonment or closing of navy yards has been a mooted question for a number of years. Different Secretaries of the Navy—and we have had any number of them in the last 10 years—have recommended from time to time the closing of this yard or that yard.

Mr. GREGG of Texas. Does not the gentleman think it is the duty of Congress to close some of the yards and rearrange the locations of them?

Mr. FOSS. No; I do not think it is the duty of Congress to close them. I think it is the duty of the administrative part of this Government to close them if advisable.

Mr. GREGG of Texas. Do you not think it ought to be done?

Mr. FOSS. The Secretary of the Navy has a perfect right to close a yard if it is not necessary for the performance of work upon our ships. He knows how much business is to be done in our industrial plants, and these navy yards are largely industrial plants. He has the distributing of the work upon the ships and can send them to this yard or that. It is properly within his jurisdictoin to recommend and enforce the policy of closing navy yards or abandoning them.

That seems to me the real situation in regard to the matter. But this minority has no objection to the appropriation made for the maintenance of the Navy except for $2,000,000 recommended for navy yards which may possibly in the future, but which are not now, be abandoned or closed. What an idle objection to this feature of the bill.

Then we come to the second feature of the bill, and that is the appropriation of money to carry out contracts on ships that are authorized. What does this minority say? After discussing this phase of the bill they say "the second phase of the bill to which we call attention is the appropriation of $22,000,000 to complete the construction of ships heretofore authorized. These vessels are partly built, and the Government is under contract to complete them. We will either have to abandon these partly constructed vessels or lose what has already been spent on them or appropriate the $22,000,000 necessary to complete them. We therefore agree that the $22,000,000 should be appropriated."

This voluminous minority report, after all has been said, comes down finally to the proposition that we must appropriate the money for the ships already authorized—which anybody ought to know is the sensible thing to do—and raises only the trifling objection that I have mentioned as to the appropriation of $105,000,000 for the maintenance of the Navy.

So the minority report is substantially in favor of this bill, of the $105,000,000 for the maintenance of the Navy, of $22,000,000 for the appropriation of ships already authorized. But where do they balk?

Upon the third feature of the bill—the naval program. That is the only real question before this House, whether or not we shall have a naval program this year; whether or not we have an adequate Navy to-day. Those are the real propositions before this House.

Now, during all the time in which we have been engaged in building up an American Navy—I want to say it with pride—we have never made it a party question. Until last year the gentlemen on that side of the House took the question of a naval program into a party caucus. They held caucuses—three or four of them—even after they had declared in favor of an adequate Navy at their national convention in Baltimore. Even after that declaration, in a rather bumptious plank in their platform declaring for the maintenance of the Monroe doctrine—even after all that they met time and time again, and in a Democratic caucus passed resolutions declaring against all battleships whatever.

Finally, when the public press of the country had become aroused against it and they saw that they were upon the unpopular side of this question, a final caucus was held in which it was permitted—think of it; notwithstanding the constitutional obligation and oath which every Member of Congress takes here—it was permitted to Members upon the Democratic side to vote for one battleship, but only one.

This was the first time in the history of our country in the building up of our new Navy when it was ever made a party question. The national defense, I say here and now, is above all parties [applause], and under Republican administration we always treated it so.

But the fact of the matter is that the Democratic Party has never been in favor of building up the American Navy. As I look over the record for 15 Congresses prior to this Congress I find that under the Democratic Congresses there were authorized only 144,000 tons of ships for the new Navy, whereas under 10 Republican Congresses—only twice as many as there were Democratic Congresses—there were authorized 1,066,000 tons of ships for the new Navy. That speaks volumes on the question of which party in this House has been in favor of building up the Navy and maintaining the honor of our country. [Applause.] It is reported in the newspapers that Mr. William Jennings Bryan will be the premier of the new Cabinet, and this morning it is said that he is now measuring tensile strength with the President elect. It is quite likely that he will be the dominating factor under the new administration.

William Jennings Bryan a number of year ago was a Member of this body, and in the debate which took place upon the naval bill on July 9, 1892, he made the following statement in his speech. It will be found upon page 5956 of the CONGRESSIONAL RECORD of the Fifty-second Congress, first session. Mr. Bryan said:

> I believe in a sufficient Navy. We have this now, either in existence or in construction. We do not need more.

How much of a Navy did we have at that time, when Mr. Bryan thought it was sufficient for this country? We had built and building 3 first-class battleships, 2 second-class battleships, 1 armored cruiser, 13 protected cruisers, 6 monitors, 3 unprotected cruisers, 8 gunboats, and 2 torpedo-boat destroyers—a small Navy. But if we had carried out the policy which Mr. Bryan enunciated at that time, where do you think we would have been when we met even the small naval power of Spain in 1898?

No; it has never been Democratic policy to build up the American Navy, but it has been built up under the administration of the Republican Party.

Mr. MURRAY. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Will the gentleman yield?

Mr. FOSS. Mr. Chairman, I regret to say that I can not yield. I want the country to know this. I would never have spoken of this from the standpoint of party if the party side of the question had not been forced upon us by the action of the Democrats in the last session of Congress and in the numerous conferences which they have held during this session of Congress for the purpose of filibustering against this bill and preventing a sensible and reasonable and conservative naval program in continuance and in line with our past policies up to the time that this Congress came into power.

Mr. MANN. Mr. Chairman, will my colleague yield for a question?

Mr. FOSS. Certainly.

Mr. MANN. Do I understand from my colleague's statement that the Democratic members of the Committee on Naval Affairs have had conferences concerning this bill from which the Republican members of the committee were excluded?

Mr. ROBERTS of Massachusetts. Sure.

Mr. FOSS. I am informed, I will say to the gentleman, that they have had numerous conferences.

Mr. ROBERTS of Massachusetts. Mr. Chairman, if the gentleman will permit, I can state, as a member of that committee, that I went to the Naval Committee room and was told I could not go in because the Democratic members were having what they called an executive session, and that all of the employees of that committee had been excluded from that room, and they were standing out in the hallway.

Mr. MANN. Is it not entirely unusual for a committee like that to turn the whole thing into a partisan proposition?

Mr. FOSS. Why, it is something never before heard of in the history of the country, and we will undoubtedly hear of a lot of other things——

Mr. GREGG of Texas. Oh, we will teach you a lot of new things before we get through with you.

Mr. FOSS. Which have never been before heard of in the history of the country.

But why did the gentlemen on the other side object to the continuation of the naval policy? Why do they go back on the platform which was adopted in the last Democratic convention at Baltimore, in which they spoke of the Monroe doctrine and of maintaining the Monroe doctrine? Why do they go back on it, and why do they propose, a large number of them, to vote against the naval program recommended in this bill?

In the first place, I say that at heart they have not been for the building up of the American Navy, but the second reason is because they are beginning to realize that the appropriations under the management of that side of the House have been running away up beyond their dreams and expectations. For

years on that side of the House, they have said to us that we have been extravagantly appropriating for the maintenance of the Government, and they have said to the people of the country, "Let us get into power, and we will cut down the appropriations, and we will give you an economical administration." They are finding out now that the appropriations are running higher and higher, until I am told they will be at least $100,000,000 more than they were two years ago, the high-water mark under Republican administration. And before we get through with this session of Congress, they may reach $200,000,000 more. That is the reason why. You are beginning to see that you can not carry out your promises to the American people, and therefore you say "We will cut down the naval bill, we will cut down the naval program and try to reduce expenditures in that way." But the country will see through that sham economy, that pretense of economy.

Mr. Chairman, this program which we recommend in this bill, and which I say meets with the approval of this side of the House, is a continuance of a policy which obtained prior to the present Congress, and obtained for a number of years. We recommended two ships a year. As I look back over the history of the last 16 years I see that the Republican Party, when in power upon this floor, authorized on the average two ships a year.

It is a conservative policy, two ships a year. It only will take care of the wear and tear upon the tonnage of the American Navy. We have a tonnage to-day of about 1,300,000. One of these great battleships might be likened unto a great machine shop, and any man who knows anything about machine shops knows that there is at least from 5 to 10 per cent which is struck off for wear and tear every year upon one of these great industrial establishments, and yet in the appropriation bill of this year we only recommend these two battleships with some smaller ships which will no more than equalize the annual wear and tear upon the ships in the American Navy.

We have never tried to rival any foreign program in presenting a program to this House. England last year authorized four battleships, and it is said that she will authorize five great battleships this year, and Canada, we are informed, has already made her a gift, or is about to do so, of £7,000,000, or $35,000,000, for the construction of three great ships in addition thereto. We have not sought to rival any foreign power, but we have maintained through the course of years a systematic, uniform naval policy in the building up of the American Navy.

There ought not to be any question in the minds of the American people but what we need some kind of a Navy, and if we need any Navy at all we need a good one. We have great interests upon this hemisphere and also upon the other. The United States to-day stands in a high position among the nations of the world because she has always been ready and always has maintained her national honor. We are to-day building the great Panama Canal. We need a Navy to defend it. Ah, you may say, we will defend it by neutrality, by an agreement among the nations, but we may be called upon to defend that neutrality in time of war, and there is nothing but a navy that can defend it, a navy that will be able to maintain the control of the sea against the contending power. Not only that, but in the building of that great canal we are opening up a great sea to the commerce of the world—the Caribbean Sea. We are changing the routes of commerce and trade. The nations will send their ships through that great canal, and the causes of friction and of trouble and of international difficulty will be magnified a hundredfold, and for that reason we need be in a position where we shall be able to maintain our rights in the new commercial and tremendous development of that new Mediterranean of the Western Hemisphere. Then, we have islands of the sea under our dominion, and it is necessary for us to protect them, and our foreign policy, which is not one whit bigger than our Navy, and for these reasons I appeal to you upon this side of the House and upon that to throw aside all consideration of party and stand once again for national honor and national defense, which is above all other considerations. [Applause.]

Mr. Chairman, I reserve the balance of my time.

Mr. WITHERSPOON. Mr. Chairman, I am opposed to the passage of this bill. In the committee I voted against reporting it to the House, and I shall vote against its final passage unless it is materially amended. My opposition to this bill, Mr. Chairman, is based upon the fact that the bill, in my judgment, ignores and sacrifices the efficiency of the American Navy and proposes to squander millions of dollars upon ships that we do not need. The bill seeks to appropriate $146,818,364.53. This sum is $23,666,825.78 more than the last appropriation and $9,763,165.48 more than the Republicans in the days of their wildest extravagance ever appropriated in one bill. Of this vast amount $105,587,948.53 is proposed to be appropriated to the maintenance of the Navy and $22,284,091 to the cost of completing the construction of naval vessels heretofore authorized and $16,418,925 for the building of new vessels, on account of which the bill seeks to appropriate $18,946,325 for the first year's work of construction, leaving $27,472,600 of that sum which will necessarily be included in the appropriation bill of the next fiscal year, if we pass this program.

In regard to the first item of $105,587,948.53, it is nearly $3,000,000 more than the amount appropriated for the maintenance of the Navy in the last appropriation bill, and this large increase in the appropriations for the maintenance of the Navy is brought about notwithstanding the fact that the Secretary of the Navy and every bureau in the Navy Department has exercised the greatest economy. The examples of this economy are these: In regard to powder, the testimony before the committee shows that the department is now manufacturing powder 10 per cent cheaper than it ever did before and 15 cents a pound less than it can be bought in the market. In regard to torpedoes, the first torpedoes purchased by the Navy Department cost $9,500 apiece; that cost has been reduced to $5,800 apiece, and the department itself is now manufacturing a good part of the torpedoes needed at $3,500 apiece. In regard to the manufacture of large guns, the testimony shows that a short while ago they were costing $60,000 apiece, and now our gun factory is making them at less than $50,000 apiece, and that the cost of the gun and mount of the large 14-inch guns that we are now making is between $20,000 and $30,000 less per gun than the 12-inch guns cost a few years ogo. Not only this, but in the matter of accounting the evidence shows that reforms have been adopted which have resulted in great saving to the Government.

Not only have the bureaus of the department manifested this commendable economy, but the Committee on Naval Affairs itself, after spending months upon this bill, have reduced, with the exception I will point out presently, every item in the bill as low as was possible consistent with the efficiency of the American Navy. Not only has the committee made a consistent and continuous struggle to reduce this appropriation as low as possible, but it has actually neglected a great many matters upon which the very efficiency of the Navy depends.

First, in regard to target practice, the Chief of the Bureau of Ordnance has told us that in his judgment we needed a certain amount of money to give the naval officers the practice that is necessary for them to know how to shoot accurately, and this bill proposes for that purpose $400,000 less than the experts tell us we need. I wish to impress upon you the importance of this. It makes no difference what number of battleships you have, it is utterly immaterial how efficient your powder is, it makes no difference what sort of guns you have, it all amounts to nothing if the men behind the guns can not shoot with that skill and accuracy that will strike the ships of the enemy in the case of battle, and they can not acquire this skill in any other way except by target practice. And yet on this vital point of the efficiency of the Navy, this bill refuses by $400,000 to appropriate the necessary amount of money. Again, in the matter of torpedoes, the testimony before us shows that we are deficient; that our factory is incapacitated to manufacture as many torpedoes as we need; and that we are therefore compelled to purchase them at a price $2,400 apiece higher than we can make them. It was on this account recommended to us, or rather the experts stated, that it would require $250,000 to so enlarge our factory that we could provide this necessary means of defense. We refused to give that $250,000 because we were struggling to keep this appropriation for the maintenance, the efficiency, the adequacy of the Navy down to a point where there would be more chance for this Congress passing a bill to waste $45,000,000 on new vessels. [Applause.]

The hearings make it plain to my mind that the result of a naval battle would under many conditions depend upon the use of torpedoes, and this bill has just sacrificed the efficiency of the Navy to gratify the extravagance which seems to have run wild in this whole country. Again, in the matter of mines, it is shown that they are among the most important means of defense. They are proven to be terrible engines of destruction and indispensable in time of war. In the naval battle between Japan and Russia 6,000 of these mines were used, and with them the Russians destroyed two Japanese battleships and several other vessels, and with them the Japanese destroyed a Russian battleship and so disabled several others that they could not take part in the engagement. But these mines do not cost very much. You can not squander very much money on mines. They cost just $500 apiece. [Applause.] But a battleship costs $16,000,000, and therefore that is the thing with which you can effectually squander the people's money

with the greatest rapidity. And so we neglect the matter of mines and devote our thought to the subject of battleships. It is the best means by which to gratify extravagance and wastefulness. [Applause.]

This all-powerful means of defense has been neglected. The experts in the Navy have from time to time urged Congress to appropriate $1,000,000 for mines, and only $200,000 has been appropriated. This bill carries for this purpose only $100,000 and the result is that we have only 325 mines, while if we had a war we would need thousands of them, and our fleet would probably be defeated and destroyed because we have neglected to make provision for them. But when we run the appropriations up to $150,000,000 to get what is useless we are compelled to deny ourselves what is needful on the principle that when we spend all of our money for ice cream and chewing gum we have nothing left with which to buy an automobile.

In regard to powder, we have only one factory, which has not the capacity to supply our needs, and if an explosion should occur there we would become wholly, as we are now largely, dependent upon the Powder Trust. We should have several powder factories. The public defense requires it, and the safety of our Navy as well as a proper regard for the personnel of the Navy demands that we should be prepared to supply them at all times with plenty of powder, but we can not appropriate the money for this purpose because we prefer to squander it on battleships.

Another matter, and that is this: It is shown to us that at present we lack 3,000 officers of having a sufficient number to man and operate the vessels that we now have. It is shown that if we did not build another ship it would take the Naval Academy 20 years at the present rate of graduation to supply the Navy as it exists to-day with a sufficient number of officers. That is the fact before the committee. But I undertake to say that the Committee on Naval Affairs did not give two and one-half minutes' attention to that fact, because we were driving toward the $45,000,000. We did not have time to consider a question that affects the very vitals of the Navy. A battleship is utterly useless without men to operate it. Enlisted men have to be trained, and it takes time to train them. Officers have to be educated, and there is no other way that you can get officers who are competent to take charge of ships of war except to train them at the Naval Academy. And yet no provision is made for the increase of our officers to supply the vessels we now have, and not only is no provision made, but there has never been in the committee any discussion of that subject or any consideration of it, because we did not have time to do it.

Now, Mr. Chairman, notwithstanding the fact that every bureau has exercised these economies, notwithstanding the fact that the committee itself has cut down every item it could, notwithstanding the fact that it has neglected to provide what is necessary and required for the adequacy and efficiency of the Navy and for the public defense, this item of $105,000,000 is nearly $3,000,000 more than it was last year. In that $105,000,000 there is only one part of it that the minority of the committee feels is subject to criticism, and that is the number of items covering about 10 pages of the bill and amounting to between two and three million dollars for the construction of new things in the navy yards. And on that point the chairman of our committee, the gentleman from Tennessee [Mr. PADGETT], stated in his remarks that the minority report assailed items for the upkeep and maintenance of the navy yards.

I want to tell you that he is mistaken about that. These items that we object to have nothing to do with the upkeep and the maintenance of navy yards. Ample provisions have been made in other parts of the bill to keep the navy yards going just as they are now. Why, our navy yards have been sufficient to manufacture the greatest battleships in existence with what they have now, but here is a proposition to construct new things, to make them better than they have been. We say they can go along as they are now, because they are already efficient to do the work at the present time, and our objection to these items is not that they are too large; it is not that the objects for which the appropriations are sought to be made will not be useful and needful, but we base our objection to the appropriation of this vast sum of money on the fact that nearly all of those navy yards will probably be abandoned in the near future, and if they are abandoned, then the expenditure of this money will be wasted.

Mr. O'SHAUNESSY. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. WITHERSPOON. Yes.

Mr. O'SHAUNESSY. I endeavored to interrupt the gentleman from Illinois [Mr. Foss] when he was speaking about navy yards that might be abandoned, and I interrupted him in order that I might have some enlightenment about what the committee considered in regard to those navy yards.

Mr. WITHERSPOON. Oh, I have not time to listen to the gentleman talk, but if the gentleman will ask me a question I will answer it.

Mr. O'SHAUNESSY. Then I will ask it.

Mr. WITHERSPOON. I will try to answer it.

Mr. O'SHAUNESSY. Can the gentleman tell me what the committee did relative to any legislation dealing with the proposed abandonment of useless navy yards?

Mr. WITHERSPOON. The committee did absolutely nothing; and it did not do anything on anything else hardly, because it was driving toward these battleships. [Applause.]

Mr. BATHRICK. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. WITHERSPOON. I can not yield much time. If I did, I would not have time to make my argument; but I will yield to the gentleman for a question.

Mr. BATHRICK. Does not the gentleman think that in order to abandon these navy yards it would be necessary to have legislation or a new bill?

Mr. WITHERSPOON. I can not yield. I do not think that is pertinent.

Mr. BATHRICK. Is this question pertinent, then——

Mr. WITHERSPOON. I decline to yield, Mr. Chairman.

The CHAIRMAN. The gentleman declines to yield.

Mr. WITHERSPOON. The Secretary of the Navy has told us that these navy yards ought all to be abandoned except three. He mentioned three that he said absolutely ought to be abandoned. One of the bureau chiefs has explained to us how it increases the expenses to have so many navy yards. We have 10 navy yards and 18 naval stations. The result is that a certain navy yard will want a large crane, for example. Another navy yard wants a crane. If the work of two were concentrated in one, you would need but one crane.

Another illustration is that a great deal of money has to be expended to dredge and deepen the channels of the rivers and harbors to enable our vessels to get to those navy yards. Where you have 28 navy yards and naval stations you have got to dredge and deepen the channels in 28 places, whereas if you had them all at one place you would have to provide a channel only for one. It is pointed out to us that if they were concentrated in two or three places you would not need nearly so many power plants, and you would not need so many of nearly everything in the Navy, and it would greatly reduce the outlay and promote economy to concentrate the work in a few places. That is the argument, and the department has been contemplating, according to the Secretary of the Navy himself, the abandonment of nearly all of these navy yards. And yet it is proposed to squander two or three million dollars in those useless navy yards. We protest against that.

Now, I want to point out to you how this same folly has been exercised in the past. We expended $12,000,000 on the navy yard at Pensacola. We expended, if I recollect rightly, about three and one-half million dollars on the navy yard at New Orleans. After all that money was wasted, then we discovered that we did not need either one of those navy yards, and we have actually abandoned both of them.

Another illustration: We invested nearly $2,000,000 in some coaling stations. There has never been but a small amount of coal put in those coaling stations. After the money was wasted and squandered, we discovered that we did not need them, and both of them have been abandoned.

I could give you, if I had time, many other illustrations of this folly. The folly of the past consisted in not discovering that we would not need those navy yards before we expended the money. But you are asked now to commit the worse folly of squandering this money after you have found out that it is going to be useless. [Applause.]

And so we insist that the bill, as to all of those items of the class I have discussed, should be amended, and that these items should be stricken out.

So much for the contention which the minority makes as to that portion of the appropriation of $105,587.53 which the minority report submits should be stricken out of the bill. But the point that we want to emphasize and impress upon the House is that that item is nearly $3,000,000 more than it was last year, not because there is anything in it too great, with the exception of the feature I have pointed out, but that it is increasing and has increased solely on account of the continual increase in the number of vessels; and as long as we continue to add new vessels to our Navy this item for its maintenance is going to continue to increase by leaps and bounds, and it will be only a few years until this Committee on Naval Affairs will surpass the Committee on Pensions in the amount

of money to be expended for the maintenance of the Navy unless you stop building these new vessels.

Whenever you add one more battleship to the Navy that necessitates more men. It necessitates more coal; it necessitates more powder; it necessitates more pistols; it necessitates more clothing and more food. The fact is, it increases every expense in the department. The cost of a battleship is not the $16,000,000 we have to pay to construct it; but no man knows what it does cost, because it increases the expense in every bureau and department of the Navy. A battleship causes all the expenses of the Navy to rise, just as the revolutions of the moon cause the tides to rise, but, unlike the moon, it never causes them to ebb. [Applause.]

And so I leave this, with the thought that you must either make up your mind that you are going to let this naval appropriation run up rapidly until it gets so big that the American people will turn us all out of office, or you have got to stop the increase in the number of vessels. That is the conception that the minority have of this bill.

In regard to the second item in the bill—$22,000,000 for the completion of the construction of vessels heretofore authorized—we do not object to that. Those vessels are partly completed. The Government is under contract to complete them. If we did not complete them, we would lose the millions we have already spent upon them, and we see no way to reduce that item of $22,000,000. The only thing I want to say about that is that it is $22,000,000 in this bill, but it will not be $22,000,000 in the next bill if you pass this building program.

Notwithstanding the gentleman from Tennessee [Mr. PADGETT] said we had $5,000,000 too much in our estimate of the building program, I have obtained my figures in a way that makes me believe I am correct when I say that it is $46,000,000.

Now, we appropriate $18,946,325 for the first year's work, and that leaves $27,472,600 to be provided for in the next appropriation bill. And not only will that $27,472,600 have to be provided for in the next fiscal year, but you must have in the next appropriation bill an amount to complete those five great dreadnoughts now in process of construction that are not completed by that time, and the whole thing will run this $22,000,000 up above $80,000,000 in the next appropriation bill if you pass this building program.

We ought to look ahead and know what is going to confront us in the future. It is just this way: You might go down town here and buy $10,000 worth of diamonds if you could get a man to sell them to you on condition that you pay $5 cash and the balance next year, and it would be the next year that that balance would put you to your trumps. [Applause.]

Mr. Chairman, I want to call the attention of the committee to the third part of this bill, and that is the portion which proposes to build two battleships costing $16,345,275 apiece, or $32,690,550 for both; six torpedo destroyers that will cost $7,657,810; four submarines that will cost $2,478,936; a transport that will cost $2,051,179; and a supply ship that will cost $1,534,450. I speak in round numbers, but if you will add up all those amounts you will find that they aggregate $46,418,925.

It is manifest that no substantial reduction can be made in this bill if this program for the increase of the Navy is adopted, and the principal question presented by the bill is whether this enormous increase is wise or necessary. The wisdom of this proposed expenditure depends upon the question whether we now have an adequate Navy or not.

I admit that our Navy is inadequate for a great many purposes. It is inadequate for the purpose of conquest. If we were to undertake to conquer England, Germany, France, and Japan, we would find that we have an insufficient fleet for such purpose, and I hope that our Navy will always be inadequate for any such purpose. It is also inadequate to gratify the greed and avarice of those who annually make millions of dollars out of the construction, repairs, coal, powder, armor, and armament necessary to maintain and increase our Navy, and for such purpose the Navy would be inadequate if we had a thousand battleships. It is also inadequate to gratify the wild-eyed extravaganace of those who measure all political wisdom by the magnitude of the fund to be squandered. It is also inadequate to defend our country from invasion in case all the great countries of Europe should unite in a war against us, and I am not in favor of building any Navy adequate for defense in such case, both because I believe we will never be confronted with any such misfortune, and also because in such case I believe the wisest course would be to permit them to land their armies on our shores and depend upon such armies as we could raise to determine again the oft-decided question whether America can be conquered. But for the purpose of defending our country against attack from any nation on earth I confidently believe that our Navy is amply sufficient and fully adequate, and for any other purpose we need no Navy at all.

The question is whether the efficiency and adequacy of the American Navy and the public defense require the addition of all these vessels to our Navy. No man can intelligently determine that question unless he gets into his mind what the Navy is at present, and I want to call your attention to the meaning of the words "American Navy" and what those words signify.

For the legitimate and reasonable purpose of the public defense we have a Navy whose officers and enlisted men number 65,614 and whose vessels, of all kinds, number 277. Among this large number of vessels there are included 38 battleships, of which 33 are ready for service and 5 are in process of construction; 11 armored cruisers; 63 submarines, of which 47 are complete and 16 in process of construction; 28 torpedo boats, 54 destroyers, and other auxiliary vessels. The 38 battleships are equipped with one hundred and forty-eight 12-inch guns, thirty-two 13-inch guns, and fifty-two 14-inch guns. The one hundred and forty-eight 12-inch guns can shoot a steel shell weighing 870 pounds 12 miles, the thirty-two 13-inch guns can shoot a steel shell weighing 1,100 pounds 13 miles, and the forty 14-inch guns can shoot a steel shell weighing 1,400 pounds 14 miles, nearly twice as far as the human eye can see a battleship on the ocean. Each of these huge guns can shoot three of these immense shells every minute, or, altogether, they can shoot 696 of these terrible missiles of destruction every minute, and in five minutes they can shoot 3,480 steel shells weighing in the aggregate 223,240 pounds. In the discharge of each gun there is between 300 and 400 pounds of powder. In addition to this we have guns of smaller caliber which no man can number.

If that many shells a minute, if that many shells in every five minutes—shells weighing 223,000 pounds of steel—if that is not enough to make the Navy adequate, I would like to know how many it would take. [Applause.]

In order for the committee to more clearly understand the adequacy of our Navy I want to compare it with the other navies of the world.

Comparing our Navy with that of Japan, ours has one hundred and forty-eight 12-inch guns and theirs 84, a difference of 64 in our favor. Ours has thirty-two 13-inch guns and theirs has 56, a difference of 24 in their favor. Ours has fifty-two 14-inch guns and theirs has 12, a difference of 40 in our favor. Ours has, in large guns 12 to 14 inch, 232 and theirs 152, a difference in our favor of 80.

And yet some people are kept from sleeping at night on account of visions that they have of the American Navy being sunk to the bottom of the sea under the weight of Japanese shells. [Laughter and applause.]

Comparing our Navy with that of France, ours has one hundred and forty-eight 12-inch guns and theirs has 118, a difference of 30 in our favor. Ours has thirty-two 13-inch guns and theirs 54, a difference of 22 in their favor. Ours has fifty-two 14-inch guns and theirs none. Ours has a total of 232 large guns and theirs a total of 172 large guns, a difference of 60 in our favor. And yet they will tell you that we ought to build more battleships because France is doing it.

Comparing our Navy with that of Germany, ours has one hundred and forty-eight 12-inch guns and theirs 198, a difference of 50 in their favor. Ours has thirty-two 13-inch guns and theirs no 13-inch guns. Ours has fifty-one 14-inch guns and theirs has 40, a difference of 11 in our favor. Of the large 13 and 14 inch guns ours has 232 and theirs a total of 238, or a difference of 6 in their favor.

But while Germany has 6 more of these large guns, yet this preponderance in her favor is on account of her having 50 more 12-inch guns. We have a large preponderance of 13 and 14 inch guns over Germany, and, as I will show you later, we have so many more larger guns that they more than overcome the difference of the 6 in favor of Germany.

Now, comparing our Navy with that of England, she surpasses us 162 guns of the 12-inch type and 152 guns of the 13-inch type. But she has no 14-inch guns and we have 52. I admit that the English Navy is much more powerful than ours, but when you remember the fact that in the case of a war England would be compelled to divide her Navy into a great many fleets or leave her vast possessions in every part of the world unprotected, it is not so clear that even England could send against us a fleet which we would be unable to resist.

But if it be true that we have not enough ships, if it be true that these 232 guns on our battleships are insufficient to defend us in an attack, then I submit to this House that no increase in the number would help the matter. If we were engaged in war with some other country and our guns were to shoot 696 of these immense shells at them every minute, 3,480 of them, weighing 23,000 pounds, every five minutes, if that did not destroy them, then no amount of shells could destroy them.

It is just like if you had 232 men around the Washington Monument well supplied with baseballs, and they were throwing those balls at the monument and it did not fall, would you say that the trouble was that they did not have baseballs enough to knock it down? Would not you know that the reason it did not do it was because the balls did not have the destructive force necessary to destroy it? [Laughter and applause.]

It is the same way if you had 38 American battleships shooting at a fleet of the enemy, and with all these 696 shells flying every minute it did not destroy them, it would demonstrate to any sensible man that these shells would not do it for the lack of sufficient destructive force, and to multiply them would not help the matter at all. [Applause.] The truth of the matter is it is almost inconceivable how you could use any more battleships than we have. It is impossible to conceive, and your committee has had before it no testimony to show how more than 38 battleships could be used to advantage in a naval battle. When these battleships are taken out on the ocean to search for an enemy they go in line. I was present last year on these ships for four days when they were engaged in target practice. The admirals explained to me that the manipulation of the ships in target practice was made such as to be as near as possible to what it would be in an actual engagement. If our fleet were sent out on the ocean to search for an enemy and destroy it, the front ship would be 9½ miles ahead of the rear ship, and if it should meet the enemy the front ships would destroy one another before the hindmost ones would get close enough to begin to engage in the battle, and if the enemy had twice as many ships as we had, in such a case as that their line would be 19 miles long, and the battle would be over, so far as all those in front were concerned, hours before the last ship in the enemy's line would get in sight. But suppose that our Navy should start out to hunt the enemy and the ships should travel abreast, there has to be a certain distance between the ships. If it should meet an enemy that had twice as many ships as we had, its line would be twice as long as ours, and consequently the ships in our line would engage in battle with those in the enemy's line opposite to ours. The ships of the enemy in that part of their line not opposite to ours would be too far off to take part in the engagement at all. Of course, if these naval battles were going to last for hours and days like a battle on land, it would be different, but with these immense, destructive shells, a naval battle can not last but a few minutes. If the guns can strike the enemy's ships and they have the destructive force to destroy them, the battle would be over in a very few minutes, and consequently those ships in the line of the enemy double as long as ours, which were not opposite to ours, would not be able to take part in the engagement until it was over.

It is just for this reason that you can use only a certain number of battleships in a battle. One of the admirals of the Navy told me that 16 was the number. The impossibility of using 38 battleships in an engagement is the very reason we have divided our Navy into two fleets. One is called the active fleet and the other is called the reserve fleet. The fact is that we have so many battleships that we take half of them and tie them up and call them the reserve fleet, to be used in case the active fleet is defeated.

I say that the number of battleships does not determine the adequacy and efficiency of the Navy, but that it depends upon other things. These conditions of success are the character of the powder, of the guns, of the shells, and of the men behind the guns.

First, it depends on the powder. If we have manufactured a kind of powder that is so much greater in force and of so much greater uniformity than that of the enemy, then our guns will shoot with more accuracy and with more destructive force; and if that be great enough for our shells to penetrate the armor of the enemy's vessels and their powder is not of sufficient force to penetrate ours, it is perfectly manifest to a man of common sense that our fleet would destroy the enemy's fleet, even though the enemy had ten times as many ships as we have. That is one of the real conditions—powder.

Another condition is the character of the guns. The superiority of the guns is a condition that would determine the result of the battle. The size and mechanism of the guns are far more important than their number. It has been explained to the committee by the experts that a 14-inch gun has a destructive force 50 per cent greater than a 12-inch gun, and that on account of the flatness of the trajectory, the winds, and other causes explained to the committee it shoots with 30 per cent more accuracy than a 12-inch gun. On that point I will read to the committee what Admiral Twining says:

The CHAIRMAN. What is the result of your tests of 14-inch guns? Are they entirely satisfactory?

Admiral TWINING. Yes, sir.

The CHAIRMAN. What is the comparison between the 12-inch 50-caliber gun and the 14-inch 45-caliber gun? I believe those are the calibers.

Admiral TWINING. The 12-inch 50-caliber is the latest type of 12-inch gun.

The CHAIRMAN. What do you regard as the destructive force, the power of those two guns, speaking relatively, at 10,000 yards?

Admiral TWINING. I suppose the destructive force of the 14-inch gun is 50 per cent greater than the 12-inch at that range.

The CHAIRMAN. What is the relative percentage of accuracy of the two guns at that distance?

Admiral TWINING. The 14-inch gun is probably 30 per cent more accurate at extreme range.

Mr. FOSS. What do you base that on?

Admiral TWINING. The flatness of the trajectory and the fact that the 14-inch shell, having almost twice the weight of the 12-inch, will keep its steadiness of flight much longer and be affected much less by winds and other external conditions toward the end of its trajectory. Whereas the comparison would be in favor of the lighter shell with greater velocity over the first part of the trajectory, in the latter part the comparison is in favor of the heavy shell.

The CHAIRMAN. What is the accuracy at different distances, say 10,000 yards?

Admiral TWINING. At 10,000 yards I should estimate that the 14-inch shell would have in the neighborhood of 5 per cent more accuracy than the 12-inch.

The CHAIRMAN. And what would be the difference at 5,000 yards?

Admiral TWINING. There wouldn't be very much difference at that distance. It would be slightly in favor of the 12-inch.

The CHAIRMAN. What is the difference as to destructive effect?

Admiral TWINING. That is based on the greater probability of hitting and the greater effect of a hit. A shell weighing 1,400 pounds will have more effect when it hits than a shell weighing 870 pounds, and its bursting charge is 50 per cent greater.

Mr. FOSS. How far will a 14-inch gun throw a projectile?

Admiral TWINING. We used to have a thumb rule that a gun would fire a mile for every inch of caliber. In that case the 14-inch gun would fire 14 miles, and I think it would not fall far short of that.

If that statement is accurate, then the fact that our Navy exceeds the navies of Germany, France, and Japan so much in the number of large guns would show that our Navy would be more than a match for any one of them.

Assuming this statement to be accurate, then if the entire German Navy were engaged in a battle with ours, and if the positions could be so arranged that every ship on both sides could take part at the same time, then our eighty-four 13 and 14 inch guns, on account of their 50 per cent greater destructive force and of their 30 per cent greater accuracy, would inevitably soon put her ships with one hundred and ninety-eight 12-inch guns out of action, and on account of the greater number of our largest guns we would be more than a match for her ships with 14-inch guns.

If all of our ships were at the same time engaged in a naval battle with the French fleet, the excess of thirty 12-inch guns in our favor and the excess of thirty-two 13 and 14 inch guns would leave no doubt as to the result.

And in the case of a naval battle with Japan, the excess of sixty 12-inch guns in our favor and the excess of sixteen 13 and 14 inch guns in our favor makes our great superiority unquestioned.

But, Mr. Chairman, the efficiency of the Navy depends more upon the man behind the gun than upon anything else. It is the patriotism, the courage, the nerve, the willingness in the hearts of the men behind the guns to die rather than to see the flag go down that will enable them to shoot with the accuracy which will bring victory. [Applause.] On this point I want to call attention to the fact that the provisions made for the American Navy guarantee and assure us in the best possible way that we have secured the best officers on the face of the earth. The rigid examinations for entrance to Annapolis, the rigid examinations for passage from one class to another, and then the rigid examinatons that are kept up after they become officers, whenever the time comes for them to be promoted from one rank to another, eliminates the inferior and leaves as the officers of our Navy the very highest grade of men. Besides that, we have now a great number of schools giving postgraduate courses in which our naval officers are taught and made experts in every department of naval knowledge, and these provisions make me believe that we have the best officers and the best Navy in the world. [Applause.]

If instead of exhausting our resources and impoverishing our overtaxed people in building more ships we would devote more attention and spend a little more money in torpedoes, mines, powder, target practice, and supplying the ships already constructed with an adequate number of trained officers we would, in my judgment, make the wisest possible provision for the adequacy of the Navy and for the public defense, and at the same time save the people millions of dollars.

But if I am mistaken in all this, if it be true that our Navy is not adequate and efficient, I have the consolation of knowing that I have a great deal of good company with me, and I want to call attention to that. Whether or not the efficiency and adequacy of the Navy would be increased by adding more ships to our battle fleet is a subject I want to tell this House the committee that reported this bill has never given any attention to at all. If it be true that we need more battleships the committee has not tried to find it out. We started out on the assumption that we were going to have them, necessary or not

necessary, and we have never gone into the question of whether there was any reason for having them or not. [Applause.] There has only been one question asked, and I want to call attention to that. The gentleman from Ohio [Mr. BATHRICK], who is always of a somewhat inquisitive turn of mind and anxious to discover the truth, is the only member of this committee who ever propounded a single question to find out whether it is necessary to have more battleships, and he propounded it to the Secretary of the Navy in these words:

Mr. BATHRICK. You have stated that it was necessary to build battleships. What are your reasons; why do you believe it necessary?

Secretary MEYER. I believe it to be necessary in order to have a fleet that will meet the possible requirements of emergencies that might arise. Otherwise, if you are not going to have a fleet that will meet emergencies that may arise, a fleet made up of vessels of a character which other navies which may come in contact with us are building, it would be better to have no Navy and no fleet; better than to have a lot of vessels which would be crushed like a lot of pasteboard boxes.

Look at that answer. He was asked to give the reasons why it was necessary to build more battleships. The question meant, why is it that 38 battleships are not enough; it meant why 232 big guns are not enough; it wanted to know what good it would do to have a greater number. That is the meaning of the question, and the Secretary's answer is, to provide for emergencies that may arise in the future. Well, is that any answer to say that we want to provide for emergencies that may arise, or does it explain why 38 battleships would not provide for the emergencies that might arise; is that any answer why 41 would provide for them and 38 would not? Mr. BATHRICK was not to be put down by any such answer as that and so he said this:

Mr. BATHRICK. I rather expected to get some reason other than "may" or "might." I thought, perhaps, that you might have some specific special reason.

Secretary MEYER. I do not want to for this reason: The other day I talked rather freely about the Caribbean Sea and the Pacific, and it was all in the papers the next day. You have asked a question which it is perfectly proper to ask, and I will sit down and discuss it with you some time, but I do not want to embarrass foreign relations by making statements which might be misunderstood and create offense where none is meant to be given.

Then you are confronted with this situation: When the Secretary of the Navy is asked to tell us whether we should build more battleships, why he believes it is necessary, he declines to give any reason on the ground that it might get into the newspapers.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HENSLEY. Mr. Chairman, I ask unanimous consent that the gentleman from Mississippi may conclude his speech.

The CHAIRMAN. The gentleman from Missouri [Mr. HENSLEY] asks unanimous consent that the gentleman from Mississippi may conclude his speech.

Mr. HOBSON. Mr. Chairman, I hope no one will object to that.

Mr. MANN. Mr. Chairman, reserving the right to object, I would like the information from some one as to how long general debate is to run on this bill. If some gentleman desires to ask unanimous consent for some length of time, I shall not object.

Mr. MURRAY. Mr. Chairman, I ask unanimous consent that the gentleman from Mississippi be given 15 minutes to continue his remarks.

Mr. BUCHANAN. I ask that he be given half an hour.

The CHAIRMAN. Is there objection?

Mr. MANN. I object to the request to continue until he concludes.

Mr. GREGG of Texas. Mr. Chairman, I ask unanimous consent that the gentleman may proceed for 40 minutes longer.

The CHAIRMAN. The gentleman from Texas asks unanimous consent that the gentleman from Mississippi may proceed for 40 minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. WITHERSPOON. Mr. Chairman, the Secretary of the Navy has not only declined to give any reason to the committee and the committee has not only no reason to give to this House which it got from the experts, or in the evidence before us, but the Secretary of the Navy has plainly told us that we did have about as many battleships as we need. He was asked this question:

Mr. GREGG. Twenty-one in the first line.

Secretary MEYER. The ideal number which the Navy Department hopes to work up to is a fleet of 41 battleships, with necessary auxiliaries, 21 in the active fleet and 20 in the reserve fleet.

According to that statement of Secretary Meyer, the ideal number of battleships is 41, and we already have 38.

Again, on page 21 of his annual report, the Secretary uses this language:

A total of 41 battleships, with a proportional number of other fighting and auxiliary vessels is, in the opinion of the Secretary, the least that will place this country on a safe basis in its relations with other world powers. This number should be reached as soon as practicable, and then the fleet should be kept up to its standard strength by replacing obsolete vessels with new ones by a uniform yearly replacement program.

In other words, Mr. Chairman, the Secretary of the Navy himself refutes the idea that we must have a yearly program and continue to build battleships every year. He clearly tells us there is a limit to the number of battleships beyond which it is useless to go. He fixes this limit at 41, and declares that is the ideal number, but he declines to give us any reason at all why 38 is not just as ideal as 41, and I think it would be an impossibility for any human being to sit down and figure out and prove how 41 battleships with 30 more guns on them would do any more good than 38 with 232. The truth is that we have long since passed the ideal number of battleships that could be effectively used in a battle, and the building of more is a useless waste of the people's money.

But not only the present Secretary of the Navy has told us this, but it was not the first time that the Congress has been so advised by the officers of the Navy Department. We have had that information before, and I call your attention to the fact that the Secretaries of the Navy have means of information which we have not. They are in constant contact with experts on this subject. They have nothing to do but study this question, and they learn more about it than we can possibly learn.

Now, I want to call your attention to what the Secretary of the Navy said in 1905. He used this language in his annual report:

The aggregate of our battleships, armored cruisers, coast-defense vessels, built, building, and authorized, would seem, according to present indications, sufficient to provide for any contingencies within the limit of probabilities.

That is what he said about the Navy in 1905. This statement of the Secretary of the Navy was indorsed by the then President of the United States in his annual message in these words:

It does not seem to me necessary, however, that the Navy should, at least in the immediate future, be increased beyond the present number of units. What is now clearly necessary is to substitute efficient for inefficient units as the latter become worn out or as it becomes apparent that they are useless.

Mr. SHERWOOD. What is the date of that?

Mr. WITHERSPOON. Nineteen hundred and five.

Now, I want to call the attention of the House to the fact that in 1905, at the time the Secretary of the Navy advised Congress that our fleet was then sufficient to provide for all contingencies within the range of probability and at the same time when the President of the United States in his message informed Congress that the units of the Navy should not be increased, our Navy consisted of 24 battleships, 12 completed and 12 under the process of construction. Since that time we have constructed 1 more battleship and 13 *Dreadnoughts*, which have more guns and more powerful guns, and which more than double the capacity of the Navy. If a Republican President and a Republican Secretary of the Navy believed, as they said they believed in 1905, that our Navy was sufficient to provide for everything within the range of possibilities, and that the units should not be increased, and if since then we have more than doubled our Navy, then I ask Democrats if they think we ought to add still more to it? [Applause.]

And I call your attention to the position of the highest authority on naval affairs in this House, the chairman of the Committee on Naval Affairs, the gentleman from Tennessee [Mr. PADGETT], who said, in his speech to the House in 1908, that he protested against adding four more battleships to our Navy, and he declared on the floor of the House that the Navy as it then existed was magnificent. Since that time we have added nine dreadnoughts to the Navy, and if it was magnificent then I defy any Member of this House to suggest an adjective that will accurately describe it now. [Applause.]

In 1911 there was a mobilization of a part of our fleet at New York. The number of vessels present was 123. President Taft was present, and he made a speech on that occasion, and in that speech he described the Navy as magnificent. He boasted that he had there under his eyes the fastest and the most powerful dreadnoughts in the world. That was the opinion of President Taft. The fact is that over a period of 120 years, from the time that John Paul Jones first unfolded the flag to the breeze of the English Channel down to this time, our Navy has always been efficient, adequate, vast, magnificent, glorious, and victorious; but when it stands in the way of extravagance and greed it sinks down to the low level of inefficiency and inadequacy. [Applause.]

But if all this evidence is insufficient to show that our Navy is fully adequate for the public defense and that its increase in the number of units would not increase its efficiency, then we submit that the expenditure of $46,418,925 more would not help

the matter. Since 1883 we have spent on our Naval Establishment $1,963,094,608.77, and of this vast sum $202,195,607.83 has been invested in battleships, besides the five now under construction, which will run the amount up to $250,000,000. If this vast sum will not secure an adequate battleship fleet, it is useless to spend more. Excepting England, we have spent more already than any other nation of the world. We have in the last decade spent $410,455,321 more than France, $452,666,114 more than Germany, and $1,019,890,156 more than Japan.

The greatest total naval expenditure in one year by Germany was, in round numbers, $110,000,000, or $26,000,000 less than we spent in 1911. The greatest spent by France in one year is $89,000,000, or $47,000,000 less than our greatest expenditure. The greatest amount ever spent by Japan in one year was $46,000,000, or $90,000,000 less than our greatest annual expenditure. If with this enormous expenditure of money we have not been able to build a fleet adequate to protect us against any of these powers, then we had better place our reliance on other means and not depend on naval vessels.

And, again, if our Navy is inadequate to the public defense for the want of a sufficient number of vessels, then it will not help matters to build more, for the reason that we have not and can not procure the officers to man them. The testimony before the committee shows that we lack 3,000 officers and 6,000 enlisted men necessary to operate the ships we have. The enlisted men have to be trained and officers have to be educated before they are competent to take charge of war vessels. Battleships without officers and men are useless, and at the present rate of graduation it will take the Naval Academy 20 years to supply the ships we already have with officers. It is therefore nothing less than folly and the most inexcusable extravagance to continue the building of more ships when we know that we can not use them.

If the public defense were the object to be attained, if the efficiency and adequacy of the Navy were the purpose in view, if the profits to be made out of the construction of more ships were not the inspiration of the clamor for them, we would take a few of the $46,000,000 which the bill proposes to expend on new ships and invest them in the enlargement of the Naval Academy, so as to provide the officers necessary for the ships we have.

I submit, however, that the correctness of the position taken by the minority of the committee will become still more apparent if you will just consider the arguments put forth in favor of increasing the Navy. The clamor for a bigger Navy is so dogmatic and insistent that it is perfectly plain that if there were any good reasons to be given for it they would be given, and if the reasons given for it are fallacious, it is the best assurance that no good ones exist.

I want to call your attention to these pretended reasons. I am frequently told the Navy is an insurance, and the Secretary of the Navy himself states in his annual report that it is an insurance, and uses that as an argument.

Any resemblance between the Navy and a policy of insurance is impossible for me to detect. Insurance is a contract by which the insurer, for a small amount of money called a "premium," agrees to pay a much larger amount in the contingency insured against. Now, what resemblance has a navy to that?

In the last 20 years we have had one war which, according to the best estimates, cost us about $300,000,000. During that time we have spent $1,963,094,608.77 on the Navy. In other words, if that be regarded as the premium on the insurance, we have paid as a premium six times as much as the loss itself and then paid the entire loss besides. [Applause.] And yet this loose, nonsensical talk about insurance finds lodgment in the minds of sensible men.

But if it is meant by saying that a navy is an insurance against war in the sense that it will prevent war, I deny that proposition. Japan and China both had navies, but that fact did not keep them out of war. Russia and Japan both had navies; it did not keep them out of war. The United States and Spain both had navies, and it did not prevent a war between them. England had a great navy, but that fact did not keep her out of war with the Boers. The fact is that three-fourths of the nations of the earth have no navies at all, and they do not have as many wars as these great countries with navies have.

Mr. SHERWOOD. How about the navy of Italy in the war with Turkey?

Mr. WITHERSPOON. Yes; that is another example. Since the destruction of the Russian fleet and of the Spanish fleet and of the Chinese fleet, and since Russia and Spain and China have ceased to have any fleet at all, they have not had any wars. The fact is that nations, just like individuals, are led into wars by their passions. It is the feeling of some real or fancied wrong, or the greed and avarice for aggrandizement or commercial advantages, that leads them into war, and it does not make any difference whether they have navies or not. People are going to fight just as long as human nature remains as it is, and navies can not prevent it.

I would rather depend upon the Bible of God than upon these engines of destruction to protect us against war. [Applause.]

But it is told around on every side that we ought to build more battleships because we have a number of battleships that are obsolete. They tell us that when a battleship is 20 years old it becomes obsolete and should be discarded and not counted. If that were a good argument it would have no application here, because the oldest battleships we have—the *Massachusetts*, the *Iowa*, the *Indiana*, and the *Oregon*, built in 1896 and 1897—are just 17, 16, and 15 years old now, and if the 20-year argument is a good one why not just wait until the time comes before you make it?

But I say that there is nothing in that. Admiral Dewey tells us that the hull of a battleship will last 100 years, and so far as the guns are concerned, they are just as good as they were when those ships were new. Each one of those battleships has four 13-inch guns—four guns that take three or four hundred pounds of powder in them to shoot a shell—and they will shoot that shell 13 miles with the same accuracy and with the same destructive force as they did when they were first made.

How, then, does a vessel become obsolete? The only thing that wears out about these guns is the lining. After you have fired them 300 times the erosion caused by the smokeless powder prevents them from shooting with the same accuracy as before. But we have expended thousands and thousands of dollars in keeping all our guns relined, and the testimony of our experts on that subject is that when you reline a gun it shoots with the very same accuracy and with the very same destructive force that it did when the gun was new.

But the Secretary of the Navy himself tells us that the policy of the Government has been and is now to keep all these ships, with their guns, up to a state of efficiency according to the original design; and, in accordance with that policy, within the last few years these old battleships, with their armament, have been repaired and renewed and made like new. Their mounts and their turrets have been modernized. On the *Oregon* alone they have expended $627,000 to make her as good as she ever was. Now, if these old ships are so soon to die of old age, then I say it was criminal extravagance to waste all that money on them.

But the money has not been wasted. These guns will shoot just as well as they would when they were new, and this pretext about these ships being obsolete is just one of those inventions to induce us to squander the public money. That is all there is to that.

But we are told that if we stop building battleships it will be only a few years before we will sink to fifth place among the navies of the world. That is an argument that is frequently advanced. That contention is based on a comparison between our Navy and the navies of foreign countries, and a comparison which leaves out of consideration 25 of our battleships, which 25 are to be regarded just like the drinks of Rip Van Winkle—they are not to be counted at all. [Laughter.] And it is based on the assumption that these advocates of a larger navy know what foreign governments are going to do in the future. In other words, they are prophets. They can tell you what foreign governments are going to do next year and the year after. Secretary Meyer says it is very difficult for the department itself to find out about these matters.

So, not counting the 25 of our battleships and then counting how many battleships other countries are going to build in the future, they have a process of counting by which the American Navy will sink to the fifth place in a few years. Of course that is based on the assumption that the strength of a navy is proportionate to the number of guns, which I have shown is not correct. But if that be true, I submit to this committee that it is useless to spend any more money. Since 1883 we have spent nearly $2,000,000,000 on our Navy. Of that vast sum $202,000,000 has been invested in battleships alone, not counting the five great dreadnoughts that are now in process of construction, and when they are completed we will have invested more than $250,000,000 in battleships alone. Within the past 10 years we have spent $452,666,114 more than France has spent. We have spent $410,455,321 more than Germany has spent. We have spent over a billion dollars more than Japan has spent. The highest expenditure that Germany has ever made in one year is $110,000,000, which is $29,000,000 less than we spent in 1911. The greatest expenditure that France has ever made in one year is $89,000,000, which is about $50,000,000 less than we spent in that year; and the greatest amount that Japan has ever spent in one year is $46,000,000, which is just $90,000,000 less than our highest annual naval expenditure. We have spent in the last 10 years $109,146,906 more than Ger-

many and Japan both together. In other words, for the last decade we have spent $10,000,000 every year more than both of those countries put together. We have spent $66,936,173 more than France and Japan both together have spent in the last 10 years, or $6,000,000 more every year for 10 successive years than both of those nations combined. And I say that if the expenditure of this money has not given us an adequate Navy, we had better quit and depend on something else for our defense. [Applause.]

This contention really is that we ought to build more ships, not because our Navy is inadequate, but because foreign Governments will build more. The truth is that foreign Governments have been struggling to keep up with us. When within 10 years we spend $410,455,321 more on our Navy than France, $452,666,114 more than Germany, and $1,019,890,156 more than Japan, it looks like the cheek of logic to contend that we ought to spend more because they will do so. We build more ships because they do and they build more because we do, and so all the enlightened nations of the earth, according to this contention, are running a race of folly to build useless ships each because the other does. Since Germany, France, and Japan have all these years been under our influence and have been impoverishing their people to build useless battleships because we have set them the example, the only logical conclusion is that if we were to abandon this foolish policy these great Governments of Europe would follow us in our wisdom more readily than they followed us in our folly. At any rate, we do not favor that monkey-like statesmanship which imitates the follies of foreign Governments.

Now, in conclusion, I want to say that the expenditure of $46,418,925 for new ships is an inexcusable, unjustifiable, criminal waste of the public funds. [Applause.] And I appeal to the majority in this House to stand up for economy. I appeal to you to vindicate the wisdom of the Democratic caucus, which determined three different times that we did not need any more battleships, and that determination stands there unreversed and unrescinded to-day. It is the last expression of the party on that subject.

Not only that, but every Democratic platform from 1832 down to the present time has pledged the party to economy, and it is now up to us to say whether we will stand on the promises that brought us into office, or will ignore and break them after we have gotten the goods that we obtained by making them.

If there is anyone who is not willing to respond to the appeal to comply with Democratic promises, then I want to make this appeal, that they be at least as good as the Republicans have been in the past. The Republicans have had sufficient regard for economy and for the condition of the Treasury, they have had sufficient sympathy for the toiling masses of the people, who are groaning under the burdens of taxation and looking with longing hearts and expectant hopes to us for relief—the Republicans have had sufficient regard to these things during five different years to refuse to authorize any battleships at all.

In 1891, in 1893, in 1894, in 1897, in 1901 the Republicans did not authorize any battleships. In 1892, in 1904, in 1906, and 1907 the Republicans showed a sufficient regard for the condition of the Treasury, and a sufficient regard for economy, and a sufficient sympathy for the overburdened people of this country to refuse to authorize more than one battleship. And I now put it up to Democrats to show the country whether it is possible for them to be as good as Republicans. [Loud applause.]

Mr. BATES. Mr. Chairman, on Monday last, the 17th of this month, a very different scene was presented in this Chamber, a much more interesting scene than this. Members were present in their seats to the number of about 300, and each Member with bated breath was asking his fellow Member, "Will the bill pass?" There was no declaration of war, Mr. Chairman, about to be declared, no great question of national import was under discussion; the question merely was, "Will I get that public building for my district?" and nearly all the membership of the House was here to obtain, if possible, that delectable piece of patronage. [Laughter and applause.] I venture the assertion, Mr. Chairman, that if we could take a battleship home to our district and run it up and down some local creek or river in one of the doubtful counties of our own home domain that every Member of the House would be present in his seat to-day crying for a vote on the pending measure and asking that the number of battleships be increased so that every district in this country of ours could have one.

But this is a different matter. This is a question which touches the subject of national defense and the general welfare of this country. My amiable and distinguished friend from Mississippi who has just taken his seat [Judge WITHERSPOON] informs us that wars are always the result of avarice and passion. If I read history correctly, the distinguished gentleman's ancestor was a signer of the Declaration of Independence. I should like to ask him what element of avarice or passion entered into his ancestor's heart when he with his compatriots entered into war for this country against the yoke of England? What element of avarice or passion entered into the hearts of the American people when, with one accord in 1898, we demanded of Spain that they cease their cruelties and withdraw from the island of Cuba?

Mr. Chairman, I am old-fashioned enough to have some regard for the words and the expressed sentiments of the great Americans who have gone before. We opened the exercises of this House to-day by reading the noble words of Washington on the occasion of his farewell.

Now, Mr. Chairman, I believe it is our bounden duty to regard the immortal words of that man, and these are the words of Washington to which I refer:

> The United States ought not to indulge a persuasion that contrary to the order of human events they will forever keep at a distance those painful appeals to arms with which the history of every other nation abounds. There is a rank due to the United States among nations which will be withheld, if not absolutely lost, by the reputation of weakness. If we desire to avoid insult we must be able to repel it; if we desire to secure peace, one of the most powerful instruments of our rising prosperity, it must be known that we are at all times ready for war.

What is an adequate Navy? I think all parties and all men agree that we ought to have an adequate Navy. The Democratic platform says so. The Baltimore convention announced only last summer:

> The party which proclaimed and has always enforced the Monroe doctrine and was sponsor for the new Navy will continue faithful to and observe the constitutional requirements to provide and maintain an adequate and well-proportioned Navy, sufficient to defend American policies, protect our citizens, and uphold the honor and dignity of the Nation.

The Republican platform declared:

> We believe in the maintenance of an adequate Navy for the national defense, and we condemn the action of the Democratic House of Representatives in refusing to authorize the construction of additional ships.

The Washington or Progressive Party declared:

> We favor an international agreement for the limitation of naval forces. Pending such an agreement, and as the best means of preserving peace, we pledge ourselves to maintain for the present the policy of building two battleships each year.

Those three expressions I have just read announce the determined policy of the three parties which contended for mastery last fall, and in a direct manner reflect the sentiments of the large mass of the American people. The President of the United States in his message this year said:

> I urgently recommend that the Congress make up the mistake of last session by appropriations authorizing the construction of three battleships in addition to destroyers, fuel ships, and other auxiliary vessels, as shown in the building program of the general board. We are confronted by a condition in respect to the navies of the world which requires us, if we would maintain our Navy as an insurance of peace, to augment our naval force by at least two battleships a year, and by battle cruisers, gunboats, torpedo destroyers, and submarine boats in a proper proportion.

Mr. Chairman, what is the advice of the Secretary of the Navy? I think he ought to know, from an administrative standpoint at least, what the needs of the country are and what is an adequate Navy. To quote from his report:

> Experience has shown the wisdom of systematic preparation for war. If we wait until a crisis comes it is then too late to make effective preparations, and the result is confusion, waste, and unnecessary loss of life. In any war involving the United States the control of the sea will be of the utmost and deciding importance. Such control can be obtained only by an efficient Navy of sufficient strength.

The question I ask of this House is, Have we an adequate Navy? Shall we recognize the truth of the proposition that the world moves? An adequate Navy depends not upon what our judgment may be concerning our armament of to-day, but it depends on how it compares with other armaments with which it may come in conflict in the coming days. I suppose, in the judgment of the gentleman from Mississippi [Mr. WITHERSPOON], the navy of Commodore Perry in Lake Erie, 100 years ago this coming June, was an adequate Navy then and ought to be to-day, or that the Navy that Farragut used at Mobile Bay was an adequate Navy then and ought to be to-day; or that the Navy which Dewey employed at Manila, and Sampson and Schley used at Santiago, was an adequate Navy 15 years ago, and therefore ought to be an adequate Navy to-day. Not at all, Mr. Chairman. I beg to call to the attention of the gentleman from Mississippi, and to the attention of every gentleman of this committee who listened or applauded or said amen to his words, that the world moves, that the battleships that we are building to-day are three times the size of the battleships employed by Dewey in the last engagements in which this country took a part.

Mr. LOUD. Six times as large.

Mr. BATES. Some of them six times as large, but our first-class battleships then, the *Iowa* and the *Indiana*, were ships of only about 10,000 tons, while the ships we are building to-day, like the *Pennsylvania*, are of 31,500 tons. The iron that they threw was thrown from 6-inch guns, 4-inch guns, and 8-inch guns. Our best ships were equipped with only two 13-inch guns, whereas the *Dreadnoughts* we are building to-day, to cope, if necessary, either in moral effect or in actual warfare, with the navies of the world have 12, 13, and 14 inch guns, so that one of the ships that we are building to-day is equal to three or four in fighting capacity of those that we built 20 years ago.

What is necessary to maintain an adequate Navy? My good friend admits in his first premise that he is willing to maintain an adequate Navy, and then adds that he thinks that we have an adequate Navy. He quotes the distinguished chairman of the Committee on Naval Affairs, the gentleman from Tennessee [Mr. PADGETT], who has presided over the Naval Committee not only with dignity and impartiality, but with fairness and rare consummate ability, delving with great diligence and research into the subjects which have come into the making up of this bill, and he quotes him as saying three or four years ago that we had a magnificent Navy and did not need four battleships. Suppose we did have a magnificent Navy four years ago. The world has moved in naval architecture and naval munitions even in the last four years.

Referring again to the very interesting remarks of the gentleman from Mississippi [Mr. WITHERSPOON], I would like to ask him why Japan won over Russia—the little nation over the big? It was because Japan was ready; Russia was not; because Japan had sunk five of the enemy's ships before her opponents realized that war was on. Why did Japan conquer over China? Because she had more money? No. It was because she was ready to strike first; she was prepared; she was known among the nations of the world; and she was ready to strike when the occasion arose. The war between England and the Boers was cited by my distinguished friend as an illustration that nations would engage in wars, although they had an adequate navy. Why, the Boers had no navy, and the English navy played little part in that internal warfare. That war was not a question of naval strength at all, except in the long run it gave England an advantage which its opponents did not at any time possess. Suppose, for instance, that the Boers had had a navy, not, perhaps, as large as England's or ours, but an adequate navy to repel England's transports; that might have prevented England from landing her troops in Africa; and have even won in the end if they had been equipped with even a navy. And I want, in passing, to call to your attention what the moral effect of a navy is of benefit before hostilities are entered into. I suppose gentlemen read in the papers last week—I know I did, and with a feeling of just pride—the fact that on the west coast of Mexico, when the battleship *Georgia* and three other battleships went into those harbors, the whole feeling of danger for Americans or danger for foreigners or foreign interests at once disappeared. The moral effect of the battleships there spread a sentiment throughout Mexico that the United States was ready; that we were prepared; and because we were prepared we have not had to strike a blow in Mexico, and, in my judgment, will not be required to, because we are ready to strike the blow if occasion should demand it. And for that reason when the United States speaks, when Mr. Knox, the Secretary of State, sends a note, he speaks with authority, and when Mr. Bryan, if he should be his successor, shall speak to Mexico for order and discipline and right regard for lives and property of foreigners in that Republic, the note coming from the office of the Secretary of State, not because it is couched in this or that language, not because they have regard for the statesmanship or brains that pens it, but because they have a wholesome fear of the battleships that are behind it, it goes with authority in Mexico and it will be heeded. [Applause.] Talk about insurance. The insurance that the Navy of this country means to this country and to its people is not an insurance in money, is not the insurance in mere valuable possessions, it is an insurance against the taking of life, it is an insurance against the shedding of blood, it is an insurance against the spending of untold millions in a long-drawn-out war, and it is my candid opinion that because this country, under the administrations with which it has been blessed for the last 16 years, has maintained a state of preparedness in case war should be imminent, has averted intervention in Mexico this year. A million or two here or there may be spent each year, with great propriety and economy too, to maintain the efficiency, to keep up the adequacy of our fighting units and our fighting strength.

Oh, they say, let us put it in public buildings, let us have it in our districts, let us have it count for our renomination or reelection where the people can see it, let us build roads; all good projects; agriculture, Indian affairs, the Interior Department, all splendid projects, but they all pale into insignificance, they all become as nothing, they all become as mere toys and flippant things compared with following the words of George Washington, to maintain an adequate defense and keep up our Army and our Navy so that in case peril should arise, in case war should at any moment be imminent, we shall be ready to strike the first blow and if possible bring about peace before hostilities shall actually commence by a settlement under the rules of honor and decency and international regard which we shall impose from time to time through the mouth of our Secretaries of State. [Applause.]

Now, Mr. Chairman, I again emphasize this proposition, that the words "increase of Navy" is a misnomer. If we should build or authorize three or four more battleships this year, as is recommended by the general board and the Secretary of the Navy, we would perhaps be increasing our naval establishment. The Secretary of the Navy, in his annual report December last, recommended 4 battleships, 2 battle cruisers, 16 destroyers, 1 destroyer tender, 2 transports, 1 ammunition ship, 6 submarines, 1 submarine tender, 1 supply ship, 2 gunboats, 2 sea-going tugs, 1 dry dock, and 1 submarine testing dock. I ask the members of this committee if in view of the request of the Secretary of the Navy, reflecting the recommendations of the general board, in view of the recommendations made in the bill that was reported practically unanimously from the committee, if that is not a modest program, to wit, instead of 4 battleships, 2 battleships; no battle cruisers, as were asked for; instead of 16 destroyers, 6 destroyers; no destroyer tender; instead of 2 transports, 1 transport; no ammunition ship; instead of 6 submarines, 4 submarines; 1 supply ship; no seagoing tugs; no dry dock; and no submarine testing dock?

If I should make no other point, I desire to make this one, that the present bill, with its 2 battleships, its 4 destroyers, its 4 submarines, its 1 transport, and 1 supply ship, is merely maintaining the present efficiency of the Navy. Why? Because, as the Secretary points out, there will be 4 battleships next year over 20 years old, and they will have to be withdrawn from the second line. They will not continue to be counted in the present strength of the fleet.

You ask me what battleships those are. Why, Mr. Chairman, their names are household words. They are the *Indiana*, the *Oregon*, the *Massachusetts*, and the *Iowa*. It was most fortuitous or providential for the people of this country that Secretary Whitney had the honor of inaugurating in a large degree what is called the modern Navy, and because there was foreknowledge enough to build those ships, whose names I have just read, we were saved from an everlasting disgrace in 1898.

Mr. O'SHAUNESSY. Then the gentleman disagrees with his colleague from Illinois [Mr. Foss] that the Democratic Party has never done anything for the Navy?

Mr. BATES. No. I think as a general proposition the gentleman from Illinois [Mr. Foss] is right. I will tell the gentleman from Rhode Island why: Mr. Secretary Whitney in a lucid interval arranged for the building of our first modern cruisers—at least they were modern for that time. After the War with Spain and we had demonstrated the wisdom of that action, how wise it had been on the part of the American people to be supplied with those battleships, and had saved ourselves from a national disgrace, the Republican Party has come into this Chamber every year since with an adequate naval program and the Democratic Party has opposed it.

Mr. O'SHAUNESSY. Will the gentleman yield?

Mr. FOSS. Will the gentleman yield?

Mr. BATES. Yes.

The CHAIRMAN. To whom does the gentleman yield?

Mr. BATES. I yield for a moment to the gentleman from Illinois [Mr. Foss].

Mr. FOSS. I will say to the gentleman from Rhode Island [Mr. O'SHAUNESSY] that the birthday of the American Navy was when we authorized the first ships of the present Navy. That was on March 3, 1883, in the administration of President Arthur, when Mr. Chandler was Secretary of the Navy. It is true that in Mr. Cleveland's time, under his Secretary, Mr. Whitney, an advance was made in the policy of building up the American Navy; but after that it is well known that Cleveland and his administration were repudiated by the Democratic Party and Cleveland repudiated the Democratic Party, and since that time it has passed into the possession of William Jennings Bryan.

Mr. O'SHAUNESSY. Mr. Chairman, did I understand the gentleman to say that Mr. Whitney in a lucid moment——

Mr. BATES. Oh, I used the word "lucid" purely in a Pickwickian sense. Let me substitute the words "opportune or fortunate moment."

Mr. O'SHAUNESSY. I want to say to the gentleman it was a very good thing for the Republican Party and the entire Nation that we had a Mr. Whitney to lay an enduring foundation and set an example for the Republicans to follow.

Mr. BATES. I agree with the gentleman from Rhode Island in the sentiment that it was to the great credit of Secretary Whitney to assist in inaugurating the movement, but it was not to the credit of the Democratic Party to desert him and his chief, Mr. Cleveland, after he had helped inaugurate the movement.

Mr. FOSS. In other words, it is not to be put down to the credit of the present Democratic Party?

Mr. BATES. No. And, Mr. Chairman, I will say in further answer to the question of the gentleman from Rhode Island [Mr. O'SHAUNESSY], before we had learned the lesson of 1898 we would never have had occasion to engage in war with Spain, and Spain would never have had the temerity to engage in a war with the United States had she known that we had within a few years built our modern battleships. You remember the saying of Secretary Taft, when he was Governor General of the Philippines, when our President suggested sending our fleet around the world, that "It is a good thing to fill the eye of the oriental." Very good. If we had filled the eye of the oriental, and had filled the eye of the citizens of Old Hispania about a year or two before the occurrence of 1898, I assert that it would never have been necessary to have engaged in the War with Spain, because if they had had the knowledge that we were as prepared as we were, they would never have allowed us to strike a blow, but would have withdrawn peaceably from Cuba and left the island, or at least reduced it to a peace basis, as we demanded.

But, Mr. Chairman, we are going on with the program, and I congratulate a large number of Members on the other side of the aisle that we are proceeding to maintain and keep up the adequacy of our present Naval Establishment. I am glad that so many of the Members on the other side of the aisle have some faith in the efficiency of their own party, that it will not run amuck, that it will not so cripple the affairs of this country that we can not pay the ordinary bills for the maintenance of our country, not only for battleships, but for the general maintenance of the Army and Navy and the construction of public buildings, and provide the means for the enactment of all the other great supply bills that come in from time to time. I congratulate a large number, I believe a majority of the majority, on the fact that they have confidence in the ability of their party to conduct the affairs of state, to carry on the fiscal affairs of this great Republic, and to see to it that there shall be sufficient revenues, sufficient funds to meet the needs of the country, and to keep up an adequate Navy, as was advised by Washington and is advised now by the party platforms, and to retain the place that we have won so proudly among the nations of the world. [Applause.]

Mr. WARBURTON. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. BATES. I do.

Mr. WARBURTON. The gentleman understands, does he not, that the chairman of the Committee on Appropriations feels it absolutely necessary to deprive the States of internal improvements in order to get this second battleship?

Mr. BATES. I beg the gentleman's pardon. Will he please state that question again?

Mr. WARBURTON. I say the gentleman understands that the chairman of the Committee on Appropriations thinks it necessary to deprive the States of necessary internal improvements in order to get a second battleship, does he not?

Mr. BATES. Oh, no; I think not.

Mr. WARBURTON. Well, the other day he showed how he had eliminated probably $20,000,000 from the sundry civil bill that the different departments had recommended.

Mr. BATES. Well, but he stated that that had no effect on any other supply bill or appropriation bill.

Mr. WARBURTON. I am not talking about supply bills. I am talking about internal improvements recommended by the different departments, assuming that they act with some sort of judgment.

Mr. BATES. But what was the question the gentleman asked? [Laughter.]

Mr. WARBURTON. I will state it again. That the chairman of the Appropriations Committee showed how the committee had cut down the appropriations from 20 to 30 per cent on necessary internal improvements to meet the necessary deficit, and then, of course, to help out the second battleship proposition. Does the gentleman understand that?

Mr. BATES. I understand it as well as I did in the first place. [Laughter.]

I want to say to the gentleman that if the distinguished chairman of the Committee on Appropriations made such a statement—I did not hear him make it; I have a great deal of confidence in the correctness of his statements—and if he made——

Mr. WARBURTON. Did not the gentleman hear him state this, that the appropriations that he recommended on the sundry civil bill were about 20 or 30 per cent less than those recommended by the departments, and that his recommendations, or the recommendations on his appropriation bill, amounted to $113,000,000? I think I am right about it.

Mr. BATES. I have no doubt about that. That is good housekeeping. But I do not know how that touches on the question of national defense, which is a question of national importance.

Mr. MONDELL. Mr. Chairman, will the gentleman yield to me for a suggestion on that point?

Mr. BATES. I yield to the gentleman from Wyoming.

Mr. MONDELL. I wanted to suggest that I think the gentleman from Washington [Mr. WARBURTON] is slightly mistaken. Many of the items in the sundry civil bill were cut down, including the item the gentleman himself is interested in, in order that we might appropriate $5,000,000 for the fortification of the Panama Canal.

Mr. WARBURTON. That is the gentleman's own conclusion. He cut it down to $113,000,000 in order that we might get two battleships or colliers to carry coal to Panama.

Mr. BATES. That would not have anything to do with the naval program.

Mr. WARBURTON. It had everything to do with it.

Mr. BATES. It was because the Panama Canal expenses are met by the Appropriations Committee that its chairman was concerned for colliers and transports for Panama. It had nothing to do with battleships.

Mr. McKENZIE. The gentleman stated that the building of two battleships by this Congress, or the authorizing of their building, would not increase the Navy; that there would be four battleships withdrawn from the second line.

Mr. BATES. Yes.

Mr. McKENZIE. I want to ask whether or not those four ships are retired from the service, or is the expense of maintaining them and their crews continued?

Mr. BATES. I think I can answer that question. The gentleman from Mississippi [Mr. WITHERSPOON] used an unfortunate word when he said they became "obsolete." That is a little too strong. They are merely withdrawn from the first and second lines of defense and used for harbor protection or in case of emergency, in case they need to be pressed into service. They are only maintained at a partial expense. Only a few men are maintained on them, not a full complement of officers and men at all, and they are usually anchored around the navy yards as emergency ships in case we should be pressed or need them, possibly, for transports for carrying purposes in case of war. They are not under the usual expense, however, of first-class battleships or cruisers.

Mr. McKENZIE. Does the gentleman know about how much that reduction would be?

Mr. BATES. I should say 50 or 60 per cent. I have not the figures here, but they are reduced to a minimum, some of them to merely a nominal expense of possibly 10 per cent.

Mr. McKENZIE. I am not asking these questions for the purposes of criticism, but for information. The gentleman said there would be no increase.

Mr. BATES. I understand. How much more time have I, Mr. Chairman?

The CHAIRMAN. The gentleman has 21 minutes.

Mr. BATES. I desire to use only a few of those minutes. The four battleships which the Secretary states will be over 20 years old next year, and will have to be withdrawn as fighting units at all, except in the direst extremity and necessity, are comparatively small ships when compared with those that we are now authorizing. I believe that the two battleships which are authorized in the bill this year will be able to take the place of the four which will be retired before those can be built which we are authorizing, because it takes from 30 to 36 months to build a battleship after it is authorized.

Mr. POWERS. Mr. Chairman, will the gentleman yield?

Mr. BATES. Yes.

Mr. POWERS. Then, what is there in the argument of the gentleman from Mississippi [Mr. WITHERSPOON] that these battleships are just as effective for fighting purposes now as they were 15 or 20 years ago?

Mr. BATES. I am glad the gentleman alluded to that point which the gentleman from Mississippi [Mr. WITHERSPOON]

seemed to dwell upon so long, because I think the gentleman from Mississippi spoke with great lack of information on that subject. The ships which won the battles in the last three or four naval engagements have been the big ships, the ships that speak with 13 and 14 inch shells, and the ships that can throw 12 or 14 of those shells within a few moments. One of those ships can do more destruction in battle than three or four or half a dozen of the old ships of 10 or 15 or 20 years ago.

Mr. LOUD. As much as 60 such ships as they were then.

Mr. BATES. The gentleman from Mississippi [Mr. WITHERSPOON], in his very unique views of the minority which he has prepared, states a hypothetical question:

> If you had 232 men around the Washington Monument and hurling baseballs at it at the rate of 696 a minute, and 3,480 every five minutes, and if these balls did not destroy it, you would not conclude that the failure to destroy it was because the number of balls was too small, and that a greater number of baseballs would destroy it, but you would know that the cause of the failure was the lack of destructive power and that an increase in the number would be useless.

Mr. TRIBBLE. Will the gentleman yield?

Mr. BATES. No; not for a moment. The logical conclusion of every patriotic American would be to use more formidable projectiles against the Washington Monument if we desired to destroy it, and not to throw the 6-inch shells, which were used 10 or 15 or 20 years ago, but to bring up the dreadnought *Pennsylvania* or the dreadnought *Oklahoma*, which has been authorized, or the dreadnought *Nevada*, which has been authorized, and that with a broadside of twelve 14-inch guns we can reduce any fort or put out of commission a dozen of the battleships that were in use 10 or 15 or 20 years ago, and speak with the highest degree of efficiency against any ordinary armament of any ordinary nation in the world. There would not be an increase in the number of baseballs, but an increase in the size, weight, efficiency, tensile strength, and velocity with which they could be propelled.

Mr. TRIBBLE. Will the gentleman yield?

Mr. BATES. I will.

Mr. TRIBBLE. The gentleman has referred to the naval battle in which the Spanish ships were captured. I will ask the gentleman if he knows that one year before the Spanish-American War the whole appropriation for officers, men, and everything connected with the Navy, from men to ships, was only twice as much as is now paid for the active and retired officers of the present Navy? Does he know that the appropriation now is nearly $15,000,000 for officers, active and retired, in the Navy, and that the entire naval provision in 1896 was only $30,000,000 for all the Navy; and will the gentleman explain why the people should be burdened to pay this enormous sum to officers when a $30,000,000 Navy sent the whole Spanish Navy to the bottom of the sea?

Mr. BATES. I fear that the gentleman has not been in the Chamber, or, if he has, that he has not caught the drift of my remarks. I have been trying to insist to this committee that the world moves, and that we have more battleships to-day—more formidable ones—a larger complement of officers and men, than we had 15 or 20 years ago. We are a greater Nation than we were then, we are greater than we were then by twenty millions of people, we have greater revenues in the Treasury than we had then, and we have more proportionate revenue to invest in a Navy than we had then. We have a greater national pride than we had then. We speak with greater authority among the nations of the world than we did then, and we have a greater responsibility than we had then, because we have the Panama Canal, we have the Philippines, we have Porto Rico, we have the Hawaiian Islands, and we have the surveillance of Cuba as well.

Mr. CAMPBELL. Will the gentleman yield?

Mr. BATES. Certainly.

Mr. CAMPBELL. What is the comparative naval strength of the possible enemies of the United States to-day as compared with 14 or 15 years ago?

Mr. BATES. They are much larger. I will read for the information of the gentleman and for the benefit of the committee the comparative strength of the leading nations of the world to-day as to tonnage. It is tonnage that counts; it is not the number of craft, of superannuated ships of the line 20 years ago, but it is the tonnage that counts.

England has built and is building 1,978,000 tons. Germany has built and is building 837,000 tons, or less than half that of England. We have built and are building 773,000 tons. France has built and building 630,000 tons, and little Japan has almost 500,000 tons built and building. Russia has built and building 286,000 tons. We are the third, with France and Japan pressing us closely, and if we omit our building program to a sufficient amount to maintain our present strength, they, with the great impetus they are under to-day, with their ambitious naval program, will put us in fifth place in less than three years.

Mr. HARDY. Will the gentleman yield?

Mr. BATES. Certainly.

Mr. HARDY. If in less than 15 years in a time of profound peace our naval bill is five times as much as it was 15 years ago, how many times what it is now will it be 15 years from now?

Mr. BATES. That is a fair question if it was founded on correct premises. It is not five times as much as it was 15 years ago. It has been increasing with the growth, increased wealth, and responsibility of this country, but no faster than the growth in population and wealth and efficiency and responsibility of the country.

Mr. HARDY. I do not want my premises incorrect. My understanding is that the naval bill of 1897 amounted to $30,000,000, and to-day it is almost $150,000,000, and that is five times the amount. Now, what will it be 15 years from to-day?

Mr. BATES. I can not tell the gentleman what it will be, but if the patriotic citizens of the Republic, irrespective of party, will have due regard to the strength, both numerical and financial, of this country, and a due regard to the building program of the other great nations of the world, our naval program will be sufficient in 3, 7, or 10 years from now. If they are wise, they will keep abreast of the times.

Mr. HARDY. Will the gentleman favor me with just one guess of what it will be 15 years from now?

Mr. BATES. That will depend upon the prosperity and strength of the country.

Mr. HARDY. Five hundred million dollars; or what would the gentleman guess?

Mr. BATES. Oh, I am not a prophet.

Mr. KAHN. Mr. Chairman, will the gentleman yield?

Mr. BATES. Yes.

Mr. KAHN. I take it from the gentleman's remarks that he favors the extension of the Navy for the purpose of national defense, for the purpose of being ready for an emergency.

Mr. BATES. Yes.

Mr. KAHN. Has the gentleman read in recent months of the strained relations that existed between England and Germany?

Mr. BATES. I have.

Mr. KAHN. Does not the gentleman think that war has been averted between those nations by the fact that each of them is prepared in its own sphere of military and naval readiness?

Mr. BATES. I believe, Mr. Chairman, that the time of universal peace will come when every great nation will be in that condition of preparedness that will make war impossible, and that is the condition that exists between England and Germany to-day. I believe that this Nation will avert war and maintain its own dignity when it is able to speak with authority, when it sends a note not only to Cuba or to Mexico but to some South American Republic, or to Spain, or some of the prouder nations beyond the Atlantic. I say, let no war come, but I believe that the day will be nearer when no war will be in the horizon when we shall have actual preparedness, so that there will not be the hardihood on the part of the other nations of the world to provoke us into a bloody struggle.

Mr. CLINE. Mr. Chairman, will the gentleman yield?

Mr. BATES. Certainly.

Mr. CLINE. The gentleman says that next year we are going to retire the *Indiana*, the *Oregon*, the *Massachusetts*, and the *Iowa*.

Mr. BATES. Yes.

Mr. CLINE. I would like to know for what reason. Is it because of the defectiveness of the construction of those vessels or because the equipment is not up to date?

Mr. BATES. Both. They are too small and too slow. They have no capacity for the big guns that are needed to-day to cope with the big guns of other nations, and because in a hundred respects they are out of date.

Mr. CLINE. I would like to ask the gentleman if all of those vessels are not equipped with 12-inch guns?

Mr. BATES. Oh, no; they are equipped with two each. The *Massachusetts* has two or four of the large guns. Their guns are mostly small. The ships that we are building to-day have 12, 13½, and 14 inch guns.

Mr. CLINE. I would ask if there was not recently expended on one of those vessels over $600,000 to equip it with up-to-date equipment?

Mr. BATES. Oh, no; they are not heavy enough.

Mr. CLINE. Was not that amount of money expended on one recently?

Mr. BATES. One or two of them have been well overhauled. But if we are going to sell either a navy yard or a ship, we

want to keep it in good repair. If the gentleman has a house that he does not need any longer for his family, that is no reason why he should not paint it and indulge in all ordinary repairs. These are the ordinary repairs that are being put on the older ships of the line.

Mr. Chairman, I believe the way to avert war is to be prepared for war. I hope that war will not come to this country in any way whatever, as long as anyone in this Chamber sees the light of day; but if it should come, I believe it is the desire of every patriotic man and woman and child in the country that we shall be ready; that we shall be as ready as Perry was in his poor way 100 years ago on Lake Erie, or as ready as Farragut was at Mobile Bay, or as Dewey and Schley and Sampson were at Manila and Santiago, to strike and strike successfully for the honor and dignity of the American people and the American flag. [Applause.]

I yield the balance of my time to the gentleman from California [Mr. KNOWLAND].

Mr. KNOWLAND. Mr. Chairman, in the limited time allowed me I will have opportunity only to make reference to a statement made on the floor of the House yesterday by the gentleman from Wyoming [Mr. MONDELL] in relation to the fortification of the Panama Canal. I read from his remarks:

> As our treaty obligations now stand the two greatest nations in the world are pledged to the defense of the canal.

I wish to call attention to the fact that that statement is incorrect. Under the first Hay-Pauncefote treaty the following language was used:

> The high contracting parties adopt as the basis of said neutralization—

And so forth.

Under the second Hay-Pauncefote treaty, the one which was finally ratified by both great Governments, the following language is used:

> The United States adopts as the basis of such neutralization—

And so forth.

In a memorandum sent to the Senate at the time the treaty was pending, Secretary Hay made this statement:

> By a change in the first line of article 8, instead of the United States and Great Britain jointly adopting as the basis of the neutralization of the canal the rules of neutrality prescribed for its use, as was provided by the former treaty, the United States now alone adopts them.

Continuing, Secretary Hay states:

> It relieves Great Britain of all responsibility and obligation to enforce the neutrality of the canal which, by the former, has been imposed upon or assumed by her jointly with the United States, and thus meets the main stress of the objection which seemed to underlie or be interwoven with her other objections to the former Senate amendments. The United States alone, as the sole owner of the canal, as a purely American enterprise, adopts and prescribes the rules by which the use of the canal shall be regulated and assumes the entire responsibility and burden of enforcing, without the assistance of Great Britain or of any other nation, its absolute neutrality.

The gentleman from Wyoming made the statement I quoted as an argument to show that we did not need to fortify the canal, and the same argument could be advanced to prove that an adequate battleship fleet was not necessary to maintain the neutrality of the canal. These are the facts, for I have quoted the exact language of the treaty and the memorandum which was sent to the Senate by Secretary Hay, proving conclusively that the full responsibility now rests upon the United States.

Mr. HOBSON. Mr. Chairman, I wish to make a consecutive statement before taking up in detail the remarks of gentlemen who have preceded me, and during the period of the consecutive statement I would request gentlemen to postpone interrupting me.

The earnestness shown on both sides in discussing this question is a matter for general congratulation. It is when men are really in earnest that they proceed to search carefully and find the truth.

There is no great subject of national importance upon which there has been given so little earnest thought by the American people, and no great subject upon which careful thought and investigation are more necessary to avoid error and fallacies. I understand this perfectly. We are a nonmilitary people. We are absorbed in a great period of internal development, a period of spreading industrialism and commercialism, and it is natural that we should not give attention to questions of the outside world.

It is unfortunate to hear applause as we have to-day from Members of this House when references were made a short while ago to the supposed uselessness of navies, that we could get along very well if we had substantially no navy, that three-fourths of the nations of the world do get along all right without any navy. But, Mr. Chairman, I do not consider that the question at issue in this bill. I am convinced that the majority of Members on both sides of this House realize that we must have a navy, and are searching to determine what is an adequate navy, not whether we should have no navy or whether we should have an overweening navy. Therefore my theme is what should be the dimensions of an adequate navy.

In order to remind gentlemen that this is an inherent part of our institutions I will take up the authority upon which it is founded. Starting first with the preamble in the Constitution of the United States we find in the first sentence the reasons stated for establishing the Constitution of the United States, and amongs those comprehensive reasons is the following: "To provide for the common defense."

Again, in paragraph 13, of section 8, of article I of the Constitution, Congress is given power "to provide and maintain a Navy." It is not necessary to follow further the question of authorities, other than to cite the Democratic platforms of the last two campaigns. I will read a paragraph from the Democratic platform of 1908, as follows:

> The constitutional provison that a Navy shall be provided and maintained means an adequate Navy, and we believe that the interests of this country would be best served by having a Navy sufficient to defend the coasts—

That is plural—

> of this country and protect American citizens wherever their rights may be in jeopardy.

The provision of the Constitution referred to in the above plank is the one cited above:

> To provide and maintain a Navy.

It follows paragraph 12, of the same section, which authorizes Congress to raise and support armies with a limitation that no appropriation for the Army should extend more than two years, but it will be noted no limitation is put upon the duty to provide and maintain a Navy.

That means all over the world.

I now read from the Democratic platform of 1912—the Baltimore platform—as follows:

> The party that proclaimed and has always enforced the Monroe doctrine—

I desire my Democratic colleagues to bear that in mind—the specific reference to the Monroe doctrine. I shall refer to it later—

> and was sponsor for the new Navy will continue to develop and observe the constitutional requirements to provide and mantain an adequate and well-proportioned Navy sufficient to defend American polices, protect our citizens, and uphold the honor and dignity of the Nation.

Therefore, accepting the proposition that gentlemen on this side as well as the other desire to provide and maintain an adequate Navy, I shall endeavor, very briefly, to point out what the elements of national defense are from which to determine what constitutes an adequate Navy.

To start with, what is it we must defend? In my analysis I invoke the careful analytical and logical thought of all Members. What must be defended? Life, property, institutions, and policies. I wish to remind gentlemen here when they begin to systematize the elements involved to bear in mind that we have 5,300 miles of coast line on the Atlantic Ocean; we have 4,700 miles on the Gulf; we have 3,100 miles on the Pacific; and this is continental coast line. When we refer to Alaska, to the Aleutian Islands, to Hawaii, to the Philippines—yes, when we refer to Panama, when we refer to Cuba and Porto Rico, without including the coast lines under the Monroe doctrine, we find that America has a vaster coast line exposed to attack from the water than any Nation in the world, not excluding Great Britain.

Furthermore, we find this: That the Old World built its centers of population inland in the early ages of the race, when water transportation was in its infancy. America, on the other hand, laid the foundation of her centers of population late, when she depended largely on transportation by water. Our great centers of population are exposed to attack by water as in no other country. To sum it up, without dwelling too long on the details of this one element, America has 30,000,000 of her citizens living within gunshot of the water, and America has thirty-seven billions of her property lying within gunshot of the water. There are more values of homes and property exposed to naval attack in America than there are in all the rest of the world combined.

Next to the question of life and property, and closely allied with them, comes the question of our institutions. Let me remind my colleagues that our institutions are founded on the principle of the right of local self-government, and that that principle has not been accepted by the other nations of the world. The first element in this principle is State's rights. No great military nation on earth has accepted that principle in America. When Italian citizens were lynched in New Orleans, and the Italian Government said she would hold our Federal Government responsible, our Federal Government

calmly told her they regretted the incident very much, but the Federal Government's authority under the Constitution could not invade the police power of the State of Louisiana, nor could the Italian Government negotiate with that State. Italy replied she would still hold the Federal Government responsible.

When the school question arose in San Francisco, a municipality on the coast, when the question of segregation arose in the Legislature of California, the city of San Francisco and the State of California could not insist upon being protected in the exercise of their rights. The Federal Government was not in a position to fulfill the first obligation it owes to the States—that of protecting them in their rights.

The colonies, when they gave up their armies and navies to the Federal Government, did so under the contract that the Federal Government would maintain them. Think of it, gentlemen, the Federal Government to-day can not protect the States of the Pacific coast in the exercise of the functions of a republican form of government.

The next element of our free institutions is the principle of equality of opportunity, which principle is being projected out by us into the competition for the commerce and the markets of the world. We should not forget that every great military nation in the world with a colonial system absolutely denies that principle. Take our Monroe doctrine. We may differ in many respects as to the responsibilities we bear for the weaker peoples in this hemisphere, but we do not differ on the principle that the colonial systems of Europe shall not be extended over any of them. Those peoples and their countries are going to be developed under the principle of equality of opportunity for all. We shall not hoist our flag there and claim any special advantage, and we will not permit any other nation to do the same. The completion of the Panama Canal will bring to a head the question of the future development of Central and South America. You can not escape that fact. Now, as man is conquering the obstacles of nature, controlling steam and electricity, and conquering the air as well as the land and water, these developments come swiftly. The great natural resources of the world are not going to be held back from supporting the civilization of the world. These lands and these countries are going to be developed, and the question must be settled as to whether they are going to be developed by the system of European colonization and restriction, which embodies the principle of privilege and special advantage of the distant mother country, or whether they are going to be developed under the Monroe doctrine, with the principle of equality of opportunity for all along with the freedom of those people.

Let me also remind my colleagues on this side of the fact that, whether we like it or not, the Monroe doctrine has extended across the Pacific Ocean. We have a greater responsibility for the destiny of the Filipinos than we have for that of the Mexicans or the Cubans. We may give them independence. I believe Americans wish them to have independence as soon as it is consistent with their capacity for self-government. But whether they are made independent or not, we can never allow any monarchy, whether of Europe or of Asia, to establish a colony there. We must defend them as we must defend the weaker peoples of Central and South America, whether we like it or not.

I say this principle of equality of opportunity has gone across the Pacific Ocean. It has been proclaimed in far-off China in the open-door policy, and yet great military powers have already closed the door in Korea and are now closing the door in Manchuria.

When Japan and Russia went into Manchuria, the very first year we lost $22,000,000 of our market for cotton goods and have never gotten it back, and their systems of transportation and administration, now controlled by their Governments, are throttling American trade.

This principle of equality of opportunity, the very end of justice, lies at the foundation of the world's future happiness, and in my judgment is the foundation of peace between nations. America embodies it and is committed to it, and no other great military country of the earth admits it.

We thus have great principles underlying our institutions and great world policies affecting our prosperity and happiness, and the welfare of the world, as well as stupendous values of lives, homes, and property of our citizens, all of which must be defended.

Having taken account of what must be defended, let us now examine the means available for their defense. Inside of a civilized community the means for defense of peace and security of life and limb and rights are provided by the community as a whole. But be it remembered the foundation of this defense is power, power provided by the community, that is greater than the power of any outlaw or any person who does not wish to abide by the law and agree to the settlement of differences by recourse to law founded on right and justice. I will ask my colleagues here, without going into a lengthy discussion, Would they for a moment leave the defense of their country to rest upon any international organization for a common defense of the nations of the world?

As yet there is no organization with authority to make law for the nations to live under. The Hague Conference is but a parliament in embryo. The delegates to The Hague Conference have no authority. Even among themselves they take rank not by any principle of justice, but according to the military power of their countries. At the last conference the Chinese delegates went there representing 450,000,000 souls. They were put down as a fourth-rate power, with Montenegro. The Japanese delegates went there representing 40,000,000 of souls and were put in the first rank. The Korean delegates went there to plead the right of their country to live; they were not allowed to enter the conference.

There is no international judiciary with authority to adjudicate. There is no international judiciary with authority to say what is international law and what is not. In the true sense of the word there is no such thing as international law. Some writers have simply been expressing their opinions about principles of justice and the precedents and practices of nations.

Out between the nations of the world we are to-day, at the present stage of international evolution, about where the English-speaking people were 1,500 years ago. In the evolution of international common law we have not reached the point of having an authority even to say what is precedent. The nations are a long way off from the development of an authoritative international parliament and an authoritative international judicial system, but they are still further off from the development of an international executive, of a power out among the nations stronger than any individual nation, a power which would protect the individual nation in the exercise of its rights as society protects you in the exercise of yours. There is none such.

In the absence of any real international organization for peace and justice some would rely upon treaties of arbitration. Yet the best arbitration treaty in the world between nations of any size in the very terms of the treaty specifically excludes arbitration for questions of honor and questions of vital interest—the very questions over which nations fight. As a matter of fact, the opportunity for recourse to earn this limited arbitration is proportional not to the justice of the appeal but to the size of the applicant's armaments. Would you rest your country's defense upon the strength of treaties of any kind? With whom would you have treaties? Suppose you succeeded in getting every nation in the world to enter into an agreement to protect America, as they agreed to protect Turkey, what nations would they be? The seven great nations of Europe who are now signatories to the treaty of Berlin?

Austria-Hungary is a signatory of the treaty of Berlin; and yet Austria-Hungary proceeded to seize Bosnia and Herzegovina. Was there a protest from the other signatories? No. Germany and Italy backed her up. Italy is a signatory of the treaty of Berlin, yet Italy proceeded to seize Tripoli. Did the other signatory nations protest? No. They backed Italy up. Has China realized national defense from her treaties with the great nations or these nations among themselves? Have treaties defended Korea?

Some argue for defense in the balance of power between other nations. Turkey has worked this a long time; so has China, playing one nation off against another. But nations thus played with sooner or later agree upon the spoliation of their common victim.

My friends and colleagues, amongst the great nations of the earth, in the evolution of social organisms, which goes on like the evolution of all other living things, there is only one defense that is now available to guarantee survival, and that is individual provision by each nation for its own defense.

No other means is reliable. No other means is worthy of a great nation. Realizing that we have vast interests and sacred principles to protect, and that we must rely upon ourselves, let us examine the agencies and instrumentality available for our national protection. A nation's defense is founded upon its people. The gentleman from Mississippi [Mr. WITHERSPOON] was absolutely correct when he said in the last analysis it is the man behind the gun. It depends upon the physique, the intellect, but above all the character of the average citizen who makes up the nation, provided he has the implements and the weapons that compare with those of his opponents.

But give an Indian a Winchester and he could kill a hundred white men of the highest evolution if they undertook to attack him unarmed. It is all well enough to talk about the man behind the gun, but I will ask the gentleman from Mississippi,

why does he not take some of the advice of the man behind the gun? [Applause.] He says our officers are such wonderful officers. True enough. Why does he not follow their unanimous advice as to matters of national defense upon which they are experts? If the man behind the gun is such a fine fellow, then he is entitled to have a weapon in his hand with which to have a chance not only for his own life, which he holds lightly, but a chance to deliver victory into the hands of his country and to give effective defense to the great principles for which his country stands. If you believe in the man behind the gun, give him a chance. [Applause.]

But let us go further. There must be the resources behind the population. When I see gentlemen go far afield upon the question of the actual needs of national defense, when I hear them begin to discuss the national defense as though it were a hairsplitting proposition of a compromise between public building bills and other matters of ordinary domestic economy, it is actually discouraging. To listen to them you would believe that the question of having one battleship, more or less, in a naval program would determine whether the American people were going to be ground down with the burdens of taxation or not. America has $17,000,000,000 in bank assets. All the rest of the world have but $17,000,000,000. There are gentlemen here who would have us recoil from making provision for national defense on the supposition that other nations would go on faster and that we can not keep up with them and parallel their great armaments. The idea is absurd. We have the men and we have the money. Now, what is the rational method of procedure? It is to take the money and provide economically and efficiently the instrumentalities through which the Nation can operate for an effective self-defense.

There are two great national weapons of defense. One is the Army and the other is the Navy. The Army is founded upon the military activity of the population. I am now speaking of modern armies. Olden-time armies oftentimes were paid mercenaries, hired to fight for the country which employed them, but modern armies are founded upon the principle of the military activity of every able-bodied citizen.

My analysis of the origin of institutions has convinced me that it is military activity of the people that produced and brought forth monarchical systems with attendant oppression. In the centralization that is necessary for efficiency in armies I see the centralization of Governments that were founded after the great wars and invasions of the past. In the hierarchy of the military system I can see the social stratification of the nations of the Old World which confine men's activities to narrow spheres in contrast with the unlimited possibilities of men's activities in our land. I can see there the taking away of men from industrial pursuits that lowers the productiveness of the people. I can see the turning of men's thoughts to the pomp of the military and the cult of privilege and power, lowering the true ideals that a people ought to have of individual worth and useful service. I can see in militarism the greatest obstacle of the past and the greatest obstacle of to-day to the development and progress of Christian civilization. This is fundamental. A nation should employ her men in military activities as little as possible, and the nations that have done so in the past and that were able to do so are the nations that have made the greatest progress.

In contrast with an army, a navy demands but few men. Sea power does not involve military activities of the people. Consequently industrial activities and liberal institutions attend upon sea power.

History shows that every Republic has been founded upon power by sea. There has been no great Republic founded on militarism. For a thousand years England has never been invaded, and to this good day the English have not been compelled to resort to conscription of citizens for their army. That is why the Anglo-Saxon has been able to evolve free institutions ahead of all others. Members of all parties and all ideas will accept this proposition that a nation should employ her resources, her property, rather than her men, as far as she can, for her national defense. The Navy represents property; the Army represents men.

It is estimated that one battleship requiring 1,000 men is the equivalent of an Army corps taking 50,000 men. That one little thousand out on the sea may be military among themselves, but they do not exert any example of militarism to our people. The beauty of our geographical situation is that it is transcontinental, and that all the great nations of the earth lie across the ocean from us. Having boundless wealth, it lies within our power to derive an almost perfect and complete defense through property by putting adequate fleets upon the seas to stand between ourselves and the world's great armies. When I say "great armies" I speak accurately. We are living in a period of armaments such as the world has never seen. There are 30,000,000 armed men across the water ready. When I say "ready" I mean they are not only organized, drilled, armed, and equipped, but that they have the transportation with which they can cross in a few days and reach our shores. It is simply in keeping with elemental instincts of self-preservation, and it is in accord with the evolution of free institutions that America should take full advantage of her geographical position and put sufficient ships between her peaceful shores and the world's great standing armies. [Applause.]

Since we stand only for equality of opportunity, against which none can justly complain, and would never seek a quarrel with others, and, being thus protected, others would not seek a quarrel with us, we could live in peace and security as complete as is possible at the present stage of evolution of the race, and could exert an ever-growing influence in the course of peace and free institutions for the world at large. Thus the Navy should be the main instrumentality for our country's defense; indeed, upon it will rest, in large measure, our country's destiny and the future of the world.

We are now prepared to determine the proper size of the Navy, our true naval policy, and the number of vessels that should be provided in this year's appropriation bill. The size of a nation's Navy is intimately connected with the size of the Army in an inverse proportion. The greater the ability of the Army to provide defense, the less the reliance upon the Navy, and vice versa. A big Army can go with a small Navy, but a small Army requires a large Navy. A Navy without a great Army behind it, as in our case, can not deliver a death blow beyond the water; but a great standing Army, when the sea is cleared, can strike a deadly blow beyond. America having no great standing Army could have control of the sea without menacing any nation, but a military power with a great standing Army would be a serious menace to us if left in control of the sea. It should be borne in mind that without a mobile Army our coast fortifications are open to capture by an enemy in control of the sea, landing troops beyond the range of the forts' guns and taking the forts from the rear. It is logical, it is just and right, that as between America and any great military power we are entitled to and must have control of the sea, for we are absolutely dependent upon this control of the sea as no other nation in the world.

Now, take the Atlantic. On the other side there is a great nation that should be different from all others, and that is Great Britain. She has no great standing army that could strike us, and has her most promising colony with a long contiguous frontier here with America. Canada, like America, has no army, and our preponderating size places her at our mercy. I therefore proceed at once to eliminate the power of the British Navy in deciding the question of what is the proper strength of our fleet in the Atlantic.

What are the other nations? Take the greatest nation with the greatest standing army. This is Germany. Germany has no coast line to defend to speak of, and we could not strike that coast line to do serious harm even if we had control of the sea. But if Germany should have control of the sea in case of a war with America, she could strike our coast line from Maine to Texas, and then through the Panama Canal—because the control of the sea is going to settle the possession of the Panama Canal in war—she could strike it as far up as she pleased in the Pacific.

If Germany has undisputed control of the sea, our American policies must also fall before Germany's policies in Central and South America. Over the sea we are as far from South America as is Germany.

The Germans have not accepted the Monroe doctrine. Their citizens are colonizing in South America. This is not a matter of hypothesis. Many of you remember a few years ago that Germany landed in Venezuela and hoisted her flag. We called on her to retire. Fortunately, as the result of the Spanish War, not from any foresight of our own, but by accident, the mere condition of public opinion temporarily giving some attention to this question having caused us to build up a good Navy for those days, we were the second naval power in the world. Our fleet was probably 60 per cent stronger than the German fleet. We had undisputed control of the sea as compared with Germany. We assembled our whole fleet at Guantanamo. We ordered Admiral Dewey to go down there and take charge. Then, in the most polite and diplomatic language, we requested Germany to retire. She retired in peace with good grace, recognizing that if we insisted our policies must prevail while we controlled the sea.

Since the Russo-Japanese War a new type of ship has come into being—and I will refer a little later to the details of ships—called the dreadnoughts. Gentlemen who are familiar

with industrial matters know that from time to time new machinery is introduced in all of the great industries, and when new machinery is introduced every up-to-date manufacturer who does not wish to go to the wall begins to systematically equip himself with that new machinery. That is what every nation in the world has been doing in respect to dreadnoughts. Take Germany, for instance. Germany has been building four battleships a year, three of them known as dreadnoughts, and one as a dreadnought cruiser, the law providing for them years in advance. America has not averaged two. Last year we got down to one. Suppose when the Panama Canal is completed, and when the question of the development of Central and South America becomes acute, Germany should again hoist her flag in Venezuela or in Brazil or the Argentine. That is not hypothetical. She would be far more likely to hoist her flag then than she was before the Panama Canal was undertaken, far more than formerly, since her citizens have steadily gone to Brazil and the Argentine. Suppose she were to hoist her flag on any part of Central or South America. America would then promptly call upon her to retire, and what would be the situation? By tables I could show you just what it would be, but it is not necessary. I can tell you briefly. We would have all told 12 dreadnoughts and Germany would have 29. I will discuss in a few moments the marvelous theory of the gentleman from Mississippi [Mr. WITHERSPOON] as to what constitutes a fleet and its integrity. I will simply now take what the nations of the world look to. They look to the first line, to the dreadnoughts. Germany would have 29 and we would have 12. Germany would be in absolute control of the sea. Under those circumstances we would be compelled to surrender the Monroe doctrine or to fight, and fight at great disadvantage.

Mr. MURRAY. Mr. Chairman, will the gentleman yield?

Mr. HOBSON. I would like not to be interrupted.

Mr. MURRAY. I just want to ask the gentleman a question about the relative marksmanship of the men of the two navies.

Mr. HOBSON. I will come to that a little later.

Mr. MURRAY. I wondered if that would have any serious weight in our favor.

Mr. HOBSON. Mr. Chairman, I will tell the gentleman that the general principle is that while you have trust and confidence in your own men you do not assume that your opponent is so much your inferior. I know the time—and some of you can remember—when gentlemen like the gentleman from Mississippi—and unfortunately there were many such men in those days in Mississippi and Alabama and other States in the South—thought that 1 southerner could whip 10 Yankees. That is not a wise basis for national defense. I am assuming that the nations, backed up by adequate resources of their own and realizing fully the necessity of national defense, when the time comes will be found as well prepared and with as high efficiency as we are, where our people are continually neglecting the whole question and do not hesitate at times to sacrifice the efficiency of the Navy for a pork barrel. I would like to have the gentleman ask all those questions when I get through with my consecutive statement.

To continue, we would be compelled to fight or surrender the Monroe doctrine. I want each Member here to answer in his own heart which he would do. We would fight. If the gentlemen here would not, the American people would. I claim—and you can not escape it—that the war would be due absolutely to the fact that while this Nation asserted the Monroe doctrine it did not proceed in an intelligent way to make the provision under which that doctrine would be respected and would be effective.

I come back now to a reference of the gentleman from Pennsylvania [Mr. BATES] to the Spanish War, which furnishes a good illustration. You may recall that in the early nineties we began to insist upon reforms in Cuba, and Spain continued to refuse to make those reforms. Anyone looking into the questions at issue between the nations would have recognized that the policies of the nation that had control of the sea leading to Cuba would have to prevail. If we had proceeded to insure an undisputed control of the sea in the nineties, all of the problems in Cuba would have been settled by diplomacy. Our demands would have been reasonable, and Spain would have granted them. But we failed to provide for control of the sea, and yet became more insistent in our demands for reforms in Cuba.

While the world believed and Spain believed that her fleet was superior to ours, the result was inevitable. We had war. I want now to refer to the cost. Four more battleships at that juncture, which would have been double what we had, would have given America in the eyes of all the world and in the eyes of Spain the undisputed control of the sea and we would have had no war. As soon as we gained control of the sea the war ended. Twelve million dollars would have bought and paid for those ships, but then, as now, were were dealing with pork barrels and quarreling about economy. We did not provide those ships and we had the war. During its progress the war cost $500,000,000, and it is conservatively estimated that directly and indirectly, all told down to date, with pensions which are just beginning and they will run for 100 years, that war has cost us $1,500,000,000. Gentlemen will tell you what it will cost to have equilibrium with Germany on the sea. They will tell you that it will mean tens of millions. They do not tell you what would be the cost of the war that would result from not possessing control of the sea while we insisted upon our policies in conflict with German policies in the development of a continent. Twelve million dollars more put into battleships would have prevented the war with Spain and a few tens of millions now put in judiciously to give us control of the sea would absolutely insure permanent peace with Germany or any other great continental nation of Europe. The Monroe doctrine would be a reality and we would insure the peaceful development of the continent that is below us. We would insure the spread of free institutions and the principle of equality of opportunity in the Western Hemisphere. Gentlemen can well imagine the cost of such an unequal war with Germany.

As I said before, we were the second naval power in the world a few years ago. We are now the fourth. Germany has gone ahead of us. France has gone ahead of us. Germany is building four Dreadnoughts a year and has 23 of these Dreadnoughts available, whereas we have 13, and that is assuming we have completed all and is counting the *South Carolina* and *Michigan*, which only are of 16,000 tons, which we ought not to count. They are good ships, but they are but 18 knots speed, but admitting those, we find France has 13 and is building 7. We have gone below France. And keeping on at one battleship a year what do we find? In 1914 we would have 14, France 15, Japan 11; in 1915, we would have 15, Germany 28, France 17, Japan 13; in 1916, Germany 30, United States 16, that is counting two more than ought to be counted, France 21, Japan 15, Italy 14, and Russia 11.

Going a few years longer, on a one-battleship program, by 1920 we would have 20 dreadnoughts, Germany 40, France 27, Japan 22, Italy 22. We would be the sixth naval power in the world, with Russia coming up fast to make us the seventh. Thus, a one-battleship program would speedily cause America to drop out from among the naval powers of the world. Does any Member of this House imagine that the American people wish their Navy to thus disintegrate at this critical juncture when the world is so disturbed and the Panama Canal is nearing completion?

Now, gentlemen, suppose war does come as a result of our not controlling the sea? Have you investigated what it would mean? Our fourth, fifth, sixth rate Navy, as the case may be, is quickly swept from the sea. The war games show that Germany could then land an army on the coast of Long Island and another on the coast of New Jersey and capture Norfolk, Washington, Baltimore, Philadelphia, New York, and destroy our navy yards, shipyards, and arsenals before we could organize any serious opposition. After exacting a high ransom from these cities, she would reembark her troops and occupy strategic positions in the West Indies, would occupy the Panama Canal and Panama Canal Zone, and would occupy any part of Central America or South America she chose. Her fleets would destroy our coastwise and high-sea commerce, and blockade our harbors on the Atlantic and Gulf coasts, and prostrate business from one end of the land to the other, and we would be absolutely helpless, unable to strike a blow. In 1866 Prussia struck Austria. The war was over in a few weeks; Prussia was prepared. Austria was not. In 1870 Germany struck France. The war was over in a few weeks; Germany was prepared, France was not. Reference has been made to the war between Russia and Japan. Gentlemen who rely solely upon America's vast resources should carefully note the course of this war. Russia had boundless resources. The Japanese Army never got within 4,000 miles of Russia's vital territory, but the war was over in a few months, with Russia in defeat. Russia had gone on the supposition Japan would not dare attack her, and was found unprepared. Japan for 10 years had been making preparations for just such an attack. You may recall that America was foremost among the civilized nations of the earth that went down to Russia after the Battle of Tsushima and the Battle of Mukden and insisted that she accept the defeat and end the bloody war. With America's fleet swept away and America powerless to strike, the nations of the earth would come down to us and take the very words out of our mouth which we used to Russia and say, you must not continue to disturb the world's

peace; you are whipped; renounce your Monroe doctrine, cede the Panama Canal or buy it back, pay your billions of war indemnity, and in the name of humanity put an end to this bloody war.

Pressure from within would join the pressure from abroad. Great financial centers, where stocks and bonds preponderate, controlling the cosmopolitan press, would demand that the war end. Project your thoughts into the crisis that would arise. Do you see what it would mean? Pressure from within, pressure from without, to end the war. Suppose under this pressure that we should allow the war to end in humiliation and defeat. I do not know what good gentleman it was who said that if we go on building naval programs the American people, writhing under the taxation, would some day rise and wipe us out of office. I want to say, neglect to take the elemental precautions for the defense of your country that you take for yourself, that you take for your animals, and have the country actually precipitated into war because she did not have the instrumentalities you should have provided, and then, through the same neglect, entail upon this proud Nation the humiliation of defeat—can you picture the public wrath that would fall upon your guilty heads? What would you think of the paltry millions you saved on battleships when for every million you saved you entailed a loss of a hundred millions and put your country in the ashes of defeat and brought about the overthrow of her beneficent policies for this hemisphere? But these terrible consequences would not compare with the after effects upon the course of our institutions. An all-consuming wrath of public opinion would shake the Nation from ocean to ocean and imperiously demand that stupendous preparations be made to fight the war over again in the future—a far more imperious public opinion than that in France, which, since Alsace-Lorraine was surrendered, has for 40 years demanded the militarization of the French Nation.

Now, project yourselves into those conditions and picture what the consequences would be. Every able-bodied man would be drafted into the Army. Military systems would permeate the Nation. Yes; we quibble over 1 battleship or 2 battleships now, but there would not be any quibbling of 10 or 20 battleships then. Yes; we would find it would take some 15 or 20 years to become adequately prepared. During that period there would be anger, rancor, and revenge in the hearts of the American people, and especially the hearts of the growing youth. Talk about amity and good will for all the world! We would have it no more. The militarization of the people would bring the centralization of our Government, the curtailment of State rights and individual liberties. Then it is the demagogue would rise, and if he had sufficient power of intellect would menace our institutions.

This country is safe and its institutions are safe as long as the fiery furnace of war does not engulf us in its flames. By the time we were finally prepared and fought out that second war, what would be the condition of the Union? America would be as military as France. America would be as military as any military nation of the earth. You need not think we are so different from the European nations that our industrialism is fixed. We sprang from them. The heredity of thousands of generations is behind us as it is behind them. Begin to beat the drum here as in the Venezuelan message of President Cleveland, scratch the skin of an American, and you find a fighting man. We would experience what is called in the biological history of evolution a reversion to type. This beautiful civilization of ours, built upon the principle of peace and producing, and not the soldier with the rifle on his shoulder—this beautiful civilization based upon equality of opportunity for all—would have reverted back to the old civilization of the bayonet, from which it recently sprung. The wreck of free institutions would rest upon our heads. The victory of Prussia over Austria gave an impulsion to armaments; the victory of Germany over France gave another impulsion to armaments; and the victory of Japan over Russia gave another impulsion to armaments. No wonder that all the nations of the earth who have looked into this question have leaped to arms. And such a defeat for America at the hands of a great military nation would give a new and even greater impulsion to armaments. For generations the hope of peace would recede, while industrialism would be engulfed again in the old militarism that produced and maintained the oppression of the world for ages. I am not a pessimist, but as a scientific man I know that the forces of gravity are going to hold and the mighty sociological forces operating between nations are going to hold. No one can name the hour, the month, or even the year of its coming, but as surely as this policy of neglect continues—and I believe it is going to continue, for a two-battleships-a-year program is but a policy of neglect—the day is going to come, whether you believe it or not, when we shall find ourselves in the crisis I have described, humiliated at the hands of a great military power. In my judgment, that will be the greatest crisis in the history of the human race. The future of industrialism, the peace of the world, the happiness of mankind will hang in the balance. Oh, the pity of making such a crisis inevitable! But when it comes we can not allow the war to end. With our institutions and the future of civilization at stake, the war of survival must not end in defeat, no matter what may be the cost of victory——

The CHAIRMAN. The time of the gentleman has expired.

Mr. MURRAY. Mr. Chairman, I ask unanimous consent that the gentleman may be permitted to conclude his remarks.

The CHAIRMAN. The gentleman from Massachusetts [Mr. MURRAY] asks unanimous consent that the gentleman from Alabama may be permitted to conclude his remarks. Is there objection?

Mr. HOBSON. Suppose you give me the time you gave to Judge WITHERSPOON.

Mr. MURRAY. Mr. Chairman, I revise my request, and ask that 40 minutes more be given to the gentleman from Alabama.

Mr. HOBSON. I shall try not to impose unduly on your patience.

The CHAIRMAN. The gentleman from Massachusetts [Mr. MURRAY] asks unanimous consent that the time of the gentleman from Alabama [Mr. HOBSON] be extended 40 minutes. Is there objection?

There was no objection.

Mr. HOBSON. Mr. Chairman, I want to request my colleagues here who are to return to their homes—and it is a great regret to me that some of them are not to come back—that when they go back amongst the people they will bear this coming crisis in mind, whether they agree with me or not as to its approach, so that when it does come they may be prepared to help create at once the public opinion that would cause Congress to act wisely from the very start. Otherwise, it is possible that under this stupendous pressure to end the war the consequences of defeat might not be fully realized by our people. Upon the approach of war the American people ought quickly to be shown how the future of our civilization is at stake, with the future of peace and industrialism for the world hanging in the balance, so that, like one man, they may resolve from the outset that the war shall never end in defeat. [Applause.]

In the face of the inherent weakness of free institutions, the inevitable neglect by our people of these great questions, the mightiest element of our national defense will be this: To let the great military nations of the earth recognize that we foresee that we shall be found unprepared, and therefore that they can not reasonably expect us to permit the issue of the war to be settled simply by a test of preparations, as we have none. Therefore, immediately—simultaneously with the declaration of war itself—we ought to serve notice upon the nations of the earth that we can not entertain at any time any suggestion to end the war quickly, but propose to turn the pages of history back about 300 years and compel a war of endurance; that we do not propose to let the stupendous issues be settled by a test of preparations, where we are weak, but by a test of resources, where we are strong; that we propose to make it a war of exhaustion, as in our Civil War. When this great war comes it will be a test of survival between militarism and industrialism. The happiness of generations unborn will hang upon the issue. Industrialism unprepared must not be measured against militarism ready and prepared. Industrialism's strength is in its boundless resources. When the test of survival comes, we must appeal to the strength of industrialism and not rely upon its weakness. We must not have to fight but one such war. When we are challenged by some great military power because we are unprepared and because we insist on just policies, then, no matter what may be the odds against us at the start, no matter how long it may take, no matter what the cost in treasure and in blood, that nation, whether in Europe or in Asia, must be brought to an unconditional surrender or it must be ground to powder. If Germany or any other great military nation fully realized that a war would not end with the test of preparations, it would very substantially increase our national defense.

But, my friends and colleagues, it is such a pity that there should be any such war. The Almighty has planted industrialism here on the face of the waters so that it could, for all time, insure its free institution, its peace and prosperity through property instead of men with no danger of war and its attendant militarism. The same ships that would guarantee to us peace and security at home would make effective the Monroe doctrine in the Atlantic and the open-door policy in China. Such a Navy would project the influence of America across the waters to the nations of the earth in the interest of equality of opportunity—with equality of opportunity insured in the

Atlantic and in the Pacific, the mighty armaments of the world would not bring special advantage, and survival would be determined by productiveness, not by war.

That is the way to put an end to the mad race of armaments to establish this mighty equality of opportunity and render the armaments unprofitable. Then our Nation and the other industrial nations would survive. The nation that insisted on maintaining great armaments would be handicapped by the operation of economic laws, the stratification of society, turning men away from productive pursuits. America and similar nations that produce would gain the markets and the commerce of the world. The great forces of commerce and industry, the forces of education, the moral and religious forces, the forces of growing sympathy would undermine militarism in its own strongholds. It would be really the dawn of the day of disarmament. Then it would happen, my friends and colleagues, that when American delegates go to The Hague conference and plead that larger authority ought to be given to delegates in order to hasten the evolution of an international parliament, they would be heeded as they have not been heeded thus far. Then it would happen that when we appeal for The Hague tribunal to be developed into an international court instead of a diplomatic body, we would be heeded. The world would then heed us when we suggested the advisability of passing from individual armaments to collective armaments, to the advisability of organizing an international army and navy under the direction of an international council of nations and the ultimate pooling of armaments amongst the most civilised, so that the combined armaments would be greater than the armament of any individual nation. When such an international organization had demonstrated its capacity to protect individual nations in their lives, liberty, vital interests and rights, and had fully demonstrated its ability to settle the differences that inevitably arise between great nations by recourse to law and to justice instead of war and might, then the world would be ripe for the laying down of its armaments, and we should see the dawn of that happy day that has been dreamed of and longed for down the ages, when there would be peace on earth and good will to men.

But, Mr. Chairman, whether we choose this happy road of peace or whether through neglect we stray down the long road through the fiery furnace of war we come out at the same point, America's control of the sea in the interest of the principle of equality of opportunity. We can not escape this impending destiny. The day is going to come when America, the Nation that has no enemies, the Nation that seeks no conquests, the Nation that embodies for the strong and the weak, the rich and the poor, the Jew and the Gentile, the principle of justice and equality of opportunity, when America will reach her white arms out over the oceans and in the name of humanity command to the troubled waters, "Peace, be still," and then a great calm will reign, and we will teach men no longer to raise their hands against their fellows, but to reach out with a hearty handclasp of cooperation extending from State to State, from nation to nation, from continent to continent, till we shall have a veritable handclasp of cooperation girdling the whole world in a brotherhood of man under the fatherhood of God.

Mr. SAMUEL W. SMITH. Will the gentleman permit me to interrupt him?

Mr. HOBSON. I have almost reached the point when I shall be glad to meet all interruptions. One more point, and then I am ready.

Our investigation, then, shows that America has stupendous values of life and property to protect, great and beneficent world policies to insure in the Atlantic and the Pacific, and institutions which we hold in trust for all mankind that call for peace and security. We have found that the Navy is the instrumentality upon which we should rely. With conflicting policies of European nations as to the Western Hemisphere the true basis for an adequate fleet in the Atlantic is one able to insure to us the control of the sea as against any nation of Europe maintaining a great standing army, which at present means Germany. Such a fleet in all human probability would insure our peace and could give no offense to any nation that harbors for us no sinister purposes. We are in a position to define the minimum fleet as well as the adequate fleet.

In case militarism is not willing to abide by the Monroe doctrine, in case it seeks to encroach upon liberty and to destroy equality of opportunity, in case it insists upon oppressing the weak peoples of Central and South America and of the world, in case war must come, we must have at least enough of a navy to enable us to keep the enemy from destroying our shipyards, navy yards, arsenals, harbors, and ports, to keep him from destroying those resources that would enable us to develop the Nation's fighting power so that we would not be compelled to conclude an ignominious peace in order to turn our resources into fighting power. That is the minimum foundation for a rational national defense.

Now, recognizing that we have no mobile Army as the other great military powers have, I submit to you that while we ought to have undisputed control of the sea in the Atlantic, which would mean a good margin of superiority, the minimum basis is at least an equilibrium of naval power in that ocean as compared with any great military power of Europe that has a mighty army ready. It would mean that in the Atlantic we must have at least an equilibrium with Germany.

Now let us turn to the Pacific. My former speeches on this question have dealt largely with the Pacific. I have purposely avoided the Pacific to-day. When I have discussed international relations and strategic positions and have analyzed forces in an impersonal way as officers and legislators of all nations always do in dealing with these great questions, my motives have been questioned. But I want to sum up and remind gentlemen here that the question of the open-door policy is not the only question in the Pacific Ocean to be settled now. We are located in Pearl Harbor. A circle of 4,000 miles in the heart of that ocean has only one harbor, and that is Pearl Harbor. We can control the sea for 2,000 miles from a base. The nation that has control of Pearl Harbor will enjoy the control of the Pacific. As between the white race moving westward with the sun, that has now at last put its frontier out in mid-Pacific; and the yellow man, moving east against the sun, who has put his foot there, too, the race that permanently controls Pearl Harbor will imprint its civilization as against the other on the future of the world. There is no use of ignoring this great historic fact, this critical question of destiny. Our flag is flying over Pearl Harbor, but there are 35,000 Japanese troops there. That is the official report of an Army officer. Pearl Harbor is the most strategic point in all the history of the world. Do you think this Nation or any nation can occupy Pearl Harbor, out in midocean, without the control of the sea? If you think so, you fly in the face of history; you have never looked up the history of Gibraltar and Malta and every other strategic point. Take Guam and the Philippine Islands and the harbors there right on the flank of the great trade routes of the Far East. Do you think we can hold those without control of the sea? If you think so, you rush in the face of history. Take Alaska, a defenseless treasure house. Take Panama. Say what you please about it, the completion of the Panama Canal makes Panama, next to Pearl Harbor, the second most vital strategic point in all the world. If we have control of the sea, Panama is ours for mobilization, for the passage of reenforcements. If the enemy has control of the sea, Panama is his. Do you think we can occupy that vital strategic outlying territory without control of the sea? If you do so, you rush in the face of all history.

Now, it is unwise for us to ignore the fact that the peoples of Asia and the peoples of Europe and their descendants do not live together in close contact. The war in the Balkans ought to remind us that they never have lived together, and that the race hatred that is beginning to develop on the fringes of the Pacific Ocean is but a forerunner of the problem between the white and yellow races that must be settled some day, and settled by America.

I referred to San Francisco, the municipality that had to surrender its right to manage its own schools in its own way. I refer to the Legislature of California, that had to surrender the right of passing segregation laws, laws that would have been just, because the Japanese segregate us. You can not go to Japan and buy a house and lot and live there. I lived there, and they segregated me. They should not find fault with us for treating their people like they treat ours; but we could not mention this—we were at their mercy. The legislature had to surrender the right of local self-government. The full exercise of the police power of this municipality and the Commonwealth, the exercise of the principle of the right of local self-government, were surrendered and are surrendered to-day.

However, I will not dwell on this, but will sum up briefly: The open-door policy involves the great question of the ages, the competition of trade and commerce, a prolific cause of war; the possession of vital outlying territory is a second great historic cause of war; race hatred is a third cause of war; and the conflict of vital institutions the fourth. Those are the four great historic causes of war between nations. They are all four in operation. The only possible way to remove them is to establish a condition of equilibrium. We should establish a condition where we could meet Japan in mutual respect and make mutual concessions. Only then can we hope to solve these problems. If these great causes of war are not removed or counteracted, war must follow as surely as effect follows cause. Reasoning for the Pacific as for the Atlantic, we should have control of the sea, as compared with any military nation of Asia, which means a fleet with a good margin of superiority over the Japanese

Navy. The very minimum is to have always in that ocean an equilibrium, a fleet equal to the Japanese Navy.

Since the Pacific is so vast and vital points so distant from the Atlantic, each ocean must have its own defense. Having the Panama Canal, with its possibilities for concentration, provided we can hold it, we can safely proceed on the minimum basis for the two oceans. Therefore our plan is simple—each year get the ships laid down in Germany, get the ships laid down in Japan, and then lay down enough ships to equal the two. That would mean at the present time, while Germany averages four and Japan averages two, we should average six dreadnoughts.

Now, one step further, and I am through with the analysis. I spoke of a dreadnought. There are really two classes of dreadnoughts—a dreadnought proper and a dreadnought cruiser. I have seen the war games fought out at Newport as to the advantage of the composition of the fleet. I have been there myself and helped fight them out with the naval officers. They find this: That a homogeneous fleet of battleships has advantage over a homogeneous fleet of battle cruisers, for the reason that, while they can not compel an engagement, they could go wherever they pleased and control the sea.

But it also shows that for the battle fleet to realize its full advantage it ought to have fast wings, just like an army whose strength is in the infantry ought to have cavalry. With the present strength of our fleet we ought to have four dreadnought cruisers, two for each wing. Germany builds one battle cruiser and three dreadnoughts; England about the same; Japan a larger proportion of battle cruisers. Therefore the program I am recommending this year, since we have no battle cruisers, is four dreadnoughts and two dreadnought cruisers. This is the program recommended by the General Board.

Now, I want to say to my friends here that for years I have not advocated on the floor of the House what I believed to be the proper program, and my colleagues on the Naval Committee have not done the same. I have never had sufficient time to fully discuss an adequate program in the committee.

It sounds strange to say I could not get the time in committee after the statement of the gentleman from Mississippi that the committee gave so much time pressing forward to battleships that it did not have time to consider the other items of the bill.

The subcommittee, that worked day in and day out for seven weeks on the other matters, did not even recommend the battleships. The whole question of the building program of the Navy was left to the full committee and was settled at one meeting. When I pleaded for time to discuss it a point of order was made, although it was withdrawn. I was going to be limited to 5 minutes, but I got 10. The position of the committee heretofore has been this: The older members would say that, considering the sentiment of the House, the wise thing to do was only to recommend what they thought we could get, and this never exceeded two battleships a year. I present here a table prepared by the Office of Naval Intelligence from the programs of foreign nations, which shows that a two-battleship program will consign us to the position of a fourth or fifth rate naval power:

Strength of the United States in capital of ships built, building, and authorized, compared with other naval powers on Jan. 1 of each year from 1913 to 1920, inclusive.

DREADNOUGHTS (BATTLESHIPS AND BATTLE CRUISERS).

Countries.	1913			1914			1915			1916		
	Built.	Building.	Total.	Built.	Building.	Total.	Built.	Building.	Total.	Built.	Building.	Total.
England	23	13	36	27	14	41	32	13	45	36	13	49
Germany	13	10	23	17	9	26	21	7	28	23	7	30

United States	15	6	21	17	6	23	19	6	25	21	6	27
France	15	6	21	17	6	23	19	6	25	21	6	27
Japan	11	6	17	13	6	19	15	6	21	17	5	22
Italy	10	6	16	12	6	18	14	6	20	16	6	22
Russia	7	4	11	11	2	13	11	4	15	11	6	17
Austria	4	2	6	4	3	7	5	2	7	6	2	8

The above table has been compiled from the most authentic information on hand.
German program last ship authorized to be laid down in 1917.
English program is that stated by the first lord of the admiralty and a reply to the German law.
The French program expires with the laying down of the last ship in 1917.
The Russian program provided for 4 battle cruisers by 1917.
The Japanese program has not been acted upon, but 13 ships extending to 1920 are to be asked for.
Austrian program expires upon the completion by 1915 of the 4 ships now building, an increase of at least 1 ship annually will be proposed.
The Italian naval law authorizes the expenditure of given sums of money for new construction up to and including the fiscal year 1917-18. The types of ships to be constructed is left to the minister of marine.
For the United States, an increase of 2 capital ships yearly has been assumed.
After the expiration of the current programs, an average of the new construction of each nation has been assumed for the ensuing years.

The effect of advocating only what we thought we could get has educated Congress and the country to think that two battleships a year is a big program. I believe the policy is wrong. I gave way to my colleagues' longer experience, but I shall give way no longer. The true policy for me and, I believe, for a committee is to recommend what we feel, after investigation, to be right and leave Congress to decide the result. Henceforth I am going to insist on time in the committee to discuss the question of battleships, and I am going to come into the House each year that I am here and tell my colleagues what, after earnest and careful and painstaking thought and investigation extending over many years, I believe to be the minimum program. [Applause.]

Mr. Chairman, I shall now be very glad to answer any questions that may be propounded by any gentleman. I have kept a few notes, made during the remarks of the gentleman from Mississippi [Mr. WITHERSPOON], and if I have failed to touch upon all of the subjects that he touched upon, I hope the gentlemen here will ask me anything they have in their minds to bring them out.

Mr. SAMUEL W. SMITH. Mr. Chairman, I would like to ask the gentleman if he is in favor of fixing the time when the Philippines are to be given their independence; and I would like also to ask a question respecting the officers necessary to man our ships? I understand we lack about 3,000 officers. How would the gentleman provide for these officers in case of war?

Mr. HOBSON. For the officers?

Mr. SAMUEL W. SMITH. Yes.

Mr. GREGG of Texas. Three thousand officers?

Mr. SAMUEL W. SMITH. Yes.

Mr. HOBSON. Mr. Chairman, we have not properly organized the personnel of the Navy. That is one of the great reforms that the Navy needs. I am hoping that we shall have the instrumentality before long by which we can proceed—under the joint direction of Congress and the Executive, through joint boards, made up of subcommittees from the Naval Com-

mittees of Congress and officers of the Navy, who will investigate and report plans for reorganizing the whole personnel of the Navy, plans for reorganizing the navy yards and naval stations, reorganizing the Navy Department and naval administration, and reorganizing the methods of making the annual estimates. When such a joint board reports, it will have worked out what the number of officers and men should be, and I am confident the number will be based upon and automatically made proportional to the tonnage of the active fleet, with a reserve personnel proportioned to the tonnage of the reserve fleet. I will say to the gentleman from Michigan that we have to-day more than enough officers to man all of our battleships, including the old ones and the new, and there need not be any hesitation about providing battleships upon the supposition that we would not have enough officers to man all of the ships. When we put all vessels in commission when war comes—not only the old battleships and the old monitors and the old cruisers and the old gunboats, but every other old craft, down to the old torpedo boats and auxiliary torpedo boats, and all on a war basis—then we would be about 3,000 officers short.

Mr. SAMUEL W. SMITH. In the Naval Militia.

Mr. HOBSON. I would add that with enough officers to man the battleships we can improvise from the Naval Militia for auxiliaries and for mosquito fleets——

Mr. GREGG of Texas. Mr. Chairman, I would like now to ask the gentleman a question.

Mr. HOBSON. But it is too late when war comes to build battleships.

Mr. SAMUEL W. SMITH. Mr. Chairman, I would like to have the gentleman answer the question respecting the Philippines.

Mr. HOBSON. Mr. Chairman, I believe that Americans are a unit in wishing the people of the Philippine Islands Godspeed in their development and are a unit in encouraging their political capacity by giving them increasing opportunities to exercise it by teaching the child to walk by letting it walk, but I do not believe that we ought to expect a child to rise up out of swaddling clothes and run a race. [Applause.] I do believe we are going to protect them as long as American character is what it is to-day. [Applause.]

Mr. GREGG of Texas. Mr. Chairman, the gentleman spoke something about manning the mosquito fleet. Does the gentleman count destroyers as part of the mosquito fleet?

Mr. HOBSON. No, indeed; and I am glad the gentleman has brought that out, because when you authorize a battleship you must not think that finishes the authorization. You ought to have four destroyers for every battleship, and the destroyers should be commissioned while the battleship is commissioned. I am glad the gentleman brought that out, and I want to pay my respects to him, for he has been a consistent supporter of the proposition of having sufficient of these auxiliaries to go along with the battleships. I am sorry that I can not say as much for the gentleman from Mississippi [Mr. WITHERSPOON], and it is a remarkable fact that men who come in here and talk about our lack of auxiliaries as a reason why we ought not to have battleships are the very men who vote against auxiliaries in the committee.

Mr. CANNON. Mr. Chairman, I have been very busy in my committee room, and I have not had the pleasure of listening to the gentleman, but, speaking of auxiliaries, has he discussed that question?

Mr. HOBSON. I have just gotten to it now.

Mr. CANNON. If the gentleman will allow me, what I do not know practically about a navy would make a great library——

Mr. HOBSON. Will the gentleman permit me to interrupt him to say that his modesty, with a great deal of valuable information from long years in dealing with these problems, is exceedingly characterisitc and in extraordinary contrast with the astounding wisdom and know-it-all attitude of gentlemen opposing this bill, who have dogmatically settled all the technical questions from strategy and tactics down to the last test for ballistics of great guns [laughter and applause], while some of them never saw a battleship and have been here just long enough to sprout their pinfeathers as Members of this House.

Mr. CANNON. What I wanted to ask was this as a foundation of my query of the gentleman. When that fleet went around the world I was mortified beyond measure that the colliers and a number of other auxiliaries had to sail under a foreign flag, and I am anxious to vote for battleships; but at the same time I am anxious to know that in the event of war that we have proper auxiliaries, because it takes that class of vessels to utilize the battleships.

Mr. HOBSON. I am very glad the gentleman brought that point. We are slowly equipping our Navy with colliers, but in a great war a nation must have an ocean merchant marine from which to draw sufficient colliers and similar auxiliaries. I hope the time is approaching when we shall have a large merchant marine. In this connection I will remark that the naval bill to-day as it comes in is the best-balanced bill that has come in since I have had the honor of being in Congress. It provides six destroyers and six other auxiliaries. I think I may state without involving the secrecy of the committee proceedings that an effort was made to make the number 16. We have not one destroyer per battleship to-day, not one efficient destroyer for a battleship. We ought to have four. Every time we authorize a new battleship we ought to authorize four destroyers in the same bill.

Mr. WILSON of Pennsylvania. Will the gentleman yield for a question?

Mr. HOBSON. I will.

Mr. WILSON of Pennsylvania. Does the gentleman believe it is necessary in time of peace to have a well-balanced Navy and auxiliaries?

Mr. HOBSON. Certainly I do.

Mr. WILSON of Pennsylvania. Equivalent to what you would have on a war basis?

Mr. HOBSON. I certainly do.

Mr. WILSON of Pennsylvania. Is it not a fact that it takes a longer time to build a battleship or a cruiser than it does to build these auxiliaries?

Mr. HOBSON. Very much longer.

Mr. WILSON of Pennsylvania. Then, if it was the purpose of the gentleman——

Mr. HOBSON. That is, the necessary time.

Mr. WILSON of Pennsylvania (continuing). To have a Navy to meet emergencies, what is the necessity of having auxiliaries that can be built in a short period of time?

Mr. HOBSON. I want to say that my statement was only comparative. On a pinch you can build destroyers very much more rapidly, but it is very much better not to have to do it. The destroyers ought to be built with the battleships; the mosquito fleets can be improvised and, for a maritime nation, the colliers to which the gentleman from Illinois referred, but in our case, without a merchant marine, it is necessary to provide colliers in advance.

Mr. GREGG of Texas. Is it not a fact that it takes about three months to build a torpedo destroyer?

Mr. HOBSON. I will say to my friend we have run along about that time. I also mean to say you do not have to build any armor for them or heavy guns, and in number their engines are standardized. The armor and heavy guns is what usually takes the longest time in building the battleships.

Mr. GREGG of Texas. Does not it take 30 months to build them now?

Mr. HOBSON. It takes about that time, a couple of years.

Mr. GREGG of Texas. In stress, can not we build battleships in a comparatively short time?

Mr. HOBSON. The gentleman is very much mistaken. If you try to turn out large numbers of battleships you have to consider the question of armor-plate factories and gun factories, which are not commercial plants, and it takes time to make large extensions of these plants. If we tried to build 20 battleships it would probably take four or five years, or even longer on the average. But, if we had to build 10 or 20 or a hundred of these smaller boats, we could turn them out probably in 12 months and later on in 9 or 10 months——

Mr. LOUD. The war would be over by that time.

Mr. HOBSON. Yes; under certain conditions.

Mr. GREGG of Texas. I understand the gentleman that the department is willfully taking 30 months to build something that can be built in 12.

Mr. HOBSON. Oh, no. Does the gentleman have any other questions to ask.

Mr. CURLEY. Will the gentleman yield for a question?

Mr. HOBSON. Certainly.

Mr. CURLEY. How long did it take to settle the naval supremacy between Russia and Japan?

Mr. HOBSON. Well, the first battle was fought on the 12th of August before Port Arthur. Tsushima was fought several months later. War was declared in February, if I remember correctly.

Mr. CURLEY. Then the naval supremacy between Russia and Japan was settled in a period of about five months?

Mr. HOBSON. No. They carried on those operations around Port Arthur a long time before they fought the Battle of Tsushima, and the Russian fleet had to be fitted out at Cronstadt and come around. If I should guess at it, I should say about a year.

Mr. CURLEY. How long did it take to settle the naval supremacy between the United States and Spain?

Mr. HOBSON. The war was declared about the 21st of April, and the battle of Santiago was fought on the 3d of July.

Mr. CURLEY. A period of about four months. So that it is possible to destroy a navy in about one-fifth the time it takes to build a destroyer?

Mr. HOBSON. The gentleman recognizes here that in that case it was settled by one battle. I will point out to the gentleman—and this brings up a very interesting line—the question of these other battleships. There ought to be two lines of battle, the first line composed of dreadnoughts, the second composed of older battleships. If two fleets of the first line are anywhere near balanced in power, they will both pretty nearly cripple each other. If an appreciable percentage of those dreadnoughts on either side come out unscathed, they will determine the control of the sea, but the chances are if it should be an equal fleet between America and Japan or America and Germany, the fair assumption is they would both destroy each other, and then the control of the sea would rest upon the old-time battleships of the second line that would be in commission and ready.

Now, then, a third line of defense would be behind those, and there is where you would have the mosquito fleets. But I will say to the gentleman that the battle between those dreadnoughts will take place very shortly if the inferior fleet is willing to accept battle, so that for your first line you can only utilize the destroyers you built in time of peace.

Mr. SAUNDERS. Will the gentleman yield?

Mr. HOBSON. I will.

Mr. SAUNDERS. This whole matter is within the meaning of the word "adequate." Having reference to present conditions, and what you think a reasonable likelihood as to the future, what ought our building program to be in order to have an adequate Navy?

Mr. HOBSON. For how long?

Mr. SAUNDERS. Starting now.

Mr. HOBSON. Just as long as Germany and the——

Mr. SAUNDERS. I mean in the number of ships. I said having reference to the present conditions and reasonable likelihood of the future, as you view it, what ought to be our present building program in order to establish an adequate Navy?

Mr. HOBSON. I am telling the gentleman——

Mr. SAUNDERS. I mean in the number of ships.

Mr. HOBSON. I am telling him. It would be what Germany is averaging a year plus what Japan is averaging, making six battleships—two of the battle cruisers and four of the dreadnoughts.

Mr. SAUNDERS. Our present Navy is very inadequate, because of that view?

Mr. HOBSON. It is fast becoming so. I want to say to the gentleman from Mississippi, who was discussing those old ships, that if you let a manufacturing plant that is going to come in close competition with another rely upon its old tools and begin to patch up and repair those old tools it will soon go into bankruptcy. Under his standstill idea the American Nation would soon become insolvent as to national defense. [Applause.]

The CHAIRMAN. The time of the gentleman from Alabama [Mr. HOBSON] has expired.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. DENT having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 8414. An act to authorize aids to navigation and other works in the Lighthouse Service, and for other purposes.

NAVAL APPROPRIATION BILL

The committee resumed its session.

Mr. GREGG of Texas. Mr. Chairman, I yield 30 minutes of my time to the gentleman from Texas [Mr. DIES], and after that I yield another 30 minutes to the gentleman from Illinois [Mr. GRAHAM].

Mr. DIES. Mr. Chairman, the conception of the gentleman from Alabama [Mr. HOBSON] of an ideal nation is a large number of very large battleships surrounded by a sufficient amount of land for coaling stations. [Laughter and applause.] But I must thank him for relieving my nerves during the course of his remarks. He throws one of these fits annually upon the occasion of the bringing in of the naval appropriation bill.

Now, I am one of those gentlemen, like my friend from Mississippi [Mr. WITHERSPOON], who has scarcely sprouted his pin feathers, but I have already been here long enough to hear one of the gentleman's prophecies made when he wanted a larger appropriation for battleships. And, being a new Member, my nerves were of course shattered by the direful forebodings of the warlike gentleman from Alabama. As he stood there, with perspiration bursting from his patriotic visage, he portrayed what would occur in this benighted country within 12 months from the time he was then speaking. Twelve months, or 10 months? Well, a month or two in destroying a great Republic like this is not considered in the arithmetic of the gentleman from Alabama. [Laughter.] He destroys them upon short notice.

Upon that occasion the gentleman from Alabama was destroying this Republic with the grim guns of Japan. I wondered then why gentlemen did not go into paroxysms of fear. It is probably because they had heard his prophecies oftener than I had. [Laughter.] When he said our country would be flat upon its back in 10 months, and Japan would have her yellow hands upon our white throats, I was almost persuaded to give him the two battleships. But he said then just what he said a moment ago: Two battleships were not worth a baubee. It would take six to do the work. [Laughter and applause.]

Mr. Chairman, the gentleman from Alabama is the Don Quixote of this Congress when it comes to war measures. I do not believe, sir, that we are in any great danger from the nations of Europe. I do not believe that because England has a greater navy than we have we should strive to have a Navy equal to that of England. I do not believe that we should strive to have a Navy equal to Germany's navy. I do not know much about war, and not as much about history as the gentleman does, but I do know that England and Germany and France are arming themselves, and that for centuries they have impoverished the taxpayers and the agrarian populations of their lands to arm themselves in defense, one against the other. I do know that if Germany were to leave Europe and come over into this country, making war upon the United States she would be banished from the map of Europe.

It all resolves itself into this: The cry is for Armies and for Navies, and I say that in the light of history there is not a scintilla in the history of the nations of the earth to justify a standing Army or a great Navy in this Republic. We are separated from the politics of Europe by a great ocean. As long as we stay upon this hemisphere—ample, indeed it is to support all of the children of the generations to come—and attend to our own business, unless we are rushed into a war by loud-mouthed jingoes against the peace and security and happiness of this country, we shall remain at peace. [Applause.]

Mr. Chairman, I have heard a good deal about economy, and, being an unsophisticated new Member, with pinfeathers scarcely sprouted, I took a good deal of it seriously. I heard a good deal, I say, about economy. But I have learned two things, Mr. Chairman, in my short service here. A man can bring himself into disrepute in this House more quickly by defending the Constitution and opposing the appropriation bills than by any other course that can be followed. [Laughter and applause.]

When the gentleman from Illinois [Mr. FOSS] began his delightful address, he prefaced his remarks by saying that he was gratified that a Democratic House was following the policy established by the Republican Party. The gentleman's criticism is well taken. The difference between an extravagant Republican and an extravagant Democrat is a difference of principle, and the compliments all go with the Republicans. [Laughter.] The Republican wants to uphold the protective-tariff system. He believes—or tells the gullible world that he believes—that you can make people prosperous by taxing the lights out of them [applause], and that all you have got to do is to tax everything and everybody and thereby make the country wax fat and happy. [Laughter.]

But we Democrats have taken the other view. There is not a Democrat on the floor of this House who has not told the country that for every dollar we take out of the pockets of the people by this protective-tariff tax and get into the Treasury of the United States, it costs the American people $5 to collect it. Then, if what I have said is true, we have an awful accounting to give to the people when they come to judge us for the deeds done in the Sixty-second Congress.

I do not know by just how many hundred millions the appropriations of this Congress will exceed the appropriations of the last Republican Congress, but I do know that we started off with a pork-barrel pension bill that increased the pensions of this country some $40,000,000 or $50,000,000. We promised then that the pork-barrel feature of private pension bills would be dispensed with, but still every Member comes in and gets his pork from the Pension Committee when the time rolls around. So as to the other pork-barrel bills that come before this body. Every man must have his public building in his little town; it is

immaterial whether it has 700 or 7,000 people, according to statements made on the floor of the House. He must have it. If it costs $100,000, according to our Democratic theory it costs the taxpayers $500,000. The trouble about these pork-barrel bills is this, that the committee practice that is followed is "Equal rights for every member of the committee, and special privileges to nobody else." [Laughter.] I do wish and I do fervently pray that the time may come when a public-building bill will be made according to the population and post-office receipts at the place where it is proposed to establish the building, and I do hope the time may come when it may be an automatic matter, so that when a town reaches a certain size and the receipts are a certain amount, the building may result. I say, and I measure my words when I say it, that these pork-barrel bills are a stench in the nostrils of the American people. [Applause.] I know that they are gotten up for the protection of the Members. I know that there is a powerful temptation and a powerful force behind their organization, but that temptation ought to be removed.

I am not as much of an economist now as I was when I first came here. [Laughter.] I have seen so much grand and petit larceny that I am like a soldier who has witnessed bloody carnage on many battlefields. I look upon a litle larceny with more complacency than I formerly did. [Laughter.] My feelings on that subject remind me of what occurred when I was a boy. I hope I may be permitted to rescue a dumb brute from some little obscurity. I was raised in the cross timbers of Texas; that is, with the prairie on one side and the timber of the woodlands on the other. We had a little farm of 114½ acres in the timber belt. We had a good rabbit dog that we called Hunter, and a faithful dog he was. He was part Newfoundland and part shepherd, and old Hunter, on good, level ground, could catch a cottontail rabbit in anywhere from 200 to 250 yards, and on plowed ground he only wanted 60 or 70 yards to catch him. As we boys grew up we needed a little more land to cultivate and my father rented a little farm over in the prairie section, and we carried old Hunter over with the wagon and plows. Over on the prairie they had what they called the mule-eared rabbits, and they said it took a fast dog to make one of them put down his fourth leg. [Laughter.] It was not more than a few hours before one of these mule-eared rabbits got up, and old Hunter took after him, and he made a noise about like a flock of quail flying. He ran the rabbit for a mile or a mile and a half, and in an hour or so he came back with his tongue hanging out, and he was shaking all over, and he lay down under the wagon and stayed very quiet.

The next day a mule-eared rabbit got up in front of him, and he ran him about 200 yards and came back. By the end of the third day the rabbits could play all around old Hunter and he would just raise his head and look at them, but would not stir a step. [Laughter.] I remember when I first came here some one ran into the cloakroom and said the House was about to squander $10,000,000. I jumped up and bounded into the Hall and ran down the aisle and shook everybody as if the Capitol was on fire, and I said, "The people are about to be robbed of $10,000,000." But now, Mr. Chairman, it can be announced in the cloakroom that they are about to be filched out of $50,000,000 and, like old Hunter, the Members just barely look up. [Laughter.]

But, Mr. Chairman, while we are engaged in the erection of all these magnificent stone structures in Pumpkinville and other great centers of the country for our political safety, it is well to take a little peep into the future as to what people are going to do when we present them with the bill at the next election. They have authorized us now to levy and collect an income tax. We are likely to start out with $5,000 or $6,000 as the minimum income which will be taxed; but even though the tax collector only looks for men with $5,000 incomes, he will find a man or two in every one of these little towns in the South and the East and the West and the North, and I want to say that when a tax collector, authorized by Congress, taps this gentleman on the shoulder and says, "Mr. Brown, we want a couple of hundred from you;" "Mr. Smith, we would like to have $10,000 from you"—I am not referring to any one of my colleagues, but speaking figuratively—the gentlemen who pay this tax will be a powerful advance army fighting for economy in this country. They are going to say, "Why did they build that public building down in that little town over in RODDENBERY's district, where there are only 2,000 people?" They are going to say that there is $65,000 at 3 per cent interest, there is a janitor, there is the insurance, and there is all this expense, and they are going to wonder what sort of economy it is to spend these vast sums of money in towns where the rents are not equal to one-tenth of 1 per cent of the interest on the money. And so it is all along the line of appropriation bills. I wish, Mr. Chairman, and I look forward with pleasure to the time when the income tax shall be developed, as it is sure to be developed, in this country. As a matter of principle and justice, a man ought to pay taxes on what he owns and not on what he consumes, and as soon as our industries can all be made to stand alone and gradually from year to year we develop the income tax, we can take the money from the men who have money, taking a part of the income—if it is a little income, taking a little, and if it is a big income we will take a lot. They will hang a great many of the economists who passed the bill, but it will be a good thing for the American people. [Laughter.]

You will go home and face an outraged constituency. They will not meet you with brass bands and ask you if you got that appropriation for Mud Creek, to dredge it out where it is knee-deep, but they will meet you with a frown and a tax receipt in their hands, and ask you why you sent the tax collector for these amounts to squander in needless appropriations.

Oh, the Republican Party has searched for every excuse to spend money as a prop for the protective-tariff system, and, as was truly said on the floor of the House, that in order to bolster up the protective system the Republican Party would be willing to collect the money and put it in tugboats and carry it out and sink it in the ocean in order to sustain the stock argument that they believe that prosperity is based on the protective system, and to tax the people is to increase prosperity.

Now mark you, Mr. Chairman and my Democratic friends, our position is vastly different. We believe that a tariff is robbery. I want to see a system of direct taxation that will give pause to the tendency of the times to the increase of Federal activity.

You know at the last Congress we almost embarked on a good-roads system. That will come next. The public buildings and pensions are here. Now I want to pay a compliment to the old Union soldiers of this great Republic. Mr. Chairman, they not only saved the Government in the time of war but they have saved it in time of peace, because if they had asked this Congress for the Capitol and all the wealth of the Nation they would have gotten it by a large majority. [Laughter and applause.] Considering their opportunity, considering the flexible nature of the Congress, I wonder at the tremendous moderation of the Union soldiers rather than at their excess. I think they are to be complimented if they have not come in and asked for one hundred and fifty billions instead of a hundred and fifty millions.

There is going to be a great amount of wailing and gnashing of teeth at the next election. Now, I do not think for a moment that our friend RODDENBERY has done the Democratic Party a bit of harm. I wish they would keep talking about it. He said no more now than every Republican will say when it comes to the next election. He said there is no bridle on Congress, and there is none. For one, I doubted the wisdom of taking the power from the Speaker, because I thought it was necessary to lodge the responsibility somewhere that there might be a check on the committees of this House. If the Speaker had had the power that the previous Speaker had, while perhaps he would not have wielded it with such harshness and such unpopularity, still he would have been in a position to have said to these committees, "Thus far shalt thou go and no further." But, Mr. Chairman, I do not know how far the appropriations will go. The gentleman from Alabama wants six battleships, and they are likely to get two. Of course, the Republicans want to get us into all the folly they can. They were too wise to appropriate for battleships, too wise to let the public buildings get so large as to be a stench in the nostrils of every decent man.

They were too wise to let the pork barrels run riot, but rather the old gentleman who was in the chair at that time, the distinguished gentleman from Illinois [Mr. CANNON], of blessed memory—and his fame will grow in this country—sat upon the lid and kept it down to within proportions that the constituencies of the country would stand for. But there is nobody on the lid now, Mr. Chairman, and there is going to be an explosion. If you do not cut out this public-building bill, which will carry forty or fifty million when it gets back from the other end of the Capitol, and if you do not watch the river and harbor bill, if you do not get on your knees and pray to the economists who are in charge of the pension measures, if you do not do something to pare these appropriation bills, we will be known as the party who made more promises and more appropriations than any party which ever had charge of the Federal Government. [Laughter and applause.] I do not want this Government to go to building public buildings in every village in the country. I do not want it to go about undertaking to make navigable the dry creeks and small streams of this country, and, with all due respect to my economic friend from Missouri [Mr. SHACKLEFORD], I do not want it to go into the road-

overseer business or the business of building public roads in this country. The pension bill, the public-building bill, the river and harbor bill, would be but as one hog jowl compared to the barrel of pork that we would have if they ever get a bill known as the public-roads bill. [Laughter and applause.] Think of what it will amount to. Every member of the committee will get a hundred miles of road, and every other gentleman, in proportion to his standing, will get from 30 to 40 or 50 or 60 miles. Mr. Chairman, I believe in economy. I do not want the kind of Nation that my friend from Alabama [Mr. HOBSON] wants. I do not want an Army of hundreds of thousands of bristling bayonets and an ocean dotted with tremendous, frowning guns on dreadnoughts. I would rather that we would stay on this God-blessed land, between the oceans, away from the politics of Europe. I wish we could get rid of our miserable little pickaninny holdings in the Pacific Ocean. We have no business with them. They are 8,000 miles from our shores. I do not know where Pearl Harbor is. The gentleman says whoever gets Pearl Harbor will determine whether the race shall be white or black. [Laughter and applause.] Think of it, Mr. Chairman. Awful contemplation! I do not know where Pearl Harbor is, and yet the gentleman tells us if the yellow race gets it we will be yellow, and that it is up to the white race to appropriate all of their earthly possessions to build battleships to hold Pearl Harbor. Do you know we need a good deal of common sense in the Congress of this Nation? and we have got it, too.

Ninety millions of people, the greatest land thieves in the world, descended from the greatest land thieves of history, are not going to be driven off an inch of this tremendous country. We are here. We have driven back all of the foes of our firesides in the years that are gone. We have marshaled armies on the field of battle. We have met foreign countries when there were but three or four or five million of us, and from the issue of those conflicts has risen this great Republic. It is childish, it is foolish, to talk about these 90,000,000 of free people, practically the only republic in the world, giving away their history and traditions, going step by step to a military government, because some gentleman in his fevered imagination has heard something that a war college said might happen to the country. [Laughter and applause.] We can drive back any force upon this earth. So long as we uphold liberty in this country, so long as we uphold the equality of man in this Republic, all of the nations of the earth could not come on this soil and destroy the liberties of the people, and we ought not to want to wage a foreign war.

Mr. Chairman, instead of profiting by the lessons of history, which teach that navies and armies and generals are the bane and foe of liberty, instead of staying on this continent and attending to our own business, rearing schoolhouses and churches and teaching the rising generation to love and watch their liberties and to practice a devotion to their institutions, we are finding ways to build a great navy and a great army. We are tricked in this way and that way. We give our wealth to build a Panama Canal, to have a general come up with his epaulets and blandly advise us, "Now you have done that which means an addition of 25,000 to the standing army." We have been begged to build the Panama Canal, and then we are assured by gentlemen that in order to hold it we have to have a great navy at each end of it. I do not believe that. If the whole world is in conspiracy against us and the size of the navy shall determine the color of the race, we may not be yellow as the gentleman surmises, but we will undoubtedly be English again, because we will never be able to build a navy as large as England. I wish gentlemen could get rid of this nightmare, not only the gentleman with the grand nightmare, but gentlemen with little nightmares all over the land. [Laughter.] I wish they could get it out of their heads that we must stand here trembling because we are about to be invaded. Who wants to invade us, except to buy our cotton and corn and beef—and marry our rich girls? [Laughter.]

Mr. Chairman, I challenge the historians of this House to point to a single nation that ever existed upon the earth that was completely fitted by geography to do without an army and navy to maintain free institutions, except the United States.

France can not do it; she has got to have an army and a navy. Germany can not do it, England can not do it, Japan can not do it, but God has placed us upon this continent, separated from the world by seas and impassable barriers of nature, and if we run to military seed, as every other republic has done in the past, if some general—some Diaz or Huerta—comes on horseback, and finally this Republic goes down in the night of military despotism, as every republic in every age of the world has done, we will owe it to the fantastic Don Quixotes who tax the people to fight windmills of their own imagination. [Applause.]

Mr. FOSS. Mr. Chairman, I reserved a portion of my time, and I desire to yield it to the gentleman from Michigan [Mr. LOUD].

Mr. LOUD. Mr. Chairman, the gentleman from Pennsylvania [Mr. BATES] in his remarks made some comparison between the ships of our Navy at the time of the Spanish-American War and the battleships of to-day. It reminded me that when I was at Annapolis on the Board of Visitors, in conversation, a gentlemen—a civilian, but who was a graduate of the Naval Academy—said to me, "Do you know that a battleship of to-day is equal to 60 *Oregons* of the Spanish-American War?" I was astounded, and I said, "I think you are somewhat radical." He said, "You think of it and see"; and so I did study it afterwards, and I want to give you the result of my thought upon that subject.

As I looked into it I found that the guns of our Navy to-day are double the efficiency of the guns of 15 years ago. The 14-inch guns of our battleships to-day carry shot weighing fourteen hundred and odd pounds. The 13-inch guns of the *Oregon* carry 1,130 pounds. The 13-inch guns of those days were 35 calibers in length, and our 14-inch guns are now 45. We now have a muzzle energy and penetrating force of over double what we had then. So much for the guns.

The battleship *Pennsylvania* of to-day will carry 12 guns. The *Oregon* carried 4, so we have three times the number of guns on the battleship of to-day we had then, and three times two makes six—six times the efficiency we had at the time of the Spanish-American War. Then, at the time of the Spanish-American War, we could load and fire the 13-inch guns once in five minutes. Now we can load and fire three times in one minute. Speed in operating the guns is fifteen times as much as it was then. Fifteen times six makes ninety. There you have a little more than the 60 of my friend; you have 90.

Then, again, the accuracy of our gunners. We find that in those days the average percentage of hits was 3 to 5 per cent, but for comparison we will give it the larger number of 5 per cent. To-day it is upward of 50 per cent, or ten times the accuracy we had then. Ten times ninety makes nine hundred. I am not going to tell you a battleship of to-day is equal to 900 *Oregons*, but I am giving you the figures and you can draw your own conclusions. It only goes to show that skill and brains have gone into the building of our ships and what magnificent results they have brought forth. We now have larger ships—two or three times larger. We now have heavier armor on our ships, and our ships have 5 knots greater speed than they had at that time. The battleship range then was from 3 to 5 miles, and the *Oregon* in its longest shot, made at the Battle of Santiago, carried an elevation for 10,000 yards. Now the range of our 14-inch guns is at least 21,000 yards and a battle range of from 8 to 10 miles. So much for the ships of those days and the ships of to-day. I do not argue that the ships built by other countries have not been making the same advance. They, too, have been building better ships, and we must not underrate the ships of other countries

Now, what is the amount that we should expend? Our bill carries $146,000,000. We find Great Britain spent last year $228,430,064, and the year before $216,000,000, and the year before $197,000,000. Germany spent, a year ago, $110,715,043, and the year before $107,000,000. France spent $81,692,832, and the year before $80,371,109. Japan spent, 1912–13, $46,158,216, the largest amount, I think, that they have ever spent in one year. Now, there are two things to which I desire to call attention concerning the amount of money spent on the navy in those countries. In the first place, Japan, for instance, in its financial condition after the Russo-Japanese War, has had far greater difficulty in bearing the expense of $46,000,000, with the smaller population of that country, than $146,000,000 is with us, the richest nation on the whole face of the globe.

Not only that, but $46,000,000 in Japan will go two or three times as far as that amount would in the United States, and the same in smaller measure can be said of Germany. The amount of $110,000,000 in Germany will go at least 50 per cent further, because most of it in the final analysis goes to labor, which is far cheaper in that country than in this. That is equivalent to a good deal more than $146,000,000 in this country. How much shall we spend? We should spend enough to maintain the honor of this country, to maintain a Navy large enough to guard us from all danger from any other country. When you ask what size of Navy I would advocate, I believe with the importance of this country and our great wealth, the richest nation in the world, that we should stand at least second among the nations of the earth. [Applause.] If we stand second to Great Britain we need not have over half their naval strength and still be stronger than Germany, the now second power.

When we compare the navies of the various countries there are same facts which I think it would be well for us to consider and which I desire to put into the RECORD. We find that in capital ships—battleships and battle cruisers—built and building by the various powers that England will have 76, with a tonnage of 1,417,935; Germany, 43 capital ships, with a tonnage of 766,894; while the United States will have 37 ships, with a tonnage of 610,796; France, 27 capital ships, with a tonnage of 447,649; and Japan 20 ships, with a tonnage of 372,980. While England will have 76 ships and Germany 43 and we 37, do not overlook the fact that the average tonnage of the English ships will be 2,000 tons more than our own. The German ships will average more than 1,000 tons per ship than ours. When we take the dreadnoughts that are built or building we find that England will have 25, with a tonnage of 580,350; Germany 17, with a tonnage of 384,730; the United States 12, with a tonnage of 276,650. Of battle cruisers, England 11, with a tonnage of 248,300; Germany 6, with a tonnage of 139,364; with the United States, none at all; Japan 4, of 110,000 tons.

It is not because we do not want battle cruisers. They are strongly advocated by our naval board and by the Secretary of the Navy, but believing that the House would not consider any more than two battleships we have had to strike them out of this bill in the committee. I hope the day will come, and come soon, when we can have not only battleships but have a reasonable number of swift battle cruisers to go in our fleet. As far as other cruisers are concerned, England has 124, with a tonnage of 873,475; Germany 52, with a tonnage of 256,946; the United States 26, with a tonnage of 223,055; France 31, with a tonnage of 256,375; and Japan 27, with a tonnage of 198,813.

We have the smallest number of any of the five powers. England has 124, Germany 52, France 31, Japan 27, the United States 26.

Of torpedo boats and torpedo-boat destroyers England has 233, with a tonnage of 147,074; Germany 140, with a tonnage of 73,894; the United States 50, with a tonnage of 37,815; France 241, with a tonnage of 52,046; and Japan 112, with a tonnage of 28,441.

This illuminates the subject of auxiliaries, which has been discussed here upon the floor, showing how poor we are in auxiliaries as compared with the other navies of the world.

In submarines England has 86, with a tonnage of 39,508; Germany has 32, with a tonnage of 15,340; United States 39, with a tonage of 13,781; France 109, with a tonnage of 35,259; and Japan 16, with a tonnage of 4,434. In total tonnage built and building here are the comparative figures: England, 2,478,152 tons; Germany, 1,124,257 tons; United States, 898,345 tons; France, 806,729 tons; Japan, 613,724 tons.

In every line, large and small, we stand far below the second nation—Germany. It is not for me to pose as an authority before this House as to what we should have as a Navy. I know you would prefer some higher authority, and I have it here on my desk.

At the time of the Spanish-American War it so happened that I was on the other side of the globe, and it also happened that I was in Dewey's fleet. I had the opportunity—a glorious memory to me—of seeing the personnel of our Navy in action, and it was a sight that would delight any patriot's heart to see how our men and officers carried themselves on that crucial day in far-off Manila Bay. [Applause.] While one admired every man in that fleet, officer and enlisted man, yet one carried away great admiration and love and respect for the grand man who commanded that fleet and who won that victory, utterly destroying the Spanish fleet without the loss of a single American life. [Applause.] And surely that man, who is now promoted to the head of this Navy of ours, who stands as the president of the General Board, is so respected that his opinion is worth consideration by every Member of this House. I am going to read in my time the views of Admiral Dewey upon the size of the Navy which he would recommend, and this article was published a week ago last Sunday in 11 of the largest newspapers of the country.

He says:

Admiral Mahan has stated that the size of the Navy must be determined not so much by what a nation is willing to accomplish as by what it is willing or unwilling to concede in respect to national policies.

The United States must, therefore, measure its strength with the nations that are most likely to oppose our policies, and this strength must be judged by comparative and not by absolute strength.

The United States Navy at present ranks third, with Great Britain and Germany first and second, respectively, and France fourth. With the definite building programs possessed by Great Britain, Germany, France, and Japan, the United States will soon drop to fourth place. The General Board of the Navy (of which I am president) recommended as early as 1903 that the ultimate strength of the United States Navy should be 48 battleships with the necessary auxiliaries, and this policy has been consistently advocated from year to year.

Dreadnoughts must constitute the basis of our building program. At the present time the United States and Germany are nearly equal in capital ships now built or building; but we will soon be third. At the rate of two battleships each year, the United States in 1921 will have 35 dreadnoughts and pre-dreadnoughts; Germany, according to her 1911 program, 55; and Japan, as nearly as can be determined, 36. Situated as we are with such an extensive coast line and interests in the Atlantic and Pacific, our Navy must be prepared for an enemy in either ocean.

PANAMA THE NEW NAVAL KEY.

The Panama Canal, however, will be of immense military advantage to us, because it will enable the concentration of the fleet on either coast in a much shorter time. Without the canal, to insure naval supremacy we should possess a fleet in each ocean superior to that of our most probable enemy in that ocean. With the completion of the canal, the United States, due to its ownership, assumes new responsibilities and obligations. It must exercise military control of and maintain peace in the Canal Zone and its vicinity. Our traditional Monroe doctrine and the open-door policy must be supported. We must be prepared to defend these policies and be ready to defeat any antagonist likely to challenge them. This can only be done by having a Navy adequate to meet any sudden emergency.

And here is a word—"adequate"—which is the very crux of the whole matter:

By "adequate" is meant a navy powerful enough to seek and destroy that of the enemy.

Wars are certain to come, and the Nation must be prepared. The history of all ages has shown that the proper provision for peace is preparedness for war. A large navy makes for peace and is an essential asset to the nation possessing it. National supineness has cost us much in the past, and we can not afford to have it repeated.

WEAK NAVIES HAVE SPELLED DEFEAT.

Cornwallis was not properly supported by the navy. Consequently England lost her colonies. Napoleon fell because Villeneuve was no match for Nelson. The Confederacy lost because the Federal Navy blockaded all its ports, shutting off supplies and revenues. After Spain's Navy was destroyed her colonies were no longer tenable. The defeat of the Russian Navy by the Japanese decided the Russo-Japanese War. Italy in its recent war had command of the sea, and Turkey had to make peace. The Greek Navy at the present time has been a powerful factor in the success of the Balkan States against Turkey.

To have a weak navy courts attack, disaster, and defeat. Diplomatic demands in international affairs will be heeded only if a nation has the necessary force to back them up. The navy is an important factor in international settlements. This Nation can not afford to be content to have its Navy relegated to fourth or fifth place.

The Spanish-American War, which lasted about 100 days, cost us approximately $500,000,000, or about four times the total annual expenditure for the Navy, and this does not include the yearly pensions resulting therefrom, to say nothing of the lives sacrificed. Fifty million dollars properly spent on battleships preceding 1898 would have made this war a hopeless undertaking for Spain.

OUR STANDING BEFORE THE WORLD.

The United States in recent years has become a world power, necessitating the assuming of corresponding responsibilities. These obligations our representative citizens are willing to accept, but turn to our military experts for guidance; and their studies, and not political or economic conditions, must decide.

We must have a Navy, not to wage but to prevent war. It must be a well-balanced Navy—that is, battleships, with the proper proportion of auxiliaries, such as destroyers, scouts, supply and repair ships, etc.; but battleships are paramount, and the building of them must continue. It requires three years to build a battleship, and they can not be bought or improvised. Battleships deteriorate and become obsolete in time, so that provision must be made to replace those in service. Carefully studied and scientific preparation for war must be made in times of peace by our naval officers, but Congress must provide them with the necessary ships. If they fail in this, when war comes—as it surely will—the Nation will not be entitled to win success, but only humiliation and defeat.

Mr. Chairman, during the existence of our country, in 137 years we have been engaged in a war six different times, on the average once in every 23 years; and according to the law of chances it is surely living in a fool's paradise to say that because we are at peace to-day there is no danger of war hereafter.

The condition in our country to-day is a good example of what is liable to come to us at any time. A year ago no one would have thought of such a thing as our being embroiled or brought into war with our neighbor on the South, and yet for the last 10 days we have been on the very brink of it, and we are now drawing a long sigh of relief, hoping that the danger has passed and that war will not come to us again at this time. And yet, Mr. Chairman, a year ago we were in just as much danger of being embroiled in a war with the countries of Europe as we have recently been in danger of becoming embroiled with Mexico. God forbid that the day will ever come, but on the law of chances we must expect that sooner or later we shall have a war with some other country.

I was not here in Washington, or, indeed, in this part of the world, when the Spanish-American War began; but one who is near and dear to me sat in the gallery yonder and heard right here upon this floor Members upon that side demand an immediate declaration of war against Spain, and because our good President would not at the moment consent he was vilified upon this floor and called all the names that congressional etiquette would permit here. He was vilified as much as a man could be simply because he would not declare war as soon as they wanted it right here, and he was burned, as I understand, in effigy in some parts of the country because it was thought

that he lacked the proper resolution. I do not know how to state the reason in decorous terms, but he was vilified because he would not declare war when they demanded it. And when a month had gone by and he, in the meantime, with his Secretary of the Navy and Secretary of War, had made the preparations that were needed, war was declared, and from that day to this not a man in the United States has ever criticized our splendid President, William McKinley, because he did not declare war when it was first demanded. [Applause.] And those who object most to preparing for war and object most to the proper upbuilding of our American Navy would be the very first, if a crisis came, to complain of our unpreparedness. It is the duty of every patriotic citizen of this country, I believe, to stand by the Navy, because when war does come, as it will, it must come primarily upon the sea. This will probably be the last time I shall ever have a chance to vote for battleships, but if I had my way I would gladly vote for three this year to make up for the deficiency of last year, and I would continue the policy of two or more battleships year in and year out until we had a Navy fully equal or a little superior to that of any other power in the world except England. [Applause.]

Let me repeat with emphasis, and call it my swan song if you will, I believe it is the duty of this country to stand at least second among the nations of the earth as a naval power. [Applause.]

Mr. PADGETT. Mr. Chairman, I yield to the gentleman from Mississippi [Mr. HARRISON].

[Mr. HARRISON of Mississippi addressed the committee. See Appendix.]

Mr. PADGETT. I yield to the gentleman from Washington [Mr. WARBURTON].

[Mr. WARBURTON addressed the committee. See Appendix.]

Mr. PADGETT. Mr. Chairman, I ask unanimous consent to close general debate on the naval bill at this time, so that we may begin reading the bill under the five-minute rule.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent that general debate on the naval bill do now close.

Mr. GRAHAM. Mr. Chairman, I object.

Mr. PADGETT. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

The committee accordingly rose; and the Speaker having resumed the chair, Mr. ALEXANDER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill (H. R. 22812) making appropriations for the naval service for the fiscal year ending June 30, 1914, and for other purposes, and had come to no resolution thereon.

Mr. PADGETT. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the further consideration of the naval appropriation bill, and pending that motion I move that general debate on the bill be now closed. On that motion I demand the previous question.

Mr. SAUNDERS. Mr. Speaker, I move that the House do now adjourn.

The question being taken, on a division (demanded by Mr. PADGETT), there were—ayes 28, noes 20.

Mr. PADGETT. Mr, Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The Clerk proceeded to call the roll.

During the call,

Mr. PADGETT. Mr. Speaker, I ask unanimous consent to vacate the roll call and all proceedings connected therewith, and that general debate on the naval appropriation bill close at the expiration of two hours on Monday.

Mr. MURRAY. Reserving the right to object, Mr. Speaker, I would like to inquire if the standing order of the House to meet at 10.30 o'clock applies on Monday?

The SPEAKER. It does. The House meets to-morrow—Sunday—at 12 o'clock for eulogies, but that does not interfere with this request. The gentleman from Tennessee asks unanimous consent to vacate this roll call and all proceedings connected therewith, and further asks unanimous consent that general debate on the naval bill on Monday shall not exceed two hours. Is there objection? [After a pause.] The Chair hears none.

LEAVE OF ABSENCE.

Mr. TALCOTT of New York, by unanimous consent, was granted leave of absence for three days, on account of sickness in his family.

ENROLLED BILLS SIGNED.

Mr. CRAVENS, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 26279. An act granting the Fifth-Third National Bank of Cincinnati, Ohio, the right to use original charter No. 20; and

H. R. 20102. An act relating to proof of signatures and handwriting.

SENATE BILL REFERRED.

Under clause 2 of Rule XXIV, Senate bill of the following title was taken from the Speaker's table and referred to its appropriate committee, as indicated below:

S. 8414. An act to authorize aids to navigation and other works in the Lighthouse Service, and for other purposes; to the Committee on Interstate and Foreign Commerce.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. CRAVENS, from the Committee on Enrolled Bills, reported that this day they had presented to the President of the United States, for his approval, the following bills:

H. R. 26648. An act for the relief of David Crowther;

H. R. 3957. An act for the relief of Isaac Thompson;

H. R. 17260. An act to amend an act entitled "An act to establish in the Department of the Interior a Bureau of Mines," approved May 16, 1910;

H. R. 28187. An act to authorize the construction, maintenance, and operation of a bridge across and over the Great Kanawha, and for other purposes;

H. R. 27837. An act to authorize the Buckhannon & Northern Railroad Co. to construct and operate a bridge across the Monongahela River, in the State of West Virginia;

H. R. 21220. An act to extend the power of the Commissioner General of Immigration, subject to the approval of the Secretary of Commerce and Labor;

H. R. 26812. An act to provide for selection by the State of Idaho of phosphate and oil lands; and

H. R. 23293. An act for the protection of the water supply of the city of Colorado Springs and the town of Manitou, Colo.

ADJOURNMENT.

Mr. PADGETT. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 54 minutes p. m.) the House adjourned until to-morrow, Sunday, February 23, 1913, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS.

Under clause 2 of Rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report of examination and survey of Wills Strait, Casco Bay, Me. (H. Doc. No. 1416); to the Committee on Rivers and Harbors and ordered to be printed with illustrations.

2. A letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, report of examination and survey of Sulphur River, Tex. and Ark. (H. Doc. No. 1418); to the Committee on Rivers and Harbors and ordered to be printed with illustrations.

3. A letter from the Secretary of the Treasury, transmitting copy of a communication from the Attorney General of the United States submitting supplemental estimate of appropriations required by the Department of Justice for the fiscal years 1912 and 1913 (H. Doc. No. 1417); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions of the following titles were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. CLAYTON, from the Committee on the Judiciary, to which was referred the bill (H. R. 28764) to amend section 2 of an act entitled "An act regulating fees and costs, and for other purposes," approved February 22, 1875, reported the same without amendment, accompanied by a report (No. 1567), which said bill and report were referred to the House Calendar.

He also, from the same committee, to which was referred the bill (H. R. 28809) to provide for the punishment of certain crimes against the United States, reported the same with amendment, accompanied by a report (No. 1566), which said bill and report were referred to the House Calendar.

He also, from the same committee, to which was referred the bill (H. R. 28765) to amend section 44 of an act approved March 4, 1909, entitled "An act to codify, revise, and amend the penal laws of the United States," reported the same without amendment, accompanied by a report (No. 1565), which said bill and report were referred to the House Calendar.

He also, from the same committee, to which was referred the bill (S. 7802) to amend section 103 of the act entitled "An act to codify, revise, and amend the laws relating to the judiciary," approved March 3, 1911, reported the same without amendment, accompanied by a report (No. 1568), which said bill and report were referred to the House Calendar.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills, resolutions, and memorials were introduced and severally referred as follows:

By Mr. PUJO: A bill (H. R. 28838) to establish a fish-cultural station in the State of Louisiana; to the Committee on the Merchant and Marine and Fisheries.

By Mr. STEPHENS of Nebraska: A bill (H. R. 28839) providing for the election of postmasters in second and third class post offices; to the Committee on the Post Office and Post Roads.

By Mr. GUERNSEY: A bill (H. R. 28840) authorizing the construction of a railroad bridge across the St. John River between the town of Van Buren, Me., and the parish of St. Leonards, Province of New Brunswick, Dominion of Canada; to the Committee on Interstate and Foreign Commerce.

By Mr. STANLEY: A bill (H. R. 28841) providing that the Director of the Bureau of Engraving and Printing shall be a practical plate printer; to the Committee on Appropriations.

By Mr. FLOYD of Arkansas: A bill (H. R. 28842) to improve the postal service and to fix the salaries of postmasters of the fourth class; to the Committee on the Post Office and Post Roads.

By Mr. PARRAN: A bill (H. R. 28845) to provide for the creation of the office of assistant to the medical officer in charge of physical training and naval hygiene and physiology at the United States Naval Academy; to the Committee on Naval Affairs.

By Mr. HARRISON of Mississippi: Resolution (H. Res. 860) to reprint 1,000 additional copies of the Soil Survey of the Biloxi Area, Mississippi, for use in the House document room; to the Committee on Printing.

By the SPEAKER (by request): Resolution of the General Court of the Commonwealth of Massachusetts, relative to an amendment to the Constitution of the United States giving Congress power to regulate the hours of labor; to the Committee on the Judiciary.

Also (by request), joint resolution of the Senate and Assembly of the State of Wisconsin, that Congress be memorialized to grant a pension of $2,500 a year to the widow of the late Lieut. Gen. Arthur MacArthur; to the Committee on Invalid Pensions.

By Mr. CARY: Memorial from the Legislature of the State of Wisconsin, memorializing Congress to grant a pension of $2,500 a year to the widow of Lieut. Gen. Arthur MacArthur; to the Committee on Invalid Pensions.

By Mr. NELSON: Resolution of the Legislature of the State of Wisconsin, favoring a pension for the widow of Gen. Arthur MacArthur; to the Committee on Invalid Pensions.

By Mr. ESCH: Resolution of the Legislature of the State of Wisconsin, favoring the granting of a pension of $2,500 a year to the widow of the late Lieut. Gen. Arthur MacArthur; to the Committee on Invalid Pensions.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. DICKINSON: A bill (H. R. 28843) granting a pension to Carrie Powell; to the Committee on Invalid Pensions.

By Mr. HARDY: A bill (H. R. 28844) for the retirement of James C. Gunn, first lieutenant, Philippine Scouts; to the Committee on Military Affairs.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. BURKE of Wisconsin: Petition of the Women's Club of Beaver Dam, Wis., and of Mrs. H. E. Andrews and others, of Portage, Wis., favoring the passage of the McLean bill for the Federal protection of migratory birds; to the Committee on Agriculture.

By Mr. CARY: Petition of the Chamber of Commerce of Milwaukee, Wis., favoring the passage of legislation for the establishment of a permanent tariff commission; to the Committee on Ways and Means.

By Mr. CLARK of Florida: Petition of sundry citizens of Miami and Pensacola, Fla., protesting against the passage of certain bills regulating pilotage; to the Committee on the Merchant Marine and Fisheries.

By Mr. DYER: Petition of W. T. Eddingfield, Henry J. Hallam, Jackson A. Winer, J. L. Redinor, N. M. Williams, and the Pastors' Federation of Washington, of Washington, D. C., favoring the passage of the Jones excise bill for limiting the number of saloons; to the Committee on the District of Columbia.

Also, petition of Otter F. Stieffeland, H. A. Steinwender, and W. J. Steinwender, of St. Louis, Mo., protesting against the passage of the Johnston excise bill for the proper observance of Sunday in the District of Columbia; to the Committee on the District of Columbia.

Also, petition of Mrs. W. F. Dimock, New York, favoring the passage of Senate bill 5494, granting the George Washington Memorial Association the armory square as a site upon which to build the George Washington memorial building; to the Committee on Public Buildings and Grounds.

Also, petition of Joseph Helde and 11 other citizens of St. Louis, Mo., protesting against the passage of Senate bill 5461, to regulate the traffic of liquor in the District of Columbia; to the Committee on Appropriations.

Also, petition of George M. Gibert, St. Louis, Mo., favoring the passage of House bill 25685, providing for the labeling and tagging of all fabrics and articles intended for sale under interstate commerce; to the Committee on Interstate and Foreign Commerce.

Also, petition of Francis O. de Luze & Co., New York; Iowa Liquor Dealers' Association, Clinton, Iowa; Melvale Distillery Co., Baltimore, Md.; Imperial American Wine Co.; Bishop-Babcock-Becker Co., and St. Louis Brewing Association, of St. Louis, Mo., protesting against the passage of Senate bill 5461, to regulate the traffic of liquors in the District of Columbia; to the Committee on Appropriations.

By Mr. ESCH: Petition of the Chamber of Commerce of Milwaukee, Wis., favoring the passage of legislation for the establishment of a permanent tariff commission; to the Committee on Ways and Means.

By Mr. GARDNER of Massachusetts: Petition of the General Court of Massachusetts, favoring the passage of an amendment to the Constitution of the United States giving Congress power to regulate the hours of labor; to the Committee on the Judiciary.

By Mr. HOWELL: Petition of citizens of Utah, favoring the passage of legislation asking for a Federal investigation of the persecution of the editors of the Appeal to Reason; to the Committee on Expenditures in the Post Office Department.

Also, petition of the J. C. McDonald Chocolate Co., Salt Lake City, Utah, favoring the passage of legislation for placing nuts on the free list; to the Committee on Ways and Means.

By Mr. LANGLEY: Petition of J. P. Brest, Moravia, Pa., favoring the passage of House bill 1339, granting an increase of pension to veterans of the Civil War who lost an arm or leg; to the Committee on Invalid Pensions.

By Mr. LINDSAY: Petition of George E. Blackhall, George Brady, Richard Vdmittke, Alexander Findlay, and W. J. Murray, Brooklyn, N. Y., favoring an amendment to the naval appropriation bill providing for the building of one of the new battleships in a Government navy yard; to the Committee on Naval Affairs.

Also, petition of the Interborough Association of Women Teachers, Brooklyn, N. Y., favoring the passage of House bill 19115, for payment due old men and women found by the Court of Claims for labor in the navy yards; to the Committee on War Claims.

By Mr. LOBECK: Petition of the Grand Army of the Republic of Nebraska, protesting against the passage of the bill to transfer the Pacific Branch of the National Home for Disabled Volunteer Soldiers to the War Department; to the Committee on Military Affairs.

By Mr. MARTIN of South Dakota: Petition of sundry citizens of Vale, S. Dak., favoring the passage of Federal legislation authorizing national banks to make loans on farm-mortgage securities; to the Committee on Banking and Currency.

By Mr. NEELEY: Petition of citizens of Pawnee County and Barton County, favoring the passage of House bill 28188, providing for reconstruction and maintenance of the old National

Road from Cumberland, Md., to St. Louis, Mo.; to the Committee on Agriculture.

Also, petition of citizens of Kansas, protesting against the passage of legislation requiring higher licenses and qualifications on rural salesmen of home remedies, spices, toilet articles, etc.; to the Committee on Interstate and Foreign Commerce.

Also, petition of citizens of Barton County, Kans., favoring the passage of the Kenyon-Sheppard bill preventing the shipment of liquor into dry territory; to the Committee on the Judiciary.

Also, petition of citizens of Finney County, Kans., favoring the passage of legislation for the establishment of a system of foreign credit; to the Committee on Banking and Currency.

By Mr. PORTER: Petition of citizens of Allegheny County, Pa., favoring the passage of the Weeks bill for Federal protection of migratory birds; to the Committee on Agriculture.

By Mr. SCULLY: Petitions of citizens of Asbury Park, Woodbridge, Jamesburg, Englishtown, South River, Freehold, and Metuchen, all of New Jersey, favoring the passage of legislation compelling concerns selling goods direct to the consumer by mail to contribute their portion of the funds for the development of the local community, county, and State; to the Committee on Interstate and Foreign Commerce.

By Mr. THOMAS: Petition of members of the Seventh-day Adventist Church, Bowling Green, Ky., protesting against the passage of the Johnston Sunday bill (S. 237) for the proper observance of Sunday in the District of Columbia; to the Committee on the District of Columbia.

By Mr. TILSON: Petition of Mary Floyd Tallmadge Chapter, Daughters of the American Revolution, favoring the passage of the McLean bill for the Federal protection of migratory birds; to the Committee on Agriculture.

By Mr. UNDERHILL: Petition of the United Hatters of North America, Brooklyn, N. Y., protesting against the passage of legislation reducing the tariff on hats; to the Committee on Ways and Means.

HOUSE OF REPRESENTATIVES.

SUNDAY, *February 23, 1913.*

The House met at 12 o'clock noon.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Hear my cry, O God; attend unto my prayer. From the end of the earth will I cry unto Thee when my heart is overwhelmed; lead me to the rock that is higher than I. For Thou hast been a shelter for me and a strong tower from the enemy. I will abide in Thy tabernacle forever; I will trust in the covert of Thy wings.

From time immemorial, O God our Father, men's hearts have turned instinctively to Thee in great crises for help, in sorrow and grief for comfort, in every contingency for inspiration and guidance; so our hearts turn to Thee as we assemble in memory of men who by faithful service in State and Nation gained for themselves the respect and confidence of the people, wrought well among us, left the impress of their personality upon our minds, and made a place for themselves in our hearts which time nor space can erase. "For we know that if our earthly house of this tabernacle were dissolved we have a building of God, an house not made with hands, eternal in the heavens."

"We leave this and straightway enter another palace of the King more grand and beautiful."

We mourn their going, but not without hope. We are cast down but not overwhelmed, dismayed but not confounded.

For the love of God is broader
Than the measures of man's mind,
And the heart of the Eternal
Is most wonderfully kind.

Enter Thou O God our Father into the desolate homes and bind up the bruised and broken hearts with the oil of Thy love, that they may look through their tears to the rainbow of hope and follow on without fear and doubting into that realm where all mysteries shall be solved, all sorrows melted into joy, soul touch soul in an everlasting communion, and eons of praise we will ever give to Thee, in the spirit of the Lord Christ. Amen.

The SPEAKER. The Clerk will read the Journal of the proceedings of yesterday.

Mr. MORGAN of Louisiana. Mr. Speaker, I ask unanimous consent that the reading of the Journal be dispensed with.

The SPEAKER. The gentleman from Louisiana asks unanimous consent to dispense with the reading of the Journal. Is there objection? [After a pause.] The Chair hears none. Without objection, the Journal will stand approved.

There was no objection.

THE LATE REPRESENTATIVE ROBERT C. WICKLIFFE.

The SPEAKER. The Clerk will report the special order.

The Clerk read as follows:

On motion of Mr. MORGAN of Louisiana, by unanimous consent,
Ordered, That Sunday, February 23, 1913, at 12 o'clock m., be set apart for addresses upon the life, character, and public services of Hon. ROBERT C. WICKLIFFE, late a Representative from the State of Louisiana.

Mr. MORGAN of Louisiana. Mr. Speaker, I offer the following resolution.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 861.

Resolved, That the business of the House be now suspended, that opportunity may be given for tributes to the memory of Hon. ROBERT C. WICKLIFFE, late a Member of the House from the State of Louisiana.

Resolved, That as a particular mark of respect to the memory of the deceased and in recognition of his distinguished public career the House at the conclusion of the memorial exercises of the day shall stand adjourned.

Resolved, That the Clerk communicate these resolutions to the Senate.

Resolved, That the Clerk send a copy of these resolutions to the family of the deceased.

The resolution was unanimously agreed to.

Mr. MORGAN of Louisiana. Mr. Speaker, we are here convened to pay honor to the memory and to delineate the life, character, and public service of one of Louisiana's most promising and polished sons, the late ROBERT C. WICKLIFFE, who, on the 11th day of June, 1912, was cut off in the flower of his youth and in the height of a career of usefulness to the people.

In the usual course of human events the sadness of death is softened in the preparation of its inevitable coming, but when, without premonition or warning, it takes from our midst the loved and honored and lays at our feet the cold and inanimate clay in exchange for the pulsate life of a warm and joyous heart, the blow falls heavily, and the will of God seems a wondrous way that is hard for us to understand. Yet I know of no one better prepared to face the judgment of God without preparation.

ROBERT C. WICKLIFFE was born on May 1, 1874, at Bardstown, Ky., while his parents were visiting relatives in that State; hence Kentucky commingles her pride and her sorrow with that of Louisiana in the life and death of her illustrious son. They both suffered a common loss.

He received his primary education in the public schools of West Feliciana Parish, La., thereafter entering Center College, Danville, Ky., from which institution he graduated in 1895 with the degree of B. S. Immediately after, he matriculated as a student in the law department of the Tulane University, at New Orleans, La., completing his course in 1897, after which he returned to West Feliciana Parish and actively entered into the practice of his chosen profession.

His people, at once recognizing and appreciating his transcendent ability, elected him to represent that parish in the constitutional convention of 1898, and after the adjournment of that august body he enlisted in Company E, First Louisiana Volunteer Infantry, and served throughout the Spanish-American War, and was mustered out with his regiment in October the same year. He returned again to West Feliciana Parish to resume the practice of law, and in 1900 was elected district attorney of the twenty-fourth judicial district of Louisiana, serving his people in that capacity with distinction up to 1904.

In 1908 he became a candidate for the nomination for Congress from the sixth congressional district, and, having received the nomination in the second primary, was elected to the Sixty-first and reelected to the Sixty-second Congress without opposition.

Mr. WICKLIFFE was of noble and distinguished extraction. His grandfather, Charles A. Wickliffe, served several terms in Congress, was governor of Kentucky, and subsequently Postmaster General in the Cabinet of President Tyler. His father, R. C. Wickliffe, was governor of Louisiana.

Now, while it is perfectly clear that a great name was handed down to "Bob" WICKLIFFE, yet it is equally obvious that he united distinction to the honors his ancestry had already gained.

In looking over the life of Mr. WICKLIFFE the soil of my nativity becomes dearer to me for having nurtured such a man, not that his accomplishments have drawn him into the spotlight of public recognition, not that his genius overshadowed the efforts of his fellow men, but that he crowned manhood with the dignity of honor and the spirit of loyalty, linked the refinement of the southern gentleman to the rugged worth of the son of toil, and by no act of his lessened the respect due to his life of usefulness. The result of his work in the estimation of his char-

acter is an insignificant reflection of the nobleness of his mind and the possibilities of his future.

Those who have had the honor of his confidence and friendship, who have communed with him when the curtain was drawn and the ambitions of his life were made bare, will pay tribute to the nobility of his nature, the unselfishness of his disposition, and the simplicity and purity of his character.

The future that promised so much for him was blotted out by the hand of destiny, but he has left behind him the inspiration that guided his footsteps toward the citadel of fame, and the influence of his life will be a stepping-stone to the accomplishments of others.

To know Mr. WICKLIFFE was to love him; to meet him was to become his friend. The ineffable kindness of his smile and the courtesy of his manner one could never forget. He was honest because it was part of his nature, born of the principles that were the foundation of his success.

He was congenial, because in the unselfishness of his disposition he found pleasure in self-sacrifice for the happiness of others. Therefore he had woven into the texture of his life the power to incline people to do that which he desired done. There was no necessity to sift his motives, no suspicion of hidden incentive, no sacrifice as an exchange for concessions or the price of pacific toleration. Either in the initiative or when he gave his support to others, his motive was the uplift of his fellow men.

Absorbed as he was in the problems of public importance, the domestic side of his life was full of the pleasures that come of a happy union. He was devoted to his wife and child, and his happiest moments were spent with them. Married to a lady in a high degree his helpmate, molded into the life that is given to prominence by intellect and charm of personality, with the instinctive qualities that give social success and enjoyment to social occasions, she drew to his home at those functions men and women whose influence and high standing made it an honor to know and whose friendship and assistance meant much in the accomplishment of matters of public moment.

Mr. WICKLIFFE was a young man, forcing recognition of his ability and worth at an age when most men are looking to the future for a foothold on the path that leads from obscurity. He was ambitious to become useful to his country and had consecrated his life to the public use of his fellow men, always cooperating with them in the propagation of right and justice. His peculiar fitness for the life he had chosen was evidenced by those traits that make leaders of men. He was of a temperament that brought to him the support of others by magnetic attraction. His individuality was marked, but not obtrusive or antagonistic, because the firmness of his character was so merged and blended in his fine social qualities, his optimism was so cheering and alluring, that he often won battles without leaving any wounded on the field or humiliation abiding in the heart.

That his work was quick in gaining recognition in his district and State will be appreciated by those who understand the difficulties of conflicting commercial interests and the impulses and ancestral influences arising from French and Spanish heredity. To stand firm in the convictions of founded principles and yet unite the strength of opposing forces is an accomplishment significant of a high degree of ability and character that must command both respect and admiration.

The rapidity with which Mr. WICKLIFFE gained public favor and the ability with which he conducted the affairs intrusted to him by the people won him honor and distinction. He became a uniter of factions and a strengthener of the principles of democracy, and I venture the assertion that if the life of this splendid man had been spared his great worth and influence would have been felt throughout the length and breadth of this great Nation.

Mr. CLARK of Missouri. Mr. Speaker, by his brief and highly honorable career, in peace and in war, ROBERT C. WICKLIFFE added renown to a name famous in the annals of Kentucky and the Southwest from the beginning of Caucasian supremacy in that rich and prosperous section of our country.

One of my first recollections of politics was the election of his grandfather, Charles A. Wickliffe, to Congress in the spring of 1861. Before that he had served repeatedly in the Kentucky Legislature and had been speaker of the more numerous branch thereof. He had also served several terms in Congress from time to time, had been governor of Kentucky, a member of the Cabinet, was sent on an important secret mission to the Republic of Texas, was an officer in Harrison's army in the War of 1812, was a delegate to the Democratic national convention at Chicago in 1864, and was a great lawyer. His son, the father of ROBERT C. WICKLIFFE, was a Confederate soldier and governor of Louisiana, and his grandson, J. C. W. Beckham, was for almost eight years governor of Kentucky. So our friend, ROBERT C. WICKLIFFE, took naturally to politics and the law. It was in the blood.

He and I were born in adjoining counties in Kentucky, I near Lawrenceburg, county seat of Anderson County, and he at Bardstown, county seat of Nelson. Consequently, when he came to Congress, I searched him out and gave him suggestions, helpful in getting a start; suggestions about things which, left to his own resources, a new Member can learn only in the hard school of experience. The pleasant friendship thus formed continued, growing closer and stronger as the years rolled by, till the day of his death. No one outside of his immediate family mourned his untimely departure more than I did. He was cut down in the prime of his splendid powers—almost at the beginning of what promised to be a long and distinguished career. Young, handsome, modest, honest, honorable, capable, courteous, courageous, and faithful, he was a prime favorite in the House, which is a fine judge of men, and his tragic end created a profound sensation and widespread grief, such as the membership rarely experiences.

I have said that he was born at Bardstown, Ky., the ancient habitat of his family. That is a small town, but is rich in history, legend, and tradition. It is one of the oldest towns in Kentucky. It was the seat of the first Catholic see beyond the Alleghanies. It has long been famous for its schools. The pioneers who laid its foundations were a remarkable set of men and women, as fine representatives of our race as can be found betwixt the two oceans. The Wickliffes, the Hardins, the Johnsons, the Rowans, the Hardings, and others like unto them served and adorned the Republic in every walk of life and in every department of government. Cities, counties, and towns have been named for them. Their fame is part of the treasures of the Republic. In life ROBERT C. WICKLIFFE illustrated their high qualities, and in the grave he is worthy of their noble companionship.

Mr. RODENBERG. Mr. Speaker, during a service of 12 years in the Congress of the United States I have met representatives of every type of our complex American citizenship. I am entirely sincere when I make the statement that in all those years I have never met a finer or truer type of genuine American manhood than is to be found among the men who have represented the State of Louisiana in this Chamber. I believe that Louisiana more than any other State in the land of sunshine and of flowers has preserved in all its strength and purity the best traditions of the chivalric spirit of former days, and those who knew him well will bear testimony to the fact that ROBERT C. WICKLIFFE embodied in his attractive personality the finest quality of that spirit. He was the very personation of true manliness. A "gentleman to the manner born," kind, considerate, and courteous, he was incapable of deception in thought, word, or deed.

I first met him several years ago at the funeral of the late Robert C. Davey, and instinctively I fell under the charm of a personality that was as natural as it was magnetic. That acquaintance ripened into a sincere friendship that will always be treasured by me as one of the most pleasant memories of my congressional life.

BOB WICKLIFFE was a man of courage, character, and capacity. Endowed with an intellect of scintillating brilliancy, broad in culture, and liberal in his views, no man ever entered this Chamber better equipped to discharge the duties of a Representative. His knowledge of political history was as thorough and comprehensive as that of any man I have ever met. I have talked with him for hours on matters of historic interest, and his keen analysis of men and measures, his complete knowledge of the causes leading up to every important event in our Nation's history, and his intelligent and philosophical deductions as to their effect were as entertaining as they were instructive. In all of these delightful talks there was ever present that broad spirit of charity and tolerance which is the true index of culture and refinement.

ROBERT C. WICKLIFFE had confidence in his fellow man. Believing implicitly in his country and her ultimate destiny, he faced the future without any misgivings. He did not affect to believe that all that is good and pure and true and noble and inspiring in our national life died when the founders of the Republic passed away. He had an abiding faith in the triumph of any great question of truth or justice submitted to the will of a free and an enlightened people. He never impunged the motives of those who disagreed with him. Honest and honorable himself, he conceded to others the same integrity of purpose that animated his own personal and official acts. He was a man of the highest ideals. Fidelity to principle and loyalty to honest conviction were the cardinal tenets

of his political creed. At all times and under all circumstances he possessed the courage that is born of conscience and that has its origin in the loftiest conception of public duty. Quick to approve and slow to condemn, generous to friend and foe alike, always sympathetic and responsive, anxious to help rather than to hinder, it is no wonder that when the news of his tragic taking off reached this chamber every Member felt that he had sustained a personal loss.

Mr. Speaker, death is always sadly impressive. "The tear, the groan, the knell, the pall, the bier, and all we know or dream or fear of agony" are his. But to die young, to die in the very prime of physical and intellectual manhood, to die while the shadows still lengthen toward the west and years of usefulness stretch out before one is doubly pathetic.

ROBERT C. WICKLIFFE'S brief race is run. For him the mystery of life and death has been solved. He sleeps the sleep of eternity. Slowly and sadly we consign his mortal remains to the cheerless grave, and as the sods, moistened by our tears, close in above them we call and listen. From the voiceless tomb there comes no answer. Only an echo which seems to mock our sorrow is wafted back. The somber shadows thicken. All is dark. We are overwhelmed in doubt. But suddenly the mystic veil that separates the present from the hereafter is swept aside. A light breaks forth. It is the light of the spirit of immortality, triumphant still, shedding joy and peace and hope eternal. There, there amid the splendors of the eternal dawn, we behold our colleague crowned with the wreath of immortal glory that awaits him who in all of the vicissitudes of life has been true to himself, true to his country, and true to his God.

Mr. BLACKMON. Mr. Speaker, I was elected to the Sixty-second Congress, and when I came to Washington, March 3, 1911, one of the first acquaintances I formed was the late Hon. ROBERT C. WICKLIFFE, of Louisiana. I saw little of him during the few days I was in Washington at that time, but when I returned to the extraordinary session, which was called April 4, 1911, Mr. WICKLIFFE was one among the first Members of this body to offer friendly suggestions to me concerning my various duties as a Member. His suggestions and advice were of value to me; he seemed to take a special interest in me, and before I had served long with him in the extraordinary session I learned to love him. I found but few men who seemed to take the same interest in what we term "new Members" as did Mr. WICKLIFFE.

He had served but one term before I came here, but had mastered the rules of this House as few men have. His judgment on all questions was of great value.

I lived in the same hotel with him, and last year when I left the hotel and secured an apartment he secured an apartment in the same apartment house.

I saw him each day after I came here, because he was at all times attentive to his duties as a Member of this House. In the House he was affable and courteous, and in his home he displayed those lovable traits that were characteristic of him, and which drew men to him in strong bonds of friendship.

On the morning that he met his tragic death I saw him in the lobby of the Burlington Apartment House, where we both lived. He had his beautiful little child in his arms, and when I stopped to speak to him he seemed to be in his usual happy and contented frame of mind. I can not express the shock I experienced upon learning within an hour afterwards that my friend was dead.

In the death of Hon. ROBERT C. WICKLIFFE Louisiana, and, indeed, the whole Nation, sustained a loss. Few men, in my judgment, are better equipped to render public service than was the late Hon. ROBERT C. WICKLIFFE.

Mr. WICKLIFFE loved his country, his State, and his fellow man. He was a gentleman to the manor born. I join to-day with the people of Louisiana and the Nation in mourning the loss of a truly great man.

Mr. MURDOCK. As individuals, we, in this body, are infinitely multiple and various. However single we may be in ideal, impulse, and purpose, the first view each of us brings to every common problem in Congress is markedly individual. Environment must have much to do with that. And our environment is endless in variety. There is not much in common in the vision of physical things between the denizen of the crag-crowned heights of Montana and the dweller on the green and floor-flat prairies of Dakota. The men of the grim woods of Wisconsin can not have the same survey of affairs as do their brothers lolling along the Texas Gulf shore listening to the lazy swell lap on the slanting yellow beach. It is a far cry from the cold coast of Maine booming this hour through the gray solitude of a winter day and the drowsy precinct where the velvet winds from the Pacific stir among the nodding roses in the garden down San Diego way.

The House of Representatives, in the difference of viewpoint in the men who constitute it, is the Nation in miniature. Every man who comes here is, in a way, conscious that his view of things differs from that of his fellows. It may be a view that is sectional, or is peculiar to his State, or to a certain section of his State, for the multiplication of American types continues within State lines.

Now, it is this circumstance which gives to the Congress much of its color and service here much of its charm.

And while Congress often appears laggard, and is, ultimately Congress does write into law the prevalent sense of right; does produce, under the spur of popular impatience, by some latter-day alchemy, and through collision and contest and compromise and final union of contrary elements and interests, that marvelous mutuality of thought and deed which we all feel lies back of the Nation's vitality and must continue to be the mainspring of our nationality.

To me, then, the first appearance of a Member of the House is always a matter of interest. He is most interesting, however, when he brings frankly his view and his section's view to bear upon debate. We all grow to know the House, its child-like emotions, its splendid generosity, its equally severe condemnation, and, in time, to feel a profound respect for its sense of accurate discrimination. Eventually the membership here fashions every Member, but if he possess the virtue of industry, every Member, reciprocally, fashions the House. The process continues interminably—begins anew, in fact, every time a new Member makes his first appearance in vigorous debate.

Early in my service in the House I noticed that certain of the older Members, notably Col. Hepburn, of Iowa, and Mr. JOHN DALZELL, of Pennsylvania, whenever a new Member took noticeable part in debate, consulted the biographical directory. It is an excellent practice, and, following it, on one occasion, when the late ROBERT WICKLIFFE, of Louisiana, addressed the Speaker, I discovered that he was of the Wickliffe family of Kentucky; that his birthplace and that of his father and his grandfather was Bardstown, the second oldest town in the State, the home of our colleague, Mr. BEN JOHNSON.

My interest in young Mr. WICKLIFFE was heightened through the circumstance that a short time before I had read in an ancient and forgotten Government document the story of how Postmaster General Wickliffe, under Tyler, had placed before Congress the then existing railroads' proposition that if the Government would assume the total railroad indebtedness, then $5,000,000, the railroads would agree to carry the mails free for all time to come, a proposition which Congress, with singular conceit, unfortunately rejected.

I made young Mr. WICKLIFFE'S acquaintance and found that the former Postmaster General was his grandfather; that the family was political; and that his father had been governor of Louisiana just before the Civil War. As our acquaintance broadened into friendship I came to know young Mr. WICKLIFFE as a splendid example of a type that is characteristically American and finds particular exemplification in some of the Southern States. The Wickliffe family was political; its inclinations and activities found naturally that channel. Our young friend loved the activity and understood it.

In every community there are families which produce merchants from generation to generation, others which contribute members to the professions; and there are also in almost all communities certain families that are naturally political.

The predilection is potent and persistent. It holds through generations. The members of such a family know the rules, the language, the customs of the "game," the fascinations of politics and its futilities, as well as the deep desire for real service, which is more often the cause of personal political activity than a cynical age allows. The father usually passes the political trait to his son.

I imagine there is no State in the Union west of the Alleghenies where this American characteristic may be followed more closely than in Kentucky. There are families there which have flourished politically for over 100 years, and identification of this activity is possibly easier by reason of the fact that Kentucky stood midway between the great tides of westward immigration on the north and the south and escaped both to a considerable extent. One who glances over a history of the State finds certain family names persisting from decade to decade, as Nicholas, Todd, Shelby, Logan, McAfee, Magoffin, Calloway, Henderson, Bristow, Helm, Buckner, Breckinridge, Floyd, Harlan, Desha, Clark, McCreary, Crittenden, Speed, Brown, Mar-

shall, Pope, Allen, Garrard, Johnson, Dudley, Trimble, Davidge, Menefee, Owsley, Guthrie, Tilghman, Ballard, Blackburn, McDowell, and Hardin.

Charles Wickliffe, who served in Congress from 1823 to 1833, and was Postmaster General from 1841 to 1845, was born in Bardstown in 1788. The Wickliffes had been in the Indian wars and the Revolution. They were intermarried with the Hardins and the Cripps, both of which families suffered from Indian warfare. Nearly all the Wickliffes were lawyers and worthy the remarkable bar of early Kentucky, and, in the nature of things, they had voice in public affairs. A Robert Wickliffe served in the State legislature in 1819, 1823, and 1825, and thereafter as State senator until 1833. Another, Nathaniel Wickliffe, was prominent politically, and as a lawyer had such skill in the preparation of cases that Ben Hardin, who is still quoted in Kentucky, said:

With Cousin Nat to write the song and Cousin Charles to sing it, they could beat the world.

Another, John Cripps Wickliffe, was a circuit judge and soldier of the War of 1812. The activity which this generation displayed was repeated in the next. One of the sons moved to Louisiana, where he served long in the State senate and was four years governor. His son, our friend, was born in 1874, while his parents were visiting the old Kentucky home in Bardstown. Before ROBERT WICKLIFFE was 25 he was representing his parish in a constitutional convention. At the outbreak of the Spanish War he responded to the call that was in his blood and enlisted as a private. Later, in 1908, before he was 35, he had been elected to Congress.

All who had the good fortune to know ROBERT WICKLIFFE here knew him as one of surpassing qualities of mind and heart and for his generosity and his gentility. He had the reserve and, it seemed to me, a survival of the old-fashioned dignity and unaffected mental attitude of patriotic service which characterized the day of his forebears, an attitude which made him appear to me at times to have stepped out of the past; out of the Kentucky of old, the Kentucky of Clay and Barry; the Kentucky where the Fourth of July was a solemn celebration, and where Washington Irving, using for the first time the expression "almighty dollar," was accused of irreverence; the Kentucky of coaches and four, of ruffled shirts, high stocks, and beaver hats. And with this grace and charm which was his and which seemed of the past he had a youthful, vigorous, eager grasp of current political problems which made him delightfully alive to the humanities and nobilities of his own day, for he had great love for his country. He was quick to identify our perils, eager to assist in our development nationally. He knew how to be of service, with a gift for dispatch of the business in hand, with ready decision, freedom from fear; with small patience for the technical letter of the problem, but grave reverence for the principle and spirit of it. And he had vision; a belief in the future of the democracy and the high destiny of the Republic; an eagerness to push on to its realization. Liberty, he knew, was given us not to maintain but to perfect. It was his desire, his purpose, his joy, to help in that.

At the very beginning of his career he was taken away from us tragically. He went out into the shadows where for each of us a grave is hidden. He was a gentle, lovable, kindly soul, with much of the grace of the past and all the eager, vibrant, radiant charm of youth in his mind and heart. We have his memory, and we are better for it.

Mr. CANTRILL. Mr. Speaker, we meet here to-day to pay just tribute to the life of the Hon. ROBERT C. WICKLIFFE. Kentucky gave him birth May 1, 1874. On June 13, 1912, Kentucky folded him into her bosom for the eternal sleep. After years of distinguished service to the great State of Louisiana and to the Nation he rests peacefully through the long night near the place of his birth. His beautiful resting place is in keeping with his life and character. In behalf of many friends and relations in the old Kentucky home I join with my colleagues here to do honor to the memory of a devoted friend and a noble man. This occasion is not one of mere formality or custom; we come here because we loved BOB WICKLIFFE. To know him was to admire him. In his private life, gentle, accomplished, courteous always; in public life, attentive and loyal to the interests of his people and his country. I firmly believe I speak the truth when I say that no one in this Congress was more liked and loved by his associates than ROBERT C. WICKLIFFE.

No higher tribute can be said than this. One must have the qualities and the virtues of a nobleman to so impress himself upon the hearts and minds of his associates in this great body.

The fact that he held high office at the hands of his own people showed their love of him and their trust in him. Their confidence was well placed, and these tributes to-day from those who worked with him here are messages to the people of the sixth congressional district of Louisiana that their faith in him was well founded. Mr. WICKLIFFE came from an old and distinguished family in American history. It can be truthfully said that he added honor and luster to a distinguished name. He was an ornament to his profession. He helped to write the constitutional law of his great State. When his country was in peril he enlisted under the flag of freedom. He served with ability and distinction in this body. Had not a deplorable and fatal accident overtaken him a long and a brilliant career would have been his lot. Although he has gone forever, the sweetness of his character lingers with us as the fragrance of a crushed rose.

In the great strife of modern life it is well that on a beautiful day like this, set apart to worship the great Creator, we should stop and with bowed head and sorrowful heart pour out our true feelings of admiration and love to the memory of one who was in every way worthy of the noblest sentiments within us.

In Kentucky, as well as in Louisiana, this is a sorrowful day for thousands of friends of ROBERT WICKLIFFE, yet the heads bowed in sorrow can be raised in proudness as the story of his career is told, because his life was clean, his character was pure, his achievements were noble.

ROBERT WICKLIFFE had a heart full of sympathy for those in distress. How well do I remember his sorrow as he told me of the sufferings of his people as their hopes were swept away by the great flood. How well do I recall his joy in helping to secure relief for those who suffered by the rush of mighty waters. Though his heart was filled with sorrow for the sufferings of his people, he worked valiantly and successfully for their relief. When that warm heart ceased to beat the Southland lost one of her noblest sons and the Nation one of its truest servants.

Kentucky to-day joins with Louisiana in a tribute of love, affection, and admiration for the life, character, and public service of Hon. ROBERT C. WICKLIFFE.

It is a good thing to be rich, it is a good thing to be strong, but it is a better thing to be beloved of many friends.

Our departed colleague was rich and strong in the possession of many friends. This House is quick to perceive the faults of men; it is equally as quick to recognize the virtues of men. In the three years that Mr. WICKLIFFE served in this body I never heard a single Member utter a word concerning him that was not to his credit as a man and as a Member. His many virtues were soon seen and admired by his colleagues.

He wrote his name with love, mercy, and kindness on the hearts of those about him. His memory will linger with us that knew him always.

It has been said that—

Friendship is the scarlet thread let down from the windows of Heaven to bind human hearts together.

The single thread of friendship is multiplied many times into the strong cord of love and memory as we think of him in the great beyond.

In the brief time at my command to-day I have not endeavored to dwell in detail upon the distinguished public service of our departed colleague. Sufficient for me to say his honors were many, and in every instance he proved himself entirely worthy. I have tried to speak of what I considered his chief characteristic, namely, his loyalty to his friends and to his ideals, which were of the highest type. He had the courage always to speak his convictions, but, coupled with that courage, was a charm of manner that bound men to him.

Remembrance is the sweetest flower of all this world's perfuming.

The memory of our departed colleague, the Hon. ROBERT C. WICKLIFFE, impresses upon our hearts the truth that—

A friend is one of life's best blessings. To be a friend is to be lifted a little way toward Heaven each day.

Mr. HARRISON of Mississippi. Mr. Speaker, few men have been elected to this House who were endowed with greater natural ability, better equipped for its arduous duties, and with a brighter future for a most successful career than ROBERT C. WICKLIFFE.

Although a young man when he entered this House in the Sixty-first Congress, he was no novice in the public service. By heredity, environment, and training he was naturally fitted for the service of his people.

At the age of 24 he was chosen by his people to represent them in the constitutional convention that formulated the present organic law of his State.

At the age of 26 he was elected to serve them as district attorney. In both capacities he displayed such signal ability, clear judgment, and great resourcefulness that it won for him deserved popularity and the Democratic nomination and election to Congress in 1908.

He was of a kindly disposition, fond of sports, and a lover of nature. In the reading of the history of great men he reveled; in good literature he found pleasure; and in the study of economic questions he took especial delight. In the investigation of any subject he was studious, painstaking, and thorough. In debate, with his keen, analytical mind, he was logical and convincing.

The words that were applied by him in paying deserved eulogy to Senator McEnery, of his State, could very properly be applied to BOB WICKLIFFE:

His honesty was his pride, and the slightest stain upon his reputation for probity, if believed by his people, would torture him like the shirt of Nessus. To criticism by his friends he was duly sensitive; but the calumniator and muckraker who sought to impugn his motives and to destroy his reputation for honesty were answered simply by his dignified silence, knowing full well that his people always trusted him and believed him honest.

He courted friendship and prized it very highly; to him it was steadfast and enduring. He knew no bounds in which to limit his efforts in behalf of his friends. While his friends were legion and devoted to him, his loving and dutiful wife admired and loved him most, because she knew him best. She loved him for his gentle character, because she felt his unceasing tenderness; for his charity, because she knew of his kind deeds and gracious acts; for his intellect, because she knew its power.

He had no enemies, because he was incapable of a meanness. He was extremely popular with his colleagues in the House. Although our districts adjoined, being separated only by a State line, I never met him until I came to Washington, in the Sixty-second Congress, but his winning manner and cordial disposition immediately attracted me, and we became warm friends. I never knew a bigger-hearted or more whole-souled person. He was an active Member of this body, and especially diligent in his committee work. He was of a modest, retiring disposition, and despised hypocrisy, sham, and show. It was not his custom to speak frequently on the floor of the House, but when he did he was full of his subject and commanded the respect and attention of his colleagues.

Understanding the wants of his people and ever alert to their interests and welfare, it was always his pleasure to carry out their wishes. His efforts in behalf of the flood sufferers in 1912, when the great Mississippi River carried to that section devastation, wreck, poverty, and ruin, will ever stand as a monument to his wonderful energy, humanitarian spirit, and resourceful powers. For days and nights he kept in the closest touch with the situation, and it was through his efforts more than any other person that Congress and the War Department responded to their needs.

Mr. Speaker, death is an unwelcomed visitor at any time. When one who is burdened with the weight of years and bent by duties performed and opportunities accepted is called to the great beyond, a tinge of sorrow and sadness is even then felt; yet we accept it philosophically as the natural sequence of old age. But when one who is young, vigorous, able, ambitious, and fully equipped to render great public service and whose future is resplendent with every assurance of success is suddenly and tragically snatched from among us, we are put to the test of sublime faith and only can murmur "Thy will be done."

It was indeed a pall of gloom that settled down over this Capitol when the startling news came that BOB WICKLIFFE had been killed by a train in this city. Our grief was unquenchable and our anxiety unbounded. It was too sad to be true and too startling to be credible. We would not believe it, because we preferred to hold on to the slender ray of hope that it might prove to be a mistake. We visited the scene, there saw the place, and tried to acquaint ourselves with the circumstances that surrounded his death; and as we looked upon his once well-dressed, handsome, and manly form, but now a lifeless body, we realized for the first time that our colleague and friend was to be with us no more.

His death to us at first was indeed a mystery. We searched for those whom we thought might have seen the accident, in the hope that the circumstances surrounding it might be more fully known, but our efforts were at first unavailing. So interested was I, Mr. Speaker, in ascertaining all of the facts connected with the deplorable tragedy that I attended the coroner's inquest and listened intently to the testimony of the engineer operating the train that killed him. I think that the engineer was the only man who knew just how BOB WICKLIFFE was killed. I shall never forget the impression that his testimony made upon me—so terrible, yet so sad; so tragic, yet so true.

It was a little after 9 o'clock on the 11th day of June, 1912—

He said—

when my passenger train was pulling out of Washington and was only a few hundred feet from the bridge over the Potomac River, toward which the train was moving. There was a double track across this bridge, and another passenger train was crossing the bridge at this time, coming into Washington. I saw the figure of a man standing by the track, apparently watching the train moving on the opposite track, and as the incoming train on the farther track passed by, the deceased, evidently intending to cross the railroad, stepped upon the track nearest, and, as he did, the train that I was operating struck him.

Poor fellow, on this beautiful morning, as he left his loving wife and babe and strolled through the Potomac Park, viewing the beautiful river and communing with nature in her most gorgeous attire, he little dreamed that his generous heart was beating its funeral march to the grave.

In his untimely death his comrades lost a congenial companion, his wife an attentive husband, his little child a devoted father, his district and State a splendid Representative, and the Nation one of its most conscientious and promising statesmen.

Mr. CULLOP. Mr. Speaker, that "death loves a shining mark" was fully exemplified when the fatal dart with unerring aim struck down, without a moment's warning, ROBERT C. WICKLIFFE and hurled him into eternity. The announcement of his sudden and tragical death came to the membership of this House like a "keen clap of thunder from a clear sky," and cast a gloom over the entire body. In the prime of life, in the enjoyment of good health, with all his faculties unimpaired, with the reasonable assurance of a long and useful career, his life was ended and he was called to his reward.

By his premature and tragical death we are forcefully reminded on what a slender thread life hangs, how uncertain its tenure, and what frail mortals we are in the hands of an All-Powerful Providence. What shadows we pursue as we walk the pathway of life, as we travel on to a boundless eternity. By the inscrutable wisdom of an All-Wise Providence, the future is impenetrably veiled and we do not know to-day what the morrow will bring forth. Providence manifests His will in mysterious ways. "Thy will be done" invokes patient submission, and we recognize the wisdom it proclaims.

Man is one of the chosen instruments of God for the manifestation of His wishes and the greatest agency used for bringing about the regeneration of the world and the elevation of all its conditions, and yet so mysterious sometimes are the means employed that we are unable to comprehend the purpose, but faith, the sheet anchor of all our hopes, enables us to accept the result with the sublime belief that whatever is, is for the best.

The poet has described in beautiful and apt language the manner of the workings of Providence when he said:

God moves in a mysterious way
His wonders to perform;
He plants His footsteps in the sea
And rides upon the storm.

Death is no respecter of persons, all alike are amenable to the inexorable decree, and when the final summons comes all must respond to its command, and rest side by side, each alike awaiting the great judgment day.

ROBERT C. WICKLIFFE was one of God's noblemen, a prince among men, and a courtly knight among women. The 38 years he lived made the world better because of the manner in which he lived. He believed in the doctrine expressed by a poet, who said:

How much joy and comfort we all can bestow,
If we scatter sunshine everywhere we go.

And he tried patiently and faithfully to practice that beautiful and truthful philosophy in everything he did and said.

The rays of sunshine and good cheer which beamed from his radiant face, the soft, soothing speech which fell from his lips, the friendly and genial grip of his hand, softened the asperities of life and chased away anger, sorrow, and pain and installed good cheer and friendship.

To his heart there was ever an open window that enabled all who saw him to look into his soul and see that every pulse beat was ladened with love, kindness, and hope from which emanated those splendid qualities he displayed in his daily association with his fellow man.

In appearance attractive, in conversation entertaining, in disposition retiring, in manner courteous and fascinating, in speech persuasive and convincing, and in association companionable, he was sought after in every party of which he was a member. He was one of the most likeable fellows I ever knew; his friends were legion, bound to him as with hoops of steel, forged in the caldron of love.

He realized as much as any man I ever knew that "a soft answer turneth away wrath," and from his inexhaustible fountains of love he poured forth its healing and inspiring properties upon all who had the good fortune to know him and were around and about him. The predominant characteristics of the man were geniality and good nature, which he seemed to display at all times and under all circumstances. He always seemed to think more about the welfare of others than his own.

He came from an ancestry schooled in diplomacy and statecraft, decorated with high honor for meritorious public services,

so that by inheritance he was a diplomat and a leader. He knew how to employ these valuable instruments in the prosecution of his public service to good purpose, and never failed to take advantage of them whenever the exigencies of the occasion required, whether engaged in the discharge of public or private duties.

Because of the possession of these most valuable qualities of head and heart he was a tower of strength to every cause he espoused and a dangerous adversary to everyone he opposed. He could win the friendship of people, and, best of all, retain it. He analyzed questions from a public standpoint and not from any motive of selfish interest or sectional advantage. He was too broad and generous to be swayed from public welfare by any sordid purpose.

Death came to him at a time when his star in the public service was rising, when life promised a golden reward, when higher honors, a greater distinction, was waiting and bidding him onward and upward. His accomplished wife had just won envious social position by the able and efficient manner in which she had discharged her duties in originating and managing the part assigned her in the Dolly Madison breakfast, a social-political function of national significance. She richly deserved the compliments won in that celebrated affair, which he greatly appreciated.

He had just returned the day before his death from the Louisiana State convention, where he had taken a leading part in a great political contest of national importance and had been victorious, winning for himself the highest compliments for his superb generalship and great diplomacy. His nomination and election for a third term in the National Congress were assured. Life on that fatal morning was promising to him, and his cup of happiness was overflowing. High honors were at his disposal and promotion at his solicitation. But fate, cruel fate, decreed otherwise, and the fatal dart, with its unerring aim, struck the shining mark, dashed out his life, and ended his earthly career.

We pause from the routine of daily duty to pay a last tribute to his memory, to say adieu, to impress on the world the value of his services, to enumerate his virtues and the worth of his lovable character, all of which are deeply enshrined in the hearts of his associates, to remain as long as life shall be spared, as the noblest qualities of a kind heart and a generous soul.

Mr. COLLIER. Mr. Speaker, it is indeed appropriate, when the busy scenes of strife and confusion which mark this Chamber during six days of the week, shall have been succeeded by the peace and quietude of the Sabbath Day, that we should lay aside our business, our vexations, and our cares, suspend the daily struggles and inevitable conflicts incident to legislative activity, and pause to pay a tribute of love and affection to our departed colleagues.

Since Congress convened on the first Monday in last December, there has been scarcely a Sunday which has not be dedicated to this purpose.

Death, with ruthless and impartial hand, is ever in our midst, watching and waiting at our side from dawn until dark, and its dread mysterious summons comes often unannounced and when we least expect.

During the two years of the Sixty-second Congress, 18 times has the flag which floats above this Chamber been placed at half-mast for those who pursued their labors here, while at the other end of the Capitol the Vice President of the United States and six Senators have passed away.

A long list of honored dead, a mortality roll unparalleled in the history of any deliberative body of equal size.

With relentless determination Death has laid his clammy touch with equal force upon the young as upon the old. It has waited and watched at the side of old age and its grim stroke has descended upon him who, wise in counsel, rich in experience, and long in service, has left behind him a record of earnest deeds well done. To the young legislator with the best part of his life before him, his heart and his mind filled with dreams and hopes and aspirations for the future, this grim specter unannounced has reached forth an unseen hand and left behind only silence and pathetic dust.

There were MITCHELL and KIPP and CONNELL and UTTER who left us in the early morning of their legislative careers.

There was FOSTER of Vermont and ANDERSON of Ohio and SMITH of California and LATTA and HUBBARD and MADISON and LEGARE and MCHENRY who were called away in the very zenith of their usefulness.

There was WEDEMEYER, young, gifted, and brilliant, who now securely sleeps in the bosom of a tropic sea, where the thunders of heaven's artillery salute his departed spirit and the soft murmur of southern breezes gently sing his last requiem.

There were MALBY and GORDON and LOUDENSLAGER and BINGHAM who, rich in experience and long in service, answered the death angel's call.

There was him whose memory we mourn to-day. Handsome, debonair, manly, loyal, honest BOB WICKLIFFE, whose tragic death brought sorrow and sadness to all who knew him.

Death is cruel, inexorable, and pitiless. It always brings sorrow and regret, but when ripe old age closes its eyes and falls asleep this sorrow and this regret is softened by the reflection that three score years and ten is the brief allotment given us here on earth.

When its crushing stroke descends upon childhood, though our hearts are torn with anguish and we are bowed with grief, yet we are comforted by the thought that life's trials and temptations, its sorrows and its regrets, its vexations and its cares have been spared these little ones, and safely guarded from even the knowledge of evil they peacefully and calmly rest in the bosom of mother earth. But when this cruel and unwelcome stroke falls upon him who is in the zenith of his usefulness, in the early morning of his life, with the promise of a splendid and useful manhood before him like young WICKLIFFE, we are troubled and we can not understand the taking off of such a man. He was playing his part so well. He was accomplishing so much that the history of his work and his short life was but an earnest and a promise of the moral and intellectual contribution he would give to the future.

But though our hearts are troubled, yet in this hour of doubt and sorrow and vain regret "hope sees a star and listening love can hear the rustle of an angel's wing."

Comforted and consoled with the promise of immortality, we know that "He doeth all things well," and Thy will, not ours, be done.

Mr. Speaker, upon an occasion of this kind it is difficult to express in words the thoughts which spring up in the heart at the tender recollections which recall to us the many virtues of a departed friend. I wish that I could put in words and phrases and sentences all that my heart dictates concerning my lamented friend.

I wonder if ever a song was sung
But the singer's heart sung sweeter;
I wonder if ever a rhyme was rung
But the thought surpassed the meter;
I wonder if ever sculptor wrought
Until the cold stone echoed his marble thought,
Or if ever a painter with light and shade
The dream of his inmost soul portrayed.

Mr. Speaker, I never had the good fortune to meet ROBERT WICKLIFFE until the beginning of the Sixty-first Congress. We both entered this body together, and I soon made his acquaintance. Living at the same hotel, coming from the same section of the country, representing practically the same interests, and of almost the same age, it was not long before a close, intimate, and sincere friendship sprang up between us. Our offices were situated in a short distance of each other, on the same floor, and together we visited many of the places of interest in the National Capital. Our tastes were congenial, we thought alike upon many questions, and thus I had ample opportunity to become familiar with the sterling qualities of heart and mind which marked the life and character of our late colleague, ROBERT WICKLIFFE.

He was one of the most genial, companionable, and interesting men I have ever had the good fortune to meet. As a Member of the House of Representatives he was earnest and diligent and faithful to every trust imposed upon him. He was constant in attendance and earnestly strove to master the minute details of legislation. He had implicit confidence in the wisdom of the people. He had an abiding faith in the permanence and stability of American institutions. The individual interest of his constituent was a personal interest to him. The great Mississippi River overflow of last year—which brought ruin and poverty and distress to thousands—was an occasion which served to show the force and ability of BOB WICKLIFFE. He represented part of the overflowed district and he was intensely interested. Those who suffered from the dire effects of that devastating flood will long have cause to remember the tireless energy and successful efforts of our lamented colleague.

Those of us who knew BOB WICKLIFFE best will all bear witness to the sweetness of his disposition, the generosity of his soul, the kindness of his heart, and the purity of his character. He was a man of noble thoughts and lofty ideals.

It was my melancholy privilege to accompany his remains to Louisville, Ky., where before a great concourse of people we tenderly laid him to rest.

It was a clear, cloudless day. We stood in that beautiful cemetery surrounded by magnificent shafts of marble as pure, as white, as spotless, and as unsullied as the life and character of him who under a wilderness of flowers lay before us. And

there in the land of his birth, far from the scenes of his labors, we left all that was mortal of ROBERT C. WICKLIFFE.

Kentucky gave him birth, Louisiana gave him honors, both mourn his untimely end, and Mississippi asks for the privilege of sharing their grief, of laying a sprig of acacia upon the grave of courteous, chivalrous, manly BOB WICKLIFFE.

Mr. PUJO. Mr. Speaker, it is the melancholy duty of the membership of this House to meet from time to time in commemorative services of the life and character of departed colleagues, and this practice is founded on the highest manifestations of religious obligations and of the devotion and affection for the memory of a friend and colleague. A decade's service in this House has convinced me that it is the great crucible where men are subjected to the acid test.

ROBERT C. WICKLIFFE stood the test, because his character was of pure gold. I first met him 15 years ago when he was serving the people of his State in the discharge of a great responsibility as a member of the constitutional convention of Louisiana; and that constitution became, by the act calling the convention into being, organic law without submission to the people. This was the confidence justly reposed in him when but little more than a boy.

When he came to the House he made up his mind to be of value to his people, and he was punctual in his attendance and indefatigable and successful in his efforts in their behalf.

I was the last member of the Louisiana delegation who conversed with him, and that was late in the afternoon of the day preceding that of his death. Next morning, at the city of New York, where I had gone in the discharge of duties assigned to me by the House, I was informed of his accidental, tragic, and untimely death. The news was a great shock to me. When I saw him the day before he evinced in his conversation the keenest interest in legislation and the political program of the future.

Our departed friend was a man of the highest sense of honor and enjoyed the benefit of a finished education. His love of home, wife, and child was the dominating influence of his life. In his death his State and district lost a most efficient representative; his colleagues, a loyal friend and honorable companion; and his stricken widow and fatherless child, a husband and father whose love, fame, and honor will be the most precious jewel in the crown of their remembrance.

Mr. RANSDELL of Louisiana. Mr. Speaker, the State of Louisiana has been the heaviest sufferer in the Republic in losing more Members of Congress during the past five years than any of its sister States. Five times in five years have we assembled in this room to offer tribute of respect to the memory of deceased members of the Louisiana delegation in Congress. First was Gen. Adolph Meyer; then Robert C. Davy; next came Samuel L. Gilmore; afterwards that old war horse of Democracy, Samuel D. McEnery; and now our lamented friend, ROBERT C. WICKLIFFE. All of these men were faithful to every interest of Louisiana; they served it to the best of their ability, and all of them were loved and honored in their native State.

The last of this quintet to join the great congress whose sessions never close in the world beyond was "Our BOB" WICKLIFFE, who departed this life in a tragic manner only a few months ago. Truly, has there been a long roll of deaths in the Sixty-second Congress, as one of the speakers has remarked. Eighteen Members of the House and seven in the Senate—25 deaths out of a total membership of 487 in both Houses of Congress. Louisiana feels very keenly the death losses in other States, for a fellow feeling makes us wondrous kind in this world, and we of Louisiana have suffered so heavily in this respect that we sympathize deeply with those who are chastened in like manner.

BOB WICKLIFFE had in him the promise of a great future. His friends believed that within a very few years, if he desired it, he could become the governor of the State, just as his grandfather had been governor of Kentucky and his father governor of Louisiana. He belonged to a family of illustrious public men who rendered great service to two Commonwealths, and he was a worthy descendant of such ancestors. There is no doubt that practically every political gift at the disposal of his people would have been tendered him had he lived the allotted period of man.

During his very brief life BOB WICKLIFFE made a splendid record—one of which his family, his friends, and his State have just cause to be proud. I first knew him in 1898 as an active and influential member of the constitutional convention of Louisiana, though he was then less than 24 years of age. He was known as one of the two "boys" of that eminent assemblage, which framed a constitution for Louisiana that has existed for 15 years and under which the State has prospered as never before in its history; and though one of the youngest members in years, his parish had no cause to regret having selected him for such an honorable and important position.

During his service of three and a half years in Congress WICKLIFFE advanced as rapidly as any man I have known, with one or two exceptions, since I entered this body 14 years ago. He was a very active Member of the Committee on Agriculture. The people of his district are engaged almost entirely in agriculture, and that is the most important industry in Louisiana, although in recent years the State has become a very large manufacturer of lumber, second only to the State of Washington in that respect, and her vast mineral wealth is placing her well to the forefront in that regard. All of Louisiana, and especially BOB WICKLIFFE's district, suffered terribly from the effects of the cotton-boll weevil. For over a century cotton had been king in many parishes of the State, and the weevil completely destroyed the industry and forced the people to engage in other pursuits. Great distress, uncertainty, and doubt resulted from this enforced change, and BOB assisted in solving the many questions connected with it in a most earnest, intelligent manner.

Another great problem of vital import to his people was the flood situation of the Mississippi River, which was brought to a climax last spring by the greatest overflow on record. Many citizens of his own town and in several parishes of his district were overflowed and lost nearly everything they possessed. I shall never forget BOB's great solicitude for them and his splendid work in securing appropriation from Congress to aid in relieving their sufferings. Many parts of my district were under water, and I was a personal sufferer, because my plantation near Lake Providence was overflowed, causing me heavy loss. For weeks during that awful period BOB and I, together with every other member of the Louisiana delegation, worked shoulder to shoulder for the relief not only of Louisiana but of the flood sufferers in the Mississippi Valley, and I learned to appreciate and honor in him at that time qualities of head and heart of which I did not dream. No man in this body seemed to feel such acute sorrow at the flood devastation as BOB WICKLIFFE, and certainly no one worked harder or more intelligently and successfully to aid the sufferers.

Not many months before his death WICKLIFFE introduced a bill to provide for disposing of the machinery and appliances of every kind used in the construction of the Panama Canal. He thought that portions might be employed very successfully in preventing flood destruction and other parts could be used in improving rivers in different sections of the country. The bill was very comprehensive and had it been enacted into law, which I believe he might have succeeded in securing had he lived, it would have resulted in the utilization or sale of much valuable property of the Nation which is liable to be destroyed on the completion of the canal, unless some such legislation is passed. So far as I know, BOB's ideas in regard to this were unique and original, and since his death they have been adopted and discussed by men high in the affairs of the Nation, one of whom is no other than ex-President Roosevelt.

Mr. Speaker, in the death of ROBERT C. WICKLIFFE not only has the State of Louisiana suffered a great, aye, an almost irreparable loss, but the Nation one of its most brilliant and efficient public servants.

Mr. WATKINS. Mr. Speaker, there is always something mysterious about death, and our effort to penetrate the mysterious future bewilders the imagination. When peacefully and quietly the silver cord is loosed and the golden bowl is broken our hearts are saddened with the parting of the loved one with whom we have been associated; but when one meets death by violence the shock causes us to wonder what mysterious influence so rudely dashes a human life into eternity.

On Tuesday morning, June 11, of last year, ROBERT C. WICKLIFFE, in the prime of life and at the zenith of his usefulness, was suddenly taken from this earthly sphere to his eternal home. On that morning, parting from his wife and only child, he strolled to the banks of the historic Potomac, and while standing on the embankment near the railroad track a passenger train dashed upon him and, hurling him violently against a post, crushed and mangled his body. The inquiry has been raised as to whether this was purely an accident caused from carelessness or whether it was the result of recklessness on his part. The inquest held shows that an incoming northbound train attracted his attention while it was crossing the bridge and, not observing the outgoing southbound train, he inadvertently stepped upon the track and was instantly killed.

That his mind was absorbed in profound thought there can be no doubt, for the perturbance of his feelings could clearly

be discerned and his expressions of emotion indicated great mental distress.

He was most attentive to his official duties, and had recently made a magnificent fight during the consideration of the Agriculture appropriation bill to have his people protected from the ravages of the boll weevil, the insect pest which has created such havoc, almost amounting to devastation, in the cotton section of his State.

Laying aside his official duties temporarily he had visited the State of Louisiana for the purpose of helping a friend, and on this journey ascertained the extent of the calamity which had befallen his people by virtue of the disastrous overflow which had overtaken them. Bemoaning their impoverished condition and the destitution which confronted them on every side he returned to Washington, his mind burdened with sorrow and his heart going out in sympathy for his people in their distress.

Seeking a diversion as a relief he strolled to the banks of the Potomac, and after lingering for a while and ascertaining that its waters were too murky to permit angling in them, he meandered up the sloping bank to the place upon the railroad track where he met his violent death.

ROBERT C. WICKLIFFE was the grandson of Robert C. Wickliffe, sr., who was governor of the State of Kentucky. After moving to Louisiana his father became her chief executive, and his page in history shows that he was a most worthy and competent official and endeared himself to the people of his adopted State. ROBERT C. WICKLIFFE, the son, was born in the State of Kentucky in May, 1874. Receiving his primary education in the common schools of St. Francisville, La., he afterwards attended Center College, in the State of Kentucky, there graduating with the degree of bachelor of science. He afterwards attended the Tulane University, in Louisiana, where he graduated in law with distinction, being the orator of his class.

Returning home and engaging in the practice of law he so rapidly rose to prominence that he was elected to serve in the constitutional convention of that State in 1898. Although only 24 years of age he took a prominent part in that convention in framing the fundamental law and was especially active in procuring embedded in the constitution a provision for a railroad commission, which has proved of inestimable benefit to the State of Louisiana.

Subsequent to this he was chosen as the district attorney for the judicial district in which he lived and showed that same efficiency in this capacity as he had exhibited as a lawmaker in the constitutional convention.

He was elected a Representative to the Sixty-first Congress and reelected to the Sixty-second. During his services in the House of Representatives he endeared himself to the Members by his social disposition, his genial manners, his courteous deportment, and his manly qualities. He was independent in thought, true to his convictions, bold to assert them, but always readily yielding to the rule of the majority; when the fight was made and lost, he submitted gracefully and prepared himself for the future combat in which he might be called upon to engage.

He was an orator of merit, a polished speaker, always ready with a word to express a thought, and never disconcerted at an interruption or thrown off his guard by an effort to entrap him. He thoroughly prepared himself for the engagement which he was to enter, and with the material at hand held his own, however acrimonious the debate.

Descended, as he was, from distinguished ancestors, his bearing was superb, while his nature was sympathetic and his manner genial and most agreeable.

Mr. WICKLIFFE was twice married, each time to a cousin, both his wives being natives of the State of Kentucky. His last marriage is blessed with a precious little daughter, the only child who survives him.

To this child and his heartbroken widow the sorrow of the Members of this House is poured forth in deepest sympathy.

We laid him to rest in the beautiful Cave Hill Cemetery, at Louisville, Ky., in which sacred place the members of his family are interred.

He was true to his friends, and a vast concourse of his sorrowing friends accompanied his remains to their final resting place.

We loved him for his warmth of heart; we admired him for his manly traits; we applauded him for his successful career; and we mourn his death as a distinctive loss to his family, his friends, and his country.

Mr. ESTOPINAL. Mr. Speaker, we are engaged to-day in paying a loving tribute in commemoration of the life and services of one of our young Members of Congress, yet one who has left his fine impress on the affairs of his State and upon the legislation of his country. When death invades our circle of official life and takes away him who has reached the apex of usefulness in the fullness of years and honors, we feel that we have lost a wise counselor and friend and useful public servant, yet we realize that in the mutations of things terrestrial it is something we must expect, and in regret we bow down in solemn resignation; but when the hand of death reaches out in tragic swiftness and takes from us the young man who is but on the threshold of a career which promises a brilliant climax, who is ascending with precision and confidence and hope the steps which lead to the pinnacle of honor and fame, we feel that we have been unduly bereft in his untimely end—we can not take consolation, as it were, for our loss in that resignation which the inevitable forces upon us. My first acquaintance with ROBERT C. WICKLIFFE was in the constitutional convention of Louisiana in 1898. He was then a very young man; had hardly passed his majority; but had already endeared himself to the people of his parish, not only by his rare personality, but also by the remarkable ability which he had given many proofs of, even at that early period of his life. While, on account of the difference in our ages, perhaps, I was not thrown with him very much during our term of service in that body, I yet saw enough of him to readily understand how the affections of his people and their recognition of his superior talents should have put him so conspicuously forward at such an early age. I seldom met Mr. WICKLIFFE during the 10 years which intervened between our service together in the constitutional convention and that which began again in this body, but I knew that he was forging ahead to front rank in his chosen profession of law and had been honored by the people among whom he lived. He had gained such prestige and so widened his circle of friends and admirers that when he announced himself as a candidate for Congress he was triumphantly elected.

But during his service in Congress I became intimately associated with him in the discharge of those duties which we had in common as Representatives of the people of the State of Louisiana. He was always attentive to his duties as a Member of this House, giving every subject of legislation thorough study and the closest consideration. His knowledge of matters and the quick grasp of his intellect made the understanding of all questions surprisingly rapid and accurate. Had he lived, he would soon have risen to leadership in this body, possessing, as he did, all the qualities of heart and mind that go to make up a great man. Many men possess the qualities in single that were in him combined—a vivid imagination, quick intellectual perception, and that patience and industry which reaches to the minutest detail. But these are seldom found so completely joined in one man as they were in this promising young Louisiana statesman.

The charm of his personality, the kindness and geniality of his manner and ways were irresistible, and he made friends of all with whom he came in contact. Notwithstanding the disparity in our ages, we became close and intimate friends. In my whole life I have met very few for whom I have felt that feeling of deep affection and close fellowship that I did for BOB WICKLIFFE.

Death is the crown of life:
Were death denied, poor man would live in vain;
Death wounds to cure; we fall, we rise, we reign;
Spring from our fetters, fasten to the skies,
Where blooming Eden withers from our sight.
This king of terrors is the Prince of Peace.

Mr. DUPRÉ. Mr. Speaker—

Oh, weep for Adonais! He is dead.
Weep tho' the tears thaw not the frost
That binds so dear a head.

But that I loved BOB WICKLIFFE well and could not forego this opportunity to put on lasting record my deep admiration of him as a man and my lofty appreciation of his public services, I would not rise to-day.

Since that fateful June day when at Atlanta, on my way home, I learned that he was dead, he has been daily in my thoughts. In the ensuing intervals that I have spent in Washington his death, yea, his life, have near haunted me. This Chamber, this Capitol, the daily walk to and from it, the usual routine of work, the social diversions of this city, all bring back a thousand memories of him. They recall a boyish friendship that was never clouded, a close congressional intimacy that was rudely sundered; a loving, inspiring helpmeet, who, womanlike, courageously faces her widowhood; and a golden-haired baby girl who does not yet know that she is orphaned; and ever as these memories come and go and shape and merge and blur themselves into each other, through them all is the yawning grave in Kentucky, the home of his fathers. Is it small wonder, then, if I find it hard in mind and heart and strength to say aught to-day?

I first remember BOB WICKLIFFE when, fresh from collegiate honors won at Center College, Kentucky, he entered the law department of the Tulane University, of Louisiana, from which institution he was graduated as valedictorian of his class. I witnessed at close range his work as a member of the constitutional convention held in our State in 1898. Although then barely 24 years of age, he took high rank in that body, rendering especially notable service in incorporating into the organic law of our State the provision for a railroad commission.

I recall him, in all his youthful ardor and patriotism, responding to the call to arms and enlisting, with characteristic modesty, as a private in Company E, First Louisiana Volunteer Infantry, Spanish-American War. I saw him receive further honors at the hands of his people, when, in 1900, he was elected district attorney for the twenty-fourth judicial district, discharging his duties with fearlessness and yet never degenerating into the vengeful persecutor. I followed with interest the remarkable campaign he waged in a Democratic primary for nomination to Congress, defeating two of the most popular and talented men of his district.

Mr. WICKLIFFE entered upon his congressional duties with the beginning of the Sixty-first Congress, and in its third session I joined him as a Member of this body. I soon discovered that in his short service he had already made a place for himself. As a member of the then minority he had received but inconspicuous committee assignments, but in the stirring days that had marked the beginning of the extra session of that Congress he had proven his mettle, had refused to stray after false gods, and had loyally followed the leadership of those who were soon to transform the minority into a majority. So when I met him here he had already come to enjoy the respect and confidence of his Democratic brethren, as indeed of the entire membership of the House. He early attracted the interest of the distinguished Speaker of this House, and it is a strange coincidence, though entirely typical of the man, that his last public appearance was an act of loyalty to the Speaker—a successful effort on Mr. WICKLIFFE's part to send to the Baltimore convention a majority of the Louisiana delegation favorable to the laudable ambition of that great son of Missouri.

Naturally, then, when the Democrats came into power in the Sixty-second Congress Mr. WICKLIFFE received high honor at the party's hands, being assigned, in addition to membership on the Committee on Elections, to the very important post of member of the Committee on Agriculture. He himself had been brought up on a farm and represented a district essentially rural, and was therefore admirably fitted, both by training and sympathy, for this committee work. He was the first man in public life, to my knowledge, to suggest in Congress the creation in the Department of Agriculture of a bureau of markets, a plan now on the verge of consummation, and the admirable speech which he delivered on this subject, which he aptly called "The high cost of selling," may well serve others who have followed in his wake. His manly and forceful address against free sugar showed his wide familiarity with economic questions and his particular knowledge of the conditions of the people he represented.

His own plantation home bordered on the great Mississippi River, and from his childhood he had been familiar with the terrible devastations that from time to time it works upon our people, and in the awful disaster of last spring, when the waters of 39 States poured over our fertile acres, bringing with them ruin and desolation, no man in the Mississippi Valley was more active than he in securing relief for the suffering and in convincing this Congress of its duty to give larger financial aid to the work of levee building. While on a visit to the Isthmus he conceived the idea of utilizing the machinery and apparatus employed in the construction of the Panama Canal for the protection and improvement of the banks of the Mississippi, a plan which he embodied in a practical manner in a bill introduced by him for that purpose. It is significant that others have since taken up this thought, a former President of the United States having championed it in a number of public addresses. How gladly would he have lived to welcome the day when the General Government will realize its full obligation to the mighty river and its citizens who live behind its banks.

In all the relations of life BOB WICKLIFFE played the man's part. Had he done otherwise he would have been untrue to the traditions of a distinguished ancestry and disloyal to the spirit of "noblesse oblige" which characterizes his cast, for he was to the manner born. His lineage was of the gentlest. His father, whose name he bore, was governor of Louisiana before the war and one of its most honored citizens for many years thereafter. One of his grandfathers was governor of Kentucky and another United States Senator from that State and Postmaster General in the Cabinet of President Tyler. His aptitude for public life came naturally to him, therefore, and he was deeply imbued with the idea that men of his rearing and stamp should unselfishly devote their time and talents to the public service. With it all he was democratic to the core. His heart beat true to the quickened impulse of humanity and fraternity that is leavening all parties in the politics of twentieth-century America.

His domestic life was ideal. He himself was a man of singular personal purity, and his wife and child were all in all to him. He was passionately attached to his home. Indeed, one of the great sorrows that came into his life, bearing down upon him with a weight that was almost unnatural, was the destruction by fire some years ago of his ancestral home, "Wyoming," in the parish of West Feliciana.

BOB WICKLIFFE was but 38 years of age when he died, and death came to him without a warning. Those who had "lov'd him so, follow'd him, honor'd him," are still unreconciled to his early and sudden passing. But, after all, he had not lived in vain. His life, while incomplete, was full of aspiration and endeavor and achievement; and I, while bemoaning the prematurity and cruel swiftness of his taking off, can not quite subscribe to their views, for I am inclined to believe that Robert Louis Stevenson wrote truly in his undying essay on death. Is not the thought solacing that underlies these lines? Listen:

> It is not only in finished undertakings that we ought to honor useful labor. A spirit goes out of the man who means execution which outlives the most untimely ending. All who have meant good work with their whole hearts have done good work, although they may die before they have the time to sign it. Every heart that has beat strong and cheerfully has left a hopeful impulse behind it in the world and bettered the tradition of mankind. And even if death catch people, like an open pitfall, and in midcareer, laying out vast projects and planning monstrous foundations, flushed with hope, and their mouths full of boastful language, they should be at once tripped up and silenced, is there not something brave and spirited in such a termination, and does not life go down with a better grace, foaming in full body over a precipice, than miserably straggling to an end in sandy deltas? When the Greeks made their fine saying that those whom the gods love die young, I can not help believing that they had this sort of death also in their eye. For surely, at whatever age it overtake the man, that is to die young. Death has not been suffered to take so much as an illusion from his heart. In the hot fit of life, a-tiptoe on the highest point of being, he passes at a bound on to the other side. The noise of the mallet and chisel is scarcely quenched, the trumpets are hardly done blowing, when, trailing with him clouds of glory, this happy-starred, full-blooded spirit shoots into the spiritual land.

Mr. BROUSSARD. Mr. Speaker, scarcely anything can be added to the truths that have been already uttered on this floor to-day in eulogy of the life and character of ROBERT C. WICKLIFFE. Departing from this Chamber at an age when the average useful Member commences his career, with a service of scarcely three years, he has left behind a memory which is testified to to-day by many of those who had the pleasure of knowing him and were acquainted with the charms of his character.

I first knew BOB WICKLIFFE when he was prosecuting attorney in his home judicial district, and I was performing the same public duties in mine. Being engaged in a work of kindred nature, we were naturally attracted to each other and formed a friendship from the first day of our meeting, some 17 years ago, which lasted until his death.

After having served in that capacity, when, under the leadership of the then governor of Louisiana, the present Senator FOSTER, it was sought to amend our State constitution in such wise as to permit the races of that State to live side by side in harmony, young as he was, BOB WICKLIFFE was intrusted by his people to represent them in the State constitutional convention of 1898.

The work of that convention having been practically accomplished, before the adjournment of it war was declared by Congress against the Government of Spain. BOB WICKLIFFE had filled functions of public usefulness in the State, was popular in his section, was descended from men who, throughout the history of the Republic, had been prominent in peace as well as in war in two of our great Commonwealths, and it is scarcely to be doubted but that he could easily have secured a commission to serve his country as an officer in the Spanish-American War. But, relying upon his native American ability, that self-reliance which formed so marked a trait of his character, upon the qualities that had made his ancestors great in two great States of this Union, he resigned his seat in the constitutional convention to enlist in the First Louisiana Regiment of Volunteers as a simple private. He relied upon the consciousness of his own ability, his honesty, his energy, and his integrity to advance him rather than seek honors conferred by those who held power or to secure a commission to serve as an officer in that war.

Fortunately for this country and for humanity, the war was brief and gave WICKLIFFE no opportunity to attain that distinction for which patriotism had prompted him to forego the pursuit of civil honors in order to undergo the hardships of military life in the rank of the privates in an army of volunteers. Returning home, he became a candidate for Congress and was elected; and laboring here throughout the brief time of his service he left an impression upon this House which was never equaled by anyone in so short a term of service, which will never be forgotten by those who knew him in the House.

His sudden death was as untimely as it was deplorable. Well do we recall that morning when the news first reached this Capitol of his untimely taking off. A gloom hung about this Chamber and sorrow was depicted in every face. This gloom and sorrow found an echo in two great States. Innumerable friends and kinsmen in Kentucky and innumerable friends and kinsmen in Louisiana heard the terrible news with horror and dismay.

And while his death has been a loss to his friends, and to his family in particular, a greater loss falls upon the State of Louisiana, wherein he and his ancestors had done great service for the public weal, and upon this Republic, where he and his ancestors have done great work for the American people.

As he was loved in life, so is he mourned in death.

Mr. Speaker, I ask unanimous consent that those who have delivered addresses and eulogies upon the life and character of ROBERT C. WICKLIFFE may have five legislative days in which to extend and amend their remarks.

The SPEAKER. The gentleman from Louisiana [Mr. BROUSSARD] asks unanimous consent that those who have spoken on the life and character of ROBERT C. WICKLIFFE may have five legislative days in which to extend and revise their remarks. Is there objection?

There was no objection.

THE LATE REPRESENTATIVE CARL C. ANDERSON, OF OHIO.

The SPEAKER. The Clerk will report the order of business in reference to the Hon. CARL C. ANDERSON, late a Representative from Ohio.

The Clerk read as follows:

On motion of Mr. GOEKE, by unanimous consent,

Ordered, That Sunday, February 23, 1913, be set apart for addresses upon the life, character, and public services of Hon. CARL C. ANDERSON, late a Representative from the State of Ohio.

Mr. GOEKE. Mr. Speaker, I offer the following resolution.

The SPEAKER. The Clerk will read the resolution.

The Clerk read as follows:

House resolution 862.

Resolved, That in pursuance of the special order heretofore adopted the House proceed to pay tribute to the memory of the Hon. CARL C. ANDERSON, late a Representative in Congress from the State of Ohio.

Resolved, That as a further mark of respect to the memory of the deceased and in recognition of his public career the House at the conclusion of the memorial proceedings of this day shall stand adjourned.

Resolved, That the Clerk of the House communicate these resolutions to the Senate.

Resolved, That the Clerk of the House be, and he is hereby, instructed to send a copy of these resolutions to the family of the deceased.

The resolution was unanimously agreed to.

Mr. GOEKE. Mr. Speaker, it is a time-honored custom of this body to pay tribute to the character and services of the distinguished dead of either House. Responding to this and prompted by a sense of duty to my State as well as respect for the late CARL C. ANDERSON, I shall in my humble way here record my estimate of his life and services to the country. CARL C. ANDERSON was born at Bluffton, Allen County, Ohio, December 2, 1877. When a boy his parents moved to Fremont, Ohio. At 10 years he was a newsboy and a bootblack. At 16 he had saved money enough to buy a home for his mother. He was at one time a traveling salesman, and later engaged himself in the mercantile business at Fostoria, Ohio, which place became his permanent home. By his energy and thrift he prospered and won the confidence of those who knew him. His popularity grew, and he was twice elected mayor of his city, and then aspired to congressional honors. Never defeated in an election, he was beginning his campaign for his third term in this body when in the very prime of his useful life his career was ended suddenly by a fearful and tragic death. At the youthful age of 35 years he was taken from us in the midst of his life's work. The news of his death came to me, as it did to many others, as a personal bereavement. The awfulness of the shock to his city and State is well told in the feverish announcement of his home paper, the Fostoria Times, on the night of the accident. It is the overflowing of the full heart of the editor. I quote:

There is no conqueror save death. In the midst of circumstances that seem to defy destiny the gaunt, grisly, invisible champion of the grave stalks forth; a sudden swoop of the scythe and the highest and strongest fall forever. CARL C. ANDERSON, of all men, is dead. Swift and awful, unannounced, like an electric shock, beggared of even the anguished interval of *Titanic* tragedy or the stroke of some like calamity, the man in the community most alive and widest known passes from life to death, from existence to immortality, from achievement to history. Yesterday evening and night he accompanied his friend and companion, Attorney Russell M. Knepper, of Tiffin, Democratic candidate, on an automobile trip to a village in the neighborhood of Fostoria. Returning home one of those all-too-numerous automobile accidents happened. The car and its four occupants, approaching a bend in the road on the new Riegel Road near the city, the car rushed into the ditch, overturned, threw part of the passengers out, turned upside down, and pinned Congressman ANDERSON to death.

The man who sat in the same seat was the one least injured. The injured men and the remains of Fostoria's foremost citizen were tenderly brought to town and cared for. Telephone messages were sent to close friends about town and to relatives out of town. Tactfully and tenderly the terrible tidings were taken to the wife and children. My last talk with him was in the afternoon. We spoke of the congressional situation, and he was in a triumphant mood, naturally. No real opposition to his reelection could be found in the district, and his opponents appeared to be merely nominal nominees. "Use them well in your paper," said Carl, with characteristic kindness, "make no attacks on them; you need waste no words on me either, the people know me now. I shall receive a big enough majority to please my friends, and I am going into the districts of some of my congressional friends to help them." As we parted I thought that here at least there is no uncertainty of political success in an election five weeks distant. To-day the city sits in supremacy of sorrow, and messages are flashing over the land and inquiries pouring in for details of the dread calamity that put a period to this unexampled success. Death alone defeated this matchless man. "There is no conqueror save Death."

I shall always remember the immense concourse of friends who gathered to pay a last sad tribute of respect on the occasion of his interment. Rich and poor, high and low, all showed sorrow at his untimely death. Fostoria that day was literally in mourning. Truly did it seem that the angel of death, hovering over the city, had touched the hearts of every home. Greater tribute than this hath no man, that "after life's fitful dream is o'er"—"after the battle has been fought and won"—he is returned home, and there, amid the genuine sorrow and tears of friends and neighbors, he is laid to rest in the generous bosom of that State which he loved so well and served so faithfully. No more noted gathering ever assembled to pay tribute to the dead than that which came to show their respect, add their sympathy, and mingle their tears in sorrow with the family and friends in the home city of the beloved and lamented CARL ANDERSON.

Our departed friend and colleague was the child of poverty and toil. He knew none of the temptations of wealth or the enervating influences of luxury, yet he was richly endowed with brains, energy, physical and moral courage, and self-reliance. These were great riches. He wisely invested his entire capital in self-improvement, and CARL ANDERSON, the newsboy and bootblack, became beloved of the people and their faithful servant in the Halls of Congress. Born of common poeple, he was of the plain people, and knew them well.

While he was too great to yield to their demands when influenced by passion or prejudice, he was great enough to fully comprehend and appreciate their wants and to sympathize with them in their wants. His life furnishes an excellent example of what courage unaided and industry unfavored can work out for their possessor in the field of equal opportunity furnished to all in this Republic of ours. He is a testimonial of the virtues of our free institutions, our country, and our Government. His record in Congress is replete with work well done, bearing proof of his faithfulness to his oath of office, and realization of his responsibilities to his constituency and to his country. He was always in favor of good legislation and quickly saw an opportunity to do good work for his people, and so accepted the high honor conferred and became one of the most sympathetic and hardest workers in the House. But little escaped his vigilant eye and a bad measure met his vehement opposition and denunciation. He was naturally ambitious—not for selfish reasons, but solely to serve his people better and for the good that might result to them. He was courteous, open hearted, accommodating, and pleasant at all times and under the most trying circumstances. He was the constant friend and ardent advocate of the cause of the old soldier and, with the exception of the venerable ISAAC R. SHERWOOD, no man in the House accomplished so much for them. He worried over their suffering in their declining years as though they were of kin to him. He never hesitated to resolve all doubt in their favor and rejoiced at every measure that spelled good to them. In line with his inherent sympathy for those that toil, he was the champion

of labor, both organized and unorganized, and never lost an opportunity to vote and work for legislation in their behalf. His devotion to the people of his district was marvelous. To be able to please them was his greatest aim. He was constantly striving to do something for some one from the thirteenth district. They will miss him as time goes on and in their hearts and esteem his place will be hard to fill. Of his personal traits of character, so beautifully exemplified in his private and domestic life, I shall say but little. Nothing short of a profound sense of loyalty to his hallowed memory could induce me to speak at all of the personal side of him who was endeared to me by the sweetest and tenderest ties of intimate association and deep affection. I know his wife and children and I have never known the relation of husband and father more substantially true and tender. What good effects flow from a strong, true love that is full of sympathy, served to form his character throughout his home life. They closest to him admired and loved him best, because they knew him best. So let us not so much mourn that he is dead, but rather let us rejoice that he has lived. Let us not think so much of his untimely taking off, but rather of the fullness of his life. Poets for ages have sung of the sadness of death when it comes to a man full of life and vigor, to one still ready and willing to do a man's part in the world of men, yet the Greeks personified death by a beautiful boy crowned with immortal youth, and somehow that ideal seems fitting. For the deeds of man the lesson of his life and the good example he gave will live forever, and their rejuvenation from one generation to the other may well be exemplified by youth. Stricken in life's prime, in the fullness of a splendid usefulness, CARL C. ANDERSON left to his family, to the people of his district, and to us a monument more enduring than marble and a heritage more precious than gold.

Mr. WILLIS. Mr. Speaker, it has just been suggested to me by a friend that this day which we have set apart as a proper occasion to do honor to the memory of a number of our deceased colleagues here and a number of deceased Members of the Senate is as well the anniversary of a sad but interesting historical occasion. Sixty-five years ago to-day, yonder in the old Hall of the House, or rather in an adjoining chamber, the great spirit of John Quincy Adams took its flight to the God who gave it. Two days before the old warrior had fallen on the field of battle with his armor on and his face to the foe; and 65 years ago to-day he breathed his last. Since that time, Mr. Speaker, many distinguished Members of this body have gone into the Great Beyond, but I measure my words when I say that among that great number there have been few who gave more complete and unfaltering devotion to the people who sent them here than did CARL ANDERSON, of Ohio. It was my pleasure and it will be throughout life my fond recollection to have known CARL ANDERSON quite intimately, and yet that acquaintance did not extend over a very lengthy period. I did not know him personally until I came to this House at the beginning of this Congress. I had known of him, of course, because we lived in adjoining congressional districts, and his fame had spread over the State, but I met him first here in the city of Washington. At his hotel, with that kindliness of spirit which was so characteristic of him, he came and introduced himself to me and, knowing that I was a new Member, he sought to make me feel comfortable, and before we had talked five minutes he had undertaken to smooth out some of the rough ways and to explain how I might best get along with my work here, and particularly with the departmental work with which he was so thoroughly familiar. He aided me much, and generously gave me credit for work which he himself had done. I think, Mr. Speaker, that probably that was the most prominent characteristic in the life of our deceased friend—the spirit of helpfulness and generosity, the desire to make somebody comfortable and happy, the desire to extend a helping hand—and I think it is a characteristic which those of us who are left behind may well emulate. My colleague from Ohio [Mr. GOEKE] has referred eloquently to the fact—a fact of which we are proud in Ohio—that this Ohio boy in whose honor we are met here to-day, at the age of 10, was a common newsboy and a bootblack on the street.

Mr. Speaker, it seems to me that the mere statement of that fact is sufficient without comment; CARL ANDERSON'S life is and ought to be an inspiration to the American youth. It shows the possibility of American citizenship. Here was this boy, making his way when he was only a child, selling papers and blacking boots on the street, and to-day this great legislative body has met to do honor to his memory. I have been thinking as I have been sitting here and listening to the eloquent words that have been spoken of him and of our other friend and colleague, Mr. WICKLIFFE, and wondering what it is that makes it possible for men to succeed. I think I know something of the secret of success of this rare soul, and that was this—that he possessed almost infinite ability for hard work. It was not so much brilliancy, perhaps, as it was a determination to stick to the task and a determination to work and to be prepared. I know that this man believed in the philosophy of these little stanzas. I know he did, through my personal association with him. These stanzas are from the brilliant pen of the lamented Senator from Kansas, John J. Ingalls:

OPPORTUNITY.

Master of human destinies am I.
Fame, love, and fortune on my footsteps wait;
Cities and fields I walk; I penetrate
Deserts and seas remote, and passing by
Hovel, and mart, and palace, soon or late
I knock unbidden once at every gate.

If sleeping, wake; if feasting, rise before
I turn away. It is the hour of fate,
And they who follow me reach every state
Mortals desire, and conquer every foe
Save death; but those who doubt or hesitate,
Condemned to failure, penury, and woe,
Seek me in vain and uselessly implore;
I answer not, and I return no more.

Representative ANDERSON was ready when opportunity knocked unbidden at his gate; but he had those sterling qualities of stalwart Americanism that would have enabled him to succeed whether opportunity knocked or no.

It was the theory of life of CARL ANDERSON that he should be prepared for the work in hand, and when he was called by the people of his native city of Fostoria to the office of mayor of that city he was prepared for the work. When in the business world opportunities came to him, he was ready to embrace them. When he was called to this higher office, he was equipped for the work which he undertook to do, and the reason why he was equipped and why he was ready to embrace these opportunities was because he understood the philosophy of hard work. It is the same, Mr. Speaker, with men that it is with the lower organisms. Take the tree that stands in the midst of the darksome forest where it is protected by the other trees, and that tree will be straight and tall, but the fiber of it will not be so strong; but as to the oak that stands upon the summit of the hill, the timber of that tree will be strong, because it has been torn and strained and twisted by every tempest that has blown for a thousand years. Put the little coral insect down at the mouth of a river where the current is gentle, the water warm, and where it is freighted with all the elements of plant growth, and the insect will die, but lay it upon a rocky ledge where the waves beat down with an everlasting power that would grind granite to powder, and it grows and thrives, builds up its tiny palace to the surface of the sea. And it is so with men. It is the battle, the toil, the contest, the struggle that brings out the best that is in human nature. And so it was with this dear deceased friend. He believed in the philosophy that is expressed in those beautiful lines from the pen of Babcock, when he says:

Be strong!
We are not here to play, to dream, to drift;
We have hard work to do and loads to lift.
Shun not the struggle, face it; 'tis God's gift.

Be strong!
Say not the days are evil—Who's to blame?—
And fold the hands and acquiesce. O shame!
Stand up, speak out and bravely, in God's name.

Be strong!
It matters not how deep intrenched the wrong,
How hard the battle goes, the day how long;
Faint not; fight on! To-morrow comes the song.

That was the philosophy of life of this man. And may I add not only did the boy make his own way, starting as a bootblack at 10 years of age, but by the time he had attained the age of 16 years, the little fellow had saved up enough from his slender earnings to buy a home for his mother.

Mr. Speaker, it is not necessary, it seems to me, to point out anything else in the character of this unusual man. Devotion to mother, respect for mother. Saving from the slender sum which other boys might have spent for trifles and amusement, he buys a home for mother. Mr. Speaker, there is not anything finer in life than devotion to home and devotion to mother. The man who has those characteristics is bound to make a success of his public and private life, as did CARL ANDERSON. That spirit of work to which I have referred characterized his service here. He worked early and late in the interests of his constituents.

Mr. Speaker, it is no discredit to anyone else to say that there was no man in Ohio who had the hold upon his district that CARL ANDERSON had. Everybody in the thirteenth dis-

trict knew him, and all who knew him loved him. There was not another member of the Ohio delegation who was as popular in his district as CARL ANDERSON was in his. My colleague, Mr. GOEKE, spoke touchingly and eloquently of the funeral services in Fostoria and Fremont. It was a marvelous tribute. There they were from all the walks of life, not simply the wealthy—although the wealthy were there—but from the middle walks of life. The common people were there in great numbers. Workmen, farmers, school children—all classes and ages and professions were represented. It was a great outpouring, and in that beautiful city of Fremont, which has witnessed some historic scenes and some great historic funerals, it is said there never had been witnessed such an outpouring of the people as was witnessed that day. Back, back, for many rods, the people were packed, and the thing that touched me most, and as I said to one of my colleagues with me at the time, the thing that CARL would have prized most, was the fact that in that great crowd there were hundreds of old soldiers, members of the Grand Army of the Republic. In the thirteenth district and all over the State it was felt that when CARL ANDERSON went away they had lost one of the most active and effective friends they had in American public life.

The old boys in blue were there at the funeral services in large numbers and gave the most convincing evidence of their profound sorrow at the tragedy which had overwhelmed them and hung like a pall over northwestern Ohio.

On occasions like this, Mr. Speaker, we can but think of the serious problems of life. We wonder whence we come and whither we are going; what it is all about, and whether death is the end, or whether the tomb is but a gateway to an eternity of opportunity.

It can not be that our little butterfly existence upon earth is the end. There is that within us which speaks unerringly of another life, broader and higher and better than this. It can not be that the years of toil and strife and affection and preparation of a life well lived end at the grave. Another life beyond the mystery we call "death" is prophesied with certainty by that unceasing and unsatisfied hunger in the human heart for something better than we are. Life is not broken, but continuous and unending. The deep, unfathomable mystery of being remains unsolved. The beginning of life we know not, yet we know that we are, and we know that we shall continue to be, united beyond the grave with those loved ones who have gone on before.

We think sometimes that perhaps death is the end of the feverish journey of life, but that is because our poor, weak human vision is so limited and so shortsighted.

I watched a sail until it dropped from sight
Over the rounding sea. A gleam of white,
A last far-flashed farewell, and, like a thought
Slipt out of mind, it vanished, and was not.

Yet to the helmsman standing at the wheel
Broad seas still stretched beneath the gliding keel.
Disaster? Change? He felt no slightest sign,
Nor dreamed he of that far horizon line.

So may it be, perchance, when down the tide
Our dear ones vanish. Peacefully they glide
On level seas, nor mark the unknown bound.
We call it death—to them 'tis life beyond.

The world will little know nor long remember what we say here, but CARL ANDERSON'S comrades and associates will not soon forget his services to the Nation, his devotion to his home, his love for wife and children, and his kindness and generosity to his friends. From this life, well lived and tragically ended, comes the lesson so well expressed in those other lines—

Build thee more stately mansions, oh, my soul,
As the swift seasons roll;
Leave the low-vaulted past;
Let each new temple, nobler than the last,
Shut thee from heaven with a dome more vast,
Till thou at length are free,
Leaving thine outgrown shell by life's unresting sea.

Mr. Speaker, it was at the eventide that we stood yonder in the cemetery at Fremont. I shall never forget the spectacle. The glorious sun was going down in the golden west, marking the dying day, symbolic of the brilliant life that had passed into the great beyond. We were gathered about the mound. Here were ranks of the old veterans, for whose interests CARL had fought, and they stood there and tried to keep the drooping shoulders as square as they were when many years ago they marched away to the grand, wild music of war. They tried to be brave; but the eyes were dim and the cheeks were wet, for they knew they had lost a fearless and faithful advocate. And then there were the other friends gathered about, literally acres of them; as the casket, laden with flowers, was lowered beneath the green sod of that historic cemetery I could but think of the tender lines of one of America's sweetest singers, who wrote for a loved one this epitaph of undying beauty:

Warm summer sun, shine kindly here;
Warm southern wind, blow softly here;
Green sod above, lie light, lie light.
Good night, dear heart; good night; good night.

Mr. POST. Mr. Speaker, we have met to-day not to transact the regular business of the House, but to pay our respects and tribute to the dead. This Congress, now nearing its close, is notable for the number of its dead. Eighteen Members of this body and six Members of the upper branch, with the Vice President, have answered the final roll call.

The parting with friends at death is the saddest of all events in life. It severs all ties of friendship and affection. It blights the sweetest companionships and obliterates the most sacred associations. The successes and triumphs of life, its turmoil and strife, cruelty, and injustice lead to the same earthly ending. And after it, how soon are we forgotten? We are but a mite in the great and ever-increasing sea of humanity.

When death overcomes man in his youth, or when in the prime of life, it creates a sentiment of grief amounting to despair. On the other hand, if we enjoy in health, with full possession of all our faculties, the Psalmist's limit of life of four score years, it is universally a source of profound gratitude. To be stricken with death when in the very prime of life, with the brightest prospects to crown a glorious future, is most appalling. The tragic and dramatic death of our colleague, CARL C. ANDERSON, on the 1st day of October, 1912, by its very suddenness shocked the whole community and overcame it with a sense of the deepest sorrow and lamentation. Leaving his home in Fostoria with a friend upon a business errand to a neighboring town, concluding their business engagement, upon their return voyage the automobile in which they were making the trip, in making a sharp turn in the road, upset, seriously injuring the driver and killing our beloved colleague.

A life full of vigor and manhood, not yet 35 years of age, in the passing of a single moment was thus so unexpectedly blotted out forever, a lamentable and sad reminder of the uncertainty of life.

CARL, as he was familiarly called by all who were fortunate in knowing him, was strictly one of the common people. When a mere boy he earned his own living as a newsboy and bootblack. He was most energetic, zealously industrious, and early in life established himself in successful business. He was endowed with a striking personality and high and generous impulses, and his sympathies were so broad, his mind so tolerant, his nature so gentle that he easily gained the admiration and affections of all who were privileged to know him. These inherent qualities admirably fitted him for the political arena, and while yet a mere boy he was elected twice to the office of mayor of his native town and occupied other positions of public trust.

In 1908 he was easily the first choice of his party as its nominee for the office of Representative in Congress for the thirteenth district of Ohio, and at the general election was elected to the Sixty-first Congress by an overwhelming plurality, and, I am informed, was the youngest Member of the House in that Congress. He was reelected to the Sixty-second Congress, and at the primaries held in the district to nominate candidates for Congress in the summer of 1912, he had grown so rapidly in the public favor that he was not only the unanimous choice of his own party, but was practically unopposed by candidates of other parties.

Stricken down at the very threshold of a most promising career, when his young life was buoyant with hope and filled with aspirations of greater success, his body, so carefully consigned to earth by his legion of friends, political admirers, fraternal orders, and delegations from the various counties in his district, may crumble into dust, but his spirit will live on forever.

It was not my good fortune to know him until the opening of the extra session beginning on the 4th of April, 1911. Our offices in the House Office Building were in close proximity and our acquaintanceship soon ripened into the closest friendship. I soon learned to love him because of his sweet spirit and gracious demeanor, his kindly consideration for me and all about him, and his charming personality that made his companionship most agreeable. He was filled with the spirit of kindness toward others and bent every possible effort to meet their desires and wants.

His fidelity to his constituents was so persistent that they never faltered in their loyalty and devotion to him. No complaint was ever too trivial for him to investigate and no letter was ever received by him that did not receive an answer couched

in the most gracious language. His disposition and eagerness to serve his constituents, regardless of politics, were well known, and they most highly appreciated his services and delighted to honor him. He delighted in giving attention to the little things in life, little kindnesses, and thoughtfulness of deeds that created a close bond of friendship which existed at all times between him and the people of his district. These many manly qualifications made him a host of friends in the opposite party, who voted for him as regularly as did his party friends.

The very strongest bond of friendship and devotion existed between him and the veterans of the Civil War. He was their stanchest friend and they were his friends, and those of his district his truest followers. No soldier constituent of his ever made him a request too trivial not to receive a prompt response. He devoted a great part of his time to aiding the veteran soldiers and seeing that they received the pensions due them from the Government. At his funeral, which took place at Fostoria and Fremont, more than 200 veterans of the Civil War, all fast tottering to the grave, marched in the line of the procession to his final resting place, as a tribute of the respect and veneration in which he was held by them. This remnant of the fast-vanishing Army of the Blue, of the men who marched away during the War of the Rebellion in defense of the flag, following the funeral cortege with bowed heads and sobbing hearts as it bore the remains of our colleague to their last resting place, has left an impress upon my memory which time can not efface. It was but one scene exemplifying in generous sympathy the admiration in which he was held by the soldiers of his district. Nor was this veneration confined to the veterans whom he so steadfastly and faithfully served.

In his home city business was wholly suspended. Its streets were lined with thousands of his former constituents, with neighbors, fraternal associates, and friends. At the beautiful cemetery in the neighboring city of Fremont, where his mortal remains were laid away to rest forever, thousands more had congregated to give vent to their sorrow and grief.

His private life was ideal. He was a devoted husband, a kind and affectionate father, and a most genial, considerate, loyal, and true friend at all times.

When I stood beside his grave, in the presence of that mysterious, solemn silence—death—I realized how quickly he had gone out from our midst, leaving a multitude of heavy hearts, and it was my wish that his sweet memory should ever remain fresh in the affections of his friends and of the people who honored and loved him as their representative and whom he served and loved so well.

Mr. BULKLEY. Mr. Speaker, CARL ANDERSON was elected a Member of this House in 1908 and served in the Sixty-first Congress. He was reelected to the Sixty-second Congress by a greatly increased majority, and was, at the time of his death, the candidate of the Democratic Party to represent his district in the Sixty-third Congress. There can be no doubt that had he lived a few more weeks he would have been returned with a majority even greater than he had received before. His popularity was constantly increasing.

His constant and remarkable gain in popularity was in no way mysterious. Everyone knows his persistent industry, his untiring devotion to the interests of his constituents. He was always working, early and late, always giving unsparingly his whole strength and his best efforts to the constituency which honored and trusted him. Political friend and foe alike were made to feel that he was the representative of all, and his generosity and unfailing kindness and courtesy made him many a warm friend among those who had opposed him politically.

His generosity and unfailing readiness to do a kind act for everyone with whom he came in contact were known and appreciated by his colleagues. When I refer to his readiness to do a kindness I do him less than justice; he was not merely ready, he was anxious, and always seemed to seek the opportunity to do some helpful thing for each and every one of us. After my election to this House I came to Washington in the closing days of the last Congress to get acquainted with my new colleagues and my new duties. It was CARL ANDERSON who first made me feel at home here; it was he who took most time and trouble to give me suggestions and information. And up to the end of the session last summer, when I last spoke with him, he, more often than any other Member, came to me with suggestions for my good, for the good of my friends and my constituents.

He was broad-minded, generous, democratic, sympathetic, industrious, determined to serve well and to succeed. Less than 35 years of age, he was at the threshold of a career of great promise. He met his tragic and untimely death in an automobile accident, while actively engaged in the duties of the political compaign of last autumn. Who can say how great might have been our colleague's career had it not thus prematurely ended?

At this point Mr. BULKLEY assumed the chair as Speaker pro tempore.

Mr. BATHRICK. Mr. Speaker, I yield no grudging tribute to CARL ANDERSON, but when death writes finis upon the scroll of life words can be but empty symbols of vain meditation.

No eulogium of one who has passed beyond the curtain of eternal darkness can ease the pain or requite the loss of those who mourn. Rather might it accentuate both and hinder the blessed healing of the balm of time. Yet it is not altogether futile and is wholly just that the mind should linger about the brighter memories of the dead, upon the better parts of a life ended. Memory should be like a golden thread leading us back to the happy moments of the past, to the joys of the vanished yesterdays, that smiles, not tears, may mark our recollections.

Who would be a vile ghoul of reminiscence and, in the presence of the common failings of the living, disinter human error? The frailties of mankind are but the faults of the fallow where the grain yields its hundredfold and imperfections are lost in the abundance of the harvest.

CARL ANDERSON knew more of sunlight in his heart than gloom. He shed its cheerful rays about him in pleasant words and hearty handclasps and smiling greetings. The world to him was a workshop where duty was pleasurable, not painful. Within this Chamber he ably sought to do the will of his people, often not expressed but by him anticipated. To him their tribute of confidence and esteem was a reward far transcending the value of any sordid recompense. And when, within the small cities of his district, the bells softly tolled the signal of his departure, commerce halted, community activities ceased, the people gathered about his bier, and friend or foe failed not to render homage to the clay of one who was true, industrious, and cheerful.

CARL ANDERSON, in the field where the mental Titans of this Nation contend, may not have stood upon their lofty plane, but, young, vigorous, and keen, none may know where the years might have placed him. He may not have climbed to the pinnacle of fame, but he wrought well and was pleasant. He loved his country, revered its defenders, and in their years of feebleness and want brought solace and material aid to many a troubled household.

Too often our good deeds weaken and die in the memory of men, but every human being soweth seeds which grow and multiply. In the crush of human emotions not all the good will fructify and neither will all the evil flourish, but like the banyan tree whose branches are strengthened as they increase their gracious shadows so deeds of kindness strengthen the human heart. So grew the generous nature of this man, honored by the populace, until often the distress of others became his very own, and by the touch of his helping hand their heavy cares were rolled aside.

I do not know what creed he professed; I know not what church cast its sanctified mantle about him, neither shall the records of justice take note of these, for it is written in the roll of heaven that he was charitable and kind.

Mr. Speaker, the herald of death oft gives no day of grace, and when from the shadow came the summons to attend the last roll call in the house of life it found CARL ANDERSON yielding willing tribute to friendship—it found him giving aid to others.

Fate, silently beckoning, held aside the veil and he entered, to return no more, but, to-day, on the face of the cliffs of time, we will chisel his name and beneath it subscribe the humble tribute: He gave aid and comfort to his fellow men.

Mr. SHARP. Mr. Speaker, this is an unusual occasion, unusual because we are called upon in a single afternoon in this memorial service to voice our grief over the death of seven Members of Congress, whose distinguished services in these Halls of legislation are forever ended. The hand of death has indeed been most heavily laid upon our colleagues of the Sixty-second Congress. Its beckoning call has come alike to the young and the old. But a week ago this Sabbath day we held similar services for three others of our departed Members, and, all told, I believe 25 or 26 of the membership of this Congress have passed from among us since taking their oath of office less than two years ago. Fully half of the delegations of our sisterhood of States have been called upon to mourn the loss of one

or more Members who had won a place in their affections. Of these States thus afflicted my own has been singularly free from such a visitation; and until now I do not recall a time in recent years when its delegation—in the House, at least—has been called upon to memorialize the life and services of a deceased Member.

If not inappropriate to this sad occasion, may I speculate in a vein of thought which during the past two years must have often come in common to the minds of many of my colleagues as to the cause of the frequency of the call of death to this Chamber. Surely the reason is to be found in some other explanation than to ascribe it to the normal rate of mortality among men, for if I mistake not, our death rate has been excessively high, measured by such a standard; nor may it be explained that it merely happens to be abnormal and beyond the usual average, because the death rate in the preceding Congresses also seems to be very high. Neither can we find a satisfactory cause if we would attribute it to the age of those who have departed; for, again, measured by mere years, the average certainly has not exceeded that period in life which we assign to middle age.

It is my own belief, and I say it to the credit of my coworkers in Congress, that their fidelity and attention to duty—that they might in the fullest measure possible discharge the obligations of their office—in no small degree have contributed to the untimely taking off of many of those who have passed over the river. While this may not be the popular notion, nor comport with the common conception of the work performed by the average Congressman, yet I believe it is undeniably true that in a large majority of cases he devotes more hours of work and gives more conscientious concern to the faithful discharge of his duties than he ever gave to his private affairs. During the time of my service in the House of Representatives, I have personally known of not a few instances in which Members, after most arduous work in the preparation of some important measure and their participation upon this floor in its discussion, have become so weakened by their labors that death soon after found in their exhausted condition but a feeble resistance.

While these observations, from the very nature of the case, can not refer to the taking off of the one for whom Ohio's delegation especially mourns to-day, as death came by accident, yet I am confirmed in my belief that they explain to no small extent the reasons for its frequent visitation to our membership. Of the seven whose deaths we come to mourn to-day, CARL ANDERSON, of Ohio, was the youngest, having been elected as a Member of this House at an unsually early age. He brought with him all the zeal and vigor of action which belongs to early manhood, and in his achievements, in so far, at least, as representing the demands of his constituents is concerned, he was successful. He early won the friendship not only of his colleagues from his own State but that of a continually widening circle of acquaintances. Speaking for myself, he was not only my friend but I was his friend. His willingness to do me a favor in the advancement of any measure which I had before his committee was spontaneous and generous to a degree. I think I but voice the sentiment of the other members of my delegation when I say that they all had a similar experience in their intercourse with CARL ANDERSON.

I suppose that if any one particular field of legislation could be recalled in which he was most active we would all agree that it was in the work of securing better recognition for the old soldiers, not only of his own district but throughout the country. Representing as I do an adjoining district to the one which he so faithfully represented, there is naturally a community of interests between the splendid citizens which people both constituencies. Made up of a harmonious blending of the early New England settlers, the so-called Pennsylvania Dutch, and that sturdy stock of German emigrants which came over in the earlier days of the State's history, their interests are homogenous in character. With a varied industrial development on no mean scale, an important commercial status, their rich agricultural resources, and their fine institutions of learning, they form a constituency which any man might feel proud to represent.

I know from personal knowledge that CARL ANDERSON's efforts in behalf of the old soldiers of his district were appreciated beyond measure. Just outside of the city limits of Sandusky, which is the capital city of Erie County, adjoining my district on the west, is located a soldiers' and sailors' home, which, in its management and treatment of the old soldiers of the State, has always been held in the highest esteem. To those living in the home he was held as their especial champion, while the citizens at large, regardless of their party affiliations, showed to him a most loyal devotion.

In conversation with him at different times I came more and more to appreciate not only his capacity for work but his directness in putting such work into most effective execution. While his early training and environment deprived him of advantages in an educational way—a handicap which I am led to believe he appreciated in later years, though rather proud than otherwise of his humble start in life—yet his active abilities, backed by an indomitable ambition to succeed, made him a valuable Member in a most practical way.

It was indeed this ambition to do things and the high tension under which he constantly worked that brought him to a physical condition not, I think, generally known to many of his friends. It was within the closing days of the last session of Congress and during the last conversation that I now recall having had with him that he confided to me the fact that, though a young man in years, he had a heart so weakened as to be able to scarcely do the work of a man twice his years. I know he was forced to a most abstemious manner of living, and by careful training he was endeavoring to conserve in the best manner possible his strength for the work he had to do. Of one whose life work brings to our minds such a conception of sincere purpose and fidelity to duty, we must be warranted in believing that the same high ideals controlled him in his domestic life, and so those who knew him best found it to be. In more than one conversation with him he expressed his love of home and family, and I am sure that not one of his colaborers in Congress has spent more happy hours in the bosom of his family than CARL ANDERSON.

So much in sincere praise must I say of one whom I knew as a friend. Sleeping in that eternal slumber of death which knows no awakening in this mortal world, beneath the shade of the giant oaks and elms of the beautiful cemetery, just outside of the city of Fremont, lie the earthly remains of CARL ANDERSON. On the afternoon of an autumnal day, first at his home in Fostoria and then a few hours later at the cemetery of the town of his early adoption, a great concourse of mourners gathered to witness and join in the last sad rites of burial. If the hearty good will and kindly feeling given to him during the scenes of his triumph in his business and political careers attested the appreciation of his work, surely in his hour of death the mute testimony of the regard of this great outpouring of his friends from every walk of life—the little children, the business men, the working men, and last the objects of his sincerest regard and affection, the old soldiers—showed the unmistakable love and esteem in which he had been held by his neighbors. May the faithful widowed mother and her little children be comforted in their irreparable loss.

Mr. GOEKE. Mr. Speaker, I ask unanimous consent that Members desiring to speak on the life, character, and public services of the late CARL C. ANDERSON be given five legislative days in which to extend their remarks in the RECORD.

The SPEAKER. The gentleman from Ohio [Mr. GOEKE] asks unanimous consent that Members desiring to speak on the life, character, and public services of the late CARL ANDERSON have five legislative days in which to print their remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

THE LATE SENATOR WELDON BRINTON HEYBURN, OF IDAHO.

The SPEAKER. The Clerk will report the order in relation to the late Senator HEYBURN.

The Clerk read as follows:

On motion of Mr. FRENCH, by unanimous consent,

Ordered, That Sunday, February 23, 1913, be set apart for addresses upon the life, character, and public services of Hon. WELDON BRINTON HEYBURN, late a Senator from the State of Idaho.

Mr. FRENCH. Mr. Speaker, I offer the following resolution.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 863.

Resolved, That the business of the House be now suspended in order that opportunity may be given for tributes to the memory of Hon. WELDON BRINTON HEYBURN, late a Senator from the State of Idaho.

Resolved, That as a special mark of respect to the memory of the deceased and in recognition of his distinguished public career the House, at the conclusion of these memorial exercises to-day shall stand adjourned.

Resolved, That the Clerk communicate these resolutions to the Senate.

Resolved, That the Clerk send a copy of these resolutions to the family of the deceased.

The resolution was unanimously agreed to.

Mr. FRENCH. Mr. Speaker, it is with mingled emotions that I participate in the memorial exercises that to-day have brought us together. I participate as a friend of many years of him whom we recall at this hour, and I view the one whose memory we cherish not only as a friend but as a citizen of the State that he represented with such distinguished ability and

as a modest colaborer in many of the undertakings in which he gave so largely of his life and genius.

Ordinarily we have but passing interest in the personal details of the lives of men. They were all born; they all have had experiences somewhat in common; they all have died, or must meet that end. Here and there a man stands out, however, so conspicuously as a national character that we crave to look beyond. To say that he was born, that he lived and died, tells nothing. To recall the achievements of his life tells not enough. We crave to know something of the personal side of the life that did great things, that we may measure better the achievements attained, that we may discern more clearly the purpose and impulses that inspired action, and that we may have at once a truer measure of the causes that have contributed to events that are momentous.

A LIFE SKETCH.

In speaking of the life and service of Senator HEYBURN I shall try to give such personal facts connected with his life as had bearing upon the problems that he had to meet and the way in which he met them.

WELDON BRINTON HEYBURN was born May 23, 1852, in Delaware County, Pa., at the homestead of his paternal ancestors—the home of his great-grandfather, his grandfather, and his father. He was of English ancestry on both sides of his family. His mother was Sarah Gilpin, the daughter of John Dickinson Gilpin, the twentieth generation in direct descent from Sir Richard de Gilpin, who was knighted by King John in 1206, and which line includes the Washington and West families in England and America. He was of Quaker ancestry on both sides of his family.

His mother was a Puritan of the Puritans, who never failed to stand for truth or righteousness, and who never consented to the slightest infringement of the moral law. She was liberally educated, widely read, and kept up her reading and study throughout her life. At the age of 80 years she recited long poems and discussed questions of history, science, and art with a clear mind.

The Senator inherited mental and physical traits from both parents. He received an academic education in the public schools and under private tutors.

He spent his boyhood upon his father's farms and was associated in business with his father, John Brinton Heyburn, who was a large landowner in Chester and Delaware Counties, Pa., and who, during the latter part of his life, was chairman of the board of county commissioners of Delaware County.

Mr. HEYBURN was admitted to the bar in the spring of 1876, and immediately entered upon the work of his profession. After practicing law for more than two years in Pennsylvania he heeded the call of the West, and moved to Leadville, Colo., where he engaged in practice from 1878 until 1882. Upon the development of the mining interests in the then Territory of Idaho, in the winter of 1883, he went to the Coeur d'Alene mining country in Shoshone County, where he resumed the practice of law.

He participated actively in the conversion of the Territory into the State of Idaho, was a member of the constitutional convention, and chairman of the judiciary committee of that body. He was a member of the Republican national conventions of 1888, 1892, 1900, and 1904, and was a member of the Republican national committee from 1904 to 1908.

In 1898 Mr. HEYBURN was unanimously nominated as the Republican candidate for Congress, but was defeated by the combined Democrat, Populist, and free-silver adherents.

He married Gheretein Yeatman, daughter of John Marshall and Lavinia Passmore Yeatman, of Chester County, Pa.

In 1903 Mr. HEYBURN was elected to the United States Senate and continued a Member of that body until his death, on October 17, 1912.

PROFESSIONAL AND PUBLIC SERVICES.

The bare recital of events such as I have enumerated tell only part, and that but vaguely, of the life work of Senator HEYBURN.

As a lawyer his greatest successes came after he located in Idaho. He was strong, forceful, and abounding in resource, a tireless worker, and though younger than Judge Claggett, Frank Ganahn, Albert Hagan, Judge McBride, and Judge Mayhew, who made the bar of Shoshone County in those early days so conspicuous in strength and ability, it was but a short time before the late Senator forced himself into the front rank with those distinguished men and was able to cope with them, singly or in groups, as frequently happened, most successfully.

During the period of his actual practice in the Coeur d'Alene region he was identified on one side or the other with all the important mining litigation and was unusually successful. In 1900 he edited and published Idaho Laws and Decisions, Annotated and Digested.

Aside from Senator HEYBURN's influence upon mining law and his remarkable success as a practitioner, probably the most notable work that he performed prior to his entrance into the Senate was as a member of the constitutional convention of the State of Idaho in 1889. That was a convention made up of men of unusual ability. It included such men as William H. Claggett, one of the most notable characters of the Northwest; William J. McConnell, twice governor of Idaho and one time Senator of the United States; James H. Beatty, later a United States district judge for nearly 20 years; numerous men who have performed distinguished public services, and other men of great ability who have preferred private life.

Mr. Claggett was president of the constitutional convention and Judge HEYBURN was chairman of the committee on judiciary, and from the advantage of this position and from his own great ability he shaped in large degree the fundamental law of the Commonwealth of Idaho.

AS SENATOR.

Upon entering the Senate March 4, 1903, he was assigned to the chairmanship of the Committee on Manufactures, which chairmanship he held continuously. He was also a member of the Committees on Finance, Philippines, Conservation, Immigration, Mines and Mining, Privileges and Elections, Public Buildings and Grounds, and Public Lands.

Amid his new responsibilities Senator HEYBURN was most industrious, as was his habit of life, and he expressed his ideas upon a great variety of subject matters that the Senate was called upon to consider, and participated in debate to a far greater extent than is usual among Members of the Senate. Few men were his equal in the matter of information upon so wide a variety of subjects, and few men have had so large a part in the shaping and determining of legislation touching great problems.

As a member of the Committee on the Philippines he drew and reported the Philippine tariff bill which is the present law.

On the statehood question, involving the admission of Arizona and New Mexico, Senator HEYBURN stood for separate statehood, and on two occasions his influence defined the policy of the Senate that the States should be admitted separately and not as one.

On the long and short haul clause of the act looking to the regulation of transportation rates, Senator HEYBURN vigorously contended that no greater charge should be made for a short haul than for a long one.

He was made chairman of the joint committee of the two Houses of Congress to revise and codify the laws of the United States. From this committee he reported and succeeded in passing, first, the Criminal Code of the United States, and second, the Judiciary Title, both of which are now in force.

Mr. HEYBURN opposed the Canadian reciprocity treaty.

He stood for liberal pensions for Union soldiers.

He opposed the making of what were termed peace treaties with Great Britain and France, on the broad principles expressed by President Washington against forming entangling alliances with other nations.

He consistently stood for the protective tariff policy of the Republican Party, insisting upon tariff duties that would give a margin of protection sufficient to insure the markets of our own country to our own people, and the employment of labor at better wages and under better conditions than those that prevail abroad.

Probably, however, the work that Senator HEYBURN performed that will stand out as a monument to him more distinctly than any other specific work was that in behalf of the pure food and drug act of 1906.

To have been a Member of Congress and to have supported the measure is credit enough to ascribe to most Members of either House or Senate. Senator HEYBURN's relation to the bill was far more responsible than that. Mindful of the splendid efforts put forth by able and earnest men and women in private and public life, and manifested in unusual degree by several Members of the House of Representatives, I think I do not overestimate the work accomplished by Senator HEYBURN when I say that if it had not been for his services the measure would not have passed the Senate of the United States at the time that it did, and while public sentiment was crystallizing in favor of the legislation, it is not likely that the measure would have been passed until possibly a year or two years of time had elapsed, within which the public conscience would have been more definitely aroused upon the importance of the legislation.

The legislation long had been pending and no conclusion had been reached. Senator HEYBURN pressed the measure during the Fifty-eighth Congress, but was unable to obtain a final

vote. During the interval between the Fifty-eighth and Fifty-ninth Congresses Senator Heyburn gave careful consideration to the question and completely revised the measure which had been formerly proposed eliminating the principles of the establishment of standards by legislation, as well as the provisions for the establishment of a board to fix arbitrary standards that would be binding upon the courts, leaving the violation of the general rules laid down in the act to be determined by the courts. These principles were carried through and adopted in the final passage of the bill which he drew and which became a law, and which the country over is conceded to be one of the most important pieces of legislation ever enacted by Congress.

This it was that led Dr. Harvey W. Wiley to say in commenting upon the author of the measure:

> I want to see the State of Idaho erect a monument to the memory of Senator HEYBURN, that able representative from the Gem State, who, after one of the greatest and hardest fights ever made in the United States Senate, secured the passage of the pure-food bill; and who, after the bill had been passed, was the bulwark around which centered the storm for its enforcement. I want to see engraved beneath that monument the inscription, "His greatest work for humanity was securing the passage of the national pure-food law."

CONVICTIONS.

I have called attention to concrete instances of public service performed by Senator HEYBURN. May I say, however, that possibly quite as important as this was the position that he took upon certain fundamental principles of government and society.

Senator HEYBURN was born of Quaker parentage and as is well known the Quakers were despised for many years by people in the early Colonies to a degree almost unparalleled in American history.

Undoubtedly the influence of an organization such as the Quakers and the attitude of the world toward the members of that sect contributed in no little degree to WELDON B. HEYBURN'S strength of character, and probably in large measure modified his attitude toward the definite organizations through which are determined the wishes of society.

The period during which Senator HEYBURN was born is also of interest in calling attention to the influences that helped to shape his early life. Senator HEYBURN was but a boy throughout the crisis of the Civil War, at the impressionable age that would be influenced in greater degree than probably any other, by environment, by discussion, and by the trend of thought among older folks, which, without their being aware of the fact, was making a deep impression upon the earnest young member of the family.

Senator HEYBURN was loyal to the Union. He had absolutely no patience with the causes that led up to the Civil War, and was, in fact, bitter toward every movement that looked to the perpetuation of even the memory of that unfortunate crisis in American history. Doubtless his attitude appeals to most people as that of an extremist, and yet I find probably the cause for that extreme position in the intense years filled with the throes of war, with all its suffering and death and sorrow, through which the boy WELDON developed from childhood to young manhood's years. The Battle of Gettysburg, upon which the fate of the Nation in large part hung, and one of the greatest engagements of the world's history, was fought not many miles from the boyhood home of Senator HEYBURN.

An impression was written upon his very character that nothing could efface, and that made him as intolerant toward the memory of the movement that looked to the breaking asunder of our Nation as were those who fought for the Nation's integrity uncompromising and intolerant in their position 50 years ago.

How intense was Senator HEYBURN'S feeling in the matter of the Civil War and his judgment of the tremendous consequences that were dependent upon the outcome of the issue between the North and the South may be gathered from his words in the course of the debate in the Senate of the United States during the time the service pension bill was being considered. Speaking of the soldiers of that great war, Senator HEYBURN said:

> There was never in the history of the world the performance of men that accomplished such great good as was accomplished by those men. Other soldiers have kept the thrones for kings. Other soldiers have been able to turn the tide of one monarchy against another. Other soldiers have been able to seize new countries and subjugate them.
>
> But this was a soldiery that stood for the preservation of a country that stood then and stands now on a higher plane of civilization than any other country in the world. It may be worth while to save a monarchy and yield your life for it. It may be worth while to keep some petty king upon the throne and even sacrifice your life or your welfare for him. But it is countless times greater to offer your life and make the sacrifice to maintain the Republic of the United States—the only Republic that was known in that day or has been known since that is worthy of the name.

It has been said that Senator HEYBURN belonged to an old school. It has been said that his sympathies were entirely out of touch with the present and that they were more in harmony with a period a half century or a century ago.

Senator HEYBURN believed in making progress slowly and with due respect to the experiences of the past. He believed in the Biblical injunction, "Remove not the ancient landmarks which thy fathers have set." He was not a man who could be swept off his feet by the tide of public sentiment or by the passing whim of an excited day. He was a man not averse to new thought or new ideas, but one who preferred to think carefully and well upon the proposed plans before attempting to revolutionize government and place into actual practice policies hitherto untried.

I believe that had Senator HEYBURN lived at the time the American Government was born, he would have participated in the shaping of its fundamental principles. I believe he would not have been found working in harmony with Jefferson or Madison, but would rather have been found working shoulder to shoulder with Hamilton, with the Adamses, with Hancock, with that body of noble men who felt that republican government was an experiment, and who, while thoroughly in sympathy with the idea of American independence, believed that this Government would do well to maintain such a form as would insure stability, eliminating, however, the idea of perpetual kingship.

Had Senator HEYBURN lived 50 years ago, and during the period that immediately preceded the great Civil War, I have no doubt that in that period he would have been identified with the elements throughout the United States who felt that the institution of slavery was wrong; that the system should be abolished; and that the Government of the United States should be maintained in its integrity.

A CONSERVATIVE.

Senator HEYBURN, with relation to the problems that have confronted our country during the last 20 years, was distinctively a conservative. On the question of election of Senators he was entirely out of sympathy with the movement that has been waxing and waning for three-quarters of a century, until in recent years it culminated with overwhelming power in a demand that could not be disregarded that the Congress of the United States recognize the deep feeling of the American people that this modification be made in our fundamental law. He was one of those who, in the Senate of the United States, opposed the amendment.

Senator HEYBURN had no patience with the demand for more direct expression of the people through the direct primary, the initiative, referendum, and recall, and he felt that these innovations would produce evil rather than good if given a place in our system of Government.

He was a strong believer in the Federal Government, but believed with deep earnestness that the State should leave to private initiative everything that does not need to be taken over by organized society or controlled by it, as a result of experience that urged that Government management or control is for the unquestioned public good.

Senator HEYBURN favored the passage of the pure food and drug act. On the other hand, he bitterly opposed the passage of the act creating the Children's Bureau. Both are the same in principle, yet he condemned the latter as paternalistic. Probably the pure food and drug act may be regarded as the extreme to which he would permit himself to go, and that while the Children's Bureau measure was similar so far as principle is concerned the problems with which it has to do were regarded by him as questions that should be handled through the home or by local instrumentalities within the State.

On the question of conservation, Senator HEYBURN took a position that has been earnestly applauded and vigorously condemned. He always maintained with great sincerity the necessity of conservation of the country's natural resources, but he urged that the first natural resource to be conserved is opportunity for a citizen to engage in productive enterprise, having such material as land, timber, power, and water sites, and so forth, as his capital and basis of operation. He opposed the accumulation of vast areas of public land by individuals or corporations. He favored a general and specific plan that would result in the population of the country by actual bona fide settlers. He believed that it is not only the right, but the duty of each generation to participate in the use and enjoyment of natural resources, and further believed that the neglect or failure on the part of the people to do so is the failure of duty on their part toward the growth and greatness of our country. He vigorously opposed the comprehensive policy that has application at present in part and the extension of which is earnestly urged looking to more complete Federal management and control of the natural resources of the country. He believed that the policies that have been followed by our Nation for the past

50 years justify the wisdom of those who had part in their shaping, and he would have applied these policies to the great questions of the day and continued them through the years to come.

PARTY AFFILIATION.

Senator HEYBURN was a Republican—ardent, devout in his convictions, earnest in the defense of that which he conceived to be the basic principles of the party to which he belonged.

Repeatedly during the last year it was my privilege to talk over with him some of the matters that concern our Nation and with which the Republican Party has had to do. Senator HEYBURN believed that the Republican Party has accomplished only part of its great mission. He believed it has more to do, but he did not believe in temporizing. He did not believe in embodying and incorporating as a part of the Republican platform principles that are of popular interest with which he was not in sympathy. True, he believed that this would mean defeat for the Republican Party, if failure to carry an election in a given year means defeat, but he felt that in the end the wisdom of the party whose principles he had espoused would prevail. He believed his party would need to go through the purging of fire that it might be made better and stronger and more able to carry on the work to which it was dedicated by the immortal Lincoln and his noble coworkers who outlined the principles for which it has stood for one-half a century and more.

OFFICIAL RESPONSIBILITY.

Senator HEYBURN believed that every public official should take seriously the office and the responsibilities of office that are committed to his trust. He believed that the people intend when they elect a man to public office to clothe that man with power to act for them. He believed in the right of petition by the people, but he believed that the right to petition should mean no more than the expression of the views of the people upon a subject in which they might be interested for the guidance of the public official. He believed that the public official is bound by the very obligation of his office to exercise his own judgment in the matter upon which the people have petitioned in the final determination of the problem.

I do not know that he felt this responsibility more keenly because he was a Member of the Senate than he would have felt it if he had been a Member of the popular branch of our National Congress. It may be that recognizing that the Members of the House are elected every two years and are supposed to represent not the State, but the people from whom they come, he would have conceded the right and maybe the duty of the Members to act in harmony as nearly as they can with the sentiment of those who have given to them the commission to serve them. I think that, with respect to the Senate, he never for one moment entertained a doubt as to the responsibility of a Senator.

He did not assume that any constituent who was a petitioner could not handle the same problem with perfect confidence and wisdom if entrusted with the responsibility of meeting the problem, but he did believe that the one to whom that responsibility was given should give of his time and his talents in far greater degree than is asked or even permitted to the average citizen in considering the important problems of the day.

The question of degree to which a member of a legislative body should be responsive to popular will has been one to which the best minds of our country have given attention since the day the Constitution was adopted. There has been no definite course to which the members of legislative bodies could feel themselves committed. Here and there an individual has resigned when he found himself out of harmony with the people who had given him a commission to represent them. Possibly more frequently members of legislative bodies have bowed to the wish of their constituents and have regarded it as their highest duty to obey that wish regardless of their personal desire, feeling that their desire personally represented no more than an individual wish of any citizen who had exercised his franchise in helping to choose a Representative or a Senator.

Again there have been, so long as we have had a Republic, a few men who have stood out for the doctrine that when a commission has been given it has carried with it full responsibility, so far as judgment is concerned upon public questions, throughout the term of service to which the member has been chosen. Senator HEYBURN, probably more than any other man in the last 20 years, stood for this policy. It made him enemies; it made him friends; it caused detractors to rise up; and it produced admirers.

CHARACTERISTICS.

If there were one characteristic that more than any other could be said to be distinctively that of Senator HEYBURN, I believe that the characteristic of candor and frankness would probably be the one defined. No one needed to wait long to ascertain the position of Senator HEYBURN upon any public question. No one needed to hesitate to raise a question with him for discussion because he did not believe with Senator HEYBURN. I recall that during the first two or three years of Senator HEYBURN'S service in the Senate a problem was being considered by the Members of the delegation from Idaho that did not appeal to all of us in the same way. It was at the time when Senator Dubois was the colleague of Senator HEYBURN. I recall that one of the prominent citizens of Idaho made a special trip to Washington in the interest of the measure; I recall that with me he made his visit to Senator HEYBURN and that in my presence he talked over with the Senator his attitude upon the problem. Senator Dubois had not been able to see the question as Senator HEYBURN did, and I recall that just as my friend and I were about to leave Senator HEYBURN'S office my friend said to the Senator, "If you like, I will go over and talk to Senator Dubois and come back and let you know just what his attitude is." Senator HEYBURN, in all kindliness of manner and of intention, very promptly said in reply, "Senator Dubois and I may not agree upon this problem, but we are able to talk the matter over." In other words, he did not want a go-between. The same idea was characteristic of Senator HEYBURN'S relation with myself, and, I believe, with all the Members of the Senate and the House, and, in fact, with all men with whom he had to deal. More than this, Senator HEYBURN admired candor in other people.

When he was elected to the Senate in 1903 there were several strong men contending for the honor. One of these men was the late Hon. George L. Shoup, himself a Senator from Idaho for 10 years. After Senator HEYBURN was chosen he sent a telegram to Hon. Addison T. Smith, who had been with Senator Shoup during his service in the Senate, tendering him the position of secretary. Mr. Smith promptly replied that he could not accept the position, for he had not been favorable to the election of Mr. HEYBURN as Senator, but, on the other hand, had supported Senator Shoup. Senator HEYBURN replied that if he had not supported Senator Shoup, having been associated with him for so long a time, he would not now be soliciting his services. Mr. Smith accepted the position and at the close of nearly 10 years of intimate association with Senator HEYBURN spoke of him as follows:

> No man in public life in recent years has been so misunderstood and misrepresented. He never received proper credit for the splendid work he has done for the State and Nation, as he was always adverse to exploiting his accomplishments through the newspapers. The consciousness of duty well performed was his reward for his arduous labors. Those who were not acquainted with him, and many of those who only saw him occasionally, were of the opinion that he was of an austere and imperious disposition. This was a natural assumption, because of his aggressiveness in debate or when contending for his views on public questions, but to those who knew him best he appeared in his true character. He was generous to a fault, kind and considerate, true to his friends, and loyal and devoted to his family. In fact, I never knew a man who was more interested in his relatives and the friends of his early life and those who endured with him the hardships incident to pioneer days in the Coeur d'Alenes. He was a most congenial and lovable companion, and while he was intensely devoted to his work he always found time to cultivate the amenities of life.
>
> The Senator was most devoted to his State and to what he believed to be for the best interest of the people.

Few men in public life were so well informed generally as was Senator HEYBURN. His mind was a veritable storehouse, and while he appeared at all times to have prepared his addresses with much care, I am satisfied that the language that he used in delivering almost every address that he made was spontaneous and the facts that he brought out selected from those that had been stored in his memory through his years of experience.

Upon one occasion he was to deliver a notable address in the capital city of the State that he represented. His secretary, Mr. Smith, observed that the Senator was engrossed in other matters and was letting the days and, finally, the hours pass by without apparent preparation for the address. He finally reminded the Senator of the engagement that he had assumed. Senator HEYBURN turned to him and said, "Why, Addison, I have been preparing that speech for 20 years."

As an orator Senator HEYBURN must take high rank. From the numerous discussions in which he expressed his sentiments during the running debates in the Senate, no adequate idea can be had of his power. True, even in fragmentary and running debate his sentences were elegant, his words well chosen, and his illustrations apt and drawn from a vast field of experience or from extensive reading.

His occasional addresses, however, told of his strength as an orator and lift him at once into that high plane of public speakers who have contributed to the reputation of our greatest legislative body and give him a place among the men capable of expressing the profoundest truths in perfect diction.

While Senator HEYBURN belonged to a family that had given great names to England and America, this fact was not for him to boast, but rather it was a matter for him to carry within his family as a circumstance of great pride and yet not a circumstance that would help him unless he measured up to the responsibilities that a member of that family should assume. In fact, Senator HEYBURN believed that there is a responsibility to be borne by every individual and that too much prestige and encouragement from home may blight an otherwise successful life. In speaking with Senator HEYBURN one time I recall that the Senator expressed to me the idea that it is questionable whether or not wealth bequeathed by a parent to a child does not constitute a curse rather than a blessing. It was his idea that the young man or the young woman should be self-reliant and, regardless of the influence or wealth of his parents, himself assume the responsibilities that life presents.

Senator HEYBURN was one of the most versatile men I ever knew. He was a great lover of nature, and those who had occasion to be with him during his moments of recreation found him one of the most delightful companions that could be chosen for a fishing excursion, a few days in the mountains, or in the varied modes of recreation available to the people of the mountain region surrounding his home.

Again, Senator HEYBURN was a man who did not know what it was to be afraid. This thought applies not only to his attitude in public life upon questions of statecraft, but applies as well to his personal attitude as he met the problems that oftentimes present themselves to a strong man.

I have been told that at one time during labor difficulties near his home when he was warned not to appear because of his attitude toward those who felt themselves aggrieved, he refused to heed the warning, but in a public address upheld constituted authority and warned those who had challenged him that though for a time they might gain control, law and order would be restored and justice meted out to every one of them.

IN CONCLUSION.

The last days of Senator HEYBURN were fitting to the active life that he had led, for most of the time his mind was clear and one of his last sentences was with relation to his work in the Senate—"I am worn out, but I am worn out in the service of a great cause"—and as a parting testimony of the conviction of his own soul upon the ever-living inspiration of the ages, he expressed a clear faith and hope in God.

Finally, then, with the candor with which we all view the lives of those whose race has been run, recognizing traits of character that are variously esteemed, recognizing positions upon public questions taken by Senator HEYBURN that were not in harmony with the hopes of his most earnest friends, recognizing that possibly he was not in sympathy with the public opinion prevailing during the last few years of his life, yet recognizing on the other hand his strength of character, his honesty of purpose, his fidelity to duty as he saw duty, the fearlessness with which he met and contended with the influences that in one way or another sought to impress themselves upon the tasks with which he had to do, as we recall the memory of one with whom we may or may not have been in accord, we can not fail at this hour to pay to him the great tribute that was paid to another in the words, "Here was a man."

Mr. MONDELL. Mr. Speaker, it was my good fortune to meet Senator HEYBURN soon after his election to the Senate in 1903 and the acquaintance then formed ripened into a friendship which continued to grow and strengthen as time passed.

Of the many virtues which Senator HEYBURN possessed the one which most impressed me, and in my opinion was his most striking characteristic, was his unfailing moral courage. He possessed in an unusual degree the courage of his convictions.

It has been my experience that the most common and besetting fault of many good men is the disposition, in the face of opposition, in the presence of criticism, in the interest of harmony, to compromise their views, to waive their convictions.

How few, even of the best of men, can be depended upon at all times and under all circumstances to stand boldly for what they believe to be the right, to stand by and defend an unpopular cause, to voice an unpopular truth, to expose the fallacy of a popular fad, to rebuke forgetfulness of principle.

I do not mean to be understood as holding the opinion that there is lack of loyalty or steadfastness in the world to-day; if the occasion demanded there would be no lack of martyrs to any good cause. At the last ditch and in the final stand for principle men will be found as true and as faithful to-day as ever in the tide of time. In fact, believing as I do that the world grows steadily better, I am of the opinion that in any crucial test for a principle mankind is generally far more dependable now than in former days.

What we do lack is an appreciation of the importance of voicing our protest at all times against harmful tendencies, against indifference, against that denial of truth or of a cause which is involved in ignoring it. We are too prone to stand silently or idly by while truth is flaunted or ignored.

Of all the men I now recall whom I have known he in whose memory we are gathered to-day was most free from this fault and weakness. His devotion to those principles in which he believed—his loyalty to every cause he espoused or cherished—was so intense, so earnest, so unwavering that he never hesitated to boldly and bluntly declare his position and express his convictions utterly regardless of the effect such declaration might have on his fortune or his reputation.

This characteristic of our departed friend was the more noticeable in view of the fact that he possessed a heart overflowing with kindness; that he was tolerant of the views and opinions of others; that he was considerate of the feelings of those who differed from him. His ruling passion, however, was intensity of conviction. Those principles and policies which his judgment approved he believed in with all the fervor and devotion of a crusader and to him an attitude of indifference, or of easy tolerance, in the presence of an attack upon them, directly or indirectly, or even by analogy or inference, was unthinkable.

He was a loyal knight with ever-ready lance, quick not only to repel attack on those things he held sacred but to carry the warfare into the enemy's camp. In his opinion no good soldier of a cause had performed his duty by merely holding steadfastly his position; there was the duty of countercharge with a view, if possible, of dislodging the opposition from its position.

Holding these views of his duty and possessing the courage necessary to live up to them it was inevitable that in his political career and in the performance of his official duties he should have run counter to the views of many men and have had sharp and pointed differences with them, and yet so apparent was his sincerity, so manifest the honesty of his purpose, so free from malice or unkindliness were the blows he delivered, the home thrusts he gave, that he disarmed hostile criticism and often made of those with whom he most differed his warmest friends.

The lives of men whose lives are conspicuously worth while are valuable to us to the extent that we take to heart the truths which such lives emphasize. The life of our departed friend and colleague was useful and valuable in many ways. His influence for good was exerted over a wide field, embraced many subjects, was helpful to many people, but, in my opinion, that influence was most potent, will be most permanent, in its emphasis of the importance of deep and steadfast conviction and unfailing courage in defense and support of such conviction. His example reminds us that it is as much our duty to utter the note of warning, to challenge the false step or dangerous tendency, where to do so is neither popular or palatable and can have no immediate effect, as to do so when such action is popular and likely to be promptly effective. In fact, in the former case the duty is the more imperative and its performance the more meritorious because of the courage required in its fulfillment.

In the passing of Senator HEYBURN every good cause lost a fearless champion, and we who knew him lost a faithful friend. The great Northwest country, where he lived so long and whose interests he so courageously and effectively supported and defended, sincerely mourns him. He passed away in the full flower of his usefulness, and yet his life was peculiarly complete, and when the summons came he left us the blessed memory of a life of great and lasting usefulness and of a character rich in all the manly virtues.

Mr. KAHN. Mr. Speaker, WELDON BRINTON HEYBURN was one of the striking characters of the United States Senate. His early education eminently qualified him for a seat in that body. He was one of the best-informed men that I ever met. As a lawyer in the West he occupied a preeminent position. For over 30 years he practiced in the courts of his own State of Idaho, as well as in the Federal courts of nearly all of the Western Commonwealths. At heart he was a most kindly, courteous gentleman. He took an active part in the councils of his party. He was a thoroughly intense partisan, but was always fair in dealing with his political opponents. He had pronounced views upon all great public questions and always had the courage to express them. The matter of retaining popularity with the masses did not swerve him from what he considered to be the path of duty. There was no demagogy in his entire make-up. He never weighed the effect of his utterances on questions of the day upon his own fortunes. He was not what politicians call a "trimmer." Every one knew where he stood on those subjects that were of absorbing inter-

est to the American people, and even though one might not agree with him in his position, one always admired his courage in his fight for what he deemed the right. And once having made up his mind as to what he believed to be the right course to pursue, he steadfastly followed that course regardless of the attacks that were made upon him by his opponents. He was an indefatigable worker. He was just the kind of man that is needed in our public life. He was a forceful speaker, a ready debater. He was outspoken and blunt, at times almost to the point of brusqueness. Fearless, honest, faithful, and straightforward, he never hesitated to tell the truth, even though the telling thereof may have had occasion to cause temporary wounds. He took an active part in the debates of the Senate and helped to frame some of the most important laws that have been enacted during the last decade. His was a rugged physique, and I believed that he would enjoy many years of usefulness in the Senate; but it was not to be. He was stricken some months before he passed away, and when the end came it was not altogether a surprise to his near friends. He has gone to his reward; but in his adopted State of Idaho there are dozens of young men who will always revere his memory; they looked up to Senator HEYBURN as a true leader whom they might well follow. He was always ready to extend a helping hand to the struggling, ambitious youth of his State. They could always turn to him for counsel and advice; he inspired them with the courage to dare maintain the right. We join with them and with all who were permitted to know him in this life in expressing our appreciation of his worth as a legislator, his patriotism as a citizen, and his straightforward honesty as a man.

At this point Mr. FRENCH assumed the chair as Speaker pro tempore.

Mr. STEVENS of Minnesota. Mr. Speaker, the numerous melancholy occasions of this nature during the Sixty-second Congress have brought very vividly before us the truths not only as to the fleeting existence which is common to all mankind, but also that the struggles and stress of active public life does seriously impair the vitality and diminish the length of days of even the most robust of our colleagues. Perhaps as notable example of this is to be found in the life and departure of the man whose memory we honor by these exercises. His Quaker ancestry had transmitted to him that strength of mind and body which has so distinguished that splendid people wherever they may be found, and to the limit of his superb powers had he utilized the virtues, the character, the vigor, and the ability with which he had been so plentifully endowed. As has been the case with multitudes of American youth, from a restless spirit of adventure and a desire for personal advancement, young HEYBURN sought the West with its hardships, its freedom for growth and action, its opportunities for development of the greatest, best, and most which was within him. He entered into the spirit and life of those frontier days, and with his sound legal training, his strength of personality, and undaunted courage and perseverance, soon had a large share in the formation of the career and character of the vigorous young Commonwealth where he had chanced his fortunes and established his western home. The strong, practical, and capable men who associated with him early recognized and appreciated his usefulness and capacity, and at the age of 51 he was elected to represent his State in the Senate of the United States. There he speedily became a conspicuous, forceful, and thoroughly capable figure, with a faculty for useful and practical industry and a marked ability for an effective presentation of his views upon the great diversity of public questions upon which we are all compelled to pass in our work as legislative representatives of a great people. Early in his senatorial career Senator HEYBURN attracted attention by his most efficient work as chairman of the then comparatively insignificant Committee on Manufactures, but which had jurisdiction of legislation concerning pure food and drugs, which under his guidance was so soon to benefit the health and pockets of the American people.

There was a general realization throughout the country that some proper and adequate laws should be passed by Congress regulating and controlling the commerce of the necessities for our people, so that they should be protected as much as possible from fraud and deception, and so that the States could safely follow in such paths the wise and salutary rules laid down by Congress. Naturally there were strenuous objections to any such legislation, not from those who did not desire any such regulation, but from a great body of reputable and prudent business men, who had apprehension as to the effect of such a new departure upon their affairs conducted along lines entirely praiseworthy and in a safe and legitimate way. So it did require much courage, skill, persistence, and industry to overcome these obstacles and bring success to such a tremendously important task. Senator HEYBURN contributed a very large share toward it, and if he had performed no other public service for the American people, they should ever be grateful to him for his labors at a critical time toward that legislation which has been so salutary and which has exerted so beneficial an influence among the States and throughout the country.

He was the special champion of his people and State and section of the country against that policy of conservation of the national resources of the West which he conceived could only result in their injury and prevent proper and adequate development. This contest was constant and prolonged and enlisted all of the powerful resources of his rugged and forceful nature and all of the capabilities which so distinguished him among his compeers. His great wealth of information, his profound knowledge of legal principles, his long and varied experience among his people and in the development of his splendid young State, his strong and logical intellect and superb powers for the presentation of his views, gave him an influence in the discussion of these subjects such as had few of his colleagues. His industry and devotion to his people and their interests, the incessant demand upon him to care for them as adequately as he thought was required of him, drew heavily upon his vital forces.

He would not rest when the contest was on concerning public matters before Congress or the departments strongly affecting his constituents. This devotion and this persistence and unwearying zeal for those whom he represented and whose welfare was so dear to him weakened even his rugged frame and reduced even his wonderful reserves. No one can estimate how much such labors assisted toward shortening his days and hastening the inevitable end.

Unless one had a chance to know him well, there could never be discerned or appreciated the great wealth of sentiment or the keenest human sympathies and kindliness in his nature. It was my privilege to meet him a number of times during one of the few vacations he had while in public life. He was traveling in Europe with his family and had cast aside the many cares of his high office and was enjoying as a boy the scenes and impressions which the Old World made upon him, whose nature was so typical of the American West. I especially recall his delight in his touring of England and Scotland, whose history and poetry and romance had long been so familiar with him and which had filled such a part in his own heredity, experience, and culture. Then became revealed to us who were with him that extensive reading and rare appreciation of the beauties of nature and literature which we soon realized that he possessed. We came to know from such intimacy what a strong, true, loyal, and devoted soul he had and what a sure and firm foundation was his for his unremitting labors for his people and for his country. He had the courage to stand upright and proclaim the faith that was in him and of which he was ever proud at a time when real men were sorely needed. "The deepest hunger of a faithful soul is true faithfulness."

His departure is sincerely mourned as a national loss among those who were associated with him, and those who knew him best will ever cherish his memory as of a loyal and delightful friend, a wise and prudent associate, and a patriotic and devoted servant of his people and lover of his country.

No man better exemplified the truth of the poet—

> The valiant never taste of death but once.
> Of all the wonders that I have heard
> It seems to me most strange that men should fear,
> Seeing that death, a necessary end,
> Will come to him, when it will come.

Mr. HOWELL. Mr. Speaker, it was after my election as a Member of the House of Representatives that I was privileged for the first time to visit Washington and behold this splendid edifice, this imposing Capitol of the Nation. Grand and glorious as it impressed me then, its magnificence and glory have constantly grown upon me. So, too, my service in Congress has profoundly impressed upon me more and more as the years flit by the high character, industry, devotion, and patriotism of the great men chosen by a free people to bear the responsibility and discharge the arduous, perplexing, and important duties of government. In these days, when the freedom of the press attains its fullest publicity, prominent men in public life are known to the mass of the people in the light of their character and service as set forth in the press and periodicals of the time; but from the very nature of the intimate association of its membership, of their collaboration together for the public weal, the Senate or House becomes the truest and most perfect judge of the ability, character, and worth of its Member. No weak or unworthy man can rise and long maintain commanding influence in either body. And so the time-honored custom of setting apart a day for paying befitting tribute to the memory of our comrades whose life mission is ended is most beautiful and admirable. In the years to come, after the keen sorrow of

parting with our friends has mellowed to a fond recollection of all that they were when they were tabernacled in the flesh, to read what is said to-day will awaken long-buried memories and inspire new courage to press forward in honorable effort to "make our lives sublime." We are assembled on such an occasion to-day, and I improve the opportunity to voice a simple, homely tribute to the memory of WELDON BRINTON HEYBURN, Idaho's distinguished Senator, the Republic's honored son. He entered the Senate at the same time I became a Member of the House. While our duties here did not throw us into the closest association, having local interests in common I came to know him well and to admire and honor him. His earthly probation extended over but little more than 60 years, but on the 17th day of October, 1912, when he was called away, his earthly record measures up to the fullness of a well-spent life. Time will not permit nor is it necessary for me to recount his distinguished public services. They are recorded in the history of his State and in the annals of the Senate and his country. Suffice it to say that he took an active and leading part in all the great questions before the country in the last decade. At the close of his first term in the Senate, for the information of his people, a complete record of his industry, achievement, and his attitude on all public questions was compiled.

This record is replete with the evidences of his great industry and his statesmanlike grasp and his ability to elucidate grave public questions. Upon this record he again sought a commission as Senator and was triumphantly elected. This was strikingly characteristic of the man. He was bold and strong and frank, and disdained to espouse or support any cause against his convictions merely to thereby court public favor. He believed in clear-cut issues and an honest declaration of policies and purposes. He loved his State and country to such an extent that patriotism was a passion with him. He hated fraud, pretense, and dishonesty in every relation of life. His championship of the pure food and drugs act and its passage under his leadership through the Senate is typical of the man and exemplifies his intense aversion to deceit, fraud, and dishonesty in commercial affairs. He sprang from forbears who for generations had inherited a love of freedom and an orderly adherence to laws and institutions designed to secure this great boon. He was firmly set in his convictions, and did not easily sway with the winds of every new doctrine. He venerated the true and proven wisdom of the past, and in adopting new and untried experiments affecting the fundamental principles of our Government he adhered to the well-known salutary maxim, "Make haste slowly." He was able in debate, wise in counsel, devoted to the best interests of his State and country, and supremely endowed for most valuable service in the high council of the Senate. Who can properly estimate the value of such a life? Who can fully appreciate the enduring light shed forth by his work? Such men are the salt of the earth, the pillars of the temple of liberty, the torches which light the pathway of liberty. I do not agree with the great poet in the doctrine that "the evil that men do lives after them, but the good is often interred with their bones." I am led rather to cherish the thought that the good that men do shall survive, the evil shall perish. The qualities of virtue, honesty, duty, patriotism, unselfish devotion to man, country, and God, bear within them the seeds of their own preservation and reproduction. Noble spirits have left their impress upon the world. We have them with us in this day and time, and in the future they will come to us and assume their rightful place of leadership among the children of men, and progress and liberty will continue to go forward hand in hand.

Senator HEYBURN profoundly realized the nature of his sojourn here. He was fully impressed that—

> Life is real! life is earnest!
> And the grave is not its goal;
> Dust thou art, to dust returnest,
> Was not spoken of the soul.

Memorial ceremonies naturally lead to the contemplation of the brief span of life here, with all its vicissitudes and the limitless eternity on either side. I rejoice in the firm faith that "he is not dead; he has risen to a higher and more enduring sphere of activity and usefulness." "The glory of God is intelligence." That degree of intelligence to which he has attained is but symbolical of a future of eternal progress and development. His mission here is completed. He rests from his labors, and his works do follow him.

"This pleasing hope, this fond desire, this longing after immortality" is well expressed in this simple prayer to our heavenly Father:

> When at last when I've completed
> All Thou sent me forth to do,
> With Thy mutual approbation
> Let me come and dwell with You.

Mr. BARTHOLDT. Mr. Speaker, I have not frequently come in personal contact with Senator HEYBURN, but I have watched with growing interest his many activities as well as his utterances on the floor of the Senate. To me there was something unusually attractive in his rugged manhood, his extraordinary ability, his eloquence, and readiness at repartee. To a still greater degree was my admiration challenged, however, by something which I prize more highly than all these. It is that quality which distinguishes a real man from a mental weakling, namely, courage of conviction. In the case of Senator HEYBURN this term implied not only unswerving loyalty to the ideals and traditions of the Republic, but also the bold and fearless expression, irrespective of consequences, of his honest opinions. This quality caused his friends to admire, his foes to fear him, but insured him the respect of friend and foe alike. It is an attribute of character which, judging from practical experience, seems to have become sufficiently rare in these days of popular unrest to merit special mention wherever we see a manifestation of it. Men in public life can appreciate even more than those in private life its incomparable significance and value. It means that we speak and vote in accordance with our convictions. It means for us to take our political life in our hand and defend, by voice and vote, what we honestly believe to be right. No matter whether it leads to greater popularity or to political self-effacement there must be no compromise with what is repulsive to our hearts and minds, and our advocacy of what to our conscience is right and the resistance to what seems to us wrong must be more than passive. It must be active. Fortunately for our country there are still many who practice this greatest of all public virtues, but among them our departed friend held foremost rank. As a consequence of that noble trait it was quite natural that his public career should have been encouraged by strong friendships and, on the other hand, beset by strong antagonisms; but, as I said before, friend and foe alike readily recognized and respected his mental honesty, his integrity of character, and his manly courage.

Senator HEYBURN was a Republican. He believed in the high mission of his party to forever be an instrument of the people for sane progress and reform. He was a "standpatter" when asked to go wrong and a progressive when progress was in the right direction. He sincerely believed in representative government under the Constitution, and could not make up his mind to consent to political experiments where popular rule, under existing forms, had been such a phenomenal success. The conservatism of his nature rebelled against risking a leap into the dark—and this is what to his mind unbridled majority rule signified—at a time when the country enjoyed the blessings of unparalleled prosperity, when, consequently, there was no valid excuse for untried innovations in government, and when further progress along sane and safe lines and along the pathway of constitutional rule was the watchword of his party under a President who in faithful performance and honest enforcement of the laws of the land has not had a superior in the annals of American history. While the political storms raged all about him, Senator HEYBURN stood firm, anchored to the solid rock of good judgment and honest conviction, and it is my earnest belief that, had he been permitted to stay among us but a few years longer, he would have lived to see his judgment vindicated.

For reasons inscrutable to all save Providence he was taken from us in the prime of manhood and while great questions of concern to his constituents, to his State, and country were calling for his cooperation and for the exercise of his indomitable energy and rare intellect. In mute grief those to whom he was nearest and dearest as well as all his contemporaries and coladorers must bow to the inevitable. His untimely death was an irreparable loss to both the State of Idaho, which he so ably represented here, and to the Nation and will be mourned by all. He was a great citizen, a great lawyer, and a great legislator, but his most fitting epitaph would be: "He was a man."

Mr. HAWLEY. Mr. Speaker, a man who rises to distinction above the high average of unusual ability to be found in the House and Senate does so by reason of some exceptional value as a public servant and as a man, and this question of the value of the man in the public service is a question I desire to discuss briefly in connection with Senator HEYBURN, whose memory we revere in the ceremonies of to-day. Congress legislates upon information and opinion. Upon the sufficiency of the information and the soundness of the opinion derived therefrom depends the value of the legislation which may be enacted. Legislators seldom build better than they know. While it may appear that some former legislative body did an unusually wise thing that survived through the ages, it is not because they had any unusual understanding of the times to come but because the con-

ditions under which they legislated were continued to, or repeated in, a later time. Therefore I repeat that upon the sufficiency of information and the soundness of judgment the value of legislation depends. A man who comes into either House and by industry in the ascertainment of facts, honesty in their statement, and care in their interpretation does the public a useful service and becomes a distinguished man.

To illustrate what I have in mind: Savonarola at the time of the death of Lorenzo, The Magnificent, in Florence, and the expulsion of his son Piero, found the city without a government and the citizens unable to found a government for themselves. He did not as a creator manufacture a government out of hand for the Florentines, but from a great knowledge of the governments of his time he decided that the government of Venice, with suitable changes, would be best adapted to Florence. This he advocated in public addresses, and following his suggestions and his leadership the people of Florence established a government modeled upon that of Venice. The government so organized is said by the historians without exception to be the best government the Florentines ever had. Simply because he had adequate information and the soundness of interpretation at a critical time in his State's history Savonarola rendered his people a great service.

There gathered in Philadelphia in 1787 a body of men who were charged with the duty of framing a Constitution for the government of a people recently free. The English historians say the colonists of this country had been buying more law books than the citizens of England had been buying, and they had been buying histories and other books on political affairs. When that body of men came together they did not strike out at white heat a new thing, but out of an adequacy of information and soundness of judgment upon the events history had recorded of man's endeavors to govern himself they organized the best government that could have been instituted for our country.

What I have in mind in considering the public services of Senator HEYBURN is the importance of adequate information and of sound opinion derived therefrom. The encyclopedic character of his information, both as to the law and the facts relating to subjects pending before the Senate, was universally conceded. When he arose to speak it was with the fullness of information and when he presented a case it was with a wealth of illustration, so that not only his supporters but his opponents profited by his industry, his care, his painstaking labor, which led to fame.

Falstaff says of himself:

> I am not only witty, but am the cause of wit in other men.

So Senator HEYBURN himself was not only industrious, but was the cause of industry in other men; not only possessed of great fund of knowledge, but caused other men to be similarly possessed; was not only himself a statesman, but, because he was a statesman, he led others to statesmanlike emulation. Not only was he an effective public servant, but by faithful service and by information and soundness of opinion he led others to such industry as would make them more effective and faithful public servants.

He lived but 60 years, and he served his country usefully, effectively, honorably, and courageously. "That life is long which answers life's great end." And when he died some great causes lost a great champion.

> Ah, who that gallant spirit shall resume,
> Leap from Eurota's banks, and call us from the tomb.

If Senator HEYBURN knew the matters of the spirit as well as he knew the matters relating to his public duties and private obligations, then for him, "The morn in russet mantle clad, walks on the dews of Heaven's high hills." Let us so hope.

Mr. LA FOLLETTE. Mr. Speaker, the late Senator WELDON B. HEYBURN, of Idaho, was to me one of the most unique characters in American political life. My personal acquaintance with him was brief, dating only from the beginning of the short session of the Sixty-first Congress. He was what was known as an "old-line" Republican, while I had been elected to the Sixty-second Congress as a Progressive Republican.

I came to Washington in the early days of December, 1911, and occupied my time during the short session of the Sixty-first Congress about evenly between the House and Senate, familiarizing myself with men, measures, and methods of procedure.

Senator HEYBURN had been in the public eye in the neighboring State of Idaho for many years, and after entering the United States Senate had become a national figure, but, I confess that, as a Progressive Republican, I came to Washington somewhat prejudiced against his political attitude and activities. During the closing days of the Sixty-first Congress, however, I found myself observing and studying him more closely. More and more was I impressed with his industry and perseverance, his intimate knowledge of all measures that came before the Senate, his terse commendations of those he considered meritorious and his scathing denunciation of those he regarded wrong or ill-advised.

It mattered not to him whether the measure he disapproved was championed by his political friends and colleagues, his position never swayed. Long before the end of the Sixty-first Congress there sprung up within my inner consciousness an admiration for the man. His intimate knowledge of all legislation coming before the Senate, his careful analysis of every proposal, his quick perception, his energetic protests, his keen and logical thrusts at his adversaries in debate, excited my admiration and wonder, and I could not help feeling when he died that the country had suffered the loss of one of its most painstaking and industrious public men—a statesman, indeed—and one who had probably checked as much unwise and ill-considered legislation as any man of equal service who ever sat in Congress.

Senator HEYBURN's interest in public questions was so unceasing and his capacity for work so inordinate that but little, if any, legislation ever passed the Senate during his period of service without either his earnest assistance or his vigorous opposition. His unflinching courage and his indomitable zeal have earned for him a lasting place in America's political history.

Mr. Speaker, when the wires carried the intelligence that death had brought to an end the career of Senator HEYBURN his home State of Idaho felt it had sustained a great loss, and this feeling was shared by the Nation.

The press of the country, engaged as it was in a bitter political struggle, did not fail to give a full meed of praise and a calm judgment of mankind on the life and work of a great man, and I am inserting in this brief tribute a few of the many expressions of the press of the country, some of his home State and some of other States of the Nation, if I can have the consent of the House so to do.

The Idaho Statesman, on October 18, 1912, said:

> When one who has been a tried and true friend dies, the loss is not expressible in badges nor in tears. We may not have agreed with him in all things, but we could always depend upon him as a friend, never faltering in his loyalty for us nor in his duty to us.
>
> The State of Idaho has just lost such a friend in the death of Senator HEYBURN. Many of the people he represented so long in public place have not always agreed with him, but they knew he could be depended upon to fight for his State, and he always did it.
>
> * * * * * * *
>
> Senator HEYBURN was a "standpatter" because he was never vacillating. He could no more indorse irrational or radical ideas, paraded under any guise, than he could abandon his position for fear the crowd might not applaud him. He was conservative in all things, some say ultraconservative, because it was the surest guaranty of safety, in his opinion; and time generally vindicated his judgment. Because of his strict adherence to constitutional forms, because of his allegiance to the traditions of our fathers, the Senator encountered many foes who might not otherwise have been pitted against him; but they ever found him equal to their most skilled attack and challenging their best defense.
>
> * * * * * * *
>
> The keynote of WELDON BRINTON HEYBURN'S life work was "courage"; the pattern woven in the fabric of his official career was "firmness"; the lesson he leaves us is their application.

The Salt Lake Herald-Republican said:

> Senator HEYBURN was a statesman of high ideals, unflinching courage, and steadfast in his adherence to the principles of the Republican Party. He took high rank in the Senate and wielded a powerful influence.

The New York Tribune said:

> The State of Idaho can easily elect a successor to WELDON B. HEYBURN, but no one can really replace him in the United States Senate. His position in that body was unique. He delighted to be classified as a "standpatter." He was really a "standpatter" who bent backward. It will be impossible to find another man who will play the part of ultraconservative with the unction, the sincerity, and effectiveness which Mr. HEYBURN always displayed and which finally made him one of the institutions of the Senate. He was himself institutional in character, rooted in convictions and prejudices which never could be shaken by any mere disturbances of the outer crust of politics.
>
> He remained patriarchal in his ideas, just as if the patriarchal age was a thing of yesterday. When the Senate was discussing an eight-hour law for Federal employees, he quoted the commandment, "Six days shalt thou labor"; and said that in his opinion a day meant the space between sunrise and sunset. Not in a spirit of humorous exaggeration, but in one of downright seriousness, he contended that it was a neglect of the biblical injunction to call eight hours a day for working purposes. He was willing himself to work from candlelight to candlelight, and wanted everybody else to live up to the ancient pastoral standard.
>
> In tariff legislation he held that a higher duty was always preferable to a lower duty, and no duty could be put too high to please him. He never realized that the Civil War was over, and felt it a duty to rasp the sensibilities of his southern colleagues whenever anything was proposed which even squinted at a condonation of secession or official recognition as such of former participants in the war against the Union. He was uncomfortably inflexible on that as on all other subjects.
>
> Yet with all his irreconcilableness he was a useful and popular Senator. He never spared himself, and won his way to the front as

a legislator by sheer endurance and capacity. He fought through the pure-food bill and later took the lead in codifying the laws of the United States—a wearying but very important work. He enjoyed the respect of his colleagues because he was positive and earnest in all things—a man who thrived on antagonism, but whose public services were always transparently clear and honest. His extremism never incapacitated him for helpful service or obscured his sterling personal worth.

The Pocatello (Idaho) Tribune felt that—

In the death of United States Senator W. B. HEYBURN Idaho has lost a great man. He was great in many ways. His absolute fearlessness, his tremendous steadfastness, were marked characteristics. That he lacked tact was one of his failings, but it was a human failing and a forgivable one. As a Senator of the United States, as a statesman and lawmaker, he was far above the average. His deep knowledge of the law made him a looming figure in the greatest legislative body in the world. Big of body, heart, and mind, he stood out prominently among the men in the upper Chamber.

The Portland Oregonian commented:

What HEYBURN believed he believed with all his heart and mind, so that he invited and sustained the criticisms and attacks of many opponents. But he was an honest man and courageous. If he talked too much, he always talked well. If he hated disloyalty, he made manifest his own patriotism by outright word and deed. If he was too prone to deem others wrong, he strove always himself to be right. Idaho will miss Senator HEYBURN, and so will the Nation. Likely enough the Senate needed a corrective force and an admonitory voice.

The Hailey (Idaho) Times said of Senator HEYBURN:

An indefatigable worker, no important measure ever secured the attention of the Senate without his voice being heard either in support or opposition to it until illness incapacitated him. Endowed with many qualities of leadership, he immediately upon taking his seat took a front rank in the greatest deliberative body in the world, and he sustained it to the end.

The Lewiston (Idaho) Tribune, a stanch Democratic paper, spoke as follows:

It is observed that in the tributes being paid to the dead statesman all are impressed by his loyalty and love for this State of his free adoption. And that epitaph is fine enough to rear over the relics of any man. There may have been minds of greater brilliancy and tongues of more silvery eloquence, but there was none who loved his country more and served his constituency so tirelessly. He was a man who lived up to his creed, and in his clean record there can be found some useful lessons for those who survive him, and especially for the ambitious young men of his adopted State.

The Richfield (Idaho) Recorder commented as follows:

No one ever wondered where he would be found or whether he would be in the same place the next time; everybody knew where he would be—that he would stay. The sublime virtue of steadfastness was his in the superlative degree. It was a virtue which helped win Idaho a commanding place in the councils of the Nation.

At this point the Speaker resumed the chair.

Mr. LA FOLLETTE. Mr. Speaker, if I can have the consent of the House so to do, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from Washington [Mr. LA FOLLETTE] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. FRENCH. Mr. Speaker, I ask unanimous consent that all Members may have five legislative days in which to extend in the RECORD their remarks on the life, character, and public services of the late Senator HEYBURN.

The SPEAKER. The gentleman from Idaho [Mr. FRENCH] asks unanimous consent that all Members may have five legislative days in which to extend their remarks on the life, character, and public services of the late Senator HEYBURN. Is there objection?

There was no objection.

THE LATE SENATOR ROBERT L. TAYLOR, OF TENNESSEE.

The SPEAKER. The Clerk will report the order of business touching Hon. ROBERT L. TAYLOR, late a Senator from Tennessee.

The Clerk read as follows:

On motion of Mr. SIMS, by unanimous consent,

Ordered, That Sunday, February 23, 1913, be set apart for addresses upon the life, character, and public services of Hon. ROBERT L. TAYLOR, late a Senator from the State of Tennessee.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 864.

Resolved, That the business of the House be now suspended that opportunity may be given for tributes to the memory of Hon. ROBERT L. TAYLOR, late a Senator from the State of Tennessee.

Resolved, That as a particular mark of respect to the memory of the deceased and in recognition of his distinguished public career the House at the conclusion of the memorial exercises of the day shall stand adjourned.

Resolved, That the Clerk communicate these resolutions to the Senate.

Resolved, That the Clerk send a copy of these resolutions to the family of the deceased.

The resolution was unanimously agreed to.

At this point Mr. SIMS assumed the chair as Speaker pro tempore.

Mr. CLARK of Missouri. Some men are made to be admired; some are made to be loved; a few are made to be both admired and loved. To this small and goodly company ROBERT LOVE TAYLOR undoubtedly belonged. Fitz Green Halleck's famous couplet fits Senator TAYLOR's case like a glove:

None knew him but to love him,
None named him but to praise.

I once heard a wise old Missouri farmer say that no man should be considered truly popular unless everybody called him by his Christian name. If that is a test—and I am inclined to think it is—Senator TAYLOR was the most popular of all the public men of his generation.

Thrice governor of a great State, a Representative and Senator in Congress, everybody, even the little children in the streets, fondly called him "BOB." I am not exaggerating. I am not guessing. I am not saying it because it sounds well, but because it is literally true and because I heard it with my own ears.

Nobody could deny any request he made, his smile was so seductive, his manner so winsome, his words so sweet, his invitation so alluring. Consequently it came to pass that in the summer of 1911 he induced me to promise to make speeches at the Knoxville Exposition and the Nashville State Fair in September. I was busy and did not want to do it, but I could not resist the pleading of my well-beloved friend and made the speeches. Now that he is in his grave, I am glad that I went with him, as that trip gave both ocular and auricular proof of the man's wondrous popularity. He was emphatically "Our Bob" in the Old Volunteer State. Hardly a man called him governor or Senator. It was nearly always "Hello, BOB!" or "Howdy, BOB!" He seemed to know every Tennesseean by name. In walking the streets, time and again as we passed bunches of children, I would hear one urchin say to the rest, "There goes BOB TAYLOR." Their intonation of the word "BOB" showed forth their affection. The situation seemed to be this: Everybody knew him. Everybody loved him. He knew everybody. He loved everybody—

With deep affection
And recollection.

I will treasure the cheerful memories of that journey with BOB TAYLOR through Tennessee so long as I live. It was a liberal education in universal loving kindness.

When he first left the gubernatorial chair, at the end of his second term, he was deeply in debt. His law practice was gone, and so he determined to go on the lecture platform, and millions of his fellow citizens are glad that he did so, for he delighted and instructed them, and made them better men and women by his wit, humor, learning, imagination, pathos, philosophy, and eloquence. As a lecturer he was a tremendous success from the first. In fact, those newspapers which denominated him the "Napoleon of the Platform" and "The Prince of Entertainers" did not exaggerate and did not exhibit bad taste. It was an intellectual treat, so exquisite as to be indescribable, to hear him in "The Fiddle and the Bow," "Castles in the Air," or his other masterpieces; but he did not reserve all his brilliant mots, exuberant fancy, sparkling utterances, and philosophic remarks for his public lectures and speeches. His private conversation was equally rich and enjoyable. Toward the end of his life we had him and his most estimable wife as our guests at a theater box party, and though the seal of death was on his face he entertained us much more than did the characters in the play.

Some would-be wits undertake to make men and women who lecture at Chautauquas and in lyceum courses the butt of their clumsy jokes. They seem to think that when they have flung at a public man the epithet "Chautauquan" they have done for him permanently. Just why preaching, practicing law, running a railroad, farming, or writing for newspapers and magazines, or writing books for pay are occupations permitted without criticism to a public man and lecturing should be forbidden to him is a thing that passeth all understanding. Not only that, it is arrant nonsense.

I rejoice that my dear, good, generous, big-hearted, brilliant friend led the van of the army of public men who have invaded the lecture platform. They are rendering the public a valuable service while eking out their meager salaries. If a public man has a message to deliver, it is his inalienable right to do so. It is easy for a millionaire editor to sneer at a public man, rich in heart and brain but poor in purse, and of independent spirit, who desires to earn enough money honestly to provide for those dependent upon him; but decent and sensible people will applaud him instead of criticizing.

On the platform, on the stump, in the House, in the Senate, in the governor's chair, and in private life BOB TAYLOR was the apostle of sunshine and went about doing good. His

oratory was as pure and sparkling as the waters of the springs in his native mountains, which he loved so well. He upheld the right; he condemned the wrong; he punctured shams; he improved the world by living in it.

This great humanitarian earned hundreds of thousands of dollars on the platform and with his pen, and yet he died poor. He could make money, but he could not keep it. His tender heart caused him to loosen his purse strings on every appeal from the poor, the sick, and the needy. To his eternal credit be it said that he turned none away empty. He has his ample reward in the unstinted love of millions of his fellow creatures.

Mr. HEFLIN. Mr. Speaker, this is a sad and a solemn occasion to me. Senator BOB TAYLOR was my friend, and I loved him devotedly.

Over in east Tennessee, in Happy Valley—

> Where the morning-glory rears its purple crest
> To receive the dewdrop's cool caress;
> Where the fern droops low by the woodland stream,
> And the gray dove coos in a blissful dream;
> Where violets yield their rich perfume,
> And roses gladden the gray day's gloom—

BOB TAYLOR was born. One morning in his youth time, in that splendid romantic region, he awoke and found the sweet-voiced angel of music singing at the window of his soul. He seized a fiddle, touched it with his bow, and exquisite strains came pouring from its heart. They awoke the echoes of the wood and set the birds to singing, and under his masterful touch the fiddle became the matchless musical instrument of the people. In the cabin on the hillside, in the mansion on the mountain top, out on the hustings, and around the festive board, the fiddle responded to the woolngs of his splendid genius, and all the people heard him gladly.

Perhaps the most brilliant and unique campaign in the annals of congressional politics was his race for Congress as a Democrat in the district then known as the Republican stronghold of Tennessee. He mingled the melody of his fiddle with the gospel of Democracy—poured out his soul in eloquence sublime and in songs of unutterable sweetness. When that campaign was over, this brilliant son of the Democracy of Tennessee, armed with the fiddle and the bow, was borne on the crested wave of a proud people's will to the Congress of the United States. In that memorable gubernatorial contest, where brothers were the standard bearers of opposing parties, his faithful fiddle was again his glad campaign companion. It drove the ghosts of opposition from his pathway, just as David's harp drove the evil spirits from the presence of King Saul, and with genuine rapture the people of Tennessee hailed him as governor of that proud old Commonwealth.

Then finally, Mr. Speaker, the crowning glory of his political career—the ambition of a lifetime—was realized when the people of Tennessee commissioned him to represent them in the Senate of the United States. Here with rare ability and persuasive eloquence he advocated measures that looked to the common weal, and here he pleaded for the enforcement of the laws of justice.

Every throb of his big heart beat loyal to the people of Tennessee, and I believe that he was the most popular and best-beloved man that Tennessee ever gave to the list of America's good and great. Alabama mourns with Tennessee the loss of this brilliant statesman, this most pleasing of all orators, this the greatest apostle of sunshine that America has yet produced.

Mr. Speaker, he was the most charming, the most captivating and popular lecturer that ever graced the American platform.

Rarely are mortals blessed with such a brilliant and loving career. He never groped among life's shadows murmuring its dolorous strains, but he saw life through a rose-tinted atmosphere. He dwelt on its bright side and reveled in its sunshine. He strolled among the flowers of life's art and poetry and lingered beside the rivers of its music. With the deft fingers of a master he swept the harp strings of the human heart. His eloquent voice in song and story thrilled and pleased thousands and tens of thousands of his countrymen. He painted virtue in enduring colors, made truth attractive, and contributed to the great sum of human happiness.

I was on board the funeral train as it bore his remains from this Capital back to Tennessee to be buried among the people that he loved so well. Mr. Speaker, I have never witnessed such a demonstration of genuine affection for any man in public or private life as I saw evidenced by the people of Tennessee for Senator BOB TAYLOR on that occasion. Thousands of people flocked to the railroad stations to catch a glimpse of the train as it proceeded to Nashville, carrying the mortal remains of Tennessee's popular idol and best-beloved son.

While his body was lying in state at Nashville a vast multitude of people passed in solemn procession as they looked for the last time upon his peaceful face. There were tears and sobs and flowers about his casket in the statehouse on that sad day. During our stay in Nashville we went out to view points of interest in and around that splendid, historic city. When about seven miles out of the city, I saw a company of country boys walking toward the capital, and every one of them had a bunch of wild flowers—flowers plucked from the field and forest, planted by the gentle hand of Nature's God. These boys had come from their homes in the rural districts to pay to the idol of the sturdy masses of Tennessee the simple tribute of their love. He had understood their heartbeats and had spoken their language.

Mr. Speaker, if it were possible for Senator TAYLOR to have seen on that day these country boys grouped around his casket, with these simple wild flowers from field and wood, that beautiful scene would have affected him most of all. Born in rural simplicity, among the plain, patriotic people of Tennessee, he had locked in his soul the loves, traditions, and incidents of the common people, and these were the brightest stars in the firmament of his rosy and brilliant pilgrimage. Among the beautiful floral offerings that were literally banked about his casket in the capitol was an imitation of the fiddle, made of lilies, with a bow of violets resting across it—how fittingly suggested by that beautiful child of his genius, his far-famed lecture, The Fiddle and the Bow. But, Mr. Speaker, we will listen no more to the rollicking humor, the merry laughter, the splendid pathos and melody, that breathed through his eloquent voice in the pleasing, thrilling story of The Fiddle and the Bow. There is no more rosin for the bow. The sensitive strings of silk and silver are hushed on the sounding board, and the loved old fiddle, the home of so many sweet and stirring sounds, is silent. Its proud player has passed through the valley and shadow of the dissolution, but, Mr. Speaker, somewhere beyond the evening and the sunset his splendid spirit has found congenial company in that glad throng that sings and plays in the gardens of everlasting flora.

Mr. ADAMSON. Mr. Speaker, it was not my purpose to speak on this occasion. I would not stultify myself nor offend the memory of the dead by speaking in eulogy of a departed statesman whom I did not love and honor during his life. Neither do I believe it fitting for any man to hazard an extemporaneous speech on an occasion like this, when bereaved and sorrowing comrades pay honor in this high place to the goodness and greatness of friends who are gone. I feel that every speech ought to be elaborately prepared, with accurate attention to the merits of the deceased and every ornamentation with which the beauties of the language can invest the subject. The beautiful and touching address to which you have just listened, delivered by the gentleman from Alabama [Mr. HEFLIN], my eloquent neighbor, who so illustriously represents here a district adjoining that of my own constituents, has suggested an incident so aptly illustrating a leading trait in Senator TAYLOR'S character that I feel justified in bringing it to the attention of the House at this point. Senator TAYLOR was always so good to me and I loved him so much, and my people loved him so much, that I will venture to contribute that incident to the flowers that are being collected in his memory.

He had made lecture engagements for the summer of 1909 with three Chautauqua associations, two in the district I represent and one in the neighboring district represented by Mr. HEFLIN. The extraordinary session of Congress compelled his attendance on official duties here and the consequent breaking of those engagements. It was brought to Senator TAYLOR'S ears that those Chautauqua associations suffered financially on account of his inability to fill those engagements. The Senator was a firm believer in the doctrine of restitution, which must really precede all genuine reformation, and without it confession is worthless and there can be no true religion. Even Mahomet believed in that doctrine. He is reputed to have stood in the temple before his death and invited any whom he had wronged to make his claim and receive fourfold in restitution.

Among the other noble traits of character, charms, beauties, and talents that glorified his life Senator TAYLOR cherished above all things the doctrine of justice and fairness to all men. He felt that, although not to blame, he ought to make restitution if those people had actually suffered through his inability to fulfill his engagements, so he notified them all that he would go free of charge and lecture for the benefit of each association, which he did at the first recess of Congress thereafter. He left his family in Washington, denied to himself and his family the pleasure of spending his Christmas holidays in Tennessee; went with me to Carrollton and Newnan, Ga., and with Mr. HEFLIN to Roanoke, Ala.; lectured at each place for the benefit of the Chautauqua association, and helped each one of them financially

out of trouble, without determining whether any loss was sustained on his account or not and without one cent of charge therefor.

The Senator having been so good to me, and that generous and noble act of his to my constituents and the constituents of the gentleman from Alabama appearing to my mind so appropriate to be mentioned in this connection, and immediately following the beautiful speech of the gentleman from Alabama, I have felt justified in saying this much.

Other distinguished gentlemen here, having known the Senator longer, being provided with a greater fund of information about him, and being better prepared to do justice to his illustrious life and lofty character, I will not consume further time.

Mr. KAHN. Mr. Speaker, "God touched him and he slept." Gone are the sparkling eyes, gone the cheery smile, gone the gentleness of manner, gone the soft melodious voice of ROBERT LOVE TAYLOR. But his memory will always be cherished, not only in his native State of Tennessee but by all who were permitted to know or hear him. His was a remarkable career. Elected to membership in this House, elected thrice to be the governor of a great American Commonwealth, triumphantly elected by his people to represent that Commonwealth in the Senate of the United States, his abilities as a statesman had been tested in many avenues of political life, and in every one of them he rose equal to the opportunity and the occasion. He became an influential factor in the body of which he was an industrious and popular Member at the time of his death. He was fortunate in having a charm of manner that attracted young and old alike. He was one of the best raconteurs it has ever been my good fortune to meet. One never tired of listening to his stories of pathos and humor. His effect upon his audiences was marvelous. He could sway them at will from laughter to tears and from tears to laughter. He loved music, poetry, the beautiful in art and in nature. But above all else he loved his fellow men. His charity was boundless. He always gave bountifully to every worthy cause that was brought to his attention. His liberality in that direction became proverbial, and although he earned large sums of money through his lectures, the many appeals that were made to him for financial aid to this or that institution, to this or that cause, to this or that case of individual distress were not made in vain. It seemed to be his mission on earth to dispense happiness, and he succeeded in doing so during all the days of his life. It may well be said of him that the world is better for his having lived.

Mr. TILSON. Mr. Speaker, as a Representative of a New England constituency, I am glad to bring a sincere tribute to the late Senator TAYLOR. While not so well known there as in others parts of the country, nevertheless, even in New England, he was known, honored, and admired. On behalf of a large-hearted, broad-minded people, who regard neither State lines nor degrees of latitude and longitude in their estimation of men, I come to voice their sentiments of respect for his noble manhood, admiration for his charming personality, and sorrow for our common loss in his death.

It is, however, with far deeper feelings that I come here to-day. The little chapter in the life of BOB TAYLOR—for then as ever afterwards everyone called him "Bob"—which I am about to recite has no place in his work as governor or United States Senator, which others have treated so fully and ably to-day. In fact, I hesitated long before deciding to relate at all an incident in his life so closely personal to myself. Upon due reflection, however, it seems to me it should be here set down as indicative, even in the early years of his young manhood, of that large-hearted generosity of mind and character which caused him to be so much beloved throughout his career.

We were born near each other, he just 16 years earlier than I. His father and my father were political and personal friends. Bob and his brothers were frequently guests at my father's house. We lived somewhat farther back in the mountains than did the Taylor family and on the only road crossing the Appalachian Mountains in that vicinity. Bob's sweetheart, whom he afterwards married, lived near Asheville, N. C., about two days' journey from Happy Valley, where the Taylors lived. My father's house was near the halfway point of the journey. Hotels, inns, or taverns were there entirely unknown. The trips he made across the mountains were not infrequent, for young ROBERT was a faithful lover, and each trip he made back and forth gave us two delightful evenings, as he spent a night each way at our house. I measure my words when I say that his frequent little visits were of the very first importance in their influence over me and produced the deepest and most lasting impressions upon my young life. We lived in the backwoods, in the mountains, as it was generally called. The Taylors lived down the country in the beautiful Watauga Valley. They were the foremost family of all that mountainous region, and yet without the slightest taint of snobbishness. Bob would come into our home as one of ourselves and enter unreservedly into our joys, our sorrows, and our problems. My father and mother loved him like a son, and he soon won his way to the hearts of all of our large family.

For me, however, he seemed to have reserved a special affection. As he often expressed it, he took a special fancy to me. Outside of my own immediate family the environment did not appear particularly favorable. School facilities were far from good. It seemed evident to him that if I remained there I must grow up without education except of the most limited character. He was not a man of independent means, but the magnitude of his heart was out of all proportion to his bank account. In his zeal for the education of the little boy he had discovered away up among the mountains, he proposed to take me away and put me to school at his own expense. He so aroused the interest of his good mother on my behalf that she came to my father's house and besought him to allow her to take me away in order to educate me. My father felt constrained to refuse, and I was kept at home much against my will. Stimulated by this manifestation of unselfish interest in the education of their son, my parents, through toil and sacrifice, strove ever afterwards to give me opportunities for education equal to those denied me by their refusal to permit me to go away.

After all these years and all that has transpired in their course this seems a most inadequate statement of a trivial incident in a great life. It is doubtful if Senator TAYLOR even remembered it in all its details, but it was epoch making for me, and was so burned into my heart that I shall never forget that Bob TAYLOR was the first great outside influence that came into my young life as an upward-beckoning inspiration.

In the years that followed Bob was a candidate for office—for Congress, for governor, and for United States Senator. He was a Democrat. Unicoi, the county in which my father and family lived, was strongly Republican, the Democratic ticket rarely polling more than one-tenth of the total vote cast. When Bob TAYLOR was on the ticket, however, it was always different. Such affection as those mountain people felt for BOB TAYLOR was not to be overbalanced by party loyalty, though ardent partisans they were, and Bob's vote was always large. When he came to Unicoi, as he often did, he did not talk politics, but told some of his inimitable stories, knowing full well that the Republicans would vote for him in spite of his politics, just because it was Bob. No other reason was asked or could be given, but the fact that they did it throws an additional light upon the character of him whose life and public services we are here to commemorate.

Others have told to-day and will tell in terms far more eloquent than any at my command, of his name and fame as a lecturer, and of his distinguished services as Representative in this House, as governor of his native State, and as a Senator of the United States. I shall refer to none of these, but shall rest content with the narration of the simple little story which furnishes a side light to a character of wondrous charm, sweetness, and gentleness, and the foundation for a sincere love and affection on my part that never faltered. Through all the years his affectionate interest in me never failed. When I came here as a Member of the House no one greeted me with such warmth and cordiality as did Senator TAYLOR. Had I been a younger brother he could have seemed no gladder to welcome me here, and to the day of his death it was my privilege to enjoy his friendship and esteem.

Do you wonder that I loved him? Do you wonder that I felt his death as a deep personal loss? Do you wonder that I could not to-day refrain from bringing this my humble tribute in loving remembrance of such a friend?

Mr. COLLIER. Mr. Speaker, we meet to-day to mourn with the State of Tennessee. Senator TAYLOR, one of her most illustrious sons, has passed away. The kindly heart which throbbed so often in sympathy with the troubles and distresses of others has ceased to beat.

Senator TAYLOR was a unique figure. Rich in anecdote, happy in jest, profound in learning, simple in manner, and generous in disposition, his death was sincerely mourned, not alone in the State of Tennessee, but throughout the length and breadth of this great Republic.

For 35 years Senator TAYLOR played a prominent part in the history of his Commonwealth. He had a long and illustrious political career. His people delighted to honor him. Over 35 years ago he was elected to Congress, and from that time to his death he labored earnestly and zealously for the advancement and upbuilding of his native State.

He was always ready to answer the call of duty at no matter what sacrifice to himself. He was a consistent and loyal Democrat, a partisan in the highest sense of the word, but, running throughout the warp and woof of his gentle life, a silken thread of charity mellowed his every act, and his hearty handclasp, his cheering smile, his kindly greeting, and pleasant, courteous manner dispelled gloom and scattered sunshine wherever he went.

His ideals were pure and lofty, and he trod with firm and unfaltering steps the paths which lead to rectitude and honor.

The people of his State loved him and showered upon him many honors. He was twice a presidential elector for the State at large. He was three times governor of the Commonwealth of the Old Volunteer State. He was a Representative in Congress and a United States Senator. His long official life was marked by conscientious service, faithful attention to duty, stainless integrity, and signal ability.

I have heard it said, Mr. Speaker, that he was too liberal in the use of the pardoning power. His great, generous heart could not withstand appeals for mercy. No story of distress ever fell unheeded upon his ears.

To this charge of leniency I ask permission to insert his own defense. Its every word shows the depth and feeling which animated the warm, generous heart of our lamented friend:

I saw an aged mother, with her white locks and wrinkled face, swoon at the governor's feet; I saw old men tottering on the staff, with broken hearts and tear-stained faces, and I heard them plead for their wayward boys; I saw a wife and seven children, clad in rags and barefooted, in midwinter, fall upon their knees around him who held the pardoning power; I saw a little girl climb upon the governor's knee and put her arms around his neck; I heard her ask him if he had little girls; then I saw her sob upon his bosom as though her little heart would break and heard her plead for mercy for her poor, miserable, wretched convict father. I saw want and woe and poverty and trouble and distress and suffering and agony and anguish march in solemn procession before the gubernatorial door, and I said, "Let the critics frown and rail, let this heartless world condemn, but he who hath power and doth not temper justice with mercy will cry in vain himself for mercy on that great day when the two columns shall meet, for, thank God, the stream of happy humanity that rolls on like a gleaming river and the stream of the suffering and distressed and ruined of this earth both empty into the same great ocean of eternity and mingle like the waters, and there is a God who shall judge the merciful and the unmerciful."

He exemplified in his life the immortal words of the great poet, that—

The quality of mercy is not strain'd.
It droppeth as the gentle rain from heaven
Upon the place beneath. It is twice blest:
It blesseth him that gives and him that takes.
'T is mightiest in the mightiest; it becomes
The throned monarch better than his crown.
His scepter shows the force of temporal power,
The attribute to awe and majesty,
Wherein doth sit the dread and fear of kings;
But mercy is above the sceptered sway;
It is enthroned in the hearts of kings;
It is an attribute to God Himself;
And earthly power doth then show likest God's
When mercy seasons justice.

Senator TAYLOR believed in laughter, in sunshine, and in song. He was an orator of the highest type. Drawing his beautiful illustrations from nature, with his quaint, homely humor, he touched the hearts of thousands. I have never listened to an orator who had his audience more completely in his control. He swayed them with his eloquent flights of fancy, he convulsed them with his delicious humor, and he touched their hearts and brought tears to their eyes with his tender pathos.

It often happens that a reputation for humor has a tendency to weaken men's efforts when engaged on serious matters. Not so with Senator TAYLOR. Though he dearly loved to tell a good story, and was rich in happy anecdote, yet when grave and momentous subjects occupied his attention Senator TAYLOR, with flashing eyes and ringing voice, would rise to every occasion and meet every emergency.

But it was as a lecturer that BOB TAYLOR was best known to the American people. He was probably the most popular lecturer of his day.

I know of no richer word painting than his description of the Garden of Eden in his famous lecture "The Paradise of Fools." He said:

I think it was the very dream of God, glowing with ineffable beauty. I think it was rimmed with blue mountains, from whose moss-covered cliffs leaped a thousand glassy streams that spread out in mid-air like bridal veils, kissing a thousand rainbows from the sun. I think it was an archipelago of gorgeous colors, flecked with green isles, where the grapevine staggered from tree to tree as if drunk with the wine of its own purple clusters; where peach and plum and blood-red cherries and every kind of berry bent bough and bush and shone like showered drops of ruby and of pearl. I think it was a wilderness of flowers redolent of eternal spring and pulsing with bird song, where dappled fawns played on banks of violets; where leopards, peaceful and tame, lounged in copses of magnolias; where harmless tigers lay on snowy beds of lilies, and lions, lazy and gentle, panted in jungles of roses. I think its billowy landscapes were festooned with tangling creepers, bright with perennial bloom and curtained with sweet-scented groves, where the orange and the pomegranate hung like golden globes and ruddy moons. I think its air was softened with the dreamy haze of perpetual summer, and through its midst there flowed a translucent river, alternately gleaming in its sunshine and darkening in its shadows.

The old doubts and perplexities of the hereafter which have tortured the minds and harrowed the souls of thousands never vexed the placid calm of Senator TAYLOR'S existence. His faith was founded upon the Rock of Ages. He knew that "the stars go down to shine on other skies," but he also knew that "they would set their gold within our skies again." He knew that the grim frosts of winter would kill the bloom of spring and the beauty of summer, but that in the early morning of the New Year "the spring would awake again and fill all the land with radiance and all the air with song."

BOB TAYLOR believed in men; he loved nature; he trusted in God.

I can not say, and I will not say,
That he is dead. He is just away!
With a cheery smile and a wave of the hand
He has wandered into an unknown land,
And left us dreaming how very fair
It needs must be, since he lingers there.
And you, O you, who the wildest yearn
For the old-time step and the glad return,
Think of him faring on, as dear
In the love of there as the love of here.

* * * * * *

Mild and gentle, as he was brave,
When the sweetest love of his life he gave
To simple things; where the violets grew
Pure as the eyes they were likened to;
The touches of his hands have strayed
As reverently as his lips have prayed;
When the little brown thrush that harshly chirred
Was dear to him as the mockingbird;
And he pitied as much as a man in pain
A writhing honeybee wet with rain.
Think of him still as the same I say,
He is not dead—he is just—away.

Mr. MOON of Tennessee. Mr. Speaker, this occasion must not pass without a parting word from me of tribute, not of fulsome eulogy, to the memory of a friend of a lifetime.

ROBERT LOVE TAYLOR, a Senator from the State of Tennessee, in the Congress of the United States, departed this life on the 1st day of April, 1912. He was born of distinguished parentage in Carter County, Tenn., July 31, 1850. His early life was spent amid the lofty mountains and by the waters of the beautiful stream of his native east Tennessee. He enjoyed the home and the scenes of his youth. His mind ever reverted to the incidents and pleasures of his childhood. To him the rippling waters of the Wautauga, gliding by the place of his birth, was the River of Life flowing through Paradise. He was intellectual, emotional, sensitive, and sentimental, and yet the humorous side of the things of life afforded him intense delight and a frequent theme of conversation. He was reared to manhood in the most stormy period of his country's history. His own fireside was divided on political and sectional questions. The division was intense on all public questions among the people where he lived. He heard all the maledictions of a divided and infuriated populace and saw the horrors of the Civil War and the desecration of individual and State rights that followed it. Amid it all he pressed forward to the goal of his ambition "with malice to none and love to all." The allurements of place and power could not draw him to the ranks of the dominant party. He worshiped at the altar of constitutional liberty and ever rallied with pride and courage under the banner of a pure and undefiled democracy. He was a great political leader and was greatly honored by his country. He was a Congressman, and three times governor, and a United States Senator. He fought many battles for his party and his people and none against them. His personal and political surroundings and the kindliness of his own nature had an influence repressive of party intolerance and political bigotry and radicalism. He was too lofty in his sentiments and too sincere to impugn the motives or integrity of those who differed with him in public affairs. The tender pathos of his speech, the gentleness of his manner, his deep, sincere human sympathy, his charity, and love for his fellow man added to his popular attraction. When in his public or private conduct there was involved a question of justice or mercy for decision, his big heart in love decided it, and though his judgment at times may have been at fault, his conscience was ever clear and at rest. Yet many times he suffered in mind as but few public officials have. His distress came when he had to decide between close friends for official position. He could not say no to any of them. In this respect he was undetermined and unhappy. He wanted to aid all, but had the power to aid only a few. He bore with patience the invectives of the disappointed with an abiding faith that his motives would be ultimately understood and approved, and that the friends lost to him to-day would return to him to-morrow, and in this he was seldom mistaken.

His faith in the wisdom and political rectitude of the masses of the people was wonderful and never wavered. In defeat and in victory he trusted the people. He believed in the great central idea of our Republic that the will of the people is ever supreme and should be cheerfully acquiesced in though expressed by even a majority of but 1 vote. At times he was more than serious. He was sorrowful and looked on the dark side of political life, but the memories of battles won soon aroused hope for the future, and once again he emerged from a despondent to a confident and optimistic state of mind. In practical affairs he was at times not very practical. Anybody he liked could seemingly by his own consent impose on him, and thus much of his earnings was wasted. He was conscious of his own good intentions, and did not believe that anyone would do him an injustice. He was a lawyer, but did not spend many years in the active practice of his profession. The people were so fond of him that they kept him for the most part in public life. As a lawyer he was tactful, resourceful, and energetic in the interest of his clients, as demonstrated in some notable cases in which he was counsel. He was able, much interested, and very efficient in his work as a legislator. He was profoundly interested in all National and State issues, and particularly in improvements undertaken by the Federal Government. In the Senate he was very popular, and no less so in the House. He was one of the most interesting and able political speakers known to our hustings, and beyond question the brightest beam of true and comforting sunshine that ever glittered and gleamed on the American lecture platform. He was a manly man. He bore with equal modesty and courage the offerings of good fortune and of adversity. He was loyal to his friends and to his ideals to the end, and his deepest regret was that some whom he loved still misunderstood him. No heart ever sank to the grave with deeper affection for kindred, friends, and countrymen than that of Senator TAYLOR.

The eagle may change his plume,
The leaf its hue, and the flower its bloom;
But the chords of love in our hearts he spun,
They can not and will not be undone.

Friend of our youth and maturer years, farewell until we meet again.

Mr. AUSTIN. Mr. Speaker, Senator ROBERT L. TAYLOR died April 1, 1912—

Green be the turf above thee,
Friend of my better days:
None knew thee but to love thee,
Nor named thee but to praise.

Throughout my acquaintances among the public men of this country none have deserved more this description of the poet than Senator ROBERT L. TAYLOR, whose death we are assembled here to-day to fittingly deplore. He was so serene and even tempered, universally loved and respected, that he became popularly known as the "Apostle of Sunshine," and it is rather a singular fact that the circumstances of his birth presented a sort of prophecy that his life was to afford an example of brightness and sweetness and purity, for he was born in the sunny month of July, in Happy Valley, on the Watauga River, one of the most beautiful places in east Tennessee, and he was named ROBERT LOVE TAYLOR. No one could be of a more sunshiny nature; no one, in spite of occasional strokes of misfortune and grief, could be of a happier nature, and certainly he was the embodiment of love and good will to all mankind. And here it is well to observe that it was not so much what Senator TAYLOR did as what he was that will keep him forever in the hearts of those who knew him. An indefinable grace enveloped him like a radiant atmosphere. The privilege of knowing him and of associating with him was a rich blessing which no one could have without increasing his own moral stature.

Senator TAYLOR's ancestry was highly respectable, if not noble. His father, Nathaniel G. Taylor, was a Member of the National Congress and Commissioner of Indian Affairs under President Andrew Johnson, and his mother, Emily Haynes Taylor, was a sister of Landon C. Haynes, an eloquent senator under the Government of the Confederate States from Tennessee. Senator TAYLOR was naturally proud of his parents, because they were such intellectual and honorable people, but he had a praiseworthy ambition to be known and respected for his own sake, and because of his own deserts, and he cherished a wish to become appreciated and loved regardless of his progenitors. So while he was growing up among the haunts of nature—while he was hunting the coon and rabbit and the "'possum" in his father's woods, accompanied by friends and loved companions among his father's slaves—he never forgot that his destiny was to be among the leaders of the people, and among the noted friends of mankind. He became known familiarly as BOB TAYLOR—a designation which he loved and was always proud of. He was like Thomas Heywood, the poet of Shakespeare's time:

I hold he loves me best who calls me Tom.

He never ceased to love his dusky friends, the companions of his youth, and when he was grown up, and occupied, as governor of his State, that well-known office in the capitol at Nashville, quite as conspicuous and almost as well known under him as the Acropolis at Athens, crowned with the majestic Parthenon, no one was more welcome, and received a heartier welcome, than any of his father's old slaves.

An incident to show the feelings of these old people for Senator TAYLOR is told by himself, as follows: On one occasion, when he was in Arkansas, where there was a colony of these colored Taylor people, he went down to visit them. "When I got down to the community," he says, "and told them I was BOB TAYLOR, they gathered round me in a circle and looked me in the face and cried out in unison, 'Is dat you, Bob?' I said, 'Yes; this is BOB.' They fell back and laughed. They gathered round me again and again, and more excitedly cried and said, 'Is dat you BOB?' and I said, 'This is BOB TAYLOR.' Then they cried and said, 'BOB, we are mighty glad to see you. We haven't seed you since you was a boy, back at de ole home.' One of them said, 'BOB, my son Jim's been gone for three years, but if anybody was to ask me which I'd rudder see, BOB TAYLOR or my son Jim, 'fore de Lord I couldn't tell.'"

The ancients had a belief that the gods always exact a full equivalent for everything that they allow to man. If you wish love, you must give love. If you descend to hate, you must expect to receive hate. Every good must be paid for by similar benefits. Success is to be compensated for by giving up something of good. Senator TAYLOR no doubt realized the truth of this philosophy, but he never seemed to act up to it in a selfish manner as to his own conduct. His beliefs, founded partly upon his actions, were not mere affectation. His manner showed that his feelings were genuine. The appearance of kindness and love with him was real and apparently uninfluenced by any wish for reciprocity. He felt all he showed. Especially did he look upon the feeling of hatred or revenge as the attribute of a base mind. I never heard him speak an unkind word of anybody. He loved all.

O, Douglas, Douglas, tender and true.

Senator TAYLOR was three times elected governor of the State, and each term was characterized by wisdom and unquestionable statesmanship, but especially by mercifulness. He even ran his feeling of mercy so far that he was, to some extent, publicly criticized for it. But this he cared little about. He was in this matter sustained by the example of the compassionate Savior of mankind himself:

Doth any one condemn this woman?
Neither do I. Go, woman, and sin no more.

Here is what Senator TAYLOR himself says about the matter:

But I saw old mothers with their white locks and wrinkled brows swoon at the governor's feet every day. I saw old fathers with broken hearts and tear-stained faces and heard them plead by the hour for their wayward boys. I saw a wife and seven children, clad in tatters and rags and barefooted in winter, fall down upon their knees around him who held the pardoning power. I saw a little girl climb upon the governor's knee and put her little arms around his neck, and I heard her ask him if he had little girls; and then I saw her sob upon his bosom as though her little heart would break, and heard her plead for mercy for her poor, miserable, wretched convict father. I saw want and woe and anguish unutterable pass before the gubernatorial door, and I said: "Let this heartless world condemn, let the critics frown and wail, but he who hath power and doth not temper justice with mercy will cry in vain himself for mercy on that great day when God shall judge the merciful and the unmerciful."

Some one, speaking of Senator TAYLOR, says he died too soon. But there are very different feelings among men as to the right time to go out of this world. This, however, seems to be the predominant feeling of mankind on this matter:

To live in hearts we leave behind
Is not to die.

And this is certainly the case with BOB TAYLOR. No man, in Tennessee, at least, was ever more intensely beloved than he. Not even Gen. Jackson, though in a different way, was more adored than TAYLOR. The beautiful valley of the Watauga, where TAYLOR was born and which his praises have immortalized, is quite as well known among millions of his fellow citizens as the farm of the Hermitage, where Jackson's bones repose.

Up to the day of his death BOB TAYLOR was everywhere known and appreciated as a lecturer. His most popular talk was on the "Fiddle and the bow," which was received always with unfeigned applause, and it is certainly a charming piece of natural oratory. As an orator TAYLOR never offended the religion, the natural feelings, or the prejudices of his audiences.

Everything he said was from the heart, and seemed to touch the hearts of his hearers. He was the very opposite of that other distinguished Bob, who was almost equally beloved—the well-known Bob Ingersoll. But there was this tremendous difference between the two men:

Bob Ingersoll, though with a big heart—so big that he could, metaphorically speaking, stoop to kiss the lips of death—was really a selfish man. He made lots of money, but spent it mostly upon himself. He opposed Christianity and every other system of religion, but he was very careful to set up no substitute system of his own. In a word, he left the world no better off than he found it, but destroyed the faith and the spiritual comfort of many people. On the other hand, BOB TAYLOR was content to follow the Man of Galilee. What he usually said was to carry out the principles of Jesus of Nazareth, and what money he thus earned he gave with an unstinted hand to the cause of Christianity—to every form of charity, to the founding of churches and colleges, and to the building up of toleration and good feeling among men. He supported rather than destroyed the faith of his fellow man, and thus did an amount of good that can not be properly estimated.

I wish I could quote in full two rather remarkable papers that have been published in connection with the death of Senator TAYLOR from men that have known him intimately—one written by his minister, Rev. W. S. Neighbors, of Bristol, Tenn., a beautiful production, and introduced within this House by my colleague, Mr. SIMS, and the other by a close and intimate friend of Senator TAYLOR, Mr. De Long Rice, of Nashville, Tenn., a production brimful of beauty and poetry which deserves the most extensive circulation. I must merely commend these papers to public examination.

The only specimens of Senator TAYLOR'S oratory I have the space and time to introduce here are an extract from a speech delivered by him in the United States Senate, of which I offer the following reproduction:

When the first gun at Fort Sumter heralded the approaching storm of war the civilization of the old South was at the zenith of its glory. It was a proud and haughty civilization and sat upon a throne of living ebony. Its wealth and power were unrivaled in the world. But when the last gun at Appomattox heralded the dawn of peace that civilization had fallen. Its cities and towns were in ashes; its wealth and power had departed; and the remnants of the armies who fought to save it, too exhausted to longer pull the trigger, too footsore and too proud to run, stacked their old bent and battered muskets in the anguish of defeat and went limping back to their ruined homes. There is nothing left of that civilization now but precious memories and the pathetic story of vanished dreams, lingering among its tombstones and monuments like the fragrance of roses that are faded and gone.

The other is a chance fragment that is at once beautiful and timely and a fair example of Senator TAYLOR'S sentiment:

BOB TAYLOR'S DREAM OF HEAVEN.

What heaven is, I know not; but I long have dreamed of its purple hills and its fields of light, blossoming with immortal beauty; of its brooks of laughter, and its rivers of song and its palace of eternal love. I long have dreamed that every bird which sings its life out here may sing forever there in the tree of life, and every consecrated soul that suffers here may rest among its flowers and live and love forever. I long have dreamed of opal towers and burnished domes, but what care I for gate of pearl or street of gold, if I can meet the loved ones who have blessed me here, and see the glorified faces of father and mother and the boy brother who died among the bursting buds of hope, and take in my arms again my baby who fell asleep ere her little tongue had learned to lisp, "Our Father, who art in heaven." What care I for crown of stars and harp of gold, if I can love and laugh and sing with them forever in the smile of my Savior and my God.

Mr. Speaker, the State of Tennessee, in the course of her history, has given to the world some very remarkable men. Her statesmen, her soldiers, her orators, and others have been almost unrivaled. But among all her sons, in whatever position we may place him, no man stands higher in his character, his work, or in the opinions of his fellow men than BOB TAYLOR. It is enough to say of him that he was universally beloved, that he was an honor to the State, and that his memory will be kept always fresh in the hearts and affections of his countrymen.

Mr. MOON of Tennessee at this point assumed the chair as Speaker pro tempore.

Mr. HOUSTON. Mr. Speaker, on this occasion, when this House is met to commemorate the life, character, and public services of Hon. ROBERT L. TAYLOR, I shall not attempt a history of his life or to give an account of his public service. The records of the country tell his public service, and so much has been written of the man and his life that I can add nothing to this history. I simply come to pay my humble tribute to the man, to speak of my friend, and to voice my sorrow at his death. He has been the most prominent character in the political affairs of Tennessee since 1876, but I shall deal only incidentally with his public career.

His parents on both sides were prominent in the political history of Tennessee. His father was a leading factor in the politics of east Tennessee in the days when Whigs and Democrats vied with each other for mastery and control in Tennessee. His uncle on his mother's side, Landon C. Haynes, was a gifted orator and advocate of the cause of Democracy from another portion of the State. Both of these distinguished men were gifted with rare ability on the hustings and in the forum, and the commingling of this blood produced the rarest product of brain and heart known in our times.

He was born amid the mountains of east Tennessee in Happy Valley, as he loved to call the place of his birth, and at this point it is fitting to repeat his own words uttered in a speech delivered by him at Rogersville, Tenn., the year before his death. He said:

Just a little farther up among these beautiful mountains, where the morning first smiles upon the State and where the rivers are born, I first opened my eyes to the light of day and heard the first lullabies from lips that now are dust. There where the tall and silent peaks point upward toward the sky I first dreamed of God, and the white wings circling around them taught me my first lessons of liberty. The foot of man had never trod the earth where purer fountains were born or where the wind found its way through greener, purer, sweeter spaces. And the angels named the spot where I was born "Happy Valley."

Reared in the mountains and valleys of that historic country, he imbibed from the traditions and history of that section the spirit of those men who had fought the Battle of Kings Mountain and later won victories in the fields of Mexico and still later furnished a soldiery on both sides of the War between the States. They were a brave and noble people, patriotic to the core, and always ready to stake their lives and fortunes in their country's cause.

With an open and impressionable nature, he was much impressed with the environment of his childhood and youth in that country, so rich in tradition and story of patriotic sacrifices and noble achievement. This led him to aspire to serve his country, and that ambition was gratified to the extent of attaining the highest office within the gift of his State. I shall not follow his political career along the different steps of his promotion up to the topmost round within the gift of his State; this is history, and known to all. Indeed, I can truthfully say no Tennesseean was ever so well known throughout the confines of the State as BOB TAYLOR. Not only was his history and character known, but he had a personal acquaintance from the mountains to the river. It is more of the man and his personality that I would speak on this occasion. His great heart was the characteristic that gave him his place in the love and affection of his people. There was a personal charm in the manner of the man that won all hearts and captivated all minds. His chief trait was kindness and his chief charm was wit and merriment, and his best gift was that of imparting happiness and joy to all he met. He naturally absorbed the beauties and joys of life and with a ready talent imparted it to all. In many respects he was a child of nature. He reveled in the beauties of nature and lavished his heart upon them.

To him—

All nature breathed in harmony
With more than minstrel power;

To him—

There was music in each waving tree,
And joy in every opening flower.

He had the power to make others feel and see and know these joys. He was called "The apostle of sunshine," and such he was, and he has gladdened hearts and spread beauty and gladness around his pathway. Thus he was a benefactor of his kind. His presence ever lightened sorrow and brought a smile to care and pain. With a willing hand he always lifted the weary load and gave of his substance to those in need. He received much money as the fruit of his labor and work in life, but he dispensed it all among his fellow men. The call of charity and the claims of his fellows were never denied by him. Much he received and all he gave to others. He responded to every demand of a private or a public nature, and many and many a schoolhouse and church spire in Tennessee bear testimony of his generosity. To quote his own words again:

There is nothing in this world half as sweet as the tie of friendship, a friendship that will do things for somebody else. I believe the greatest happiness we get out of life is in giving happiness to others.

He lived for others and spent himself in giving help, comfort, and joy to those in need. When we remember that "it is more blessed to give than to receive," we can but think what a wealth of blessedness marked his life.

As a public speaker he entranced his hearers. When he stood before an audience and said "Fellow citizens" or "Ladies and gentlemen," instantly he had the rapt attention of everyone. By magic he caught his audience at the very outset and held them to the end; he made them laugh and weep in varying tones of merriment or pathos. He was a master in portraying human emotions and could express sentiment that touched

the heart to tears and led the fancy into exquisite joy. His words could bring a smile from the deepest pain or soften wildest mirth. He was not only charming and delightful as a public speaker, but in private conversation perhaps was shown his rarest gifts. As a maker of merriment and dispenser of joy he had no equal. He was always amiable.

> To see him laughing you would think he was all fun;
> The angels laugh, too, at the good he has done;
> Children laughed loud as they trooped to his call,
> But the poor man who knew him laughed loudest of all.

If a muster roll could be called of those he helped along the way, what an army it would make; and could they voice the joy that he has given, what a jubilee it would sound.

He was familiar with all classes of men. He lingered among those in the lowly walks of life, and he also sat in the seats of the mighty and in the councils of the great.

He "could walk with kings and never lose the common touch."

I first knew him when he was a presidential elector, and in that campaign his eloquence and gifts as a public speaker won for him the allegiance and support of the Democrats of Tennessee. In the campaign two years later he was the Democratic nominee for governor of his State. Two years later, in his canvass for renomination, there was much opposition to him among the Democrats in Tennessee arising from the fact that he had favored national aid to education, and in the convention that year there was a bitter and determined fight made against him. This convention was a notable one in the history of Tennessee, lasting seven days. At the beginning of this convention those opposed to Senator TAYLOR were in the majority, and his opponents organized the convention. I was the chairman of that convention and witnessed every detail of the long and determined effort to defeat him. It was not to be. His friends stood like a Grecian phalanx. The delegates in that convention that were supporting him never faltered and never wavered. Instead, day after day, his strength increased until on the seventh day he was nominated. Few men, if any, could have overcome the formidable opposition that was arrayed against him, but this opposition was all caused by a disagreement with him on one political issue—Federal aid to education. The magnetism of the man and the kindness that all felt toward him personally gradually overcame this opposition and he was renominated, winning a triumph that was remarkable under the circumstances and was attributable to the fact that men believed in him and loved him, notwithstanding this political difference.

Like all public men, he was criticized and fault was found with his judgment, but personally all felt kindly to him, and the failings that they attributed to him arose from his kindness and compassion and never were they attributed to anything vicious or unclean. He triumphed over all this criticism and was honored after this by election to his highest position. And it can be said of him that after long public service his honesty, fidelity, and his patriotism were never questioned. Tennessee has furnished her soldiers and statesmen, her heroes and patriots in illustrious line, but to the heart of that Commonwealth none was dearer or more beloved than BOB TAYLOR.

As a public speaker and entertainer he had no equal. His speeches, delivered day after day during the exposition held in Nashville while he was governor, are gems of eloquence and beauty, varying each day to suit the conditions and occasion. They show a versatility of talent absolutely wonderful. His power on the stump as a candidate is evidenced by his election to Congress in a district overwhelmingly Republican and against a most talented and accomplished Republican opponent.

His patriotism was broad. It embraced every section, as is shown by his own expressions, when he said:

> Above all things I am an American. I believe in American institutions and American ideals. Every State in this Union is as much my State as Tennessee is my State. The deeds of every great American, whether in the North or in the South, are my heritage and the heritage of my children.

No description can give a true idea of the manner of man he was. One must see him, hear him, and feel the magnetism of his presence to know him. Personal contact with him entertained, charmed, and captivated all hearts. He was truly "a man of infinite jest and exquisite fancy"; with his jest and anecdote he charmed and delighted every circle, and his fancy painted pictures that entranced every audience. His unique and original personality it was that endeared him to those that knew him; and how dear he was to hearts of Tennesseeans was evidenced by the great wave of sorrow that swept over the country with the news of his death.

When the funeral train that carried his mortal body from Washington to Nashville reached the borders of his own State, from Bristol on at every station there were crowds assembled and with bowed heads and weeping eyes they gave token of the great love they bore him and the sorrow that rent their aching breasts. When his remains were placed in the capitol of the State that had given him the highest honors it could bestow and which State he had served so faithfully and well, thousands and thousands passed by to take the last look at the face they loved. For miles the streets were lined on either side as the procession passed. It seemed that the Commonwealth had come to pay its tribute. And so it was when his body was carried back to Knoxville for burial; for miles there the streets were filled with thousands whose tears and anguish told how they loved him. No man in the history of Tennessee ever had the personal popularity and individual following, and when he was laid to rest Tennessee mourned her best beloved.

But to those of us who knew his life there comes a trust and comfort unspeakable when we remember the words of the Master:

> Then shall the King say unto them on His right hand, Come, ye blessed of my Father, inherit the kingdom prepared for you from the foundation of the world:
> For I was an hungered, and ye gave me meat: I was thirsty, and ye gave me drink: I was a stranger, and ye took me in:
> Naked, and ye clothed me: I was sick, and ye visited me: I was in prison, and ye came unto me.

Mr. BYRNS of Tennessee. Mr. Speaker, I consider it a sad privilege to have this opportunity of paying a brief tribute of love to the memory of Senator ROBERT LOVE TAYLOR. In his lifetime he honored me with his friendship and confidence, and I dearly loved him for his many noble qualities of mind and heart and a delightful humor which made the world brighter and better for all with whom he came in contact.

When, on April 1, 1912, the news was flashed back to Tennessee that the great heart of Senator TAYLOR, or as we in Tennessee loved to call him, "Our BOB," had been forever stilled, that death had touched him, and he had closed his eyes in that long and mysterious sleep, there was no one in his beloved State who did not feel the weight of a great personal loss. No man in the history of the State ever enjoyed more universally the love and personal affection of as many people as BOB TAYLOR. It has been well said that "as a boy of the mountains first, then a young man of 'the fiddle and the bow,' lawyer, Congressman, thrice governor, editor, author, lecturer, United States Senator, ROBERT LOVE TAYLOR was Tennessee's most popular citizen for 30 years." The love which his people cherished for him was reciprocated to the fullest extent, for he ardently loved every section of his State and all of her people. But it was perfectly natural that he should always entertain a partial fondness for his native east Tennessee and that its blue skies, its green-covered mountains, and its sparkling streams should appeal to him as those of no other region of the entire universe. I remember that less than one year before his death I was riding with him through upper east Tennessee, in the neighborhood of his old home. As our train sped swiftly by the cultivated fields, which were redolent of the harvest time, he pointed through the window to the distant range of mountains, praised their beauty and grandeur, and referred to the fact that in his youth he had wandered over many of them. As picture after picture of the beautiful natural scenery burst upon our view, he called my attention to them and said that the divine brush had never painted anything else quite so beautiful. As we crossed the Watauga River, upon whose banks he had spent so many happy, innocent hours, he grew reminiscent and spoke tenderly of his old home, a short distance away, and of his boyhood days. And then he spoke of the love and fidelity of their old negro servants, all of whom had passed into the great beyond, and mentioned names which have become familiar to all who have heard his famous lectures. He loved to talk of east Tennessee and Happy Valley, where he was born and where he spent the happy years of his childhood on the banks of the Watauga River and in the shadow of those mountains which he loved so well. He loved its splendid mountains, its beautiful valleys, and its pathless forests.

The ripple of its streams was music to his ears, and the songs of its birds were sweet melodies which always lingered in his heart. In one of his lectures he thus described the scenes of his childhood:

> Not long ago I wandered back to the scenes of my boyhood on my father's old farm on the banks of the river in the beautiful land of my native Tennessee mountains. I strayed once more through the pathless woods with my rifle on my shoulder. I sat on the old familiar logs amid the falling leaves of autumn and heard the squirrels bark and shake the branches as they jumped from tree to tree. I heard the plaintive song of the whippoorwill and the drumming of a pheasant and the hoot of a wise old owl 'way over in Sleepy Hollow. I heard the tinkling of bells on the distant hills sweetly mingling with the happy chorus of the song birds in their evening serenade. Every living creature semed to be chanting a hymn of praise to its God just as they used to long ago; and as I sat there on that old familiar spot and listened to the weird, wild harmony I was rapt into a reverie. A vision of the happy past opened before me. I thought I was a boy

again and played around the cabins of the old plantation and heard the old-time darkies laugh and sing and play the fiddle as they used to long ago.

Shouldering my rifle, I wended my way back to take one more look at the old homestead on the bank of the river. Silence was there. The voices of the happy long ago were hushed forever. The old-time darkies were sleeping on the hills close by the spot where my father sleeps. The moss-covered bucket was gone from the well. The old home where I was born was silent and deserted. As I peered through the dusty windowpane and looked upon the desolate hearthstone that once glowed with the light of love and happiness, I thought my mother came back across the flood of vanished years and sang there again the sweet old songs she used to sing in the happy long ago.

Under the influence of such environments he became an intense lover of nature. In his youth he lived closed to nature, and nature in turn endowed him with a rich imagery and a rare eloquence which captivated thousands in nearly every State in the Union who heard him either on the hustings or on the lecture platform. He had that rare and indefinable gift which we call magnetism, but which in BOB TAYLOR was a great big heart overflowing with love for all of God's creatures and which attracted all men to him. The charm of his eloquence and his rare gift in anecdote and story-telling made him invincible before the people.

The people loved to honor BOB TAYLOR. In his early manhood he was elected to Congress over an able and popular opponent, and in spite of a normal Republican majority of 5,000. Later on he became governor and served the customary two terms. In her centennial year Tennessee called him to the executive chair for the third time, a distinction accorded to no other governor since before the Civil War. Finally, in 1907, the crowning ambition of his life was gratified when he was chosen by the people in a popular primary to represent them in the United States Senate. I have not the space in what must be a brief and inadequate tribute to even refer to the record of his distinguished services in the various offices held by him, except to say that throughout his long public service he had the love and confidence of the people. He served them faithfully and well.

He was as true as the needle to the north. There was no smirch upon his character. No one ever heard any criticism of his official acts, save possibly by the fact that he was sometimes a little too free with his pardons while serving as governor; but if he erred in this, and I dare say none will pronounce it error, then it was an error on the side of mercy, and the Good Book tells us that "the merciful man doeth good to his own soul." BOB TAYLOR'S heart throbbed with a great love for all humanity, and no man, woman, or child who was in distress ever appealed to him without striking a responsive chord in his breast.

He was one of the most charitable men I ever knew. No one ever appealed to him for help in vain. It can be truly said that his hand was ever open to relieve distress and his heart ever ready to commiserate it. Doubtless he often gave to his own hurt, and perhaps he sometimes rewarded those who were unworthy, for BOB TAYLOR was not a man who, when appealed to, would delay his benevolence until an exhaustive inquiry could be had as to whether or not the person making the appeal was worthy. He never hesitated or delayed in doubt when suffering or necessity was brought to his attention. No doubt this well-known disposition often caused him to be imposed upon, and there may have been some entirely unworthy who received aid from him. But even if this was so, it did not reflect upon his own generous nature, or in any way lessen the pleasure which he derived from being able to relieve some one who was suffering or in trouble. It has been said by one who knows that Senator TAYLOR easily earned nearly one-half of a million dollars on the lecture platform alone since he first began to lecture in 1890. But, Mr. Speaker, he died a poor man, poor in this world's goods, but rich in the gratitude of many whom he had helped, and rich in the love of all his countrymen. He was often asked to lecture on behalf of some church or school which was being built or which needed repair not only in Tennessee but in every State in the South, and he always freely and generously responded. His genius and generosity has helped to build churches and schoolhouses all over the Southland. None of these churches or schoolhouses bear his name, for he was not a man who wished to thus advertise himself. But, sir, it may be truthfully said that they and the good which they will accomplish are everlasting monuments to him in the various communities in which they are located.

Mr. Speaker, it was as a lecturer and a platform entertainer that BOB TAYLOR achieved his greatest fame. His splendid eloquence, at one moment full of pathos, at another bubbling over with a delicious humor, and then again mounting to the highest flights of oratory; his beautiful word pictures and his inimitable stories will live in the annals of his State and his country. The stories of his laughter and song, which were the flowers with which he strewed his life's pathway, will be handed down by the living generation to the next, and the Tennesseean of to-day and the Tennesseean of to-morrow will remember him as a true "apostle of sunshine."

Certainly, Mr. Speaker, such a life did not end with death. Surely the joy and sunshine which he carried in his heart in this world has been carried into a world which exists beyond the grave. Is it too much to believe that his life on this earth was but the prelude of a higher, a better, and a nobler existence in the hereafter; that his power for doing good and making others happy will be increased more than one can tell in that land which lies beyond the barrier which shuts out eternity from mortal view? We can not fathom the mystery of death any more than we can fathom the mystery of life. Both are incomprehensible to us. The veil of the great beyond can only be penetrated by the eye of faith. Mr. Speaker, we do not need the philosophy of the doctrinaire, the learned discourse of the theologian, or the mystic speculation of the theosophist to teach us that there is a life after death. All nature, everything animate and inanimate, proves to us the immortality of man and that there is that within us which can not die. Senator TAYLOR had strong convictions on this subject, and to show how profound those convictions were I can not do better than quote his closing words in a eulogy pronounced on Senator McLaurin, of Mississippi:

> The flowers of the field rising from countless graves, the unfolding leaves of the forest heralding the approach of summer, the orchards and the meadows bursting into bloom, and myriads of winged minstrels filling the world with melody are all the evangels of the Lord, demonstrating before our very eyes the universal victory of life over death. Mr. President, look how the rose hears the far-away call of the sun and blushes in the presence of its God. Look how the violet comes forth from its tiny tomb and opens its glad blue eyes to greet the spring. Are they not God's own answer to the question, "If a man die, shall he live again?"
>
> If the germs of inanimate life, buried beneath the sod, so surely respond to the silent command of summer, who can doubt that man shall spring up out of the unconscious dust into eternal life when God shall call? Can it be that the grass and the flowers are resurrected from the sod of earth, while man, for whom they were made, must sleep on forever?

Mr. Speaker, I can not more fittingly close this inadequate tribute to the memory of Senator ROBERT LOVE TAYLOR than by saying of him what is particularly applicable to him and is the highest tribute that can be paid any man—the world is better that he lived in it.

Mr. PADGETT. Mr. Speaker, Senator TAYLOR was born, lived, and died—this an epitome of the history of mortal man. He sleeps with his fathers. I shall not attempt to review the history in detail of his life, either public or private. It is enough to say that in all the duties of his public life he was faithful to every trust and met and discharged every obligation. In his private life his virtues commended his being to everyone who knew him. There are two worlds in this life—the one without, the one within. We look about us and we see the mountain, the valley, the landscape, the flowers, and moving humanity. Just in proportion as there is harmony and adaptation between this outer world and the world within do we appreciate and enjoy the outer one. We see the grandeur and the glory of the uplift of the mountain because of the adaptation and the harmony of our inner self. We love the beauty of the valley because God has planted within us the power to love the beautiful. We admire the chivalry, the grandeur, the courage, the nobility of humanity because our Father in heaven has implanted within our inner life the faculty to appreciate and to enjoy these virtues. One goes into a great gallery and passes listlessly through, indifferent and unconcerned, because he has not the power to appreciate the beauty. Another passes through and is rapt in pleasure, revels in the beauty of art, because of the beautiful harmony between his life and the objects of beauty. In the life of Senator TAYLOR there was a beautiful harmony, a wonderful adaptation between his inner life and the grandeur and glory and sweetness of the outer world. His heart was full of love; his life was radiant with sunshine. Love, sunshine, and blessing marked every day of his life in his public and private ministrations. Mr. Speaker, in the myriads of people there has been a great question of the philosophy of life. We have many schools of thought. The Brahman says there is nothing real, nothing genuine, save the spirit. Absorbed in that great thought, he hopes and desires by continued contemplation himself ultimately to be absorbed into and become a part of the great spirit.

We all acknowledge the truth of the spiritual, and yet we know it is not sufficient to say it is all. The Buddhist revolts against that doctrine and says there is nothing real except the material; that only those things which we can touch, which we can see or hear—the thing that we can know through the senses—have any real being, and all else is a deception and a delusion. We confess the truth of the material, but we say it is not a satisfactory philosophy of life. The Mohammedan says

that the great philosophy of life is obedience to law. We confess the virtue of obedience to law, but we believe that in life there is more than the virtue of obedience to an exact law. When Jesus walked among men He said, "Life is more than meat and the body is more than raiment," and there is a declaration of the true philosophy of life that gives satisfaction and on which humanity can rest with solace and comfort. Mr. Speaker, I would not deny the satisfaction of appetite, but when our appetites are gratified we still say life is more than meat. I would not deny elegance of raiment, and yet when the body is clothed in beautiful raiment still we say the body is more than a rack on which to hang fine linen. Let me illustrate. David Livingston left the enchantments of the civilization of England and buried his life in the wilds of Africa, among a savage people, whom he had to teach a language in order to communicate with them.

After spending the years of his life in denial, death came. It is said that the people of Africa, placing his body upon their shoulders, carried it through the wilds hundreds of miles to the seashore, that it might be taken and placed in Westminster Abbey, to sleep among the illustrious of English history. It is said that while the people of Africa were willing that the body of David Livingstone might rest in Westminster Abbey, before it was taken they opened the chest and took out of it his heart, which symbolized his love, and buried it in the soil, there forever to remain, so that Africa might never be parted from the love of Livingstone.

Sir, methinks that David Livingstone's life was more than meat and his body more than raiment.

Abraham Lincoln, born in poverty of the direst sort, with adversities and difficulties as great as ever beset an American boy, triumphed over all, became the President of the United States, the advocate of great principles of human life and human liberty, and lives in the affection and the admiration of all the world. He testified in his life that life was more than meat and the body more than raiment.

Robert E. Lee, born in luxury, of an aristocratic family, surrounded by all the blandishments of wealth and social standing, resisted every depressing effect, was not misled by wealth or corrupted by society, and, true to his convictions and to his courage, he challenges the admiration of every man who loves his country.

Livingstone, Lincoln, Lee testified in their lives and exemplified in their work that life is more than meat and the body is more than raiment.

Mr. Speaker, Senator ROBERT L. TAYLOR, born of generous and honorable parentage in Happy Valley, nestled among the mountains of eastern Tennessee, is entitled to the same tribute. He moved among his people, diffusing sunshine and happiness and joy.

The great mountains among which he lived were to him an inspiration. May I illustrate? As we walk through the valley of ignorance and superstition we have a very narrow sphere of action and vision, just as one traveling down in the narrow defiles of the valley has his view obstructed by the mountains on either side, but as he begins to climb the mountain and rises higher his vision broadens, and as he reaches the top of the mountain and looks out over the landscape of beauty and grandeur he realizes a joy of which he never dreamed down in the defiles of the valley. So it was in the life of Senator TAYLOR. He climbed high on the mountainside of human virtue, of human character, high on the mountainside of attainment and accomplishment, and had a broad vision of humanity, of its love, of its possibilities, of its attainments, of its needs, and its sufferings, and his life shed a beneficent sunshine of gladness and joy upon all. Mr. Speaker, the life of ROBERT L. TAYLOR was a poem of sunshine and love, dedicated to humanity.

Death came. We followed him to that beautiful forest cemetery. In the narrow grave we placed his body. The earth was heaved upon the coffin, and the mound of the grave was banked with flowers so beautiful that only God could have made them. As I stood and looked, my heart was heavy. The tears trickled down my face, and I thought I heard again the voice of the angel who said, "He is not here; He is risen." And I lifted my eyes from the banked mound of the grave and I saw the beautiful painted skies, painted in glorious colors more beautiful than an artist could conceive or a painter could picture, and I said, Is he risen to live in the beauty and the glory and the grandeur of the setting sun? No; in an hour the golden glory of the sunset will pass away and the pall of night will take its place. But he is risen, risen into life, that higher, grander, nobler, better life, unfettered by the shackles of the flesh; risen into that life whose influence is love, whose power is intelligence, and whose duration is commensurate with the eternity of God.

[Mr. GARRETT addressed the House. See Appendix.]

Mr. GARRETT. Mr. Speaker, I ask unanimous consent that all who desire may have permission to extend their remarks in the RECORD on the life, character, and public services of the late Senator TAYLOR.

The SPEAKER. Is there objection?

There was no objection.

THE LATE REPRESENTATIVE SMITH OF CALIFORNIA.

The SPEAKER. The Clerk will report the order of business in reference to the Hon. SYLVESTER CLARK SMITH, late a Representative from California.

The Clerk read as follows:

On motion of Mr. NEEDHAM, by unanimous consent,

Ordered, That Sunday, February 23, 1913, be set apart for addresses upon the life, character, and public services of Hon. SYLVESTER CLARK SMITH, late a Representative from the State of California.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 865.

Resolved, That the business of the House be now suspended that opportunity may be given for tribute to the memory of Hon. SYLVESTER CLARK SMITH, late a Member of this House from the State of California.

Resolved, That as a particular mark of respect to the memory of the deceased and in recognition of his distinguished public career the House at the conclusion of the memorial exercises of the day shall stand adjourned.

Resolved, That the Clerk communicate these resolutions to the Senate.

Resolved, That the Clerk send a copy of these resolutions to the family of the deceased.

The resolution was unanimously agreed to.

Mr. NEEDHAM. Mr. Speaker, SYLVESTER CLARK SMITH was born on a farm near Mount Pleasant, Iowa, August 28, 1858, and died in Hollywood, Cal., Sunday, January 26, 1913. His grandfather was Sylvester Smith, a native of New England, and his father, Edward Smith, was a native of New York. The father moved, first, to Ohio and then to Illinois, and in 1835 settled in Iowa, where he raised a family of five sons and three daughters.

SYLVESTER CLARK SMITH, whose memory we honor to-day, moved to California in 1879 when 21 years old and taught school in Colusa County, where he married, on May 7, 1882, Miss Maria J. Hart. The winter of 1882 and 1883 was spent in San Francisco studying law. The following summer, in 1883, he moved to Kern County, where he continued to teach school and study law. In October, 1885, he was admitted to the bar and opened a law office in Bakersfield, the county seat of Kern County.

In 1886 a number of farmers bought a newspaper plant and established a paper for the purpose of representing their views on the question of water rights, which was then a burning issue in our State, and especially in Kern County, and Mr. SMITH was selected as editor of the paper—the Kern County Echo. Three years later he purchased the paper and plant and continued to be its principal owner until the date of his death.

From the date that he became a citizen of Kern County he was one of the most active and influential residents of his county, and was always an active and influential factor in all public questions affecting its welfare. He took up a homestead in the county and rode horseback between his home and his business in Bakersfield. He was a member of the local militia, Company G, and served during the railroad strike in 1894.

In 1894 he was nominated by the Republican Party for the State senate in the district comprising Kern and San Luis Obispo Counties, and was elected, although the district was strongly against him politically. He immediately took high rank in the legislature as an independent, fearless, and able legislator. In the State senate, which was composed of some of the ablest men of California, he became a leader and was acknowledged to be one of the best debaters in that body. He was reelected in 1898, and his second term in the State senate was one of great usefulness to the State. He stood for the best in legislation, and his entire course in the State Senate of California was one of great credit to himself, his party, and his district, and, in fact, to the whole State.

He was nominated for Congress in 1904 from the eighth district of California by his party, and was elected, and reelected in 1906, 1908, and 1910.

His service in this body is still fresh in the minds of those who served with him. From the first he took high rank here, and his progress was rapid. He obtained the confidence of the Members from the beginning; he was early recognized by the leaders of the House as a man of more than ordinary ability and capacity, and was singled out for recognition, honors, and leadership. When he spoke he always had the undivided attention of the membership. His clear, musical voice rang out and

filled this Chamber and riveted the attention. Any disorder which might have prevailed immediately ceased from the moment he addressed the Speaker. Not a large man physically, yet his voice was so penetrating and his manner of speech so incisive, his argument so clear and sincere, that those within hearing could not fail to listen and follow him.

During his services in the House he was honored with membership on the Committees on Public Lands, Post Office and Post Roads, Labor, and Education, and was one of the first to be chosen to the Rules Committee when the House determined to elect this committee. He was also a member of the Monetary Commission until ill health compelled him to resign. On the Committee on Public Lands he rendered conspicuous service, being an authority upon and a deep student of the public-lands question. His most conspicuous accomplishments while in this body were the obtaining of an appropriation of $1,000,000 to control the Colorado River and the passage of the Smith bill, which was a bill to remedy the effect of a decision known as the "yard decision" upon oil canals—legislation of the most vital and far-reaching importance to his constituents.

Representative SMITH was a man of supreme courage; he had his convictions and resolutely held to them. He would not compromise for the sake of temporary popularity. He at all times, whether in his paper, on the stump, or in legislative hall, would maintain and defend his convictions. He hated and despised a political trimmer. At no time in his career would he surrender his views to curry favor or gain popular applause.

He was supremely loyal to the community in which he lived; no labor was too great to advance its best interests. He was constantly planning for its betterment and was full of ideas for its improvement and growth.

He was greatly attached to his work as a Member of this House. He enjoyed his work here, and here he found a field suitable to his tastes and talents. Long after ill health had made it apparent to his friends that he must give up his activities here, he refused to cease his labors, and his determined devotion to duty shortened his life.

I first became acquainted with SMITH while he was serving his first term in the State senate, about the year 1897. Our relations became intimate after he became a Member of this House. We occupied adjoining rooms in the House Office Building. We generally walked home together daily upon the adjournment of the House, and we became strong personal friends. His family and my family enjoyed an intimate association.

His death to me is like the passing of a near relative, and there are but few men whose going would cause the same sense of personal loss.

Some years ago he requested me to see to it that in the event of his death while a Member of this body no committee be appointed to attend his funeral. This request was characteristic of the man and typical of his simple and unostentatious life; free, as it ever was, of all pomp.

Mr. Speaker, this Congress has lost by death a large number of its membership, but in the long list of departed colleagues none more faithfully represented his constituency than did SYLVESTER CLARK SMITH, of California. He died in the very noontide of his life—he was cut off at the very height of his abilities—at a time when by reason of his experience his State could ill afford to spare him.

Mr. Speaker, my association with my late colleague was so close that it is difficult for me to speak impartially of his life, character, and public services. Upon the occasion of his funeral, in Bakersfield, his home city, there was an immense throng from all walks of life gathered to do honor to their most distinguished fellow citizen and to pay their last sad tribute to the memory of one they all loved and honored in life and mourned in death. It was a tribute that will long be remembered by the citizens of Kern County, and worthy of all those who participated in the loving remembrance in honor of Kern County's leading citizen.

SYLVESTER CLARK SMITH is dead, and we shall miss his cheery voice and his always pleasant personality; his friends, while cast down, still are proud of his life and its accomplishments, because the world is better because of his life.

Mr. Speaker, I ask unanimous consent to print as supplementary to my remarks addresses delivered upon the occasion of his funeral by Rev. E. R. Fuller and Hon. J. W. Wiley.

The SPEAKER. Is there objection? The Chair hears none.

The addresses are as follows:

FUNERAL ORATION BY REV. E. R. FULLER.

To-day we are met on a mission at once most sad and most sacred. At every step of my preparation I have met troops of thronging memories that sweep across the field of the last 15 years—years fraught with larger meaning than we are apt to think.

"Every character is the joint product of nature and nurture." How much of good and evil we inherit—not merely from parents, but from a long line of ancestors! Who shall estimate the power wrapped in the spirit of a new-born babe, forces the germs of which are transmitted from generation to generation? Nature, thrifty and provident, gathers up these fragments that nothing be lost and rearranges them in new character combinations. Thus each child is the "heir of all the ages." But however much we inherit, nurture to us is the more important, since it is under our direction and control.

SYLVESTER CLARK SMITH was born August 26, 1858, on a farm in Iowa. His mother died when he was but 8 years old. Yet her splendid Christian influence in those early years was a prime factor in molding his sterling character. He was trained in the district school and a local academy. At 18 he began teaching to better fit himself for life. At 21 he came to California. Four years later (in the summer of 1883) he came to Kern County and settled in this city in December, 1885, which has since been his home.

During the first six years in California he taught school and studied law in Colusa, San Francisco, Ventura, and Kern Counties. He claimed as his bride Miss Maria J. Hart, who has been such an efficient helpmeet. Of this union two daughters have blessed and brightened the home—Mrs. E. S. Larsen, of Washington, D. C., and Mrs. A. W. Mason, of this city.

Kern County is still considered one of the newest and most undeveloped of all the counties of this great State. But when Mr. SMITH brought his family here it had but one resident where now it has five, and financially, educationally, and religiously the contrast was even greater. His course was over a rough road in this new West, but difficulties are not necessarily disadvantages. In his case the necessity to work was joined with a capacity and determination to work in things that were a succession of solid stepping-stones to a high destiny.

Personally I am persuaded that the improved conditions that we enjoy have been made possible in no small measure by the clean, public-spirited young school-teacher who came to this county in 1883. For 30 years he has given himself without reserve as teacher, lawyer, editor, State senator, and Congressman, and true friend to this, his chosen county. To this city and county he has given his best. When not on duty elsewhere, here was where he longed to be. His last thoughts on the evening before he rested from his labors were as to how he could help better the moral conditions in this city. He had a passion for doing good. He never found it necessary to make war upon society in order to capture a field for the exercise of his splendid powers. Bring your choicest flowers to his bier, but fail not to carry away the lessons of his life—"the flower of manhood and the wreath of honor."

Fair, fearless, independent, capable, he has stood steadfastly for betterment of every kind. His principles were noble, his ambitions lofty, his spirit and poise fine. His sainted mother builded well, for this her son was alive with a simple, sincere Christian faith and a purpose high and holy. He loved the church well and was generous in its support. One of the last letters he dictated and signed was to urge better church equipment and to pledge his full cooperation.

In his lingering sickness he was patient and gracious to the last. When a caller asked if he suffered, he would say, "The Lord is very good to me, for I do not suffer. I am just comfortably sick." As Paul wrote (Titus i, 18), "Given to hospitality, a lover of good, sober-minded, just, holy, self-controlled." The fitting text a close friend chose was this, "Not slothful in business, fervent in spirit, serving the Lord." (Romans xii, 11.)

Aside from his perfect candor, nothing impressed me more than his splendid mastery of himself. I have seen him under very trying circumstances, but I never saw him lose his self-control. This may explain in part how, even when under the strain of public life at Washington, he found time to respond to every earnest, honest appeal, whether it was that of a Chinaman with visions of wealth through a patent or a schoolboy wanting help in debate. Each time he was prompt, thorough, painstaking, often writing many pages in reply.

Remember, friends, it is Congressman SMITH, and not ex-Congressman. He fell with his armor on. Never was mind more alert or heart more responsive to every worthy cause. Never has his honor been impeached or his reputation sullied by charges of corruption.

Suffice it to say he never brought
His conscience to the public mart.
But lived himself the truth he taught.
White-souled, clean-handed, pure of heart.

By means of mails and messages he kept to the very last in closest touch with matters in general, yet more especially here in Bakersfield and in Washington. On that last day a public document called to his attention the fact that 16 Members of this Sixty-first Congress had died. Before the sun had risen he was the seventeenth.

Such are some of my wandering thoughts in the face of this our sorrow.

To these loved ones our hearts go out in deepest sympathy. But, oh, the weakness of words. The memory of loved ones gone should be a tower of strength. What they achieved and aspired to should nerve us to meet worthily the present. What an anodyne of grief are rightly cherished memories. What a solemn pride must these dear ones feel to have laid so great an offering on the altar of civic betterment.

A good man's influence is felt by multitudes. It is not limited to this life, but reaches onward to the eternal future. Virtue is not only an antidote for life's greatest evils, but it is the chief measure of present enjoyment. It secures the approval of one's conscience, harmony of one's faculties and affections, the regard of one's fellow men, and hope beyond the grave. His life is an inspiration, a breath of new life, of quickening, purifying, and elevating power. Forget not that as we exhibit the virtues of faithfulness we embalm his memory and pay him our best tribute.

Not many great, not many mighty have gone forth from this city to worthily advance State and National honor. To-day we pay tribute to a child of the prairie, who came to us in the prime of young manhood. The blood of the Pilgrims flowed in his veins. In a simple, yet sublime, spirit he climbed by sterling worth and indomitable courage to a prominent place in the Nation's council chambers. This friend and neighbor that we had learned to love and trust went from us that he might serve us and all humanity better.

Human hopes and human creeds
Have their root in human needs.

Humble child of the prairie, laborer, teacher, lawyer, politician, orator, statesman, true Christian, and true man, we receive and will cherish the lessons of thy life. We are grateful to thee that thou wast true to thyself, to us, and to thy Maker; grateful also to that Providence that endowed and led and consecrated thee to the sacred cause of civic righteousness. Dead, do they say? Nay, that can not be. Thou resteth from thy labors, but livest unfettered a more abundant life.

EULOGY DELIVERED BY JUDGE J. W. WILEY.

This occasion brings us together in sorrow and pride. Although death is as common as life it ever brings sorrow as deep as was our friendship, love, gratitude, and esteem in life. The sorrow and esteem are more eloquently manifested by this multitude of sad faces than words at my command can express. Yet depressed as we are we are filled with pride that the distinguished dead, in whose honor and memory resolutions have been passed on both shores of this Nation, was our dear friend and neighbor. He was one of us. He worked and toiled and suffered with us in our undertakings; he sympathized with us in our failures and rejoiced with us in our successes. It is fitting and proper for the National Congress, the State legislature, the commercial and civic bodies of other communities to give expression of their high esteem and appreciation of his worth as a public man, but we knew him by the shake of the hand, the kindly smile, the neighborly acts of kindness, and his words of good cheer. We were and are proud of his successes in public life because he won them on merit. He asked no odds, he claimed no preference. Think not you, however, that his career has been one of easy victories and triumphal marches. On the contrary, he bore the cross before he wore the crown. He was chastened by fire. While he never felt the pinch of poverty his early life was one of toil and self-denial. He once said to me: "I had to learn how to be poor." He began at the bottom with nothing to aid him but his own individuality. He realized and appreciated as a maxim that he would be accepted at what his own efforts and trials of character made him. His industry, his devotion to duty, his high standard of morals, both public and private, and a patient continuity of purpose constituted the elements of his success. As editor of the Kern County Echo, since 1888, he has been identified with the public affairs of this community. Turn back to the old files of the Echo and you will find him advocating and suggesting plans and schemes for the betterment and general welfare of Bakersfield and Kern County. Bakersfield was not incorporated as a city until 1898, but you will find in these editorial columns that the deceased had been consistently and continuously arguing and pleading for a municipal government for many years. Those of you who were citizens of Bakersfield at the time need not be told of his activities in promoting the San Joaquin Valley Railroad, which is now a part of the Santa Fe system. He was active in organizing the local board of trade, and became its president. Later he promoted the San Joaquin Valley Commercial Association and became its executive head.

IN STATE SENATE.

In the State senate, by virtue of his clearness of insight and quick perception, his power of discrimination and ability as a debater readily won him recognition and leadership. I have known many of his colleagues in the senate, and the esteem and respect in which he is held by them is a priceless legacy to those who hold his memory dear. To speak in detail of the measures and policies he initiated and brought into law as a member of the State senate would extend beyond proper limitations.

But some deserve mention. His greatest pride in his legislative achievement was the establishment of the California Polytechnic School, at San Luis Obispo. His theory of life was that every person who was honest and industrious and frugal should be able to establish and maintain a home, rear a family, and comfortably house, clothe, and feed them, educate them, have time to enjoy their society, and accumulate a competency for the infirmities of old age. To bring this about he believed that labor should be rendered more efficient and less irksome. To do this the followers of industrial pursuits should be educated and trained to their respective pursuits. To this problem he gave his early attention as a legislator. At his first session, in 1895, he got the measure passed in the senate, but failed in the assembly. In 1897 it passed both houses, but was vetoed by the governor. Session after session he labored for the measure, and it finally became a law in 1901 and the school was established. The object of the institution may be quoted from the law establishing it: "The purpose of this school is to furnish to young people of both sexes mental and manual training in the arts and sciences, including agriculture, mechanics, engineering, business methods, domestic economy, and such other branches as will fit the students for the nonprofessional walks of life. This act shall be liberally construed, to the end that the school established hereby may at all times contribute to the industrial welfare of the State of California."

In 1904 he was elected to the House of Representatives in Congress from the eighth congressional district of California.

CONGRESSIONAL CAREER.

Of his achievements in Congress I would mention his securing an appropriation of $2,000,000 to protect the settlers in Imperial Valley from the ravages of the Colorado River. In 1911, when death seemed impending, he secured, against determined opposition, the passage of what is called the Smith bill, whereby the investors in located oil land were saved from the effect of a decision of the Department of the Interior that threatened and jeopardized investments of millions of dollars in the oil lands of this country.

In 1908 he was appointed as a member of a joint committee from the Senate and House of Representatives on what is known as the National Monetary Commission. This was his highest recognition in public life. He had then served in Congress less than two terms, and was selected as one of nine from the total membership of the House of Representatives to collaborate and devise a monetary system that would better meet the needs and requirements of the complexities of our financial conditions. From this commission he was compelled to resign two years later by declining health. One of his first efforts after becoming a Member of Congress was to introduce a bill looking to the construction of a Federal post-office building in Bakersfield. In 1910 he secured an appropriation of $20,000 for a site, and there is now included in the proposed general appropriation bill of Congress a recommendation by the Public Buildings Committee for the appropriation of $135,000 for the erection of a post-office building at Bakersfield. That the appropriation will be made is practically assured, and we may confidently hope to see the edifice stand in the near future as a monument to his efforts in behalf of his home city.

With this brief recital of a few of the more salient events in the career of our friend and neighbor, our thoughts are turned by the hand of death from history into the field of speculation. We may, in reason, believe that had he been given the average allotment of life, had he been permitted to enjoy the twilight of old age, he could have reviewed a career marked by achievements greater and more distinguished than those we here commemorate. But such was not to be. His sun went down at noon, leaving the harvest half gathered. But we are left more than a memory. We have another demonstration that the cherished hopes of the founders of this Government have been realized. It is a saying, far too common, that the poor man and the child of obscurity is here without opportunity or possibility of progress. Congressman SMITH has proved that by industry, by fidelity to duty, honesty of purpose, and courage in defeat and disappointment the child of obscurity may achieve fame and recognition. But his courage was not that of the bulldog. It was the courage of his convictions, that could stand in the face of temptation or threatened defeat. These elements of success are not peculiar to the statesman but apply to every vocation known to civilization and have no exceptions. Take any merchant, any professional man, or any mechanic that has won distinction in his vocation and you will find one who has traveled the road from the bottom.

A MAN OF THE PLAIN PEOPLE.

But in the everyday walks of life he was at his best. His hand was ever ready to do charity, but always without ostentation. His charity was not limited to giving alms but was based in a broad and deep human sympathy. Did anyone need work? SMITH would find time to help him get a job. Did a stranger come within our gates? SMITH would give him the glad hand of welcome and make him feel at home. In the hour of his triumph he seemed to cling the more closely to the old friends in adversity. Their companionship was ever welcome and he seemed happiest when they were gathered round his board enjoying his hospitality. He had self-confidence, but it was never tainted with bigotry or egotism. He was democratic in the purest sense.

As a guest, who may not stay
Long and sad farewells to say,
Glides with smiling face away.

Of the sweetness and the zest
Of thy happy life possessed
Thou hast left us at thy best.

Now that thou hast gone away,
What is left of one to say
Who was open as the day?

What is there to gloss or shun?
Save with kindly voices none
Speak thy name beneath the sun.

Safe thou art on every side;
Friendship nothing finds to hide;
Love's demand is satisfied.

Over manly strength and worth,
At thy desk of toil, or hearth,
Played the lambent flame of mirth.

Mirth that lit, but never burned;
All thy blame to pity turned;
Hatred thou hadst never learned.

Every harsh and vexing thing
At thy home fire lost its sting;
Where thou wast was always spring.

And thy perfect trust in good,
Faith in man and womanhood,
Chance and change and time withstood.

Small respect for cant and whine,
Bigot's zeal and hate's malign
Had that sunny soul of thine.

[Mr. MONDELL addressed the House. See Appendix.]

Mr. KNOWLAND. Mr. Speaker, my first acquaintance with Congressman SMITH dates back to 1899, 14 years ago, when I entered the lower branch of the Legislature of the State of California. He was then a member of the State senate, in which body he served for eight years. He had the reputation of being one of the most able fighters in either branch of the legislature, a characteristic which distinguished him throughout his public career and which he manifested up to the very last in his heroic struggle against death.

I recall having passed through the assembly a bill in which I was particularly interested providing against home study for children under a certain age, and the prospect that this bill was likely to become a law filled my young heart with pride. The day of its consideration by the senate I walked over to that chamber convinced that the members of that body would appreciate its many meritorious provisions. It was one of my first bills, and every legislator appreciates how wrapped up we may become in the first measure we father. Senator SMITH arose in his seat and proceeded to vigorously attack certain features of my measure, and no doubt he was right, being largely instrumental in bringing about its defeat, although a reconsideration was later had and the bill passed. When the roll call disclosed the defeat of my pet bill, young and inexperienced as I then was, I convinced myself that SMITH and I could never be friends. But I soon grew to admire and respect him, and later, when we joined issue in a contest before the legislature to bring about the defeat of one candidate for United States Senator and the election of another, we became friends, which friendship grew when he entered this body at the beginning of the Fifty-ninth Congress.

As a State senator SMITH was active and effective. He was deeply interested in the introduction of manual training in the schools of his State. It was largely through his efforts that the State polytechnic school at San Luis Obispo was erected. SMITH was a thorn in the side of every lobbyist who attempted to slip through the legislature an apparently harmless bill which contained hidden away somewhere what is fre-

quently termed a "bug." He would find the objectional language and point out its baneful effect when others had failed to discover anything wrong in an apparently innocent bill.

SYLVESTER SMITH early developed those traits of character so essential to success in public life. His word was always good. He never hesitated to declare where he stood. He fought fairly but always vigorously. His judgment was sound. When the House Office Building was completed and we selected offices, SMITH and I occupied adjoining rooms. I consulted with him frequently, for he was 15 years my senior, and I always found his advice to be sound.

The Morning Echo, published in Bakersfield, Cal., which paper SMITH edited and controlled, was a paper widely read and quoted throughout the State because of its able editorials. Its opinions were sound, although not always following public sentiment in California, which within recent years has been somewhat variable. The paper was always independent and courageous, like its able editor. His physical courage was illustrated many years ago when there came into the Echo office a man with a revolver in one hand and a clipping from the paper in the other, the gun being leveled at SMITH's head. A demand was made that the editor retract. SMITH coolly told one of his men to phone for the sheriff, and continued to write at his desk.

In life we too frequently see striking examples of attempts to place round men in square holes, or the reverse. I am of the opinion that in legislative life particularly no man is a success unless he possesses a special liking for the work. SMITH had a special aptitude for legislative work. I remember the last time he came into this Chamber, and after I had helped him from his carriage to his seat, that he said to me, with just a tinge of sadness in his voice:

KNOWLAND, I wish I was able to stay here. I like the work and the opportunity it gives one to keep in touch with public affairs. It is worth while.

SMITH was successful here because he loved the work. He was not only interested in legislation, but he enjoyed the game of politics. He did not become easily discouraged, as do many men who enter this body, because he could not upset existing conditions and reform the country in a day. He worked hard. His career gives the lie to the contention that a man succeeds here largely through luck. It is no more true here than elsewhere. A man succeeds here because of work—constant work and close attention to duties.

Congressman SMITH's ability and aptitude for work were recognized by the House leaders, and he was given some of the best committee assignments of any Member from the Pacific coast. He was a member of the Committee on Rules, at that time looked upon as one of, if not the most, important of the House committees. He was also a member of Committees on the Public Lands and the Post Office and Post Roads. SMITH was responsible for much legislation of value to his State and country. He was a member of the National Monetary Commission. As a member of the Public Lands Committee he never hesitated to freely and publicly criticize policies of the department which he believed to be wrong and not in the interest of the people of his State.

Congressman SMITH was not easily carried off his feet. He held convictions which took more than temporary waves of public sentiment which sweep across the country to change. He loved a fight, and I believe he would rather at any time to have addressed a hostile audience than one which held opinions similar to his.

When the insidious disease which later carried him off first manifested itself his colleagues pleaded with him to go home, where the balmy climate might have effected a cure in those early stages of the disease. But he would not go. As long as he could stand upon his feet he insisted on working. There was so much to do that he did not feel that he could leave. Like the good soldier he remained at his post of duty as long as his physical strength permitted.

Occasions like this to-day are sufficiently sad when we meet to mourn the loss of those called after the shadows of evening have gathered, when the sun is sinking beneath the horizon, and when the storms and struggles of life are over and the peace and quiet of advancing age has stolen into the heart. But in this instance we feel more keenly the loss, perhaps, because we have assembled to pay loving tribute to one called in the noontime of his usefulness, when the sun was shining high in the heavens and when hope was in the heart, strength in the arm, and courage in the soul. The calling of one in the full vigor of his manhood causes the uncertainty of life to loom up before us.

SYLVESTER SMITH possessed a happy disposition. He was an optimist. He had no patience with the pessimist. He was happy and contented because he sought to cheer and brighten the lives of those with whom he came in contact. He leaves the heritage of a pure and upright life. He possessed character, and nothing is more important or essential. In his death California has lost a valuable citizen and an experienced legislator. Well could he approach the mysterious change calmly, bravely, cheerfully, and with a consciousness of duty faithfully performed, for he had lived an upright and honest life. The California delegation will greatly miss him.

Mr. NEEDHAM at this point assumed the chair as Speaker pro tempore.

Mr. LLOYD. Mr. Speaker, Mr. SMITH, the subject of to-day's memorial, represented the southwest corner district in the United States. He lived in the country of the orange and lemon, near the coast on the west of California, in a locality where frost is seldom found and ice is almost unknown excepting on the mountains, whose lofty peaks are continually snow-capped and in full sight from the plains of green, which are covered with tropical growth.

Mr. SMITH pursued the course so common to the professional and official classes. Reared on a farm, he afterwards taught school and became a lawyer, following the avocations engaged in by many of the men who now occupy place amongst us. Mr. SMITH, however, later engaged in journalism, and his first venture was in the locality in which he lived. He was chosen editor of a small weekly paper for the purpose of forwarding a certain movement, but his paper so prospered that later it developed into a splendid country weekly, and finally into a daily publication which exerted quite an influence in molding sentiment in his district.

I knew Mr. SMITH quite well here and found him to be an honest and courageous man. He had decided convictions which sometimes made him appear to be biased in his judgments, but I do not believe that his sincerity of purpose could be questioned. I knew him not as a partisan in politics, but as a business representative. My work with him was in postal matters where there is little room for partisanship to assert itself. He proved himself there to be a useful investigator after truth and a man with a purpose—that of endeavoring to ascertain what was most beneficial to the people in the matter of maintenance, continuance, and enlargement of our splendid postal service.

How strangely differently men reach the end of life's work. Our colleagues frequently die suddenly or after short illnesses, but Mr. SMITH knew for many months that the disease preying upon him would never lose its grasp. The angel of death in his case gave every warning of its approach and every step of its unwelcome coming was duly considered. Occasionally men are found who shudder at the thought of dissolution. Others approach the end with calmness and serenity and make their exit with as little disturbance as if they were called to step across a tiny brook, while a few appear to even rejoice at the prospect of a change. To them life seems irksome and death the good desired.

Over 3,000 miles away, under the same sun which shines upon us here, lie the mortal remains of SYLVESTER CLARK SMITH, but the spirit which left its earthly habitation lives and is meeting the reward of his life service in this beautiful world. The earthly ties which bound him to those about him are severed, but love for him and friendly feeling were not buried with his body, but live to bless and revere his memory. His friends will miss him because they knew and appreciated his worth.

Mr. SMITH was not reckoned amongst the great leaders of the House, but belonged to that working class which is expected to delve into and work out the plans of others. While not the pliant tool of anyone, he was subject always to the direction of his party. He was truly a partisan, but a patriot as well. He believed that the good of the country could best be conserved through the party with which he was affiliated. There is a disposition at present to drift away from party organization and consider lightly party ties, but many of the best thinkers hold to the belief that party organization and party success are essential for the country's good. And this was the view of Mr. SMITH.

This life is a mystery. Man is here for a day and passes away. He has in him the spirit of immortality. How that can be and this body abandoned to the elements of nature we can not tell. This is a life of hardship and sorrow. With every source of comfort there seems to come a corresponding sorrow. Earthly ties are formed, love's fires kindled, friendship's charms are enjoyed while men live, but only last for a time, for separations come, bonds of affection are severed, family circles, the most sacred, are cut asunder, and the most fearful afflictions

come whose intensity is measured by the strength of the bonds of affections and interest.

Mr. SMITH has gone, but his going has brought greatest sorrow to those to whom he was most closely bound.

There is consolation in the thought that his life here was a benediction and there is another life where reunions are perpetual, separations never come, and happiness is fully enjoyed.

Mr. HAYES. Mr. Speaker, it is altogether fitting that we should upon an occasion of this kind call to mind and put into permanent form in the RECORD of this House our pleasant memories of our departed colleagues. Although they have passed from the earth where this service can do them no good, it can but stimulate in us who participate in it the tenderest and noblest emotions. When a man has faithfully served the people and added luster to membership in this House, it should be a pleasing duty to bear testimony to his honesty, fidelity, and ability.

I first met SYLVESTER CLARK SMITH at Sacramento about the year 1899 when he was a member of the Senate of California. He impressed me then as a man of great energy and force of character, who had the deepest convictions upon most subjects and the courage to back them up in debate on the floor of the senate. In 1905 I entered the Fifty-ninth Congress with Mr. SMITH, and a continuous service with him as a Member of this House up to the time of his death confirmed me in this first estimate of his character. His service to his constituents was marked by great zeal and industry in their interest, while at the same time he took an active part in legislation not local in character but which affected the whole people of the Nation. Until disease began some two years ago to sap his vitality and undermine his strength Mr. SMITH's discussions of public questions upon this floor were most able and illuminating. He never undertook to discuss a question to which he had not given earnest and exhaustive study. His speeches here were not frequent, but when he did speak he always had something to say that was both interesting and instructive to his colleagues. He never permitted himself to fill up the RECORD with platitudes, vaporous nothings, errors, or technical objections, in order to impress his constituents with his great activity as a leading Member of the House. Whenever he spoke he had a high purpose to serve and never descended to the tricks of the demagogue. While I frequently did not agree with him on public questions, I here and now cheerfully accord to him perfect honesty and loyalty to what he believed to be the highest interests of his country in the discharge of his duties as a Member of this House.

Whatever faults Mr. SMITH had, cowardice was not one of them. That the things he believed and advocated were unpopular seemed to make no difference to him. He represented a constituency almost wholly rural. His people, by a large majority, favored a large extension of the parcel post, but this did not deter him from making a strong speech against it and circulating it in his district. He believed that the extensive enlargement and lowering of rates proposed by those who advocated a parcel post would sound the death knell of the retail merchant, and especially of the small country merchant. He did not believe that this result would be for the ultimate benefit of the country people themselves. Therefore, regardless of the political consequences to himself, he grimly entered the war to prevent the result that he feared. Many of us might well emulate this virtue of courage which he exemplified to a marked degree.

But he has gone from us and from those he loved to other scenes and associations. I think I am disclosing no secret when I say that one of his bitterest thoughts when he faced death was that he must give up his seat on this floor, with its pleasant association of friendships, and must cease his activities in the intellectual and legislative struggles of this great body, all of which was most attractive to him and in all of which he found the keenest enjoyment. Let us hope that his regrets at leaving the earthly activities of his life may have disappeared in the enjoyment of the realities of the heavenly kingdom.

When our friends leave us I like to try to forget the pain of parting by projecting myself into the great beyond, as it were, and participating in the joy of the meeting over there. I like to strive to realize that it is comparatively but a day in the future when each of us must answer the call of the boatman and row over the waters of the dark river to the beautiful shores upon the other side. I love to think of the reuniting of those blessed ties of love and friendship which are not fully severed by death, but only interrupted for a little, waiting the time when we, too, shall be called to take our places with the great company in the beyond. Let thoughts like these fill the hearts of those whom he loved and who loved him and soften their grief and enable them to say, with the poet:

When for me the silent oar
  Parts the silent river,
And I stand upon the shore
  Of the strange forever.
Shall I miss the loved and known?
Shall I vainly seek mine own?
Shall I vainly seek mine own?

Can the bonds that make us here
  Know ourselves immortal,
Drop away like foliage sere
  At life's inner portal?
What is holiest below
Must forever live and grow,
Must forever live and grow.

He who plants within our hearts
  All this deep affection,
Giving, when the form departs,
  Fadeless recollection,
Will but clasp the unbroken chain
Closer when we meet again,
Closer when we meet again.

Therefore dread I not to go
  O'er the silent river;
Death, thy hastening oar I know;
  Bear me, thou life-giver,
Through the water to the shore
Where mine own have gone before,
Where mine own have gone before.

At this point the Speaker resumed the chair.

Mr. HAYES. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD.

The SPEAKER. The gentleman from California [Mr. HAYES] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. KAHN. Mr. Speaker, I first met SYLVESTER CLARK SMITH when he was a member of the senate of the State of California, in the early part of the year 1895, and from the day of our first meeting to the day of his death I had learned to honor, esteem, and respect him. He was a man who held decided views, and resolutely stood by them once he was convinced that he was right. He did not fear political oblivion, even though constancy to a cherished doctrine, the correctness of which he had decided for himself, meant for him political oblivion. He took a prominent part in the discussions that took place in the State senate upon questions that were uppermost before the people of his adopted State of California, and even those who were opposed to him politically admired his clearness of thought and his terseness of expression whenever he debated any of these great public questions. He witnessed a wonderful expansion of the various industries in his own section of California—the great San Joaquin Valley—and was ever alert in safeguarding the rights and protecting the interests of his immediate constituency. He continued in the State senate of California for eight years, and in 1904 was elected to the Fifty-ninth Congress. He soon acquired a commanding position in this House. As a member of the Committee on Public Lands, he was able to be of signal service to the West and the Nation. He was familiar with the great problems affecting water and water rights, timber, mining, and homestead entries, and subjects of cognate character, problems in which the West is vitally interested. The discovery of oil in Kern County, the county in which he had made his home since 1883, gave a marvelous impetus to the development of that section of California. This discovery gave rise to problems that required Federal legislation in their solution. He took an active part in perfecting that legislation.

It was while he was a Member of Congress that the question of the conservation of the great natural resources of the Republic became prominent. While he believed in conservation, he stuck tenaciously to the view that the State in which the natural resources to be conserved were located ought to be the beneficiary of the conservation rather than the Federal Government. In uttering these views he simply expressed the sentiment of the great majority of the residents of the Western States. His fellow citizens believed that he was destined to a career of great usefulness, not only for his own district, not only for the State of California, but for the entire Nation. He was a student and eagerly burned the midnight oil in order to inform himself fully upon any subject that happened to challenge the attention of the Nation for the time being. He was a thinker and always drew his own deductions and his own conclusions after he had fully studied any particular question. Once having decided upon his course, he followed it with determination to the very end.

It was a great shock to those who knew him when announcement was made that he was stricken with a fatal malady and that his days on earth were numbered. He lingered for nearly

two years before the end came. To the very last he had hoped that he might regain his strength sufficiently to enable him again to take his seat in this House and work for the welfare of those whom he represented here. But it was ordained otherwise, and on Sunday morning, January 26, 1913, he died in the very heart of the orange groves of southern California. His honesty, his integrity, his ability, made him a host of friends and admirers, and though the end was not unexpected they were all shocked to hear the sad news of his passing.

In his death this House has lost an able, earnest, effective Member and the people of the State of California an industrious, energetic, and capable Representative.

Mr. PRAY. Mr. Speaker, almost every Sunday during the present session memorial services have been held in the Hall of Representatives for departed friends and colleagues.

It has often been said during the past few weeks that death's harvest in the Sixty-second Congress has been greater than in any previous Congress since the Civil War. I do not know whether this statement is literally true or not, but no one could fail to observe that during the present session of Congress, in the midst of our official activities and ambitious endeavors, the visitations of that mysterious and unwelcome messenger have been more frequent than at any other time in recent years. The crape-covered desk, the wreath of flowers, the vacant chair, and the absence of a familiar face all bear mute testimony of his presence among us and likewise of the pain and grief he has inflicted.

The ceremonial of sorrow this afternoon is in memory of seven Senators and Representatives of the United States, and many eloquent and impressive eulogies have been delivered touching the life, character, and public services of each one of these distinguished men. I can not hope to add anything of worth to what has already been said on this occasion, but I should feel that I were wholly unappreciative of the deep friendship of one who but a few weeks ago was an honored Member of this House if I were to allow this opportunity to pass without paying a last tribute of respect to the memory of the Hon. SYLVESTER CLARK SMITH, who during four successive Congresses held a high place in the confidence and esteem of the Members of this important branch of the Federal Government.

He had been upon the floor of the House but seldom during the present Congress owing to the illness which finally resulted in his death, and which in all probability was largely due to his irresistible passion for work. I never knew a man who was more diligent in the performance of a duty or more faithful in the discharge of every trust reposed in him. In his untimely demise the people of California and of the country at large have been deprived of the services of an able, industrious, and conscientious public servant. But the saddest thoughts of all come to us when we speak of the bereaved widow and children upon whom the loss falls with greatest severity. May the knowledge of his distinguished services to his State and country, his spotless life and nobility of character, and the sweet memory of his devotion as a husband and father mitigate their grief and bring comfort to their hearts in this hour of sorrow. The great State of California will ever honor, cherish, and revere the memory of her distinguished son. SYLVESTER CLARK SMITH began life on a farm in the State of Iowa and worked his way through school and college. He removed to California and, while engaged as a teacher in the public schools, studied law, was admitted to the bar, and later achieved success in his chosen profession. During this period, however, his activities were not confined solely to practice of the law.

For several years we find him engaged in writing editorials for an influential daily newspaper which had been established by his friends and neighbors in the city of Bakersfield. As a lawyer and editor he soon attained prominence in his State, and was later chosen as a Representative from the eighth congressional district to the Fifty-ninth, Sixtieth, Sixty-first, and Sixty-second Congresses. Few men have been better equipped for service in the National House. He was intensely earnest in debate and always possessed a thorough understanding of his subject. He was a profound student and gave to every question that claimed his attention the most intense application. His mind was logical and his deductions accurate. During an intimate acquaintance, extending over a period of several years, I never knew him to compromise with expediency. He possessed in the highest sense the courage of his convictions, and was ever ready to defend them, no matter what the effect might be upon his political fortunes. Neither the sharp criticisms of a partisan press nor the denunciations of political opponents could swerve him in the slightest degree from what he conscientiously believed to be the line of duty. He was an able advocate of any cause he espoused, but his deep sense of justice and fair play rendered him incapable of taking undue advantage of his adversary.

Mr. Speaker, SYLVESTER CLARK SMITH was a self-made man, but he was extremely modest and unassuming, and never made boastful mention of his early struggles and later achievements. His success in life was due to his sagacity, perseverance, and innate honesty. He was candid, outspoken, and sincere, but when he differed from others in respect to a question under consideration he was always courteous and respectful, and never had it in his heart to wound the feelings of another.

His name is written high upon the scroll of honor His life is an inspiration to the young men of the country. I can not believe that our beloved friend and colleague has passed forever from our sight.

There is no death; what seems so is transition.
This life of mortal breath
Is but a suburb of the life elysian
Whose portal we call death.

Mr. NEEDHAM. Mr. Speaker, I ask unanimous consent that Members may have five legislative days in which to extend their remarks in the RECORD.

The SPEAKER. The gentleman from California [Mr. NEEDHAM] asks unanimous consent that Members may have five legislative days in which to extend their remarks in the RECORD. Is there objection?

There was no objection.

THE LATE SENATOR JEFF DAVIS, OF ARKANSAS.

The SPEAKER. The Clerk will report the order of business in reference to the late Senator JEFF DAVIS, of Arkansas.

The Clerk read as follows:

On motion of Mr. MACON, by unanimous consent,

Ordered, That Sunday, February 23, 1913, be set apart for addresses upon the life, character, and public services of Hon. JEFF DAVIS, late a Senator from the State of Arkansas.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 866.

Resolved, That the business of the House be now suspended that opportunity may be given for tributes to the memory of Hon. JEFF DAVIS, late a Member of the United States Senate from the State of Arkansas.

Resolved, That as a particular mark of respect to the memory of the deceased and in recognition of his distinguished public career the House at the conclusion of these exercises shall stand adjourned.

Resolved, That the Clerk communicate these resolutions to the Senate.

Resolved, That the Clerk send a copy of these resolutions to the family of the deceased.

The resolution was unanimously agreed to.

Mr. FLOYD of Arkansas. Mr. Speaker, from time immemorial it has been the custom among civilized nations to honor by public eulogium their distinguished dead. In keeping with that custom this day has been set apart by order of the House for the purpose of commemorating by appropriate ceremonies the lives and characters of a number of distinguished Members of this body and of the Senate, among them the Hon. JEFF DAVIS, of Arkansas, late a Member of the Senate of the United States.

Senator JEFF DAVIS died at his home in Little Rock on January 2, 1913. His career in politics had been marvelous. He was born in Little River County, Ark., on May 6, 1862; he was admitted to the bar in Pope County, Ark., at the age of 19 years; he was elected prosecuting attorney of the fifth judicial district in 1892, and was reelected in 1894, serving in that position for two terms or four years; he was elected attorney general of the State in 1898 and served one term or two years; he was elected governor of Arkansas in 1901, was reelected in 1903, and again in 1905, and served as governor for three terms, or six years; he was a delegate at large to the Democratic national convention in 1904 and to the Baltimore convention in 1912; he was elected United States Senator February 9, 1907, for the full term of six years, and distinguished himself in the Senate by fearlessly assailing all forms of public evil and by his scrupulous fidelity to the principles of the Democratic Party, to which he belonged. He was again nominated for the Senate in the Democratic primary held March 27, 1912, and had he lived he would have been reelected to the Senate by the legislature in January, 1913, for another term of six years. He died at the age of 51 years.

Horace in one of his odes says:

Pale death with impartial step knocks at the palace and the cottage gate.

This sentiment, so beautifully expressed by the Latin poet more than 2,000 years ago, forces itself unconsciously upon our minds to-day. The fatalities of Members of this House and of the Senate during the present Congress have been such that we need not the admonition of poet or philosopher to convince us that neither rank nor station, vigor of intellect nor the prime of strong manhood can stay death's relentless grasp.

The sudden taking off of the late Senator DAVIS in the hour of triumph and in the very acme of his most remarkable and successful public career was a shock to his friends here, to the people of his State, and to the Nation. It reminds us of the vanity of all human aspirations, the end of all human endeavor, and brings us face to face with the full realization of how fragile are the links that bind the strongest and most vigorous to the mystery we call life and of how impelling are the forces which drive the frail crafts in which we are all drifting with certainty to that greater mystery called death. We live in a world which is ephemeral in all things. The flowers bloom and give forth their sweet effulgence for a day. The oak bursts from the earth, grows to majestic proportions, withstands the blasts of winter and the storms of summer for a hundred years, yet yields at last and mingles its dust with the dust of faded flowers. Man born of woman is of few days and full of trouble. It is therefore meet and fitting when one of our comrades passes from among us by the hand of the Grim Reaper that we who survive him, whose lives are underwritten by no guaranty except by God's will and God's mercy, should pause and turn aside for a moment from the toils and struggles of the hour and from the fierce heat of incessant conflict that is carried on in these legislative halls and pay proper respect to the character and virtues of our departed friend and coworker.

I desire to avail myself of this opportunity to pay a brief tribute to the memory of the late Senator DAVIS. Whatever others may think or say about him, I can truthfully say he was my friend, faithful and just to me.

Loyalty to his friends and to his convictions was the element in the character of Senator DAVIS which endeared him to the great masses of the people of Arkansas. Possessing characteristics and faults which it would be idle to disclaim, even in this presence, and which were deprecated by many of his warmest supporters, he was a born fighter, bitter and vindictive toward his enemies, but always true and loyal to his friends, true to his party, true to his principles in whatever cause he espoused, and true to his own convictions.

But his political warfare was not of the guerrilla kind. While he asked no quarter and gave none, yet he always fought in the open. His tactics were Napoleonic. In the great civic battles which he fought for political supremacy in his State he may well be compared with those great military commanders who by bold stands, skillful maneuvers, long marches, and quick movements captured whole armies in their trail and brought back into camp wagon trains, immense food supplies, and great stacks of arms captured from their vanquished foes. He never placated an enemy. He was always loyal to his friends. When he was governor he would publicly proclaim from the stump that no man could receive an appointment at his hands unless he was a white man, a Democrat, and a Jeff Davis man. He lived up to that code during his entire career. The last conversation I had with him was over the telephone on the day he left Washington for his home in Little Rock, just before the holidays. In speaking about the distribution of Federal patronage under the new administration he said to me, "I am going to stick to my friends," and added that he was willing to give up a great deal in the way of patronage in order to secure the appointment of a particular friend mentioned to an important position. And this was no idle or small thing with him. I have known him repeatedly in the midst of heated campaigns—and he never had any other kind—to apparently ignore his own interests in an effort to help out some friend.

As a campaigner and stump speaker Senator DAVIS had few equals and no superior. He was a great crowd drawer. His style was vigorous, forceful, bold, aggressive, and characteristic—distinctly a Jeff Davis style. He was original, resourceful, happy in the use of catch phrases, defiant and austere toward those who opposed him, and loyal to his friends to such a degree that he never failed to incur the bitter hatred of the former and the unwavering confidence and devoted loyalty of the latter. The character of his campaigns and his manner of dealing with those who opposed him necessarily engendered much bitterness and made Senator DAVIS an object of extreme hate by hundreds of good people of the State whose political hopes and aspirations or the political hopes and aspirations of whose particular friends were shattered like frailest glass by the uncompromising opposition of this most remarkable man.

I have never known a man who had greater political courage than did Senator DAVIS. He was often denounced as a demagogue, and yet he never truckled to public opinion. He took his positions boldly, and then molded and swayed public opinion to fit them. Assailed by the metropolitan press and by most of the newspapers in the State he in turn would assail the newspapers, and he is one of the few public men who has had the audacity to assail the press who was not finally crushed by it. His attacks upon the press, however, were but characteristic of the man. He assailed not the weak but the strong. He attacked not the helpless but the powerful. He sought his own preferment not over the unpopular but the popular.

Senator James H. Berry was one of the most popular and deservedly popular men that ever figured in Arkansas politics. He had been a brave Confederate soldier and lost a leg at the battle of Corinth. He had been a State legislator, a circuit judge, governor, and served 22 years in the United States Senate. His honesty, integrity, high character, and fidelity to duty during his long public service were such and his public record was such that even the critical eye of his opponent could find therein no guile. Gov. DAVIS entered the race for United States Senator against him and was elected.

So he lived, so he won his victories, so he was loved, and so was he hated; but he is dead, and as one who knew him long and well and enjoyed his full confidence I pay him this humble tribute. I believe he was honest and sincere but often misunderstood. While undoubtedly ambitious for self-preferment, I believe he stood for those measures and policies which he conceived to be for the best interests of the people of his State and of the country, and that he would have gone down to defeat rather than to have surrendered the principles for which he stood. Vindictive, severe, and often merciless in debate, there was a kindlier side to his nature, and there beat within his rugged bosom those gentler feelings of love, friendship, sympathy, and affection that bound to him thousands of voters in every contest of his life. He reciprocated the feelings and affections of those who stood by him in a marked degree. In his friendships he followed the advice given by Polonius to his son. The friends he had and their adoption tried, he grappled them to his heart with hooks of steel. All over Arkansas to-day are thousands of people who will long revere his memory. From the southern border of the State, where the rich magnolias bloom; from the delta lands along the Mississippi, where cotton is king, to the great northwest, the land of big, red apples, where the apple blossom, emblem of the State, sheds its perennial fragrance over orchard, field, and farm, in stately farmhouse, in unpretentious cottage, in cabin, and in hut, in every hamlet, in every village, and in every town and city in the State, there are those whose hearts are bowed with sorrow at the passing of JEFF DAVIS. They are those who supported the Senator in all his contests and to whom he delighted to refer with pride as members of the old guard. They believed in the man and in his cause. They looked upon him as the friend, the champion, and the defender of the rights of the great masses of the people against the encroachments of predatory wealth and the unjust exactions of corporate influence and greed. They are the men who promoted him to place and power and kept him there until the All-Wise Ruler called him from the field of his earthly activities. To them words of praise are idle. To them encomiums are useless. They were his devoted friends and followers in his lifetime, and now that he is dead they will cherish his character, his virtues, and his deeds as a rich legacy, and will teach their children and their children's children to revere his name.

> You may break, you may shatter, the vase if you will,
> But the scent of the roses will cling 'round it still.

My friendship and acquaintance with Senator DAVIS were not due to politics. I first met him and made his acquaintance more than 30 years ago, when we were both students in the University of Arkansas. I was also well acquainted with Miss McKenzie, whom Mr. DAVIS afterwards married. She also was a student in the university at the same time.

I therefore feel that I ought not to close my remarks on this occasion without a brief reference to his family and to the domestic life of the late Senator. Senator DAVIS was twice married, and he left surviving him a widow and aged mother and eight children by his former wife. The first wife of Senator DAVIS was Miss Ida McKenzie, already referred to. She was a lovely, beautiful girl, the daughter of a minister. She developed into a noble Christian woman, devoted to her husband, to her children, to her church, and to her God. She died only a few years ago and was mourned by the entire people of the State. His second wife was Miss Lelia Carter, a daughter of Dr. Carter, one of the early settlers of Arkansas. She is the sister-in-law of Judge Virgil Bourland, and her family is prominent in all the walks of life. I have only a casual acquaintance with the present Mrs. Davis, who survives the Senator, but have every reason to believe that she, too, was devoted to her husband and deserves the sympathy of all in this hour of great sorrow and affliction.

If there be those who still harbor asperity against the memory of JEFF DAVIS, if they could visit the Davis home in Little Rock and see that family of bright and intelligent boys and girls, now fatherless and motherless, and see that aged mother now upward of 80 years mourning the death of her only child,

bowed in grief at the loss of one whose notable career is their every pride and whose strong arm was their every support, I feel that every emotion of envy and hatred would die out and friend and foe, antagonist and follower, with bowed heads would commiserate the untimely death of the junior Senator from Arkansas, and that the common and silent acclaim of all hearts would be "Peace to his ashes."

Mr. MACON at this point assumed the chair as Speaker pro tempore.

Mr. RUSSELL. Mr. Speaker, Arkansas and Missouri are sister and adjoining States, with many interests in common, and such frequent and intimate commercial and social intercourse exists between the people of the two States as to make their aspirations and hopes so similar as to be almost identical.

These States are bordered on the east and south by the Mississippi River, and some of its tributaries flow through both States, and so the interests of the people in the questions of river improvement, levee construction, and drainage problems have been mutual, and the cooperation of all of their citizens has been invited and exerted in the promotion of such improvements.

In view of our geographical positions and our mutual interests, as well as our friendly relations, the Missourians in this House have felt unwilling to remain silent on an occasion like this, when the Representatives from Arkansas pause for an hour to pay a tribute of respect to the life and character of one of her distinguished sons, and as nine of the counties of the district that I have the honor to represent border upon the Arkansas State line, it was thought appropriate that I should speak for our State.

I had the good fortune and the pleasure of knowing quite intimately and well the deceased Senator, and watched with great interest his remarkable and most successful political career. I first met him and heard him speak at Hot Springs, Ark., in support of his candidacy in his first race for governor. He was at that time the attorney general of the State, and in his address he recounted his official acts and efforts directed against the great combinations and monopolies that were then just beginning to add to the burdens of the consumers of the country. His address was so plain and yet so pleasing and forcible he convinced me that if he could reach and speak to all the voters of the State his victory would certainly follow. He did win the nomination and election, and was twice reelected governor of that State. Afterwards, as is well known, he was elected to the United States Senate, and renominated as the choice of his party for a second term.

Like all mortal men Senator DAVIS may have had his faults, but he possessed many noble qualities and generous impulses, and among the many good traits of character that made him popular, and for which I commend him to-day, was that he loved and trusted the common people, and his chief ambition in life was to faithfully serve them.

Senator DAVIS and I entered congressional life at the same time, and on the same day that he first took the oath of office in the Senate I for the first time took the oath of office as a Member of this House. On Sunday, the day before we entered upon our official duties, I met him at the Calvary Baptist Church in this city, and after services we walked together to the National Hotel, where he was then living.

I now distinctly remember that in that conversation he said to me: "RUSSELL, I don't believe this life is going to suit me. I appreciate the great honor of a seat in the United States Senate, but I believe I would prefer to be at home with my family and friends in Arkansas."

He thus early realized, as many public men do realize, that to serve in Congress, while it is in many respects delightful and desirable, carries with it many sacrifices of the pleasures and comforts of a home life.

Senator DAVIS often made speeches for me and other Democratic candidates in my district, and was always a very popular and a very effective stump speaker. He had many friends in Missouri, who greatly admired his personality and who enjoyed his addresses.

For the purpose of illustrating one of his traits of character I desire to relate this circumstance: On one occasion he made a speech at Dexter, in my district, to a large audience, and by accident I met him afterwards the same evening at Poplar Bluff and asked him about the meeting. He said: "I had a fine audience, and gave them an old-fashioned Democratic speech, and among other things showed up your Gov. Folk in his true light." I replied, "Now, Governor, you have several appointments to speak for me and the Democratic Party in my district. You can do me much good, and I am glad to have you speak for me, but Gov. Folk is my friend, and is also making speeches for me. He is the Democratic governor of Missouri, and I must protest against your abusing or even criticizing him." He became angry and said: "If I can't speak as I please, I will not speak at all, but will cancel all my other appointments in your district."

I told him I was sorry to have him do so, but if he could not desist from his criticism of the governor of our State I thought it better that he cancel them, and he did so. He went to Little Rock the same night, and on the next day I received from him a telegram, in which he said:

DEAR RUSSELL: I wire you to say that you were right and I was wrong. I will fill my appointments in your district, and will not again criticize your governor.

He did fill his other appointments to my entire satisfaction and the great pleasure of his audiences.

I have spoken of this incident to emphasize one of the noble qualities of his nature. If he in the hour of excitement or under the influence of momentary anger said or did an improper or indiscreet thing, he was, after due reflection and deliberation, the first to acknowledge his error and to seek to correct the mistake made or any injustice done.

Senator DAVIS was an honest and a conscientious public servant; but he, as most other public men do, believed in government by parties, and always had perfect faith in the wisdom and the justice of Democratic principles, and when a majority of his party had spoken upon any question he was always loyal to its verdict and its announced policies.

I once heard a prominent public man, when speaking of some minor criticism made of him, say that whatever may be said of JEFF DAVIS and his mannerisms, no man can truthfully, from a party standpoint, criticize a single vote he ever cast during his six years' service in the Senate.

Mr. Speaker, this was a splendid tribute to our deceased friend, and as the votes cast by a representative in Congress is the truest test of his usefulness as a servant of the people and of his fidelity to his trust, no greater compliment could have been expressed of Senator JEFF DAVIS. I believe the statement was true and the compliment well deserved.

Mr. CULLOP. Mr. Speaker, when JEFF DAVIS, a United States Senator from Arkansas, fell asleep in the cold embrace of death one of our great public characters was removed. For a decade he had been a conspicuous figure in this country and had attracted much attention because of his bold and aggressive attitude on many of the great questions which, during that time, have attracted public consideration and have undergone public review.

It can be truthfully said of him that in such matters he was in the front line of the battle and never in the rear. He had views on great questions and the courage to express as well as the ability to defend them. No one will ever charge that in his 20 years of public life he ever evaded, dodged, or avoided an open avowal of his position on any matter of great public importance, but always in the open he declared his attitude and the reasons he had for it. He was not a "trimmer," he did not wait to learn whether a measure was popular or unpopular, to find out whether it would win praise or condemnation, but he viewed the question as a public utilitarian, and if he arrived at the conclusion that public weal required it he gave it his unqualified support and attempted to secure its adoption. In this he was open, candid, and earnest. Public welfare of the many who bear the burdens of Government was the greatest concern to him, and often in defense of their cause he incurred the opposition of the few and earned their displeasure, but to him this was of no consequence; he rather liked than disliked it, because he knew his position was defensible and his purpose would be approved by the masses whose champion he was, and he did not disguise his position.

For 20 years he was a public servant, rising step by step, until he had received the highest honors the people of his State could bestow upon him. He was elected prosecuting attorney of his judicial district, and performed his duties so satisfactorily that he won for himself a reputation throughout the State and as a reward he was elected attorney general, and in this office he displayed such splendid ability that he was elected governor of his State three times in succession, and from there promoted to the United States Senate as a tribute of admiration by the people of his State, and was renominated with the assurance of a reelection for a second term. He deserved every honor his people bestowed upon him. He rose rapidly in the esteem of his people; they recognized his worth as a public servant, and in return they gave him

their confidence and conferred honors upon him. He was their idol and to him they looked as a leader in whom they could repose confidence and not be betrayed. They knew when their rights were invaded they could safely appeal to him for protection and he would defend them. He delighted to champion their cause and plead for their relief. His heart beat in unison with theirs and his very soul sympathized with their wants and welfare. He had endured adversity; he had felt its discomforts, and his ambition was to relieve all who were so unfortunate as to endure its deprivations and suffer its punishment. To elevate all such was his dream by day and by night, and whenever opportunity was offered he took advantage of it to ameliorate their condition. This was the reason for his great popularity; this was why his constituency confided in him and enabled him to enjoy their unbounded confidence, which he never betrayed. It was the one possession he guarded above all others as sacred.

Because of his bold and aggressive position on questions in which he took an interest he invited opposition and made enemies. He never conciliated any such made from such cause; overtures for compromise were unknown to him; the battle once on had to be fought to a final conclusion and the result accepted as the arbitrament of the question. Such type of men as Senator DAVIS is of great benefit to the world; they are the class of men who push the wheels of progress. True, they are called extreme or radical, but the fact remains that it is because of their advanced position that they overcome the reactionary positions taken by the opposing extremists and bring about the golden mean in the settlement of policies and thus accomplish direct results of much moment to the people. He did a good work, and his people are proud of the result. His life was not lived in vain.

But, Mr. Speaker, one of his most admirable traits was his loyal devotion to his friends. This, above all others, endeared him to his people. He never forgot the friends of his early years when struggling to lay a foundation for the support of the splendid career he made for himself and the service he rendered the public. They had an abiding place in his heart, and he rewarded their gratitude whenever occasion permitted. This quality is always commendable. He died at the beginning of a new year, as a new era was dawning with his star in the ascendancy, in the prime of life, when the future was full of promise, when greater opportunities were unfolding to him a new field where he could employ his abilities for the benefit of his constituents, to elevate their condition and secure for them the just and fair administration of the powers of the Government established for the blessings of a liberty-loving people. His genial face, manly form, and friendly grasp of the hand will be missed; they will be known no more. In his death the public service loses a valuable servant, his State its foremost citizen, his people a devoted friend, and his family a loving husband and a kind and indulgent father.

Mr. OLDFIELD. Mr. Speaker, on this occasion we are assembled for the purpose of paying tribute to the life, character, and public service of the Hon. JEFF DAVIS, late a Senator from the State of Arkansas. Mr. Speaker, this is to me a sad, a solemn occasion, for Senator DAVIS was my personal and political friend.

Senator DAVIS was born in Little River County, Ark., May 6, 1862, was educated in the public schools and the university of his State. He was admitted to the bar at the early age of 19 years. While a successful practitioner of the law, as a great many young lawyers do, especially those who live in small cities and towns, he entered politics early in life and was elected prosecuting attorney of his circuit in 1892 at the age of 30 years. He was reelected to this office, and it is said of him that he made one of the ablest prosecuting attorneys his circuit ever had.

Senator DAVIS entered State politics at a time when some of the brainiest men Arkansas has produced were in power. However, he brooked no obstacle and pressed forward to attain the goal of his ambition. He was bold and aggressive and immediately became the dominating figure in the politics of his State.

Mr. Speaker, if I were called upon to indicate the trait of character most developed in Senator DAVIS, I would unhesitatingly say it was his determination to succeed in his undertakings—his will power.

There is no chance, no destiny, no fate
Can circumvent, or hinder, or control
The firm resolve of a determined soul.
Gifts count for nothing,
Will alone is great,
All things must give way
Before it soon or late.
What obstacles can stay the mighty force
Of the sea-seeking river in its course,
Or cause the ascending Orb of Day to wait?
Each well-born soul must win what it deserves.
Let the fool prate of luck, the fortunate is
He whose earnest purpose never swerves,
Whose slightest action or inaction
Serves the one great aim. Why,
Even Death stands still
And waits an hour, sometimes,
For such a will.

In 1898, at the age of 36 years, Mr. DAVIS was elected attorney general of the State of Arkansas, and at the age of 38 years was elected governor of his State, and to this office he was twice reelected, being the only man to serve our State three times as governor, and in passing, it may be said that his last contest for the governorship was the fiercest and most terrific political battle ever waged in Arkansas. In 1906 Gov. DAVIS was nominated by the Democratic Party of his State for the office of United States Senator, defeating former Senator Berry, a distinguished veteran both of peace and war, one whom the people of Arkansas had rejoiced to honor, and was elected by the legislature of 1907. He was renominated in 1912, but before the legislature convened to carry out the will of the people and reelect him, after answering to the roll call of the Senate for nearly six years, he was suddenly summoned by the roll call of eternity. Senator DAVIS served nearly six years in the United States Senate, and I have never heard any man in Arkansas criticize a single vote he cast in that body. He was a strong man before the people and he always took his fights directly to them. His idea of government was that the people should rule. He thought the best government was the one closest to the people, and his battles were always for the purpose of bringing the people and the Government closer together.

Senator DAVIS was without doubt the most resourceful campaigner the State of Arkansas has seen. He was effective before his audiences, because he took the people into his confidence and appealed to the masses for support, and, as evidenced by his remarkable career, his appeals were not made in vain. To his friends he was true and loyal, as true as the stars to their appointed courses. He never forsook a friend or forgot a favor, and his loyalty to his friends was one of his great sources of strength. In his campaigns he was wont to refer to his friends as the "Old Guard," and when he sounded the call for battle the old guard was always ready for the fray, and when the ballots were counted they invariably showed that the "old guard" had stood firm and JEFF DAVIS had won.

Senator DAVIS was not one of those who went with the current, but, on the contrary, he spoke out boldly the things he believed and the policies he advocated. If he was for or against a proposition of policy or legislation, he boldly told the people and gave them his reasons. In his career as governor and Senator he always championed the side of the plain citizen instead of the special interests. His career, indeed, lends hope and encouragement to those who depend upon the support of the people instead of relying upon the agents of predatory wealth. It is an inspiration to the youth of the land who, without wealth, powerful friends, or family, must depend upon the justice and generosity of their countrymen.

In campaigns Senator DAVIS was his own manager, and I have been told by some of his close political advisers that he had an intuition which seemed almost marvelous. His combinations often appeared impossible and his plans impracticable, but under his leadership and in his hands simplicity marked their development and success vindicated their adoption.

Mr. Speaker, death is the great leveler.

In the democracy of the dead all men at last are equal.
There is neither rank nor station nor prerogative in the republic of the grave.
At this fatal threshold the philosopher ceases to be wise, and the song of the poet is silent.
Dives relinquishes his millions and Lazarus his rags.
The poor man is as rich as the richest, and the rich man is as poor as the pauper.
The creditor loses his usury, and the debtor is acquitted of his obligations.
There the proud man surrenders his dignity, the politician his honors, the worldling his pleasures; the invalid needs no physician, and the laborer rests from unrequited toil.
Here, at last, is nature's final decree in equity.
The wrongs of time are redressed; injustice is expatiated; the irony of fate is refuted; the unequal distribution of wealth, honor, capacity, pleasure, and opportunity, which make life such a cruel and inexplicable tragedy, ceases in the realm of death.
The strongest has no supremacy, and the weakest needs no defense.
The mightiest captain succumbs to that invincible adversary who disarms alike the victor and the vanquished.

Mr. Speaker, a tribute to the life and character of Senator DAVIS would be incomplete if reference were not made to the beauty of his home life. He was a devoted and loving husband,

a generous and indulgent father, and the tenderness with which his family clung around him and to him marked the depth of their love and affection.

The SPEAKER at this point resumed the chair.

Mr. TAYLOR of Arkansas. Mr. Speaker, I have been personally acquainted with the late Senator JEFF DAVIS for more than 25 years, and while we had our differences now and then, yet we were always friends.

Senator DAVIS in political life was remarkably successful. He held the office of attorney general of his State for two successive terms, the office of governor for three terms, and was then elected to a seat in the United States Senate, and had not the "grim messenger with the inverted torch beckoned him to depart" the Legislature of Arkansas, which is now in session, would again have elected him Senator. All the days of his life he was an unswerving Democrat and always stood by the nominees of his party with vestal fidelity. As a political campaigner he had no superior in the State. His friends and supporters, as also those who did not agree with him, attended his political meetings in great numbers. No man in the State approached him as to audiences in his speech-making tours, and his friends and supporters loved him, and their devotion to him was indeed beautiful to behold; they believed in and stood by him and for him on all occasions.

The Senator was not what is commonly called an eloquent speaker, neither was he a word painter, but he entertained and interested his audience from first to last. In small counties often have I witnessed as many as from 1,500 to 2,000 people standing upon their feet for two hours, hanging upon his every word and frequently shouting their approval of his utterances. His friends and followers had absolute confidence in the belief that he was truly interested in their welfare, not only their happiness and prosperity, but that he had the courage and ability to aid in bringing about results that would be helpful to them and the people of this country.

Senator DAVIS was born in Little River County, Ark., but resided in Pope County of this State for something like 40 years, and whose people were proud of his successive achievements. The people of this county were a conglomerate of the highest independence, coupled with a county clannishment worthy of Scotland's proudest chiefs. They loved the United States high above any other country, but loved Pope County more. All Arkansans were good to them, but a Pope County man had first call on their affections and regard. Senator DAVIS grew to manhood among this people and imbibed their characteristics. They knew him as no other people knew him, and honored him. One indication of individual worth and power is always associated with local reputation. The very intimacy of neighborhood affairs precludes the lengthened growth of incompetency. Weakness for a while may pass as strength, but the argus eyes of one's near neighbors soon disclose the wound.

It is to Senator DAVIS's highest credit that for nearly 40 years he lived with the people of one county, and all that time had their good will, respect, and their support.

Ability may take the form of the trained judicial mind, it may appear in the silver tones of the accomplished orator, it may touch the silent room of the thinker, or walk hand in glove with the artist or artisan. Ability may be acclaimed by the expert student and the verdict accepted, but there is an ability which rests upon an innate knowledge of popular thought and sentiment, an ability which knows the people, their weaknesses and strength, their wrongs and their aspirations. In this sense Senator DAVIS was a man of the people and by easy steps essayed their championship. In this he won the admiration of his home people and largely that of the people of the State. We may quarrel with his deductions and decry his methods, but the fact remains that the people largely believed in and followed him. This insight into the modus operandi of popular thinking and the ability to touch the mechanism into response made him great. No other man in Arkansas had this power in kind or degree as he. The people of the State were shocked at his death. Without the trappings of wealth or the aid of a great family name he plunged into the vortex of popular rights and made for himself a name which reached far beyond the borders of his State. Among the great and learned he was not supreme, but among the plain people he was a conquering Achilles. When power crowned his career he still remained a people's man and he died in the harness. He rose, so to speak, from obscurity to the heights of renown and died on the crest of the wave. His rise was not meteoric, but steady and sure. He reached the sun-clad heights of his ambition and passed away with the illumination undimmed and left his countrymen the record of his life work.

On Sunday afternoon, January 5, 1913, Senator DAVIS was laid to rest at the capital city of Little Rock, in the beautiful Mount Holly Cemetery in the presence of 15,000 people; and in the presence of this multitude of people and standing by the grave of the dead Senator, Judge Jeptha Evans, of Booneville, Ark., a long-time and devoted friend of Mr. DAVIS and one of Arkansas's most able circuit judges, delivered a very able and eloquent address upon the life and character of Mr. DAVIS. I read here now a portion of his remarks:

When a giant carrying easily the loads of life in the fullness of his power falls dumb and prostrate on the earth, heartstricken by the darts of death, we, his surviving friends, gather in confused agony around his unbreathing form and unavailing tears spring unbidden to the surface and baptize with sorrow's sacred streams the pale countenances of those who loved him while he lived. How utterly powerless do we feel in death's mysterious presence.

I knew this tower of strength that lies in human ruin before me for a long term of years. Senator DAVIS was reared in the same section of the State where I have lived since boyhood. We lived about 50 or 60 miles apart, and I am his senior by a year or two. I was born at the beginning of the fratricidal struggle between the States, and he just as the conflict became flagrant. His father was a minister of the Baptist Church and mine is a minister in the Methodist Church, and both bore arms as members of the Arkansas troops in the Confederate Army. On reaching manhood Senator DAVIS went to the law, and I have made some struggling efforts in the same direction.

HIS CAREER AS AN ATTORNEY.

I knew Senator DAVIS first as a young lawyer at the bar. He was from the beginning a man of very marked ability and adaptation to the law. I was frequently in his judicial circuit and often witnessed his forceful strength. He was possessed of a legal mind of the intuitive kind. Where other men painfully sought out precedents and tried to follow legal principles along centuries of deviating counsel in order to ascertain the law, young DAVIS, with the precision of first-hand knowledge—of intuition—announced the right result.

Senator DAVIS was one of the finest trial lawyers I have ever known. He forgot nothing, overlooked nothing, neglected nothing, and saw through everything. The principles of the law favorable to his client's cause he stated clearly and handled with consummate ability. The evidence entitling his client to win he presented to courts and juries with such force that avoidance of the result he sought was all but impossible. He could come nearer than any lawyer I have ever known ignoring out of the judicial equation the principles of law and the testimony of witnesses unfavorable to his client's side.

NEVER TRIED CAUSES OF THE RICH.

He was not very well suited to try a cause for a rich citizen against a common citizen. Indeed, I do not think he ever engaged in such a service. His great delight was to champion in court and vindicate the rights of the poor and weak against the rich and strong. His feelings and sympathies were always intensely human. While he was one of the ablest and most successful prosecuting attorneys the State of Arkansas ever had in its commission, I have frequently heard him thank God that no man was ever executed as a result of his four years' service as prosecuting attorney of the fifth judicial district.

His legal successes were always phenomenal, and at the time of his death his law firm, from every quarter of the State, was looked to as the champion of the weak against the strong, as capable of securing in courts of justice the legal right of the poor against the illegal right of the rich. The Lord Eskine, lord by divine right of poverty, ability, sympathy, and eloquence of the Arkansas bar lies voiceless before me. He has gone to a higher court, a court where justice never miscarries, where the juries are never bribed, and where the judge never nods.

Mr. Speaker, when death comes the loved ones left behind "must tread the wine press alone"; to them words are but empty things, but we always feel deep sympathy for the bereft loved ones of the dead, and if we could relieve the stricken hearts in the lonely home of the departed Senator, what a joy it would bring to each of us—this we can not do. This great separation of husband, son, mother, wife, father, and children can not be spanned on this earth. Oh! there is so much parting in this life. Listen to the poet as he sings:

All are scattered now and fled,
Some are married, some are dead;
And when I ask, with throbs of pain:
"Ah! when shall they all meet again,
As in the days long since gone by?"
The ancient timepiece made reply:
"Forever—never;
Never—forever."

Never here, forever there,
Where all parting, pain, and care,
And death and time shall disappear
Forever there, but never here;
The horologe of eternity
Sayeth this incessantly:
"Forever—never;
Never—forever."

Mr. JACOWAY. Mr. Speaker, of all the sweet and sacred ceremonies that precedent has established in this body, none, I think, is more beautiful than the custom of meeting here to do honor to the memory of those of our friends and colleagues who have fallen before the sickle of the Reaper. This is the opportunity and the occasion for the expression of our sentiments of love, regard, and appreciation for those who have gone from among us, who have crossed over the river and rest under the shade of the trees.

When, however, I come to the knowledge that it is my sad duty and my privilege to address you on the life, the character, and the public service of the late lamented Senator DAVIS, the

thought that lies uppermost in my mind is the realization of the poverty of my own vocabulary, the fact of the poverty of all human speech to do aught but to depict in barest words the history of this man. Beyond that words are but vain and futile. The archives of his State and his Nation bear witness to what he has been, but there is no power under Heaven to gauge what he might have been, and none of us can know the work he left unfinished. God has written the last chapter of his life, and the angels have closed the book.

Senator DAVIS was peculiarly a product of Arkansas. During all the days of his life he was an actual resident of the State. Born in Little River County May 6, 1862, in the early days of that grim cycle of American history, when the plowshare was left to rust in the furrow while brother strove with brother in bloody conflict, his boyhood was not greatly different from that of the other youths of the period. A simple country lad, he went his way about his boyish tasks uncomprehending, I dare say, the distress and the disaster that the war had laid upon his country, and perhaps but dreaming only in the vague and unformed way of childhood of the measure of greatness that some day was to be given him.

But after the inscrutable manner of fate, he was early stamped as a favorite child of fortune, and it was decreed that the simple and honest love that he bore for the Commonwealth should some day be paid back to him until his name was a household word from hovel to hall, that he should hold a place in the hearts of his people second to none and a position in the council chamber of his Nation.

The genesis of his political career dates from his admission to the bar when but a boy of 19 years. Eleven years later he was elected prosecuting attorney of the fifth judicial district of Arkansas, comprising the counties of Conway, Johnson, Pope, and Yell. Thence his career was a triumphant march onward. Measuring legal lances with one of the most able and astute bars of the whole State in daily warfare, his early training equipped him well for the high honors that were to follow. Four years later he became the attorney general of the State and in 1901 he was made chief executive. He was reelected in 1903 and again in 1905, establishing a record that has never been equaled before or since. Had his political career ended here, after this chain of unbroken successes, it might have been sufficient for the average man's ambition, but above and beyond was the ultimate goal. Its attainment seemed to be the inevitable end of his political policy—to bring nearer and dearer to him his friends, to stretch out his magnetic hand to others, until all vied with each other to search the gardens of their affection for flowers to weave into wreaths with which to crown him. On February 27, 1907, he was elected to the Senate of the United States, serving his first term with the exception of a few days. Had he lived he would have succeeded himself in January of the present year.

Whether in the trials of causes in the court room or in the feverish campaigns that marked the hotly contested battles he waged for political supremacy, he was known as a fighter, nor does history produce a general who laid his plans or adapted his tactics to the need of the hour with a skill more consummate than his. As a campaigner few knew human nature better than he, and as a public speaker he possessed an invincible potency, and few could gauge an audience with an accuracy more unerring than he. Politically he created his own sentiment and asked no man to go where he himself would not lead. A master in the art of invective and satire, it perhaps may be that he was sometimes severely caustic, but friend and foe alike admitted his power.

Born, as it were, in battle, even as the fragrance of the flowers in his early boyhood was blent with the acrid odor of burnt powder, so in later years the flowers of friendship that grew along the pathway of his career mingled their odor with the scent of hot fights for power and place. The early years found him a wondering boy, often pausing, perhaps, to listen to the dull, dead boom of cannon; and the later years find him a strong man, girt for the battle, a leader and a chief. The secrets of warfare were his, oftentimes the wounds and the hurt, but life had been lavish with its laurels, and even in the thickest, hottest of his campaigns he was spurred and inspired by the memory of other hard fights fought and won, and the knowledge of the multitude, the common people, if you will, who looked on him as their champion and whose prayer was that their leader could not fail them.

Such was his public life. That he was loved by those whose trust he had, whose leader he was, the great concourse of people, 15,000 strong, who stood at his open grave testifies. From the home of his boyhood they came, from the field and the forum near and far. Among them stood a coterie of the Nation's most distinguished statesmen, the emissaries of his Government, who had journeyed thousands of miles to do him honor, and all listened with bared heads to the rites that consigned him to the earth from whence he sprung.

The love and esteem in which he was held was intensified and deepened and broadened in his own home, where he ruled as a sovereign, a friend, and a comrade in one, a kind, a devoted and indulgent father, and a loving husband. Out beneath the stars in Mount Holly Cemetery at Little Rock he sleeps beside the Christian wife and devoted mother who went before him into the great beyond, while in the hushed home, with heartache and heartbreak, the lovely wife prostrated with grief, the aged and gentle mother who gave him birth, the stalwalt sons and the womanly daughters he left, mourn his untimely death.

There is, Mr. Speaker, a consummate tragedy in the death such as that which overtook Senator DAVIS in the prime of his life and the full flower of his career. It was not the mustering out of the wayworn warrior at the end of the campaign, nor the docking of the ship at the home port. It came upon him with the stealth of an assassin, striking without warning and without mercy, unheralded and unanticipated. A moment he stood, a strong man in the pride of life, and then he fell. Like that mysterious realm that lies beyond the frontier of life, so also are the ways of death and its manner of coming beyond the power of human mind to compass. Some die in the dawn of life, in that sweet world that is peopled only by loved ones, and knows no rule but a mother's loving guidance; and some go out with the twilight, with the knowledge that life could hold no more. But Senator DAVIS died at the noontime of his life, a strong man full of force and power, a sachem in the council. Some one has written:

> Yet after all, it may be best, just in the sunniest, happiest hour of all the voyage, while eager winds are kissing every sail, to dash against the unseen rock, and in an instant hear the billows roar above a sunken ship. For whether in mid-sea, or 'mong the breakers of the farther shore, a wreck at last must mark the end of each and all.

Mr. Speaker, for us all Time is beating funeral marches to the tomb, and "neither wealth nor station nor prerogative" can stay the coming of our dissolution. In death there ever remains an unfathomed, unknowable mystery and a philosophy that passeth understanding. It is the transition from the finite to the infinite, the veiled link beteen time and eternity. We know that yesterday this man was here, high in place and power, loving and beloved—vital with the rich red blood of life. We know to-day that the finger of God has touched him, and that he sleeps and is not; that these halls, or any earthly halls will never again shelter his presence or ring with his voice; that he has entered into the state that knows no caste or class, no place or power. Whether it was for the best I can not say. I do not know, nor does any other man. But I know that God is, that a deathless force lives on, and that long after the moss has grown green on the stone that marks his resting place, his name will still be bright on the pages of his Nation's history, and his memory deeply embedded in the hearts of his countrymen.

[Mr. SISSON addressed the House. See Appendix.]

Mr. GOODWIN of Arkansas. Mr. Speaker, out of the great masses of the people few men rise to eminence and distinction. The Great Creator is not lavish in stamping the mark of genius upon his creatures. Under our scheme of government every man stands upon an equality with every other citizen of this Republic, but that all have been accorded the same treatment I shall not contend.

The world's progress has been made not by its leaders but by the toilsome millions whose voice is never raised in the Nation's councils, yet whose toil, denial, and sacrifices have wrought the glories of civilization. But the world's progress has been largely directed through its leaders. A swarm of bees readily becomes confused and disorganized with the loss of the queen bee. A flock of geese without its leader is chaotic and without direction. An army without its officers becomes merely an aggregation of men and can accomplish nothing. A church without its pastor soon becomes as a craft that floats adrift upon the turbulent sea of worldliness, without rudder, compass, or even harbor for its destination. So with the history of mankind. The great masses of mankind are engaged in the various vocational callings, bread winning, and by their virtues, labors, and patriotism constitute the Nation's greatness. But every community, State, and nation has its leaders in thought and action. Some one must lead and be trusted. The man of high resolve, clean purpose, and with ability to command is naturally chosen, oftentimes by common consent, as the leader and spokesman of a people. By nature, education, and talent he seems born to lead.

The late Senator DAVIS was a man of many gifts. We are yet too near his active career to give proper perspective to his

great figure. Many of his activities already stand out in bold relief, but time can only give him his proper place in history. Essentially his greatest asset was his almost unerring judgment of men. Human nature had evidently been a great study with him, although naturally gifted along this line.

Most great leaders have been students of human nature. It is the greatest of all studies, as no problem of social life can be solved unless the people and their environment are understood. Pope understood this, as he so admirably expressed the thought in his great Essay on Man:

Know then thyself, presume not God to scan;
The proper study of mankind is man.

Born 53 years ago in Little River County, Ark., of poor but honorable parentage, Mr. DAVIS grew to manhood in the mountains of northwest Arkansas among the plain, unpretentious, patriotic people of that part of the State. Here, no doubt, the simple, natural manners and the homely sayings of these good people early stamped their impress upon young DAVIS, and these clung to him to the last.

The early environment of Abraham Lincoln, his knowledge and sympathies of people struggling for existence, their quaint expressions, and the homely illustration ever ready at his tongue's end always remained with and became a part and parcel of Mr. Lincoln's life and contributed much to his greatness. The greatest fortune that can come to a boy is to be reared upon a farm, to know life in its simplicity, to witness the struggles and achievements of men in all walks of life, sharing their sorrows and partaking of their griefs. It was in such an atmosphere that Mr. DAVIS was reared.

After attending the University of Arkansas for a while, Mr. DAVIS later attended the law department at Vanderbilt University, at Nashville, Tenn., and was admitted to the practice of law at the age of 19, his disabilities of nonage having been removed by an act of the legislature of his State.

At this early age he launched out actively into the practice of law, and soon became a strong, popular advocate before juries, and later was in great demand as a political campaign orator.

Always an intense partisan, his political speeches bristled in epigram and in denunciation of issues that ran counter to the tenets of his own party.

In 1892 he was elected prosecuting attorney for his judicial district, and reelected in 1894. In 1898 he became attorney general of his State, and in 1900 he was elected governor, and again in 1902 and in 1904, thus serving three terms as chief executive of his State, having broken all records for continuous service in that office. Upon an occasion like this it would be impossible to go into an analysis of the turbulent period during these six years as governor and the two years he served as attorney general, unless occupying time unusually granted upon these occasions.

Although opposed by men of talent and lofty patriotism, Mr. DAVIS was close to the hearts of the great masses of the people, and easily distanced all of his competitors, nor was he at any time in imminent peril of meeting with an adverse verdict of the people. During these eight years he was the stormy petrel in the shock of political combat, and there beat ever and anon about his strenuous, picturesque form the bitterest invective and denunciation by his enemies or the extravagant encomiums and the benedictions of his friends.

There have been few public men whose lives were so strenuous in the public service or more resolute in the determination to conquer and overcome all obstacles that beset their political pathway than was that of the late Senator DAVIS.

The political campaigns of Mr. DAVIS were always attended by an outpouring of the people for many miles around the places where he was advertised to appear. Men, women, and children would come by private conveyance for many miles and hang upon his every word, and when he died thousands of his fellow citizens believed that the foremost champion of human rights had passed away.

After coming to the Senate the law firm of which Senator DAVIS was a member built up a most lucrative practice, consisting largely of litigation arising from personal injuries. Possibly Mr. DAVIS as a lawyer was at his best when representing a mangled client who had been injured by a public carrier in the discharge of his duties. Here he could give vent to his great emotions, and by picturing the physical condition of his client and the alleged reckless and wanton negligence of the defendant company wrest a handsome verdict as a compensation for injuries sustained.

By temperament as well as by predilection Senator DAVIS would not have been a success as counsel for a great corporation. His sympathies naturally were with the weak rather than the strong. I would not say that he was a great lawyer, so far as an accurate, detailed, and labyrinthal knowledge of the law is concerned, for had he been a minister of the Gospel many of his brethren would have excelled him in abstruse theology and intricate metaphysics; but as an evangelist, picturing the horrors, the awfulness, and the degradation of sin, few would have equaled him as a proclaimer of the Scriptures and in urging men to turn from darkness unto light. So, while he was by no means a master of the minutiæ of the law, yet as an advocate of a client's cause, making the wrongs and injuries of his client his own, picturing in lurid colors the penury and sufferings of his client and those dependent upon him, Senator DAVIS easily became one of the foremost and most powerful advocates of the Arkansas bar. But it was not as a lawyer that Mr. DAVIS was best known both at home and abroad, but as a great factor in the political affairs of his State.

If I were asked to lay my finger upon any one chord of his great popularity in Arkansas, the one thing that made him invincible in his aspirations and close to the hearts of his people, I would unhesitatingly say that it was the implicit trust he reposed in the great masses of his countrymen. He always appealed to the public for his support, thus realizing, and properly so, that the great body of the people are the source and origin of all power and authority—a conception, alas, that many men in public life fail to appreciate. Nor did the people fail to respond with their votes, once they learned of his confidence in them, but rallied to him, thus gratifying his every political ambition.

In my opinion Senator DAVIS would have spurned any office other than that bestowed by the people themselves, as he was plainly a man of the people; and if this Republic is to survive and the conceptions of the fathers are to endure, if equality of opportunity is to be given to all alike, this country must rest upon the love and confidence of all the people to the end that the humblest may have a voice in its councils and render his contribution in the perpetuity of its welfare.

The sudden and untimely taking off of Senator DAVIS was a shock to all the people of his State, and had anyone been skeptical of the intense hold he had upon the people all doubt would have been removed by attending the funeral in the beautiful Mount Holly Cemetery, in Little Rock, on Sunday evening, January 5 last. No similar outpouring of people from all parts of Arkansas has ever been witnessed before at any funeral. There must have been people from every county in the State, and multiplied thousands crowded around his home, his church, and the cemetery to pay their tribute of love and respect for one the people loved to honor; and as night was drawing his drapery upon the earth, shutting out the sunlight of heaven, all that was mortal of Senator DAVIS was laid to rest beneath a bed of roses and immortelles contributed as testimonials of friends who loved and trusted him; and by the tomb sat the aged and saintly mother, bereft of her only child, the bereaved widow, and grief-stricken children. And may the God of Mercy keep these as in the hollow of His hand.

Mr. MACON. Mr. Speaker, I ask unanimous consent that all Members who may care to do so may extend their remarks in regard to the life, character, and public services of the late Senator DAVIS.

The SPEAKER. The gentleman from Arkansas asks unanimous consent that all gentlemen who choose to do so be permitted to extend their remarks in the RECORD. Is there objection? [After a pause.] The Chair hears none.

THE LATE REPRESENTATIVE GEORGE S. LEGARE, OF SOUTH CAROLINA.

The SPEAKER. The Clerk will report the order in relation to Hon. GEORGE S. LEGARE.

The Clerk read as follows:

On motion of Mr. FINLEY, by unanimous consent,

Ordered, That Sunday, February 23, 1913, be set apart for addresses upon the life, character, and public services of Hon. GEORGE S. LEGARE, late a Representative from the State of South Carolina.

Mr. JOHNSON of South Carolina. Mr. Speaker, I offer the following resolution.

The SPEAKER. The Clerk will report the resolution.

The Clerk read as follows:

House resolution 867.

Resolved, That the business of the House be now suspended that opportunity may be given for tributes to the memory of Hon. GEORGE S. LEGARE, late a Member of this House from the State of South Carolina.

Resolved, That as a particular mark of respect to the memory of the deceased and in recognition of his distinguished public career the House at the conclusion of these exercises shall stand adjourned.

Resolved, That the Clerk communicate these resolutions to the Senate.

Resolved, That the Clerk send a copy of these resolutions to the family of the deceased.

The resolution was unanimously agreed to.

[Mr. JOHNSON of South Carolina addressed the House. See Appendix.]

Mr. FINLEY at this point assumed the chair as Speaker pro tempore.

Mr. LOUD. Mr. Speaker, I can but feel most deeply impressed by the tributes paid to the memory of my friend and colleague. I hesitate to take part because I feel utterly incapable of portraying him as I really knew him, and because I realize that I lack the power of expression to correctly let the public see, as I should like to have it see, the finer, grander, and nobler qualities that made such a deep impress upon me.

It is one thing to know a man and to recognize his splendid attributes of mind and character; but it is quite another thing to have the ability to make others see as you yourself have seen.

Just as we admire in a beautiful picture the genius of the artist and yet are powerless to reproduce the painting, so sometimes in a friend we may see many noble qualities, qualities that attract and make everlasting impress, qualities that arouse great admiration and deep affection, and yet be unable to portray those qualities to our own satisfaction. GEORGE LEGARE came into Congress at the same time as myself and by fate we chanced to become acquainted at once. I found him a man of marked ability, gifted with quick perception, clear understanding, sound judgment, and clearness of expression. He seemed to have inherited from his Huguenot ancestry an exalted sense of honor that was apparent to everyone who came in contact with him. These attributes of ability and honor made him a Representative in this House of whom his district and State may well be proud.

Not only did I admire him for his mental ability, but more, far more, for the affectionate, loving qualities of his nature, which endeared him to me beyond expression. For years we lived in the same hotel, and with a group of closest friends were constantly together at the same table. As time went on he became to me almost a brother, and I realized that he was to me one of the dearest friends of a lifetime. It was a joy to us both to help each other in our congressional work. It was a joy and privilege to go with him to his own city of Charleston, to meet his home friends and enjoy their hospitality, and in return to entertain him in my Michigan home. While at my home he, a Democrat, was the honored guest of and delivered a splendid address to the McKinley Republican Club of our largest city at their annual banquet. He won the heart of every hearer instantly, and his visit is yet a loving memory to them all. His loving nature was shown in his family life, of which a visitor in the household once said that never had she seen a home in which the parents so entered into the lives of their children and made themselves children with them.

His affectionate nature endeared him to his associates to an extraordinary degree, and he was kindness itself and courteous always to all.

We who knew him best knew him as one who, like Abou Ben Adhem, loved his fellow men—

> Abou Ben Adhem (may his tribe increase!)
> Awoke one night from a deep dream of peace,
> And saw, within the moonlight in his room,
> Making it rich, and like a lily in bloom,
> An angel writing in a book of gold;
> Exceeding peace had made Ben Adhem bold,
> And to the Presence in the room he said,
> "What writest thou?" The vision raised its head,
> And with a look made all of sweet accord,
> Answered, "The names of those who love the Lord."
> "And is mine one?" said Abou. "Nay, not so,"
> Replied the angel. Abou spake more low,
> But cheerily still, and said, "I pray thee, then,
> Write me as one who loves his fellow men."
> The angel wrote and vanished. The next night
> It came with great awakening light.
> And showed the names whom love of God had blessed,
> And lo! Ben Adhem's name led all the rest.

Mr. LEVER. Mr. Speaker, my remarks on this solemn occasion shall be devoted to a brief recital of those characteristics of heart and mind which made our deceased colleague the best loved and most popular Member who has served in this body since my membership began. It is my desire to be as candid with him in death as he was with me, and all, in life. To him platitude and extravagance of statement did not appeal; he believed in the simple statement of truth in all things; and we would be untrue to him if we should assign to him virtues he did not possess or attribute to him characteristics to which he was not entitled, if in doing so we were thereby enabled to paint a more beautiful portrait. In dealing with the character, life, and service of a man of the character of GEORGE S. LEGARE extravagance of statement and imagination is not necessary. To sketch his life, just as he lived it, in simplest words and without adornment is sufficient to develop a painting of which any family may be proud and to furnish an example to all who may look to biography for inspiration and guidance.

It is my wish to discuss my friend as a man and as a public servant.

In personal appearance he was handsome, with broad forehead, clear complexion, and clean, clear blue eyes, in which were mirrored the kindliness and sympathy of his big soul. Physically he was not a big man, but there was a snap and grace about him at once attractive and indicative of great moral and mental force. He moved with the air of one who understood his purposes and had made up his mind to attain them. Any stranger passing him by on the street, with no knowledge of who he was, would have turned to take a second look at him, just as I imagine no one could have passed the great Napoleon without being struck with the mental suggestion that here is an unusual man, whose outward appearance evidences the vigor of his mental and moral qualities.

In manner he was suave, polite, cordial, and unaffected; in disposition, genial; and in his attitude toward others sympathetic and sincere. His personality was charming, delightful, magnetic, and coupled with this he was vouchsafed a rich imagination and an unusual power for felicitous expression. In addition to this, he was blessed with the divine art of bringing into action all of his faculties of mind and body to the best advantage at the opportune time. He was the complete master of himself in all respects, and accomplished his aims in life with the precision and directness of one who is in complete dominancy of self.

His magnetism was irresistible; it was impossible to know him, to come into contact with him, without falling under the inspiration of his thought and purposes. You were drawn to him, and, as it were, became a copartner with him the moment you crossed into the circle of his personality. You found yourself involuntarily thinking as he thought, feeling as he felt, wishing as he wished, and going as he went. Intimacy began with your first meeting, and your friendship for him lasted ever thereafter. The friendship you bore for him differed from that you held for all others of your acquaintances. There was in it a subtle quality which made it more than friendship, which elevated it to the pedestal of love. No one ever liked GEORGE LEGARE, each loved him. He was the type to whom you go when the heart is harrowed with sorrow and the mind is afire with doubt. You felt a reliance in his judgment and a certainty of his unreserved sympathy. No skeleton in the closet was so ghastly as to make you unwilling to uncover it to him in the fullest confidence. His appeal went to the stronger and at the same time gentler impulses of the heart. You respected his courage, trusted his judgment, and relied upon his confidence. These were the qualities which endeared him in such a remarkable degree to the membership of this House, and fixed for him a place in the affection of the people of his district and State rarely attained.

As a public servant, both in State and National affairs, he was able, courageous, alert, and patriotic. Considering the handicap under which he labored in this House, the impress of his influence upon its course is a splendid tribute to his ability and aggressiveness. Serving as he did most of the time as a Member of the minority party, his accomplishments for his district and State bear strong testimony to his worth and capacity as a legislator. No man with whom I have served had deeper convictions upon public questions than had he, nor is there any who held to them with greater tenacity. He was a splendid fighter, a superb organizer, and an eloquent advocate. His speeches came at infrequent periods, but they were well prepared, well conceived, comprehensively wrought, evidencing a thorough understanding of the fundamentals of representative Government, a broad sympathy with humanity, and an accurate forecast of coming events.

It is safe to predict that had he been spared to us, he would have become a leading figure in Congress, for in this body, where the doctrine of the survival of the fittest is so greatly emphasized, leadership comes as the result of conviction, preparation, courage, and ability. This is no place for the weak, either in mental or moral fiber, and GEORGE LEGARE was preeminently strong in both. It is sad, almost inexplicable, that with so much to live for, with the country in such great need of the kind of man he was, he should be cut down in the very fullness of that opportunity for service.

As a Representative his work was peculiarly trying and demanded a skill and diplomacy of the highest order. In addition to a number of rapidly developing agricultural counties, he was the especial spokesman—ambassador—of that historic city, the first to throw down the challenge in defense of the institutions of the old South and the last to readjust itself in accordance with the mandates of that most fearful of civil wars. Charleston, for the past two decades, has been taking on gradually but certainly a new civilization and giving up an old one which made her famous throughout the world. To represent accurately, to make the Nation understand it all, to bring about a mutuality of confidence between the people of

this city and the people of all the country, to lead, and yet not too rapidly, required a tact of which few can boast. GEORGE S. LEGARE vividly foresaw the coming glory of his State and the proud city of his birth, and recognizing the absolute necessity of establishing a cordial relationship between them and the Nation, he set himself assiduously to bring it about, and he did. A lesser man, with less of good common sense and of different personality, could not have accomplished it. It was a mission of the highest patriotism, and what he did in this respect for the State and for Charleston regardless of all else he accomplished for them will live in history as his most notable achievement in the affairs of men.

Of distinguished and aristocratic ancestry he, like so many others of this class, was forced by the fortunes of war to win his spurs unaided save by the endowment of Providence. Mr. LEGARE was in very truth a self-made man. Proud of the splendid records of his ancestors, he was not ashamed of the fact that at an early age he was forced to become a breadwinner and to fight his own battles. Out of all misfortunes there comes some good, and to his early struggles in life I attribute his splendid faith in the people and his confidence in their capacity for self-government. His sympathies were with the great body of the American people and to their welfare was devoted his chiefest energy. He believed implicitly in the wisdom of the Constitution of his country, and was profoundly convinced that the safety of our institutions, the happiness and prosperity of our people, lay in the perpetuation of representative government as given to us in the Constitution. One of his most impressive utterances upon the floor of the House was that in which he warned eloquently and earnestly against the tendency to depart from the broad principles of that great document, except after the widest discussion and most thorough deliberation.

And now, Mr. Speaker, as we mourn for him to-day may we not comfort ourselves with the thought that, though never again shall we have him with us, yet he has left to us the memory of a most loyal and unselfish friendship, the example of a life well lived, a battle bravely fought, a death courageously met?

I desire to insert in the RECORD excerpts from the Charleston News Courier touching the death of our beloved colleague, as a further evidence of the esteem in which he was held by those who knew him best.

The SPEAKER. Without objection, it is so ordered.

The matter referred to is as follows:

A city's people stand bowed in grief over the loss of a beloved friend and trusted leader. Multitudes were shocked and countless hearts were grieved when the news of the death of Congressman GEORGE S. LEGARE was read yesterday morning. In all walks of life men mourned his loss. Men who had known him spoke in hushed voices on the streets, and when they gathered in their homes his death was the topic that filled the minds of all.

Few sections of the United States were not represented in the telegrams of condolence that poured in yesterday. GEORGE LEGARE'S popularity in Congress was attested by the numerous and beautiful messages of love and affection from his congressional colleagues. Among these messages were tributes that filled the heart of the reader to overflowing. Some said of him that he was the best loved man of all the men in Congress. Especially touching were the large number of telegrams received from friends in Pickens, S. C., where he had spent his summers in recent years.

Going through the streets yesterday one saw on every side of him tributes of respect to the memory of the dead Congressman. The official flag of the city of Charleston floated at half-mast from above the city hall. The Stars and Stripes were likewise draped, as if in grief, on the top of the post-office building. Flags were at half-mast on many other buildings, including the German Artillery Hall and the Hibernian Hall, of both of which societies Congressman LEGARE had been a member for several years. One noticed several boats on the river to-day with flags at half-mast.

The praises of the lamented leader were not sung merely in the high places by those who had known him intimately. One heard expressions of the sincerest grief from men who had never met the Congressman, but who had merely seen him or heard him speak. The universal sentiment was that distressed humanity had lost a faithful friend when GEORGE LEGARE passed across the bar. The unanimity with which his name was lovingly mentioned, the high praise bestowed upon his lofty character, the sincere grief of his stricken friends were things to inspire all who noted them to live their lives so that when their call came their memory would be held in similar sacredness and affection by those they left behind them.

Below are printed a number of tributes to Congressman LEGARE, written by a few of the thousands who knew and loved him. There would not be space in a hundred newspapers to print all the tender and loving things that have been said about him since his death.

TRIBUTE OF RESPECT.

Fearlessness of responsibility, indomitable energy, tenacity of purpose, devotion to duty, liberality of disposition, and fidelity to friends were the characteristics of my lamented companion, GEORGE LEGARE. He was essentially a self-made man and through his own exertions "exacted from the grasp of reluctant fortune" that success which crowned his life. From early boyhood to the day of his death there existed between us that intimacy which gave me opportunity to know his worth and appreciate his merit. When in the fullness of his strength he accomplished his daily tasks and effectively performed the duties undertaken by him. He never betrayed those who believed in him, and reciprocity of gratitude was his guiding star. It is unutterably sad to realize that we shall be forever deprived of the sound of his cheery voice, of his genial smile, of his cordial greeting, of his hearty handclasp, of his wise counsel and inspiring patriotism, but our consolation is that we need never forget. He has left an heritage of which his family and friends may justly be proud and an example worthy of constant emulation by those who would be true to their God, their country, their home, and their fellow man.

M. RUTLEDGE RIVERS.

The loss of GEORGE LEGARE to his State and city is difficult to estimate. There was no worthy public cause to which he did not freely contribute his unexcelled talents, his time, and his means. Many accomplished public measures are his lasting monuments.

The bar of Charleston has lost its strongest jury advocate and his multitude of friends their most loyal, genial, and lovable companion.

B. A. HAGOOD.

With thousands of others I feel the loss of the Hon. GEORGE S. LEGARE. In the friendship we felt for the man and in the pleasure we had in his charming companionship we may have lost sight somewhat of the extent of his abilities and the brilliance of his career. He was a man of keen foresight and large perception, of strong character, and of marked eloquence. We can but feel that the career he had, brilliant as it was, would have been but the beginning of a far greater fame in the annals of the Nation had life and health been granted him.

ARTHUR R. YOUNG.

There was a magnetic lovableness about GEORGE LEGARE that made personal attraction nothing less than a power. Combined with this and with brilliant gifts was a boldness, a maturity, and decision of character strongly at variance with his youthful face and the genial smile that so often lighted it.

I have seen him in times of stress. His courage never faltered. He was cool, cheerful, and able. His sight was clear, and he was prompt to act when he saw. There are many who know and have profited by this quality in the man.

He filled a large place in the hearts of his friends. He made himself a notable figure in a large field. He will be missed and mourned by very many.

WM. HENRY PARKER.

GEORGE LEGARE was essentially a lovable man. Nature had endowed him with many characteristics which men praise and admire; he had many traits which made men recognize him as a man of genius and brilliancy; but when in close contact with him one forgot for the time his genius and brilliancy and simply loved him for the bigness of his heart and for his ready sympathy with the needs and aspirations of his fellows.

He was a lawyer of tremendous power; he was in many respects a statesman of large vision and of vigorous mentality; but more than these he was to those who knew him a true and generous-hearted friend, and as such will always be remembered and loved.

H. L. ERCKMANN.

As one of the thousands who knew GEORGE LEGARE—and to know him was to love him—will you allow me to add my feeble tribute to his memory?

I can think of no one whose death would bring more genuine sorrow into the homes of the people of his congressional district than that of my friend GEORGE LEGARE. Gifted with a peculiar charm of manner, he bound his friends to him with links of steel.

Generous to a fault, there was nothing too good for a friend. His word was his bond. There is no use to speak of what he accomplished for his congressional district; we are now reaping the reward of his labors. When time with its soothing hand allays the bitterness of our grief, the memory of his manly tenderness and charm will still be with us to brighten our onward journey, even unto the end.

WILLIAM H. DUNKIN.

The news of the final end of the Hon. GEORGE S. LEGARE is sad indeed. I had occasion to visit him at his home in St. Andrews on January 16, and while it was apparent that he was a very ill man I did not think he would pass away so soon.

His great power was his personality. He was a kindly man, with a warm heart and personal charm in his intercourse with his fellows that engendered a marked personal affection for him. This was the true foundation of his successful career as an advocate and the Representative of his district in Congress. Charleston owes much to this son of hers, whom she delighted to honor with her confidence. Requiescat in pace.

HENRY BUIST.

My sense of personal loss is so overwhelming I can scarcely trust myself to speak of GEORGE LEGARE'S death. We were boys together and throughout our entire life have been the warmest personal friends. His unusual success in life has always been the greatest source of gratification to me, and in his death I think the whole State, and particularly the community in which he lived and the district which he so ably represented, have sustained an irreparable loss.

As a public servant he was ever watchful, zealous, and untiring in his efforts to advance the interests of his constituents.

As a friend he was loyal to a degree of complete forgetfulness of self and would sacrifice any personal advantage at any time to serve his friend, and in this relation his loss will be most keenly felt and universally deplored.

As a man he was without reproach and his public and private life may well serve as an inspiration for generations to come.

His warm, welcome genial smile and close comradeship will never be forgotten by anyone who ever knew him or who was ever permitted to come within reach of its benign influence.

It is doubtful if this generation or the next will ever produce his equal.

W. J. STOBEN.

The death of GEORGE S. LEGARE has deprived his district of a valuable Representative, and in Congress his loss will be seriously felt. He will live long and lovingly in the memory of those who knew him, for to have had his friendship one enjoyed the companionship of a noble character. He was ever honest and steadfast to duty as he saw it; firm and faithful to any principle that he knew was right, to which was combined the tenderness of an ardent and a sympathetic nature that gave him a magnetic personality. GEORGE LEGARE was absolutely a self-made man, and in doing his life's work he gathered to him men of

every condition and in every walk in life, all of whom became his friends, so that to-day the banker, the mechanic, the merchant, and the laborer alike feel keenly the death of him whom they all knew and called "George." He was zealous and deeply devoted to his work in Congress for the good of his district, and but few of his constituents are aware of that which he accomplished by his energy, pluck, and attractiveness. It was in his home life, however, and with his closest friends that he was at his best. His ideals were the happiness of his father and mother, his wife and children, for whom he had built a future of comfort and contentment; this, alas, so soon has been wrecked. It is such characters as GEORGE LEGARE that make the world brighter and better. His duty has been properly and patriotically performed and he has made mankind his debtor. The regret occasioned by his death is as widespread as he was worthy and estimable, as he was high-minded, generous hearted, brilliant, and true.

H. A. MOLONY.

Mr. LEGARE'S qualifications as an advocate merit too high a praise to be spoken in a word. He appealed most to me through the deep sympathy which went out from him to his fellow men—all of them—and by the fact that he dedicated his life to practical services for them. If I may say so, it was the humanity of the man which won and rightly held for GEORGE LEGARE the real affection of his people.

ALFRED HUGER.

I have been intimately associated with GEORGE LEGARE since his early boyhood, and he was in every sense of the word a grand and noble man. Possessed with unusual ability and superb judgment, together with his personal magnetism, it was no surprise to those who knew him that he rose so rapidly once having entered on his public career. It will be difficult to find any citizen in our State who held such a firm hold upon the masses in every walk of life. Our city and our State has lost one of its noblest sons.

J. ELMORE MARTIN.

My conception of GEORGE LEGARE can not adequately be expressed in words. He was a courageous and masterful man, yet tender and sympathetic as a woman. A truer and more steadfast friend never lived. He was my bosom friend.

W. L. HARRIS.

Mr. AIKEN of South Carolina. Mr. Speaker, the good die young. Whoever first spoke these words probably had in his mind the thought that the world can ill afford to lose the good at any time. In the case of GEORGE SWINTON LEGARE they have a literal as well as figurative meaning. He was young in years, and he was good far beyond the ordinary application of the word. He had barely crossed the threshold of matured manhood. He was in that period of life which ordinarily marks a man's greatest promise of physical and mental vigor.

His mentality was abnormally broad and strong. His impulses were pure as a crystal spring, his actions governed by the inspiration of duty and the dictates of justice and fairness. His character was as clean as the driven snow. As man, as husband and father, as friend, he stood as the very highest type. As a citizen of the Republic, in his devotion to his obligations as such and in the more than conscientious discharge of his duties as a legislator, he was beyond compare. Verily, he died too young.

It is inexpressibly sad to contemplate the passing of a friend whose years were but few, as years are measured in the career of public men. At the time of his death GEORGE LEGARE was only 42 years of age. Of those little more than two score years he had spent 15 serving his State and his country. For 10 years he was a Member of this House. He and I came together to the Fifty-eighth Congress. From the very beginning of his service here until the very last he gave the best that was in him to his legislative work. Aye, Mr. Speaker, he gave his very life, for though the disease which means death had gripped him in its grasp, though he knew that to continue in his work meant for him the shortening of life, though dear ones implored and friends pleaded that he should give himself some respite, he never yielded to the soft entreaties, but firmly persevered until the silver cord was loosed and the golden bowl was broken.

We who saw and heard him on this floor, keenly attentive to every important measure, unvaryingly observant of everything that concerned his district and his State; participating in debate with the skill and eloquence of the born advocate; his colleagues on the committees of Foreign Affairs, and Banking and Currency, and Patents, who noted his assiduous labors there and were witnesses of the care with which he regarded every proposition, recognized the fact that the frail body of GEORGE LEGARE harbored an indomitable spirit, and paid him the silent tribute of profound respect.

But, Mr. Speaker, GEORGE LEGARE was more than respected. He was beloved by all who knew him. Why? Because he was the apostle of sunshine and of cheerfulness; because kindness fairly exuded from his personality; because "every smile was a benediction and all speech a blessing." It may be doubted if even his closest friends fully knew how utterly he sacrificed himself upon the altar of public duty, just what effort it cost him not to sadden them with even the semblance of suffering. When the inroads of his malady took too severe a hold upon his endurance, he hastened to some far-off spot partially to regain his waning powers, and after a brief season of rest and recreation he returned to his work with undaunted spirit and a smile on his face to reassure the anxious ones.

He preserved the best traditions of a distinguished ancestry, for he was of that family of Legare whose sons have ever been among the truest of the old Palmetto State. In the early days of the Republic Hugh Swinton Legare was a Representative in Congress after having been in the Diplomatic Service, and later was called by President Tyler into his Cabinet with the portfolio of the Attorney General. The earliest history of South Carolina finds the Legares in and near Charleston, and from that historic city our departed friend was sent to Washington. There he had earned his spurs as a lawyer, holding his own with the ablest members of the bar. There he served for five years as public prosecutor, relinquishing that important office only when he was called up higher to represent his district in the Congress of the United States. If he had been spared, who shall say that the Senate would not have become his forum, or that, like his ancestor, he would have sat at the President's council board?

Mr. Speaker, I have already referred to that trait in our friend's character which preeminently distinguished him—his sunny disposition. It so pervaded his whole existence that I feel I shall not violate the canons of good taste by expatiating upon him. GEORGE LEGARE was an optimist of purest ray serene. Not subjective merely, but objective in the highest degree. His optimism was contagious. It radiated from him to the farthest limit of those who were brought into contact with him. It was his gospel. He preached it from the housetops, as it were. He waged incessant warfare against the spirits of darkness and despair, and they fled before his onslaught. In his view the world was good and getting better all the time. For him there was no evil so great but that the fountain of his all-embracing catholicity found a remedy. And while he would never agree that anything could be so bad as to be beyond the possibility of cure, so he also held that nothing in this world is so good but that it may be better.

This beautiful optimism had its root I doubt not in an abiding faith in the promise of the life to come. I doubt not but that in his heart there always echoed and reechoed the words of the Master:

Come unto me, all ye that labor and are heavy laden, and I will give you rest.

In no other way could he have borne each day's sufferings with humble resignation nor ever turned a hopeful heart to the morrow. From that same fount sprang his love for his fellow men. The current of his thought flowed ever outward, ever toward others, ever toward places where burdens might be lightened or sorrows assuaged, and where the tears of grief might be dried by words and acts of kindness and sympathy.

He was thoroughly honest, not in deed alone but in thought. He accepted the trust reposed in him by his people with no mental reservation as to self. No motto fits him so well as that in the coat of arms of the Prince of Wales, "Ich dien," for service—true, faithful, watchful, unceasing service—was the badge of his whole career. Public office was to him no incentive to personal gain. He could see neither honor nor profit save in doing his fullest duty to his constituents, to his State, and to the Nation. He never compromised with wrong. To him black was black and white was white, and there was no intermediate shadings. Friend or foe always knew where to find him, for he went into battle with open visor. Democrat to the backbone, he never placed party above country, and his political adversaries always found in him a fair and generous opponent.

That upon the death of such a man there should have arisen a very symphony of sorrow is not surprising. I shall cite but a few of those mournful eulogies. One of his colleagues from a distant State said in his message:

He was the finest man I ever knew. No one could have better character or truer heart. He always stood for the best there was in life and legislation.

From men in his State came words like these:

There was no public cause to which he did not freely contribute his unexcelled talents, his time, and his means.

I have seen him in time of stress. His courage never faltered. He was cool, cheerful, and able. His sight was clear, and he was prompt to act when he saw.

He was in many respects a statesman of large vision and of vigorous mentality. But more than these he was to those who knew him a true and generous-hearted friend, and as such he will always be remembered and loved.

Gifted with a peculiar charm of manner he bound his friends to him with links of steel.

And, Mr. Speaker, the last one of these tributes from which I shall cite is the best of all, because it was paid by one who knew him all through life, and it epitomizes all that has been or can be said of him:

As a public servant he was ever watchful, zealous, and untiring in his efforts to advance the interests of his constituents. As a friend he

was loyal to a degree of complete forgetfulness of self, and would sacrifice any personal advantage at any time to serve his friend, and in this relation his loss will be most keenly felt and universally deplored. As a man he was without reproach, and his public and private life may well serve as an inspiration for generations to come.

Pomp and circumstance did not mark the last rites when the remains of GEORGE LEGARE were given, in beautiful Magnolia Cemetery, to the bosom of Mother Earth, but the great outpouring of the people was a magnificent tribute paid to the memory of their friend and neighbor. Over his last resting place no great mausoleum or cloud-piercing obelisk may be reared. More fitting will it be if the seed be sown from which will blossom flowers typifying the beauty and fragrance of his brief span of life. With each recurring spring, as a beautiful German song has it, they will blossom up from the heart of the dead and lift their heads toward heaven as an offering of love. In the hearts of his friends he built for himself a monument of love which can vanish only with the last heartbeat of the last one of them all.

To all that knew him he bequeathed the precious legacy of a spotless life; to his country, the memory of faithful service; and to posterity, the example of civic virtue.

Mr. DAVIDSON. Mr. Speaker, it is eminently fitting and proper that this hour should be set apart for services in memory of our dead colleague.

This arena, usually the scene of turmoil and strife, is to-day reverently peaceful and quiet.

To-day we have put aside partisanship, put aside the strife for legislative success. To-day we have forgotten that we are even legislators, and remember only that we are men, human men, with all the love and affection and sympathy that one human heart can have for another. We remember that we have lost a friend and brother, one who was especially near and dear to us.

GEORGE S. LEGARE was one of God's noblemen; no better man ever lived. He came here, nearly 10 years ago, as the Representative of the first district of South Carolina. He was a young man, as years measure life.

He looked upon the work before him as something real, something worth while, something worthy of his best energy, his highest ambition.

From the beginning of his service in this House he was an active, efficient worker. There never was any doubt as to where he stood upon any public question, and while he was always forceful in defending his opinions he was ever tolerant with those who differed with him.

He was always active in behalf of the interests of his district, and the building up of the Charleston Navy Yard and the improvement of the Charleston Harbor are monuments of his efficiency as a Representative.

When he first came to Washington he was a robust athlete of splendid physique.

It is said that "death loves a shining mark." Certainly, in this case, the "white plague" laid its withering blight upon a "shining mark," and it almost seems as if his life was required as a sacrifice in order that the Nation might be stimulated to greater effort to eradicate this dread disease.

At the instance of the present President of the United States, then Secretary of War, arrangements were made for Mr. LEGARE to take treatment at the Army sanitarium in New Mexico. Under this treatment he improved, and subsequently he spent his vacations in the mountain region of his own State, hoping that the air and climate of that section might aid him in his fight for health.

For a number of months the battle seemed to wage in his favor; but, true to a characteristic predominant in his make-up, he could not refrain from taking an active part in the campaign of last fall, not for his own reelection, because that was assured, but in behalf of a friend who had favored him. I fear this extra strain upon his already weakened constitution hastened his untimely death.

Be that as it may, those who knew him well feel certain that he would have gone to the aid of his friend just the same had he known in advance that such action would give an advantage to the malady with which he was contending.

Here on the floor of this House in the discharge of our legislative duties we find but little time for the cultivation of social relations.

It was my good fortune for several years to be intimately associated with Mr. LEGARE in a social way. We lived at the same hotel, we ate at the same table. Our families became intimate friends.

It is under such circumstances that you come to know men best and to better realize their true worth.

During all the years of that close and intimate association nothing ever occurred to lessen in any degree the esteem and love I had for this colleague. He was to me more like a brother than a colleague. In his presence I never realized that I was a Republican and he a Democrat; that I was from the North and he from the South; but I was always impressed with the fact that I was associating with a gentleman.

By birth, education, and environment he was a gentleman. It is not necessary for me to say that he was a southern gentleman, because, I take it, gentlemen are very much alike the world over. He, however, possessed all those characteristics and instincts which prompted him to do the gentlemanly thing instantly and under every and all circumstances.

He was a man, take him for all in all;
We shall not look upon his like again.

The congressional committee appointed to attend upon his burial realized when it arrived at Charleston that a city was in mourning. On every hand there was abundant evidence of the affection, esteem, and honor which the people of that city had for GEORGE LEGARE. Flags were at half-mast everywhere, and the thousands who gathered at the home, who were present at the church, and who, with bowed heads and tear-dimmed eyes, lined the streets over which the funeral cortege passed, gave evidence of the personal loss they had sustained.

As the long procession approached the Second Presbyterian Church, where a brief memorial service was to be held, and as the chimes rang out in sweet tones that beautiful hymn "Nearer my God to Thee, Nearer to Thee," with the knowledge that our dear friend had just crossed the river, it seemed as if we were a little "Nearer my God to Thee" than ever before.

At Magnolia Cemetery, in the shadow of the beautiful live oaks and amid a profusion of floral emblems, mute but beautiful tokens of the love and affection of his friends, we buried him.

Our duty there fully performed, we turned our faces again to the northward and to this Capitol, here to resume our legislative duties, but not soon to forget the splendid character, the noble qualities, and the kind heart of our friend whom we had left behind.

Less than two years ago the angel of death visited this afflicted home and took from it the youngest child, a most beautiful and loving little daughter. This sad blow came unexpectedly and as the result of an accident.

Mrs. Legare and the children were at their home. Mr. LEGARE had been in Washington, but at that hour was journeying homeward unconscious of the accident or what awaited him. A friend met him at the depot, partially apprised him of what had happened, and hastened him to the bedside of the injured child. The little one had appeared unconscious, and yet when he spoke to her and said, "Tiny, do you know me?" holding her little hands toward him she said, "Yes, daddy; I know you," and, with a smile still lingering on her lips, her eyes closed in death.

During all the years since this malady afflicted him Mr. LEGARE fought courageously for his life that he might be spared to care for his wife and family. He fought a good fight. He never faltered. He never surrendered, even to the last hour of his existence. And yet somehow I can not but feel that, relieved from all the pain and suffering, he passed from this world to the great beyond consoled with the thought that at least he would not be a stranger to everyone over there, but that he would find waiting for him little Tiny, with her sweet smile and outstretched arms, and he would hear her dear voice saying "Daddy, I am waiting for you."

To us it seems as if he was taken at almost the threshold of an active life, and yet he had done much for his city, much for his country, much for his friends and family, and we can well believe that the plans of an all-wise Providence are not made by chance, and that in the taking away of this splendid type of American citizen and public servant a lesson is taught to us that, if duly appreciated, will redound to the welfare of the Nation and the benefit of mankind.

The home life of Mr. LEGARE was ideal. He was a loving son, a devoted husband, a tender and thoughtful father. The parents, in their advancing years, are deprived of the joy and comfort which his coming always brought to them. The loss, however, of the bereaved wife and children is beyond reckoning. The one has lost a loving and devoted companion, the others a generous, kind-hearted parent.

May God in His loving mercy care for and protect them.

May the three sweet daughters, just budding into young womanhood, be shielded from every harm, and may the little boy "Billie" grow into manhood, having ever before him the recollection of the splendid character and noble achievements of his father, and become such a man as his father would have wished.

To the bereaved wife do we extend our deepest sympathy. She has been so brave and courageous through it all. For months she cared for the home and family of little ones while her heart was away out in the West with her stricken husband fighting for his life.

And then, through all these later years, how faithful and devoted she had been. Though her heart was breaking with the knowledge of what the end must be, she never faltered, but bravely discharged with much feeling and great tenderness every duty of wife and mother.

She will have such comfort and care as loving children and devoted relatives and friends can give, but she will miss, oh, so much, the love and companionship of the one who was so devoted to her.

May God comfort her as she sits alone amid the desolate ruins of a once happy fireside:

> Waiting, waiting, waiting for the touch of a vanished hand,
> For the sound of a voice that is still.

Mr. ELLERBE. Mr. Speaker, tears came unbidden to many in this Hall who had known and loved GEORGE LEGARE when, on January 30 last, the news came that the brave battle which he had been fighting with disease and death was over and that he had passed before us into the great beyond.

A peculiar sense of personal bereavement is felt when life goes out from those whom we deeply love. It is in this sense that the death of GEORGE LEGARE falls with crushing force upon those who had been his daily associates.

GEORGE—"Our GEORGE," as every man in his district knew him and as his friends in Washington loved to call him—had been always so ready to toss aside his own burdens in order to lighten a brother's load by helping him to bear it that his friends often forgot how heavy his burden of ill health must be. He was all light and sunshine, and we who were nearest him never realized what a Gethsemane he must have known in those hours when he came face to face with the knowledge that the life which had been so full of helpfulness and accomplishment must be closed while his hopes and ambitions were still at their height.

Many men would have become morbid, and under the weight of this knowledge would have lost heart for the struggle, but not GEORGE. Whether he were here or at home, his energy and work for his State and his district were unceasing, and so greatly did we all love him that we rivaled each other in carrying out the measures that he had planned. No congressional district in the United States was better served than the first district of South Carolina during GEORGE LEGARE'S 10 years in Congress.

Born of a line of ancestors who have contributed to our country many of her finest jurists and statesmen, GEORGE LEGARE early determined to be worthy of his distinguished name. It was his pride to tell of his own efforts toward the accomplishment of his ambition. Character and brain were more plentiful than money in Charleston during the seventies, and GEORGE LEGARE worked hard and saved the money with which he paid for his education at the South Carolina college. Having won the friendship of the late Col. George D. Tillman while at college, he was given a clerkship in Washington, and here he studied law and learned the elements of that legislative work to which he later brought so much ability and power. Having graduated in law at Georgetown University in 1893, he was admitted to the bar in South Carolina, and became associated with the firm of Murphy, Farrow & Legare, in Charleston. In the law his ability was soon acknowledged, and he took his place as one of the ablest members of the bar of Charleston. Here as in Congress his native ability, combined with his active brain, made him a wonderful jury advocate, and his fellow lawyers speak of him as a pleader of eloquence without a peer.

In 1902 he succeeded Col. William Elliott as Representative in Congress from the first district of South Carolina, and since then he may truly be said to have been a figure of national importance.

This is not the time nor the place to tell in detail of his work in Congress. We who have served with him know of the many measures for the good of his people which he accomplished, and his people realize what his life meant to them and, alas, what his death means, too.

His constituents were ever ready to place the seal of their approval upon his work, and he was reelected over and over again by majorities which showed how much his people loved him.

For several years the battle with disease, which ended on January 30, was fought steadily and bravely. President Taft, who admired and loved him, advised him to go to New Mexico in search of health and had him admitted to a Government sanitarium there. Seemingly he regained his strength, and although President Taft offered him, and was anxious for him to accept, a position in the Southwest, where the climate is high and dry, he declined because his heart turned ever back to South Carolina and his people, whose interests were dearer to him than life itself. For some time after his return to the East his health seemed to be restored, and even the rigors and uncertainties of a Washington winter left him apparently well; but the fatigue of a summer campaign and the exposure due to his desire to show all the hospitality for which Charleston is famous during the visit of the fleet to that port last fall proved too much for his newly regained health, and a severe cold contracted at that time marked the beginning of the end.

There was a feeling with GEORGE LEGARE of personal pride and love for the gallant war vessels which rode so proudly in Charleston Harbor last October, for one of them had been named in his honor. President Roosevelt, like everyone who came within the magic sphere of GEORGE LEGARE'S influence, loved him, and in his honor named the dreadnought *South Carolina*. This was but an evidence of GEORGE'S popularity among Republicans as well as Democrats. As true as steel to his own party and to his friends, he was nevertheless always ready with his happy faculty of telling a story to bring a smile to the lips and happiness to the hearts of men regardless of their political or religious creeds.

Some one has spoken of him as "a typical southern gentleman and a typical southern politician." Oh, that the latter were deserved and that his life might be the ideal of those who ask us to consign our interests into their hands!

> He was a friend of truth, of soul sincere;
> In action faithful, and in honor clear;
> Who broke no promises, served no private ends,
> Sought no title, and forsook no friends.

His manly, kindly face will be missed in the House, and the cloakrooms and corridors will miss the brightness of his magnetic smile. But though he be dead, the sunny influence which his presence lent will be always with us, while the kindness of his generous heart and gallant nature can never be forgotten. Hundreds of loving friends who in the sunlight of his genial presence had learned to admire and love him—to love him for his manly characteristics, his nobleness of nature, his purity of heart, his deep affection—are overcome with that grief which silence, not language, can alone express.

I say here, while my heart is aching for the friend who has left me, that he was to me a brother, for there are ties stronger than kinship, closer than blood, they are the relationships of the heart, and by every bond of love and congeniality I say GEORGE LEGARE was a beloved brother.

Eulogies may express faintly the present sorrow, but they can not depict the permanency of the pain that fills the hearts of those who have been left behind for a while.

The world to-day is darker because our friend has gone, but it does seem to me that Heaven must be brighter since the pearly gates were flung wide and GEORGE LEGARE entered in.

Mr. BYRNES of South Carolina. Mr. Speaker, I was born and reared in the city of Charleston, where GEORGE LEGARE resided, and it was my good fortune to know him ever since my boyhood days. He was the son of Edward T. and Kate Malcolmson Graves Legare, and he was born at Rockville, Charleston County, S. C., in 1870. Though he came of one of the most distinguished families in the State, his parents were possessed of but little means. I think it is true that they were what we in South Carolina call "land poor," and it was not without difficulty that GEORGE was able to secure an education. He attended Porter Military Academy, from which he was graduated with honors in 1889. He then attended the law school of South Carolina University for two years, after which he studied at the Georgetown University law school in this city. While at Georgetown he secured employment in various capacities in the city in order to assist in paying for his tuition and his maintenance. His thirst for knowledge was great, and, overcoming all obstacles, he graduated with the degree of LL. B. in 1893 and immediately returned to Charleston, where he entered actively into the practice of the law as a member of the firm of Murphy, Farrow & Legare. In 1898 he was elected corporation counsel for the city, which position he held until he was elected to the Fifty-eighth Congress. My earliest recollection of him is when I, as a boy, visited the courthouse at Charleston and heard him eloquently pleading the cause of a client. I can recall with what rapt attention I listened to him and how quickly he won my boyish sympathy for the cause he advocated. Other Representatives who were associated with him here during his entire service have referred to his capacity and his ability as a legislator;

but those who knew him only during the last few years can not comprehend or appreciate the talents of the GEORGE LEGARE I knew at the bar in Charleston, when he possessed robust health and before he was attacked by the dread disease which finally took him from us. As an advocate in the courthouse he had no equal in the State of South Carolina. Endowed by Providence with gifts most rare, with an astute mind, a musical voice, a keen sense of humor, and a sunny disposition that drew men to him and held them, it was but a short while before he had a large clientele, and while he practiced law there was hardly a case of any importance tried in the courts of his county in which he was not employed. He was equally the master of pathos and humor, and was never more at home than in the trial of a cause. He could reason with irresistible logic to the court and afterwards just as easily draw tears from the eyes of the jury by a sympathetic appeal. His own generosity and experience, which had brought him into contact with the unfortunate, permitted him to speak from his heart, and his eloquent and passionate appeals contributed to his success as an advocate. As an artist plays upon the strings of a musical instrument, so would he play upon the feelings of his listeners, and rarely did he fail to awaken in their hearts a responsive chord. As his reputation as an advocate grew he was associated in the trial of damage suits in many counties of the State, and I recall that he represented the plaintiff in a case in which there was rendered against the Southern Railway the largest verdict in the history of the courts of the State.

During the years in which he practiced law he became known to every inhabitant of the city in which he lived. This was due to what was perhaps the most distinguishing trait of his character—his democracy. It was not the democracy of a demagogue, but of a man who loved mankind and was loyal to his friends. With his distinguished ancestry and his charming personality he was welcomed in the most aristocratic circles in that most aristocratic of cities, Charleston, and he was yet the friend and companion of the poor and the uncultured of that city. He made friends of all men, regardless of political affiliation, religious creed, or racial characteristics. 'Tis true that he brought sunshine into the lives of many, and darkness into the life of no man. He saw only the good in men, refusing to believe that which was not good.

Possessed of these virtues it is not suprising that when he sought to represent his district in the Fifty-eighth Congress he was elected, and that ever since that time, though he has had opposition once or twice, he has been reelected by overwhelming majorities.

With his service here you are familiar. The same lovable disposition that had won friends for him at home soon made him one of the most popular Members of the House, and the same qualities of mind that had won success for him at home soon made him one of the leaders of this body. He was, above all, an honest legislator. In this, and I presume in every legislative body, there are some men who have not the courage of their own convictions, who, through fear or to satisfy a supposed sentiment among the voters, a sentiment often manufactured by selfish interests, will vote for measures against their own honest convictions. LEGARE was not of them. He had the courage of his convictions. He hated insincerity and despised demagoguery. Instead of sacrificing his views he would vote for what he believed to be right, and if it was not in accord with a request made of him by some of his constituents he would then undertake to prove to them that his was the correct view. His sincerity and honesty were quickly recognized by his constituency and his political success should inspire other legislators to fearlessly stand by their convictions at all times.

Though for the last few years he was in ill health, he continued to labor in behalf of his people, and the manly way in which he bore his suffering and optimistically looked to the future commanded the admiration of his friends. His ill health did not lessen in the least his abundance of good nature or affect the spirit of mischief which often made us regard him as but an overgrown boy. Every member of our delegation has at some time or other been the victim of one of his practical jokes, and one of his most intimate friends tells me that but a few hours before he passed into the great beyond, when he knew the end was near, the same spirit of mischief prompted him to tease the father he loved so well and who was to him a companion as well as a father.

GEORGE was loyal to every friend as well as to every trust, and too much can not be said of this trait in a man's character. He was loved by men because he loved them. He was a better friend to everybody than anybody is to anybody. He loved all mankind, and in his personal associations exemplified the doctrine of "loving his neighbor as himself." It is small wonder that when we went to Charleston to pay the last sad tribute to his mortal remains hundreds of people were unable to gain admission to the church where the funeral services were held. From my knowledge of those people I know that they came from every walk in life, people of all nationalities and of all creeds, and as his body was borne away the tears that fell from the eyes of strong men, as well as from gentle women, gave proof of the fact that it was no idle curiosity that brought them there, but that it was their last tender tribute to one whom they loved.

His body now rests in beautiful Magnolia, on the Cooper, but his memory lives and will ever live in the hearts of those whose good fortune it was to know him.

Mr. ELLERBE assumed the chair as Speaker pro tempore.

Mr. FINLEY. Mr. Speaker,

An age which passes over in silence the merits of the heroic deserves as a punishment that it should not bring forth such a one in its midst.

We are met to-day to do honor to the memory of GEORGE S. LEGARE, late a Representative from the State of South Carolina, and in assembling to commemorate the virtues and cherish the example of one whose life was spent in the public service we perform a duty which we owe not only to the departed dead but to ourselves and to future generations.

GEORGE SWINTON LEGARE was born at Rockville, on Wadmalaw Island, Charleston County, S. C., in 1870. He was the son of Maj. Edward T. and Kate Malcomson Graves Legare, and came of a family distinguished in the history of South Carolina. This family was one of the large number of Huguenot families whose founders came to America and settled in the lower part of South Carolina during the years 1685–86. Contemporary writers describe these settlements and the character of the people with great admiration, and it was of this colony that Gen. Lawson said:

They have no differences among themselves; union hath propagated a happy and delightful concord in all matters throughout the whole neighborhood; living among themselves as one tribe or kindred, every one of them making it his business to be assistant to the wants of his countrymen, preserving his estate and reputation with the same exactness and concern as he does his own; all seeming to share in the misfortunes and share in the advancement of their brethren.

Of such stock did GEORGE LEGARE spring, and many of their characteristics we see reproduced in him. When a boy he moved to Charleston, where he earned the money with which to pay for his education at the Porter Military Academy, graduating with honors in 1889. He attended the University of South Carolina for two years, and later, a clerkship, which he secured at Washington, enabled him to complete the law course at Georgetown University, where he graduated with the degree of LL. B. in 1893. Returning to Charleston he was admitted to the bar of South Carolina and entered upon a large and lucrative practice, in the discharge of which his ability soon placed him among the leaders of the Charleston bar. As a jury advocate he was especially able, throwing his whole soul into every speech that he delivered, and speaking with an eloquence that earnestness of conviction and a winning personality made most effective. In 1893 Mr. LEGARE married Miss Frances Izlar, daughter of the late Judge and Mrs. James F. Izlar, of Orangeburg, and to them were born six children, four of whom are living. In 1898 he was elected corporation counsel of the city of Charleston and held that position until 1903, when he was elected to represent the first South Carolina district in Congress. He was reelected to the Fifty-ninth, Sixtieth, Sixty-first, and Sixty-second Congresses, and was in November reelected to the Sixty-third Congress, which convenes on March 4 next. As a Representative in Congress, Mr. LEGARE reflected great credit on his district and his State by the ability with which he discharged his duties. Possessed of a mind of unusual brilliance, strengthened by education and broadened by culture, he made himself master of any subject to which he devoted his attention. While essentially a Democrat and a partisan his breadth of outlook comprehended the needs of the whole Nation, and his desire for its welfare marked him as possessing that trait which distinguishes the statesman from the politician. Mr. LEGARE was always a hard and conscientious worker, and even in the later years, when failing health made the discharge of his public duties increasingly difficult, he remained at his post of duty and accomplished much of benefit, both to his constituents and to the country at large. He secured many needed improvements for his district, among them money with which to build the new immigration station at Charleston, appropriations for the Charleston Navy Yard, and for the deepening of the Ashley River. He was instrumental in securing the passage of a bill for a new battleship, and in recognition of his services the ship was named *South Carolina*.

Although last winter in a weakened condition of health, which hardly permitted of his remaining in Washington, he delivered two speeches on the floor of the House which evoked

favorable comment from all parts of the country. His speech against the recall of judicial decisions was a potent factor in defeating the admission of Arizona as a State while this objectionable feature remained in her constitution. He also took a leading part in the fight for the abrogation of the treaty with Russia, because of her persecution of the Jews, and as a token of their esteem he was presented last year with a gift by his Jewish friends in Charleston.

There remains another side of his character which perhaps contributed more largely than anything else to his great success in life. In addition to high ideals he possessed in an unusual degree the happy faculty of making friends. His was a personality so winning and magnetic that he seemed to make friends without effort, and the friendships once acquired his charm of manner and lofty character always retained. Loyalty to his friends was one of the guiding principles of his life. He was an optimist in friendship, looking for the good in people and trusting them as long as they would let him. To such a person the world acts as a mirror, giving back always the kind of treatment accorded it. As a result GEORGE LEGARE numbered his friends almost by his acquaintances, and if, as the proverb says, "There are as many uses for friendship as for fire and water," then GEORGE LEGARE possessed one of the essential things of life in an unusual degree. He was the most generally popular man the city of Charleston has produced since the Civil War, and of all the Members of this House there was probably no one better loved than he. The sense of loss felt at his passing is general and very great. In the termination of such a life as his we can not but feel great sorrow; yet if we believe with the poet, that "The living are the only dead; the dead live nevermore to die," we know that it is not for the dead themselves we sorrow, but for the vacant place their going makes with those who are left behind. I can not better sum up the life lived by GEORGE LEGARE than in the words of William II of Germany:

To be strong in pain; not to desire what is unattainable or worthless; to be content with the day as it comes; to seek the good in everything and to have joy in nature and men, even as they are; for a thousand bitter hours to console one's self with one that is beautiful, and in doing and putting forth effort always to give one's best, even if it brings no thanks. He who learns that and can do that is a happy man, a free man, a proud man; his life will always be beautiful.

Mr. Speaker, I ask unanimous consent that all Members of the House who wish so to do may have leave to print remarks in the RECORD relative to the life, character, and public services of the late GEORGE S. LEGARE.

The SPEAKER pro tempore. Is there objection?

There was no objection.

Mr. FINLEY resumed the chair as Speaker pro tempore.

ADJOURNMENT.

The SPEAKER pro tempore. In accordance with the resolution previously adopted, the Chair declares the House adjourned until 10.30 o'clock to-morrow morning.

Accordingly (at 8 o'clock and 28 minutes p. m.) the House adjourned until to-morrow, Monday, February 24, 1913, at 10.30 o'clock a. m.

SENATE.

MONDAY, *February 24, 1913.*

The Senate met at 10 o'clock a. m.

Prayer by the Chaplain, Rev. Ulysses G. B. Pierce, D. D.

Mr. GALLINGER took the chair as President pro tempore under the previous order of the Senate.

The Secretary proceeded to read the Journal of the proceedings of Saturday last, when, on request of Mr. CULLOM and by unanimous consent, the further reading was dispensed with and the Journal was approved.

PETITIONS AND MEMORIALS.

The PRESIDENT pro tempore presented a joint resolution passed by the Legislature of the State of Nevada, which was referred to the Committee on Commerce and ordered to be printed in the RECORD, as follows:

Senate and assembly joint resolution memorializing Congress.

Whereas there is pending in Congress a House of Representatives bill known as H. R. 25518, which provides for the construction of an efficient and practical fishway in the Derby Dam, which is owned and controlled by the United States Reclamation Service, and in the Truckee River, Washoe County, and appropriating money for the construction thereof, and introduced by Mr. RAKER on June 27, 1912: Therefore be it

Resolved, That the people of this State, through their representatives in this the twenty-sixth session of the legislature, most heartily recommend the passage of the bill, to the end that effective provision may be had for the passage of the trout of this stream and those of Pyramid Lake during their spawning season, to enable them to reach their spawning beds in the upper stretches of the Truckee River for the purpose of reproduction; and be it further

Resolved, That the secretary of state is instructed to at once forward copies of this memorial to the President of the United States, the President of the Senate, and Speaker of the House of Representatives, and to our United States Senators and Representatives in Congress.

Approved February 17, 1913.

STATE OF NEVADA, *Department of State:*

I, George Brodigan, the duly elected, qualified, and acting secretary of state of the State of Nevada, do hereby certify that the foregoing is a true, full, and correct copy of the original senate and assembly joint resolution, approved February 17, 1913, now on file and of record in this office.

In witness whereof I have hereunto set my hand and affixed the great seal of State at my office in Carson City, Nev., this 18th day of February, A. D. 1913.

[SEAL.]

GEORGE BRODIGAN,
Secretary of State.
By J. W. LEGATE,
Deputy.

The PRESIDENT pro tempore presented a joint resolution passed by the Legislature of the State of Oregon, which was referred to the Committee on Public Lands and ordered to be printed in the RECORD, as follows:

UNITED STATES OF AMERICA,
STATE OF OREGON,
Office of the Secretary of State.

I, Ben W. Olcott, secretary of state of the State of Oregon, and custodian of the seal of said State, do hereby certify that I have carefully compared the annexed copy of senate joint memorial No. 12 with the original thereof filed in the office of the secretary of state of the State of Oregon on the 14th day of February, 1913, and that the same is a full, true, and complete transcript therefrom and of the whole thereof.

In testimony whereof, I have hereunto set my hand and affixed hereto the seal of the State of Oregon.

Done at the capitol at Salem, Oreg., this 15th day of February, A. D. 1913.

[SEAL.]

BEN W. OLCOTT,
Secretary of State.

To the honorable Senate and House of Representatives of the United States of America in Congress assembled:

GENTLEMEN: Your memorialists, the Legislative Assembly of the State of Oregon, respectfully urge that House bill No. 2981, introduced by Mr. LAFFERTY April 10, 1911, and having for its purpose the creation of Saddle Mountain National Park, be enacted into law.

Saddle Mountain is the natural water reserve for a vast extent of the Oregon coast, which is rapidly developing into a continuous beach resort, extending from the mouth of the Columbia River south to Tillamook Head, a distance of more than 20 miles. These beach resorts obtain their water supply from the streams that rise on the western slope of Saddle Mountain. The preservation of the water supply of this territory by means of creating Saddle Mountain National Park is of vital importance to the State of Oregon.

The lands within the boundaries of this proposed public park are described as follows: The south half and the northeast quarter of section 7, the west half and the southeast quarter of section 8, the southwest quarter of section 9, the northwest quarter of section 16, and the north halves of sections 17 and 18, in township 5 north, range 8 west; and the southwest quarter of section 27, the southeast quarter of section 28, the north half of section 33, the northwest quarter of section 34, the northwest quarter and the southwest quarter of section 28, and the northeast quarter and the southeast quarter of section 29, in township 6 north, range 8 west of the Willamette meridian.

Adopted by the house February 11, 1913.

C. N. MCARTHUR,
Speaker of the House.

Adopted by the senate February 8, 1913.

DAN J. MALARKEY,
President of the Senate.

[Indorsed: Senate joint memorial No. 12, by Senator Lester. J. W. Cochran, chief clerk. Filed Feb. 14, 1913, at 5.45 o'clock p. m. Ben W. Olcott, secretary of state.]

Mr. CULLOM presented memorials of sundry citizens of Bluford, Marlow, and Opdyke, all in the State of Illinois, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were ordered to lie on the table.

Mr. GALLINGER presented a petition of Samuel Ashley Chapter, Daughters of the American Revolution, of Claremont, N. H., praying for the enactment of legislation to prohibit the desecration of the flag of the United States, which was referred to the Committee on the Judiciary.

Mr. TOWNSEND presented memorials of sundry citizens of Michigan, remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which were ordered to lie on the table.

Mr. SMITH of Arizona. I present a joint memorial adopted by the Legislature of the State of Arizona relative to an appropriation of $25,000 for the construction of a bridge across the Colorado River at Yuma, Ariz. I ask that the memorial be printed in the RECORD and be referred to the Committee on Commerce.

There being no objection, the memorial was referred to the Committee on Commerce and ordered to be printed in the RECORD, as follows:

Memorial to the Senate and House of Representatives of the United States of America in Congress assembled.

Your memorialists, the First Legislature of the State of Arizona, in session convened, respectfully represent:

Whereas an urgent necessity exists for means, in addition to railroad transportation, whereby traffic can be carried on across the Colorado River between the States of Arizona and California, not only connecting localities within the two States, but also bridging an annoying and detrimental gap in one of the few feasible all-around-the-year routes between the Pacific coast and the rest of the United States; and

Whereas the State of Arizona, exhibiting its good faith and its desire to promote this advantage not merely to its own people and the people of the State of California, but to the people of the whole country, particularly at this time, when the citizens of other States are making plans to attend California's historic expositions in 1915, traveling by their own modes of conveyance, has enacted a law appropriating the sum of $25,000 to pay one-third the estimated cost of a bridge across the Colorado River from Penitentiary Hill, in the town of Yuma, State of Arizona, to School Hill, on the Yuma Indian Reservation, in the State of California, contingent upon like appropriations by the State of California and the Congress of the United States for such a bridge; and

Whereas the Legislature of the State of Arizona has given notice to the Legislature of the State of California of the appropriation by the State of Arizona for this purpose, and has memorialized said legislature to join with the State of Arizona and the Government of the United States of America in the said undertaking: Now therefore

The Legislature of the State of Arizona, in session convened, respectfully pray and urge the Congress of the United States to make an appropriation of $25,000 for this purpose.

Passed the senate unanimously February 13, 1913.

W. G. CUNNIFF,
President of the Senate.

Passed the house on the 17th day of February, 1913, by a vote of 31 ayes, 1 no, 3 absent.

H. H. LINNEY,
Speaker of the House of Representatives.

Mr. SMITH of Arizona presented a memorial of sundry citizens of Phoenix, Ariz., remonstrating against the enactment of legislation compelling the observance of Sunday as a day of rest in the District of Columbia, which was ordered to lie on the table.

Mr. LODGE presented a petition of the Boston Section, Council of Jewish Women of Massachusetts, praying that an appropriation be made for the enforcement of the white-slave law, which was referred to the Committee on Appropriations.

He also presented a petition of members of the Massachusetts Peace Society, praying for the repeal of the provision exempting coastwise vessels from the payment of tolls in the Panama Canal, which was ordered to lie on the table.

REPORTS OF COMMITTEES.

Mr. McCUMBER, from the Committee on Pensions, to which were referred the following bills, reported them each without amendment and submitted reports thereon:

H. R. 28746. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War and to widows of such soldiers and sailors (Rept. No. 1292); and

H. R. 28672. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and certain soldiers and sailors of wars other than the Civil War and to widows of such soldiers and sailors (Rept. No. 1293).

Mr. CHAMBERLAIN, from the Committee on Military Affairs, to which was referred the bill (S. 4662) for the relief of Charles Richter, reported it with an amendment and submitted a report (No. 1294) thereon.

Mr. WILLIAMS, from the Committee on Military Affairs, to which was referred the following bills, reported them each with an amendment and submitted reports thereon:

S. 6775. A bill to grant an honorable discharge to David Steers (Rept. No. 1296); and

H. R. 16993. An act for the relief of Mathew T. Fuller (Rept. No. 1295).

Mr. WILLIAMS, from the Committee on Military Affairs, to which was referred the bill (S. 5056) to remove the charge of desertion from the military record of the late David S. Merwin, submitted an adverse report (No. 1297) thereon, which was agreed to, and the bill was postponed indefinitely.

Mr. BRADLEY, from the Committee on Pensions, submitted a report (No. 1298) accompanied by a bill (S. 8576) granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors, the bill being a substitute for the following Senate bills heretofore referred to that committee:

S. 7091. J. N. Culton.
S. 7222. Hiram Lay.
S. 7261. William L. Brown.
S. 7284. Emanuel Sandusky.
S. 7285. Harvey Key.
S. 7399. William F. Niederriter.
S. 8081. Mary J. Swift.

BILLS INTRODUCED.

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JONES:

A bill (S. 8575) to authorize the town of Okanogan, Wash., to construct and maintain a footbridge across the Okanogan River; to the Committee on Commerce.

By Mr. JOHNSON of Maine:

A bill (S. 8577) authorizing the construction of a railroad bridge across the St. John River, between the town of Van Buren, Me., and the parish of St. Leonards, Province of New Brunswick, Dominion of Canada; to the Committee on Commerce.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. WORKS (for Mr. CLAPP) submitted an amendment proposing to appropriate $51,520 to pay for additional books authorized to be furnished under section 220 of the act to codify, revise, and amend the laws relating to the judiciary, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on the Judiciary and ordered to be printed.

Mr. CLARKE of Arkansas submitted an amendment proposing to appropriate $237,840 for labor and material required in the installation of a drainage system in the city of Hot Springs to care for storm waters from the mountains of the Hot Springs Reservation, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. SHEPPARD submitted an amendment authorizing the Secretary of War to use for replacing and repairing the electric light and telephone cable and the water main between the city of Galveston, Tex., and the immigration station on Pelican Spit, the unexpended balances of the appropriations for construction of water main to supply water to the immigration station at Galveston, Tex., etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. CULLOM. I submit an amendment proposing to appropriate $2,000 for the purchase of two portraits, one of the late Senator Justin S. Morrill, of Vermont, and the other of the late Senator John Tyler Morgan, of Alabama, intended to be proposed by me to the sundry civil appropriation bill. I hope the purchases will be made. I move that the amendment and accompanying papers be referred to the Committee on Appropriations and printed.

The motion was agreed to.

Mr. SMOOT submitted an amendment proposing that out of any money appropriated for the transportation of American citizens fleeing from threatened danger in the Republic of Mexico there shall be paid by the Secretary of War to the Mexican Northwestern Railway Co. the sum of $7,245, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

WITHDRAWAL OF PAPERS—JOSEPHINE F. VIOLLAND.

On motion of Mr. WORKS (for Mr. CLAPP), it was

Ordered, That the papers accompanying the bill S. 8841, Sixtieth Congress, second session, for the relief of Josephine F. Violland, be withdrawn from the files of the Senate, no adverse report having been made thereon.

DIPLOMATIC AND CONSULAR APPROPRIATION BILL.

The PRESIDENT pro tempore laid before the Senate the action of the House of Representatives disagreeing to the amendments of the Senate to the bill (H. R. 28607) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1914, and for other purposes, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. CURTIS. I move that the Senate insist upon its amendments, agree to the conference asked for by the House, the conferees on the part of the Senate to be appointed by the Chair.

The motion was agreed to; and the President pro tempore appointed Mr. CURTIS, Mr. SMOOT, and Mr. SMITH of Maryland conferees on the part of the Senate.

Mr. SMOOT subsequently said: Mr. President, this morning I was appointed one of the conferees on the diplomatic and consular appropriation bill. I ask to be relieved from that service. The Senator from Kansas [Mr. CURTIS] will suggest another name.

Mr. CURTIS. I suggest that the Senator from Pennsylvania [Mr. OLIVER] be appointed.

The PRESIDENT pro tempore. The Senator from Utah will be relieved, at his own request, as a conferee, and the Senator from Pennsylvania [Mr. OLIVER] will be appointed in his place.

CALLING OF THE ROLL.

Mr. CULLOM. Mr. President, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Senator from Illinois suggests the absence of a quorum. The roll will be called.

The Secretary called the roll, and the following Senators answered to their names:

Bankhead	Culberson	Lodge	Root.
Borah	Cullom	McCumber	Sheppard
Bourne	Foster	McLean	Simmons
Bradley	Gallinger	Martin, Va.	Smith, Mich.
Brady	Gamble	Myers	Smith, S. C.
Bristow	Gronna	Nelson	Smoot
Bryan	Jackson	Newlands	Stone
Burnham	Johnson, Me.	O'Gorman	Swanson
Burton	Johnston, Ala.	Oliver	Thomas
Catron	Jones	Overman	Tillman
Chamberlain	Kavanaugh	Page	Webb
Clapp	Kenyon	Percy	Wetmore
Crawford	Lea	Perkins	Works

The PRESIDING OFFICER (Mr. McCUMBER in the chair). Fifty-two Senators have answered to their names. A quorum is present.

RIVER AND HARBOR BILL.

Mr. NELSON. I move that the Senate proceed to the consideration of House bill 28180, the river and harbor bill. After the motion is put I will yield for morning business.

The PRESIDING OFFICER. The Senator from Minnesota moves that the Senate proceed to the consideration of House bill 28180, known as the river and harbor bill. Is there objection? The Chair hears none, and it will be so ordered.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 28180) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes, the pending question being on the amendment of Mr. NEWLANDS, after line 10, page 65, to insert the following as a new section:

SEC. 3. That for the regulation and control of the flow of navigable rivers in aid of interstate commerce, and as a means to that end for the storage of flood waters in the watershed of such navigable rivers, including the beneficial use and control of such flood waters, in the maintenance so far as practicable of a standard flow for navigation, the reclamation of arid and swamp lands, and the development of water power; and for the protection of watersheds from denudation, erosion, and from forest fires, and for the cooperation of Government services and bureaus with each other and with States, municipalities, and other local agencies, in plans and works having in view such river regulation and control, the sum of $5,000,000 annually for each of the years following the 1st day of July, 1913, and up to the date of the completion and opening to commerce of the Panama Canal, and thereafter the sum of $50,000,000 annually for each of the 10 years following the completion of the Panama Canal, is hereby reserved, set aside, and appropriated and made available until expended, out of any moneys not otherwise appropriated, as a special fund in the Treasury to be known as the river-regulation fund.

That of the said river-regulation fund, until otherwise directed by law, one-tenth thereof shall be apportioned to the rivers on the Atlantic coast, one-tenth thereof to the rivers on the Gulf coast outside of the Mississippi River, one-fifth thereof to the Mississippi River from St. Louis to the Gulf, one-tenth thereof to the Missouri River and its tributaries, one-tenth thereof to the Ohio River and its tributaries, one-tenth thereof to the upper Mississippi River above St. Louis and its tributaries, one-tenth thereof to the Sacramento and San Joaquin Rivers and their tributaries in California, one-tenth thereof to the Columbia and Snake Rivers and their tributaries in Oregon, Washington, and Idaho, and one-tenth thereof in the connection of the Great Lakes with the Ohio and Mississippi Rivers.

That a board is hereby created, to be known as the Board of River Regulation, consisting of the Chief of Engineers of the United States Army, the chairman of the Panama Commission, the chairman of the Board of Review of the Engineer Corps of the Army, the chairman of the Mississippi River Commission, the Director of the United States Geological Survey, the Chief of the Weather Bureau, the Forester of the Department of Agriculture, the Director of the Reclamation Service, the Chief of the Drainage Division of the Department of Agriculture, the Secretary of the Smithsonian Institution, one hydraulic engineer, one sanitary engineer, and one electrical engineer; the last three to be appointed by the President and to hold office at his pleasure, and each to receive an annual compensation of $7,500, payable out of the river-regulation fund.

The Chief of Engineers shall be the chairman of such board, and the secretary shall be annually elected by the board from its members.

That the functions of said board shall be to investigate and obtain full information concerning all matters involved in or specifically related to the objects set forth in this section, and for such purpose is authorized to expend a suitable and necessary proportion of the moneys therein appropriated; but said board shall not expend or incur liability for the expenditure of any money for the construction or execution of plans or projects without the specific approval of Congress, as hereinafter set forth; that said board is hereby authorized and directed to enlist through the President the services of any Federal department or bureau the statutory authority of which may involve investigations or constructive work that is necessary or desirable in the comprehensive performance of the objects set forth in this section, and to bring into cooperation and to harmonize and unify the work of said departments or bureaus as may be necessary to provide against duplication or unwarranted or incomplete work with respect to the objects herein provided; and that said board is authorized to defray the expenses of such investigations or assistance to the extent of the ultimate cost thereof to said departments or bureaus through a transfer of equivalent proportions of the appropriation herein provided.

That the board shall develop, formulate, and prepare plans for the accomplishment of the purposes herein provided, and shall report the same to Congress annually and at such other times as may be required; and whenever the recommendations or any parts thereof in said report shall receive the approval of Congress the said board shall proceed to construct and execute the same in accordance with the plans so approved: *Provided*, That the provisions of this section shall be so administered as in no way to supersede or conflict with any specific provisions which Congress shall from time to time make by way of appropriations other than such as are made by this act for work and improvements to be performed or maintained by the Corps of Engineers, United States Army, but that all work prescribed under this section shall be supplemental to and coordinated with the work as specifically prescribed by Congress in other acts.

That the board shall in all cases where possible and practicable encourage, promote, and endeavor to secure the cooperation of State and local government bodies, public and quasi public corporations, private associations, and persons in carrying out the purposes and objects of this act, including the securing of the financial cooperation of said parties; that it shall negotiate and arrange plans for the apportionment of work, costs, and benefits, and to secure the agreement and consent of said parties, contingent upon the final approval of same by Congress as herein provided, which approval and consent may include the acceptance and use of any funds or property donated or subscribed or in any way provided for cooperative work; but no moneys shall be expended under any arrangement for cooperation approved by Congres until the funds to be provided by the parties to such arrangement shall have been made available for disbursement.

[Mr. NELSON yielded for the transaction of certain routine business, which appears under the appropriate headings.]

Mr. LEA. Mr. President, I rise to a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator from Tennessee will state it.

Mr. LEA. Are we considering morning business?

The PRESIDENT pro tempore. The Chair so holds.

Mr. LEA. Then what was the motion of the Senator from Minnesota?

The PRESIDENT pro tempore. He made a motion to proceed to the consideration of the river and harbor bill, and it was agreed to.

Mr. LODGE. The Senator from Minnesota moved to proceed to the consideration of the river and harbor bill. That motion was agreed to.

Mr. LEA. That was not a unanimous consent under the previous unanimous-consent agreement?

Mr. LODGE. Not at all.

Mr. LEA. It was not under the first agreement, that immediately upon the conclusion of the morning business the Senate will proceed to the consideration of House bill 22593, the bill providing for the physical valuation of railroads, and so forth.

Mr. NELSON. That is subject to appropriation bills.

Mr. LODGE. It is subject to appropriation bills and conference reports.

The PRESIDENT pro tempore. The Chair so understands.

Mr. SMITH of South Carolina. I should like to make an inquiry. After the consideration of the pending matter, will we then have an opportunity under the unanimous-consent agreement to recur to morning business after the close of the morning hour for the day?

Mr. NELSON. I suggest that after we have disposed of the river and harbor bill we shall then take up morning business for a few moments.

Mr. SMITH of South Carolina. The reason why I make the request is that I wish to make a motion, and if the Senator from Minnesota will allow me, I will serve notice now that to-morrow I shall move to discharge the Judiciary Committee from the further consideration of the bill (H. R. 56) to prohibit interference with commerce among the States and Territories and with foreign nations, and to remove obstructions thereto, and to prohibit the transmission of certain messages by telegraph, telephone, cable, or other means of communication between States and Territories and foreign nations, and I shall submit some remarks thereon.

PACKAGES UNDER FOOD AND DRUGS ACT.

Mr. OLIVER. I ask the Chair to lay before the Senate the action of the House of Representatives on House bill 22526.

The PRESIDENT pro tempore laid before the Senate the action of the House of Representatives on the bill (H. R. 22526) to amend section 8 of an act entitled "An act for preventing the manufacture, sale, or transportation of adulterated or misbranded or poisonous or deleterious foods, drugs, medicines, and liquors, and for regulating traffic therein, and for other purposes," approved June 30, 1906, and requesting a conference with the Senate on the disagreeing votes of the two Houses thereon.

Mr. OLIVER. I move that the Senate insist on its amendments, and agree to the conference asked by the House, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the President pro tempore appointed Mr. OLIVER, Mr. LA FOLLETTE, and Mr. SMITH of South Carolina conferees on the part of the Senate.

RIVER AND HARBOR BILL.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 28180) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

The PRESIDENT pro tempore. The question is on the amendment submitted by the Senator from Nevada [Mr. NEWLANDS].

Mr. LODGE. Mr. President, on that amendment I desire to make a point of order. The amendment involves a policy of great magnitude and commits the Government to an expenditure of some $500,000,000, which seems to me to be a large amount, although I may appear to be a person of contracted ideas in saying so. Certainly it is general legislation, pure and simple, and I make the point of order against it.

The PRESIDENT pro tempore. The Senator from Massachusetts makes the point of order that the amendment proposed by the Senator from Nevada is general legislation. The Chair sustains the point of order.

Mr. NEWLANDS. Mr. President, with reference to what amendment was that made?

The PRESIDENT pro tempore. The Senator's amendment, which was submitted on Saturday last.

Mr. NEWLANDS. I did not hear the motion of the Senator from Massachusetts. May I inquire what it was?

The PRESIDENT pro tempore. The Senator from Massachusetts made a point of order that the amendment is general legislation on an appropriation bill, and the Chair sustains the point of order.

Mr. NEWLANDS. Mr. President, I shall speak generally regarding the pending bill, in continuation of my remarks of last Saturday.

The debate which progressed between the representatives of the three lower States on the Mississippi River—Louisiana, Mississippi, and Arkansas—and the representatives of the upper States—Illinois, Iowa, and Missouri—indicates how inefficient is the system of river development under which we are now and have been for years working.

What was that contention? The representatives of the lower Mississippi States succeeded some years ago in securing the organization of the Mississippi River Commission. That commission was composed of three engineers of the Engineer Corps of the Army, the Chief of the Coast and Geodetic Survey, a lawyer and two civil engineers appointed by the President, thus furnishing an example of the coordination of services called for by the amendment for which I have been contending and called for by the river-regulation bill, which I have been urging in Congress ever since 1907.

The representatives from the lower Mississippi then realized the necessity of relying not simply on the Engineer Corps of the Army but of bringing in cooperation with that corps the Chief of the Coast and Geodetic Survey, having jurisdiction over a part of the inland waterways of the country, and also the cooperation from the outside of noted civil engineers and the aid of a lawyer of distinction.

How did they secure the creation of that Mississippi River Commission? By making it a commission for the lower Mississippi alone? No. The act creating the Mississippi River Commission is broad and comprehensive in its terms, and embraces the entire Mississippi River from source to mouth, including, as I believe, if it is properly and liberally construed, all the tributaries of the Mississippi River. Even at that time there seems to have been some conception of the view now generally entertained upon this subject—that a river from source to mouth, with all its tributaries, is to be treated as a unit. So the Mississippi River Commission was created with the assent and by the cooperation of all the representatives from the States of the Mississippi Valley, and in its very terms its operations were to be as broad and comprehensive as are the reaches of that vast river and all its tributaries.

How has it been reduced by practical administration? By practical administration, through the contracting powers of a River and Harbor Committee in the other House, controlled for many years by one of the ablest men in that body in the line of the contraction of its operations, instead of the expansion of its operations—a gentleman now a distinguished Member of this body; a gentleman whose views are broad, but whose action is narrow in actual operation and work—the operations under that Mississippi River Commission were practically contracted at first to a region from Cairo to the mouth of the river, a stretch of only a thousand miles, when the entire Mississippi River, with all its tributaries, embraces a distance, I believe, of between ten and fifteen thousand miles.

So we found that, whilst the original bill was broad in its terms, embracing, under a liberal construction, the entire Mississippi River with its tributaries as a unit, the practical operation and administration was confined to the lower reaches of the river, 1,000 miles in length. Even there insufficient appropriations were made, $3,000,000 a year, which it was expected in a period of 20 years would secure the entire protection of the region on both sides of that river from destructive overflows and secure the maintenance of its channel.

Think of the smallness of the operation under that act! That region had been the victim for years of devastating floods. It was reasonable to expect that those floods would perennially recur; those floods inflicting enormous damage upon the cultivable area, reaching from $10,000,000 to $75,000,000 in a given year. Instead of Congress, under the inspiration of the River and Harbor Committee of the other House, taking the broad action that would result in the immediate appropriation and application within a short period of time of $50,000,000 or $60,000,000, required for the protection of the banks in the way of revetment or protection from overflow in the way of levees, with the cooperation of the States and adjoining districts, Congress took the risk in a single year of destruction from overflow amounting to the entire expenditure contemplated in a period of 20 years; and this the River and Harbor Committee of the House called economy—this confining of its appropriations to $3,000,000 annually, and subjecting that vast area to the danger of an annual loss of from $10,000,000 to $75,000,000! Then they restricted the expenditure to that area.

Were there no other areas that demanded attention? Was not the region between Cairo and Cape Girardeau requiring protection? That actual area of operations under the act was later on extended, but I do not think the amount of the appropriation was very largely increased; it was extended upon the assumption that it was idle to raise the levees below, when between Cairo and Cape Girardeau the banks were unprotected and an overflow extending back of the levees would sweep over the entire intermediate country between that region and the Passes, including Arkansas, Mississippi, and Louisiana, and thus force the way of the Mississippi through devious passes and bypaths to the Gulf, instead of through one deep, well-protected, and well-regulated channel. So they added on the space between Cairo and Cape Girardeau, a space of a few hundred miles; and now when the region above Cape Girardeau, comprising parts of the great, wealthy, and highly populated States of Missouri, Illinois, and Iowa, insist that they have problems of equal importance, problems of the same character, involving not only the regulation of the channel for navigation, but also the maintenance of the river within its banks through bank protection and levee building, the representatives from the States below conduct here a wordy warfare against the claims of their brethren above, and insist that the legislation which the latter propose involves almost a spoliation of the lower region of the river. Finally, this region of several hundred miles above is put off in this bill with a small appropriation, I believe, of $75,000 or $100,000.

Mr. PERCY. Two hundred thousand dollars.

Mr. NEWLANDS. Two hundred thousand dollars, with a view to investigation—investigation after a hundred years of experience!

How has it been with the Missouri River? Although the terms of the Mississippi River Commission act, in my judgment, embraced the Missouri as a tributary of the Mississippi, it was thought wise to organize a Missouri River Commission some years ago, and that commission was authorized to proceed by bank revetment and levee protection to control the fitful and eccentric Missouri River, passing for 300 miles between St. Louis and Kansas City through a valley of incomparable richness and alluvial soil, which melts like sugar from the impact of the flood waters and then makes its variable course through that valley, stretching from east to west, to-day diverted north, to-morrow south, the next day so eccentric in its course that the farm 10 miles away from the course of that river to-day may, as the result of flood to-morrow, be absolutely swept away by the invading waters, a vast principality of incomparable wealth and productiveness, if protected.

What was done with the Missouri River Commission? Under the inspiration of the contracted policy—broad in view, but narrow in action—maintained by the River and Harbor Committee of the House of Representatives for so many years and followed by the Commerce Committee of the Senate, after that commission had vindicated the necessity for its existence and the success of its work by revetting the banks on the Missouri River between Jefferson City and the junction of the Missouri with the Mississippi, after they had practically demonstrated for a distance of 60 miles in the most dangerous part of that entire valley the absolute success of the revetment system—which consists of weaving willow mats and then sinking them upon the sloping banks by imposing stone upon them, and thus preventing the washing away of the banks in times of flood—after they had proved the absolute success of that system, a success demonstrated to-day after many years of cessation of effort by the entire integrity of the banks of the Missouri River at that point, the operations of the Missouri River Com-

mission were ended by act of Congress and the commission was dissolved.

I do not question the conscientiousness of the Senators and the Representatives who took part in that movement. They were doubtless impelled by motives of economy. Many of them felt, perhaps, that river regulation itself was dead and that all this work ought to be undertaken by the riparian proprietors in the interest of their lands. Many of them evidently thought that it would be practically impossible to control the stream; but if you want to find the hidden and directing force behind the movement, to which Congress unconsciously was obedient, you will find it in the fact that there are four railroads, two on each side of the Missouri River, paralleling its banks from Kansas City down to its junction with the Mississippi River. Those railroads were hostile to the water carrier. The effect of the very existence of a possible water carrier was felt in the diminution of rates. The effect of a successful water carriage could, in their judgment, hardly be measured; and so, reaching out for freight, public opinion was influenced through the newspapers and unconsciously directed to a few mistaken considerations of economy, possibly to a mistaken consideration of the hopelessness of the work, and, finally, to the abandonment of that great enterprise. So the Mississippi River Commission, narrowed in its operation to the region below Cape Girardeau, remained, and the Missouri River Commission went out of existence.

During all that time who were the men who were urging the continuance of the Mississippi River Commission and of the enlargement of its powers and of its operations? The representatives from the Southern States, from the States of the lower Mississippi Valley, almost all of them strict adherents of the doctrine of State rights, almost all of them opposed to the extension of the power of the Federal Government, opposed to the enlargement of those powers, and favoring a strict construction and a narrow exercise of the powers granted. Yet they insisted upon the interstate-commerce power of the Nation being exercised in such a way as effectually to regulate and control that river from Cape Girardeau down. They insisted upon it upon the ground that under the interstate-commerce power the Nation had a clear right to regulate that river, and that it was its clear duty.

What did the exercise of the interstate-commerce power mean? It meant the advancement of transportation. That is what it meant. It did not mean simply the protection of the lands in private ownership adjoining a great river. That might be provided for as incidental to the work of transportation; but the main purpose was transportation, and the only legitimate purpose under which the National Government's powers could be invoked. Yet were the representatives from that region exceedingly solicitous for the advancement of transportation, or was their real purpose the protection of their lands?

They have secured the protection of their lands, inadequate though I admit it to be; but what have they done for the advancement of transportation? I have served on the Commerce Committee, and I know from conversation with some of the members of the committee from that region that some of them are skeptical about ever restoring transportation upon the river. Yet they are voting, nominally under the commerce clause of the Constitution, for the expenditure of these large sums of money, but really reaching their hands into the Federal Treasury for an unconstitutional purpose, if we apply the moneys to that purpose alone. The appropriations are justified, so far as they are national appropriations, only by the advancement of transportation.

What does transportation mean upon the Mississippi River? Does it mean simply the deepening of the channel? Does it mean simply bank protection? Does it mean simply levee protection? Or does it mean the construction of a waterway as they construct a waterway in Germany, with a proper channel, with a proper protection of the stream so as to maintain its flow, and with transfer facilities and terminal facilities and instrumentalities of coordination and cooperation with rail carriage and ocean carriage? Clearly the latter. You might as well develop a railway by scattered developments here and there, the construction of 10 miles here and the construction of 5 miles there, without any connection, or the construction of a railway without terminals, without sidetracks, without station houses, without freight houses, as to construct a waterway and pay attention only to its channel and its banks.

Go to Germany, and you will find every river highly artificialized and canalized, all of them connected with each other by purely artificial channels; and at every station, corresponding to our railway stations, you will find public facilities provided by the Government for the transportation of freight from car to boat, for the storage of freight, and for the economical and rapid handling of the freight. Not only have they done that, but they have made their water fronts perfect, not only in utility but in beauty, by making them the most attractive parts of their municipalities.

We condemn our water fronts to hideousness, we dedicate them to ugliness and to inutility, whilst Germany creates a union of beauty and utility upon its water fronts, furnishing a lesson to this enterprising country. There they protect the waterway, and they do not allow one public servant to be destroyed and sandbagged by another public servant, as we do in this country. They define the relations between the different waterways in such a way as to promote the interests of both waterways and railways, to make them cooperate as public servants, instead of permitting them to engage in a deadly antagonism and warfare with each other, leading to the destruction of one or the other.

What effort has been made by the representatives from the lower Mississippi, who demand from us action upon this great subject, and who insist that it is the duty of the Nation to protect them from the accustomed flow of waters which nature has for centuries precipitated upon them—what have they done, what have they suggested in the way of a development of transportation, which is the real function of the National Government? I may be mistaken, but I have found no adequate suggestion from the representatives from that region as to the development of the facilities for transportation.

Mr. SHEPPARD. Mr. President, will the Senator yield for a question?

The PRESIDENT pro tempore. Does the Senator from Nevada yield to the Senator from Texas?

Mr. NEWLANDS. Certainly.

Mr. SHEPPARD. Does the Mississippi River Commission act, in the Senator's opinion, embrace all the tributaries of the Mississippi?

Mr. NEWLANDS. In my judgment, it does. It is sufficiently broad in its terms, liberally construed; but it has been narrowed down in its operation to this area on the lower Mississippi. I wish to say that I have no hostility whatever to this enterprise on the lower Mississippi. On the contrary, I have been its consistent friend. A year ago, when the floods broke out, I insisted upon having the appropriation increased from $3,000,000 to $10,000,000, instead of a mere $6,000,000. What I object to is the narrowness of view of the representatives of the lower Mississippi who seek in this bill to narrow the operations of the Mississippi River Commission, and who have refused—or, at all events, have failed—to present to us a vast, connected scheme of river development that will enable the National Government to carry out its true function of developing interstate transportation.

Mr. PERCY. Mr. President, will the Senator yield to me for a moment?

Mr. NEWLANDS. I will.

Mr. PERCY. Unintentionally, I am sure, the remarks of the Senator from Nevada would convey the impression that nothing has been done by the Mississippi River Commission in aid of navigation or for the purpose of benefiting navigation upon the Mississippi River. The last report made by that commission shows that they now maintain a channel of about 9½ feet at low water from Cairo to the Gulf; that at the lowest stage of the Mississippi River boats drawing 9½ feet can pass from Cairo to the Gulf. This is a distinct and marked improvement within the past few years, due solely to the work of that commission.

Again, speaking of terminal and dock facilities, the city of New Orleans provides the best inland dock facilities belonging entirely to the city and used for the benefit of the public of any city in the United States. That more has not been done in the way of providing terminal facilities might very well be attributed to the amount that has been appropriated. There never has been an appropriation made that has been adequate to carry out the aims and the recommendations and the work mapped out by the Mississippi River Commission. The kind of work of which the Senator speaks, in providing adequate facilities up and down that tremendous river, would call for an appropriation for that river alone of almost the amount suggested in his amendment—$50,000,000—for the rivers of the United States.

Mr. NEWLANDS. Mr. President, I am not complaining of the operations of the Mississippi River Commission within the limited appropriations granted that commission by Congress. I am simply adverting to the fact that the representatives of that entire region in Congress have been devoting themselves in their legislation more to the protection of their lands from overflow than to the promotion of transportation. While New Orleans has done excellent work in the preparation of docks, designed, I believe, not only for river but for ocean traffic, it certainly has not gone far enough; and one has only to sail,

as I have, from Cairo down to New Orleans, and witness the decaying wharves and the inadequate transfer and terminal facilities all along the line, the evident domination over the transportation of that region by the railroad companies, to realize that the powers of the National Government have not been adequately invoked in the carrying out of its great function of promoting interstate transportation.

Mr. KENYON. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Nevada yield to the Senator from Iowa?

Mr. NEWLANDS. Certainly.

Mr. KENYON. I am very much in harmony with the view which is being expressed by the Senator, and I wish there were some way of reaching it. Does the Senator believe that as long as river and harbor bills of this character, constructed as this bill is evidently constructed, are passed by Congress his plan will ever receive serious consideration?

Mr. NEWLANDS. I am afraid not. I am beginning to be afraid not. I have been endeavoring to promote a system that, without interfering at all with the appropriations in the river and harbor bill, would gradually bring about appropriations under the river-regulation bill which I have offered in such a way as to make the work of the old dovetail in with the work of the new and result in an enormous enlargement of the old work. But everywhere I find myself opposed by the representatives of the very region most to be benefited, fearful lest some great policy may be inaugurated that will temporarily imperil the appropriations which they have. I have nothing of that kind in view.

Mr. KENYON. Why is not the quickest way to bring about this result, then, to defeat measures of this kind just as often as they come up?

Mr. NEWLANDS. Mr. President, I am exceedingly reluctant, so far as I am concerned, to take such action. I have served on the Commerce Committee. I do not contend that the expenditures provided for by this bill are improper expenditures. I have no doubt most of them are necessary. I know this expenditure for the Mississippi River is necessary, and ought to be enlarged. I would not, in order to obtain a greater good, temporarily arrest or endanger the work in which these gentlemen are interested. What I protest against is their inertia, their unwillingness to receive new ideas, their unwillingness to take the entire Nation within the scope of their vision. What I complain of is that they view only that distance of a thousand miles from Cairo to the Passes, without taking into consideration the great and broad question of interstate transportation involved in the regulation of interstate commerce.

Mr. KENYON. I wish the Senator, before he closes, would illuminate the subject of just how the river and harbor bill is formulated. I have watched it for a good many years outside of Congress, and have watched the fight in the House of the present Senator from Ohio [Mr. BURTON] against the extravagances of the river and harbor bill.

For instance, here are appropriations for a large number of creeks at different places. Here is an appropriation for Toms River, in New Jersey. How do we ascertain that a thousand dollars is going to help the navigation of Toms River? Here is an appropriation of $1,500 for Fishing Creek, N. C. How do we determine whether that appropriation is for navigation or to make the creek really what its name implies? I might make the same inquiry as to Swift Creek, in North Carolina, for which $500 is appropriated. How does the Committee on Commerce ascertain that these appropriations for creeks all over the country are to help navigation?

I wish the Senator would touch upon that matter before he sits down.

Mr. NEWLANDS. I will state to the Senator that the action of the Government upon the questions to which he refers is much more logical than would appear from the terms of these appropriations. It is true that there are appropriations in this bill for creeks upon the Atlantic Coast; but it will be found that many of the so-called creeks are inlets or arms of the sea, and that the appropriation involves the removal of bars or other obstructions to navigation that will enable the coasting trade to reach farther into the interior. I do not say that all of them are justified, but I have no doubt most of them are.

I will state to the Senator the process by which this is done. The initiative is with the Member of Congress, who introduces in the first place a bill for a survey, and has it put upon the river and harbor bill, if he is successful in inducing the committee to believe that it is necessary and proper. That bill involves a preliminary survey by the Engineer Corps of the Army. They report upon it, and if it requires further examination and further expenditure they so report and a further expenditure is made. Before any enterprise is finally entered upon, I believe, these recommendations go to the board of review in the Engineer Corps of the Army, composed of very highly educated and very capable men, and they pass upon the feasibility of the project and its relation to commerce, and report. If they report favorably, they report the amount necessary in a written report to Congress, and then Congress, if it concludes to act favorably, makes such appropriation as it deems advisable, usually the amount called for by the engineers.

In the improvement of all those methods the country owes the greatest obligation to the Senator from Ohio [Mr. BURTON], who was for many years the chairman of the Rivers and Harbors Committee of the House, and who pursued one uniform and consistent course of insistence that this whole matter should be taken out of the spoils system which had previously existed and be put upon the merit system, the merit of each project being considered by competent engineers. The methods have been vastly improved under the leadership of the Senator from Ohio. My only complaint of the policy which he pursued was that, in my judgment, it was not of sufficient expansion. I can not call it a policy of contraction. The expenditures did steadily decrease, but it was not a policy of sufficient expansion which would take into view all the waterways of the country and make a study of them from source to mouth with a view to making them efficient instrumentalities for transportation, and incidentally making them useful for every purpose to which civilization could put them, thus uniting the related uses with the principal use, the exercise of which alone belonged to Congress, making projects feasible which would otherwise not be feasible, and producing wealth from the development of these uses that would be largely compensatory of the cost in perfecting them.

That is what I complain of. And I complain of the representatives of the lower Mississippi, of their narrowness of view in not realizing that this is a Union of States, that all these rivers are interstate, that their successful development does not depend simply upon the bank protection and levee building of the lower reaches of the Mississippi River, but it depends upon taking a broad and comprehensive view of the entire Mississippi River and its tributaries, and by constructing works in the upper reaches of these rivers and their tributaries useful in a compensatory way for irrigation, for water-power development, and by the raising of levees in the lower reaches with a view to swamp-land reclamation, turning these waters from instrumentalities of destruction into instrumentalities of benefaction. That is the policy, and the policy alone which will make the Mississippi River with all its tributaries an efficient instrumentality of interstate commerce.

I have referred to the contest between the representatives of the lower Mississippi and the representatives of the middle Mississippi River which we have seen. We saw another contest. The construction of levees upon the Arkansas side of the Mississippi River narrowed the stream and necessarily raised the heights of the flood, and as a result the city of Memphis was threatened and much injury was done. An overflow which, according to the Senator from Tennessee [Mr. WEBB], threatened the health of that region, injured its commerce and its production and overflowed valuable portions of the city; and the city of Memphis is to-day considering methods that will save it from these destructive results.

An amendment was offered by the Senator from Tennessee [Mr. WEBB] to this bill, providing for cooperation between the Mississippi River Commission and the authorities of Memphis, so that by joint plans and works the great work, which is of so great benefit to Arkansas, can be conducted in a way that will not be injurious to its neighboring State of Tennessee or its neighboring city of Memphis. A point of order is made on it here by the representative of the neighboring State of Arkansas, and this amendment goes out of the bill at the very time when Memphis is planning and when the exigency of the situation demands cooperation in plans and work.

Mr. President, we of the intermountain region have some interest in this matter. My own State unfortunately has none, because my State is in a great basin bounded on one side by the Rocky Mountains and on the other by the Sierra Nevada Mountains, and having no streams which form tributaries of a great navigable river. That great basin consisting of the State of Nevada and parts of Idaho, Utah, and Arizona has streams, it is true, which take their sources in the mountains, but those streams sink into great lakes in the desert, where the waters serve no use except to satisfy the thirst of the sun. Our problem there is a purely domestic problem of arresting these waters upon the way to these great salt sinks and storing and diverting them over the arid land and making it fruitful of production.

But there are portions of that great trans-Missouri region which are tributary to navigable rivers—the great State of Montana to the Missouri River and its tributaries, the State of Wyoming, the State of Colorado, the States of North and South Dakota, the western parts of Kansas and Nebraska and Oklahoma, all of them semiarid in character, tributary to the Mississippi River system—and they have an interest in the regulation of that river. They do not want to see all their waters go to the Gulf in a rapid and uninterrupted flow, bringing destruction to their neighbors below. They want them diverted above and applied to the public lands of which the Nation is the proprietor in such a way as to prepare them for settlement, and made useful there primarily for irrigation, and, secondarily, for the development of water power, and made useful in such a way that the water percolating through that soil gradually makes its way back to the main or tributary stream and helps to swell the flow of the Mississippi River at the period when it is most needed for navigation—the low-water period, the period of drought.

Then in that intermediate region, humid in character, not requiring the artificial use of water except for the highest purposes of intensified cultivation, they are interested in the development of water power. Right on the Mississippi River between Cairo and St. Louis there is a point, according to the testimony of the eminent engineer, Mr. Cooley, of Chicago, where a dam can be constructed that will develop 800,000 horsepower. Think of it; 800,000 horsepower will produce $30 annually each horsepower, $24,000,000 annually. In our country we regard a horsepower as worth between two and three hundred dollars, and the annual revenue from it we rate at from $30 to $60.

So we have on the upper Mississippi a proposal in Minnesota embraced in this bill, in a casual and sporadic way, where they propose to put up a structure for navigation which will develop, by a little extra expenditure, an enormous water power—hydroelectric power. Thus this amendment proposes practically what is called for by my river-regulation bill—cooperation between the Nation on the one hand and the State of Minnesota upon the other.

We find here and there throughout our legislation practical instances of this cooperation which I desire to see entered upon as a general scheme of legislation working automatically under adequate appropriation, under the guidance of a board of expert engineers.

Then we have on the Connecticut River another similar project which it is sought to put upon this bill, involving practical cooperation between the State of Connecticut and the United States. Yet is Connecticut the only State that is interested? Not at all. The Connecticut River takes its source in Vermont and New Hampshire, flows through parts of those States, through the State of Massachusetts, and through the State of Connecticut. Every one of those States is just as vitally interested in the full and complete and comprehensive development of the Connecticut River as is the State of Connecticut. Yet so narrow and contracted is our vision that we are embracing only a scheme of cooperation between Connecticut and the United States, leaving out of view entirely the States above.

Three years ago I was invited by the Board of Trade of Springfield to address them upon this question, and I found them immensely interested in the development of the Connecticut River; first, because they have been dependent upon it for the development of water power, and they wanted its development; and secondly, because they had been interested in the question of transportation, and they found in their way to the Sound railroad bridges and dams and various intervening structures, and they wished the Connecticut River opened up as an arm of the sea away up in the interior of Massachusetts, a great manufacturing region. They were insisting that this obstruction should be swept away and that the Nation should regard the Connecticut River as a national asset, so far as commerce is concerned, and as an asset of each one of the States, so far as their domestic uses were concerned. They were insisting upon the union of the powers and the functions and the jurisdictions of all these sovereignties in work that would advance the public interest, each acting within its powers and within its jurisdiction, neither invading the jurisdiction of the other, but engaging in team work as individuals would do when they stand in a similar relation with each other. We find practically that measure doomed to defeat. In the shape in which it passed the Senate it will be vetoed by the President if he remains firm in the conviction which he has hitherto expressed. We have practically doomed that beneficial measure to defeat, a measure of cooperation between the Union and the State, simply because the agency which we have selected to carry out our national uses and the agency which the State of Connecticut has selected to carry out its domestic uses in the development of that water, acting both as the agent of the Nation and the States, expressed its willingness in this measure to pay a certain portion of its profits into a fund for the improvement of the navigation of the Connecticut River.

The Senators from the southern reaches of the Mississippi who have for years been gaining these appropriations from the National Government, not large enough in my judgment, ostensibly with a view to promoting transportation but really with a view of protecting private lands, vote against and defeat the only practical method of bringing the United States and the State of Connecticut into cooperative action with reference to a structure in that river, designed not only for the purposes of navigation under the jurisdiction of the United States but for the development of water power under the jurisdiction of the State.

Now, I have indicated how we of the intermountain States—though my individual State is not—are interested in the Mississippi Valley. How is it with the Pacific Coast? There we have two or three great drainage areas, the drainage area of the Columbia River with its tributary streams draining through the States of Oregon, Washington, Idaho, and Montana, away into the interior; the waters from the western parts of Idaho and the western part of Montana draining into the Pacific, while those of the eastern parts drain into the Mississippi River and into the Gulf. Ought not those four States to be brought into cooperation with the United States in a system of related development, producing teamwork that will result not only in the promotion of navigation, but in the extension of irrigation and the development of water power and the reclamation of swamp lands? Yet we have no machinery in order to accomplish that.

Then take the next great drainage area, that of the San Francisco Bay, which you see upon the map, the drainage area extending north and south, a distance of nearly 500 miles drained by the Sacramento River running from the north and by the San Joaquin River running from the south, both of them uniting near the Bay of San Francisco, emptying their united waters into that bay, and those waters emptying through a narrow gorge called the Golden Gate into the great ocean of the Pacific, an area of incomparable fertility, an area of incomparable productiveness, the soil and the climate of which promise the most valuable products, the grape, the citrus fruits; all the high-priced products. One-half of that drainage area of 500 miles, the northern half, has sufficient water for cultivation. The lower half has an insufficient supply, a large portion of it being devoted to aridity, and requiring irrigation. There we have those two rivers, capable of being developed to the highest degree as the instrumentalities of transportation, and yet their development delayed in the past by the influence of the great railway interests there. That vast region, 500 miles long and 100 miles wide, composed of this fertile area, is doomed to fitful production—to insufficient production—to absolute aridity in some places.

What does a scientific treatment involve there? A treatment of the arid lands above, a treatment of the swamp lands below, resembling those of the Mississippi Valley, and the development for interstate commerce. Why, of course, the development of that large area involves cooperation of the different sovereignties having jurisdiction, the cooperation of the Nation with the States, and the cooperation of both with private owners, who have simply private interests to serve, and yet the development of which interests would vastly advance the wealth and prosperity of the country. Shall we not provide a system of cooperation between these great interests that will involve not only the development of transportation from one end of the valley to the other, but also involve the development of irrigation of the arid lands and the reclamation of the swamp lands, for recollect that there the floods of these rivers constitute the same destructive agency that they do in the Mississippi Valley and the waters which are stored and developed for irrigation and water power in the course of nature become engines of destruction to the regions below?

Why, Mr. President, not an ounce of water should be permitted to flow into San Francisco Bay and out through the Golden Gate until it has served every useful purpose to which it can be put; and it is perfectly possible, by canals along the foothills, to bring almost every acre of that vast valley, north and south, under the productive influences of an ample water supply, with the accompanying development of water power unexampled throughout the world.

Then as you go down the Pacific coast there is the Colorado River, emptying into the Gulf of California, taking its source in Colorado, flowing through the southern part of Nevada and the northern part of Arizona and through the southern part of California, a river capable of an enormous development of water power, a stream capable of such conservation all along the

line as to develop every civilized use and of development in such a way as to finally promote the conduct of the river over the most fertile alluvial deposits on these vast plains of Arizona and California in the south that are now doomed to aridity.

In some cases, through the strenuous effort of individual proprietors, the waters have been diverted. You have heard of the great Imperial Valley, in the southern part of California, fed by a ditch taken from the Colorado River, and led into Mexico, and then out from Mexico to the north into this Imperial Valley, which at one time was below the level of the sea, and at one time was an arm of the sea. I should probably surprise you if I were to give you the statistics—I have them not at hand—regarding the production of that valley, conducted under conditions of exceptional danger, threatened every year by the enormous floods that come from the north and which ought to be utilized there for both water power and irrigation. Is not that a national problem? Is it not an international problem? For recollect that the contour of the country is such as to absolutely compel the conduct of water, diverted in Arizona for this valley in California, through that portion of Mexico called Lower California, into the southern portion of the State of California.

Mr. SHEPPARD. Mr. President——

The PRESIDING OFFICER (Mr. CURTIS in the chair). Does the Senator from Nevada yield to the Senator from Texas?

Mr. NEWLANDS. I do.

Mr. SHEPPARD. Mr. President, the Red River of the South is also capable of development along the lines suggested by the Senator from Nevada, and especially in Oklahoma and in northern and northwestern Texas.

Mr. NEWLANDS. I have no doubt of it, and yet the Senator from Texas will recall that there was some sarcastic comment the other day regarding the Red River because a certain work has been done upon the Red River for a number of years, and not in such an effectual way as to promote navigation; but the difficulty is that it has been insufficiently done, inadequately done. There has been such construction, as I have already said, that we would have in the case of a railroad where we would build a detached section here and there of 10 or 15 miles.

Mr. SHEPPARD. I will state that $3,000,000——

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Texas?

Mr. NEWLANDS. Yes.

Mr. SHEPPARD. Three million dollars have been expended on the river, but the expenditure has been scattered throughout 30 or 40 years and it has been given to the river in driblets of $100,000 and $200,000 each year. Consequently it has been impossible to develop the river in a satisfactory manner, and the stream ought not to be indicted in the eyes of the public because it is not navigable or navigated.

Mr. NEWLANDS. Mr. President, the Senator from Texas is quite right. It is the inadequacy of the system, the inadequacy of the plans, that is responsible for the failure of the promotion of transportation upon that river; yet if this inadequate work goes on, unless the people along those rivers enlarge their vision and take in the whole Union, unless they stop simply asking for individual appropriations for individual projects here and there, after 30 or 40 or 50 years of unsuccessful effort in promoting transportation, the Nation will abandon the work altogether, and thus these very representatives of those regions, holding on tenaciously to the present system of individual projects, will find themselves the victims of that system.

Mr. SHEPPARD. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Texas?

Mr. NEWLANDS. I do.

Mr. SHEPPARD. I had rather see the work on the Red River abandoned altogether than to have it continued in the present unsatisfactory and unscientific manner.

Mr. NEWLANDS. I think the Senator speaks wisely and patriotically in that utterance.

Now, what have we got to face? We have got to face an expenditure of $50,000,000 annually; but men hold up their hands at the thought of expending $50,000,000 annually in the development of our rivers. The public servants of this country called the railways are expending from half a billion to a billion dollars annually for railways. Of course, those enterprises are being conducted as private enterprises, but they really constitute a public burden, because they are conducting them as public servants, and the public must pay the interest upon the investment in rates for freight and for fares. The great Government of the United States, having charge of the waterways and jurisdiction over them and solely responsible for making them efficient instrumentalities for transportation, stands aghast at the expenditure of $50,000,000 annually in perfecting this system, when private interests expend from five hundred millions to a billion dollars annually in the development of our railways. Yet think how our expenditures have increased under the present inefficient system.

The river and harbor bill here carries $40,000,000, a very large portion of it, it is true, devoted to harbors. In my judgment, these developments ought to be absolutely divided into separate bills. They have no particular relation to each other. Our harbors relate to foreign commerce in the main, while our rivers relate to interstate commerce. The method of their development is entirely different, and we should not have in the public eye the expenditures made upon our harbors regarded as a portion of the burden which they are called upon to assume for the development of our rivers. We ought to know just how much we are expending for our rivers, and we ought to have them in a separate bill.

I have presented a statement to the Senate containing a segregation of these expenditures in this bill, and we find that about $17,000,000 is allotted to harbors and about $23,000,000 to rivers. I have also had those expenditures subdivided according to the different waterway systems, so that you can see how much expenditure there is in each watershed; and we find that of the $23,000,000, $15,000,000 is being spent now on the Mississippi River and its tributaries. My bill for river regulation involves the expenditure of $50,000,000 annually, of which one-tenth, or about $5,000,000, goes to the rivers, not the harbors, of the Atlantic coast; $5,000,000 to the rivers of the Gulf coast, exclusive of the Mississippi River; $25,000,000 to the entire Mississippi River and all its tributaries, divided up, $10,000,000 to the Mississippi River below Cairo; $5,000,000 to the Ohio; $5,000,000 to the Missouri; $5,000,000 to the upper Mississippi; and then about one-fifth, or $10,000,000, for all the waterways finding their way to the Pacific Ocean.

We are already spending under our present inefficient system $23,000,000, and this river regulation bill which I have proposed, embracing every drainage area in the country, involves only $50,000,000, but it involves that expenditure continuously for a period of 10 years; so that the coordinated scientific and engineering services of the country having anything to do with water may enter upon large and comprehensive plans, involving every watershed in the country, with a certainty that $500,000,000 will be available in 10 years; and to that $500,000,000 spent by the Nation at least $500,000,000 will be added by the respective States and by private interests in the development of the uses of water related to that of navigation; so that between the two we will practically have in the next 10 years a billion dollars spent in the development of that greatest of national assets, the water of the country for every beneficial use.

If we can with our present revenues stand the expenditure of $23,000,000 annually, can we not with the increasing wealth and population of the country and the increasing revenue of the country stand $27,000,000 more during the next 10 years? If our present sources of revenue are not sufficient, can we not, by the paltry tax of one-quarter of 1 per cent upon the incomes of the country, raise $25,000,000 in addition to that which we already expend upon our rivers?

One-quarter of 1 per cent, I say, upon the incomes of the wealth of the country, for the statisticians of the country have estimated that a tax of 1 per cent will produce $100,000,000 annually. Can not the great wealth of the country sustain this great enterprise that is to advance the wealth of the country; that is, to increase the productive energy of every section of our country and increase not only its productiveness but its facilities for transportation and diminish largely the present cost of living and the present cost of operation? Thus we will not only increase production, but diminish operating expense.

Can not our great Nation undertake a work that Germany has been conducting ever since it became an empire and with remarkable consecutiveness and continuity of purpose, a work that France has been pursuing for over a century, so that today you can go by water through related and connected waterways, through the artificialized waterways connecting the natural rivers, from almost any part of Germany to any other part of Germany, and from almost any part of France to any other part of France?

Mr. President, I published the other day resolutions which have been passed by State legislatures in favor of this river-regulation bill, resolutions that have been passed by the chambers of commerce and boards of trade from Philadelphia to San Francisco, utterances of great conventions held for the conservation of our natural resources, great conventions held for the development of waterways, for the development of forests, and for other purposes; resolutions passed unanimously by the governors of all the States in conference assembled at

the White House, utterances of the public press from one end of the country to the other, demanding big plans, big works, big expenditures, and a consecutive policy. Yet Congress has lagged behind. Congress necessarily is always behind public opinion. It should be. Its action is the reflection of a public opinion already created. It rarely creates public opinion. It is exceedingly slow to yield to public opinion, not because it is hostile to public opinion, but because it wishes rightly to know in what direction public opinion points.

Is there any need of our waiting longer? If all conventions are convinced, if State legislatures are convinced, if both parties, as indicated by their platforms, are convinced, if the magazines of the country are convinced, if the newspapers of the country are convinced, is it necessary that we should wait longer in order to ascertain what public opinion is upon this subject?

Mr. HITCHCOCK. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Nebraska?

Mr. NEWLANDS. Certainly.

Mr. HITCHCOCK. I desire to say, as bearing out what the Senator from Nevada has stated, that I believe there is a growing sentiment, particularly in my region of the country, in favor of some systematic plan such as the Senator proposes.

I hold in my hand a resolution passed by the senate of the State of Nebraska last week, which I shall present to-morrow at the proper time, urging the Government to pay more attention to and make proper appropriations for conserving such watersheds as there are in the State of Nebraska, particularly with a view to the impounding of waters for irrigation purposes, so that they may not only serve the lands in Nebraska but may be prevented from becoming a cause of danger to the lands upon the lower rivers in seasons of flood.

While this applies only to Nebraska, I believe it illustrates a growing sentiment all over the country that there is some connection between the impounding and use of waters for irrigation purposes and thus preventing that same water from becoming a cause of danger when seasons of flood arise.

Mr. NEWLANDS. I may say that public opinion is made up upon that subject. You can not read a single one of the popular magazines without finding some reference to this subject, all favorable to it. You can not find a political convention that meets that declares against it; and all of the national conventions have declared for it. You can not find a convention met together for any public purpose to-day without finding some expression relating to the necessity of big plans and works in the development of the water assets of the country. All this is intensified by the declaration of the representative governors of the various States, who, in the resolution which I presented to the Senate the other day, expressed an intense conviction upon this subject.

I have here two editorials which have recently come into my hands which I should like to have inserted in the RECORD—one from the New England Homestead, a great agricultural magazine, devoted to the farming interests of the New England country, and the other from Southern Farming, a magazine published at Atlanta, Ga.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NEWLANDS. I will read only a few lines. The New England Homestead says:

> The legal, ethical, moral, political, economic, and social justice to all the people all the time of Federal control of navigable interstate streams is absolutely unquestionable. It should be passed upon as a finality by the Supreme Court.
>
> The Windsor Locks dam bill probably will not be acted upon in the House before Congress adjourns March 4. This is just as well. It will give the new administration the full duty of setting forth its policy toward conservation. Certain it is that the American people will permit no backward step whereby their priceless heritage of flowing waters, and of forests and mines in the public domain, shall continue to be exploited by the few at the expense of the many, for not only present but future generations.
>
> Meanwhile the action of the Federal Senate makes it doubly imperative that each State legislature take prompt and adequate action to wisely conserve the public welfare within the limits of the respective States, regarding the utilization of all forms of natural resources within the respective States.

Here let me say that in numerous States of the Union there are waterway commissions, conservation commissions, and similar organizations already created under the force of this movement, with a view to cooperation with the National Government. Of course it is utterly impossible to enter upon any scheme of development of our waterways without the consent and the participation of the National Government.

So, also, Southern Farming has an article entitled "Harness the Mississippi River system." This paper is published at Atlanta, Ga. The heading continues:

> How the Nation can do it—Benefits to every State—The hydroelectric trust brought to its knees—No conflict between Nation and State—A revolution in railroad and water transportation—Marvelous developments in sight for the people, not the trusts—The South may thus prevent disastrous floods—May promote drainage of wet lands, irrigation of dry lands—Each State is aided in developing its water powers and other resources—How every Southern State may cooperate with Nation in this wise development.

The matter referred to is, in full, as follows:

[From New England Homestead, Feb. 22, 1913.]

GOOD AND BAD ACTION BY THE UNITED STATES SENATE IN THE WINDSOR LOCKS DAM BILL.

All persons engaged in the business of transmitting hydroelectric power between the States are common carriers subject to the Interstate Commerce Commission. The Borah amendment to this effect was unanimously adopted by the United States Senate February 17, when it passed the Windsor Locks Dam bill.

The Jones amendment was also adopted without objection. It provides that the franchise shall be forfeited if the Connecticut River Co. shall in any way become a part of a combination in the form of an unlawful trust or enter into any contract or conspiracy in restraint of trade.

The Cummins amendment was adopted, striking out the provisions providing for compensation upon termination of franchise. In place thereof was substituted language to the effect that the Federal Government should take over the property at the end of 50 years.

The two amendments first named are excellent. They will doubtless be incorporated in all Federal water-power franchises hereafter. They are right in line with all that the New England Homestead has been fighting for.

The Senate went dead wrong in voting, 74 to 12, to strike out from the bill the provision that the Federal Government may impose a reasonable charge for the use of the water power in this navigable stream. It is this provision that expresses the principle of Federal control over navigable waters and Federal conservation of all natural resources owned or controlled by the National Government. This principle is the right one. It must and shall prevail. The opposition to it is based on a misconception of State rights.

The water in the Connecticut River from New Hampshire, Vermont, and Massachusetts, under this States-right theory, has no "right" to overflow the river's banks and do damage in the State of Connecticut. The Mississippi has no "right" to break the levees and do vast damage by flooding the valuable lands of Mississippi and Louisiana. How absurd such a contention!

The legal, ethical, moral, political, economic, and social justice to all the people all the time of Federal control of navigable interstate streams is absolutely unquestionable. It should be passed upon as a finality by the Supreme Court.

The Windsor Locks Dam bill probably will not be acted upon in the House before Congress adjourns March 4. This is just as well. It will give the new administration the full duty of setting forth its policy toward conservation. Certain it is that the American people will permit no backward step whereby their priceless heritage of flowing waters and of forests and mines in the public domain shall continue to be exploited by the few at the expense of the many, for not only present but of future generations.

Meanwhile the action of the Federal Senate makes it doubly imperative that each State legislature take prompt and adequate action to wisely conserve the public welfare within the limits of the respective States regarding the utilization of all forms of natural resources within the respective States.

[From Southern Farming, Feb. 8, 1913.]

WATER POWER AND THE PUBLIC—HARNESS THE MISSISSIPPI RIVER SYSTEM—HOW THE NATION CAN DO IT—BENEFITS TO EVERY STATE—THE HYDROELECTRIC TRUST BROUGHT TO ITS KNEES—NO CONFLICT BETWEEN NATION AND STATE—A REVOLUTION IN RAILROAD AND WATER TRANSPORTATION—MARVELOUS DEVELOPMENTS IN SIGHT FOR THE PEOPLE, NOT THE TRUSTS—THE SOUTH MAY THUS PREVENT DISASTROUS FLOODS—MAY PROMOTE DRAINAGE OF WET LANDS, IRRIGATION OF DRY LANDS—EACH STATE IS AIDED IN DEVELOPING ITS WATER POWERS AND OTHER RESOURCES—HOW EVERY SOUTHERN STATE MAY COOPERATE WITH NATION IN THIS WISE DEVELOPMENT.

(By Herbert Myrick, president Orange Judd Co.)

[Interests allied with the so-called Hydroelectric Trust already monopolize too much of the water powers of the United States. During the past year these interests have sought to get control of the power in the Connecticut River at Windsor Locks, Conn. They propose to enlarge the old dam there, so as to generate more power. In doing this navigation would be made possible by a canal and locks around the dam.]

[At first the trust wanted to "swipe the whole thing." When the scheme was relentlessly exposed by the Orange Judd's eastern weekly, the New England Homestead, the trust began to modify its demands. It finally agreed to build the lock and canal at a cost of nearly $500,000 and forever maintain the same for free navigation. For the desired privilege the trust agrees to pay whatever rental the Federal Government may impose for the use of the water of this navigable stream.

[Finding that there was danger of opposition to the bill in Congress from extreme States' rights advocates, the trust now apparently agrees not to attempt to issue stocks or bonds in excess of the actual cash investment. It agrees to be satisfied with 8 per cent thereon. It agrees that any profits above that reasonable figure shall be shared with the Government in increasing ratio.

[Thus for the first time in American history it looks like the people's interests are adequately safeguarded and a precedent established that should forever insure that policy. To make assurance doubly sure, I have advocated that no loophole be left for a twilight zone between Nation and State by so amending the bill that the State reserve full supervision over the corporation, including the right to expropriate its property when the State wishes to assume a monopoly of the generation and distribution of water power.

[In a letter to Hon. JOHN H. BANKHEAD, Senator from Alabama, who with other Senators, including Mr. NELSON, of Minnesota, oppose the measure from an extreme view of State rights, I wrote, January 27, 1913, as follows:]

NO CONFLICT BETWEEN STATE AND NATION.

There is no necessary conflict in hydroelectric development between Nation and State. Let them cooperate under a definite plan, and in the course of one or two decades you will see a development of hydroelectric energy, with corresponding material prosperity and progress in civilization, transcending the imagination. Each State has everything to gain and absolutely nothing to lose through such cooperation.

Take the whole Mississippi River system, for instance. So far as it is navigable the Nation owns its bed and its waters; above the navigable point the Nation also has rights, but in no case may any of these rights be exercised to the detriment of any State.

ONE PLAN—ONE AUTHORITY.

The utilization of the flowing waters of the Mississippi system in the interest of all the people all the time may be attained only under national control of the main arteries.

Under such undivided authority one comprehensive plan will make it possible to store up the flood waters in the head reaches, and thus prevent disastrous floods which now annually occur over vast sections of many States.

The stored water, after generating power, will be available for irrigation, or that power may pump water upon areas not otherwise irrigable, or may pump water away from irrigated lands now threatened by oversaturation.

The stored waters, transformed into electric energy, or white coal, will furnish heat, light, and power at low cost for every purpose. But those low prices will be sufficient to pay for maintenance and extensions, interest, and sinking fund. After the construction expense thus shall have been met, prices may be still further reduced.

This is in marked contrast to the present saturnalia of overcapitalization practiced by the Water-Power Trust, whereby it seeks to fasten upon the people for all time charges for hydroelectric energy sufficient to support "securities" representing from two to five times the actual cost of the development.

MAKE WATER PAY FOR IT ALL.

The revenue from the publicly owned power plants would be sufficient to vastly improve the navigability of every river in the Grand Basin.

In periods of drought the stored flood waters would be let out to maintain navigation and sanitary flushing of the river drainage system.

On the other hand, by preventing floods, the problem is vastly simplified of draining the present great extent of marshes and swamps.

TRULY A NATIONAL PROBLEM.

Thus the problem is national in every respect.

It directly and vitally concerns every State between New England and California, especially every Southern State, the Central West, and the Northwest.

Each and all may profit hugely by the carrying out of this policy along lines of broadest patriotism, constructive engineering, honest financiering, and economical administration.

A SELF-SUPPORTING PROPOSITION.

By this national system for the national development of our flowing waters the whole situation is transformed.

Instead of squandering vast appropriations in inefficient work upon river and harbor improvement we will now make the flowing waters earn money enough to efficiently utilize the unrivaled possibilities of our rivers as sources of power, heat, and light, as well as of transportation, irrigation, and drainage.

No longer will floods harass and destroy.

No more will alternate drought and flood menace the health or the wealth of our people.

And the Hydroelectric Trust no longer will have the public at its mercy.

EACH STATE AIDED.

And the beauty of such national policy is that without infringing upon the rights or duties of any sovereign State it becomes possible for each State likewise to encourage the development of the hydroelectric resources in the many smaller rivers within the respective States.

I would go further and have each State own and control, develop, and operate the flowing waters therein. Public ownership of waterworks by cities and towns has long been successful. The application of the same policy to the States and upon interstate and navigable rivers to the Nation is a logical development.

Yet there are two sides to State versus corporate power plants. And if State or Nation will not itself develop its hydroelectric resources corporate capital should be encouraged so to do.

PREVENT A CONTINUANCE OF THE PRESENT SATURNALIA OF OVERCAPITALIZATION.

But right at this point we come squarely to the parting of the ways. The so-called Hydroelectric Trust not only presumes to be more capable of developing water power, but by virtue thereof has assumed a sort of "divine right" to indulge in what I have termed a "veritable saturnalia of overcapitalization."

AND THAT'S JUST WHAT'S THE MATTER.

In this respect it is a contest on the part of the Hydroelectric Trust for untold millions of unearned profits.

While the people, the States, and the Nation wish to so protect their own interests that, after insuring a fair return upon the capital actually invested, our flowing waters shall ever be servants, and not masters, of the people.

This principle of limiting the issue of securities to the actual cash invested or of limiting the returns upon such capital to a reasonable figure and then dividing any excess profits with the public, seems to be established in the Windsor Locks Dam bill. The same principle is enforced upon the Montana Power Co. in the franchise recently granted its transmission lines over public land for electrifying a western railroad. In other words, the Hydroelectric Trust admits defeat when it gets up against Uncle Sam.

OUR SOUTHERN STATES

will benefit even more than other regions. The Mississippi will no longer inundate vast reaches of valuable lands when this plan is carried out. The saving of life, health, and property, the insurance against floods, will alone equal a magnificent return upon the entire cost of the whole scheme of harnessing the mighty river.

RAILROAD TRANSFORMATION COMING.

Another economic development is coming, which vitally reenforces the fundamental wisdom of the above view:

Ere many years there will be at the mouth of every coal mine—anthracite, bituminous, or lignite—great producer-gas plants. The coal will be dumped directly into them, and the resulting energy, in the form of electric juice, will be transmitted by wire.

This will also revolutionize the whole problem of transportation by rail.

Having no more coal traffic, railroads and their terminals will be able to adequately care for the coming vast development of other traffic, without requiring enlargements and expenditures so great as to be impracticable.

THE PEOPLE'S INTERESTS CONSERVED.

Then the energy obtained from black coal will have to compete with energy from the flowing waters. Thus the people for all time will be sure of getting power at reasonable cost.

The Coal Trust, which even the United States Supreme Court has not been able to break down, will have met its Waterloo.

The railroad problem will be much easier of settlement.

Agriculture, industry, and civilization will advance upon a scale commensurate with the resources and genius of the American people.

Mr. NEWLANDS. I commend this article in a southern paper to the representatives from the lower Mississippi, who have stood watch upon the meager appropriations given to them for that short reach, and whose vision as yet has not extended to such an enlargement of the Nation's operations regarding the waters of the country as to embrace the entire Nation.

I also wish to call attention to an article written by Mr. A. L. Crocker, who is the chief of the Minnesota water commission, a commission organized in that State not only for local work but for cooperation with the Nation in a full development of our waterways. I shall ask to insert this and some editorials I have here in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NEWLANDS. I will simply read the heading, which indicates its subject:

Waterways plan finally evolved—Scheme submitted for improvement of Mississippi from Minnesota to Gulf—Legislature urged to act—Argued Federal Government and States along river should cooperate to finance movement.

Mr. Crocker says in a forceful sentence:

The cry is now going up in many directions there must be cooperation between the Federal and State Governments to cure this evil. It must be done. It can't be neglected. The evil will grow worse and worse, and it has become unendurable.

But in curing the flood evil other and immense benefits follow. Health is promoted; a steady supply is furnished the water powers; and wherever navigation exists the stream regulation is of the highest importance. No State needs a State policy in managing its waters more than Minnesota, and yet its importance is not generally appreciated.

The matter referred to is, in full, as follows:

[From the Minneapolis Journal, Feb. 3, 1913.]

STATE BLAMED FOR DAMAGE BY WATER—MISMANAGEMENT IS WORSE THAN THAT OF LANDS, SAYS A. L. CROCKER.

The State's loss by careless handling of State lands, estimated at more than $7,000,000 by Attorney General L. A. Smith in a recent talk before a legislative committee, is exceeded by the damage from bad management of water, according to A. L. Crocker, of Minneapolis, chairman of the State waterways commission. "One of the State's mineral properties, which the State let go for a song, after being warned by the State geologist, is worth $12,000,000," said Mr. Crocker to-day. "What is true of State farm lands and State timber and State iron is also true of the State's asset, water, which New York pronounces the greatest in value next to the soil of the State.

"All over Europe, Canada, and in many of the States in this country, from Maine to California, the hitherto neglected asset, water, is now being actively considered. Minnesota has not started. It has no policy. At this session of the legislature one should be entered on. Here in Minnesota and all over the world the damage by floods has loomed into vast and ever-growing importance. Last year the loss in the lower Mississippi Valley was $100,000,000, and again this year another terrific flood is raging. The direct losses we read of do not cover the damage done, for the subsequent losses in short crops and the deterrent effect on capital seeking investment swell the total far higher. On the Ohio and Sacramento Rivers, and indeed all over the world, the annual loss from floods is colossal. Right here in Minnesota in 3 years out of 15 there was a $1,000,000 flood loss in the Minnesota Valley followed by a typhoid epidemic. Of the 50,000,000 acres comprised in Minnesota a vast area is swamp, which is rapidly being drained, and when drained there will be nothing to prevent the rapid run off of the flood water followed by devastation and sickness and a lack of water for water power and navigation. In New York they estimate the annual loss from typhoid—which can be prevented by a State administration of its waters—at $8,000,000.

"By contrast the report comes from Budapest that remedial hydraulic measures instituted in Hungary increased the national wealth $487,000,000. The area drained by the Mississippi equals that of Austria, Germany, France, Holland, Italy, Spain, Portugal, Norway, and Great Britain combined, and when this area, 41 per cent of the United States, goes on a flood at one time no levees on the lower river can stand the strain. There must be an alternative, and the only one is that of impounding the flood waters at their source. *The cry is now going up in many directions there must be cooperation between the Federal and State Governments to cure this evil. It must be done.* It can't be neglected. The evil will grow worse and worse and it has become unendurable.

"But in curing the flood evil other and immense benefits follow. Health is promoted, a steady supply is furnished the water powers, and wherever navigation exists the stream regulation is of the highest importance. No State needs a State policy in managing its waters more than Minnesota, and yet its importance is not generally appreciated."

[From the St. Paul Pioneer Press, Feb. 27, 1911.]

WATERWAYS PLAN FINALLY EVOLVED—SCHEME SUBMITTED FOR IMPROVEMENT OF MISSISSIPPI FROM MINNESOTA TO GULF—LEGISLATURE URGED TO ACT—ARGUED FEDERAL GOVERNMENT AND STATES ALONG RIVER SHOULD COOPERATE TO FINANCE MOVEMENT.

To the Pioneer Press: In view of several partial statements which have appeared recently and in view of the importance of the subject of State waterway and water-power legislation while this legislature is in session, I ask permission to make a further and fuller presentation of the subject than has yet appeared in print.

Gov. Eberhart has started a movement for the public benefit that should bring him lasting fame as its real and far-reaching merits shall

appear. It is up to this legislature to see properly and grasp by legislation the great opportunities which offer themselves now, but which have in part escaped and which will rapidly disappear altogether and forever if not seized without further delay. That would be a calamity not only to the State of Minnesota but to the entire Northwest and to the entire Mississippi Valley south of us.

IMPORTANCE OF MINNESOTA.

In this whole combination Minnesota occupies in importance that position which a keystone does in an arch. As our forests are cut off and our vast swamps are drained the sprinkle of disaster which already depresses the Minnesota Valley will become the raging storm, and the only way to cure permanently the flood evil is by replacing the natural swamp and timber sponges by artificial reservoirs to impound the floods of spring, releasing them gradually later. In doing this great water powers will be created, as will canals or cheap water roads over the State, free to the farmer and the manufacturer. This means redemption of the waste places of the State, the peopling of those portions now wilderness, an increase in land values, new towns, new electric roads gridironing the whole State until the 2,000,000 persons now dwelling in the State become, perhaps, twice that number.

WOULD DRAW MANUFACTURING.

These new water powerrs all over the State will inevitably draw manufacturing. The wool of Montana now passing through us to Boston should be stopped here, financed, manufactured, and distributed from here. Following the first steel plant, now under construction at Duluth, there should be others, and on the great water powers near there a host of secondary iron and steel manufactories should spring up.

The old theory of iron manufacturing has been that the ore went to the fuel, but the practice of taking Minnesota ore to Pennsylvania to the coal is now being reversed by reason of the cheap freights on the Great Lakes on coal coming to the ore district. Cheap water transportation on the Lakes is bringing the steel manufacturing to Minnesota, and the market for iron and steel is moving west and can be supplied cheaply from Minnesota.

This argument of cheap water carriage for the benefit of Minnesota I will now apply to the Mississippi River. The great storage of flood waters will increase the low-water navigation on the Mississippi River as far down as Keokuk, and according to good authorities as far as St. Louis. On high authority—a United States engineer of many years' experience on this end of the river—it is said, with the reservoirs possible of construction in Minnesota, a minimum water channel of 12 feet can be maintained down to Prescott, and if the same reservoir work is continued on down, from 12½ to 15 feet low-water channel can be had. But dead low water exists for a short time only, and a much higher stage may be expected for much of the navigation season.

FREIGHT CARRIED BY RHINE.

What this may mean can be estimated when we consider that the Rhine, on a maximum depth of 9 feet, and from that to less than half that, carries annually 25,000,000 tons. Thus Minnesota is seen to occupy the unique strategic position, the key, so to speak, to trade and manufacturing afforded by its location at the northwest corner formed by the Great Lakes water system to the east and the Mississippi River for 1,800 miles to the south.

And from this angle, from Minnesota, radiates the vast system of railroads over the great Northwest.

Such a combination of advantages is rare, if not unknown, in any other country. Neither the Northwest nor the Mississippi Valley has done more than begin to grow, and with the coming inevitable growth queenly Minnesota will come into her own, if only the lawmakers of this legislature see and act in accordance with the necessites of the movement.

WHAT CHICAGO HAS DONE.

From Chicago via the Illinois River to the Mississippi River near St. Louis and down to the Gulf an improved river is planned for a depth of from 14 to 20 feet. Chicago has spent $60,000,000 to build the upper end and the State of Illinois has amended its constitution and has bonded itself for $22,000,000 with which to carry on the work within its own borders.

SINISTER MOVEMENT SEEN.

Right here I want to call the attention of our legislature to a sinister movement, and one which is threatening and may strangle development in our great State, the Northwest, and the Mississippi Valley to the infinite loss of all, unless our present legislature acts to prevent it.

Just below Chicago on this great $60,000,000 canal an ostensible electric light company has got a grip that threatens that whole scheme of navigation from Chicago down. The State of Illinois is now in the midst of a life-and-death fight against this octopus, which nobody for a moment thinks is a genuine lighting company. Its control and animus is in Wall Street, and the same genius for evil is now seeking under cover, of course, to get hold of our Minnesota Valley and our high-dam water power between the cities of Minneapolis and St. Paul. It is a movement, smooth as oil and deadly as a viper, that should be scotched now by this legislature in the interest of the public welfare. No powers should be granted by this legislature or by Congress which in any way may obstruct what the State of Minnesota may want to do. This is ordinary common sense and business prudence and requires no argument.

DEVELOPMENT DEMANDED.

Coming back to the river and the deep-water channel from Chicago to the Gulf, the whole Mississippi Valley wants our end, from the Missouri River to Minneapolis and up through the State, developed to the utmost. I am now in correspondence with men of large affairs, covering the entire Mississippi Valley to the Gulf, who propose to form a united movement on the part of the Mississippi Valley States to work for a complete and harmonious channels improvement from the Gulf of Mexico up and into Minnesota, and I am receiving strong assurances of intelligent, sympathetic interest, a recognition of the sense and reasonableness of the plan, and a willingness and readiness to enter upon it.

WHAT IS INVOLVED.

Just a brief mention of what is involved. The work is naturally divided into three parts. From the mouth of the Missouri River, where a vast amount of sand and earth enters the Mississippi, for many hundred miles to Louisiana, where the deep, still water from the Gulf begins, the problem is one of bank dikes to prevent flood and a scouring and digging out of the sand bars which pile up between the long, deep pools. From the Missouri River to Minneapolis the river is gentle in its flow, having a fall of only about 7 inches to the mile, except at the two points where the earth's crust is broken, making rapids at Keokuk and Rock Island. The extremes between flood and low water on this river are only 20 feet apart, while on the Ohio River they are 70 feet. With the channel once fenced in by lock and wing dams and bank protection, as is now being done by the Federal Government, there remains only to be added the possible reservoir construction for increasing the low-water flow.

POSSIBILITY OF RESERVOIRS.

Lyman E. Cooley, engineer of the Chicago Canal, writes me that while investigating the possibilities of the Keokuk Dam he estimated that a *limited* reservoir construction above that point would increase the river flow 60 per cent as far down as Keokuk and *that the most of such reservoir work would be up here in Minnesota. This possible reservoir development being mostly in Minnesota, it can only be done by the State of Minnesota, though its benefits to the whole river below and to all those States are clearly seen and desired by the whole Mississippi Valley. I therefore count confidently on the support of them all to the granting to the State of Minnesota of the 1,500,000 acres of Government land still remaining within the borders of the State, which could then be used as the basis for a State bond issue with which to do this comprehensive State reservoir work. These lands are to-day of little value. As drainage progresses and the State fills up they will become more and more valuable and can be sold as seems best until all are disposed of, the proceeds to go into a sinking fund with which to retire the issue of State bonds, say, in 40 or 50 years.*

MEANS AN AMENDMENT.

Of course this means an amendment to our State constitution, as was accomplished in Illinois and has been done in other States. *In addition, the State should be able to buy from the United States Government, at cost, the high dam between St. Paul and Minneapolis. This is estimated to cost less than $1,500,000. It will produce a minimum revenue which, called 5 per cent interest, would represent an investment of $7,500,000, and really much more, as I am only using minimum figures to make my argument safe. This would permit the State to issue bonds enough to pay for the dam and a large amount more, the latter being used to begin work on other dams, say, in the Minnesota Valley.* The lands and the dam should permit a maximum State bond issue of $20,000,000, only to be issued piecemeal and strung along for years. Then, based on new water power created, as in New York State, other State bonds could be issued, so gaining enough funds to do all possible State reservoir building at no cost to anyone, simply using the State credit as a safe asset that will pay the cost of construction and then be left in State ownership forever afterwards to yield a State revenue with which to cut down State taxation.

PROPOSITION IS COMMENDED.

I have studied this project for years. I have put it up to the best men I can find—United States engineers, large capitalists, here and elsewhere, political leaders here, in Washington, and down the whole Mississippi Valley—and I have yet to find a single one who says it is impractical or unreasonable. On the contrary, I have never failed to receive the indorsement of these men. As a loyal citizen of Minnesota, as a member of the waterways commission appointed by Gov. Eberhart to investigate and recommend measures and ways and means, I now submit the plan for the thoughtful and honest consideration of the Legislature and by the people of Minnesota.

BILLS BEFORE LEGISLATURE.

Two bills introduced by Hon. L. C. Spooner are now before the legislature. One calls for the creation of a State water-supply commission to care for the water interests of the State; and if ever any State needed competent, honest servants, Minnesota needs them now in the promotion of this enterprise.

The second bill calls for funds to take an engineering inventory of the State's assets in water resources. The sum is far too small, but it will make a start.

Canada shames us all in her large intelligence in such matters and in the settlement of her cheap lands. She is getting the settlers who ought to locate in this State, and she has just paid $75,000 for an engineering investigation of the proposed waterway from Lake Superior to the Ottawa River.

When our next legislature meets two years hence, we should be prepared to offer that body the facts regarding our State water assets, with recommendation as to the proper action to take, such as a possible constitutional amendment permitting an issue of construction bonds. We ought to have things ready in Congress for turning over to the State the Government lands and the high dam, as already indicated. Meanwhile we should keep every predatory and hostile interest from securing a strangle hold on any stream or dam or reservoir site that the State might possibly want. Any water commission that may be created can not hope to more than make a beginning in the next two years, and I hope this legislature will appoint one of its number as the accredited representative of the State to cooperate with the water commission, if such be created, this representation to treat also with the various States and interests in the Mississippi Valley and with the President of the United States and Congress as shall be necessary.

The man to be selected for this important duty should have a broad, constructive grasp of the whole proposition. He should be a man of recognized integrity and unfaltering purpose, equipped with a personality and power of presentation of the subject that shall carry weight.

A. L. CROCKER.

MINNEAPOLIS.

[From the New Orleans Item.]

THE LEVEES AND THE RIVER.

What has happened at Beulah, what is threatened at Filters Point, what may come at Alsatia or Hymelia or Panther Forest or above Morganza, if the river continues to rise, is irrefutable evidence that the "levees-only" method of handling the problem of the Mississippi Valley is pitifully inadequate and futile.

What certain sage engineers have said about the impossibility of doing anything else to regulate floods, save building levees, will not be accepted without question by the people endangered. It is of too recent occurrence that learned gentlemen of the engineering profession staked their reputations that the Panama Canal could not be built in the exact way and manner in which it has been built, and that other learned gentlemen said that neither the Chagres in Panama nor the Nile in Africa could ever be "controlled."

What has been proven possible in one watershed would seem to the layman's mind possible in another, when the only fundamental difference is in magnitude, especially in this day when magnitude of any material problem has ceased to awe.

People along the Mississippi flood frontage remember that the record-breaking, levee-smashing water of 1912 came only from some of the lower rivers plus a torrent from the Ohio. They wonder in fear what would happen if, as is entirely possible, the Missouri, the upper Mississippi, and the Ohio should happen to be exceptionally high at the same time that the lower basins were already filled.

What is needed is an impartial survey of the whole great interrelated question of water conservation, irrigation and reclamation, transportation maintenance, and flood prevention from the headwaters to the jetties; decision upon an inclusive program covering every phase; and the adoption of that program and provision for it as a whole, just as the construction of the Panama Canal was planned, adopted, and provided for in its entirety.

The Federal Government is the only agency capable of doing this.

The people of the valley who fail to see beyond the tops of their levees, and who fear "invasion of States' rights," are blindly ignorant of their own interests, forgetful of the interests of millions of others who live elsewhere in the vast watershed of the Mississippi Valley.

The "problem of the valley," extending in its various phases over 28 States and affecting over 50,000,000 people, is one and the greatest of the many problems which transcend in moment and in scope the capacities or the powers of individual States.

—

[From the National Reclamation Association, New Orleans.]

FLOOD PREVENTION.

In its issue of February 1, 1913, the Los Angeles Tribune prints the following editorial:

"ANOTHER OBJECT LESSON OF FEARFUL COST.

"That the people of the Mississippi Valley should again be suffering personal distress and enormous loss from floods within a year of a former catastrophe is reason for serious reflection on the American way of despoiling the country of natural resources without concern for results, and trusting to luck for absolution from the logical results of such folly.

"One generation is now paying fearfully for the denuding of the watersheds along the Mississippi, Missouri, and Ohio Rivers. Yet so slow is humanity to learn the real lessons of experience that it can not be predicted when the scientific and frugal methods of prevention will take the place of profligacy, with real river protection and improvement.

"According to figures compiled by Hubert Fuller and published in the North American Review, the Government has spent more than $90,000,000 for the 'improvement' of the great stream that is now an annual menace. The result is that 'it costs the United States $20 for every ton of freight carried' on the three great streams of the Middle West, figuring in the expense the interest on the investment.

"We are having a terrible object lesson on the evils of the pork barrel whereby millions are taken out of the National Treasury and spent with the abandon of the drunken sailor on our waterways, big and little, for the political benefit of Members of Congress. After two floods of such stupendous harm in the Mississippi Valley it should not be necessary to argue much for the Newlands bill which proposes to harness the headwaters of America's great streams."

Mr. NEWLANDS. These editorials, coming from New England, the South, and the Pacific coast, indicate how general the expression is in favor of big and comprehensive National and State action.

Here we find the people upon the tributaries and source streams of the Mississippi moving. At Pittsburgh, where they suffer annually a loss aggregating from three to five million dollars from the floods, they appointed what is called the Pittsburgh Flood Commission, for the purpose of looking into this matter, and appropriated $100,000 for surveys and plans. They appreciate the importance of this question. That commission has passed resolutions commendatory of this bill. The Pittsburgh Chamber of Commerce has passed similar resolutions. Everywhere along the line you will find a demand for the conservation of the waters as the most valuable asset of the Nation; a demand for teamwork upon the part of the Nation and the States, a demand for teamwork upon the part of the scientific services that are now, in a detached and separated way, working upon our rivers; a demand for large appropriations; a demand for continuous work.

Why is it that our southern friends have not come into this movement with the vigor that usually characterizes them? I am at a loss to understand. Our Southern States are either traversed by the greatest of our rivers or are the sources of more rivers than any other portion of our country. There is no part of the United States that would benefit so much from the cooperation of rail and boat as will our Southern States, with their numerous rivers, arms of the sea, and the Gulf; with their splendid harbors, with their magnificent climate, with their extraordinary capacity for production; and yet there is more inertia upon this subject displayed by the representatives of the South than by the representatives of any other part of the country.

I have been unable to understand it, unless it is that so large a portion of the existing expenditures upon our rivers is made in the Southern States that they are unwilling to disturb that system, and that they are fearful of contemplating a great and efficient system that, in the end, will do much more effective work, lest their pending operations be temporarily disturbed. They must be pleased with the individual-project system, which makes each individual Congressman the arbiter of his own district, the controlling power as to whether or not appropriations shall come to that district. Such a condition as that has a subtle influence upon judgment and upon action. It is a part of the old spoils system that prevailed for so long to the injury of the country and the injury of the administration of its offices, which was continued as regards projects in waterways and public buildings, and which is only gradually yielding to better methods as the result of scientific legislation.

But I think if our southern representatives will go and test the sources of political power, the people themselves, they will find among them a general demand for a revolution of the existing system. The Senator from Georgia [Mr. SMITH] will recall that some three or four years ago it was my privilege to address the combined boards of trade of Georgia at an immense banquet given in Atlanta, at which the Senator, then the governor of the State, was present. I think the Senator will bear witness with me to the fact that not only was extraordinary interest manifested in the scheme of national development and national and State cooperation that was then discussed, but that there was an enthusiastic expression of favor regarding it. Wherever in the South nonpolitical gatherings are held—the meetings of the Southern Commercial Congress, the meetings of the Southern Reclamation Association of Louisiana, waterway conventions at Memphis, and elsewhere—you find the most enthusiastic expressions in favor of this policy. You will find to-day the two leading newspapers of New Orleans, the Item and the Picayune, advocating it. You will find the Progressive Union of New Orleans, a great commercial organization established for the advancement of the interests of the South, in favor of it. You will find the Reclamation Association of that State in favor of it, and you will find them all condemnatory of the narrow spirit of some southern statesman that insists simply upon a vision confined to the lower Mississippi and disregards the national aspirations upon this subject.

This movement is now being, I may say, in a measure directed and led by Mr. George M. Maxwell, formerly an able and distinguished lawyer of California, who became so interested in the question of irrigation that he abandoned his practice and devoted entirely seven or eight years of his life to the active propaganda for its advancement. He was the head of the executive committee of the Irrigation Association, and for years, both in the public press and upon the platform, was the strong advocate of western sentiment upon this subject. Led by his study of that subject to the conviction that irrigation was only a part of the water question, and a small part, and that the proper development of our water resources involved teamwork between the Nation and the States and the development of all related uses of water in the advancement of wealth and prosperity, he has taken up this propaganda. He was chosen as chief of the executive committee of the Pittsburgh Flood Commission; he has been chosen as the chief of the executive committee of the Louisiana Reclamation Service or Union; he has been chosen as a representative of the leading waterway association on the Pacific coast, where his influence has always been potent for wise measures. He is to-day conducting a propaganda at New Orleans, supplying all the various communities with literature upon this subject, almost suffering at times from pecuniary distress as the result of his disinterested labors.

I have received a telegram from Mr. Maxwell expressing his inability to be here at this important time, and expressing the hope that in my eagerness to secure action now I will not accept partial results by way of amendment; that the thing to do is to fight for the river-regulation bill as drawn; and that if that fight is conducted earnestly and consistently victory will soon be our reward. Animated by the suggestion, I have not viewed with hospitality the various suggestions that have been made by my colleagues upon this floor that I should narrow the operation of this measure by resorting to some temporary expedient.

We have been for 100 years pursuing this question; we have the accumulated experience of engineers, constructors, and publicists upon it; we have a universal public sentiment. It is true that the Committee on Commerce accepted a part of an amendment which I offered, which you will find in the bill, and with which they propose to satisfy me, but I am not satisfied. It is true that appeals have been made to me not to imperil the passage of the pending bill by long discussion in the closing hours. I am not insensible to that appeal, but the time will come, unless some action is taken, when upon the river and habor bill the representatives of regions other than the lower Mississippi Valley will see to it that this is planned and conducted as a great national and interstate enterprise, and they will, at the risk of imperiling and destroying this insufficient legislation, which parties interested have been building up, insist upon large national and interstate plans and works under the cooperative methods for which my river-regulation bill calls.

Mr. BURTON. I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The Secretary will read the amendment.

The SECRETARY. After line 17, page 7, substitute a comma for the period and insert the following:

And the Secretary of War is hereby authorized to make such rules and regulations for the navigation of Ambrose Channel, after the completion of its improvement, as he may deem necessary or expedient to insure its safe use in all kinds of weather, night and day, for all vessels under control and running under their own power, and to this end he may, in his discretion, forbid its use to tows of every description and to sailing vessels.

Mr. NELSON. There is no objection to that amendment.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. BURTON. I offer another amendment, which I send to the desk.

The PRESIDENT pro tempore. The amendment will be read.

Mr. BURTON. Before it is read, I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Senator from Ohio suggests the absence of a quorum. The roll will be called.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Gallinger	McLean	Simmons
Bankhead	Gamble	Myers	Smith, Ariz.
Borah	Gardner	Nelson	Smith, Ga.
Bourne	Guggenheim	Newlands	Smith, Mich.
Bristow	Hitchcock	Oliver	Smoot
Brown	Jackson	Owen	Stephenson
Burnham	Johnson, Me.	Page	Sutherland
Burton	Johnston, Ala.	Paynter	Swanson
Catron	Jones	Percy	Thomas
Chamberlain	Kavanaugh	Perkins	Thornton
Clarke, Ark.	Kenyon	Pittman	Webb
Crawford	La Follette	Pomerene	Wetmore
Cullom	Lea	Richardson	Williams
Curtis	Lippitt	Sheppard	Works
Foster	Lodge	Shively	

Mr. SIMMONS. I was requested to announce that the Senator from South Carolina [Mr. SMITH] is absent on official business.

The PRESIDENT pro tempore. On the call of the roll 59 Senators have answered to their names. A quorum is present.

Mr. BURTON. It is anticipated that some time may be consumed in the discussion of the amendment I have offered. I will say that is not my own opinion, as I do not expect to occupy more than a very few minutes. The Senator from Idaho [Mr. BORAH] desires to present an amendment which will provoke no discussion probably, and I yield to him for the presentation of that amendment. After that I desire to have the amendment which I have offered read.

Mr. BORAH. After the word "reserved," on page 54, line 23, I move to insert what I send to the desk.

The PRESIDENT pro tempore. The Senator from Idaho offers an amendment, which will be read.

The SECRETARY. On page 54, line 23, at the end of the committee amendment already agreed to at that place, insert:

"Nothing in the foregoing section or in this act shall be construed to embarrass, hinder, or deny the right of a State through its public utilities board or commission or in such other mode as the State may lawfully provide, to regulate and control the rates and charges for which any corporation (public or private), company, or individual shall furnish hydroelectric power or electricity to the people of the State when the same is intrastate business, or to embarrass, hinder, or deny the right of the National Government, through the Interstate Commerce Commission or such other mode as Congress may provide, to regulate and control the rates and charges for which any corporation, public or private, or any individual shall furnish hydroelectric power or electricity to the people of any State when the same is interstate business, and that notwithstanding any of the provisions of this act there is reserved against all grants and privileges herein made or given the right of public regulation and control as to the rates and charges for which hydroelectric power or electricity may be furnished, sold, or disposed of to all those desiring to purchase or use the same."

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Idaho.

Mr. WORKS. I should like to inquire of the Senator from Idaho whether this is an amendment to the proposed amendment of the Senator from Ohio?

Mr. BORAH. No; it is an amendment to the bill as it now stands. If the amendment of the Senator from Ohio should be adopted, it would be in operation, nevertheless.

Mr. WORKS. The reason why I asked is because it seems to be a qualification of the provision intended to be inserted in the bill by the Senator from Ohio.

Mr. BORAH. I conceive this amendment to be important by reason of the amendment which was put in upon page 53 of the bill, with reference to the Minnesota dam-site amendment.

Mr. OWEN. I wish to ask the Senator from Idaho if his amendment reserves to the State the right to regulate the rates, whether the service is interstate or intrastate, or is it confined to intrastate business?

Mr. BORAH. The amendment as it is drawn provides that no grant or privilege given or granted under this bill shall interfere with the State from regulating or controlling the rates or charges for furnishing hydroelectric power when it is intrastate business.

Mr. OWEN. The reason why I asked was because it appeared to have been read with both words in it; but that was a mistake, I suppose, in reading.

Mr. WILLIAMS. I should like to ask the Senator from Idaho what is the need of this amendment? Does he imagine that anything in the bill could interfere with the constitutional right of the State to regulate rates upon intrastate business?

Mr. BORAH. My idea is that a special grant might be such that it would be so construed as to interfere with the powers of the State. Here is a special grant, based upon an apparent consideration, and in which grant the National Government apparently retains an interest, to be used for governmental purposes. Now, I do not want this ambiguous language construed so that this electric company will be deemed an instrumentality or servant of the Federal Government. But aside from this question of law the amendment declares a policy.

Mr. WILLIAMS. I do not know what the clause is and what the character of it is, but if there were language in the bill expressly giving to the Federal Government power to interfere with the regulation of the rates in intrastate business, the language would not be worth the paper upon which it was written. Congress could not by its power subtract from the constitutional rights of the State, nor add to the constitutional rights of the Federal Government. The matter would be left for judicial construction after all.

It does seem to me that offering this amendment to the bill might possibly endanger the bill itself and that it could do no possible good.

Mr. BORAH. Mr. President, I do not disagree with the Senator from Mississippi as to the general constitutional proposition which he has stated, but there is a special grant in the bill to which I am very much opposed, by reason of the fact that in my opinion it might be construed to embarrass a public utilities commission in the discharge of its duty in fixing rates.

If the amendment has no other effect than that suggested by the Senator from Mississippi it would do no harm. It will certainly construe this act upon the part of Congress as Congress intends it shall be construed. But I am most anxious just now to declare as a policy along with all these special grants that of public regulation and control by some other body than the head of a department actuated by a desire to get revenue rather than to protect the people from exorbitant charges.

The PRESIDENT pro tempore. The question is on agreeing to the amendment proposed by the Senator from Idaho.

The amendment was agreed to.

The PRESIDENT pro tempore. The amendment submitted by the Senator from Ohio [Mr. BURTON] will now be read.

The SECRETARY. After line 18, on page 5, insert:

The assent of Congress is hereby given to the Connecticut River Co., a corporation organized and doing business under the laws of the State of Connecticut, to relocate its "Enfield Dam," so called, and to construct, maintain, and operate such relocated dam (which if located opposite Kings Island, in said river, shall extend across both branches of the river), together with works appurtenant and necessary thereto, across the Connecticut River at any point below a line crossing both branches of the river and Kings Island midway between the northerly and southerly ends of said island: *Provided*, That, except as may be otherwise specified in this act, the location, construction, maintenance, and operation of the structures herein authorized, and the exercise of the privileges hereby granted, shall be in accordance with the provisions of the act approved June 23, 1910, entitled "An act to amend an act entitled 'An act to regulate the construction of dams across navigable waters,' approved June 23, 1906": *And provided further*, That the time for completing said dam and appurtenances may be extended by the Secretary of War, in his discretion, two years beyond the time prescribed in the aforesaid act: *And provided further*, That the rights and privileges hereby granted may be assigned with the written authorization of the Secretary of War, or in pursuance of the decree of a court of competent jurisdiction, but not otherwise: *And provided further*, That the Secretary of War, as a part of the conditions and stipulations referred to in said act, may, in his discretion, impose a reasonable annual charge or return, to be paid by the said corporation or its assigns to the United States, the proceeds thereof to be used for the development of navigation on the Connecticut River and the waters connected therewith. In fixing such charge, if any, the Secretary of War shall take into consideration the existing rights and property of said corporation and the amounts spent and required to be spent by it in improving the navigation of said river, and no charge shall be imposed which shall be such as to deprive the said corporation of a reasonable return on the fair value of such dam and appurtenant works and property, allowing for the cost of construction, maintenance and renewal, and for depreciation charges: *And provided further*, That if said company shall neglect or refuse to pay any charge or return demanded of said corporation by the Secretary of War, either by order or under any contract, and such neglect or refusal is based on the ground that said charge or return is invalid or unconstitutional and not within the power of Congress to require, such neglect or refusal on the part of the company shall not affect the rights of said company to hold and exercise all the powers, rights, and privileges granted in this act; and in any suit brought against said corporation for the collection of said charge or return, the said corporation shall have the right to enter its

proper plea to test the constitutionality or validity of said charge or return, and the courts shall take cognizance of the same; and nothing in this section shall be understood as committing the Government to a policy of imposing or not imposing such charges or returns as are herein described from any other company or corporation seeking the assent of Congress under like or similar circumstances.

That the height to which said dam may be raised and maintained shall not be less than 39 feet above zero on the Hartford gauge: *Provided*, That said corporation shall permit the continuous discharge past said dam of all water flowing in the Connecticut River whenever the discharge into the pool created by the dam hereby authorized is 1,000 cubic feet per second or less, and at all greater discharges into said pool shall provide a minimum discharge past said dam of not less than 1,000 cubic feet per second: *And provided further*, That said corporation may, for not to exceed five hours between sunset and sunrise, limit the discharge past said dam to 500 cubic feet per second whenever such limitation will not, in the opinion of the Secretary of War, interfere with navigation. The measure of water thus to be discharged shall include all the water discharged through the lock herein provided for and the present locks and canal of said corporation: *And provided further*, That nothing in this act shall in any way authorize said corporation at any time or by any means to raise the surface of the river at the location just above the present Enfield Dam to any height which shall raise the surface of the river at the lower tailrace of the Chemical Paper Co. in Holyoke, Mass., higher than can result from the erection or maintenance of any dam or dams which said corporation is authorized to erect or maintain in accordance with the order and decree of the circuit court of the United States for the district of Connecticut, passed June 16, 1884, in the case of the Holyoke Water Power Co. against the Connecticut River Co.

That the said Connecticut River Co. shall build coincidently with the construction of the said dam and appurtenances, at a location to be provided by said corporation and approved by the Secretary of War, and in accordance with plans approved by the Secretary of War and the Chief of Engineers, a lock of such kind and size and with such equipment and appurtenances as shall conveniently and safely accommodate the present and prospective commerce of the river, and when the said lock and appurtenances shall have been completed the said corporations shall convey the same to the United States, free of cost, together with title to such land as may be required for approaches to said lock and such land as may be necessary to the United States for the maintenance and operation thereof, and the United States shall maintain and operate the said lock and appurtenances for the benefit of navigation; and the said corporation shall furnish to the United States, free of charge, water power, or power generated from water power, for operating and lighting the said constructions; and no tolls or charges of any kind shall be imposed or collected for the passage of any boat through the said lock or through any of the locks or canal of said corporation.

That compensation shall be made by the said Connecticut River Co. to all persons or corporations whose lands or other property may be taken, overflowed, or otherwise damaged by the construction, maintenance, and operation of the said dam, lock, and appurtenant and accessory works, in accordance with the laws of the State where such lands or other property may be situated; but the United States shall not be held to have incurred any liability for such damages by the passage of this act.

That upon the termination for any cause whatever of the authority, rights, and privileges granted hereby, or any renewal thereof, the United States may renew the same or the grant may be made or transferred to other parties. Unless the grant is renewed to the original grantee or its assigns, as herein provided, the United States shall pay or require its new grantee to pay to said original grantees or its assigns, as full compensation, the reasonable value of the improvements and appurtenant works constructed under the authority of this act and of the property belonging to said corporation necessary for the development hereby authorized, exclusive of the value of the authority hereby granted. Said improvements and appurtenant works and property shall include the lands and riparian rights acquired for the purposes of such development, the dam and other structures, and also the equipment useful and convenient for the generation of hydroelectric power or hydromechanical power, and the transmission system from generation plant to initial points of distribution, but shall not include any other property whatsoever. Such reasonable value shall be determined by mutual agreement between the Secretary of War and the owners, and, in case they can not agree, then by proceedings instituted in the United States district court for the condemnation of such properties. The basis for determining the value shall be the cost of replacing the structures necessary for the development and transmission of hydroelectric power by other structures capable of developing and transmitting the same amount of marketable power with equal efficiency, allowance being made for deterioration, if any, of the existing structures in estimating such efficiency, together with the fair value of other properties herein defined, to which not more than 10 per cent may be added to compensate for the expenditure of initial cost and experimentation charges and other proper expenditures in the cost of the plant which may not be represented in the replacement valuation herein provided.

That the right to alter, amend, or repeal this provision is hereby expressly reserved.

The PRESIDENT pro tempore. The question is on the amendment submitted by the Senator from Ohio [Mr. BURTON].

Mr. BURTON obtained the floor.

Mr. BANKHEAD. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Ohio yield to the Senator from Alabama?

Mr. BURTON. Yes.

Mr. BANKHEAD. I should like to inquire of the Senator from Ohio about how long he thinks he will discuss this matter?

Mr. BURTON. For not more than 10 minutes.

Mr. BANKHEAD. I desire to raise the point of order against the amendment, and I do not want to be precluded by any proceeding that may come in advance of my doing so.

The PRESIDENT pro tempore. That will be the Senator's right at any time.

Mr. BURTON. Mr. President, this amendment is in the same form, practically, as a bill which was heretofore considered by the Senate, but in the disposition of which a portion was eliminated by amendment. There are, however, two vital reasons why the amendment I now offer should be adopted, which did not exist when the bill to which I refer was acted on by the Senate. Those two reasons are these: First, the original bill contained, as does this amendment, a provision that a certain charge should be imposed upon the company, and that the fund so created should be used by the United States for the improvement of the Connecticut River. It was maintained by some of the Senators that this was an unlawful exercise of Federal power. There was much discussion on that subject. With equal earnestness it was maintained by some that the provision was entirely valid and by others that it was invalid. This amendment contains a provision, not included in the original bill, which will be found on page 3, beginning with line 5, and reads as follows:

And provided further, That if said company shall neglect or refuse to pay any charge or return demanded of said corporation by the Secretary of War, either by order or under any contract, and such neglect or refusal is based on the ground that said charge or return is invalid or unconstitutional and not within the power of Congress to require, such neglect or refusal on the part of the company shall not affect the rights of said company to hold and exercise all the powers, rights, and privileges granted in this act; and in any suit brought against said corporation for the collection of said charge or return, the said corporation shall have the right to enter its proper plea to test the constitutionality or validity of said charge or return, and the courts shall take cognizance of the same.

So much for that. Why should Senators be reluctant to have this question, about which there was so much discussion, submitted to the courts? Most careful provision is made that if the company refuses to pay the proposed charge that shall not interfere with their rights to utilize this water power, but that they may continue to do the business which they are organized to do, and the courts will decide the question of the constitutionality of the charge. De we not have, Mr. President, some interest in having submitted to the court this question in the discussion of which several days were consumed?

But, still further, others stated that the bill created a precedent which would operate unfavorably in other cases where it was sought to develop water power. To meet their contention this clause has been inserted:

And nothing in this section shall be understood as committing the Government to a policy of imposing or not imposing such charges or returns as are herein described from any other company or corporation seeking the assent of Congress under like or similar circumstances.

Eight or nine members of the Committee on Commerce filed a report in which they stated that they favored the bill and that, except for this clause imposing a charge, they would vote for it, but they regarded that as invalid and as creating an unfavorable precedent. Now, provision is not only made for determining whether or not it is valid or invalid, without interfering with the rights of the company, but there is an express declaration that it shall not be regarded as a precedent.

In the course of my argument several days ago I said, Mr. President, that the conditions here were somewhat exceptional; that this dam was located in the midst of a thickly settled country where there existed a great demand for power. To make sure that in another place where there might be a sparse settlement a similar charge could not be imposed, this amendment expressly provides that this legislation shall not be regarded as a precedent.

Mr. WORKS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Ohio yield to the Senator from California?

Mr. BURTON. Yes.

Mr. WORKS. Does the Senator from Ohio really think the corporation would raise that question and involve itself in litigation, while it has the right under the law to collect back from its consumers every dollar of the money that it is required to pay out for such charges?

Mr. BURTON. Mr. President, I argued that question at great length some days ago. The corporation does not have the right to collect every dollar back from its consumers. This provision is inserted here as a safeguard against exorbitant profits. It is expressly provided that the public utilities commission of the State may fix the charge. In actual practice the Federal charge will be imposed, as has been repeatedly pointed out, only after the rate-fixing authority of the State has determined the rates the company may charge, and then only when an undue margin of profit still remains.

I may repeat briefly what I formerly called attention to, that the price of power is determined by competitive conditions; that the greater share of power consumed or used in that locality would be generated by coal; that portion of the power furnished by water would cost much less; and that a public utility commission could not consistently fix one price for power

generated by water and another price for power generated by coal.

The second reason for adopting this amendment, which did not exist when the original bill was up for consideration, is this: We have inserted in the pending bill a provision for a leasing of the power created by a dam between Minneapolis and St. Paul. Under what terms? That the company utilizing that power must pay what? Four per cent interest, not on the total cost of the dam, but on that additional cost, which is necessary to make the dam capable of producing water power; that is, the dam for navigation would cost, say, $800,000, whilst the dam with the capability of producing water power would cost $1,400,000; and there is a charge of 4 per cent on that additional $600,000. We have thereby, if any legislation by Congress establishes a principle, established a rule that the Government, when constructing works for the promotion of navigation, may add to the cost of those works an amount sufficient for the creation of water power, and that it is entitled to compensation on the amount of its investment for the creation of that water power.

Mr. President, what defense could be offered if we should adopt that kind of a proposition and should refuse this? Why, we would be saying that the Government of the United States might spend its own money for the creation of water power and lease that privilege for 4 per cent interest on its investment, but that when a corporation comes to us and offers to build a lock and dam, furnish power, and do everything else necessary for navigation, we refuse it. Does that look like very much care for the interests of the United States? Does that indicate any degree of foresight and of regard for the interests of the Federal Government? It would virtually be saying that this private corporation can not build a lock and dam, but the Government may build the lock and dam and lease it for 4 per cent interest on the cost.

Mr. President, I am not willing, and I do not believe the Senate is willing, to have it said that we will build and turn over to a corporation expensive works at 4 per cent interest, but that we refuse to allow a private corporation, at its own expense, without cost to the Government, to create this very substantial aid to navigation.

The subject has been so long discussed, Mr. President, that I do not desire to prolong my remarks, and I trust that the offering of the amendment will not reopen the controversy which has heretofore consumed so much time. It is in no language of challenge that I say to those on the other side, "You have taken a different view as to the local phases of this question; now, let us submit it to the courts." It is rather as an orderly presentation of the argument and of the statement to the Senate that this is the way, and the only way, to have this question, which must be of such vital importance in the future, settled, and settled beyond controversy.

Mr. BANKHEAD. Mr. President, I desire to make a point of order against this amendment for two reasons: First, it is obnoxious to paragraph 3 of Rule XVI; and, second——

The PRESIDENT pro tempore. Will the Senator kindly read that paragraph?

Mr. BANKHEAD. I ask that the Secretary read it.

The PRESIDENT pro tempore. In the absence of objection, the Secretary will read as requested.

The Secretary read from paragraph 3 of Rule XVI, of the Rules of the Senate, as follows:

3. No amendment which proposes general legislation shall be received to any general appropriation bill, nor shall any amendment not germane or relevant to the subject matter contained in the bill be received.

Mr. BANKHEAD. Again, Mr. President, it is a violation of section 7, Article I, of the Constitution of the United States, which provides:

SEC. 7. All bills for raising revenue shall originate in the House of Representatives; but the Senate may propose or concur with amendments as on other bills.

Mr. President, it is perfectly evident, and I do not think it requires an argument to satisfy the Senate, that the purpose of this amendment is to raise revenue. It levies a tax, to be collected through the agency of the Secretary of War, the funds to be paid into the Treasury. Therefore it can not be denied, it seems to me, that it has for its purpose, and for its main purpose, the raising of revenue. To say nothing of that, I insist it is obnoxious to the clause of the rule that has just been read.

Mr. BURTON. Mr. President, a river and harbor bill is not essentially an appropriation bill at all; it is a bill making allowances for different river and harbor works and providing for their construction. In almost every river and harbor bill for 10 years we have had provisions of this nature, to the effect that a privilege shall be granted to construct dams in navigable streams. This bill is full of provisions other than those relating to appropriations. There is a long list of surveys; there is authority to rent dredges under certain circumstances; and there is authority to receive donations of land. Without the right to insert paragraphs which relate to the construction of locks and dams the improvement of rivers could not proceed without very serious embarrassment. A lock and dam is just as much in the interest of navigation when made by a private party as when made by the Government. Hence that point is not well taken.

The constitutional provision against the origination of bills for raising revenue in the Senate is one which applies where the main object, you might say the sole object, is the raising of revenue. In this case that is not true; it is incidental to the main purpose. It is the granting of a privilege—you can perhaps hardly call it a franchise—but the right is granted to construct a work in aid of navigation, and coupled with that right is a condition that there shall be a certain charge imposed, not for general revenue, but for the improvement of that river and its connecting waters. If the contention of the Senator from Alabama should be correct, you could never frame one of these provisions in the Senate, and he himself knows that that has been very frequently done. If nothing which involved a charge for the privilege could be imposed as a condition, it would be necessary to grant the naked privilege without conditions or reservations.

Mr. SIMMONS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Ohio yield to the Senator from North Carolina?

Mr. BURTON. Certainly.

Mr. SIMMONS. I should like to inquire of the Senator if he does not think—and I am asking for information—that the money to be paid to the Government under this amendment would have to go into the Treasury and have to be subsequently drawn out by an appropriation?

Mr. BURTON. Yes; it would have to go into the Treasury.

Mr. SIMMONS. Then, is it not analogous to provisions in the river and harbor bill in relation to contributions on the part of the localities concerned?

Mr. BURTON. It is provided in such cases that the amounts shall be paid into the Treasury.

Mr. SIMMONS. If this money must be paid into the Treasury and appropriated out, how does the Senator distinguish this fund from any other fund belonging to the Government?

Mr. BURTON. Because it is for a special purpose and in connection with the object relating to which the privilege is granted. It is very different, as the Senator from North Carolina will readily recognize, from a provision for general revenue, and, even if that were not the case, it is a mere incident, and would not be obnoxious to the constitutional provision.

Mr. LODGE. Mr. President, the other day when a question was raised upon the amendment of the committee in regard to the Minnesota dam, I had no doubt whatever that the amendment was in order; that it was not general legislation; and the Senate so decided. "General legislation," as affecting this bill, does not mean appropriations for the specific purposes for which this bill is framed. Any appropriation relating to rivers and harbors that has been properly estimated for or that has been reported from a committee is in order. In such a case it is to carry out the purposes of the bill, and it can not possibly be said to be general legislation.

As to the point about raising revenue, it seems to me that that has hardly any weight. The Constitution provides that "all bills for raising revenue shall originate in the House of Representatives." This either is a bill to raise revenue or it is not. I do not think it is a bill raising revenue. It is open to us to put on any amendment we like, even if that amendment carries some fee or compensation. If it is not a bill to raise revenue, of course the point of order does not apply; and if it is a bill to raise revenue, then we have the right to amend it, expressly given by the Constitution. It must be one or the other.

Mr. BRANDEGEE. Mr. President——

The PRESIDENT pro tempore. The Chair will be pleased to hear very briefly on the point of order.

Mr. BRANDEGEE. Mr. President, I desire to put into the RECORD a brief extract from the discussion which took place upon this very point in relation to the Municipal Electric Co. amendment in connection with the dam on the Mississippi River. It appears on page 3593 of the RECORD, under date of February 20, 1913, and is as follows:

Mr. THOMAS. * * * My attention has been called to section 3 of Rule XVI as bearing upon this amendment, from which I will read: "No amendment which proposes general legislation shall be received to any general appropriation bill."

This amendment certainly proposes general legislation. I therefore make the point of order that it is obnoxious to section 3 of Rule XVI of the Rules of Procedure of the Senate.

Mr. NELSON. Mr. President, on the point of order, this is a special case that follows the appropriation for the dam. That appropriation of $185,000 is for this dam, and the amendment relates simply to this particular dam. It is not of a general character. It is not general legislation.

Mr. NEWLANDS. Mr. President, I should like to ask the Senator from Ohio [Mr. BURTON] whether it has not been customary to insert legislation of this kind in river and harbor bills? Is not the river and harbor bill regarded not simply as an appropriation bill, but a bill providing authority for surveys, etc., and also appropriating money for projects?

Mr. BURTON. Mr. President, I do not think any discussion has arisen on that subject in the Senate. In the House it is regarded as a quasi appropriation bill, and material relating to public works and rivers and harbors is considered in order. That is, it is not regarded as strictly an appropriation bill and governed by the rules which pertain to appropriation bills.

Mr. NEWLANDS. I remember hearing the Senator make that statement at the committee meeting the other day when the question arose.

Mr. BURTON. That is certainly the rule in the House. It is not regarded as absolutely confined within the limits which pertain to an appropriation bill, as it will appear that the modification of projects or provisions relating to associated projects are subjects which could not well be disposed of except in this bill. For that reason the rule has been established that it is not limited by the strict rules pertaining to appropriation bills, at least in the House.

Then the discussion goes on. Finally the Chair submitted the question to the Senate, and upon page 3594 of the RECORD the President pro tempore said:

The Chair submitted it to the Senate, and it was decided that it was in order.

Now, Mr. President, this is exactly that same case. This is a permit authorizing the maintenance of a particular dam at a point in a river, and it can not be said in any respect to be "general legislation."

As to the point of order that it is "a bill for raising revenue" under the language of the Constitution, it seems to me that that claim can not seriously be made.

Section 7, Article I, of the Constitution provides:

All bills for raising revenue shall originate in the House of Representatives—

And so forth.

To say that an amendment to a river and harbor bill, which issues a permit to maintain a dam, is a bill for the purpose of raising revenue, of course, is far-fetched and absurd. I hope the Chair will overrule the point of order.

Mr. SMOOT. Mr. President, the Senator from Ohio [Mr. BURTON], as I understood him, made the statement that the river and harbor bill is not a general appropriation bill.

Mr. BURTON. Certainly; it is not.

Mr. SMOOT. I simply rise, Mr. President, to state that I understand that it is considered in the Senate to be a general appropriation bill. If I am wrong in that statement, I should like to have the Chair correct me.

Mr. BRANDEGEE. The bill states on its face that it is "A bill making appropriations for * * * rivers and harbors, and for other purposes."

Mr. SMOOT. Certainly; but it is considered, and always has been considered in the Senate of the United States, a general appropriation bill.

The PRESIDENT pro tempore. The Chair will deal with that matter in attempting to decide this question.

Mr. BANKHEAD. I should like to read, Mr. President, paragraph 1 of Rule XVI with reference to appropriation bills:

All general appropriation bills shall be referred to the Committee on Appropriations, except the following bills, which shall be severally referred as herein indicated, namely: The bill making appropriations for rivers and harbors—

And so forth.

If that does not make it a general appropriation bill I do not understand the rule.

Mr. BRANDEGEE. Mr. President, there is no relevancy whatever to the point of order as to whether or not it is a general appropriation bill. The point is that, even if it is a general appropriation bill, the amendment proposed is not general legislation.

The PRESIDENT pro tempore. The Senator from Alabama [Mr. BANKHEAD] makes a point of order against the amendment on two grounds: First, that it is general legislation on an appropriation bill according to Rule XVI; and second, that it is obnoxious to the provision of the Constitution of the United States, that "bills for raising revenue shall originate in the House of Representatives." The Chair does not consider it his function to decide a constitutional question, whatever his views on that point may be, but will confine himself to dealing with the point the Senator from Alabama makes, that the amendment proposes general legislation.

Mr. NELSON. Mr. President, there was another point made by him, and that was that the amendment is not germane.

The PRESIDENT pro tempore. The Chair did not hear that point.

Mr. BANKHEAD. Yes; I included that, Mr. President, in my point of order.

Mr. BURTON. Mr. President, if there is to be any discussion——

The PRESIDENT pro tempore. The Chair can not be interrupted just at this point. The Senator from Connecticut [Mr. BRANDEGEE] has read briefly the proceedings that occurred a few days ago on the amendment relating to the Mississippi River dam, and has shown by the CONGRESSIONAL RECORD that the Chair submitted that question to the Senate and that the Senate decided that the amendment was in order, and so decided, the Chair may well say, on a decisive vote, the yeas and nays being refused when they were demanded. During that debate several Senators whose opinions are entitled to great weight made declarations along this line. The Senator from Colorado [Mr. THOMAS] said:

I think it involves—

That is the Mississippi River dam project—

I think it involves to a very large extent the same conditions which were adopted by a majority of the Senate in the Connecticut River bill.

The Senator from New York [Mr. O'GORMAN] said:

But I have this to remark: If the Senate adopts this amendment, it should reconsider its action respecting the Connecticut dam bill, upon which we voted a few days ago.

The Senator from Idaho [Mr. BORAH] observed:

There is a difference so far as the physical facts are concerned; but there is no difference, to my mind, between the principle which is involved in this amendment and the one which was involved in the Connecticut dam bill.

There may have been somewhat similar utterances by other Senators, but the Chair simply turned to those three expressions on the part of Senators who have looked into this matter very carefully.

In view of the fact that the amendment relating to the dam on the Mississippi River was submitted to the Senate, and by a decisive vote was held to be in order, and in view of the further fact of the utterances that were made to the effect that these two amendments were on all fours, the Chair overrules the point of order.

Mr. BANKHEAD. Mr. President, I make the point of order that the amendment is not germane or relevant to the bill.

The PRESIDENT pro tempore. Under the rules, that point of order must necessarily be submitted to the Senate.

Mr. BURTON. Mr. President, I wish to be heard briefly on that matter. This follows a provision for the improvement of the Connecticut River. It is in pursuance of a survey and report made under the order of Congress, in which report this improvement is favorably regarded; but it is stated that the expense due to the development of water power, unless there is participation, should not be undertaken.

The PRESIDENT pro tempore. The Chair will suggest to the Senator from Ohio that it is not within the province of the Chair to decide the point of order now raised, the rules providing specifically that it shall be submitted to the Senate.

Mr. BORAH. Mr. President, I am sorry the Senator from Alabama [Mr. BANKHEAD] raises this question in this way. There can be no doubt but that this amendment is relevant and germane upon the same principle as the amendment which we adopted a few days ago. While I am opposed to both of them, I do not desire to be placed in the position of voting for this amendment when I vote in favor of the proposition that it is relevant or germane to the bill. We ought to vote upon it directly as to whether we want it on the bill or not. Senators who voted for the amendment a few days ago ought either to vote for this or to vote against it. It involves precisely the same principle. If the Senate is ready to reverse its action, let us reverse it now, and establish this precedent and put it in this bill.

Mr. NELSON. Mr. President, the Senator from Idaho is utterly mistaken. It is not the same principle. The dam on the Mississippi River at Minneapolis was a dam built by the Federal Government with its own money, in the interest of navigation, and it was only incidentally that the power was created. This dam on the Connecticut River is not to be built by the Federal Government. It is to be built by a private company with its own money, and the Federal Government has not a dollar invested. That is the great difference between the two cases.

Mr. BORAH. Mr. President, that difference is no difference at all so far as the legal principle is concerned. It can not make a particle of difference, as far as the legal principle involved is concerned, whether the National Government builds the dam or whether private individuals are going to build it. When we come to analyze it, in its last analysis, the principle is precisely the same. The physical facts are different, but the power of the National Government over the power created is the same.

The PRESIDENT pro tempore. If the Senator from Idaho will permit the Chair, according to the rules of the Senate the point of order now made, that this amendment is not relevant, must be decided without debate. The Chair will submit to the Senate the question as to the relevancy of the amendment.

Mr. BANKHEAD. Mr. President, I ask unanimous consent to proceed for a moment.

The PRESIDENT pro tempore. The Senator from Alabama asks unanimous consent to make a statement. Is there objection? The Chair hears none, and the Senator will proceed.

Mr. BANKHEAD. After further consideration of this question, I believe——

Mr. LODGE. Mr. President, this is a most extraordinary procedure. The Senator from Idaho has just been taken off the floor on the ground that the matter is not debatable, and then another Senator is permitted to occupy the floor.

Mr. BANKHEAD. I thought I had the consent of the Senate, including the Senator from Idaho, to make a statement.

Mr. LODGE. It is a most extraordinary procedure.

Mr. BANKHEAD. Mr. President, with the hope that it might facilitate the disposition of these matters, I asked that the Senate would bear with me for a minute. Have I unanimous consent to proceed for, say, two minutes?

The PRESIDENT pro tempore. The Chair put the question, and there was no objection to the Senator's proceeding briefly.

Mr. BANKHEAD. Mr. President, as I said, after further consideration I believe I will withdraw my point of order. I am willing to have the Senate vote on this question. It has gone on record once, and I am willing that it should go on record again. In withdrawing my point of order I desire to offer a substitute for the amendment offered by the Senator from Ohio, which is the bill as it passed the Senate a few days ago.

Mr. BRANDEGEE. I object to the withdrawal of the point of order.

The PRESIDENT pro tempore. The Chair thinks it would not be competent for a Senator to object to the withdrawal of a point of order.

Mr. BRANDEGEE. Then, Mr. President, I renew the point of order myself.

The PRESIDENT pro tempore. The Senator from Connecticut renews the point of order. The question is——

Mr. BORAH. What is the point of order?

The PRESIDENT pro tempore. The point of order is that the amendment is not germane to the bill.

Mr. BRANDEGEE. I hope the Senate will decide that it is germane. I do not want a vote on the amendment which the Senator from Alabama proposes to offer as a substitute for the amendment proposed by the Senator from Ohio.

Mr. BANKHEAD. We are about to get this matter rather complicated, it seems to me. As I understand, objection is made to my withdrawing the point of order.

Mr. BRANDEGEE. I hope the Senator will withdraw his amendment and let the vote come on the amendment proposed by the Senator from Ohio.

Mr. BANKHEAD. I do not propose to be dictated to.

Mr. BRANDEGEE. Neither do I.

Mr. JONES. Mr. President, I rise to a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator from Washington will state it.

Mr. JONES. Suppose, in passing upon the point of order raised by the Senator from Connecticut, the Senate should declare that the amendment is germane; would not a substitute then be in order?

The PRESIDENT pro tempore. Certainly so.

Mr. BRANDEGEE. It can then be offered.

Mr. BANKHEAD. I will withdraw my amendment, then, until the other question is disposed of.

The PRESIDENT pro tempore. The question is, Is the proposed amendment germane to the bill? [Putting the question.] By the sound the ayes have it. The ayes have it, and it is decided that the amendment is germane.

Mr. BANKHEAD. Mr. President——

The PRESIDENT pro tempore. The question now is——

Mr. BANKHEAD. Mr. President——

The PRESIDENT pro tempore. The Chair will recognize the Senator from Alabama in a moment. The question is upon the amendment submitted by the Senator from Ohio [Mr. BURTON]. The Senator from Alabama is now recognized.

Mr. BANKHEAD. Mr. President, did I understand the Chair to decide that a majority of the Senate had voted that the amendment was relevant?

The PRESIDENT pro tempore. The Chair decided that, by the sound, the ayes had it.

Mr. BANKHEAD. I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. SHEPPARD (when Mr. CULBERSON'S name was called). My colleague is absent on business of the Senate. He is paired with the Senator from Delaware [Mr. DU PONT].

Mr. CULLOM (when his name was called). I have a general pair with the junior Senator from West Virginia [Mr. CHILTON]. In his absence, I withhold my vote.

Mr. NELSON (when his name was called). I have a pair with the senior Senator from Georgia [Mr. BACON]. On that account I withhold my vote.

Mr. PAYNTER (when his name was called). I will ask whether the senior Senator from Colorado [Mr. GUGGENHEIM] has voted?

The PRESIDENT pro tempore. The Chair is informed that that Senator has not voted.

Mr. PAYNTER. Having a general pair with that Senator, I withhold my vote.

Mr. SMITH of Georgia (when his name was called). I desire to state that the senior Senator from Georgia [Mr. BACON] is detained in his room by sickness.

Mr. SMITH of Michigan (when his name was called). I have a pair with the junior Senator from Missouri [Mr. REED], and in his absence I withhold my vote. If I were at liberty to vote on the point of order, I should vote "yea."

Mr. WARREN (when his name was called). I have a general pair with the senior Senator from Louisiana [Mr. FOSTER]. I will ask if he has voted?

The PRESIDENT pro tempore. The Chair is informed that that Senator has not voted.

Mr. WARREN. Then I withhold my vote.

Mr. WILLIAMS (when his name was called). I wish to inquire if the senior Senator from Pennsylvania [Mr. PENROSE] has voted?

The PRESIDENT pro tempore. The Chair is informed that that Senator has not voted.

Mr. WILLIAMS. I have a pair with the Senator from Pennsylvania; and not knowing how he would vote, I withhold my vote.

The roll call was concluded.

Mr. BRADLEY (after having voted in the negative). I withdraw my vote, in view of the fact that the Senator from Indiana [Mr. KERN] is not present.

Mr. CULBERSON. I wish to inquire if the Senator from Delaware [Mr. DU PONT] has voted?

The PRESIDENT pro tempore. The Chair is informed that that Senator has not voted.

Mr. CULBERSON. As I have a general pair with him, I withhold my vote.

Mr. LODGE. I desire to announce that my colleague [Mr. CRANE] is paired with the senior Senator from Maryland [Mr. SMITH].

The result was announced—yeas 38, nays 29, as follows:

YEAS—38.

Borah	Dillingham	Lodge	Pomerene
Brandegee	Fall	McCumber	Richardson
Briggs	Gallinger	McLean	Root
Bristow	Gamble	Martine, N. J.	Smith, Ariz.
Burnham	Gardner	Myers	Smoot
Burton	Hitchcock	Newlands	Sutherland
Catron	Jackson	Oliver	Townsend
Clark, Wyo.	Kenyon	Page	Wetmore
Crawford	La Follette	Perkins	
Cummins	Lippitt	Pittman	

NAYS—29.

Bankhead	Jones	Sheppard	Thornton
Bourne	Kavanaugh	Shively	Tillman
Chamberlain	Lea	Smith, Ga.	Watson
Clarke, Ark.	Martin, Va.	Smith, S. C.	Webb
Fletcher	O'Gorman	Stephenson	Works
Gronna	Overman	Stone	
Johnson, Me.	Owen	Swanson	
Johnston, Ala.	Percy	Thomas	

NOT VOTING—28.

Ashurst	Clapp	Foster	Poindexter
Bacon	Crane	Gore	Reed
Bradley	Culberson	Guggenheim	Simmons
Brady	Cullom	Kern	Smith, Md.
Brown	Curtis	Nelson	Smith, Mich.
Bryan	Dixon	Paynter	Warren
Chilton	du Pont	Penrose	Williams

The PRESIDENT pro tempore. The Senate decides that the amendment is germane to the bill. The question is upon the amendment submitted by the Senator from Ohio [Mr. BURTON].

Mr. JONES. Mr. President, I desire to offer as a substitute the bill as it passed the Senate a few days ago. I am offering it exactly as it passed the Senate, and therefore I suggest that it will not be necessary to read it.

The PRESIDENT pro tempore. Without objection, the reading will be dispensed with.

Mr. BRANDEGEE. May I ask the Senator a question? That is exactly what the Senator from Alabama [Mr. BANKHEAD] just attempted to do, and then he withdrew it. Inasmuch as my colleague is going to do that after the amendment

of the Senator from Ohio has been acted upon, I will ask the Senator if he will not withdraw it?

Mr. JONES. I think this ought to be done right here. I do not see why it should not be done.

Mr. BRANDEGEE. Very well.

Mr. JONES. It will come in as a substitute. It is exactly the action of the Senate the other day.

The PRESIDENT pro tempore. The Senator from Washington offers a substitute for the amendment submitted by the Senator from Ohio, and the question is upon that substitute.

Mr. SWANSON. Mr. President, I should like to inquire if that is not the bill that passed the Senate the other day without complying with the views of the President in connection with the granting of water power? As I understand, the President has repeatedly vetoed all bills granting the privilege of crossing rivers unless they provided for a tax. If this is put upon the river and harbor bill, as suggested by the Senator from Washington, with the present views of the President, it seems to me it will jeopardize the bill. If it is added on to the bill it will go to the President; and the President, as I understand, has specifically stated that unless bills granting the privilege of constructing dams provide for a tax by the Federal Government, he will not sign them. It seems to me if it is the purpose of the Senator from Washington to kill this bill, it can be very easily accomplished in that way.

Mr. JONES. Mr. President, I desire to say that it is not the purpose of the Senator from Washington to kill this bill, but the Senator from Washington does not propose to be coerced to adopt some proposition simply by some alleged action that may be taken by some other department of the Government. This is a proposition that the Senate passed upon the other day, upon the very matter that the Senator from Ohio has presented to the Senate now, and it is simply a question with me whether or not the Senate will reverse itself on that action.

Mr. SWANSON. Mr. President, of course I do not desire to have our river and harbor improvements jeopardized either by an effort on the part of Congress to coerce the President or by an effort on the part of the President to coerce Congress. But if it is the declared policy of the President that bills granting the right to construct dams will not be signed by him unless they contain a provision for a tax, and that is his honest conviction, I am not willing to vote to add a provision of this kind to a river and harbor bill to try to force him to give up his convictions and jeopardize the bill in that way.

Mr. SMITH of Georgia. Why is not the proper course to stop offering all this extra legislation and send the appropriation bill on, eliminating this additional legislation from it?

Mr. SWANSON. Mr. President, there are large enterprises and large business involved in these river and harbor improvements, and it seems to me that to take the chance of jeopardizing or destroying the bill or making it useless simply to try to have an issue on legislation between the legislative and the executive branches of the Government is not the ordinary and orderly and proper way to conduct business. It would give the President an opportunity to veto the river and harbor bill. The Senate has expressed its conviction on this other bill and has sent it to the House of Representatives, and it can go to the President as an independent proposition. But as the President has specifically said that he will not give his approval to propositions of this kind that do not give the Federal Government the power to tax, it seems to me, to put this amendment on the bill will have a tendency, whether that is the purpose or not, to destroy the bill and prevent its passage.

Mr. SMITH of Michigan. Mr. President, the Senator from Virginia [Mr. SWANSON] has expressed some apprehensions about the final enactment into law of this bill. I think his apprehensions are well founded, not so much from fear of the action of the executive department as from the delay that has kept this bill back from day to day. As one of those who assisted in its preparation, and as one who is interested in its passage, I think the bill is upon very dangerous ground this morning.

Mr. SWANSON. Mr. President, I hope the lecture that the Senator from Michigan has delivered to the other side of the Chamber will be properly obeyed, respected, and followed. The responsibility for reporting bills and the responsibility for delay so far as the Senate is concerned is with the majority, and it comes in poor taste from him to endeavor to lecture this side of the Chamber for any delay.

Mr. SMITH of Michigan. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Virginia yield to the Senator from Michigan?

Mr. SWANSON. I do.

Mr. SMITH of Michigan. I do not see how the Senator from Virginia could get the impression that I was lecturing that side of the Chamber. I simply agreed with him that the circumstances, and the short time that we now have before this Congress expires, admonish us that if this bill is to become a law we must restrain ourselves with the amendments that are being proposed, and get some action upon the bill. I am not lecturing that side. I do not think that side is responsible as much as is this side.

Mr. SWANSON. I appreciate the position of the Senator from Michigan. I know there has been nobody on this side of the Chamber who has tried to delay any appropriation bill or who has tried to delay any legislation that is necessary to run this Government. I think the effort to identify this bill with a conflict between the legislative and the executive departments of this Government is wrong; I think it is improper. The amendment should be voted down if we desire to have this legislation, which is so necessary for all sections of this country.

Mr. WILLIAMS. Mr. President, I sincerely hope that Senators will not permit the river and harbor appropriation bill for this year to be mixed up in any way with this Connecticut River dam bill. I earnestly hope the substitute will be voted down, because if it is made a part of the bill it will jeopardize the final passage of the bill and its final signing. Then I hope by a majority equally large the Senate will vote down the amendment of the Senator from Ohio [Mr. BURTON]——

Mr. JONES. Mr. President——

Mr. WILLIAMS. So that this question shall not become a part and parcel of the general river and harbor legislation.

Mr. JONES. Mr. President, I think I can save time——

Mr. WILLIAMS. One moment. I have given my reason for wanting to vote down the substitute—it will jeopardize the bill. My reason for wanting to vote down the amendment of the Senator from Ohio is that it is an attempt in an indirect way to set aside the deliberate judgment of the Senate upon the bill as it passed the Senate. It is an attempt, by tacking it onto something else, to reverse, apparently, the opinion of the Senate upon a question which it considered, debated, and decided. It does seem to me that after Senators have thrashed out this little Connecticut dam bill upon the floor of the Senate, and after the Senate has decided it according to its judgment, right or wrong, they ought to be satisfied and not attempt to embarrass the river and harbor bill with it.

Mr. JONES. Mr. President——

Mr. WILLIAMS. I now yield to the Senator from Washington.

Mr. JONES. In the interest of saving time, and in the interest of legislation that we hope to pass that is down on the calendar after this bill, and in the belief that the Senate will keep this whole proposition out of this bill, I will withdraw my amendment.

The PRESIDENT pro tempore. The amendment offered by the Senator from Washington is withdrawn.

Mr. BURTON. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Mississippi yield to the Senator from Ohio?

Mr. WILLIAMS. I do.

Mr. BURTON. Will the Senator from Mississippi state whether he has read the amendment added to the bill as it was originally introduced, leaving to the courts to determine——

Mr. WILLIAMS. I heard the Senator from Ohio make the statement that the bill was precisely the bill as originally introduced, with two exceptions, which he explained, and which he explained very thoroughly.

Mr. BURTON. Is it not true that those exceptions make a very vital difference?

Mr. WILLIAMS. I listened very attentively, and I did not see that they made any vital difference. I do not see it yet. This amendment will make such a difference. The Senator said this would not be a precedent, because he provides in one of these provisions that it shall not be a precedent. You can not keep a thing from being a precedent by saying when you do it that it shall not be a precedent. The objections of those men who do object to it is not removed by the fact that you do what they voted against doing, although you say it shall not be a precedent.

Mr. BURTON. Mr. President, if the Senator from Mississippi will yield to me for a moment, more substantial than that is the setting forth, as was done in our case, of the difference between this proposition and the ordinary proposition. I should like to ask the Senator from Mississippi if he voted for the provision relating to the dam between Minneapolis and St. Paul?

Mr. WILLIAMS. I do not remember, but there is this distinction that I think the Senator is arriving at, about which I agree with him. I agree with the Senator from Minnesota. I disagree with the Senator from Idaho. I think that where the Government erects a dam for the purposes of navigation, paying out the people's money for the construction of the dam, and there incidentally arises a source of revenue, whether from the

water power or what not, it is right and proper that the Government should to that extent reimburse itself for its expenditure, because the people have paid for the dam and the people will get the benefit of the reimbursement. I agree with the Senator from Minnesota about that.

But I think that is a different proposition from granting to a private corporation these rights and fixing a tax upon the use of the water power, so that the corporation can extend the tax to the consumer. It has been said that a public utilities commission would have the right, anyhow, to fix the rate, but when they have the right to fix the rate they consider, and must consider, and ought to consider, the various elements of cost which enter into the operation; and they would undoubtedly consider the tax as a part of the annual burden upon the corporation which was dispensing the light or power.

But I do not want to be diverted from my main object. On this question I want to express no opinion; I did not want to do that; I have been drawn into it. My main object is that the river and harbor bill shall not be embarrassed and mixed up with this Connecticut River dam bill at all. For Heaven's sake, with all these great magnitudinous interests at stake all over the country, do not deflect us from the purpose of getting this bill through the two Houses as soon as possible, so that it may go to the President as soon as possible and become a law as soon as possible. We are already approaching the 4th of March, and the two Houses were never so far behind in their general business as they are now. I do not want to see this great bill encumbered with any more provisions than are absolutely necessary to the great work of the maintenance and the improvement of the navigable waters of the United States.

Mr. BORAH. I wish to ask the Senator from Ohio if it is his intention to withdraw his amendment?

Mr. BURTON. Oh, no; by no means.

Mr. BORAH. Permit me to say, then, if we want to expedite the passage of the bill into a law both these propositions will have to go out of the bill together.

Mr. WILLIAMS. The substitute has been withdrawn by the Senator from Washington [Mr. JONES].

Mr. BORAH. The amendment will have to go out, in my judgment, or it will provoke a long debate.

Mr. WILLIAMS. Let us vote the amendment down.

Mr. BORAH. The precedent has already been established in the bill, and if we are going to strip the bill we must strip it entirely of these propositions.

Mr. BRANDEGEE. Will the Senator yield to me for a moment?

Mr. BORAH. I yield.

Mr. BRANDEGEE. Will the Senator please give me a candid opinion upon this question: Why should not the Connecticut River be treated as fairly by the Senate as the Mississippi River? Why is not this permit authorizing a dam across the Connecticut River just as proper upon this bill as the amendment which was put on by the Committee on Commerce in relation to the Minneapolis and St. Paul water power?

Mr. WILLIAMS. Mr. President, the Senator from Connecticut misunderstands me.

Mr. BRANDEGEE. I ask the Senator from Idaho that question.

Mr. WILLIAMS. Will the Senator from Idaho yield to me for just a second?

Mr. BORAH. I yield to the Senator.

Mr. WILLIAMS. If the Senator from Connecticut has asked a question of me, he misunderstands my position.

Mr. BRANDEGEE. No; I did not. I expressly disavow asking the Senator anything.

Mr. WILLIAMS. Very well. Then, with the permission of the Senator from Idaho, I will state where I see the difference. You had just as much right to have the project here as to have the Minneapolis Dam project here. You are entitled to just exactly the same treatment before the Senate that the Mississippi River is in kind, though not in degree.

But that is not the question. The Senate has passed upon your proposition. It heard it fully argued day after day. It decided against it, and I submit that it is not right to bring it up again for a second decision to the embarrassment of other legislation.

Mr. BRANDEGEE. I do not see that this will embarrass anything. If the Senate does not put on the amendment of the Senator from Ohio and shall put it on the very amendment which we have already voted in as a separate bill, I do not consider that it would embarrass the Senate or the bill. The only thing that is embarrassing the Senate now is the unlimited debate on this question, which ought to be settled in two minutes.

Mr. NEWLANDS. I ask the Senator from Idaho to allow me to say just one word to the Senator from Connecticut which I think will help to solve this question, if I can have the attention of the Senator from Connecticut.

The PRESIDENT pro tempore. Does the Senator from Idaho yield to the Senator from Nevada?

Mr. BORAH. I will yield to the Senator.

Mr. NEWLANDS. I ask whether it would not be a very reasonable solution of this question and one that would command probably the unanimous consent of this body if the Senator from Connecticut would put the structure on the Connecticut River upon the same basis as that of the Senator from Minnesota on the Mississippi River?

The two projects, I understand, involve about the same expenditure, namely, $5,000,000 each. Under the project of the Senator from Minnesota the work is to be done by the National Government. That work is devoted partially to a State use, and for that State use only 4 per cent is paid to the National Government, making a charge upon the consumers of only 4 per cent on $5,000,000, or $200,000 a year. Now, under the proposed amendment of the Senator from Connecticut——

Mr. BURTON. Will the Senator from Nevada yield to me for a moment?

Mr. NEWLANDS. Let me complete my statement. Under the proposal of the Senator from Connecticut the structure is put up by a private corporation, which is acting as the agent of the National Government, so far as the navigable feature is concerned. That agent proposes to charge to consumers 8 per cent upon $5,000,000, making a total charge imposed upon the consumers of the Connecticut River power of more than $400,000 annually, whereas only $200,000 annually is imposed upon the consumers by the Minnesota project. Both involve the same capitalization.

I ask the Senator why we can not change the character of the appropriation in the Connecticut River project and provide that it shall be paid for just as any such project is, by the National Government, which will thus absolutely control all structures in the stream and provide that the Connecticut corporation shall pay the National Government 4 per cent upon that, thus reducing the cost to consumers from $400,000 to $200,000?

Mr. BRANDEGEE. Will the Senator from Idaho yield to me to answer the question?

Mr. BORAH. I yield to the Senator from Connecticut.

Mr. BRANDEGEE. I do not ask it as a privilege on my account, but the Senator has asked me a question.

Mr. NEWLANDS. I have asked the Senator that question.

Mr. BRANDEGEE. Of course, the Senator's theory would be well enough if that was the original proposition, but we must understand that the gentlemen who have been trying to get this permit are in the process of making their financial arrangements for the construction on the basis upon which it has been started; that there is already existing a company there with rights chartered by the State of Connecticut, and the Government would have to go in and condemn that property and pay a large price and go into the business itself of making a dam. I do not ask the Government to do that.

I do not want to delay in answering the Senator any further, but I will say this, Mr. President: The Minnesota proposition and the Mississippi River proposition seem to be very dear to the hearts of the Senators who live in that section. Connecticut unfortunately has no representative upon the Committee on Commerce of this body. What I want is fair play of the Senate and a square deal.

I will say this, that if the Mississippi River is to have one sort of treatment and the Connecticut River not as fair a sort of treatment no haste will be made in the progress of this bill through the Senate, and when the bill is reported to the Senate there will be a proposition to have a separate vote upon the Mississippi River improvement, unless the Connecticut River can get fair treatment.

Mr. WARREN. Mr. President——

The PRESIDENT pro tempore. The Senator from Idaho has the floor.

Mr. WARREN. I will ask the Senator from Idaho to yield to me for a moment.

Mr. BORAH. If I may say just a word I will yield the floor.

Mr. CLARKE of Arkansas. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Idaho yield to the Senator from Arkansas?

Mr. BORAH. I yield.

Mr. CLARKE of Arkansas. I want the permission of my friend from Idaho to ask the Senator from Connecticut just one question.

Mr. BORAH. I will yield.

Mr. CLARKE of Arkansas. Is it not a fact that the Connecticut River bill has passed the Senate and is now pending in

another branch of Congress? Why is it necessary to vote upon the same bill a second time when you know it will be confronted with a hostile Executive?

Mr. BRANDEGEE. It has not passed the Senate in the form the Senator from Ohio offered it.

Mr. CLARKE of Arkansas. I am talking about the form in which it is offered by the junior Senator from Connecticut.

Mr. BRANDEGEE. That is not now pending. That may be offered in the future, and then the Senator can make any point he has a mind to.

Mr. CLARKE of Arkansas. I am not making any point except that we are consuming time upon a measure which has already passed.

Mr. BRANDEGEE. The only reason why we are consuming time is because Senators insist on talking instead of voting.

Mr. BORAH. Mr. President, when the request was first made in the Senate to bring up the Connecticut River bill, as the RECORD discloses, I objected to it at the time, for the reason I stated, that it involved a proposition of such wide-reaching moment that we ought not to try to dispose of it at this session. It is a matter in which we are vitally concerned throughout the West and it ought to be a matter of vital concern throughout the country. Now, we are attempting to settle it by piecemeal in this bill.

It does not make any difference whether the substitute is offered and adopted, or whether the amendment offered by the Senator from Ohio is adopted, it will jeopardize this bill. Not only that, but the amendment which has been offered and adopted covering the Minnesota suggestion will jeopardize the bill.

The only way in which we can pass this bill as a river and harbor bill is to pass it as a river and harbor bill and not undertake to settle the question as to what we shall do with these power sites.

We may be all wrong about our view of the matter, but in view of the fact that we have some ideas in regard to it we do not desire to be cut off by trying to settle it in a bill in which all Senators have matters of local interest. We should settle this matter of power sites in a general bill. If the Minnesota proposition had been submitted by itself, it could not have passed the Senate. It passed the Senate because it was tied up with the river and harbor bill. The only mistake the Senator from Connecticut made was in not offering his amendment to the river and harbor bill. It would have gone through.

Mr. BRANDEGEE. But I was not on the committee.

Mr. BORAH. The Senator from Connecticut had no reason to believe at that time that the Senate of the United States would reverse itself in order to pass a river and harbor bill.

Mr. WARREN. Mr. President, I do not want to enter into the merits of this particular project, but I shall soon move to test the feeling of the Senate to take some other bill if we are to continue this kind of delay. We have now nine appropriation bills, including the public-buildings bill and the one now being discussed, that must be finished this week. Some of the bills have hundreds of disputed items in them, and it is a tortuous route to handle them here on the Senate floor and later on in conference. It must be patent to everybody that we have got to get these great supply bills into conference in the next two or three days or they are going to fail.

I do not like to scold; I am not going to scold; but I think the Senate ought to understand the precarious position we are in. The various Senate committees on appropriations have been diligent; they have worked night and day; the bills are here on the calendar ready to be taken up. We must curb this superabundance of talk or we are not going to get through the annual supply bills.

We have also a unanimous-consent agreement to take up another very interesting measure, subject to appropriation bills, and those in charge of the appropriation bills do not like to press them against this unanimous-consent agreement.

Mr. LA FOLLETTE. Mr. President——

Mr. WARREN. I have only a word more, and then I will yield. I simply want to lay before the Senate this condition in justice to the several committees on appropriations. They must have quick work or they must lie down and let these bills go over to another session.

Mr. LA FOLLETTE. Mr. President, the passage of the appropriation bills, of course, is important, but by unanimous consent the Senate held out the hope to those who are interested in the bill for the valuation of the railroad property of the country that it might be considered and passed to-day. It was expected at that time that the river and harbor bill would have been disposed of, but the debate has been protracted.

Mr. President, I acquiesce in all that the Senator from Wyoming [Mr. WARREN] says about the appropriation bills, the tremendous labors that the committees having charge of those bills have put upon them, and the great importance of their passage at this session. But, Mr. President, I want to say now, and I do not believe my view of it is warped or twisted by having it pretty steadily before me for many years, that the valuation of the railroad property of this country is more important than the passage of all the appropriation bills. Had the value of the railroad property of this country been taken seven years ago, when I first presented it to the Senate and the Senate for the first time made a record upon it, it would have proved a saving of $400,000,000 annually to the people of this country.

Mr. President, if we can be accorded the opportunity of considering the valuation bill this afternoon, much as I would like to take the time of the Senate in submitting some observations upon it, I shall be very glad to have it passed with the reading of the bill and the report that accompanies it. But, Mr. President, if this day is consumed with consideration of these appropriation bills and the passage of this bill is blocked, I want to say to the Senate, and I say it meaning every word, that some of these appropriation bills will be passed by another Congress. If it is in my power to secure it, the Senate will consider and act upon the bill providing for the valuation of railroad property at this session. I am sure a majority of the Senate want to do it, and I am going to be insistent upon it. I have taken scarcely any of the time of the session in debate upon any measures, and I sincerely hope that Senators will feel the importance of permitting votes to be taken without much discussion. There is no opportunity for it now upon any of these great bills; they have either to be passed, coming in as they do at this late hour, upon the reports of the committees or they are not going to pass at all.

Mr. LODGE. Mr. President, I voted for the Connecticut River bill in its original form and also as it passed the Senate. I voted for it in its original form because I was in sympathy with the policy embodied in the conservation clause, so called. I voted for the Minnesota dam proposition because it seemed to me to embody precisely the same principle. Like the Senator from Idaho [Mr. BORAH], I am utterly unable to see any distinction in the principle between the two, and I voted cheerfully for both.

Now, Mr. President, it is proposed to leave in the Minnesota bill and not allow the Connecticut River bill to go on, even without the objectionable conservation clause; it is proposed to keep it off. The only distinction seems to me to be that one is in Connecticut while the other is in the Valley of the Mississippi. Mr. President, I can say frankly that it does not seem to me that it is fair treatment, and if there is to be a distinction made it will not hasten the progress of the bill.

Mr. McLEAN. Mr. President, I shall not occupy more than two minutes of the time of the Senate, but I want to call the attention of the Senate to one point which, it seems to me, is the important point to be considered before we vote on this measure.

The Senate will remember that last Monday, when the bill was under consideration, I tried to get a vote upon the litigating proviso which is now embodied in the amendment offered by the Senator from Ohio, but the amendment offered by the Senator from Alabama [Mr. BANKHEAD] prevented that.

I said then that I thought it would be impossible for Congress to adopt a general policy controlling the water powers of this country until the vital question raised in the first section of the bill as reported from the committee had been answered by the Supreme Court of the United States.

It seems to me that my position has been greatly fortified and strengthened by subsequent events, for since that time it has developed that an amendment to the river and harbor bill involves precisely the same principle, and instead of having two schools of hydropolitical philosophy upon this subject we have now three or four or five.

It is not necessary for me to disagree with the Senator from Minnesota or the Senator from New York or the Senator from Idaho upon this question. It does seem to me that I can ask them to agree with me that it will be important before we decide this question ultimately to know which one of the three is right.

The proviso which the Senator from Ohio has in the amendment which he offers to-day provides the way, and the only way, and the only precedent that will be established by the amendment offered by the Senator from Ohio is that the Supreme Court of the United States will take this question in hand and not only say to Congress, but to the Executive Department of this country, what it can and can not do upon this all-important question.

I should like to ask the Senator from Virginia [Mr. SWANSON], who has had much to say about the position of the present Executive on this subject, if he can promise himself that the incoming administration will be any less likely to consider the rights of the people upon this important question than the outgoing administration. If that be the case, it means that you have prevented and stopped the development of water powers in this country for an indefinite period of time, unless the pending amendment is adopted. That is the important question which we must consider. If we want to take the position that will prevent altogether the creation of wealth in this country, because when it is created we think we shall be unable to control it, let us say so.

In view of the fact that we have one school representing one line of thought and purpose and another school representing another line of thought and purpose and still another representing another line of thought and purpose upon this question, we will realize before we are through with it that this is a navigation question from more than one point of view. If we keep the course we are now on the only possible result will be that we will sail in a circle until we strike a rock, and that rock will be the Constitution of the United States. If we adopt the amendment offered by the Senator from Ohio, we will go to the only place where we can get a pilot who can bring us into port.

Mr. PITTMAN. Mr. President, I wish to explain my position on this question, so as not to appear inconsistent.

I voted in the affirmative on the question as to whether or not the amendment was germane, because I believe that the power to create water power and dispose of it is germane to the control of navigation. I intend to vote against this amendment, because I think it is a dangerous policy to turn over to individual enterprise the improvement of navigation.

I think the senior Senator from Minnesota [Mr. NELSON] has correctly stated the distinction between the two propositions that have been discussed. I want my stand to be clear on this point, so that there may be no misunderstanding. I intend to vote against the pending amendment.

Mr. THOMAS. Mr. President, I have been so much impressed by the remarks of the Senator from Wisconsin [Mr. LA FOLLETTE] within the last few moments that I do not propose to take the time in a discussion of this amendment that I originally intended to occupy. I believe thoroughly that his statement of the importance of the bill providing for the ascertainment of the valuation of our great transportation companies is of more importance, as he has said, in its general effect upon the business and the welfare of the country than all the appropriation bills now pending for determination before this body. Hence, I want to see that bill crystallized into legislation before we adjourn, and I shall regret very much that any time which I may occupy would even indirectly contribute to its defeat.

Mr. President, I have no wish to block the financial legislation of this country. I realize the necessity of its enactment, to the end that the affairs of the Government may go on in their regular way, quite as deeply and profoundly as any other Member of this Chamber, but I do not think that because the present session has but a few remaining days to do business in we should for that reason hastily enact important legislation concerning the vast appropriation bills.

I want to impress, by way of preliminary, upon the attention of the Chamber the fact that this debate occurring at this time is largely, if not almost entirely, due to the fact that the appropriation bills are loaded down with amendments that are directed by and intended to subserve private interests instead of confining the appropriation bills to their legitimate purposes and objects.

The Connecticut River bill came up the other day for discussion. A good deal of time was devoted to it, perhaps more time than the importance of the subject in the opinion of some at least demanded. When the deliberate judgment of this body was taken it was against some of the principal features of that measure. It now appears practically in the same phraseology as an amendment to this appropriation bill, because of the fact, I presume, that this body did approve the amendment offered by the Senator from Minnesota with reference to water power in the Mississippi River and in which the cities of Minneapolis and St. Paul and the State University were interested.

I opposed that amendment upon the fundamental proposition that this Government has no power under the guise of improving navigation to spend money for private purposes, which was admittedly the amendment of the Senator from Missouri. I want to say in perfect candor that if that amendment is to stand I know of no reason why this one ought not also to stand, because, bad as it is, in my judgment it is not so bad as the one which is now a part of the bill up to this time in our deliberations concerning it. I shall vote against it, therefore, because of the principal objections urged against it the other day and also because it has no place or part in this appropriation bill.

It was stated by the Senator from Ohio last week that a great many of the items in this bill, under the guise of improving navigation were designed to create water power in the interest of corporations and individuals. I do not, of course, know what specific items the Senator referred to, but if it be a fact that the river and harbor bill is a bill that is designed to improve the navigation of the rivers and to protect the property of the country from our annually recurring floods and inundations, then it ought not to be loaded down with appropriations that are designed, under the guise of serving the public, to create property or promote the interests of large electric-power concerns throughout the country. I think it is better that we should ascertain and determine once for all whether appropriation bills are going to be what the name implies or whether they are going to be vehicles through the medium and agency of which large private interests can carry out their purposes and objects under the guise of improving the navigation of the rivers of this country.

I can not, therefore, Mr. President, subscribe to the proposition that the passage of appropriation bills is so essential and important, in view of the fact that these things occur in such bills. I am absolutely satisfied, as was stated by the Senator from Idaho [Mr. BORAH] a few moments ago, that the Minneapolis enterprise or scheme—and I use the term in no disrespectful manner—never could have been passed through this body, basing my opinion on the vote on the Connecticut River bill, unless it had been made a part and parcel of a great appropriation bill in which Members are interested, and very properly so, because of the advantages to be derived from its enactment, and also because of the demand, principally from the Mississippi River Valley, for appropriations for the protection of property and the improvement of the navigability of the river, it being at present, in view of the recent enormous floods, in a most unsatisfactory condition.

I was told the other day by a Member of this body that the total appropriations for this year in all of our several bills will be in excess of $1,150,000,000, an amount so great that the imagination is staggered when we attempt to conceive of it. It is, if the statement be true—and I have no doubt that it is—the most enormous aggregate appropriation ever made by any Congress of the United States. The bills which contain in the aggregate this enormous sum come before this body within 10 days of its adjournment, and we are supposed to be able and to be capable of taking up the various items, criticizing them, and determining which of them are proper and which of them are not.

I have heard a great deal about conservation since I became a Member of this body. It seems to me that conservation of our revenues—the money of the people—and its appropriation along proper channels for public purposes, wisely provided for and wisely administered, is an element of conservation that appeals very strongly to the hearts, the consciences, and the judgment of all men. We may save at the spigot here by our general system of preserving the resources of the country and then waste at the bunghole through these extravagant expenditures of the public money, and our efforts of conservation will be defeated by ourselves.

This stupendous sum of money, $1,150,000,000, is the equivalent of $11.50 per head for every man, woman, and child in these United States, calculating the population upon a basis of 100,000,000 souls. This is taxation which perhaps the people do not feel directly because of the manner in which the revenues are imposed and collected. The Democratic Party has recently, at the last election, accomplished a tremendous triumph, and has swept its national ticket into power by one of the largest majorities ever given to a candidate in the electoral college. That triumph was based, among other things, upon the assurance to the people, which it must keep, that taxation shall be reduced, particularly by a revision of the tariff. How is it possible for us to thus legislate, while, at the same time, we are making these enormous expenditures of public money? They may be necessary; I have not been long enough in this Chamber, Mr. President, to act as a censor of appropriation bills, and, certainly, I do not propose at any time to arrogate to myself any superior or abundant wisdom not possessed by my colleagues in this body; but we all know, as citizens cognizant of public opinion, that there are some measures of appropriation which have become so flagrant in their disposal of public moneys as to be termed "pork-barrel bills," a name, the significance of which is, of course, obvious to all, and which has been the outgrowth of the use of our powers of legislation to so dispose of public moneys as at least to create the suspicion that they were not at all times intended so much for the

public use as for private purposes; and among them is the river and harbor bill, swelled this year to more than $8,000,000 in excess of the amount of the last appropriation.

The Senator from Ohio has called specific attention to certain items of appropriation referring to so-called improvements of so-called rivers which are not navigable, which never were navigable, and which can never be made navigable; and yet one of them, in the particular to which he referred, has in this bill an appropriation of $270,000. I do not suppose that that is by any means a solitary instance of the method in which this bill has been constructed. I do not believe that I am extravagant when I say that perhaps one-third of the amount of the appropriations carried in this measure are appropriations either for the purpose of creating water power under the guise of improving rivers and harbors, or for the purpose of carrying on other enterprises in which individuals or corporations are largely interested, and which, therefore, justify the popular verdict as to the character and nature of such measures.

If it were not for the fact that the great Mississippi Valley needs the appropriations which this bill carries; if it were not for the fact that that mighty stream has recently overflowed its boundaries, swept levees away, and visited death and destruction on its course to the Gulf, I, personally, would rather see this bill fail than to see it become a law, carrying, as it does, the provisions to which I have called attention.

Now, Mr. President, addressing myself directly to this amendment for a moment—and I shall not detain the Senate longer—we are making precedents for the future. The Senator from Ohio has referred to certain amendments or certain changes which have been introduced into the body of this measure, by means of which it has been differentiated from the measure upon which we voted the other day. I do not question the purpose for which these amendments were designed; but we are now at the eleventh hour, so to speak, in the consideration of the bill proposing to attach to it an amendment that is designed to give a private corporation in the State of Connecticut the right to make certain improvements, in consideration of which it will obtain a water power, which it otherwise would not possess. It will get that water power by a contract from the Government, which does not own it, and we are going to put the measure through, not because of its merits, but because, being a part of a bill in which so many Senators are interested, they will vote for it lest the bill itself be defeated.

The Senator from Virginia [Mr. SWANSON] made the statement that if one of the amendments were incorporated in the bill, that being the Connecticut River bill as it passed the Senate the other day, the President of the United States might veto it. Mr. President, are we to be deterred from the consideration of the merits of a measure simply because the Executive of the United States may use his veto power and thus bring the legislation itself to nothing? There are many features of the bill which, in my judgment, would make it a God-send if the President did disapprove it. We are legislating in these bills for the next fiscal year, beginning in July. There have been sessions of Congress in the past that have adjourned without the enactment of measures like this; and yet the Government still survives. There have been sessions of Congresses which have adjourned which passed no river and harbor bill.

I recall particularly one a few years ago that was defeated by constant discussion upon the floor of this body by the late Senator from Montana, Mr. Carter. It did not seem to me—and my recollection is pretty good of the condition of affairs immediately following that time and since—that the failure of that bill stopped the wheels of Government or interfered with the general course of public affairs in the slightest degree.

We ought to take up these bills at an earlier period in the session. They should not come over at so late an hour; we ought to consider them item by item and then determine that which is designed for the public good and that which should have no place in legislation of this kind.

Before I take my seat, Mr. President, I want to say one further word upon a subject somewhat akin to and, perhaps, directly involved in this matter. It is the necessity, in my opinion, of legislation here which will enable the President of the United States to veto specific items in appropriation bills. We should give him the power to scan these enormous appropriations of money and to draw his pen through those items which, in his judgment, are not warranted either by the state of the public revenues or by the object which it is designed to subserve. By conferring upon him such authority we could save the Treasury of the United States millions of dollars every year and at the same time devote ample funds to the several departments for their support and maintenance during our successive fiscal periods.

The PRESIDENT pro tempore. The question in on the amendment submitted by the Senator from Ohio [Mr. BURTON].

Mr. THOMAS. I suggest the absence of a quorum, Mr. President.

The PRESIDENT pro tempore. The absence of a quorum being suggested, the roll will be called.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Curtis	Lippitt	Root
Bankhead	Dillingham	Lodge	Sheppard
Borah	du Pont	McCumber	Simmons
Bourne	Fletcher	McLean	Smith, Ariz.
Bradley	Foster	Martin, Va.	Smith, S. C.
Brady	Gallinger	Martine, N. J.	Smoot
Brandegee	Gamble	Myers	Stone
Briggs	Gardner	Nelson	Sutherland
Bristow	Gore	Newlands	Swanson
Brown	Gronna	O'Gorman	Thomas
Burnham	Guggenheim	Oliver	Thornton
Burton	Hitchcock	Owen	Townsend
Chamberlain	Johnson, Me.	Page	Watson
Clapp	Johnston, Ala.	Paynter	Webb
Clark, Wyo.	Jones	Percy	Wetmore
Clarke, Ark.	Kavanaugh	Perkins	Williams
Crawford	Kenyon	Poindexter	Works
Culberson	La Follette	Pomerene	
Cullom	Lea	Richardson	

The PRESIDENT pro tempore. On the roll call 74 Senators have answered to their names. A quorum of the Senate is present. The question is on the amendment submitted by the Senator from Ohio [Mr. BURTON]. [Putting the question.] By the sound the "noes" appear to have it.

Mr. McLEAN. I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CULLOM (when his name was called). I have a general pair with the junior Senator from West Virginia [Mr. CHILTON]. I transfer that pair to the junior Senator from Massachusetts [Mr. CRANE] and will vote. I vote "nay."

Mr. NELSON (when his name was called). I have a pair with the senior Senator from Georgia [Mr. BACON] and therefore withhold my vote.

Mr. CURTIS (when the name of Mr. SMITH of Michigan was called). I am requested to announce that the senior Senator from Michigan [Mr. SMITH] is paired with the junior Senator from Missouri [Mr. REED]. I will let this announcement stand for the day.

Mr. WILLIAMS (when his name was called). I wish to transfer my pair with the Senator from Pennsylvania [Mr. PENROSE] to the Senator from Indiana [Mr. SHIVELY] and will record my vote. I vote "nay."

The roll call was concluded.

Mr. STONE. I inquire if the Senator from Wyoming [Mr. CLARK] has voted?

The PRESIDENT pro tempore. The Chair is informed that that Senator has not voted.

Mr. STONE. I have a general pair with that Senator and therefore will not vote. If at liberty to vote, I should vote "nay."

Mr. BRADLEY (after having voted in the negative). I understand the Senator from Indiana [Mr. KERN], with whom I am paired, has not voted, and I therefore withdraw my vote.

Mr. SIMMONS (after having voted in the negative). I should like to inquire if the Senator from Minnesota [Mr. CLAPP] has voted?

The PRESIDENT pro tempore. The Chair is informed that that Senator has not voted.

Mr. SIMMONS. I withdraw my vote, as I have a general pair with that Senator.

The result was announced—yeas 27, nays, 49, as follows:

YEAS—27.

Brandegee	Dillingham	Lippitt	Page
Briggs	du Pont	Lodge	Perkins
Bristow	Gallinger	McCumber	Poindexter
Brown	Gore	McLean	Richardson
Burnham	Hitchcock	Newlands	Root
Burton	La Follette	Oliver	Townsend
Crawford	Lea	Owen	

NAYS—49.

Bankhead	Foster	O'Gorman	Swanson
Borah	Gamble	Overman	Thomas
Bourne	Gardner	Paynter	Thornton
Brady	Gronna	Percy	Tillman
Bryan	Guggenheim	Pittman	Warren
Catron	Johnson, Me.	Pomerene	Watson
Chamberlain	Johnston, Ala.	Sheppard	Webb
Clarke, Ark.	Jones	Smith, Ariz.	Wetmore
Culberson	Kavanaugh	Smith, Ga.	Williams
Cullom	Kenyon	Smith, Md.	Works
Cummins	Martin, Va.	Smith, S. C.	
Fall	Martine, N. J.	Smoot	
Fletcher	Myers	Sutherland	

NOT VOTING—19.

Ashurst	Clark, Wyo.	Kern	Simmons
Bacon	Crane	Nelson	Smith, Mich.
Bradley	Curtis	Penrose	Stephenson
Chilton	Dixon	Reed	Stone
Clapp	Jackson	Shively	

So Mr. BURTON's amendment was rejected.

Mr. McLEAN. Mr. President, I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The Senator from Connecticut offers an amendment, which will be stated.

Mr. McLEAN. I will say that the amendment is the same as the amendment offered by the Senator from Alabama [Mr. BANKHEAD] and the Senator from Washington [Mr. JONES].

Mr. BANKHEAD. I did not offer the amendment. I suggested that I would do so, but I withdrew it.

Mr. McLEAN. Well, the amendment is the same as the amendment suggested by the Senator from Alabama. All I care to say with regard to this amendment is that it seems to me this measure, having been relieved of all its objectionable features, certainly ought to receive at the hands of the Senate a support equal to that given to the Minnesota proposition, which contains all of the objectionable features.

Mr. BORAH. May I ask if this amendment is the same as the bill which has passed the Senate?

Mr. McLEAN. It is the same as the bill which has passed the Senate.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 5, after line 18, it is proposed to insert——

Mr. McLEAN. I think, Mr. President, we might avoid the reading of the amendment. It is in precisely the same language as the bill which passed the Senate, and I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDENT pro tempore. Is there objection to dispensing with the reading of the amendment?

Mr. BANKHEAD. Mr. President, I think the amendment had better be read.

The PRESIDENT pro tempore. The amendment will be read.

The Secretary proceeded to read the amendment, which is as follows:

That the assent of Congress is hereby given to the Connecticut River Co., a corporation organized and doing business under the laws of the State of Connecticut, to relocate its "Enfield Dam," so called, and to construct, maintain, and operate such relocated dam (which if located opposite Kings Island, in said river, shall extend across both branches of the river), together with works appurtenant and necessary thereto, across the Connecticut River at any point below a line crossing both branches of the river and Kings Island midway between the northerly and southerly ends of said island: *Provided*, That, except as may be otherwise specified in this act, the location, construction, maintenance, and operation of the structures herein authorized, and the exercise of the privileges hereby granted, shall be in accordance with the provisions of the act approved June 23, 1910, entitled "An act to amend an act entitled 'An act to regulate the construction of dams across navigable waters,' approved June 23, 1906": *And provided further*, That the time for completing said dam and appurtenances may be extended by the Secretary of War, in his discretion, two years beyond the time prescribed in the aforesaid act: *And provided further*, That the rights and privileges hereby granted may be assigned with the written authorization of the Secretary of War, or in pursuance of the decree of a court of competent jurisdiction, but not otherwise: *Provided further*, That if at any time said Connecticut River Co., or its assigns, or its property, shall be owned or controlled by any device, permanently, temporarily, directly, indirectly, tacitly, or in any manner whatsoever, so that it shall form a part of, or in any way effect any combination, or be in anywise controlled by any combination in the form of an unlawful trust, or enter into any contract or conspiracy in restraint of trade in the production, development, generation, transmission, or sale of any power or electrical energy, then the permit herein granted shall be forfeited and canceled by the Secretary of War through appropriate proceedings instituted for that purpose in the courts of the United States.

SEC. 2. That the height to which said dam may be raised and maintained shall not be less than 39 feet above zero on the Hartford gauge: *Provided*, That said corporation shall permit the continuous discharge past said dam of all water flowing in the Connecticut River whenever the discharge into the pool created by the dam hereby authorized is 1,000 cubic feet per second or less, and at all greater discharges into said pool shall provide a minimum discharge past said dam of not less than 1,000 cubic feet per second: *And provided further*, That said corporation may, for not to exceed five hours between sunset and sunrise, limit the discharge past said dam to 500 cubic feet per second whenever such limitation will not, in the opinion of the Secretary of War, interfere with navigation. The measure of water thus to be discharged shall include all the water discharged through the lock herein provided for and the present locks and canal of said corporation: *And provided further*, That nothing in this act shall in any way authorize said corporation at any time or by any means to raise the surface of the river at the location just above the present Enfield Dam to any height which shall raise the surface of the river at the lower tailrace of the Chemical Paper Co. in Holyoke, Mass., higher than can result from the erection or maintenance of any dam or dams which said corporation is authorized to erect or maintain in accordance with the order and decree of the Circuit Court of the United States for the District of Connecticut, passed June 10, 1884, in the case of the Holyoke Water Co. *v.* the Connecticut River Co.

SEC. 3. That the said Connecticut River Co. shall build coincidently with the construction of the said dam and appurtenances, at a location to be provided by said corporation and approved by the Secretary of War, and in accordance with plans approved by the Secretary of War and the Chief of Engineers, a lock of such kind and size, and with such equipment and appurtenances as shall conveniently and safely accommodate the present and prospective commerce of the river, and when the said lock and appurtenances shall have been completed the said corporation shall convey the same to the United States, free of cost, together with title to such lands as may be required for approaches to said lock and such land as may be necessary to the United States for the maintenance and operation thereof, and the United States shall maintain and operate the said lock and appurtenances for the benefit of navigation, and the said corporation shall furnish to the United States, free of charge, water power, or power generated from water power, for operating and lighting the said constructions; and no tolls or charges of any kind shall be imposed or collected for the passage of any boat through the said lock or through any of the locks or canal of said corporation.

SEC. 4. That compensation shall be made by the said Connecticut River Co. to all persons or corporations whose lands or other property may be taken, overflowed, or otherwise damaged by the construction, maintenance, and operation of the said dam, lock, and appurtenant and accessory works, in accordance with the laws of the State where such lands or other property may be situated; but the United States shall not be held to have incurred any liability for such damages by the passage of this act.

SEC. 5. That the provisions of the act entitled "An act to regulate commerce," passed and approved on the 4th day of February, 1887, together with the amendments thereto, shall apply to any corporation or any person or persons engaged in transmitting hydroelectric power or electricity from one State, Territory, or District of the United States to any State, Territory, or District of the United States, or from one place in a Territory to another place in the same Territory or to any foreign country, and that the term "common carrier" as used in said act and the amendments thereto shall include companies engaged in transmitting hydroelectric power or electricity as aforesaid: *Provided*, That said act shall not apply to the transmission of hydroelectric power or electricity wholly within one State and not transmitted to or from a foreign country, from or to any State or Territory as aforesaid; that the rules prescribed in said act as to just and reasonable charges or rates and the procedure relative to other common carriers, in so far as applicable, shall apply to such company, person, or persons transmitting hydroelectric power or electricity as aforesaid, and to the fixing and establishing of just and reasonable charges or rates fully and completely.

Mr. BANKHEAD. Mr. President, as I understand the amendment is in the exact form of the bill which has passed the Senate, I will withdraw my demand for the reading of the amendment.

The PRESIDENT pro tempore. Without objection, the reading of the amendment will be dispensed with.

The question is on agreeing to the amendment submitted by the Senator from Connecticut [Mr. McLEAN].

Mr. POINDEXTER. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CULLOM (when his name was called). I again announce my general pair with the junior Senator from West Virginia [Mr. CHILTON]. I transfer that pair to the junior Senator from Massachusetts [Mr. CRANE] and vote. I vote "yea."

Mr. PAYNTER (when his name was called). I observe that the senior Senator from Colorado [Mr. GUGGENHEIM] is absent. As I have a general pair with him, I will withhold my vote.

Mr. STONE (when his name was called). I have a pair with the senior Senator from Wyoming [Mr. CLARK]. As he does not seem to be present, I withhold my vote.

Mr. WILLIAMS (when his name was called). I desire to transfer my general pair with the senior Senator from Pennsylvania [Mr. PENROSE] to the Senator from Indiana [Mr. SHIVELY] and will vote. I vote "nay."

The roll call was concluded.

Mr. NELSON. I desire to state that I have a general pair with the senior Senator from Georgia [Mr. BACON], and I therefore withhold my vote.

Mr. BRADLEY (after having voted in the affirmative). I desire to announce that I have transferred my pair with the Senator from Indiana [Mr. KERN] to the Senator from Maryland [Mr. JACKSON].

The result was announced—yeas 37, nays 35, as follows:

YEAS—37.

Borah	Cullom	Kenyon	Page
Bourne	Cummins	La Follette	Perkins
Bradley	Curtis	Lippitt	Richardson
Brady	Dillingham	Lodge	Root
Brandegee	du Pont	McCumber	Sutherland
Briggs	Gallinger	McLean	Townsend
Brown	Gamble	Myers	Wetmore
Burnham	Gore	Newlands	
Burton	Hitchcock	Oliver	
Catron	Jones	Owen	

NAYS—35.

Bankhead	Foster	Overman	Smith, Md.
Bristow	Gronna	Percy	Smith, S. C.
Bryan	Johnson, Me.	Pittman	Swanson
Chamberlain	Johnston, Ala.	Poindexter	Thomas
Clarke, Ark.	Kavanaugh	Pomerene	Thornton
Crawford	Lea	Sheppard	Tillman
Culberson	Martin, Va.	Simmons	Webb

Chilton	Guggenheim	Reed	Warren
Clapp	Jackson	Shively	Watson
Clark, Wyo.	Kern	Smith, Mich.	Works
Crane	Nelson	Smoot	

So Mr. McLEAN's amendment was agreed to.

Mr. NELSON. I offer the amendment which I send to the desk. It provides for a survey, and should be inserted on page 68, after line 4.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 68, after line 4, it is proposed to insert:

Westchester Creek, N. Y., with a view to providing a channel width of 150 feet up to the point where it is crossed by the Fort Schuyler road.

The amendment was agreed to.

Mr. LEA. Mr. President, I rise to a question of privilege. On the previous roll call, on the amendment offered by the Senator from Ohio [Mr. BURTON], I voted "yea." If I had understood the question, I should have voted "nay." I ask unanimous consent that that change may be made.

The PRESIDENT pro tempore. The vote can not be changed. The Senator's statement will appear in the RECORD.

The PRESIDENT pro tempore subsequently said: A moment ago the Senator from Tennessee stated that he had voted under a misapprehension on a certain roll call, and desired to change his vote. The Chair suggested that that could not be done, but that the Senator's statement would appear in the RECORD. An examination of the rules reveals the fact that by unanimous consent the Senator can change his vote. Is there objection?

Mr. ROOT. I object.

The PRESIDENT pro tempore. The Senator from New York objects.

Mr. SMITH of Arizona. I offer the amendment which I send to the desk.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. On page 83, after line 7, it is proposed to insert:

That all sums of money heretofore expended on the east side of the Colorado River in revetment and levee-construction work under the Yuma irrigation project in Arizona, and now carried as a charge against and a lien on the farms of the settlers under said project, be, and the same is hereby, declared a charge against the Treasury of the United States, and that the said charge shall not diminish the irrigation fund in the Treasury.

Mr. SMITH of Arizona. Mr. President, when the Colorado River, just south of Yuma, broke into the desert of California and created the Salton Sea and threatened the destruction of the Imperal Valley, a great amount of money was expended by the Government and by the Southern Pacific Railroad Co. in filling that break in the river. I understand that through the work necessary to accomplish this the waters were deflected from that bank over onto the lands on the Arizona side, covering a large body of the farming lands there held by settlers under the irrigation project. They immediately demanded protection, and it was furnished from the irrigation fund, and a large amount was spent and charged as a lien on the lands of these farmers under the project. The farmers were thus made to pay for keeping the Colorado within its channel.

I do not wish to detain the Senate at this late and important hour; but it is obviously just that these men's farms should not be covered with a lien for money expended by the Government in keeping that unruly river within its banks. It was not done on the California side, and it ought not to be done on the Arizona side.

Mr. BURTON. Mr. President, may I ask the Senator from Arizona a question?

The PRESIDENT pro tempore. Does the Senator from Arizona yield to the Senator from Ohio?

Mr. SMITH of Arizona. Certainly.

Mr. BURTON. Has any estimate been made of these amounts?

Mr. SMITH of Arizona. Yes; I had an estimate made. It has run up now to six hundred and some odd-thousand dollars, as claimed by the Reclamation Service, and over a million as claimed by the water users.

Mr. BURTON. Was that estimate made in a river and harbor bill, or by the War Department, with a view to navigation, or in any connection with navigation?

Mr. SMITH of Arizona. No. I would not say that it is a question of navigation for which an estimate has been made, but that river is navigable, and known as a navigable river, and for many years has been navigated from the Gulf of California far north of Yuma, and in fact to where the Grand Canyon of the Colorado disembogues.

Mr. BURTON. Then there is no question of any expenditure or work for the promotion of navigation involved here, is there?

Mr. SMITH of Arizona. The navigation of the river is utterly lost forever without this. The river, in my judgment, will ultimately become navigable as soon as the Panama Canal is finished.

Mr. BURTON. Is the Government now engaged in any work to secure the navigability of that river?

Mr. SMITH of Arizona. It is engaged in the work of keeping up the banks on the California side.

Mr. BURTON. That, however, has nothing to do with any project of navigation, has it?

Mr. SMITH of Arizona. It is engaged in keeping those banks up for navigation, or whatever purpose it may have. I do not know what its purpose is. I am not here to commit myself to the statement that this is for the navigation of the Colorado River. I am here, though, to show that it is a navigable stream; we can not control it; we have no power over it, and in the organic act under which our State was admitted, the Government took possession not only of the Colorado River but of every other river in the States of both New Mexico and Arizona, and claimed jurisdiction to control and own them. It would be obviously unjust that the farmers to whom I have referred should have a lien placed on their lands for necessary improvements of the Colorado, a navigable river. Yet that is what has been done; and I am simply asking that they may be relieved from this awful burden.

I ask for a vote on my amendment, Mr. President.

Mr. ROOT. Mr. President, may the amendment be again stated?

The PRESIDENT pro tempore. The Secretary will again state the amendment.

The SECRETARY. On page 83, after line 7, it is proposed to insert:

That all sums of money heretofore expended on the east side of the Colorado River in revetment and levee-construction work under the Yuma irrigation project in Arizona, and now carried as a charge against and a lien on the farms of the settlers under said project, be, and the same are hereby, declared a charge against the Treasury of the United States, and that the said charge shall not diminish the irrigation fund in the Treasury.

The PRESIDENT pro tempore. The question is upon the amendment offered by the Senator from Arizona. [Putting the question.] The noes appear to have it. The noes have it, and the amendment is not agreed to.

Mr. SMITH of Arizona. Mr. President, I should like to have a vote on that with a show of hands. Before the matter goes further, if I am in order——

The PRESIDENT pro tempore. The Senator is in order.

Mr. SMITH of Arizona. It has been suggested to me by a Senator apparently in sympathy with the amendment that it in no way differs from the appropriations made in this bill for leveeing the Mississippi River to prevent overflow on adjacent lands. You pay to keep that river in its banks and make overburdened farmers in Arizona pay to keep the Colorado within its proper limits. Of course, you pretend to levee the Mississippi to protect navigation, and it does protect it. Levee the Colorado and you can make it navigable and save the lands from overflow. The difference is too thin to fool anybody.

Mr. BURTON. Mr. President, I do not seek at all to contradict what the Senator from Arizona says, but no such item has ever been allowed in a river and harbor bill as that which he is trying to pass for a specific purpose.

Mr. SMITH of Arizona. Where did they get the money and how did they get it to levee other rivers?

Mr. BURTON. Under such a plan as this, wherever there is damage to adjacent lands by flood, an amendment might be introduced to make the cost of reparation or improvement a charge upon the Treasury.

Mr. SMITH of Arizona. How is it in the Mississippi River, as was suggested to me?

Mr. BURTON. That is in pursuance of specific reports. The policy of the Government for many years was based upon the idea that it aided navigation, and for years a clause was carried in the bill that it should not be expended, that no levees should be built, except in aid of navigation.

Mr. SMITH of Arizona. Then the Senator confesses that that is only a theory?

Mr. BURTON. Oh, no; I do not, Mr. President; but it is not worth while to go into that now.

Mr. SMITH of Arizona. I do not want to go into it.

Mr. BURTON. I do not care to go into the effect of levees upon navigation. They do have a certain effect upon navigation, however.

Mr. SMITH of Arizona. Yes; and they would have in this particular instance; and the Government some day must necessarily levee this river. The Government will do it for navigation purposes, and do it shortly, in my judgment, within the next four or five years. It will have to do it. It is a navigable river now. The Irrigation Service has simply taken from the irrigation fund this amount of money, and has done the work mentioned in this amendment. We say that they have no au-

thority to make that expenditure a lien on the lands of the poor farmers on the Arizona side of the river.

In other words, as matters stand, you have a lien on the lands of the farmers of this Yuma project who are struggling against awful conditions for a living; and yet you put this sum of six hundred and some odd thousand dollars as an actual lien on their farms in addition to the overlarge expenditure contemplated in the scheme.

Mr. ROOT. Are their farms irrigated?

Mr. SMITH or Arizona. They can not irrigate them with the river all over them. They are overirrigated. The river was drowning them out, but by no fault of theirs, but according to my information the damage or overflow was largely caused by impediments placed in the river by the Government or by others acting under its direct consent, but be that as it may, no duty devolved on the farmers of Yuma County to keep the Government's river within its banks.

Mr. SMOOT. I should like to ask the Senator if the revetment was made for the purpose of protecting any reclamation project?

Mr. SMITH of Arizona. I imagine the irrigation authorities would not have taken the irrigation money out of their own treasury and put it into this work unless their purpose in doing it was to protect those lands from absolute destruction. But inasmuch as the Government caused the destruction, it is certainly not right to make this a charge against the farmers, and it seems almost brutal to raise the technical question as to whether or not their relief is put on an appropriation bill or on a river and harbor bill when we have seen a dozen items in this very bill just as obnoxious, under the rules, as my amendment can possibly be.

Mr. SMOOT. Does the Senator contend that the improvements upon the Colorado River made to prevent the waters from overflowing the Imperial Valley in California were the cause of the water overflowing on the opposite side of the river?

Mr. SMITH of Arizona. I have had, and I wish I had before me now, statements by the dozen that in that effort they have thrown this water over on the Arizona side. That applies to the work of the Government, at least—whether at this particular time I will not say.

Mr. SMOOT. It is just opposite the works of the Government on the California side, is it?

Mr. SMITH of Arizona. That river drains a watershed almost as large or larger than that drained by the Ohio, and it comes down there in enormous torrents, fretting against the least restraint on it anywhere. There is no telling where it will burst through these alluvial banks, which are composed, as you know, of sand, which gives way instantly as soon as you put a hundred pounds of extra weight of running water against them.

Mr. SMOOT. How close is the overflow on the Arizona side to the works that were put in by the railroad company to protect the Imperial Valley? Is it one mile, or more?

Mr. SMITH of Arizona. As to the particular obstruction that I have heard was placed in the river, it is almost opposite, in my understanding of it; but of this I am not sure, nor does it matter where the obstruction was if it caused the damage.

Mr. SMOOT. It must be very near the Mexico line, then, because the point where the work was done by the railroad company was just before the Colorado River turns into Mexico.

Mr. SMITH of Arizona. Oh, I know where that is. I am as familiar with that as I am with the interior of this Chamber.

Mr. SMOOT. I thought I would ask the question for the information of the Senate.

Mr. ROOT. Has there been any report of a committee on this matter, or any report of engineers?

Mr. SMITH of Arizona. There has been no report on it, except a report of this expenditure by the department. Ever since I have been in the Senate I have been trying to get something done with it. As long as I stay here, I will still be trying to have justice done these farmers. How can they afford to clear more lands, when any flood might add another million to the lien on their farms? If Senators only knew the burdens the home makers of our country bear, they would not seek means to avoid just demands on the National Treasury, but rather would they hunt means to help them in the struggle.

Mr. BRANDEGEE obtained the floor.

Mr. POINDEXTER. I will ask unanimous consent to have the amendment reported.

Mr. BRANDEGEE. I have the floor, Mr. President.

The PRESIDENT pro tempore. The Senator from Connecticut is entitled to the floor.

Mr. BRANDEGEE. I simply wanted to express my surprise that Senators upon the other side of the center aisle, who have been beseeching the Senate for an hour or so not to load this bill down with extraneous amendments which would be apt to impede its progress through various places where is must go before it becomes a law, should offer an amendment which is clearly out of order, but against which I will refrain from making the point of order. I simply make this remark to show the consistency that pervades the Chamber on all these matters.

Mr. SMITH of Arizona. If the Senator himself had been as consistent when he offered the Connecticut-dam bill as an amendment, we would have saved a couple of hours of debate.

Mr. BRANDEGEE. I notice, however, that the Senate voted that my amendment was germane.

Mr. SMITH of Arizona. It might do likewise in the case of my amendment, but I thank the Senator for not raising the point of order.

Mr. NEWLANDS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Arizona yield to the Senator from Nevada?

Mr. SMITH of Arizona. Certainly.

Mr. NEWLANDS. I wish to ask the Senator from Arizona whether the Colorado River is not capable of being made a navigable river by resorting to the same means that have prevailed upon other rivers, such as the Mississippi, with reference to bank protection and levee building and storage of flood waters?

Mr. SMITH of Arizona. There is no doubt in the world about it. It can be made a navigable river up nearly to the mouth of the Grand Canyon—will some day.

Mr. NEWLANDS. And it can also be made exceedingly useful in the development of water power and the reclamation of arid lands.

Mr. SMITH of Arizona. Yes; and that is what the great Imperial Valley and the Yuma project both rely on to-day. I mean the dam for irrigation. It is not high enough, however, to develop there much power for electrical purposes.

Mr. NEWLANDS. I understand the Senator's complaint to be that a very large sum of money, spent really in the line of making this a navigable river, has been fastened upon the irrigation fund and then fastened by that fund as a lien upon the farms of settlers under the Yuma project.

Mr. SMITH of Arizona. I am thankful to the Senator for making perfectly clear what I have so imperfectly said myself.

Mr. SMOOT. Mr. President, the reason I called the Senator's attention to the conditions, or asked him to explain the conditions, was this: I know that where the course of the waters of the Mississippi River has been changed from one side to the other, and caused overflows, there have been millions and millions of dollars of claims filed against the Government for those overflows; and I wanted the Senator, and also the Senate, to know whether or not this was in the same class as those claims on the Mississippi. I understood the Senator knows that those claims on both sides of the Mississippi have been made by the millions of dollars against the Government.

Mr. SMITH of Arizona. I know they have; but I wanted to avert any question of any such claims, believing as I do that this is a part of an ultimate scheme of making that river navigable so that vessels coming up from the South American countries through the Panama Canal can go by smaller craft directly up the Colorado River to the town of Yuma. It has been a navigable stream for 40 or 50 years; boats ran on it regularly; so it can be made a navigable river again, and this is an essential part of the work.

The real purpose of building these works was to keep the water out of those lands—that is the truth of it—just as they have erected levees on the Mississippi River to keep it off of the lands there. Now, these poor farmers in the State of Arizona have been burdened with that debt. They have to give up their lands if you put this burden on them, and it is just a question of whether the Government will assume it or make these men try to pay it. They can not possibly pay it, as a matter of fact.

Mr. SMOOT. The revetment, then, was not done for the purpose of navigation? It was done for the purpose of protecting the land?

Mr. SMITH of Arizona. I have stated as plainly as I could the immediate purpose, as I said to the Senator before. The reason they appealed to the irrigation fund, if they did so appeal, must have been because they were trying to save the land—their homes—all they had on earth.

Mr. BORAH. As I understand, this expenditure, whatever it is, is being charged up to the land of the settlers in that immediate vicinity?

Mr. SMITH of Arizona. Just to the few settlers there. They are charging it up to their land and making it a lien on their land.

Mr. BORAH. It is simply a question of whether the Government shall pay this sum or whether it will drive those settlers away, is it not?

Mr. SMITH of Arizona. That is the only question in the case.

Mr. BORAH. And the reclamation fund has been impaired to such an extent through these expenditures that a crisis has been reached in the reclamation proposition, and that is whether the Government will take care of that portion of the expense which it ought to take care of or whether it will drive these settlers from the land, because the settlers can not pay this expense.

Mr. SMITH of Arizona. In line with what the Senator has said, I know the condition of the farms there at Yuma very well. I was in consultation with the board of directors and the water users last summer. They claim, and I believe it to be true, that it is impossible for them to bear this burden. This tax is the straw that absolutely breaks the patient camel's back. Those men can not stand this tax and make their homes and live there.

Mr. ROOT. Mr. President, I do not understand on what authority under the law any tax was imposed on this land.

Mr. SMITH of Arizona. Does the Senator understand the reclamation act?

Mr. ROOT. I do understand the reclamation act.

Mr. SMITH of Arizona. Did that make any imposition of a tax on the land?

Mr. ROOT. This does not seem to have been a reclamation work.

Mr. SMITH of Arizona. Then the farmers should not pay it. The reclamation act makes the expense of any of its enterprises a claim on the water users under the project. The users thus finally have to pay the costs, no matter how expensive the engineers may make it. In this, as in most cases, the Government made a contract with these farmers known as the water-users' association——

Mr. ROOT. Yes.

Mr. SMITH of Arizona. In which the Government agreed to perfect this system or this project at a charge of so much an acre on each farm; but, as usual, the expense has run far above the estimate and put an overload on their patient shoulders.

Mr. ROOT. For irrigation.

Mr. SMITH of Arizona. For irrigation; yes, sir; that was the purpose of the contract. They did enter into that contract, and yet it is far above the contract they entered into in actual cost. It has quadrupled, I think, or, certainly, is twice or more times as great as the original contract. That lien rests on the farms; and, in addition to that, you are making this revetment work and levee building to keep the Colorado River from washing away everything left—the Government irrigation works and all—an additional charge on the water user.

Mr. ROOT. I understand that, undoubtedly, abuses have been committed in that way in getting settlers on lands upon the representation that there would be a small charge for irrigation, and then carrying on the work in such a way that there is a very heavy charge for irrigation.

I wish this matter could have been before the committee and we could have had the facts ascertained and heard what the Reclamation Service people had to say about it before the Senate acts upon it. I dislike very much to act upon a matter of so great an amount without more complete information and without hearing both sides of the question.

Mr. SMITH of Arizona. If there was not a house there, if there was not a farm there, it would be an absolute necessity to the Government that it should hold that river where it is. It is not only a navigable river, but it is an interstate and international stream. It goes into Mexico. It leaves the United States and international questions arise. That river will have to go across there, and there is no telling where ultimately it will make a channel or what vast expenditure would be incurred. It would be like the Rio Grande, which has spread out for miles and miles, and it absolutely loses itself in the waste of surrounding sands until not a drop of water is to be found in its proper bed. So this would happen here unless the levees are repaired and the river confined within some reasonable limits.

Mr. McCUMBER. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Arizona yield to the Senator from North Dakota?

Mr. SMITH of Arizona. I am very glad to yield.

Mr. McCUMBER. If I understand the Senator correctly, this is purely a reclamation project. The lien which is laid upon the land is a lien the consideration of which is to give the holders of the land the use of the water. It so happens that the charges have been three or four times as great as they expected they would be. If I now understand the Senator's position, he desires to relieve the lands entirely from the liens even though they may receive some benefits. Should we relieve them from all of them, or should they be relieved from a portion, or what proportion?

Mr. SMITH of Arizona. As I understand the Senator, he is mistaken if he thinks I am attempting to relieve them from any of the reclamation work. They expect to bear that burden, great as it is, but it must be confined to a reasonable necessary cost. I am trying to keep this money that the Reclamation Service has spent for the Government in building levees on the banks of the Colorado River and aiding ultimately in making it a navigable stream, so that that charge shall not rest on the farmers. I am not complaining of the increased cost of the project at this time, but I am claiming that this charge fall upon the lands. Some of these farms are away from the river and its overflow would never touch them. Yet this charge rests on all of them. It was the duty of the Government primarily to keep the river within bounds anyhow, and the Government has to do it under every rule of economy and good sense.

Mr. McCUMBER. If I understand the Senator correctly, there is another cost in addition to the cost of the Reclamation Service of over $000,000 that would in addition be made a lien upon their land. Under what law would that be made a lien upon their land?

Mr. SMITH of Arizona. Because under the irrigation law the contract with these water users is that the cost of the enterprise becomes a lien on the land. They have taken this money from the irrigation fund and have applied it to the Government needs, as well as the farmers' needs, and it is proposed to place this burden on these farmers instead of on the United States Treasury.

Mr. McCUMBER. Then it really comes, as I stated, under the Reclamation Service, and there is supposed to be a corresponding benefit, but the cost is so heavy that it would be impossible for the farmers benefited to bear it. That is true of quite a number of our Reclamation Service projects, but I do not know how we can rectify that mistake upon the floor of the Senate without some general law that will relieve them according to the necessities of the conditions.

Mr. SMITH of Arizona. I do not know of any such conditions anywhere else in the United States. All of us know that it has cost more than we expected. Certainly it is not from an act of God that the farmer expected to insure the United States. You will never develop the West by such action as this.

Mr. SMOOT. I wish to ask the Senator if, before this money was spent by the Reclamation Service, the water-users' association gave its consent for the spending of the money for the revetment of the banks of the river?

Mr. SMITH of Arizona. I do not know. I would say, that to my mind it would make no earthly difference; they would consent to anything when they had gotten into a place where they were about to be drowned. Duress is a defense against any contract.

Mr. SMOOT. To me it would make a great difference, of course, because if the water-users' association had requested the Reclamation Service to do that work and saw it was absolutely necessary, that at least would relieve the Reclamation Service, as it undertook the work to protect the water-users' land, because of the fact that they were requested by them and had agreed with them to give a lien upon the land for the repayment of the money.

Mr. SMITH of Arizona. If I knew the facts I would answer the Senator with perfect frankness. I imagine, and it is merely imagination, that the irrigation managers on the part of the Government saw this condition, and I have no doubt immediately themselves, without asking anybody, attempted to correct it. But whether they first exacted consent of the water users before acting makes, to my mind, very little difference. It had to be done, and done quickly, and the cost in justice is properly chargeable to the United States Treasury, or, if you prefer, to the reclamation fund as a loss, rather than that the farmers should bear the damage.

Mr. ROOT. Mr. President, is not this the real difficulty, that the managers of this reclamation project have undertaken to charge up against the users of water expenditures which ought not to be charged to that irrigation project?

Mr. SMITH of Arizona. That is what I think in this case. I do not know but that the emergency might have justified the service in doing it, but I do know that these struggling men ought not to be forced to bankruptcy in saving the Treasury of the United States from an obligation resting of right and under every sense of justice on it. The Colorado is a navigable river. It belongs to the United States. The people of Arizona have no right to control it. It is the duty of the Government to keep it within its banks.

Mr. ROOT. The emergency might have justified the service without making it the part of an irrigation project. I should feel disposed to go with the Senator from Arizona upon such a proposition, but I do not think that we are in possession of the data upon which to act here in this way. With the knowledge of the facts that I have, while feeling disposed to go with the Senator on his proposition, I do not think that the charge for controlling the great stream of the Colorado River ought to be treated as a part of an irrigation project. Just how much or how little ought to be taken out of that lien, whether it all ought to be taken out or a part taken out, it seems to me we can not determine here.

I hope the Senator will not press it.

Mr. WORKS. Mr. President, unfortunately I was out for a few minutes and I did not hear this proposed amendment. I should be glad to have it read.

The PRESIDENT pro tempore. The amendment will be again read.

The SECRETARY. On page 83, after line 7, insert:

That all sums of money heretofore expended on the east side of the Colorado River in revetment and levee construction work under the Yuma irrigation project in Arizona and now carried as a charge against and a lien on the farms of the settlers under said project be, and the same is hereby, declared a charge against the Treasury of the United States, and that the said charge shall not diminish the irrigation fund in the Treasury.

Mr. WORKS. Mr. President, the matter of improvement of the Colorado River is one in which I have a great deal of interest. The Imperial Valley, one of the richest valleys in the State of California, borders on this stream just below this reclamation project.

During the last session of Congress the President sent in a special message calling attention to the condition of the river and recommending that an appropriation be made for its improvement. The Secretary of the Interior took the same position with respect to it.

It was late in the session I appeared before the Appropriations Committee and attempted to secure an appropriation by that means. I was told at that time that it was a matter that should be presented to the Commerce Committee in connection with the river and harbor bill.

During this session I presented the matter to the Commerce Committee, and I was told there that it would have to be taken up in some other way; I do not know just why. Then I was advised that the only proper way to reach it would probably be by a special bill for that purpose.

I am exceedingly anxious to take such steps as will bring about the permanent improvement of this stream, so that navigation may be improved and at the same time the property of people owning land bordering upon the stream protected. It is a positive duty that rests upon the Government to see that this river is improved. The President recognized that fact. The Secretary of the Interior recognized the fact that it was necessary. The Government has proceeded in part to improve the condition of the river and has spent considerable money there, but has left it in an imperfect condition that needs attention.

With respect to this particular amendment, I am not advised as to whether it is one that the Senate ought to entertain or not; but I do want to call the attention of the Senate to the fact that this river does need improvement and that some appropriation ought to be made for that purpose, so that it may be improved in a permanent way that will put the river in proper condition.

It is a very treacherous stream. It changes its course from time to time whenever storms occur. Senators know that at one time it submerged practically the whole of the Imperial Valley, costing millions and millions of dollars. I do hope that when the proper time comes some appropriation may be made and this improvement entered upon in a practical way; but I have no disposition to bring the matter before the Senate by way of an amendment for the simple reason that it would involve discussion, and it is a matter that I think should be taken up separately and determined after proper discussion of the question.

Mr. BORAH. Mr. President, it seems to me it might be safe to let this amendment go on the bill, in view of the fact that everyone seems to concede that this is a river that ought to be cared for by the National Government, and that this work which has been done has been done for the purpose of keeping the river within its banks. Certainly we ought to agree upon the proposition that we ought not to impose this extraordinary burden upon the settlers on this reclamation project. While, technically speaking, it might not belong exactly to this bill, it is altogether certain that if it does not go on this bill it will never go in time to help the settlers, because they will be driven from their places.

It seems to me that we can very well afford to say that that portion of the money which has been expended for building embankments can be eliminated from the charge as against these settlers. Those settlers will not, as they are being driven to give up their homes, appreciate the beauties of parliamentary laws as they present themselves to us.

Mr. CRAWFORD. Mr. President, as is very often the case, a statement which naturally appeals and causes a responsive chord among Senators comes at a time when so far as necessary information is concerned the Senate is without it, and so far as that sort of preliminary investigation that should be made before legislative action is taken, we find there has been none.

I think this would be a very serious step to take. It is admitted that this was a part of a reclamation project. I understand it is admitted that this work was done as a part of a reclamation project, but that it is putting too great a burden on those within that project.

From statements which have been made it would seem that that is true, and that there are equities here; but they have not been considered by any committee; there have been no witnesses; there has been no investigation; there has been no committee report; there has been no governmental report; and in an appropriation bill to act without any information of that character, and upon simply a general impression that appeals to one, I think is hardly the way to proceed. I hope the Senator from Arizona will not press the amendment here.

Mr. SMITH of Arizona. Mr. President, after consultation with many Senators who seem to be in sympathy with my purpose, and to relieve the Senate of the pressure now on it, I will take the vote as already announced by the Chair and not proceed further with it.

But before I take my seat I want to say to the Senator from South Dakota that the amendment was drawn in the way it is for the reason that I intended to cover, as the record shows in the department, exactly the amount of money expended for this particular work. I have not named the specific sum because the records of the department would show the specific sum, and the estimate would be made upon the revetment and levee work alone.

So while the amount was not as certain, probably, as it ought to have been in the amendment, it was so easily capable of being made certain that the amendment would not have endangered the Treasury.

The PRESIDENT pro tempore. The amendment is not agreed to.

Mr. NELSON. In view of meeting the contingency developed by this objection I offer an amendment to be put in the column of surveys, so that no appropriation would be made for the Colorado River in the river and harbor bill until there has been an examination made by the engineers of the War Department. I offer an amendment to place this river on the list of surveys, and when we get the information from the War Department we will know what to do and what ought to be done. It is to come in at the end of line 8, page 76.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. After line 8, page 76, insert:

Colorado River, with a view of developing and improving navigation.

The amendment was agreed to.

Mr. NEWLANDS. Mr. President, I offer an amendment regarding the river regulation board. I ask that it be read and that the question of its order be submitted to the Senate.

I suggest the absence of a quorum.

The PRESIDENT pro tempore. The Senator suggests the absence of a quorum, and the roll will be called.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Dillingham	Martin, Va.	Smith, Md.
Borah	Dixon	Myers	Smith, Mich.
Bourne	Fall	Nelson	Smith, S. C.

The PRESIDENT pro tempore. On the call of the roll 69 Senators have answered to their names. A quorum is present. The Senator from Nevada [Mr. NEWLANDS] offers an amendment, which will be stated.

Mr. NEWLANDS. Mr. President, instead of offering the amendment which I before offered and requested that the question be submitted to the Senate as to its being in order, I offer a condensed statement, which at present proposes to make no appropriation beyond the expenses of investigation and plans, providing $500,000 for such investigation and plans, but providing that the plans shall be made in such a way as to involve an expenditure of $50,000,000 annually, commencing on the completion of the Panama Canal and extending over a period of 10 years.

I will ask the Secretary to read the amendment which I send to the desk. I will state that the amendment is on the desks of Senators, having recently been printed.

The PRESIDENT pro tempore. The amendment proposed by the Senator from Nevada will be stated.

The SECRETARY. It is proposed to insert the following:

A commission, to be known as the river regulation commission, consisting of the Secretary of War, the Secretary of the Interior, the Secretary of Agriculture, the Secretary of Commerce and Labor, two Members of the Senate, to be selected by the President of the Senate, and two Members of the House of Representatives, to be selected by the Speaker, is hereby created and authorized to bring into coordination and cooperation with the Corps of Engineers of the Army the other scientific or constructive services of the United States that relate to the study, development, and control of waterways and water resources and subjects related thereto, and to the development and regulation of interstate and foreign commerce, with a view to uniting such services through a board or boards in investigating questions relating to the development, improvement, regulation, and control of navigation as a part of interstate and foreign commerce, including therein the related questions of irrigation, forestry, swamp-land reclamation, clarification of streams, regulation of flow, control of floods, utilization of water power, prevention of soil waste, cooperation of railways and waterways, and promotion of transfer facilities and sites, and in forming comprehensive plans for the development of the waterways and water resources of the country for every useful purpose by cooperation between the United States and the several States, municipalities, communities, corporations, and individuals within the jurisdiction, powers, and rights of each, respectively, and with a view to assigning to the United States such portion of such development, promotion, regulation, and control as can be properly undertaken by the United States by virtue of its power to regulate interstate and foreign commerce and by reason of its proprietary interest in the public domain, and to the States, municipalities, communities, corporations, and individuals such portion as properly belongs to their jurisdiction, rights, and interests, and with a view to properly apportioning costs and benefits, and with a view to so uniting the plans and works of the United States within its jurisdiction, and of the States and municipalities, respectively, within their jurisdictions, and of corporations, communities, and individuals within their respective powers and rights, as to secure the highest development and utilization of the waterways and water resources of the United States; and such river regulation commission is authorized to appoint as members of such board or boards such engineers, transportation experts, experts in water development, and constructors of eminence as it may deem advisable to employ in connection with such plans. Such plans shall involve the expenditure by the United States of $50,000,000 annually, commencing on the completion of the Panama Canal and extending over a period of 10 years. And for the expenses of such organization, investigation, and plans the sum of $500,000 is hereby appropriated.

Mr. NEWLANDS. Mr. President, individually I believe that the work of construction should commence immediately.

Mr. LIPPITT. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Nevada yield to the Senator from Rhode Island?

Mr. LIPPITT. I raise the point of order——

Mr. NEWLANDS. Mr. President, I did not yield for the point of order, though I will yield for a question.

The PRESIDENT pro tempore. The Senator from Nevada is entitled to the floor.

Mr. NEWLANDS. Mr. President, I believe the time has come for work. I believe that it has been absolutely developed to the satisfaction of the entire American people that the methods that have been employed for a hundred years in the regulation and control of our rivers are absolutely deficient. I believe that the public mind is made up that this work should proceed immediately, involving cooperation between the scientific services, cooperation between the Nation and the States, and involving an ample fund, amounting to at least $50,000,000 annually for a period of 10 years, this work to follow and supplement the great work upon the Panama Canal; but I find such opposition—not on the outside, but on the inside, of Congress—to entering immediately upon such constructive work, that I yield to the demand for further information upon the subject. So I have condensed the legislation which I have sought upon this subject in a simple amendment, which provides for the organization of a river regulation commission, composed of four Secretaries in the President's Cabinet—the Secretary of War, the Secretary of the Interior, the Secretary of Agriculture, and the Secretary of Commerce and Labor—who have jurisdiction of the various services that relate in any way with water, and also two Members of the Senate and two Members of the other House, with a view to utilizing the services of distinguished engineers and constructors, and also with a view of coordinating these services in such a way as to secure comprehensive plans involving this large expenditure of money within 10 years after the completion of the Panama Canal.

This amendment merely provides for the expenditure of only the moderate sum of $500,000 in the making of the plans and investigations in order to convince Congress upon a subject concerning which the country is already convinced.

Now, Mr. President, I ask for a vote upon this amendment, which is simply a continuance of the present work of investigation going on under the river and harbor act, and it seems to me it is entirely germane.

Mr. TOWNSEND. Mr. President, may I ask the Senator why he terms it a "river regulation commission"? Is it not intended to cover the investigation of all waterways?

Mr. NEWLANDS. Of all waterways.

Mr. TOWNSEND. Then, why use that term?

Mr. NEWLANDS. Of all the rivers in the country. I want to distinguish it from harbor improvements.

Mr. LIPPITT. I make the point of order that the amendment is general legislation and not pertinent to the pending bill.

Mr. NEWLANDS. Well, Mr. President, if the Chair has any doubt upon that question, I should like to have it submitted to the Senate.

The PRESIDENT pro tempore. The Senator from Rhode Island makes the point of order on what ground?

Mr. LIPPITT. That the proposed amendment is general legislation and can not be attached to an appropriation bill.

The PRESIDENT pro tempore. The Chair is constrained to sustain the point of order.

Mr. NEWLANDS. I ask that the question be submitted to the Senate, Mr. President, and I do so at the request of numerous Senators.

The PRESIDENT pro tempore. The Chair is in no doubt on the point at all, and hence feels constrained to decide it.

Mr. NEWLANDS. Then, I appeal from that decision, Mr. President.

The PRESIDENT pro tempore. The Senator from Nevada appeals from the decision of the Chair. The question is, Shall the decision of the Chair stand as the judgment of the Senate? [Putting the question.] By the sound the "ayes" appear to have it.

Mr. NEWLANDS. I ask for the yeas and nays.

Mr. MYERS. I suggest the absence of a quorum, Mr. President.

The PRESIDENT pro tempore. The Senator from Montana suggests the absence of a quorum. The roll will be called.

Mr. OLIVER. Mr. President, I inquire if business has intervened since the last roll call?

The PRESIDENT pro tempore. The Chair thinks the roll should be called.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Cummins	Lippitt	Root
Bankhead	Curtis	Lodge	Sheppard
Borah	Dillingham	McCumber	Simmons
Bradley	Dixon	McLean	Smith, Ariz.
Brady	Fletcher	Martin, Va.	Smith, Ga.
Brandegee	Foster	Martine, N. J.	Smith, Md.
Briggs	Gallinger	Myers	Smith, Mich.
Bristow	Gamble	Nelson	Smith, S. C.
Bryan	Gore	Newlands	Smoot
Burnham	Groana	O'Gorman	Stephenson
Burton	Guggenheim	Oliver	Swanson
Catron	Hitchcock	Overman	Thornton
Chamberlain	Jackson	Owen	Tillman
Clapp	Johnson, Me.	Page	Townsend
Clark, Wyo.	Jones	Percy	Webb
Clarke, Ark.	Kavanaugh	Perkins	Williams
Crawford	Kenyon	Pittman	Works
Culberson	La Follette	Poindexter	
Cullom	Lea	Richardson	

Mr. CLARK of Wyoming. My colleague, the Senator from Wyoming [Mr. WARREN], is detained from the Chamber by business of the Senate.

The PRESIDENT pro tempore. On the call of the roll 73 Senators have answered to their names. A quorum of the Senate is present. The Senator from Nevada appeals from the decision of the Chair.

Mr. CLAPP. Mr. President, I trust the Senator will withdraw his appeal. It is placing Senators in a position that is not at all pleasant. For one, I am heartily in favor of his proposition. The ruling of the Chair, however, is so manifestly just that I should have to vote to sustain the ruling, and consequently apparently vote against the amendment. It is not a test of the strength of it, and I trust the Senator will withdraw his appeal.

Mr. BRISTOW. Mr. President, I trust the Senator from Rhode Island [Mr. LIPPITT] will withdraw the point of order. It seems to me that this amendment is as germane as many others that have been adopted, and certainly it is as much in order as many other amendments which have been passed upon. It seems to me, under the circumstances, that the Senator from Nevada [Mr. NEWLANDS] has a right to an expression of the

Senate on the merits of his amendment. I dislike to vote to overrule the Chair, but, under the circumstances in which this comes before the Senate, it seems to me that, having let in these other amendments, it would be certainly unjust not to let this one in, or at least to have a vote upon it.

Mr. ROOT. If he is at liberty to do so, I hope the Senator from Rhode Island [Mr. LIPPITT] will withdraw his point of order, and let us have a vote. The fact is that it is apparent that the Senate is becoming very restive over the undue proportion of the time remaining that this river and harbor bill is taking. The various discussions upon it are extending so that it is going to crowd out a lot of other appropriation bills, and that is the real trouble. I think the Senate will be ready to vote on this amendment promptly; and I hope the Senator from Rhode Island will withdraw his point of order, with the understanding, which I think everybody will agree to, that we shall vote.

Mr. NEWLANDS. I should be very glad to stop further discussion if we could have a vote on this amendment.

Mr. BRANDEGEE. Mr. President, a parliamentary inquiry. Were the yeas and nays ordered on the appeal from the ruling of the Chair?

The PRESIDENT pro tempore. They were not.

Mr. LIPPITT. Mr. President, referring to what the Senator from New York has said, that the Senate is becoming restless over the time that is being consumed on this bill, I recognize that situation. His proposal is that I shall withdraw this point of order so that a vote may be taken upon the proposition itself for the purpose of saving time. I can see no better way of saving time than to have the appeal on the point of order voted upon by the Senate. I think the point of order is manifestly well taken. The Chair has ruled that, in his opinion, it is well taken; and if it is simply a question of saving time, I know of no better way to do it than to take a vote.

Mr. NEWLANDS. Mr. President, I will state that I believe the majority of this body favor this amendment. I do not wish to waste the time of the body in discussion. I shall be glad to vote, and vote immediately, upon it. I appeal to the Senator from Rhode Island to withdraw his point of order. I do not wish to urge this appeal, because many Senators have approached me and told me that while they were for this measure they did not feel that they could vote to overrule the decision of the Chair. Now, the question is, What was the decision of the Chair? Am I appealing from a decision not to submit this question to the Senate, or am I appealing from the decision of the Chair as to whether this is in order? I would gladly appeal from the decision of the Chair as to the former, but I would not like to press the appeal from the latter, because I know there are many Senators who favor this measure and who would vote for it, and yet who would be disposed to sustain the Chair upon the point of order. I would not wish, therefore, to appear to have an adverse vote that was not deserved.

I appeal to the Senator from Rhode Island to let us have a vote on this question, and let us put the bill through and let it go to the House, and let them consider the matter in conference.

Mr. MYERS. Mr. President, will the Senator from Nevada yield to me for a moment?

Mr. NEWLANDS. Yes.

Mr. MYERS. A few minutes ago the Senate, by a vote of the Senate, declared that the Connecticut River dam bill was a proper amendment to offer here. I have great respect for the Chair and the rulings of the Chair, and seldom if ever question them. According to my recollection, however, the Senate voted that the Connecticut River dam bill was a proper amendment, that it was not out of order; and it seems to me a precedent of that kind set by the Senate ought to be good for one day.

Mr. LIPPITT. Mr. President——

Mr. BRANDEGEE. Mr. President——

The PRESIDENT pro tempore. The Senator from Rhode Island first addressed the Chair.

Mr. LIPPITT. At the request of several Senators and with the understanding that the vote on this measure is to be taken without further debate I will withdraw the point of order.

The PRESIDENT pro tempore. The point of order is withdrawn.

Mr. McCUMBER. I rise to a point of order.

The PRESIDENT pro tempore. The Senator will state it.

Mr. McCUMBER. It is that the Chair having once ruled that the point of order made was correctly made, and a vote being called for again upon that question, the Senator can not withdraw his point of order. It has already been decided.

The PRESIDENT pro tempore. The Chair is of opinion that the Senator can withdraw it by unanimous consent. Is there objection?

Mr. McCUMBER. I object.

Mr. POINDEXTER. Mr. President, a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state it.

Mr. POINDEXTER. As long as the question is pending upon an appeal from the decision of the Chair, the matter not having been finally determined, can not the Senator who made the point withdraw it? I should think he would have the privilege of withdrawing it so long as it is pending and undecided upon the appeal which has been taken.

Mr. BRANDEGEE. I make the point of order that an appeal from the decision of the Chair must be decided without debate.

The PRESIDENT pro tempore. The Senator is correct in that.

Mr. NEWLANDS. Mr. President, I rise to a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state it.

Mr. NEWLANDS. Is the appeal from the decision of the Chair sustaining the point of order, or is it from the decision of the Chair refusing to submit the question to the Senate?

The PRESIDENT pro tempore. The Senator from Nevada [Mr. NEWLANDS] offered an amendment. The Senator from Rhode Island [Mr. LIPPITT] made the point of order that it was obnoxious to Rule XVI, being general legislation. The Chair sustained the point of order, and the Senator from Nevada took an appeal from the decision of the Chair.

Mr. NEWLANDS. Then I made a motion to submit that question of order to the Senate.

The PRESIDENT pro tempore. The Senator could not make that motion under the rule. It could not be entertained.

Mr. NEWLANDS. Very well, Mr. President. Then I withdraw my appeal.

The PRESIDENT pro tempore. The appeal is withdrawn.

Mr. POINDEXTER. A further parliamentary inquiry, Mr. President.

The PRESIDENT pro tempore. The Senator will state it.

Mr. POINDEXTER. Is not the question now before the Senate the point of order insisted upon by the Senator from North Dakota [Mr. McCUMBER]?

The PRESIDENT pro tempore. That has been settled.

Mr. NEWLANDS. In view of the fact that a number of Senators have indicated to me that they wished to support this amendment and to support the bill of which this amendment is a condensation, and yet that they would feel constrained to vote to sustain the decision of the Chair upon the appeal, I withdraw my appeal.

The PRESIDENT pro tempore. Is there objection to the Senator withdrawing his appeal? The Chair hears none, and the appeal is withdrawn.

Mr. CUMMINS. I desire to say just one word. I am very sorry the Senator from Nevada has withdrawn his appeal, because I think the point of order was not well taken, and I was prepared to vote with the Senator on that proposition. But, as he has withdrawn it, I have nothing more to say.

The PRESIDENT pro tempore. The bill is still in the Committee of the Whole and open to amendment.

Mr. OWEN. Mr. President, I offer the following amendment:

That at any time prior to 10 days after the next ensuing regular session of Congress, the President of the United States shall have the right of veto as to any item in this act by returning the same to Congress with his disapproval.

The PRESIDENT pro tempore. The amendment will be stated.

The SECRETARY. It is proposed to add at the end of the bill the following:

That at any time prior to 10 days after the next ensuing regular session of Congress the President of the United States shall have the right of veto as to any item in this act by returning the same to Congress with his disapproval.

Mr. NELSON. Mr. President, I make the point of order against that. We can do a great deal in the river and harbor bill, but we can not amend the Constitution of the United States.

The PRESIDENT pro tempore. On what ground does the Senator make the point of order?

Mr. NELSON. I make it on the ground that it is general legislation.

The PRESIDENT pro tempore. The point of order is sustained.

Mr. OWEN obtained the floor.

Mr. BRANDEGEE. Mr. President, I rise to a parliamentary inquiry.

The PRESIDENT pro tempore. The Senator will state it.

Mr. BRANDEGEE. Before the bill goes to the Senate, I wish to ask whether, in order to get a separate vote on any

amendment adopted by the committee, a Senator must reserve that right?

The PRESIDENT pro tempore. That is the rule.

Mr. BRANDEGEE. Then I will state that if any separate vote shall be asked upon the amendment concerning the Connecticut River dam, I shall demand the same separate vote upon the Minnesota Mississippi River amendment, but not otherwise.

Mr. WILLIAMS. If it is necessary to give notice of a separate vote upon the Connecticut River dam amendment, I give notice now that it will be demanded.

Mr. OWEN. Mr. President, the objection which I feel to this bill generally is that it seems to contain so many items that are of purely local importance and which are not apparently required by the general welfare or in the matter of providing transportation for the people of the United States in a broad sense. I notice, for instance, in this bill 31 items relating to various creeks and other streams—some of them of importance, no doubt—of New Jersey. I merely mention that as illustrative. A number of them, however, must be of purely local character.

For instance, I call attention to the item of $33,500 on page 11 for improving Keyport Harbor, for improving Matawan Creek, for improving Raritan River, for improving South River, for improving Shoal Harbor, for improving Compton Creek, and for improving Cheesequake Creek; $20,000 for improving Raritan Bay; $1,600 for improving Absecon Creek; $45,000 for improving Absecon Inlet; $5,000 for improving Alloway Creek; $5,000 for improving Cooper River; $15,443 for improving Elizabeth River; $50,000 for improving Hackensack River; $15,000 for improving Mantua Creek; $30,000 for improving Maurice River; $300,000 for improving Newark Bay and Passaic River; and $13,000 for improving Raccoon Creek.

I have no doubt that is a very important stream—probably much more important than the Arkansas River, which is a thousand miles long, and runs through a number of States, but which is practically not provided for at all in this bill.

Then there is an item of $15,000 for Salem River, $10,000 for Shrewsbury River, $1,000 for improving Toms River, $5,000 for improving Tuckerton Creek, and $3,000 for improving Woodbridge Creek.

This bill is full of items of that kind. I do not know where these important national demands come from, but I have just ground to believe that the form of the bill is due to the very great activity of individuals who are concerned in promoting the private interests of some small locality at the public expense and, incidentally, at the expense of the people of Oklahoma. I am opposed to the form of this bill; I am opposed to the whole principle upon which it seems to proceed. It seeks to serve a number of unimportant interests of a local character; and by engaging the interest of Members of either House in that way it is sought to pass this bill through both Houses and put an enormous expenditure upon the people of the United States without serving any adequate national purpose. Therefore I have introduced this proposed amendment to allow the President of the United States the right to disapprove any particular item of the bill within the time stated.

I understand the point of order made by the Senator from Minnesota [Mr. NELSON], who, in his interest in this bill, sees a great danger to the Constitution of the United States and would make the point of order that we have no right to amend the Constitution of the United States by an amendment of this character. The Constitution of the United States gives a right of veto to the President of the United States whether we will or whether we will not; but the Constitution of the United States also places the power of legislation in this body—in Congress. We have a right here to make a law, and we have a right to put on this bill a proviso that the head of the executive branch of the Government may return any item in the bill with his disapproval. I wish to take the voice of the Senate upon that question.

I should like to know what the ruling of the Chair is—whether or not this amendment is ruled out of order.

The PRESIDENT pro tempore. The Chair sustained the point of order on the ground that the Senator's amendment was general legislation on an appropriation bill.

Mr. OWEN. I appeal from the ruling of the Chair on the ground that the Senator from Ohio [Mr. BURTON] having very eloquently disclosed and accepted the fact that this is not an appropriation bill, and the Senate having confirmed that view on the Connecticut River item, the third paragraph of Rule XVI does not apply.

The PRESIDENT pro tempore. The Chair feels constrained, on that point, to rule that it is an appropriation bill according to the rules of the Senate. The Senator from Oklahoma appeals from the decision of the Chair on the point of order.

Mr. THOMAS. On that I call for the yeas and nays.

The yeas and nays were ordered.

The PRESIDENT pro tempore. Senators who are of the opinion that the ruling of the Chair was correct will, when their names are called, answer "yea." Those opposed will answer "nay."

Mr. CLARKE of Arkansas. Mr. President, I did not quite understand the form in which the Chair submitted the matter.

The PRESIDENT pro tempore. The question is, Shall the decision of the Chair stand as the judgment of the Senate?

Mr. CLARKE of Arkansas. Oh, yes.

The Secretary proceeded to call the roll.

Mr. SMITH of Michigan (when his name was called). I desire to transfer my pair with the junior Senator from Missouri [Mr. REED] to the senior Senator from Pennsylvania [Mr. PENROSE], if I have the consent of the Senator from Mississippi [Mr. WILLIAMS].

Mr. WILLIAMS. Very well.

Mr. SMITH of Michigan. I vote "yea."

Mr. WILLIAMS (when his name was called). Being relieved from my pair with the senior Senator from Pennsylvania [Mr. PENROSE] by the announcement of the Senator from Michigan [Mr. SMITH], I desire to vote. I vote "yea."

The roll call was concluded.

Mr. FOSTER. I have a general pair with the junior Senator from Wyoming [Mr. WARREN]. In his absence I withhold my vote.

Mr. DU PONT. I should like to inquire whether the senior Senator from Texas [Mr. CULBERSON] has voted.

The PRESIDENT pro tempore. That Senator has not voted.

Mr. DU PONT. I have a general pair with the senior Senator from Texas. I will therefore withhold my vote.

Mr. CULLOM. I have a general pair with the junior Senator from West Virginia [Mr. CHILTON]. I transfer that pair to the junior Senator from Massachusetts [Mr. CRANE] and vote "yea."

Mr. CLARK of Wyoming (after having voted in the affirmative). I will ask if the senior Senator from Missouri [Mr. STONE] has voted?

The PRESIDENT pro tempore. The Chair is informed that that Senator has not voted.

Mr. CLARK of Wyoming. I withdraw my vote. I am paired with that Senator.

The roll call resulted—yeas 64, nays 5, as follows:

YEAS—64.

Bankhead	Cummins	Lippitt	Richardson
Bourne	Curtis	Lodge	Root

The PRESIDENT pro tempore. Upon the question, Shall the decision of the Chair stand as the judgment of the Senate, the yeas are 64 and the nays 5, and the point of order is sustained.

Mr. MARTINE of New Jersey. Mr. President, I was absent from the Chamber during the remarks of the Senator from Oklahoma [Mr. OWEN], but I feel that I would be utterly an inefficient Senator if I should keep my mouth closed after the unfortunate reference made in a belittling way to the appropriations for the Commonwealth which I in part represent.

I realize that many of these names may not seem dignified to the Senator from Oklahoma—Raccoon Creek, Toms River, Shrewsbury River, Tuckerton Creek, Woodbridge Creek. How blessed Oklahoma would be if it had the most insignificant one of these creeks wandering through that Commonwealth.

Mr. OWEN. We would be glad to have them.

Mr. MARTINE of New Jersey. I say, Mr. President, God knows far be it from me to advocate a pork-barrel measure. I

do not believe in profligacy. I was born and I have lived in frugality, and I would be the last representative of my State to advocate a scheme simply seeking the public crib for the expenditure of money without reference to results. I am opposed to any measure that savors of pork-barrelism. I feel that I represent an intelligent, industrious constituency, but at the same time while I represent a frugal constituency I do not represent a parsimonious, mean, and narrow constituency. We live in a Commonwealth that has progressed, a Commonwealth that has contributed much to the glory and history of this great Nation in the past, and a Commonwealth that to-day is carving a place in the history of this land. In manufacturing we are to-day about third in the States of this Nation.

My friend from Oklahoma refers in a belittling way to these various appropriations, such as that for the Elizabeth River improvement. According to the report submitted the amount is $15,543. Let me say—and I am proud of it—that I appeared before the committee of the House and urged that that appropriation should be $50,000, and I will state the reason why I did so.

I realize that on Kill Van Kull and Elizabeth River, passing up from the great harbor of New York City, there is a tonnage each year that outstrips the tonnage that passes through the great Suez Canal. The great contest is for cheaper transportation, cheaper bread and butter. The wharves and docks in the great city of New York, my birthplace, are fairly congested, until now the problem is where can the great ships that are building for the maritime commerce of the world find a mooring. There seems to be no hope on the New York side; but just across the Hudson River the State of New Jersey offers them an abiding place, and the world's commerce, in fact, may be taken care of there. We ask that the channel of Kill Van Kull and the improvement of Elizabeth River may have attention in order to afford better shipping facilities, and thereby cheaper food—cheaper bread to the country and to the world.

Remember, Mr. President, New Jersey is fortunately situated. It is at the very gateway of the commerce of this great Nation. All the commerce of Europe, and even that of Oklahoma and the mining industry of the far West passing over the great continental railroads, must find a shipping point on the New Jersey shore. We are the dispensing point not only for this country but for the great foreign shipping of the country.

Here, for the Newark Bay and the Passaic River improvement, $300,000 is appropriated. Remember that is right at the threshold of the great metropolis of this country. The city of Newark has a population to-day of about 575,000 people. We are a busy, thriving hive of industry. Everything in the manufacturing line, from a cambric needle to a locomotive, is manufactured there. It is a great shipping point.

But in the hope that we may be greater, in the hope that we may facilitate the commerce of this great Nation, and at the same time advance the welfare of the Commonwealth of New Jersey and aid our fellow citizens throughout the length and breadth of this country, we press this improvement with all reason and with all fairness and with all justice.

Improving Shrewsbury River and its maintenance, a paltry sum of $10,000 is appropriated. The shipping that passes through there each year runs into hundreds of thousands of tons.

Toms River is not dignified much in name, but only a pittance of $1,000 is asked for that improvement. That is one of the paltry sums that my friend would sneeringly refer to.

Woodbridge Creek is within 8 miles of my home. If it were called Woodbridge River it would have more character, for the name "creek" seems insignificant. Let me say to you that Woodbridge Creek and the whole section thereabout is fairly laden with a clay product that is manufactured into almost every conceivable shape that is known to civilization to-day. Thousands upon thousands of tons each year are shipped from that point, and more would be shipped with more liberal facilities.

I have no cavil with the Senator from Oklahoma, but, oh, that he might get out and with a bigger, broader lens see the splendid coast of the great country of which he and I are humble members.

Mr. OWEN. Mr. President, I wish to make my profound acknowledgment to my well-beloved friend from New Jersey, and to offer, if I may be permitted to do so, my humble and complete apology to Raccoon Creek.

If the Senator had been present he would have learned that in pointing out the thirty-odd items relating to New Jersey I was simply using it for the purpose of illustrating the manner in which some States are abundantly provided for, while others are not provided for at all, and that the bill is composed of items of local value but of no national importance.

There was no purpose, of course, to reflect upon the honorable Commonwealth of New Jersey, but the purpose was to speak on the general character of this bill, which takes up these various items and which provides, in what I believe a haphazard way, for this creek and that creek and the other creek, without having a comprehensive, clear-cut plan by which the national interests would be conserved in an important and well-digested plan.

My objection to this bill remains. I shall vote against it. I am opposed to this character of legislation. It has been repeated over and over again, and I believe that we ought to follow a policy laid out along the line which has been suggested by the Senator from Nevada [Mr. NEWLANDS], that we ought to have a certain amount of money which shall be used for such purposes and then distributed according to the national interests.

There was no purpose, I beg the distinguished Senator from New Jersey to believe, to reflect upon his noble Commonwealth, for which I have the highest respect, and for him personally I have a peculiar regard. But one is obliged in speaking of a bill of this kind to illustrate it with some of the items from it, and my eye fell upon the thirty-odd items for New Jersey, and I proceeded to illustrate with New Jersey. That is all there is in that.

Oklahoma is quite willing to have a development of our national waterways. Oklahoma is not willing to have the National Treasury invaded for the purpose of promoting local interests merely at the expense of the National Treasury. It is against that character of legislation, without intending to discriminate as to any particular item in the bill, that I referred to these various creeks. I could have taken some other State and illustrated it the same way, but that sufficed for my purpose.

Mr. BURTON. Mr. President, I do not think the criticisms of the Senator from Oklahoma are well founded. They rest upon the use of the name "creek" in this bill. There are some channels having that designation which have a very important commerce. For instance, Newtown Creek on Long Island, near the city of Brooklyn, in greater Manhattan, has a tonnage of 5,400,000 tons with a valuation of over $190,000,000. Passaic River, leading to the city of Newark, to which the Senator from Oklahoma referred, has a tonnage of 2,200,000, with a value of $62,000,000. The Raritan River, to which he referred somewhat slightingly, has a tonnage of something over 1,000,000, with a value of $64,000,000. All the small streams in New Jersey, some of them tributary to New York and some to Philadelphia, furnish a certain amount of interstate commerce. The extravagance in our river and harbor bills is not in that direction. These small streams can be improved at a comparatively limited cost; and while the question may be raised whether they are proper objects for appropriations from the Federal Government, this custom has been pursued for many years, and the improvements make it possible to ship products from one State to another, making a part of our interstate commerce.

Newtown Creek has a greater tonnage which is of greater value than that of the three sections of the Mississippi River. Raccoon Creek has almost as much tonnage as the whole of the Arkansas River. The danger of waste or extravagance is in the construction of locks and dams for the canalizing of rivers, for the improvement of great rivers—I do not wish at this late hour to mention which they are—where there is little prospect of developing an important commerce and the money is really devoted to the protection of private property bordering upon them.

Nevertheless, Mr. President, I can not vote for this bill as it now is. Most of it is made up of commendable items, but there is much that is objectionable. I must particularly criticize some of the precedents which it establishes. We have heard a great deal here in the last few days in regard to precedents. Now, I want to call attention to one, a provision adopted here on Saturday morning last.

The bill as it came from the House sought to extend the jurisdiction of the Mississippi River Commission from Cape Girardeau up to Rock Island. The Senate Committee on Commerce, recognizing the manifest impropriety of that, suggested, in place of the provision of the House bill, an examination with a view to a future report, for which purpose $100,000 was to be appropriated. That proposition was discussed at great length here and a compromise was adopted which was worse than either. I want to call attention to its real significance:

The Mississippi River Commission shall make an examination of the Mississippi River from Cape Girardeau, Mo., to Rock Island, Ill., with a view to such improvements as will at the same time promote navigation, develop water power, and protect property adjacent to said river from damage by floods; and in making such examination con-

sideration shall be given and recommendations made as to plans for cooperation by the localities affected; and for the purpose of such examination—

So much is retained of the recommendation of the Senate committee, but that part of the provision appropriating the sum of $100,000 is cut out. Now, let us see what is put in its place—

and for the building of such levees between said points upon the river in aid of navigation as may be found necessary or desirable by the commission and approved by the Chief of Engineers the sum of $200,000 is hereby appropriated.

Thus, in the same sentence there is a demand for an examination and its nullification by directing the Mississippi River Commission to perform work which it ought not perform until the examination is made and the report transmitted to Congress. Congress could not act intelligently and with full knowledge of the facts until after this examination is made. You mix the two here—the examination and the appropriation.

Why, Mr. President, if we adopt that class of provisions, we undermine the whole system. The very fundamental idea should be that we undertake no work whatever until careful examination has been made and an estimate furnished, not only that we may know whether or no the improvement is a good one, but that we may know what it will cost; and then, with all this information before it, let Congress decide. This paragraph slips in a provision allowing $200,000 instead of $100,000, and allowing the commission to go ahead before the examination is made.

There was a paragraph somewhat similar in the act of 1910, under which a million dollars was appropriated under a great deal of pressure for a so-called waterway from the Lakes to the Gulf. It was vigorously opposed by many of us. We thought it very objectionable; but even that contained the clause which will be found on page 34 of the river and harbor act of 1910. It provided for the presentation of plans, and so forth, and then stated:

And until these plans and estimates have been submitted and a project for the improvement adopted by Congress the appropriation of $1,000,000 herein made shall not be available for expenditure.

Mr. President, if this paragraph goes in, the Committee on Rivers and Harbors of the other House and the Committee on Commerce of the Senate owe an apology to a multitude of persons who have come before Congress in the last 15 years. When they have come, and they have come often, asking us to make an appropriation and to order with that appropriation an examination, asking in case the report or the examination is favorable, that the improvement may proceed, we have said every time, "No; make your examination, then come to Congress and run the same gantlet that every other project has to run. If that report is favorable, and we approve it, then, and in that case, we will decide whether or not an appropriation should be made."

This may seem a trivial item, Mr. President, but it is an entering wedge for the expenditure of tens of millions of dollars in the upper Mississippi River before we have had time for consideration. It is also a beginning for the destruction of the most salutary and the most necessary feature of our whole system of river and harbor appropriations. I am very glad to know that the Senator from Arizona [Mr. SMITH] withdrew his amendment, which was subject to the same objection to which this paragraph is subject.

In view of that fact, Mr. President, and in view of the precedent which it will create, I can not vote for this bill. There are other objections, but I shall not detain the Senate to discuss them.

The bill was reported to the Senate as amended.

Mr. STONE. Mr. President——

The PRESIDENT pro tempore. The question is on concurring in the amendment made as in Committee of the Whole.

Mr. STONE. Mr. President, I desire to make an inquiry. I had been called out to attend a session of a subcommittee of the Senate before which I had an amendment pending. I returned and found that the Senator from Ohio [Mr. BURTON] was engaged in one of his usual——

Mr. NEWLANDS. Mr. President, is the bill yet in the Senate?

The PRESIDENT pro tempore. The bill has been reported to the Senate. The Chair understood certain Senators to say that they desired to reserve two amendments, the Senator from Mississippi being one of those Senators.

Mr. NELSON. The Senator has not asked to reserve the amendment since the bill was reported to the Senate. There is no reservation asked at present.

The PRESIDENT pro tempore. Very well. Then the question is on concurring in the amendment made as in Committee of the Whole.

Mr. BORAH. Mr. President, I understand that there were two reservations made.

The PRESIDENT pro tempore. There was a suggestion made to the Chair that reservations might be made, but they have not been made.

Mr. POINDEXTER. I understood the Senator from Mississippi gave notice that he would ask for a separate vote——

The PRESIDENT pro tempore. The Senator did give notice, but he has not demanded a separate vote.

Mr. POINDEXTER. I ask for a separate vote upon the Senator's reservation.

The PRESIDENT pro tempore. The Senator from Washington asks a separate vote upon the Connecticut River project, on page 5.

Mr. BRANDEGEE. I demand a separate vote upon the amendment contained on pages 53 and 54, relating to the Municipal Electric Co. of the State of Minnesota.

The PRESIDENT pro tempore. Without objection, the other amendments made, as in Committee of the Whole, will be concurred in. The question is upon concurring in the amendment upon page 5, relating to the Connecticut River project.

Mr. POINDEXTER. I ask for the yeas and nays.

The PRESIDENT pro tempore. The yeas and nays are demanded.

Mr. BANKHEAD. I should like to understand what that amendment is.

The PRESIDENT pro tempore. It is the amendment agreed to, as in Committee of the Whole, in reference to the Connecticut River dam.

Mr. BANKHEAD. Is it the amendment offered by the Senator from Connecticut, on which the vote is about to be taken?

The PRESIDENT pro tempore. It is. The Senator from Washington [Mr. POINDEXTER] demands the yeas and nays. Is there a second?

Mr. CLARKE of Arkansas. I have no objection to the yeas and nays being ordered if a sufficient number of Senators second the demand, but I desire to say——

The PRESIDENT pro tempore. The Chair thinks the demand for the yeas and nays has not yet been seconded. Senators seconding the demand will please raise their hands. [After counting.] There is not a sufficient number seconding the demand, and the yeas and nays are not ordered. The question is on concurring in the amendment reserved on page 5.

Mr. POINDEXTER. Mr. President, I notice the junior Senator from Colorado [Mr. THOMAS] had his hand up, and I do not think the Chair counted him. I should like the question to be again put.

The PRESIDENT pro tempore. The Chair will again put the request. Is the demand for the yeas and nays seconded?

The yeas and nays were ordered.

Mr. CLARKE of Arkansas. Mr. President, I am going to vote to put that amendment on this bill, although I know it ought not to be there. If this were the last word in the passage of this bill, of course I should not do so, because it is perfectly plain that if the amendment is put upon the bill and sent to the President as a part of it, in order to maintain his reputation for consistency he will doubtless veto the entire measure. He did so in a parallel case, when there was a failure to make provision for the support of the Commerce Court. I am too much interested in this bill to want to test out the endurance of the President in the matter of consistency; but bad examples have been set here, and, having been set, they have been followed, as they usually are. Bad examples are always followed, while good examples are rarely ever followed, or, at all events, they are not cited as precedents and do not, upon the mere statement of them, constitute a sufficient reason for doing right the second or third time, but a bad precedent is always an unanswerable argument in favor of doing another bad thing.

I now realize that a great mistake was made in putting all this legislation relating to waterways upon this bill. The fact of the business is that this matter of legislating upon appropriation bills is another manifestation of a curse which rested on this country just after the Civil War in the shape of reconstruction measures. The Democratic membership of the Senate committed themselves to the addition of general legislation on appropriation bills as a means of keeping soldiers away from the polls, under a practice that prevailed at that time. It seemed to justify itself, but, like everything else, the worst things in this world are the abuses of good ones, and so the practice has been kept up.

I have formulated in my own mind a plan which will regulate my own conduct hereafter. I shall only favor the addition of legislation to appropriation bills when the matter relates to something that is practically not contested and the conditions

of the situation justify such action, or where there is a difference of policy, where technical objections may defeat the popular will, or where some fundamental principles of government are at stake—matters of large import, matters of far-reaching importance; but I do not intend to lend my aid to the passage, as part of appropriation bills, of measures that are disputed in character or that relate to new features of legislation which ought to be thrashed out upon their own merits, without the opportunity to hold up, if I may use such a phrase, important issues of another character in which the membership of the Senate is interested, and practically to compel a surrender of your own individual judgment as to the merits of a particular measure in order to accomplish something of greater importance.

It is not a system of legitimate legislation to permit that to be done. It is an abuse of it. I think the common sense, the enlightened sense of the Senate, ought to be adequate to the correction of that practice.

There will be a conference upon this particular bill, when all these water matters will undergo investigation in the light of the objections that have been urged here. The sentiment of the Senate on the question of whether or not the National Government shall have a right to levy tolls upon water-power grants has been, after a full argument, settled. Now the attempt is made to jeopardize the life of this important bill, one in which many sections of this country are interested, and in which my section of the country is vitally interested, in order to compel a reversal of that position.

I confess that I would submit, with a frank statement of the fact that I was submitting, to an imposition put upon me, because of the interest of my people, to permit things to go through which, upon their own merits, I would not vote for in order to secure for them the splendid advantages that will come to them upon the approval of this particular bill. I hope hereafter that such legislation as this may be put upon a higher plane of independence; that appropriation bills will be confined to matters of appropriation; and that matters of legislation of a disputed character will be compelled to work their destinies out through the slow processes of discussion in this tribunal and elsewhere.

Because I know that this matter will go to conference, because I know the views of another branch, and because I know the views of the President, I am perfectly willing to vote to put this amendment on, knowing that it would be fatal to the bill if it went on and was accepted by the other House, and under the belief that the common sense of the situation will finally commend itself to those Senators and Members of the other House who will constitute the conference committee, and that they will make some adjustment of it that will give expression to the known sentiments of each House, and will not permit this important bill to be loaded down to the extent of jeopardizing its very existence.

So that I say I shall vote for something that I am not abstractly in favor of, in order that I may get it in a place where it will receive the consideration that it is not likely to receive here this afternoon. It if results in leaving this particular water-power legislation out of this bill, well and good. That will best conform to my ideas of what should be done, until the outlines of the question have been completely settled so that they will be no longer open to discussion here.

I do not say that it is an unfair advantage to take of the opportunity, because when you are within the rules of a body that has power to exercise you are within your rights, for rules are made to give advantage when that is necessarily evolved from their application. In what I have had to say I do not complain of the action of anybody, but I think this system has gone to a point where abuses have become perfectly apparent.

The PRESIDENT pro tempore. The question is on concurring in the amendment made as in Committee of the Whole, on which the yeas and nays have been ordered.

Mr. SMITH of Georgia. I ask that the amendment be stated.

The PRESIDENT pro tempore. Does the Senator desire that it be read?

Mr. SMITH of Georgia. I am now informed that it is the Connecticut dam proposition.

The PRESIDENT pro tempore. That is the question to be voted on.

Mr. SMITH of Georgia. Then I do not care to have it read.

The PRESIDENT pro tempore. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. CULLOM (when his name was called). I have a general pair with the junior Senator from West Virginia [Mr. CHILTON]. I transfer that pair to the junior Senator from Massachusetts [Mr. CRANE] and will vote. I vote "yea."

Mr. NELSON (when his name was called). I am paired with the senior Senator from Georgia [Mr. BACON] on this matter, and therefore withhold my vote.

Mr. SMITH of Michigan (when his name was called). I again announce my pair with the junior Senator from Missouri [Mr. REED], and withhold my vote.

Mr. WILLIAMS (when his name was called). Transferring my pair with the Senator from Pennsylvania [Mr. PENROSE] to the Senator from Indiana [Mr. SHIVELY], I desire to vote. I vote "nay."

The roll call was concluded.

Mr. BRADLEY. I transfer my pair with the junior Senator from Indiana [Mr. KERN] to the senior Senator from Nebraska [Mr. BROWN] and will vote. I vote "yea."

Mr. FOSTER (after having voted in the negative). I have a general pair with the Senator from Wyoming [Mr. WARREN], who is absent on public business. I transfer that pair to the junior Senator from Alabama [Mr. JOHNSTON] and will allow my vote to stand.

Mr. CLARK of Wyoming. I desire to announce that my colleague [Mr. WARREN] is unavoidably absent on the business of the Senate.

Mr. CULBERSON (after having voted in the negative). I inquire if the Senator from Delaware [Mr. DU PONT] has voted?

The PRESIDENT pro tempore. The Chair is informed that that Senator has not voted.

Mr. CULBERSON. As I have a general pair with that Senator, I withdraw my vote.

The result was announced—yeas 39, nays 37, as follows:

YEAS—39.

Ashurst	Clark, Wyo.	Jackson	Oliver
Borah	Clarke, Ark.	Jones	Owen
Bourne	Cullom	Kenyon	Page
Bradley	Cummins	La Follette	Perkins
Brandegee	Curtis	Lippitt	Richardson
Briggs	Dillingham	Lodge	Root
Burnham	Gallinger	McCumber	Stephenson
Burton	Gamble	McLean	Townsend
Catron	Guggenheim	Myers	Wetmore
Clapp	Hitchcock	Newlands	

NAYS—37.

Bankhead	Johnson, Me.	Poindexter	Thomas
Bristow	Kavanaugh	Pomerene	Thornton
Bryan	Lea	Sheppard	Tillman
Chamberlain	Martin, Va.	Simmons	Watson
Crawford	Martine, N. J.	Smith, Ariz.	Webb
Fall	O'Gorman	Smith, Ga.	Williams
Fletcher	Overman	Smith, Md.	Works
Foster	Paynter	Smith, S. C.	
Gardner	Percy	Stone	
Gronna	Pittman	Swanson	

NOT VOTING—19.

Bacon	Culberson	Kern	Smith, Mich.
Brady	Dixon	Nelson	Smoot
Brown	du Pont	Penrose	Sutherland
Chilton	Gore	Reed	Warren
Crane	Johnston, Ala.	Shively	

So the amendment made as in Committee of the Whole was concurred in.

The PRESIDENT pro tempore. The question is now upon the next reserved amendment, which will be stated.

The SECRETARY. The amendment is on pages 53 and 54, relative to power at Minneapolis and St. Paul.

Mr. BRANDEGEE. I do not care for a separate vote upon that.

Mr. BORAH. I do not desire to ask for a yea-and-nay vote, but I want an opportunity to vote on the proposition.

The PRESIDENT pro tempore. The question is upon concurring in the amendment.

The amendment was concurred in.

The PRESIDENT pro tempore. The bill is in the Senate, open to amendment. If no amendment be proposed, the question will be, Shall the amendments be engrossed and the bill read a third time?

Mr. NEWLANDS. Mr. President, I now renew the amendment that I offered a short time ago, providing simply for an investigation, organization, and plans, constituting a river-regulation commission, consisting of the Secretary of War, the Secretary of the Interior, the Secretary of Agriculture, the Secretary of Commerce and Labor, two Members of the Senate, and two Members of the House, leaving out the last sentence but one—the sentence which provides that the plans shall involve the expenditure of $50,000,000 annually. A point of order was made against that amendment by the Senator from North Dakota [Mr. MCCUMBER], and he has indicated his willingness to withdraw his objection if the sentence to which I have referred is left out. I therefore move the adoption of this amendment.

The PRESIDENT pro tempore. The Senator from Nevada offers an amendment, which will be stated.

Mr. NELSON. The amendment has been already read. I do not think it is necessary to read it again.

The PRESIDENT pro tempore. Without objection, the reading of the amendment will be dispensed with.

Mr. GRONNA. I should like to have read the portion which was stricken out.

The PRESIDENT pro tempore. The part stricken out will be stated.

The SECRETARY. The part stricken out is on page 3 of the printed amendment, line 12, and is as follows:

Such plans shall involve the expenditure by the United States of $50,000,000 annually, commencing on the completion of the Panama Canal and extending over a period of 10 years.

Mr. NEWLANDS. That portion, I will say, is stricken out of the amendment. I now offer it as amended in that way.

Mr. BRANDEGEE. Mr. President, before voting upon the amendment I desire to say that with that part stricken out I shall be glad to support it, and if the system proves a success after its organization I shall be glad to vote for appropriations for it.

The amendment was agreed to, as follows:

SEC. 3. A commission, to be known as the river-regulation commission, consisting of the Secretary of War, the Secretary of the Interior, the Secretary of Agriculture, the Secretary of Commerce and Labor, two Members of the Senate, to be selected by the President of the Senate, and two Members of the House of Representatives, to be selected by the Speaker, is hereby created and authorized to bring into coordination and cooperation with the Corps of Engineers of the Army the other scientific or constructive services of the United States that relate to the study, development, and control of waterways and water resources and subjects related thereto, and to the development and regulation of interstate and foreign commerce, with a view to uniting such services through a board or boards in investigating questions relating to the development, improvement, regulation, and control of navigation as a part of interstate and foreign commerce, including therein the related questions of irrigation, forestry, swamp-land reclamation, clarification of streams, regulation of flow, control of floods, utilization of water power, prevention of soil waste, cooperation of railways and waterways, and promotion of transfer facilities and sites, and in forming comprehensive plans for the development of the waterways and water resources of the country for every useful purpose by cooperation between the United States and the several States, municipalities, communities, corporations, and individuals within the jurisdiction, powers, and rights of each, respectively, and with a view to assigning to the United States such portion of such development, promotion, regulation, and control as can be properly undertaken by the United States by virtue of its power to regulate interstate and foreign commerce and by reason of its proprietary interest in the public domain, and to the States, municipalities, communities, corporations, and individuals such portion as properly belongs to their jurisdiction, rights, and interests, and with a view to properly apportioning costs and benefits, and with a view to so uniting the plans and works of the United States within its jurisdiction, and of the States and municipalities, respectively, within their jurisdictions, and of corporations, communities, and individuals within their respective powers and rights, as to secure the highest development and utilization of the waterways and water resources of the United States; and such river-regulation commission is authorized to appoint as members of such board or boards such engineers, transportation experts, experts in water development, and constructors of eminence as it may deem advisable to employ in connection with such plans. And for the expenses of such organization, investigation, and plans the sum of $500,000 is hereby appropriated.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

PHYSICAL VALUATION OF RAILROADS.

Mr. LA FOLLETTE. Mr. President, pursuant to the unanimous-consent agreement, I move that the Senate proceed to the consideration of House bill 22593, to amend an act entitled "An act to regulate commerce," approved February 4, 1887, and all acts amendatory thereof, by providing for physical valuation of the property of carriers subject thereto and securing information concerning their stocks and bonds and boards of directors.

Several Senators addressed the Chair.

Mr. LA FOLLETTE. I will yield, that some routine business may be transacted.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, transmitted to the Senate resolutions of the House of Representatives on the life and public services of Hon. WELDON BRINTON HEYBURN, late a Senator from the State of Idaho.

The message also transmitted to the Senate resolutions of the House of Representatives on the life and public services of Hon. ROBERT L. TAYLOR, late a Senator from the State of Tennessee.

The message further transmitted to the Senate resolutions of the House of Representatives on the life and public services of Hon. JEFF DAVIS, late a Senator from the State of Arkansas.

The message also transmitted to the Senate resolutions of the House of Representatives on the life and public services of Hon. ROBERT C. WICKLIFFE, late a Representative from the State of Louisiana.

The message further transmitted to the Senate resolutions of the House of Representatives on the life and public services of Hon. CARL C. ANDERSON, late a Representative from the State of Ohio.

The message also transmitted to the Senate resolutions of the House of Representatives on the life and public services of Hon. SYLVESTER CLARK SMITH, late a Representative from the State of California.

The message further transmitted to the Senate resolutions of the House of Representatives on the life and public services of Hon. GEORGE S. LEGARE, late a Representative from the State of South Carolina.

ENROLLED BILLS SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills, and they were thereupon signed by the President pro tempore:

H. R. 20102. An act relating to proof of signatures and handwriting; and

H. R. 26279. An act granting the Fifth-Third National Bank of Cincinnati, Ohio, the right to use original charter No. 20.

AGRICULTURE APPROPRIATION BILL.

Mr. BURNHAM. Mr. President, a notice appears on the calendar that upon the disposition of the Indian appropriation bill I shall call up House bill 28283, the Agriculture appropriation bill. I desire to give notice now that immediately after the disposition of the Post Office appropriation bill I shall ask the Senate to consider the agricultural appropriation bill.

ADDITIONAL REPORTS OF COMMITTEES.

Mr. ROOT, from the Committee on the Judiciary, to which was referred the bill (S. 8454) to amend section 914 of the Revised Statutes, reported it without amendment.

Mr. CUMMINS, from the Committee on the Judiciary, to which were referred the following bills, reported them each with amendments, and submitted reports thereon:

S. 7600. A bill legalizing certain conveyances heretofore made by the Central Pacific Railroad Co. and others within the State of Nevada (Rept. No. 1299); and

S. 3194. A bill to revise section 985 of the Revised Statutes of the United States (Rept. No. 1308).

Mr. POINDEXTER, from the Committee on Pacific Islands and Porto Rico, to which was referred the bill (H. R. 20048) declaring that all citizens of Porto Rico and certain natives permanently residing in said island shall be citizens of the United States, reported it without amendment and submitted a report (No. 1300) thereon.

Mr. CATRON, from the Committee on Military Affairs, to which was referred the bill (H. R. 28469) granting two condemned cannon to the Wallkill Valley Cemetery Association, of Orange County, N. Y., reported it without amendment and submitted a report (No. 1301) thereon.

He also, from the same committee, to which was referred the bill (H. R. 26078) for the relief of Charles S. Kincaid, reported it with amendments and submitted a report (No. 1302) thereon.

Mr. LEA, from the Committee on Military Affairs, to which were referred the following bills, reported them each with an amendment and submitted reports thereon:

S. 5107. A bill for the relief of W. D. McLean, alias Donald McLean (Rept. No. 1306); and

S. 6675. A bill to grant an honorable discharge to Philip Cook (Rept. No. 1307).

Mr. LEA, from the Committee on Military Affairs, to which was referred the joint resolution (H. J. Res. 118) authorizing the Secretary of War to accept the title to approximately 5,000 acres of land in the vicinity of Tullahoma, in the State of Tennessee, which certain citizens have offered to donate to the United States for the purpose of establishing a maneuver camp and for the maneuvering of troops, establishing and maintaining camps of instruction, for rifle and artillery ranges, and for mobilization and assembling of troops from the group of States composed of Kentucky, Tennessee, Mississippi, Alabama, Georgia, Florida, North Carolina, and South Carolina, reported it with an amendment and submitted a report (No. 1303) thereon.

He also, from the same committee, to which were referred the following bills, submitted adverse reports thereon, which were agreed to, and the bills were postponed indefinitely:

S. 5200. A bill to authorize the President to appoint A. C. G. Williams-Foote, late first lieutenant in the Philippine Scouts, to the grade of first lieutenant in the United States Army, and place him on the retired list (Rept. No. 1304); and

S. 5201. A bill to authorize the President to appoint Clarence C. Faw, late second lieutenant in the Philippine Scouts, to the grade of second lieutenant in the United States Army, and place him on the retired list (Rept. No. 1305).

THE VIRGINIA TERMINAL CO.

Mr. PAYNTER. Mr. President, on Saturday there was reported from the Committee on the District of Columbia the bill (S. 7640) to incorporate the Virginia Terminal Co. My information is from a party living on M Street, over which this road will pass, that there have been no hearings at all upon the bill, and it means the construction of a street car line for a mile through this city, and provides that it shall go over the lines of some other street car company here, besides not allowing the property owners or the street car company to be heard, although the street is a narrow one and two tracks are provided for. I am advised that the committee acted upon the recommendation of the Commissioners of the District of Columbia, and they took such action because the committee was pressed for time and did not feel that hearings could be given. I therefore move to recommit the bill to the Committee on the District of Columbia, with a view to having the parties interested heard. By this motion I do not intend any reflection, of course, upon the action of the committee.

The PRESIDENT pro tempore. The bill will be recommitted to the Committee on the District of Columbia.

ADDITIONAL AMENDMENTS TO APPROPRIATION BILLS.

Mr. McCUMBER submitted an amendment proposing to increase the appropriation for the Glacier National Park, Mont., from $75,000 to $250,000, intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. BORAH submitted an amendment providing that hereafter no part of the appropriation for fortifications and armament thereof for the Panama Canal shall be available for the salary or pay of any officer, manager, superintendent, foreman, or other person having charge of work of any employee of the United States Government, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. KENYON submitted an amendment proposing to strike out from the agricultural appropriation bill the provision providing for the purchase and distribution of valuable seeds, intended to be proposed by him to the agricultural appropriation bill, which was ordered to lie on the table and be printed.

Mr. TOWNSEND submitted an amendment proposing to appropriate $750 each to pay Charles M. Campbell and Charles A. Davidson, late clerks of the courts of the United States for Indian Territory, for fees earned by them for performing services not required of clerks of United States courts in other districts, etc., intended to be proposed by him to the general deficiency appropriation bill, which was ordered to be printed and, with the accompanying paper, referred to the Committee on Appropriations.

Mr. FALL submitted an amendment proposing to appropriate $69,800 for the support and education of 400 Indian pupils at the Indian school at Albuquerque, N. Mex., intended to be proposed by him to the Indian appropriation bill, which was ordered to lie on the table and be printed.

He also submitted an amendment providing for pay of one special assistant to the United States Attorney General, district of New Mexico, who shall act as attorney for the Pueblo Indians of New Mexico, etc., intended to be proposed by him to the Indian appropriation bill; which was ordered to lie on the table and be printed.

Mr. CURTIS submitted an amendment proposing to appropriate $1,200 to pay F. H. Wakefield for preparing the history of legislation for the Senate in the third session of the Sixty-second Congress, etc., intended to be proposed by him to the general deficiency appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

Mr. BRANDEGEE submitted an amendment proposing to appropriate $140,000 for the erection of a public building at Middletown, in the State of Connecticut, intended to be proposed by him to the omnibus public buildings bill, which was ordered to lie on the table and be printed.

Mr. JONES submitted an amendment proposing to increase the appropriation for a post-office building at Seattle, Wash., from $300,000 to $1,250,000, intended to be proposed by him to the omnibus public buildings bill, which was ordered to lie on the table and be printed.

Mr. OLIVER submitted an amendment providing that the proceeds of the sale of the post-office site situated at Liberty Avenue and Sixteenth Street, Pittsburgh, Pa., together with the additional sum of $750,000, not to exceed $1,500,000 in all, be appropriated for the purchase of another site for a post office in that city, etc., intended to be proposed by him to the omnibus public buildings bill, which was ordered to lie on the table and be printed.

Mr. LODGE submitted an amendment proposing to appropriate $2,000 for the salary of one assistant in the Bureau of Fisheries, Division of Inquiry respecting food fishes, etc., intended to be proposed by him to the sundry civil appropriation bill, which was referred to the Committee on Appropriations and ordered to be printed.

SPEECH OF MR. JUSTICE HOLMES (S. DOC. NO. 1106).

Mr. LODGE. I have a copy of a speech of Mr. Justice Holmes, delivered at a dinner of the Harvard Law School Association, of New York, on February 15, 1913. I ask that the speech be printed as a Senate document.

The PRESIDENT pro tempore. Without objection, it is so ordered.

PRESIDENTIAL APPROVALS.

A message from the President of the United States, by Mr. Latta, executive clerk, announced that the President had approved and signed the following acts:

On February 20, 1913:

S. 104. An act for the relief of Carl Krueger; and

S. 8035. An act granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy and of wars other than the Civil War and to certain widows and dependent relatives of such soldiers and sailors.

On February 24, 1913:

S. 2733. An act for the relief of the estate of Almon P. Frederick.

COMMISSION ON ECONOMY AND EFFICIENCY (S. DOC. NO. 1107).

The PRESIDENT pro tempore laid before the Senate the following message from the President of the United States, which was read, and, with the accompanying paper, referred to the Committee on Appropriations and ordered to be printed:

To the Senate:

In response to the resolution of the Senate, dated February 21, 1913, requesting that I send to the Senate any additional information submitted by the Commission on Economy and Efficiency relating to the matter of saving in recovery of Government waste paper, I transmit herewith reports of the commission on the subject dated September 21, 1912, and February 11, 1913.

WM. H. TAFT.

THE WHITE HOUSE, *February 24, 1913.*

PHYSICAL VALUATION OF RAILROADS.

The Senate, as in Committee of the Whole, proceeded to consider the bill (H. R. 22593) to amend an act entitled "An act to regulate commerce," approved February 4, 1887, and all acts amendatory thereof by providing for physical valuation of the property of carriers subject thereto and securing information concerning their stocks and bonds and boards of directors, which had been reported from the Committee on Interstate Commerce with amendment.

The Secretary proceeded to read the bill.

The first amendment was, on page 1, line 8, to strike out all down to line 3 on page 4 and to insert:

SEC. 19a. That the commission shall, as hereinafter provided, investigate, ascertain, and report the value of all the property owned or used by every common carrier subject to the provisions of this act. To enable the commission to make such investigation and report it is authorized to employ such experts and other assistants as may be necessary. The commission may appoint examiners who shall have power to administer oaths, examine witnesses, and take testimony. The commission shall make an inventory which shall list the property of every common carrier subject to the provisions of this act in detail and show the value thereof as hereinafter provided, and shall classify the physical property, as nearly as practicable, in conformity with the classification of expenditures for road and equipment as prescribed by the Interstate Commerce Commission.

First. In such investigation said commission shall ascertain and report in detail as to each piece of property owned or used by said common carrier for its purposes as a common carrier, the original cost to date, the cost of reproduction new, the cost of reproduction less depreciation, and an analysis of the methods by which these several costs are obtained, and the reason for their differences, if any. The commission shall in like manner ascertain and report separately other values, and elements of value, if any, of the property of such common carrier, and an analysis of the methods of valuation employed, and of the reasons for any differences between any such value and each of the foregoing cost values.

Second. Such investigation and report shall state in detail and separately from improvements the original cost of all lands, rights of way, and terminals owned or used for the purposes of a common carrier, and ascertained as of the time of dedication to public use, and the present value of the same, and separately the original and present cost of condemnation and damages or of purchase in excess of such original cost or present value.

Third. Such investigation and report shall show separately the property held for purposes other than those of a common carrier and the original cost and present value of the same, together with an analysis of the methods of valuation employed.

Fourth. In ascertaining the original cost to date of the property of such common carrier the commission, in addition to such other elements as it may deem necessary, shall investigate and report upon the history and organization of the present and of any previous corpora-

tion operating such property; upon any increases or decreases of stocks, bonds, or other securities in any reorganization; upon moneys received by any such corporation by reason of any issues of stocks, bonds, or other securities; upon the syndicating, banking, and other financial arrangements under which such issues were made and the expense thereof; and upon the net and gross earnings of such corporations; and shall also ascertain and report in such detail as may be determined by the commission upon the expenditure of all moneys and the purposes for which the same were expended.

Fifth. The commission shall ascertain and report the amount and value of any aid, gift, grant of right of way, or donation made to any such common carrier, or to any previous corporation operating such property, by the Government of the United States or by any State, county, or municipal government, or by individuals, associations, or corporations; and it shall also ascertain and report the grants of land to any such common carrier, or any previous corporation operating such property, by the Government of the United States, or by any State, county, or municipal government, and the amount of money derived from the sale of any portion of such grants and the value of the unsold portion thereof at the time acquired and at the present time; also the amount and value of any concession and allowance made by such common carrier to the Government of the United States or to any State, county, or municipal government in consideration of such aid, gift, grant, or donation.

The PRESIDENT pro tempore. The question is on agreeing to the amendment just read.

Mr. BRISTOW. Does the Senator from Wisconsin desire to make a statement? If so, I wish to make some inquiries after he has made his statement.

Mr. LA FOLLETTE. Mr. President, I do not desire to take the time of the Senate to make any statement upon this bill unless I can save time by so doing. Perhaps we can make better progress with the bill by my answering as best I can any questions which may be asked by Senators. It may be that I might say just this——

Mr. SMITH of Georgia. Will the Senator yield to me?

Mr. LA FOLLETTE. I will.

Mr. SMITH of Georgia. I should like very much to have the Senator, as briefly as he can, explain the necessity for the amendment as a substitute for the original measure. I think it will not only be helpful to us here, but it will be helpful to the friends of the measure who may desire, when they understand the change, without a reference and without a committee of conference, to adopt the change upon the floor of the House.

Mr. LA FOLLETTE. Mr. President, I believe the pending bill to be more important and far-reaching in the benefits which will ultimately flow from it than any measure which Congress has enacted in many years.

Standing here after the long and arduous struggle, I may be pardoned a backward glance along the rugged way which those have come to this final achievement.

The act to regulate interstate commerce which passed in 1887, after a protracted contest of 13 years, declared *unreasonable rates to be unlawful.*

The report made by the Committee on Interstate Commerce when it presented the bill to the Senate 26 years ago stated the evils which the bill was intended to remedy. From that report I quote the following:

That local rates are unreasonably high as compared with through rates.

That both local rates and through rates are unreasonably high at noncompeting points, either from the absence of competition or in consequence of pooling agreements that restrict its operation.

That rates are established without apparent regard to the services performed and are based largely upon what the traffic will bear.

That the stock and bonded indebtedness of the roads largely exceed the actual cost of their construction or their present value, and that unreasonable rates are charged in the effort to pay dividends on watered stock and interest on bonds improperly issued.

The enactment of the law in 1887 was the culmination of a long struggle extending over a period of nearly 14 years. The contest from the beginning was a contest for reasonable rates. The public was beguiled into the belief that the act of 1887 would insure reasonable rates. While it declared reasonable rates to be the only rates which a railroad company could lawfully charge, it provided no means whatever under which the commission created by the act could, in the public interest, ascertain the value of the property used by the railroads in carrying the commerce of the country. Without such valuation the commission were powerless to ascertain whether a rate was reasonable per se. All that it could do in any case was to compare the rate challenged with some existing rate maintained for a similar service. Hence the best that can be said for the enforcement of the law is that it has tended toward the equalization of rates. But it is clear that there may be a wide difference between reasonable rates and equal rates.

In the general revision of the interstate-commerce act in 1906 Congress refused to provide for the valuation of railway property. In 1910, when the third and last general revision of the interstate-commerce law occurred, the Congress again rejected a provision for the valuation of railway property.

The act to regulate commerce, therefore, stands to-day wholly lacking in any provision for this vitally important requirement.

No intelligent man needs the finding of courts or the recommendation of experts to inform him before purchasing a business of the imperative necessity of ascertaining the fair value of the property used in the business, the cost of operation, and the expense of maintaining the plant or property. But Congress, professing to provide for the enforcement of reasonable transportation rates, willfully disregarded the plain declarations of the Supreme Court and the repeated recommendations of the Interstate Commerce Commission and refused to provide for railway valuation, the only means by which reasonable rates might be ascertained.

As early as 1896 the Supreme Court of the United States had said:

The utmost that any corporation operating a public highway can rightfully demand * * * is such compensation for the use of its property as will be just both to it and to the public. * * *

If the corporation can not maintain such a highway and earn dividends for its stockholders, it is a misfortune for it and them which the Constitution does not require to be remedied by imposing unjust burdens upon the public. (164 U. S., 578.)

And in 1897 the court was even more explicit when it declared that—

If a railroad corporation has bonded its property for an amount that exceeds its fair value, or if its capitalization is largely fictitious, it may not impose upon the public the burden of such increased rates as may be required for the purpose of realizing profits upon such excessive valuation or fictitious capitalization.

We hold, however, that the basis of all calculation as to the reasonableness of rates to be charged by a corporation maintaining a highway under legislative sanction must be the fair value of the property being used by it for the convenience of the public. * * *

What the company is entitled to ask is a fair return upon the value of that which it employs for the public convenience. On the other hand, what the public is entitled to demand is that no more be exacted from it for the use of a public highway than the services rendered by it are reasonably worth.

Clearly, then, the reasonable rate is a fair return upon the value of the property which the railroad employs for the public convenience, and the valuation of railway property is imperatively required in the public interest.

In 1903 the Interstate Commerce Commission recommended legislation to enable it to secure a valuation of railroad property. It said:

Among the subjects which deserve the attention of Congress is the need of a trustworthy valuation of railway property.

After devoting several pages to a presentation of the reasons which make it imperative to secure this information, and the necessity of additional legislation to that end, the commission says further:

A large number of questions incident to the valuation of railroad properties suggest themselves in addition to those which have been mentioned. This report can not, however, enter into further detail. Sufficient has been said to indicate the importance of an authoritative determination of railway values. It is respectfully recommended that Congress take this matter under advisement with a view to such legislative action as may be deemed appropriate.

The commission says further:

To determine what are just and reasonable rates for public carriage is a Government function of the highest utility. This is the *central idea of regulation* and the *special field of its usefulness.*

Regarding the importance of ascertaining the value of railway property for the determination of reasonable rates, the commission says further in the same report:

No tribunal upon which the duty may be imposed, whether legislative, administrative, or judicial, can pass a satisfactory judgment upon the reasonableness of railway rates without taking into account the value of railway property.

In its report in 1907 the commission said:

Reference has been made in these reports to the importance of a physical valuation of railway properties. The considerations submitted in favor of such valuation need not be repeated at this time. It may, however, be proper to call attention to the fact that the introduction into operating expenses of a set of depreciation accounts brings preeminently into view an added necessity for an inventory of railway property.

The chief purpose of the depreciation of accounts is to protect the investor against the depletion of his property by an understatement of the cost of maintenance and to protect the public against the maintenance of unduly high rates by charging improvements to cost of transportation. These accounts, which serve so important a purpose, require for their proper and safe administration complete and accurate information relative to the value of the property to which they apply, and this information can only be secured by a formal appraisal embracing all classes of railway property.

In 1908 the commission said:

The commission has, in previous reports, expressed the opinion that it would be wise for Congress to make provision for a physical valuation of railway property, and desires to reaffirm in this report its confidence in the wisdom of such a measure. The change which has gradually taken place in the past few years, as well as the increased responsibilities imposed upon the commission by the amended act to regulate commerce, makes continually clearer the importance of an authoritative valuation of railway property made in a uniform manner for all carriers in all parts of the country.

There is a growing tendency on the part of carriers to meet attacks upon their rates by making proof, through their own experts and officials, of the value of or the cost of reproducing their physical proper-

ties. In what is known as the Spokane case, which is now under advisement by the commission and which involves the reasonableness of the general schedules of Spokane rates on the Great Northern and Northern Pacific, the defendants, apparently at the expense of much time and labor, compiled elaborate and detailed valuations and offered them in evidence before the commission in the defense of the rates of which complaint has been made. It is obviously impossible for shippers who are the complainants in such cases to meet and rebut such testimony, or even intelligently to cross-examine the railroad witnesses by whom such proof is made. In addition to the large expense of retaining experts competent to make such investigations, neither the shippers nor their experts and agents under existing statutes have any right of access to the property of carriers. The carriers, on the other hand, being in possession of the information or having access to the records and to the property from which the information may be compiled and gathered, can use it or not in any given case, as their interests may require. These considerations suggest the need of an official valuation of interstate carriers by the commission, or under other governmental authority, which may be available in rate contests not only to the shippers who make the complaints and to the carriers who must defend their rates, but also to the commission, by which such issues must be decided.

In its report for 1909 the commission again returns to the subject of valuation, which for years it has been endeavoring to force upon the attention of the committees of Congress having control of this subject of legislation. It says:

There is, in our opinion, urgent need of the physical valuation of the interstate railways of this country. In the so-called Spokane case the engineers of the Northern Pacific and Great Northern Railways estimated the cost of reproducing those properties in the spring of 1907. In the trial of pending suits brought by the above companies to enjoin certain rates upon lumber, which the commission had established from the Pacific coast to certain destinations, these same engineers have again estimated the cost of reproduction in 1909. The estimates of the latter year exceed the estimates of 1907 by over 25 per cent.

There is no way by which the Government can properly meet this testimony. Even assuming that the valuation of our railways would be of no assistance to this commission in establishing reasonable rates, it is still necessary, if those rates are to be successfully defended when attacked by the carriers, that some means be furnished by which, within reasonable limits, a value can be established which shall be binding upon the courts and the commission.

In 1911 the commission repeated its recommendations made in 1910, concluding its statement with the following:

The experiences of the commission during the past year in its efforts to enforce and administer the law, serve only to confirm the views expressed in our last, as well as in previous reports, in support of our recommendations for the valuation of railway property. This recommendation we respectfully renew.

In 1912 the commission again renewed its recommendation for physical valuation.

After all these years it is now proposed to authorize and direct the Interstate Commerce Commission to ascertain and report to Congress the value of the several classes of property of carriers engaged in interstate commerce.

Mr. President, the amendments proposed to the House bill simply make its purpose more definite and certain.

I think I may say, Mr. President, that the phraseology of the measure which passed the House is identical with the bill introduced by me seven years ago in the Senate of the United States, with the exception of two paragraphs which relate principally to the financial history of the railroads. That matter contained on pages 2 and 3 of the bill, being the portion stricken out, was added when the bill was introduced in the House. The bill which I offered in the Senate seven years ago was in the best form in which I could draft it at that time. We were just then starting in upon the work in my home State. Scarcely anything had been done in other States in the way of valuation of railroad property for rate-making purposes. But during the years that have intervened we have been gaining knowledge and experience, and the courts and the State commissions and the Interstate Commerce Commission have had forced upon their consideration the subject of railway valuation presented in a more or less crude and unscientific way.

I might say, in passing, that in this seven-year interval I have reintroduced the bill at the beginning of each Congress in the same form in which I first introduced it, my purpose being to keep the subject alive. I have tried to secure action upon it by the Senate Committee on Interstate Commerce and have missed no opportunity to force its consideration by the Senate whenever any measure was pending to which it would be germane as an amendment. Twice in that period I succeeded in getting a record vote upon the question. I have felt the educational value of keeping this important subject to the fore, but until the present session I have never addressed myself to the framing of a soundly economic measure, adjusted to meet the recent decisions and the progress made in the valuation of railroads by the different State commissions of the country.

When the bill came over from the House, with the other members of the subcommittee I undertook the recasting of the measure to report to the Senate Committee on Interstate Commerce.

As a result, the amendments which appear in the Senate print have been worked out. We have called to our assistance—and later they appeared before the full committee—men who have had much to do in a practical way with the valuation of the railroads in a number of the States, and these men have given us the benefit of their experience, their training, and their knowledge.

The work of valuing the railroads of this country must be done in the first instance by experts, and, necessarily, those experts will be guided in their labors by the specific directions given them in the text of the statute. As the value of their work will depend wholly upon its accuracy, it is vital that the terminology of this statute shall be economically exact.

In the five numbered paragraphs of section 19a as reported by the committee we have employed the precise terms necessary to secure the value of every element of the property owned or used by the common carrier for its purposes as a common carrier, which it is contended should be included in ascertaining the value of the property.

This bill does not prescribe the values that shall ultimately be assembled by the Interstate Commerce Commission in ascertaining the fair value as a basis for rate making, but it does direct the Interstate Commerce Commission to ascertain every element of value which, under the decisions of the courts—the courts are still in a transition period—is now being considered as properly included in ascertaining the fair value of the railroad property as a whole in fixing reasonable rates.

Mr. President, the committee recommends striking out the first five paragraphs of the House bill, which in some respects are indefinite and uncertain and deal with some matters not properly within the scope of a bill designed to provide for a valuation of the several classes of property of carriers subject to the act to regulate commerce. In lieu thereof the committee proposes certain amendments which it believes essential to enable the commission to secure every element of the value of the property of the common carrier so classified and analyzed as to enable the commission and the courts to determine the fair value of such property for rate-making purposes.

The courts from the first have used various terms descriptive of the values and elements of value to be determined as a basis for ascertaining the fair value of railway property. Some of these terms they have altogether rejected. Others have come to have an accepted meaning by commissions and courts and are recognized as covering all the elements of value attaching to the property of common carriers for rate-making purposes. When these values are once ascertained, each aids in correcting the other, and is given such weight as it is entitled to in enabling the commission and the court to arrive at the fair value of the property of the carrier used for its purposes as a common carrier. These terms accepted by recognized authority are: (1) The original cost to date; (2) cost of reproduction new; (3) cost of reproduction less depreciation; (4) other values and elements of value, that is, intangible values.

As amended by the Senate committee, the bill provides in the first subdivision of section 19–a for ascertaining these values.

(1) THE ORIGINAL COST TO DATE.

Existing railroads have actually been built up through a series of years. The construction has been piecemeal and has advanced with the growth of the business. The original cost to date will, at every stage of construction, take account of the prices paid at the time for property, material, and labor, the amount of money paid out for legal services, engineers, architects, designers, management in organizing the corporation, and constructing the road.

I digress just a moment to say, Mr. President, that in ascertaining the value of one of the public utilities of Wisconsin our commission carried its work over a period of 40 years. It found one case where there was manifestly a job perpetrated upon the public, where one contractor was allowed $3 a day for labor employed, when the going price of labor ascertained by the commission as prevailing at that time was $1.50 per day. They did not allow the $3, which was an imposition upon the public, but permitted only the actual value of the labor at that time to be charged up as a part of the capitalization of the road. That is what the tracing out of the original cost to date will mean on every one of these properties.

I can understand how the question will at once be raised in the minds of Senators as to the difficulty, particularly with respect to many of these older roads, of ascertaining these facts; and you will find the opinion expressed by theorists upon the subject that to do so is impossible. But we have had in Wisconsin—they have had in the State of Washington and in other States—an experience that contradicts these theories. It is possible to ascertain this original cost.

In the case of the gas plant in the city of Milwaukee, although the books did not furnish the figures, the cost of all the materials entering into the construction of that plant was determined as of the time. It simply requires industry and

thoroughness on the part of the commission charged with the responsibility. And in no other way can the public ever be informed of the exact amount actually invested by the carrier, excepting by establishing the original cost to date.

The original cost to date will also show the exact amount received from the sale of stocks and bonds and, if the bonds have been sold at a discount, the price realized and all the expenses of brokerage. It will show the amount paid in by stockholders. If stocks or bonds have been issued for property instead of cash, the value of the acquired property will be ascertained. If the present corporation has acquired the property or any portion thereof at less than its physical value, or through some form of manipulation or combination or deception to the public, with a view of strengthening its monopoly character and increasing its prospect for excessive value, or if its expenditures do not represent reasonable expenditures which ordinary business management would not have approved, all of these facts will be disclosed by ascertaining the original cost to date, and the matter will be dealt with by the court when it comes to pass upon that question. The Supreme Court has already in one notable case, the Stanislaus case, rejected excessive costs and manifestly extravagant expenditures made by the corporation, and denied their right to capitalize those extravagant and corrupt expenditures against the public. It will be for the commission and the courts to determine to what extent, if at all, such investments will be allowed to be capitalized as against the public for rate-making purposes. In short, the original cost to date will show the true investment.

As to the importance of obtaining the original cost to date, Mr. Henry L. Gray, engineer of the public service commission of the State of Washington, says:

This work (the ascertainment of the original cost to date) was of the maximum value, as it acquainted the engineers not only with the cost of the lines as a whole but also with the cost of many isolated structures, such as bridges, buildings, etc. It also informed them as to the overhead cost, such as engineering, legal and general expenses, and other kindred items. With this knowledge it was a comparatively easy matter to reduce the cost of the different classes of property to a unit basis, such as the cost of bridges per linear foot, the cost of buildings per square foot of floor area. Being in possession of the detailed cost of all the modern structures, a most desirable guide was available in fixing the cost of reproduction. Without the knowledge of these costs as obtained, it would have been utterly impossible to intelligently dispute the estimates later prepared by the railroads.

Clyde B. Aitchison, chairman of the Oregon commission, says:

Any rule based on reproduction value less depreciation which ignores the item of original cost, additions, and betterments is not only economically and legally unsound but is fraught with possibilities of greatest danger to the country.

Commissioner Maltbie, of the New York Public Service Commission, says:

I think altogether too much attention has been given to cost of reproduction and too little to investment—original cost to date. Where we can obtain the actual facts regarding the cost of the existing plant, we put much more emphasis upon these figures than upon estimates of engineers.

Prof. John R. Commons, of the University of Wisconsin, and at the present time a member of the Wisconsin Industrial Commission, speaking before the committee of the importance of ascertaining these three items of cost—(1) original cost to date, (2) cost of reproduction new, and (3) cost of reproduction less depreciation—says:

The court or commission must necessarily have these three items. It must have this engineering cost of reproduction; it must have the cost of the property less depreciation; and it must have its historical cost—original cost to date—in order to get a true, fair, or reasonable value. It may be that none of these three is reasonable, and it must check and compare in order to see where it is coming out. It could not properly make a mere arithmetical compromise or average between them, but it should work it out on principle. * * * In the original cost everything that is involved in the question of cost to the present owner is included and can not be avoided. It is included, however, under this condition, which the court carries through all of its reasoning on these questions, that that price or cost must have been reasonable. But if there has been fraud or misrepresentation or monopoly, unwarranted and unjust and unfair to the public, that must also be considered. If, on the other hand, the company has been in severe straits, has not been earning dividends, and therefore the purchase was a sacrifice sale or price or cost, that must be given due weight. In the treatment of those questions which have been more or less touched upon by the courts, the idea is to find what, under normal and reasonable condition, would have been paid at that time. And I think that is the reason for using the term "original cost" instead of "actual cost," for the real thing that is meant to be determined is the actual cost at the time of acquisition. But actual cost may be very different from reasonable cost. It may have to be an estimated cost if the books are lacking; that is, the probable cost at that time. Consequently, the term "original," I think, has come to be pretty well recognized by commissions, by engineers and accountants, as well as those cases which come up to the courts as a basis upon which to ascertain the actual cost. The term "original" is equivalent to "actual" as against the speculative or hypothetical.

Prof. Edward W. Bemis, late of the Chicago University and public-utility expert, who has had the widest practical experience in valuing public utilities, regarding the importance of obtaining the original cost to date, said:

That—the original cost to date—is recognized in the courts as one element to be considered. The Wisconsin commission recognizes it as important in its investigation of railroads as well as municipal utilities. The gas and electric light commission has recognized it in Massachusetts since its creation, and courts are recognizing it everywhere.

So much for the original cost to date.

(2) COST OF REPRODUCTION NEW.

This will show the exact cost of reconstructing the property in all its parts at existing prices.

There is a contention to-day by the owners of public utilities and by those representing all common carriers that "cost of reproduction new" is the true basis for the fixing of rates. I myself do not agree with that view. While this cost was once accepted—and the Supreme Court is still frequently quoted as in favor of cost of reproduction new as an element which must be considered in the fixing of rates—with every decision that comes from State courts or from the Supreme Court of the United States it becomes more and more a diminishing element in ascertaining the fair value which is to be used for rate-making purposes. But since there is still a contention that it is an element to be considered, and since there is recognition of it in the decisions of the Supreme Court, not yet eliminated, it is included in this bill.

Mr. POINDEXTER. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Wisconsin yield to the Senator from Washington?

Mr. LA FOLLETTE. I yield.

Mr. POINDEXTER. Does the bill provide for a separate ascertainment of the present value and the original value?

Mr. LA FOLLETTE. It provides for separate ascertainment——

Mr. POINDEXTER. Or rather a separate statement.

Mr. LA FOLLETTE. "Present value" is not a safe term to use without extended definition and qualification. The danger of employing it without limiting its application lies in its current use by engineers to mean the earning power of a public utility. And the earning power of a public utility is based upon existing rates. Values based upon existing rates aim to justify existing rates. Hence the very purpose of determining the present value would preclude any reduction in rates and lead to reasoning in a circle. The bill provides for separate ascertainment of original cost to date, the cost of reproduction new, and the cost of reproduction less depreciation. We simply get all these elements of value and label each one of them.

Mr. FLETCHER. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Wisconsin yield to the Senator from Florida?

Mr. LA FOLLETTE. I do.

Mr. FLETCHER. I inquire of the Senator if he thinks the bill sufficiently provides for a hearing before the final determination for all parties who are interested?

Mr. LA FOLLETTE. I will come to that later. Let me say to the Senator from Florida that I want to take up consecutively each one of the paragraphs of the bill.

Mr. SMITH of Georgia. That question arises out of an amendment contained later on in the bill.

Mr. LA FOLLETTE. Yes; and I will come to it in a very few moments.

As stated, Mr. President, the cost of reproduction new will show the exact cost of reconstructing the property in all its parts at existing prices. While this may be regarded as a classification of diminishing value, it is contended that it is entitled to consideration in ascertaining the value of the physical properties of the carrier, and that contention is recognized by some commissions and some courts. It is therefore included as a separate classification in the bill.

(3) THE COST OF REPRODUCTION LESS DEPRECIATION.

This will show the exact cost of reproduction in existing condition. This cost is arrived at by taking the amount of depreciation which has occurred in every part of the property since it was laid down or employed in the public service. This is an element of value so generally considered essential by commissions and courts that the wisdom of establishing it will not be questioned. That is, the commission will determine the cost of the railroad as it is to-day. Certain portions of the property are new and have just been put in; others are well worn. All those elements will be carefully scanned and their value taken account of, so that when this item of value is returned we will know what that property is worth as it stands to-day.

Mr. JOHNSTON of Alabama. Mr. President, will the Senator allow me to ask him if the right of way is to be included in that ascertainment?

Mr. LA FOLLETTE. That is taken care of in this bill separately from other matters. I will come to it a little later.

(4) OTHER VALUES AND OTHER ELEMENTS OF VALUE—THAT IS, INTANGIBLE VALUES.

There is contention as to what intangible or whether, in fact, any intangible values should be included by a commission or rate-making body in assembling the values to be made the basis of the fair value upon which rates shall be fixed. The claim is made in behalf of public utilities that going value, good will, and franchise value should all be ascertained and capitalized. Going value is the cost of developing the business organization of a common carrier after the physical property has been completed. After you have constructed the road, put on the rolling stock, and are ready to begin operating, an expenditure of money is required in establishing the business before the common carrier begins to pay reasonably fair returns on the capital invested. The amount so expended measures the going value. If there is an intangible value that can be rightfully incorporated in the values to be considered in the making of fair rates, it is this one of going value. It is ascertainable. Where they have kept their books honestly and fairly the books will show the exact expenditures.

When you come to the next intangible value, good will, my own opinion is that it is an intangible element which should not be included or considered by the commission in determining the fair value of a common carrier as a basis for rate making. Good will is an expenditure made to take business away from a competitor. Good will implies the existence of competitors furnishing the same product and selling it in the same market. The customers of a common carrier have no freedom of choice, because the common carrier is a natural monopoly and the public has no option of dealing with it in case they are dissatisfied. They are bound to use the common carrier even though it earns their ill will instead of their good will.

Mr. OVERMAN. May I ask the Senator a question?

The PRESIDENT pro tempore. Does the Senator from Wisconsin yield to the Senator from North Carolina?

Mr. LA FOLLETTE. Certainly.

Mr. OVERMAN. A railroad company may place a mortgage of a million dollars on its property, and then a second mortgage. The books will show that first mortgage and that the company received a million dollars; they will also show the second mortgage and the receipt of another million—when we all know that these millions did not go into building that road. How will that be ascertained? The books show that they have spent the money.

Mr. LA FOLLETTE. We have provided in this bill for a most accurate, complete, and careful return of every dollar received and expended by the common carrier engaged in interstate commerce.

Mr. OVERMAN. They will ascertain, then, where that money went?

Mr. LA FOLLETTE. They will not only ascertain what became of the money received upon mortgages, but we have provided in this bill for a strictly accurate accounting of all moneys received by the common carrier from whatever source, and a like accounting for all moneys expended by the corporation for whatever purposes.

Mr. BRISTOW. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Wisconsin yield to the Senator from Kansas?

Mr. BRISTOW. If the Senator prefers to go on and finish, I will not interrupt him. I have a question which I should like to ask him now, or I can wait, as will best suit his convenience.

Mr. LA FOLLETTE. Just as the Senator likes.

Mr. BRISTOW. In speaking of the cost of reproduction new as an element of value and of the value as a going concern, the cost of reproduction new would include the value as a going concern, would it not?

Mr. LA FOLLETTE. Not at all. The cost of reproduction new is the cost of reproducing the property entire at present prices. The value of the property as a going concern is that additional expenditure required in developing the business after the physical property has been completely assembled.

Mr. BRISTOW. But the cost of reproduction new must include the interest on the money that has been used during the period of construction. Now, to illustrate——

Mr. LA FOLLETTE. In ascertaining the cost of reproduction new there is no actual construction. It is a theoretical value determined from the estimate of engineers, based on reproducing the property at present prices of labor and material. That is all it is. It does not take into account anything else. Of course, in getting the value of the actual construction of a road the interest on any capital lying idle under reasonably good business management would have to be taken into account as a proper expenditure, but this element of value does not appear in getting the "cost of reproduction new." It is an item of value which would be taken account of in determining the "original cost to date."

Mr. BRISTOW. My understanding has been—the Senator has a great deal more information on this subject than I have—that when a railroad in a suit has undertaken to show the present value, or the cost of reproduction, it has always added an item of capital used pending the period of construction; and in a case in which the Northern Pacific Railway Co. was concerned——

Mr. LA FOLLETTE. Proving the value of a property by the methods described by the Senator from Kansas would be the blending of "reproduction new" and "original cost to date," the common carrier availing itself of such elements in the two as would contribute to show the highest possible values of the property as a whole. In this bill we have provided for completely separating these two values.

Mr. BRISTOW. That is the very point.

Mr. LA FOLLETTE. That is, the method suggested by the Senator combines "original cost to date" with "reproduction new." I could see how that would be a very attractive proposition to a railroad corporation. We are now in an era of high prices. In 1897 we were in an era of low prices. Much of the property of existing roads, much of the materials that entered into their construction, were bought at that time. If all the material that was bought at low prices can be charged up at existing high prices, and then, in addition, the capital which an examination of their books shows was lying idle at the time of actual construction, they might so combine the elements of those two classes of valuation greatly to their advantage. But they will not be permitted to do that under this bill. The several valuations will be analyzed; they will be classified; a cleavage will run through between those two elements of cost, and they will not be permitted to include in "reproduction new" any of these items that will appear in "original cost to date."

Mr. BRISTOW. If the Senator will just permit me a suggestion, if the railroad should be permitted to submit the original cost to date as the original cost, and then should take in another element, the cost of reproduction, and then another element, that of good will, and merge those three elements of cost into one, the Senator can readily see that there would be a great deal of duplication of cost in the ultimate result.

Mr. LA FOLLETTE. Mr. President, the fact that these different items of cost are to be obtained by the commission does not mean that they are to be added together, as Prof. Commons says in the matter from which I have just read, nor does it mean that they are all to be added together and averaged, but it means that they are all to be secured for the enlightenment of the commission and the courts. This bill does not undertake to direct the commission as to what relative weight should be given the several valuations they are authorized to make. I do not believe that Congress is prepared to solve that problem. I doubt if any body of men in this country is at this moment prepared to finally settle all of the complex questions involved. And therefore I think it would be a mistake to attempt to set the boundaries and fix the limitations absolutely by statute at this time. As I have said, the decisions of the courts are undergoing modification. There was a time when they declared that stocks and bonds should be taken into account. That position has been abandoned and is no longer contended for even by the carriers.

I have no doubt, I will say to the Senator from Kansas, that elements are being weighed to-day by the courts which ultimately will be eliminated, when the principles are finally settled and determined, upon which the rates of the common carriers of this country will be based.

Mr. BRISTOW. One more question, if the Senator will permit me, in regard to the first section of the bill. Of course I am in thorough accord with the views expressed by the Senator. What I want is to have the values ascertained in the details, so that we can tell what costs should be taken into consideration in fixing the value.

To illustrate, the Baltimore & Ohio Railroad, from Cincinnati to St. Louis, was formerly known as the Ohio & Mississippi. It has been reconstructed in recent years, since it became a part of the Baltimore & Ohio, the tracks have been rebuilt, and a large section of the original road has been abandoned. It is no longer used; the rails have been taken up. From my point of view the cost of the construction of that original road, which has been abandoned, should be no more taken into account in the fixing of the value of that railroad than the cost of an engine that has been abandoned. It is a part of dead property. I want the valuation to be so taken that it will not be, as far as Congress is concerned, an expression of opinion or view in any way that the cost of that track, from the beginning down to the

present time, should be taken into consideration in fixing its value.

Mr. LA FOLLETTE. I will say to my friend from Kansas that every item of expenditure will appear in "original cost to date," and I think it is proper that it should, because it is right for the public to know just how much money has been invested in the property of the common carrier; and it is further right that it should be known just how much of that has been invested by the common carrier itself and how much by the public. The "original cost to date," together with the financial history of all the transactions of the common carrier provided for later in the bill, will give to the public that information.

But to conclude as to these intangible values. The elements of value which will finally constitute fair value for rate-making purposes are steadily narrowing. They are not expanding. No decision by commission or court will stand which is ultimately found to be unfair to the public or to the common carrier.

The third subdivision of section 19-a requires the commission to ascertain and report separately the property held by railroads for purposes other than those of a common carrier. This subdivision and likewise the fifth, which relates to grants and donations and aids and all that, will furnish information that in some aspects will be useful to the commission and to which from every point of view the public is rightfully entitled.

Now I come to the paragraph to which the Senator from Alabama directed my attention.

The fourth subdivision of section 19-a relates to the financial history of the common carrier, and covers all transactions material to the ultimate purpose for which this bill is enacted. It reads as follows:

Fourth. In ascertaining the original cost to date of the property of such common carrier the commission, in addition to such other elements as it may deem necessary, shall investigate and report upon the history and organization of the present and of any previous corporation operating such property; upon any increases or decreases of stocks, bonds, or other securities, in any reorganization; upon moneys received by any such corporation by reason of any issues of stocks, bonds, or other securities; upon the syndicating, banking, and other financial arrangements under which such issues were made and the expense thereof; and upon the net and gross earnings of such corporations; and shall also ascertain and report in such detail as may be determined by the commission upon the expenditure of all moneys and the purposes for which the same were expended.

The terms of this fourth subdivision are plain and do not require to be defined. When the commission has complied with its requirements and reported to Congress, we shall be advised of all the financial operations of every common carrier. Whenever there has been a juggling of the stock and bond operations of a common carrier, with a rake-off to insiders, all of the facts will be laid bare. An important element of this provision is that requiring the commission to report upon the expenditures of all moneys received by the carrier and the purposes for which the same were expended.

The president of the Pennsylvania Co. testified in the Advance Rate cases decided in 1911 that since 1887, when the interstate-commerce act went into effect, his company had expended on the Pennsylvania Railroad lines east of Pittsburgh $262,000,000 from earnings. During all of this time this company has collected in rates from the public enough to maintain its property, meet operating expenses, pay handsome dividends on all its stock, and besides has exacted enough more from the public to accumulate an enormous surplus. Out of that surplus the Pennsylvania Co. has expended a sum equal to nearly two-thirds of the total cost of the construction of the 2,123 miles owned by the company. That surplus, I believe, is wrongfully taken from the public, and I believe that ultimately common carriers will not be allowed to capitalize it against the public.

In discussion of the subject on another occasion before the Senate I presented a table showing that 31 railroads had within a period of five years paid for permanent construction out of surplus profits exacted from the public amounting to more than $350,000,000. Thus out of surplus they make extensive improvements and investments for which they should contribute new capital. Then they capitalize these investments and improvements, wrongfully accumulated out of the profits on excessive rates, and in turn make this the basis for charging still higher rates. It is high time that this whole subject should be carefully investigated. The public has a right to know exactly how much has been invested in railroad property, and it likewise has a right to know how much of this investment was contributed by the owners of the roads and how much by the public.

The railroad corporations engaged in interstate commerce have not been and are not now regulated as to reasonable rates, for you can not ascertain what a reasonable rate is until you know the value of the property employed in the business; and after 26 years we are now about to ascertain the value of that property and establish a standard for fixing reasonable rates, if we pass this bill. But during all the time that has intervened for 26 years the carriers have gone on exacting from the public what they chose, taking enough to pay operating expenses and to meet maintenance. That was proper. In addition they have taken enough to pay interest and dividends—and that was right, provided they were not paying interest and dividends on fictitious capitalization.

And then, besides that, they have taken from the public hundreds upon hundreds of millions and put it into surplus, using that surplus to construct new lines, to build great and expensive and palatial terminals all over this country. Then they have capitalized those new lines and those terminals, assessing the public for the money which the public has put into the business.

Mr. President, I do not believe that is going to be permitted in the end. We are just approaching this big question. This bill does not attempt to settle the issue involved in the capitalization of surplus expended in permanent improvements and in construction.

The amendments in the succeeding paragraphs of the bill relate to procedure and are designed to make the original purposes of those paragraphs more definite and certain of administration. Under the terms of the House bill whenever the commission completes the valuation of the property of any common carrier it is required to give notice and grant a hearing thereon to such carrier, with a view of making any necessary corrections before such valuation becomes final. The Senate committee amendment designates such completed valuation as "tentative" for the time being, and provides that notice shall be given not only to the common carrier but also to the Attorney General of the United States, the governor of any State in which the property so valued is located, and to such additional parties as the commission may prescribe.

That will give the commission an opportunity to send notice of valuation to boards of trade and shippers' associations in the territory covered by the valuation, so everyone who is interested can appear and be heard. The Attorney General would represent in a broad way all the public, and any governor can direct the attorney general of any State through which the lines run to protest against or be heard in favor of the valuation.

If no protest is filed, the valuation becomes final—that is, final to the extent that it is prima facie evidence whenever a rate case arises. Upon protest being made, the commission, after hearing all the testimony, may correct the tentative value if found to be erroneous in the light of all the evidence presented. Then that becomes the final value and prima facie evidence of the fair value of the property of the common carrier in issue.

After the final value shall have been thus established, in any proceeding to fix rates under the interstate-commerce act this final value may be assailed before the commission by the carrier or by any interested party for the public or any association of shippers.

In the event that an appeal is taken from the order of the commission fixing rates and such appeal involves the final value of the property of the carrier as fixed by the commission and upon the trial evidence shall be introduced regarding such value, which is found by the court to be different from that offered upon the hearing before the commission, or additional thereto, the court, before proceeding to render judgment, shall transmit a copy of such evidence to the commission and shall stay further proceedings in said action for such time as the court shall determine from the date of such transmission. Upon the receipt of such evidence the commission shall consider the same and may fix a final value different from the one fixed in the first instance, and may alter, amend, or rescind any order which it has made involving said final value, and shall report its action thereon to said court within the time fixed by the court. If the commission shall alter, modify, or amend its order, such altered, modified, or amended order shall take the place of the original order complained of and judgment shall be rendered thereon, as though made by the commission in the first instance. If the original order shall not be rescinded or changed by the commission, judgment shall be rendered upon such original order. The purpose of this provision is——

Mr. CRAWFORD. To prevent delay.

Mr. LA FOLLETTE. Yes; solely to prevent delay.

Mr. SMITH of Georgia. That is an order as to final value.

Mr. LA FOLLETTE. The order referred to is the order which the commission entered in the proceedings to fix rates. It is assumed that the rates would be related to the value of the property of the carrier. If the carrier or any party interested for the public on the hearing of the appeal before the court, offers new and material evidence as to the value of the prop-

erty, evidence which might, for example, cause the rates fixed by the commission to be held by the court to make the rates fixed in the order of the commission confiscatory, or, on the other hand, so high as to be unjust to the public, the commission should have the opportunity to consider this new evidence as to the value of the property and modify its order if, in the judgment of the commission, it ought to be modified. And this provision of the bill is for the purpose of preventing the delay incident to having the case tried out—even to the court of last resort, it might be—on evidence as to the value of the property different from that heard by the commission when it passed upon the proceedings in the first instance.

Mr. President, out of 32 cases tried by the commission which were appealed to the Supreme Court up to 1906—when I went over the records very carefully at the time the Hepburn bill was pending here—26 of the 32 cases were reversed, because the railway companies withheld important testimony upon the hearing before the commission, offering it instead when the case was heard on appeal before the court.

Mr. SMITH of Georgia. I will ask the Senator if he does contemplate in some other provision or some other statute a direction that if the commission modifies the estimate of final value it shall also have the opportunity to pass upon the question as to whether it is necessary to modify the directions with reference to rates.

Mr. LA FOLLETTE. This very amendment covers that specifically and exactly. I will say to the Senator from Georgia that the order which is modified, provided they find the testimony material, is the order which fixes the rate. You see, they make no finding with regard to valuation in that hearing. It is the rate case that they are trying, and the order of the commission has to do with rates, and there is no separate finding on the value. But the value is weighed in determining the rate. If the court receives new testimony as to value, it is required to transmit this new evidence to the commission, and—

Upon the receipt of such evidence the commission shall consider the same and may fix a final value different from the one fixed in the first instance, and may alter, modify, amend, or rescind any order which it has made involving said final value.

That is, the order which it has made in the rate case involving the value.

Mr. CRAWFORD. It is really a rate-making order.

Mr. LA FOLLETTE. It is a rate-making order—

And shall report its action thereon to said court within the time fixed by the court.

Mr. SMITH of South Carolina. I should like to ask if the general object of the bill in fixing the physical valuation of railroads in this country has not for its ultimate purpose the equitable adjustment of rates in every case.

Mr. LA FOLLETTE. Certainly.

Mr. SMITH of South Carolina. I was misled by the question of the Senator from Georgia.

Mr. LA FOLLETTE. It has to do with the value as affecting the rates. That is the purpose of this amendment.

Mr. SMITH of Georgia. I understand, of course, that that is true, but what was troubling me is the language on page 11, which seemed to limit the modified order by the commission to a modification of their estimate of final value. I was afraid the language might be construed to limit their action to the estimate of the final value and not extend to a modification of their order with reference to the rate.

Mr. LA FOLLETTE. The word "order" is used throughout that amendment as applying solely to the rate. The words "final value" are used as applying to the value of the railroad property.

Mr. SMITH of Georgia. If the Senator will allow me to read three or four lines——

Mr. LA FOLLETTE. Certainly.

Mr. SMITH of Georgia (reading)—

Upon the receipt of such evidence the commission shall consider the same—

That is, new evidence as to value—

and may fix a final value different from the one fixed in the first instance, and may alter, modify, amend, or rescind any order which it has made involving said final value.

Mr. LA FOLLETTE. You see, the order as to rates involves the value.

Mr. SMITH of Georgia. Should not that be "based upon the final value" rather than "involving final value"? Might not that language be construed to mean that the order itself was simply one fixing the value?

Mr. LA FOLLETTE. I do not think so.

Mr. SMITH of Georgia. I was afraid the language might be construed to limit the modified order.

Mr. CUMMINS. May I suggest that if the Senator will read the next clause he will find that it is perfectly clear?

Mr. SMITH of Georgia (reading)—

If the commission shall alter, modify, or amend its order, such altered, modified, or amended order shall take the place of the original order complained of and judgment shall be rendered thereon, as though made by the commission in the first instance.

I suppose, then, that means the order complained of before the court would be the order fixing the rate.

Mr. LA FOLLETTE. Fixing the rate.

Mr. SMITH of Georgia. Therefore, this language should be construed to reach the order fixing the rates.

Mr. LA FOLLETTE. It would be so construed by the courts, I have no doubt.

Now, Mr. President, just one thing more and I am done. I neglected to call attention to one other amendment, which provides for ascertaining:

In detail and separately from improvements, the original cost of all lands, rights of way, and terminals owned or used for the purposes of a common carrier, and ascertained as of the time of dedication to public use, and the present value of the same, and separately the original and present cost of condemnation and damages or of purchase in excess of such original cost or present value.

This requires the commission to ascertain the original cost of the land which the railroad company has acquired for its purposes as a common carrier and also the present value of such land. It will ascertain this original cost and present value separately for improvements. The primary purpose in establishing these values separately I shall state very frankly. It is to put into the possession of the commission and upon record the data which will enable us ultimately to try out the question and determine the right of the railroads to capitalize the unearned increment.

I do not propose to argue that issue now. It will be contested upon both sides with all the vigor which its great importance demands. The land for rights of way, stations, yards, terminals, and the like, much of which was acquired through the exercise of the power of eminent domain, has, because of the improvement of adjoining property, increased in value enormously. In the meantime the public has made it profitable for the railroads to hold and use this property. The railroads were not given the power of eminent domain by the State to enable it to speculate in real-estate values, but solely to take the land for a public use.

Whatever may be the tendency in some of the decisions at present, the everlasting right will prevail in the end. It may take many years. The courts may fortify error with error, but justice will finally prevail. This important provision opens the way, as do others in this bill, to secure ultimate justice for the public.

This bill, then, as it is proposed to be amended, provides in specific terms for ascertaining the values of the property of the common carriers engaged in interstate commerce. By its terms these values will be so classified and analyzed as to admit of raising every question material to fair valuation between the carrier and the public.

When completed the work of the commission will show just how much the common carrier has invested, and it will also show just how much of the total amount invested was contributed by the public; it will show the value of the unearned increment on lands, rights of way, and terminals; it will show how much surplus has been invested in extensions, permanent improvements, and betterments. Upon this showing the right of the carrier to capitalize unearned increment and surplus so invested can be tried out and determined. Whether Congress has power by legislation to exercise a control and fix limitations regarding these matters is reserved for future consideration and action.

Mr. POMERENE. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Wisconsin yield to the Senator from Ohio?

Mr. LA FOLLETTE. Certainly.

Mr. POMERENE. Before the Senator takes his seat I wish to call his attention to page 10 of the bill, where it is provided that—

If upon the trial of any action involving a final value fixed by the commission evidence shall be introduced regarding such value which is found by the court to be different from that offered upon the hearing before the commission, or additional thereto, the court, before proceeding to render judgment, shall transmit a copy of such evidence to the commission.

And so forth.

From a literal reading of this it would seem that if there was the slightest additional evidence——

Mr. LA FOLLETTE. I think there should be——

Mr. POMERENE. I was going to suggest, on page 11, line 1, after the word "thereto," to insert "and substantially affecting said value."

Mr. LA FOLLETTE. I remember there was a discussion in the committee as to whether the word "material" should be

used, and I think that the committee assented to it. Through some slip we did not get it down on the copy brought in.

Mr. POMERENE. I shall at the proper time ask that that amendment——

Mr. LA FOLLETTE. What is the language?

Mr. POMERENE. I propose to offer as an amendment, on page 11, line 1, after the word "thereto," to insert "and substantially affecting said value."

The PRESIDENT pro tempore. Another amendment is now before the Senate.

Mr. LA FOLLETTE. I believe that is so, Mr. President.

Mr. BRISTOW. Mr. President, I rise to speak more with a view of securing the opinion of members of the committee as to what the phraseology of the bills means than anything else, because I believe I am in perfect harmony with the views as expressed by the Senator from Wisconsin as to what values ought to be considered.

In answer to a question which I asked the Senator from Wisconsin as to the meaning of the term "the original cost to date" he indicated that that was a term used to apply to the expenditures that had been made in detail from the beginning of the construction of the road down to the present date. If all the elements of such cost will be set forth so that we may know how much was expended for a track that has been abandoned and no longer used and how much has been expended for a new track that has been built for the purpose of economizing operations, that is entirely satisfactory to me. What I wanted to know was whether the original cost to date would require the commission to set forth these various elements of cost in detail.

Mr. LA FOLLETTE. The Senator will notice in line 20 they are required to report in detail, and they are also required to analyze their costs. I will say to him that wherever there has been an ascertainment of the original cost to date, in so far as I know anything about it, they have gone into every item, and their cost sheets show everything of that sort. The trouble with attempting to enumerate what they shall do, to fix a limitation, is that if you say that they shall make statements about improvements under that they probably would not be required to go into detail about anything else except improvements. There are many items of the original cost that would not be covered by improvements, and I think there would be a danger in making any attempt to list and specify there unless you are certain that you were covering every single item of expenditure.

Mr. BRISTOW. There is one point I wanted to bring out in regard to that feature of the bill that requires the commission to ascertain the cost of production new. Such a finding, in my opinion, is not of any great value, so far as the rate making is concerned. It is a vacillating quantity; it does not represent in any sense the investment of the company in the construction of the road. To illustrate: In a suit that was pending the estimated cost of the reproduction of the Northern Pacific Railroad was involved. I am informed the same engineer reported in 1907 and in 1909 as to the cost of reproduction new, and the value fixed in 1909 was $185,000,000 more than the same engineer fixed the value of reproduction new in 1907.

Mr. LA FOLLETTE. That is a difference of 25 per cent.

Mr. BRISTOW. It is a difference of 25 per cent in two years as to the cost of reproducing new the railroad. That did not have anything to do with the investment which had been made in this property, and it seems to me that it is not a very material element of value to be considered in rate making.

There was another item that was taken into consideration at the same time by this engineer.

Mr. LA FOLLETTE. If the Senator will permit me, there was evidently just the employment of the engineer's imagination in that case, and the Interstate Commerce Commission was utterly helpless and powerless, and so they appealed to Congress, as they have done for the last 9 or 10 years, to give them authority to ascertain the value of the properties of the railroad company, in order that they might meet just such testimony as that. But let me say to the Senator on that question, that the Supreme Court of the United States has listed that as one of the values to be considered, and it has not yet by any express declaration eliminated it as a value to be ignored. So it seemed to the committee that we ought to give it its place here. I will, however, say to the Senator that I am confident that the views of all the advanced commissions of the country that are doing this valuation work are that there should be a very inconsiderable weight given to reproduction new.

Mr. BRISTOW. Now, in considering reproduction new, the engineer considers the time which it would take to build the road. I will illustrate by the Santa Fe Railroad. It would require to construct the Santa Fe Railroad, as it now exists, probably 10 years, perhaps longer than that. I have been advised that the engineers, in estimating the cost of reproducing new, take into consideration the value of the capital used during the period of time that construction was going on, and, of course, they give no credit to the earnings which the road would have made during its reconstruction. So in that respect the charge is made as to the cost of reproducing new, while the earnings that the property made during the course of its growth is not taken into consideration.

Mr. LA FOLLETTE. If the Senator will permit me, I will say that I have here a very recent volume, Valuation of Public-Service Corporations, that gives all of the decisions up to the end of 1912, and I do not know but that it gives some of the decisions later than that; it is just out. I will say to the Senator that it is perfectly apparent that substantially all of the commissions of the country are making the valuation of reproduction new a negligible quantity. I do not believe that the Senator needs to feel any apprehension about the Interstate Commerce Commission giving undue weight to that element. That was incorporated in the bill because it was felt that it would save contention, since it can be asserted that there is the authority of the court for it.

Mr. BRISTOW. Continuing the statement as to the estimate of cost of the Northern Pacific Railroad, I will say that this element of interest which I have referred to that was counted in by the engineer in the 1907 valuation on the property—that is, the interest on the money that was used in the road's construction during the period of time necessary to construct it—was $22,677,000, while in the valuation of 1909, two years later, the item of interest aggregated $164,000,000. This was an estimate on the same property by the same engineer. He was simply estimating the cost of reproduction at different periods of the same railroad.

Another item was the estimate of local organization and expense during this imaginary construction of the road. In 1907 this figure was fixed at $3,736,000, while in 1909 it was estimated at $12,136,000. I simply incorporate these figures into my remarks to show that, in my opinion, the question of reproduction is not a very substantial or certain element of value to take into consideration.

What I regard as the most important phase of the bill, however, is that which relates to the unearned increment. The Pennsylvania Railroad Co., to illustrate, has of course very valuable terminals in the cities of Washington, Baltimore, Philadelphia, and New York. It would be practically impossible to construct a railroad from Washington to Boston now and get desirable terminal facilities in the great cities between here and there. There is not enough money available for such purpose. Those railroads that now exist which have terminal facilities in those cities secured them at a time when it did not require a great investment, comparatively speaking. They had the right to use certain lands for this specific purpose. I do not believe that the increase in the value of that land due to the growth of population is an element of value which any railroad company is entitled to use in rate making.

The unearned-increment value of that property is due to the increase of population and the growth of the business of the cities. The franchise—that is, the right to use that real estate—if capitalized at the amount that it would now cost to secure such real estate, would amount to mortgaging to the corporation the commercial development of the country. I do not believe that the increased value of the right of way or any element of unearned increment should be taken into consideration in dealing with the value of the property of these carriers, so far as rate making is concerned.

I am anxious to have the opinion of the Senator from Wisconsin and the other Senators on the subcommittee, who have given this subject very great thought, as to whether the language on page 10, taken in connection with that which precedes it, would recognize the principle that the carriers have a right to capitalize unearned increment or to charge rates upon a value based in any degree upon unearned increment.

I read from line 10, page 10, of the bill:

> All final valuations by the commission and the classification thereof shall be published, and shall be prima facie evidence of the value of the property in all proceedings under the act to regulate commerce as of the date of the fixing thereof—

And so forth.

Since we provide in the bill for ascertaining the value of the unearned increment, does the language I have read on page 10 authorize such value to be taken into consideration as prima facie evidence of the value of the property? Does the Senator understand the question?

Mr. LA FOLLETTE. I think I understand the Senator. The provision is:

> All final valuations by the commission and the classification thereof shall be published, and shall be prima facie evidence of the value of the property in all proceedings under the act to regulate commerce as of the date of the fixing thereof.

Of course it has to be construed with everything that precedes and that follows it in the bill.

Mr. BRISTOW. Does that recognize——

Mr. LA FOLLETTE. I do not think it recognizes any particular value; it simply provides that they shall all be ascertained——

Mr. BRISTOW. We provide that this unearned increment shall be ascertained——

Mr. LA FOLLETTE. That they shall become tentative values until this hearing is had.

Mr. BRISTOW. This is a final valuation. The language is:

All final valuations by the commission and the classification thereof shall be published, and shall be prima facie evidence of the value—

Mr. LA FOLLETTE. This valuation is simply prima facie evidence of the value, and when the case is heard upon a question of rates before the court those values are all subject to attack both by the public and by the railroad company.

Mr. BRISTOW. Does that clause or phrase require the commission or the court to take into consideration the value of the unearned increment as an element in fixing a rate?

Mr. LA FOLLETTE. It certainly does not.

Mr. BRISTOW. That is the question that has bothered me.

Mr. NELSON. Mr. President, will the Senator allow me?

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the Senator from Minnesota?

Mr. BRISTOW. Certainly.

Mr. NELSON. On the very point the Senator from Kansas suggests, I desire to say that the State of Minnesota and other States were defeated under the decision of Judge Sanborn on the valuation theory based upon increment and increase in value. For instance, in that case the railroad company went on to show that to get the right of way now would cost them a hundred dollars an acre, whereas when it was secured a few years ago, to my knowledge, they paid only from five to ten dollars an acre. Then they went on in the same case to show the value of their terminals in the Twin Cities, which they had originally secured for a merely nominal sum, but owing to the growth of the cities and to the fact that they had become great railroad centers the terminals had increased in value more than a thousand per cent. The railroad company put that increased valuation into the case, both as to the right of way and as to the terminals, and then, on the basis of that, the court said that it was not getting income enough. So it was that basis of physical valuation used by the court in that case that beat us in the court below, the circuit court of appeals; and if we are beaten in the Supreme Court it will be because of that very thing.

Mr. CUMMINS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the Senator from Iowa?

Mr. BRISTOW. I do.

Mr. CUMMINS. I think possibly there is a little misapprehension here about the bill. It seems to me that the Senator from Kansas does not look at it from the proper point of view. The Congress of the United States can not declare the standard of values by which the property of any railroad company can be measured, nor the value of any other property. That is purely a judicial question, and it finally will be settled by the courts. Congress or its instrumentality, the Interstate Commerce Commission, fixes the rates of the railroads. The railroad company attacks the rate. It attacks it because the legislature, or the commission exercising legislative functions, has invaded its constitutional rights; that is, has taken its property without due process of law or has taken it without just compensation. That is the basis of all the appeals or proceedings which the railroads bring in the courts in order to annul or set aside an order of the commission. When such a case comes to the court it is for the court to say, and the court will say in every instance, what the evidence shows in regard to the value of the property used by the common carrier.

Mr. NELSON. Right there may I ask a question?

Mr. CUMMINS. Here we are simply attempting to furnish the people of the country the evidence from all the various standpoints, which they can not furnish themselves because of the vastness of the undertaking.

Mr. NELSON. I wanted just to put one very brief question to the Senator to see if I am correct. Is not the finding of the Interstate Commerce Commission upon the facts in a rate case, if there is evidence to support it, binding upon the court?

Mr. CUMMINS. It is.

Mr. NELSON. And the court can not overrule it or retry it?

Mr. CUMMINS. That, however, is only upon the issue; but if the commission should find the Pennsylvania Railroad, for instance, was worth only $10, that would not be binding in any court. Of course, the Senator from Minnesota will agree with me about that.

Mr. NELSON. Of course, if there is no evidence to support it.

Mr. CUMMINS. But when the case reaches the court the complainant has the right to introduce testimony regarding the value of the property that has been devoted to the public use and concerning which the rate is fixed. There is nothing that can prevent—nor do I believe there is anything that can prevent—the exercise of that right on the part of the common carrier.

This bill, however, is to furnish both the common carrier and the shipper, or the State, or whoever may be the adversary, prima facie evidence with regard to the value of the property that has been devoted to the public use and to control and to regulate which the rate attacked has been made.

Mr. NELSON. Mr. President, will the Senator allow me, in connection with his remarks, to make a statement?

Mr. CUMMINS. Certainly.

Mr. NELSON. The one thing that I had difficulty with in this bill—most of it is good, and I approve of it—is that part of the bill from line 21, on page 10, down to line 18, on page 11. That seems to contemplate, if I understand the language, that the court is to retry the facts found by the Interstate Commerce Commission. Let me read that:

If upon the trial of any action involving a final value fixed by the commission—

That may be in a rate case—

evidence shall be introduced regarding such value which is found by the court to be different from that offered upon the hearing before the commission, or additional thereto, the court, before proceeding to render judgment, shall transmit a copy of such evidence to the commission, and shall stay further proceedings in said action for such time as the judgment, shall transmit a copy of such evidence to the commission, court shall determine from the date of such transmission—

And so forth.

That clearly contemplates that there must be a retrial before the court upon the facts. I do not understand that to be the existing law. I understand the existing law to be that the Interstate Commerce Commission passes upon the question of fact as to whether or not a rate is reasonable, and its finding, if it is supported by evidence, binds the court above.

Mr. CUMMINS. That, however, does not include the question of value. That is seen by a reference to the very case to which the Senator from Minnesota has just referred, where the Northern Pacific road——

Mr. LA FOLLETTE and Mr. OWEN addressed the Chair.

The PRESIDENT pro tempore. The Chair is unable to determine who is entitled to the floor. Does the Senator from Kansas yield to the Senator from Iowa?

Mr. BRISTOW. I yield to the Senator from Iowa.

Mr. CUMMINS. I will surrender the floor until I can take it in my own right, then. I wished to answer the question of the Senator from Kansas, but I will withhold my answer.

Mr. BRISTOW. I am anxious to have the question answered.

Mr. OWEN. Mr. President——

The PRESIDENT pro tempore. The Chair simply desires to suggest that for the orderly transaction of business it is necessary that the Chair should be addressed, and Senators should get permission to interrupt. There were five Senators on the floor at the time the Chair made the suggestion.

Mr. CUMMINS. Mr. President, I hope I have not incurred the censure of the Chair.

The PRESIDENT pro tempore. Not at all.

Mr. CUMMINS. I did address the Chair; I did secure the consent of the Senator from Kansas to answer. I was therefore a little surprised to have it suggested that I was improperly occupying the floor.

The PRESIDENT pro tempore. The Chair owes the Senator an apology, then, if that is the fact. The Chair overlooked that.

Mr. BRISTOW. The Senator, however, had not arrived at the real, vital part of his answer to the question I asked. It is the important question in the bill to me. I am very firmly of the opinion that a railroad company has no right to charge the public with rates that will enable it to earn a return on the unearned-increment value of its right of way and its terminals; but I want the lawyers who have had charge of the framing of the bill to construe the language, as to whether or not the lines that I refer to, on page 10, beginning with the words "All final valuations," and so forth, do recognize the fact, and make prima facie evidence as a part of the value this element of value known as unearned increment.

Mr. OWEN. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the Senator from Oklahoma?

Mr. BRISTOW. I do.

Mr. OWEN. Mr. President, the words "prima facie" in line 12 necessarily exclude finality. It is only prima facie as to the fact. The fact itself may be disputed; but the principle to

which the Senator very properly refers would not appear in this finding.

The facts having been ascertained prima facie, the facts themselves being subject to correction, then the principle of whether or not the unearned increment could be capitalized and the public charged with interest upon the unearned increment is a principle to be determined by the court upon debate. Facts, merely, are ascertained; and even the facts are not ascertained with complete finality, but merely prima facie.

The Senator from Minnesota points out that the statement that—

If, upon the trial of any action involving a final value—

The value fixed by the commission—

evidence shall be introduced regarding such value which is found by the court to be different from that offered upon the hearing before the commission, or additional thereto—

it shall send it back for ascertainment of the fact before the court proceeds—is only a declaration that this finding of fact upon certain evidence submitted shall not be final, but may be again sent back if those concerned offer additional evidence which was not before the commission. The purpose of that section is to prevent a trick of discrediting those who find the facts by submitting to those charged with the finding of the facts incomplete evidence which afterwards is more completely submitted to the court, and the court, finding that additional evidence or materially different evidence is submitted to the court from that which was originally submitted to the commission, simply sends it back, as a court would send a case back to a commissioner to further ascertain the fact upon new evidence.

That answers the question of the Senator from Minnesota. I have already answered the question submitted by the Senator from Kansas.

Mr. THOMAS. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the Senator from Colorado?

Mr. BRISTOW. I do.

Mr. THOMAS. I understood the Senator from Kansas to say, and I quite agree with him, that this unearned increment should not be the subject of capitalization. I want to inquire whether the Senator thinks it should be assessed against the companies for taxation.

Mr. BRISTOW. I think not, of course. I do not think a value that can not be used as a basis of earning power should be used as a basis of taxation.

Mr. THOMAS. I think it is so assessed generally all over the country and taxes collected upon it.

Mr. CLAPP and Mr. OLIVER addressed the Chair.

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the Senator from Minnesota, who first addressed the Chair?

Mr. BRISTOW. I do.

Mr. CLAPP. I wanted to say this: I do not think the Senator from Kansas exactly grasps the force of these provisions. I agree with the Senator from Kansas that the unearned increment should not be the basis; but suppose the court, when it comes to pass on the question, should regard it otherwise? The theory of this bill is that the Government shall ascertain these various values in these various ways, to the end that the court, if it rejects one basis or adopts another, has the figures before it, instead of simply reversing the order and requiring those decisions to be litigated de novo. That is the theory and the principle upon which the bill is framed; not that it is conclusive upon anybody, for it is for the courts to say which of these various bases it will take in the last analysis.

Mr. OLIVER. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Kansas yield to the Senator from Pennsylvania?

Mr. BRISTOW. I do.

Mr. OLIVER. I should like to ask the Senator from Kansas and the Senator from Iowa, who, I understand, is about to speak, as to the probable time they will occupy in discussing this bill. I think if it is likely that great time will be consumed we should take a recess and come back here this evening.

Mr. BRISTOW. I will say, so far as I am concerned, that I am through. All I wanted was an expression, in regard to the construction of the language I have read here, from the Senator from Wisconsin [Mr. LA FOLLETTE], who is in charge of the bill, and from the Senator from Iowa [Mr. CUMMINS], who is a member of the subcommittee. I have great confidence in their judgment, and, knowing that their purposes and mine are exactly the same in regard to this valuation, I will yield the apprehensions that I have as to the construction of this language to their judgment, supplemented, as it is, by that of the Senator from Oklahoma and the Senator from Minnesota, in whose judgment I also have great confidence. I am for this bill if it does not recognize or fortify the theory that carriers have a right to capitalize or earn returns on unearned increment or a value that cost them nothing to secure. If it did recognize such a right, I would not support it; but having been assured by the authors of the bill that no such right is recognized by the language used, I will vote for the measure.

Mr. POINDEXTER. Mr. President, I was going to put what I had to say in the form of a question to the Senator from Kansas, but I only want to call attention to a possible construction of this language which I think is the danger that the Senator from Kansas has in mind.

Of course I know that the view of the framers of the bill is that it does not undertake to say what value or what class of values shall be used as a basis for fixing rates. It leaves that entirely undetermined, and the Senator from Kansas is apprehensive that this language will be construed to have the effect of a legislative declaration that the unearned increment shall be included.

Congress has a right to do that. That would not be any confiscation of the property of the carrier. It would be increasing the valuation upon which rates must be based. Congress, under the decision of the courts, has not the power to put the valuation so low as to amount to a confiscation of property. But there could be no constitutional objection raised to a legislative act declaring that the unearned increment shall be included in the valuation, because that would be within the purview of Congress in fixing public policy. Congress has power to fix railroad rates, and out of that power grows power to fix the basis upon which rates shall be determined.

There is this possible construction of the act: The language to which the Senator from Kansas has called attention is:

All final valuations by the commission—

That includes this valuation, among others, which includes the unearned increment—

All final valuations by the commission and the classification thereof shall be published and shall be prima facie evidence of the value of the property in all proceedings under the act to regulate commerce as of the date of the fixing thereof, and in all judicial proceedings for the enforcement of the act approved February 4, 1887.

One of the judicial proceedings for the enforcement of that act would be a judicial proceeding to determine whether or not a rate fixed by the Interstate Commerce Commission was a reasonable rate or a lawful rate. Here is an act which says that in that action—

All final valuations by the commission * * * shall be prima facie evidence of the value of the property.

And there is danger that some court would come along and construe that language as being a declaration of Congress that the valuation, including the unearned increment, shall be taken as a basis of fixing the rate. It could be easily removed from the realm of doubt by the insertion of a few words negativing that possible construction.

Mr. CUMMINS. Mr. President, I do not quite agree with the Senator from Washington with regard to the competency of Congress to say the unearned increment shall not be considered as a part of the value of railway property. However, that is not material to this discussion.

Mr. POINDEXTER. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Iowa yield to the Senator from Washington?

Mr. CUMMINS. I do.

Mr. POINDEXTER. The Senator, I think, misapprehended what I said. What I said, or intended to say, was just the opposite. I did not say Congress probably has not the right to say that the unearned increment shall not be considered. What I said was that Congress has the right to say that it should be considered, which is quite a different proposition.

Mr. CUMMINS. I have a little doubt about that also, Mr. President. However, neither is material to this discussion.

It seems to me, as I tried to say before, that the purpose of the bill is a little bit misapprehended. This bill is intended to authorize the Interstate Commerce Commission to send out its appraisers, its experts, and secure almost all the information that is conceivable with regard to the value of railway property. When all this information is collected, then the commission hears the case and decides what is the fair value of the railroad property.

Undoubtedly the information sought here, among other things, includes the unearned increment, or the increased value of lands, lots, and terminals of the railway company. But no court has hitherto said that the unearned increment ought not to be and must not be considered as a part of the value of the railway property. Personally, I do not believe it should be considered. I have another standard in my mind, namely, the value for the purposes of a common carrier rather than the

value as determined by the use to which adjacent property may be put.

However that may be, this bill recognizes what the courts have already declared may be elements in the value of railway property. All the knowledge that can be secured is gathered and laid before the commission. Then the railroads are called, the public is called, and they try out the question before the commission as to the value of any particular railway property.

Mr. NELSON. Will the Senator yield to me?

Mr. CUMMINS. Certainly.

Mr. NELSON. The difficulty with me about the bill is in the following language:

If, upon the trial of any action involving a final value fixed by the commission, evidence shall be introduced regarding such value which is found by the court to be different from that offered upon the hearing before the commission, etc.

I will not read the entire paragraph. Does that contemplate that this final ex parte valuation to be made by the commission is finally to be revised by the court? Is it ultimately to be a court valuation?

Mr. CUMMINS. The Senator is thinking of one thing and I am talking about another. When the suit is brought before the court in a proceeding to attack, annul, and set aside the order of the commission——

Mr. NELSON. In a rate case.

Mr. CUMMINS. Then the finding which the commission has made with regard to the value of the railway property, if that becomes material, is prima facie evidence of the value of that property.

Mr. NELSON. But this contemplates, if you read the paragraph through——

Mr. CUMMINS. Just allow me. The railroad company need not introduce it. It can go on and introduce any evidence it pleases with regard to the value of the property of the company. The final finding of the commission in this proceeding is prima facie evidence in that suit.

Mr. NELSON. I understand that.

Mr. CUMMINS. But it is not conclusive. Either party can introduce additional testimony.

Mr. NELSON. In that case pending?

Mr. CUMMINS. Yes.

Mr. NELSON. Before the commission?

Mr. CUMMINS. Before the court.

Mr. NELSON. In a rate case retried before the court?

Mr. CUMMINS. Certainly.

Mr. NELSON. On the facts?

Mr. CUMMINS. Certainly.

Mr. NELSON. I suppose the finding of the commission on the facts——

Mr. CUMMINS. The commission does not make any finding of the value of the property. The commission sees whether any rate is a fair and reasonable rate. The railroad says "That is not true; it is not a fair and reasonable rate; it confiscates our property. Therefore we bring a suit to enjoin the commission from putting the rate into force." Thereupon it proceeds to prove the value of the property, and that it rendered the service for which it makes the charge. The Senator from Minnesota does not say that the common carrier can not in such a suit as that prove the value of the property which renders the service which has been regulated by the commission. I am sure he will not assert that.

Mr. NELSON. What I mean is this: Does this refer to an actual trial, an actual rate case, or does it refer simply to a case concerning the valuation fixed by the commission?

Mr. CUMMINS. It refers to an actual rate case.

Mr. NELSON. Let me read the language here:

If upon the trial of any action involving a final value fixed by the commission, evidence shall be introduced regarding such value which is found by the court to be different from that offered upon the hearing before the commission, or additional thereto, the court, before proceeding to render judgment shall transmit a copy of such evidence to the commission——

Mr. CUMMINS. No; not judgment on the value of the property, judgment upon the order which has been entered by the commission regulating a rate or fixing a rate.

Mr. NELSON (reading)—

the court before proceeding to render judgment shall transmit a copy of such evidence to the commission and shall stay further proceedings in said action for such time as the court shall determine from the date of such transmission.

In other words, if the court concludes that the Interstate Commerce Commission has not found the facts properly they are to be retried in the court, and then the court is to transmit it to the Interstate Commerce Commission.

Mr. LA FOLLETTE. Oh, no, no.

Mr. ROOT. Mr. President——

The PRESIDENT pro tempore. Does the Senator from Iowa yield to the Senator from New York?

Mr. CUMMINS. Certainly.

Mr. NELSON. I want an understanding on that question.

Mr. ROOT. I wish to make a suggestion to the Senator from Minnesota. There may now be an issue raised upon which a question of value will be a relevant fact. The Interstate Commerce Commission has made an order fixing the rates, and the railway company comes into court asserting that those rates are confiscatory. Upon that issue the question of value is a relevant and material fact, is it not?

Under the provision the Senator from Minnesota has adverted to it seems to me that that question of value is not made material and relevant under any circumstances in which it is not now material and relevant. It does not broaden the jurisdiction of the court to consider that question of value at all. It merely relates to the evidence of value in the cases where the court now can consider it and where they will then consider it. It merely puts into the trial of the question of value where it can now be tried and will then be tried new prima facie evidence supplied by the determination of the commission. It does not permit the court to retry that case or to review the decision of the commission under any other circumstances than they can do it now.

Mr. NELSON. Let me call the Senator's attention to this language:

The court, before proceeding to render judgment, shall transmit a copy of such evidence to the commission, and shall stay further proceedings in said action for such time as the court shall determine from the date of such transmission. Upon the receipt of such evidence—

Not the evidence taken before the commission, the evidence taken in court—

the commission shall consider the same and may fix a final value different from the one fixed in the first instance

In other words, instead of acting on their own volition and in their own manner, the court takes evidence and sends it to them, and upon that evidence taken in court they have the liberty of changing the judgment they formed in the first instance.

Mr. CUMMINS. They have.

Mr. NELSON. Is not that a retrial of the case upon the facts in the language of the bill? Does not that take the legislative function we have transferred to the Interstate Commerce Commission upon the question of fact? Does it not indirectly transfer it to the courts?

Mr. CUMMINS. I think not, Mr. President. I think that is intended simply to enable the commission to change the order with respect to the rate that it has already made. If evidence with regard to value is developed in the court that has not been developed before the commission in its general work, and it has made an order fixing a rate upon a value which it finds to be wrong, then it is given the opportunity to change the order which is being attacked in the court, as may be required by the additional or different evidence with regard to the value of the property. I do not think that it changes in the least degree the relation of the commission to the court. It simply furnishes, as I said in the beginning, evidence either for the railway company or for the public with regard to the value of the property that is devoted to public use—evidence that, of course, is not conclusive, and, in my opinion, it would not be competent for us to make it conclusive.

Mr. NELSON. But the Senator will concede that it changes the procedure which now prevails.

Mr. CUMMINS. I do not think it does at all; that is, if the Senator means the substance of the procedure. The railway company that complains of the action of the commission must still bring suit in a court of competent jurisdiction to annul the order of the commission. When it has brought the suit and made the issue it may take the work of the commission that is here provided for and introduce it as prima facie evidence of the value of the property, or the Government can take the work of the commission and introduce it as prima facie evidence of the value of the property. That is the only respect in which the relation has been changed.

Mr. NELSON. Let me call attention here to the final language of this paragraph.

If the original order shall not be rescinded or changed by the commission, judgment shall be rendered upon such original order.

Mr. CUMMINS. Certainly.

Mr. NELSON. Now, what does this contemplate? It contemplates that after the Interstate Commerce Commission has made a finding and issued an order the other party goes into court, evidence is taken in the court, and that evidence is to be sent back to the Interstate Commerce Commission, so that they can revise and change their judgment in the first instance. I do not understand that any such practice prevails under the law now. I have never heard of that. Has the Senator heard of it?

Mr. CUMMINS. It can not, except so far as the rehearing is concerned. The commission has a perfect right to rehear

any case that may be before it, or that it may have decided, and enter another and a different order. Of course there is no provision in the law now for sending back the additional evidence with regard to value, because we have no provision in the law now for securing the proof of value.

Mr. NELSON. Does it not amount to this, to talk plainly? The Interstate Commerce Commission has a hearing, takes the evidence, fixes the rate. The railroad company go into court to attack that, introduce more evidence, and then, after they have introduced more evidence, the court is to stay the case, send that evidence back to the Interstate Commerce Commission, and the poor commission is at liberty to revise its hearings. But this provision states that if they see fit not to do so, they can adhere to their original judgment.

Mr. CUMMINS. That is all right.

Mr. NELSON. Then why should we take this evidence in the court and send it back to the commission?

Mr. CUMMINS. I do not understand the Senator from Minnesota. He does not seem to me to have the same conception of the procedure that I have. I can not quite gather his objection to it. I thought he started out with the idea that it broadens the review of the court over the action of the commission. Now he seems to object to it because it increases the labor of the commission.

Mr. NELSON. No; I do not. I object to it because it injects a new mode of trial before the Interstate Commerce Commission, and it makes a double trial. After the railroads go into court and evidence is taken in the case different from that before the Interstate Commerce Commission, the case is to be stayed and the evidence is to be sent back to the commissioners, and they are to mulch over it again. Here is the language:

If the commission shall alter, modify, or amend its order, such altered, modified, or amended order shall take the place of the original order complained of and judgment shall be rendered thereon, as though made by the commission in the first instance.

Now listen to this language:

If the original order shall not be rescinded or changed by the commission, judgment shall be rendered upon such original order.

Let me call attention to the decision of the Supreme Court recently, at the present term, in the case of the Interstate Commerce Commission and the United States, appellant, against The Louisville & Nashville Railroad Co.:

On the appeal here the Government insisted that while the act of 1887 to regulate commerce (24 Stat., 379, secs. 14, 15, 16) made the orders of the commission only prima facie correct, a different result followed from the provision in the Hepburn Act of 1906 (34 Stat., 584, sec. 15), that rates should be set aside if after a hearing the "commission shall be of the opinion that the charge was unreasonable." In such case it insisted that the order based on such opinion is conclusive and (though Interstate Commerce Commission *v.* Union Pacific Railroad, 222 U. S., 547, was to the contrary) could not be set aside, even if the finding was wholly without substantial evidence to support it.

1. But the statute gave the right to a full hearing, and that conferred the privilege of introducing testimony, and at the same time imposed the duty of deciding in accordance with the facts proved.

In this case the court held that the Interstate Commerce Commission could not, on its own knowledge, on its own records, decide the case; that there must be a hearing and evidence be taken in the case before they could render any decision.

Mr. CUMMINS. The view of the Senator from Minnesota does not seem to me to be a sound one. I have already stated my understanding of that paragraph and my general opinion of the bill. While I am inflexibly opposed to capitalizing what is known as unearned increment, I am not opposed to securing from a governmental tribunal a judgment as to the real value of the railroad property, and if our Government tribunal includes unearned increment, we must submit unless there is a legislative escape, and I do not believe there is.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the committee as reported.

The amendment was agreed to.

The next amendment of the Committee on Interstate Commerce was, on page 7, line 1, before the word "commission," to strike out "The" and insert "Except as herein otherwise provided, the"; in line 7, after the word "and," to insert "separately"; and in line 9, after the words "District of Columbia," to insert "classified and in detail as herein required," so as to make the paragraph read:

Except as herein otherwise provided, the commission shall have power to prescribe the method of procedure to be followed in the conduct of the investigation, the form in which the results of the valuation shall be submitted, and the classification of the elements that constitute the ascertained value, and such investigation shall show the value of the property of every common carrier as a whole and separately, the value of its property in each of the several States and Territories and the District of Columbia, classified and in detail as herein required.

The amendment was agreed to.

The next amendment was, on page 8, line 8, after the word "law," to insert "Unless otherwise ordered by the commission, with the reasons therefor, the records and data of the commission shall be open to the inspection and examination of the public," so as to make the paragraph read:

Every common carrier subject to the provisions of this act shall furnish to the commission or its agents from time to time and as the commission may require maps, profiles, contracts, reports of engineers, and any other documents, records, and papers, or copies of any or all of the same, in aid of such investigation and determination of the value of the property of said common carrier, and shall grant to all agents of the commission free access to its right of way, its property, and its accounts, records, and memoranda whenever and wherever requested by any such duly authorized agent, and every common carrier is hereby directed and required to cooperate with and aid the commission in the work of the valuation of its property in such further particulars and to such extent as the commission may require and direct, and all rules and regulations made by the commission for the purpose of administering the provisions of this section and section 20 of this act shall have the full force and effect of law. Unless otherwise ordered by the commission, with the reasons therefor, the records and data of the commission shall be open to the inspection and examination of the public.

The amendment was agreed to.

The next amendment was, on page 8, line 17, after the word "time," where it occurs the second time, to strike out "as may be required for the proper regulation of such common carriers under the provisions of this act"; in line 19, after the word "its," to strike out "valuation of property" and insert "valuations"; in line 20, after the word "correction," to insert "classified and"; in line 21, after the word "and," where it occurs the first time, to insert "separately"; and, in line 22, after the word "which," to insert "valuations, both original and corrected, shall be tentative valuations and," so as to make the paragraph read:

Upon the completion of the valuation herein provided for the commission shall thereafter in like manner keep itself informed of all extensions and improvements or other changes in the condition and value of the property of all common carriers, and shall ascertain the value thereof, and shall from time to time revise and correct its valuations, showing such revision and correction classified and as a whole and separately in each of the several States and Territories and the District of Columbia, which valuations, both original and corrected, shall be tentative valuations and shall be reported to Congress at the beginning of each regular session.

The amendment was agreed to.

The next amendment was, on page 9, line 2, after the words "in its," to strike out "valuation" and insert "valuations of each class of property"; and in line 4, after the word "shall," to strike out "report currently to the commission, and as the commission may require, all improvements and changes in its property, and file with the commission copies of all contracts for such improvements and changes at the time the same are executed" and insert "make such reports and furnish such information as the commission may require," so as to make the paragraph read:

To enable the commission to make such changes and corrections in its valuations of each class of property, every common carrier subject to the provisions of this act shall make such reports and furnish such information as the commission may require.

The amendment was agreed to.

The next amendment was, on page 9, line 11, before the word "valuation," to insert "tentative"; in the same line, after the word "carrier," to insert "as herein directed"; in line 12, before the word "valuation," to strike out "said" and insert "such"; in line 14, after the word "carrier," to strike out "stating" and insert "the Attorney General of the United States, the governor of any State in which the property so valued is located, and to such additional parties as the commission may prescribe, stating"; in line 19, after the word "allow," to strike out "the carrier"; and in line 22, after the word "final," to insert "as of the date thereof," so as to make the paragraph read:

Whenever the commission shall have completed the tentative valuation of the property of any common carrier, as herein directed, and before such valuaton shall become final, the commission shall give notice by registered letter to the said carrier, the Attorney General of the United States, the governor of any State in which the property so valued is located, and to such additional parties as the commission may prescribe, stating the valuation placed upon the several classes of property of said carrier, and shall allow 30 days in which to file a protest of the same with the commission. If no protest is filed within 30 days, said valuation shall become final as of the date thereof.

The amendment was agreed to.

The next amendment was, on page 9, line 23, after the word "filed," to strike out "by any common carrier"; on page 10, line 3, after the word "presented," to strike out "by such common carrier"; in line 4, after the words "port of," to strike out "its" and insert "any such"; in line 5, after the word "such," to insert "tentative"; in line 7, after the word "valuation," to strike out "is incorrect" and insert "should not become final"; in line 9, after the word "corrected," to insert "tentative"; in the same line, after the word "final," to insert "as of the date thereof"; in line 12, after the word "evidence," to strike out "relative to" and insert "of"; and in line 13, after the word "under," to strike out "this act" and insert "the act to regulate commerce as of the date of the fixing

thereof, and in all judicial proceedings for the enforcement of the act approved February 4, 1887, commonly known as 'the act to regulate commerce,' and the various acts amendatory thereof, and in all judicial proceedings brought to enjoin, set aside, annul, or suspend, in whole or in part, any order of the Interstate Commerce Commission," so as to read:

If notice of protest is filed, the commission shall fix a time for hearing the same, and shall proceed as promptly as may be to hear and consider any matter relative and material thereto which may be presented in support of any such protest so filed as aforesaid. If after hearing any protest of such tentative valuation under the provisions of this act the commission shall be of the opinion that its valuation should not become final, it shall make such changes as may be necessary, and shall issue an order making such corrected tentative valuation final as of the date thereof. All final valuations by the commission and the classification thereof shall be published and shall be prima facie evidence of the value of the property in all proceedings under the act to regulate commerce as of the date of the fixing thereof, and in all judicial proceedings for the enforcement of the act approved February 4, 1887, commonly known as "the act to regulate commerce," and the various acts amendatory thereof, and in all judicial proceedings brought to enjoin, set aside, annul, or suspend, in whole or in part, any order of the Interstate Commerce Commission.

The amendment was agreed to.

The next amendment was, on page 10, after line 21, to insert:

If upon the trial of any action involving a final value fixed by the commission, evidence shall be introduced regarding such value which is found by the court to be different from that offered upon the hearing before the commission, or additional thereto, the court, before proceeding to render judgment shall transmit a copy of such evidence to the commission, and shall stay further proceedings in said action for such time as the court shall determine from the date of such transmission. Upon the receipt of such evidence the commission shall consider the same and may fix a final value different from the one fixed in the first instance, and may alter, modify, amend, or rescind any order which it has made involving said final value, and shall report its action thereon to said court within the time fixed by the court. If the commission shall alter, modify, or amend its order, such altered, modified, or amended order shall take the place of the original order complained of and judgment shall be rendered thereon, as though made by the commission in the first instance. If the original order shall not be rescinded or changed by the commission, judgment shall be rendered upon such original order.

The amendment was agreed to.

The next amendment was, on page 12, line 1, after the word "in," to strike out "this act" and insert "section 16 of the act to regulate commerce," so as to read:

The provisions of this section shall apply to receivers of carriers and operating trustees. In case of failure or refusal on the part of any carrier, receiver, or trustee to comply herewith, such carrier, receiver, or trustee shall forfeit to the United States the sum of $500 for each such offense and for each and every day of the continuance of such offense, such forfeitures to be recoverable in the same manner as other forfeitures provided for in section 16 of the act to regulate commerce.

The amendment was agreed to.

The bill was reported to the Senate as amended, and the amendments were concurred in.

Mr. NEWLANDS. Mr. President, I regard with great gratification the almost unanimous report of the Committee on Interstate Commerce upon this railroad-valuation bill. As a member of that committee I have for years favored such legislation and have frequently introduced resolutions relating to a legislative program and providing for such valuation. So far as I have been individually concerned I have been disposed to submit the task of ascertaining that valuation and the principles which should control it to the Interstate Commerce Commission itself, feeling assured that they would avail themselves of the services of economists and competent experts, and would present in their report every element of value upon which a court would be called upon to act.

The Senator from Wisconsin [Mr. LA FOLLETTE], with that great care and precision with which he always moves in matters relating to economic legislation, has insisted that we should in the bill itself present the principles of valuation and define and secure the ascertainment of the different elements of value, every element of value, which could possibly be considered by a court in determining the question of fair valuation, and this bill I think is very accurately framed along that line.

The testimony and aid of valuable experts—Prof. Bemis and Prof. Commons, of the University of Wisconsin—have been utilized in this work. I think that this bill is a piece of legislation that can be regarded as fairly perfect. I believe that it will serve a great purpose and that it will practically end in the future the contentions that have been going on between the railroads and the public. I believe that the system of regulation which we inaugurated over 20 years ago regarding railroads, if pursued with reference to the trusts, would by this time have practically settled the trust question as we have settled the railroad question.

The creation of a great regulating commission, acting as the servant of Congress upon these important public questions affecting the regulation of interstate commerce, would have resulted most satisfactorily in the adjustment of the trust question; and I hope that the legislation we have perfected, legislation which we have gradually introduced regarding the railroad question, will be introduced regarding the control of the great trust organizations of the country.

I regard with great satisfaction the outcome of the labors of the committee, and view it as a most satisfactory step in a fair solution of the relations between the public and the railways.

Mr. POMERENE. On page 11, line 1, after the word "thereto," I move to amend by inserting the words "and substantially affecting said value."

The PRESIDENT pro tempore. The amendment proposed by the Senator from Ohio will be stated.

The SECRETARY. On page 11, line 1, after the word "thereto," it is proposed to insert the words "and substantially affecting said value."

The amendment was agreed to.

Mr. GRONNA. Mr. President, I had intended to make a few observations on some of the provisions of the bill; but I am anxious to have it pass this evening. I have the utmost confidence in the members of the committee. I know that the Senator from Wisconsin [Mr. LA FOLLETTE] has given this question a great deal of study; that he has made it a part of his life work. So I shall not detain the Senate or delay the passage of the bill by further remarks at this time. I shall vote for it.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

The title was amended so as to read, "An act to amend an act entitled 'An act to regulate commerce,' approved February 4, 1887, and all acts amendatory thereof by providing for a valuation of the several classes of property of carriers subject thereto and securing information concerning their stocks, bonds, and other securities."

ISSUANCE OF INTERLOCUTORY INJUNCTIONS.

Mr. ROOT. From the Committee on the Judiciary I report back favorably with amendments the bill (S. 8439) restricting the issuance of interlocutory injunctions to suspend the enforcement of the statute of a State or of an order made by an administrative board or commission created by and acting under the statute of a State, and I submit a report (No. 1309) thereon. I call the attention of the Senator from South Dakota [Mr. CRAWFORD] to the bill.

Mr. NELSON. I ask unanimous consent for the present consideration of the bill.

The PRESIDENT pro tempore. The Senator from Minnesota asks unanimous consent for the present consideration of the bill.

Mr. NELSON. It is a very short bill and will take but a moment.

The PRESIDENT pro tempore. The bill will be read for the information of the Senate.

The Secretary proceeded to read the bill, which had been reported from the Committee on the Judiciary with an amendment to strike out all after the enacting clause and to insert a substitute.

Mr. WILLIAMS. Mr. President, we have been here ever since 10 o'clock this morning and it is now half past seven. I move that the Senate adjourn; and if the Senate does not adjourn I shall ask for a quorum.

Mr. GAMBLE. Mr. President——

The PRESIDENT pro tempore. The Senator from Mississippi moves that the Senate adjourn.

The motion was agreed to; and (at 7 o'clock and 30 minutes p. m.) the Senate adjourned until to-morrow, Tuesday, February 25, 1913, at 10 o'clock a. m.

HOUSE OF REPRESENTATIVES.

MONDAY, *February 24, 1913.*

The House met at 10.30 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O God our Father, our life, our salvation; whose favor follows the faithful to uphold, sustain, and guide them in every good work. May we be faithful in the work Thou hast given us to do that we may reach the highest and best results and thus add somewhat to the progress of the world, and Thine be the praise through Jesus Christ our Lord. Amen.

The Journal of the proceedings of yesterday, Sunday, February 23, 1913, was read and approved.

DISTRICT OF COLUMBIA BUSINESS.

The SPEAKER. To-day is District day under the rule, and the Chair recognizes the gentleman from Kentucky [Mr. JOHNSON].

REVOKING LICENSES OF HOTEL PROPRIETORS AND OTHERS.

Mr. JOHNSON of Kentucky. Mr. Speaker, I call up House joint resolution 398, authorizing the Commissioners of the District of Columbia to revoke licenses under certain conditions, which I send to the desk and ask to have read.

The Clerk read as follows:

Resolved, etc., That the Commissioners of the District of Columbia are hereby authorized to revoke the license of any merchant, storekeeper, hotel proprietor, hack or taxicab owner, or persons, firm, or corporation engaged in business in the District of Columbia under the terms of license regulations of the District of Columbia, as duly promulgated and enforced by the Commissioners of the District of Columbia under authority conferred upon them by Congress, who shall increase the price or prices charged for his wares or services, as the case may be, on the occasion of any holiday or event the observance or celebration of which shall have the effect of causing an unusual number of persons other than residents of the District of Columbia, to visit the city of Washington for the purpose of participating in or observing such holiday or event.

SEC. 2. That in the case of hotels or restaurants or other businesses which maintain regularly in their establishments printed tariffs or schedules of prices, a schedule or tariff of charges higher than the usual rates that may be found in use in such places on such holidays or special occasions shall constitute prima facie evidence that such prices were increased.

SEC. 3. That in all other cases it shall require the sworn testimony of not less than three adult persons to constitute evidence sufficient for the revocation of license.

SEC. 4. That any citizen of the United States may make complaint under authority granted by this resolution, such complaints to be made in the police courts of the District of Columbia, and that conviction therein shall constitute basis for the revocation of license by the commissioners.

The SPEAKER. The Clerk will report the committee amendments.

The Clerk reported the following committee amendments:

Page 1, line 4, after the word "hereby," strike out the word "authorized" and insert the words "directed and empowered."

Line 6, after the word "owner," insert the words "or driver."

Page 2, line 1, after the word "shall," strike out the word "increase" and insert "advance."

Line 2, after the word "his," insert the words "rents, accommodations."

Line 5, strike out the words "an unusual number of persons" and insert the word "person."

The foregoing amendments were severally agreed to.

Mr. JOHNSON of Kentucky. Mr. Speaker, I also move to amend, in line 5, by inserting the word "any" before the word "person."

The SPEAKER. The question is on the amendment to the amendment.

The amendment to the amendment was agreed to.

The Clerk read as follows:

Page 2, line 6, after the word "residents," insert the words "a resident."

Lines 7 and 8, strike out the words "city of Washington for the purpose of participating or observing" and insert the words "District of Columbia on account of."

Line 11, after the word "which," insert the word "usually," and after the word "maintain" strike out the word "regularly."

Line 12, strike out the word "establishments" and insert the words "places of business," and after the word "printed" insert the words "or written."

Line 13, strike out the word "higher" and insert the word "greater."

Line 14, after the word "the," insert the word "prior," and after the word "rates" strike out the words "that may be found."

The foregoing amendments were severally agreed to.

The Clerk read as follows:

Strike out all of section 3.

The SPEAKER. The question is on agreeing to the amendments.

Mr. MANN. Mr. Speaker, this joint resolution apparently is intended to authorize the Commissioners of the District of Columbia to revoke the license of a storekeeper, hotel proprietor, driver of a cab, and so forth, who raises prices during the inaugural festivities or during any other festive or holiday or mournful occasion. This section which it is proposed to strike out makes provision for the method of calling attention to the District Commissioners of evidence upon which a revocation of license may be based, as follows:

That in all other cases it shall require the sworn testimony of not less than three adult persons to constitute evidence sufficient for the revocation of license.

The committee in reporting the resolution had recommended that that section be stricken out, and later on provide for a penalty for the violation of any provision hereafter. The next section left in the resolution provides that any citizen of the United States may make complaint under authority granted by the resolution, such complaint to be made in the police court of the District of Columbia, and that conviction therein shall constitute the basis for the revocation of the license. If the resolution is intended to be serious, it ought to be considered seriously, but if it is intended as a joke it ought to provoke mirth. There is no method of getting into the police court. There is no prohibition in the resolution against anything—there is nothing to violate. It does no prohibit anybody from raising prices. It merely provides that in case prices are raised the District Commissioners may revoke the license. The only method of enforcing that is to file the complaint in the police court, and on conviction in the police court the license can be revoked. Conviction of what? There is no prohibition in the bill. There is nothing prohibited in the bill if it passes. You can not take a case into the police court to enforce something unless there is a prohibition. Unless Congress declares that something is prohibited, there is no way of convicting anybody.

Another amendment to the resolution further provides that for any violation of any provision hereafter there shall be a fine not exceeding $25 for the offense, and that anyone aggrieved may board at the hotel as long as the matter is pending. But the only direction to anybody is to the District Commissioners. The only persons who can violate the law, if it is a law, are the District Commissioners for not revoking the license; and under the provisions of this resolution, if the hotel keeper raises his prices and the District Commissioners refuse to revoke the license, they might be subjected to fine, but meanwhile, pending the proceedings, the aggrieved person would live at the hotel free. It seems to me that if the resolution is to amount to anything section 3 ought not to be stricken out. There ought to be a method of presenting the matter to the commissioners, because with section 3 out there is no way of getting the matter before the commissioners except by conviction in the court, and there is nothing on which to convict anyone in the court.

The SPEAKER. Without objection——

Mr. MANN. Mr. Speaker, I object.

The SPEAKER. The question is on agreeing to the amendment.

The question was taken, and the Speaker announced the noes seemed to have it.

Mr. JOHNSON of Kentucky. Mr. Speaker, I would like to say that provision of the bill says there shall be testimony of not less than three persons. It is impossible to have the testimony of three persons, for only the hotel proprietor and the guest at the hotel are witnesses of the transaction, and for that reason it was stricken out. That provision of the bill requires three witnesses to the transaction. If a man goes to a hotel and stops and he is robbed, there are only two witnesses, perhaps, to the transaction. One is the clerk or representative of the hotel, who does the robbing, and the other is the man who is robbed, who is a stranger, and there can be but one witness, and that is himself; and it would be more than a coincidence if there would be three other people who would hear it, and the committee were therefore of the opinion that that section of the bill requiring three witnesses should be eliminated. Mr. Speaker, I ask for a division upon the adoption of the amendment.

The SPEAKER. The gentleman from Kentucky demands a division.

The House divided; and there were—ayes 30, noes 4.

So the amendment was adopted.

The Clerk read as follows:

Page 2, line 20, strike out, after the word "section," the figure "4," and insert the figure "3."

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Line 22, page 2, strike out the word "complaints" and insert the word "complaint."

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Line 22, page 2, strike out the word "courts" and insert the word "court."

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Line 24, page 2, strike out the words "by the commissioners" and insert the words:

"and the said commissioners shall at once, without any option upon their part, cancel the license or permit of any person, corporation, or firm so convicted.

"The further penalty for any violation of any provision hereof shall be a fine of not exceeding $25 for each offense. Anyone aggrieved by any violation of any of the provisions of this act relative to hotels, boarding houses, lodging houses, or cafés may, during the time he may remain in the District of Columbia for the purpose of prosecuting his complaint, continue at said offending hotel, boarding house, lodging house, or café for either lodging or table board free of charge: *Provided*, That the person complained of shall be found guilty in a court of competent jurisdiction in the District of Columbia.

"Any complainant under the provisions of this act who shall not receive the same accommodations while awaiting a judicial determination of the charge against the defendant hotel, boarding house, lodging house, or café shall have cause of action against any such offender for damages, both actual and punative.

"This act shall take effect upon its passage."

Mr. MANN. Mr. Speaker, I would suggest, in passing, that the word "punitive" be spelled correctly. Section 1 of the bill directs the Commissioners of the District to revoke a license of hotel keepers, café proprietors, owners of vehicles, and so forth, who raise prices. That is all it does. It does not prohibit the raising of prices. It merely directs the commissioners to revoke the license. Section 2 of the bill provides what is raising of prices—that is, an increase in the price over the usual schedule of charges. Then this section comes along and, as proposed to be amended, provides that the conviction of anyone shall constitute the basis for the revocation of a license. I would ask the gentleman, Conviction of what? No prohibition is in the bill against the raising of prices. There is a mere direction to the commissioners to revoke the license. Then the amendment goes on and provides the further penalty for any violation of any provision thereof shall be a fine of not exceeding $25 for each offense. Now, the only provision of the bill that can be violated is the provision which directs the commissioners to revoke the license. Then it goes on and says that anyone aggrieved by any violation of any provision of this act relative to hotels, boarding houses, lodging houses, or cafés may, during the time he may remain in the District of Columbia for the purpose of prosecuting his complaint, continue at said offending hotel, boarding house, lodging house, or café, for either lodging or table board, free of charge, provided that the person complained of shall be found guilty in a court of competent jurisdiction in the District of Columbia. The only ones who can be convicted of any violation of this act would be the District Commissioners, because they are the only ones who are directed to do anything or not to do anything. It is true that part of the bill does not provide that if the owner of a taxicab charges a higher rate than the usual price the person aggrieved can ride in the taxicab until the matter of fining the District Commissioners can be disposed of. It does provide that he may live at the hotel until the matter of fining the District Commissioners is disposed of, and he may lodge at the café under the provisions of this bill until they have disposed of the proceedings. I do not see why, if he has the right to lodge at a café during an inaugural, he should not be permitted to continue to ride in the taxicab during an inaugural.

Mr. MADDEN. Is there any reason why the District Commissioners should not be fined and jailed for all this sort of thing——

Mr. MANN. Perhaps some of them ought to be jailed and kept there; I do not undertake to say; I think not, however; but there is no prohibition in the bill.

Mr. MADDEN. They are going to pass that in the Jones-Works bill.

Mr. MANN. There is nothing in here that prohibits the hotel keeper from raising prices; but if he does raise them, then his license is to be revoked, and that we would have the power to do.

But here is a provision that if the commissioners do not revoke the license, and anyone attempts to fine them for it, that person is to live at the hotel or café free of charge until the matter is disposed of.

Mr. FOSTER. The one living at the hotel is not bound any more than under the law to pay for it. There is no security to the hotel man for the time he boards there.

Mr. MADDEN. He is not bound to stay at the hotel. He could move to another hotel if he wanted to, could he not?

Mr. MANN. He could if he had the price.

Mr. MADDEN. At the price he is boarding there. He could live in one hotel or café free of charge.

Mr. FOSTER. Or move to another hotel.

Mr. MANN. Move to another hotel. The bill was intended, I suppose, in the first place, to make it a misdemeanor to raise the prices at these public resorts, but there is nothing in here to prohibit that at all. There is no prohibition in the bill. How this ever got past the distinguished gentleman from Kentucky [Mr. JOHNSON], who is usually very careful, is beyond my comprehension.

Mr. MOORE of Pennsylvania. Mr. Speaker, will the gentleman yield?

Mr. MANN. Certainly.

Mr. MOORE of Pennsylvania. Will the gentleman look at line 11, page 3, and tell us what is meant by the provision "That the person complained of shall be found guilty in a court of competent jurisdiction in the District of Columbia"? Does not that mean if anyone makes complaint it goes without saying that the man complained of shall be found guilty under the law?

Mr. MANN. I do not know. Of course, the only persons they can complain of for violation of this law are the District Commissioners. The only persons who are directed to do anything in this bill, or not to do anything in this bill, are the District Commissioners.

Mr. MOORE of Pennsylvania. Do we not establish an entirely new method of legal procedure with regard to the trial of accused persons by saying in this proviso that immediately upon a complaint being made the person shall be found guilty?

Mr. MANN. Oh, I think my colleague from Pennsylvania [Mr. MOORE] has not read all of that carefully. This amendment provides that if the person—I assume that is the person—were called on to pay a higher price, he shall live at the café or hotel until the person complained of is found guilty in a court of competent jurisdiction.

Mr. MARTIN of South Dakota. Suppose he is acquitted; how long could he board?

Mr. MANN. Well, he would have already boarded there until the matter was disposed of.

Mr. MOORE of Pennsylvania. I think if the gentleman will read it for a second time he will find it stated in this bill that a person "shall" be convicted when complained against. That is, if the waiter should spill the soup down the back of the guest and should then complain of the hotel proprietor, the person complained of shall be found guilty. It is not a question of a trial, it is not a question of his having a defense, but it is provided here that immediately upon the complaint being made the person complained of shall be found guilty.

Mr. MADDEN. Is there anything else you want?

Mr. MOORE of Pennsylvania. I am referring to the common people, those who sometimes drift into the business of conducting a hotel, or who may be so fortunate or unfortunate as to be a waiter in an establishment of that kind. Here they are deprived of a trial by jury, and by a law, almost equal to the fugitive law in Mexico, they are told, when complained against, they shall be found guilty. That is the provision I call to the gentleman's attention. I do not think he clearly understood it.

Mr. MANN. I did. Of course, the proviso says the person shall be found guilty.

Mr. MOORE of Pennsylvania. Upon the complaint being made.

Mr. MANN. I was willing to leave that in that paragraph, although——

Mr. MOORE of Pennsylvania. Does it not follow that the commissioners should be abolished and all forms of law be abolished immediately on complaint being made, because the man shall be found guilty?

Mr. MANN. If the gentleman from Kentucky [Mr. JOHNSON] will show where anybody can find anybody guilty under this except the commissioners, it will be satisfactory to me. I do not see how you can start in to say that a man shall be boarded and lodged free of charge pending a claim against the District Commissioners, because they did not revoke the license of the hotel keeper.

The SPEAKER. The question is on agreeing to the amendment.

The question was taken, and the Speaker announced that the noes seemed to have it.

Mr. JOHNSON of Kentucky. Division, Mr. Speaker.

The House divided; and there were—yeas 34, nays 9.

Mr. MANN. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. Will the gentleman from Illinois [Mr. MANN] withhold that point a second in order that we may receive a message from the Senate?

Mr. MANN. I will if it does not interfere with my right on this vote.

The SPEAKER. It will have nothing to do with it.

The SPEAKER. The gentleman from Illinois [Mr. MANN] makes the point of order that there is no quorum present. Evidently there is not a quorum present, and the Doorkeeper will close the doors, the Sergeant at Arms will notify the absentees, and the Clerk will call the roll. Those in favor of this amendment will, when their names are called, answer "yea"; those opposed will answer "nay."

Mr. DYER rose.

The SPEAKER. For what purpose does the gentleman rise?

Mr. DYER. To ask that the amendment may be again reported.

The SPEAKER. Without objection, the amendment will be reported again.

There was no objection.

The amendment was again read.

The SPEAKER. The Clerk will call the roll.

Mr. DYER. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. DYER. Is the vote now upon the amendment?

The SPEAKER. The vote is on the amendment.

The question was taken; and there were—yeas 171, nays 101, answered "present" 11, not voting 98, as follows:

YEAS—171.

Dickson, Miss.	Konig	Reyburn	

So the amendment was agreed to.

The Clerk announced the following pairs:

For the session:

Mr. LITTLETON with Mr. DWIGHT.

Mr. ADAMSON with Mr. STEVENS of Minnesota.

Mr. TALBOTT of Maryland with Mr. PARRAN.

Mr. RIORDAN with Mr. ANDRUS.

Mr. FORNES with Mr. BRADLEY.

Mr. SCULLY with Mr. BROWNING.

Mr. PALMER with Mr. HILL.

Until further notice:

Mr. SWEET with Mr. WOOD of New Jersey.

Mr. STANLEY with Mr. VREELAND.

Mr. SHERLEY with Mr. WEEKS.

Mr. SAUNDERS with Mr. VOLSTEAD.

Mr. SABATH with Mr. VARE.

Mr. RUCKER of Colorado with Mr. THISTLEWOOD.

Mr. PETERS with Mr. TAYLOR of Ohio.

Mr. MOORE of Texas with Mr. J. M. C. SMITH.

Mr. MCDERMOTT with Mr. PRINCE.

Mr. LEVER with Mr. PRAY.

Mr. KORBLY with Mr. MOTT.

Mr. KONIG with Mr. OLMSTED.

Mr. KINDRED with Mr. MOON of Pennsylvania.

Mr. HUGHES of Georgia with Mr. MONDELL.

Mr. HAMLIN with Mr. MCKINNEY.

Mr. HAMILTON of West Virginia with Mr. LAFFERTY.

Mr. GOLDFOGLE with Mr. MCCREARY.

Mr. GODWIN of North Carolina with Mr. LANGLEY.

Mr. GLASS with Mr. JACKSON.

Mr. GEORGE with Mr. HEALD.

Mr. FERRIS with Mr. HAUGEN.

Mr. ELLERBE with Mr. HARRIS.

Mr. DICKSON of Mississippi with Mr. GUERNSEY.

Mr. DAVIS of West Virginia with Mr. GRIEST.

Mr. DAVENPORT with Mr. FOCHT.

Mr. DAUGHERTY with Mr. DRAPER.

Mr. CONRY with Mr. DE FOREST.

Mr. CLARK of Florida with Mr. DAVIS of Minnesota.

Mr. CARTER with Mr. DANFORTH.

Mr. CARLIN with Mr. CRUMPACKER.

Mr. BYRNES of South Carolina with Mr. COPLEY.

Mr. BROWN with Mr. BURKE of South Dakota.

Mr. ANSBERRY with Mr. BARTHOLDT.

Mr. STACK with Mr. BARCHFELD.

Mr. WILSON of New York with Mr. ANTHONY.

Mr. TUTTLE with Mr. AMES.

Mr. TALCOTT of New York with Mr. AINEY.

Mr. HULL with Mr. NEEDHAM.

Mr. HOBSON with Mr. MERRITT.

Mr. BROWNING. Mr. Speaker, I am paired with the gentleman from New Jersey, Mr. SCULLY. I see he is not here. I voted "no." I wish to withdraw my vote and to be recorded present.

Mr. NEEDHAM. Mr. Speaker, I desire to change my vote from "aye" to "present."

Mr. ALLEN. Mr. Speaker, I desire to change my vote from "aye" to "present."

The result of the vote was announced as above recorded.

The SPEAKER. A quorum is present. The Doorkeeper will unlock the doors.

Mr. BURKE of Pennsylvania. Mr. Speaker, I desire to offer an amendment.

Mr. PROUTY. Mr. Speaker, I desire to offer a committee amendment.

The SPEAKER. The gentleman from Iowa will send up his amendment. The Clerk will report the committee amendment offered by the gentleman from Iowa.

The Clerk read as follows:

At the end of section 2 insert:

"And every such increase or advance of price is hereby made a misdemeanor, and shall be punishable as such in any court of competent jurisdiction."

Mr. MANN. I congratulate the District Committee that it has finally discovered that there was no prohibition against doing anything or not doing anything in the bill, and now, having their attention called to the fact, have offered an amendment for the purpose of curing a patent defect in the bill.

What is this section?—

That in the case of hotels or restaurants or other businesses which usually maintain in their places of business printed or written tariffs or schedules of prices a schedule or tariff of charges greater than the prior usual rates in use in such places on such holidays or special occasions shall constitute prima facie evidence that such prices were increased.

Thereupon the amendment proposes to prohibit increasing prices. We are to have inaugural festivities. This prohibition is "greater than the prior usual rates in use in such places on such holidays or special occasions." That must mean that the prices to be charged this year shall not be higher than those charged four years ago. [Laughter.] That is all it can mean. It is not a prohibition against charging higher prices during the inaugural festivities than are now charged, just before the inaugural festivities, but "prior usual rates in use in said places on such holidays or special occasions."

Inaugural festivities this year must be compared with inaugural festivities of the last time, which was four years ago, and the purpose of this amendment is to make a misdemeanor against any café proprietor who charges a higher price for a beefsteak now than he charged four years ago. That is a method of leveling prices which has not yet been discovered by anybody except the District Committee.

We have heard a great deal about higher prices and about efforts to reduce higher prices, but here is a simple method. If you charge a higher price now than you did four years ago, then under this bill you have to keep the man, board and lodging, without any charge. [Laughter.]

That is what the bill provides. If they charge a higher price for a beefsteak now than they did four years ago, the man who wants a steak is entitled to live at the café free of charge. [Laughter.]

The gentleman from Connecticut calls attention to the method of spelling "punitive" in the bill. I called attention to that when the bill was first laid before the House, but the District Committee has not learned how to spell "punitive." I think it would be well if they had sent for a dictionary or asked some one in the House who knows, if they were willing to take anybody's statement except that of the dictionary, as to how the word is spelled.

The House has agreed to that spelling. It is in the amendment for which gentlemen have just voted.

Mr. PAYNE. Then the spelling of the committee seems to be vindicated. [Laughter.]

Mr. MANN. Now, Mr. Speaker, it was only a few days ago that the House passed a bill, the usual bill, giving to the Commissioners of the District of Columbia the authority to regulate vehicles and things of that kind in the District, which has always carried with it the right to regulate the charges. Here the House one day passes, by unanimous consent, a bill to do one thing and the next day proposes to pass a bill in direct conflict with the bill passed before, which is now the law, forbidding the doing of the very thing which they had authorized the day before. It is silliness run mad. [Laughter and applause.]

Mr. CANNON. Mr. Speaker, I voted against the amendment which has just passed. I do not yet understand what it means, but I would like to have this amendment offered by the gentleman from Iowa again reported.

The SPEAKER. The Clerk will again report the amendment.

The amendment was again reported.

Mr. CANNON. Mr. Speaker, it seems to me that this is on a par with much legislation that is being pressed upon Congress originating in another body or originating in this body. Great Heaven! All you have to do is to crudely guess at something here and there and make it a misdemeanor to be punished. Why it will be presently so that a man can not smile at his sweetheart on the street unless it is a misdemeanor. [Laughter.]

I do not know the meaning of this amendment that has just been adopted. It seems to me that any American citizen or any man who comes to a hotel, whether he comes from China or Hindustan, is entitled to go to a hotel or boarding house, demand entertainment, charge the proprietor with violating this act, if it passes, and in the meantime board. [Laughter.]

I think we had better think two or three times before we pass a bill like this or agree to this amendment. I quite enjoyed seeing some gentlemen vote who are awfully anxious to have separate cars down South and separate cars elsewhere in the country for American citizens, while they are going to adopt a different plan for the District of Columbia. Well, go along gentlemen, you are in the majority, fix it just as you please. Make everything a misdemeanor—hop, skip, and jump—for the alleged interest of home and native land. [Applause.]

Mr. JOHNSON of Kentucky. Mr. Speaker, this bill has been considerably assailed, and thus far there has been no explanation of it. I regard that provision which gives free board to a man during the trial of one who has attempted to rob him as the strongest and best feature in the bill. If a man goes to a hotel where he has been paying $3 a day, and the report shows in this instance such cases exist, and stays three days, for which he pays $9, and then afterwards he is asked $150 for the same room for the same length of time, he needs protection. If a man comes here and is robbed to that extent under those circumstances, when he goes up to the hotel desk to pay his bill, the hotel proprietor knows that he can not under ordinary circumstances stay here long enough to litigate that question. This bill gives him the right, if the hotel man is in the wrong, to stay at that hotel free of charge while he litigates the question as to wether he has been robbed.

Mr. KENDALL. Mr. Speaker, will the gentleman yield?

Mr. JOHNSON of Kentucky. Yes.

Mr. KENDALL. Does this bill do that? Does not this bill provide that in the case the gentleman suggests he may continue at such offending hotel, café, and so forth, for either lodging or table board, free of charge?

Mr. JOHNSON of Kentucky. Yes.

Mr. KENDALL. Is not this the fair interpretation of that language, that he has the right to eat there?

Mr. JOHNSON of Kentucky. If it is only an eating place, he has the right to eat there free of charge.

Mr. KENDALL. But at a hotel he might have the right to eat there, but not the right to lodge there, or he might lodge there and not eat there.

Mr. JOHNSON of Kentucky. It depends on what kind of a house it is.

Mr. KENDALL. If it is a hotel?

Mr. JOHNSON of Kentucky. If it is a hotel, he has the right to stay there.

Mr. KENDALL. But he would not have the right to both eat and lodge at the hotel?

Mr. JOHNSON of Kentucky. Oh, yes he would.

Mr. KINKAID of Nebraska. Mr. Speaker, will the gentleman yield?

Mr. JOHNSON of Kentucky. Yes.

Mr. KINKAID of Nebraska. What does the gentleman think of the principle involved, that a penalty is to be paid to an individual rather than to the State for the violation of a law?

Mr. JOHNSON of Kentucky. Oh, that is in the nature of damages.

Mr. KINKAID of Nebraska. But is it not a penalty that is being paid to a private individual, when it should go to the State? Is not that an entirely new departure from the theory of enactments to prohibit wrongs?

Mr. JOHNSON of Kentucky. Oh, I think that is only in the nature of a penalty like the one usually attached to usury laws.

Mr. Speaker, section 2 has been criticized. Upon a careful reading it can be seen that it does not mean at all what the gentleman from Illinois [Mr. MANN] says it means. [Cries of "Louder!"] Mr. Speaker, I ask for order.

The SPEAKER. The House will be in order.

Mr. JOHNSON of Kentucky. Mr. Speaker, gentlemen who are opposing this bill are resorting to disorder and to every kind of means for the purpose of bringing about its defeat. Seeing that they can not defeat it upon its merits, they are resorting to other means, and I sincerely trust that the fair-minded people of this House will to-day stand by the people who have a right to come here for the inaugural ceremony and not permit them to be robbed as they have been heretofore robbed [applause on the Democratic side] and as we know they are to be robbed now. Here is the case of a man from my own State who has written me a letter which has been incorporated in the report, and which I will read:

LOUISVILLE, KY., *February 14, 1913.*

DEAR BEN: Referring to a news item in the Courier-Journal of to-day regarding your bill introduced in Congress to regulate hotel charges in Washington.

It was my expectation a few weeks ago to attend the inauguration, and immediately wired the Hotel Raleigh asking what would be their rates for a nice room with bath. They wired back that a room on Twelfth Street would cost me $120 and a room facing Pennsylvania Avenue $150, and as it has been my custom to stop at the Raleigh, am very familiar with their rates, only a few weeks ago having their room No. 1105, right on the corner, paying $3 per day for same. As three days would be ample to see the inauguration, instead of having to pay $9 they attempted to charge me $150. The rates at the Willard are not so bad, an inside room facing west being $70 and one facing Fourteenth Street $84. Have attended conventions and gatherings everywhere in this country and Europe, and am accustomed to pay two or three times the regular rates, but the Washington figures are the worst in my experience.

There is no more excuse for this advance than there would be for an advance in freight and passenger rates during the busy season, and it is equivalent to Uncle Sam charging 10 cents for a 2-cent postage stamp at Christmas time.

Yours, very truly, P. H. CALLAHAN.

Hon. BEN JOHNSON,
Washington, D. C.

Mr. Speaker, the gentleman from Washington [Mr. HUMPHREY] had an experience here four years ago that I believe this whole country ought to know, and I hope that he will give the House the benefit of his experience in these matters. [Applause.]

Mr. HUMPHREY of Washington. Mr. Speaker, while I have not studied the form of this bill, I am in sympathy with the legislation; and since the gentleman from Kentucky [Mr. JOHNSON] has referred to the experience which I had some four years ago, I will relate it to the House. I had a friend, Mr. Whitcomb, who lived in Massachusetts. His son, however, lived in Seattle. Mr. Whitcomb went to the Shoreham Hotel and engaged two rooms for himself, his son, and his son's wife. Those rooms would ordinarily be about $10 a day, I presume. They charged him $100 a day and he was compelled to take them for eight days. He had the money and he paid it.

Another friend, George W. Stetson, who lived in Seattle, wired me to secure rooms for him. I went to various hotels and finally to the Gordon, and there I succeeded in securing a room known as an alcove room for Mr. Stetson and his wife. Those rooms would ordinarily be about $6 a day. I was compelled to pay $25 a day and take the rooms for seven days. It so happened that we had other visitors during that inauguration, and we hired a carriage to take two of them to the inaugural ball. The carriage was stopped something like a square and a half from the building. The police would not permit the man to get any closer. The people were compelled to get out and walk to the building. Then the police served notice on the driver of the carriage not to come back after his passengers, stating that if he did he would be arrested, because, as I understood, this driver did not belong to some organization of some character where a portion of the fees received by him were to be divided with others. Those are some of my experiences four years ago. [Applause.]

Mr. MANN. Mr. Speaker, there never has been a convention or gathering in any city of large numbers that some one or many people did not complain afterwards as to the cost. I remember very distinctly the wailing and gnashing of teeth over on the Democratic side of the aisle right after the Baltimore convention, when gentlemen were not only very hard up for money but were very well supplied with hot language concerning the charges at Baltimore. The same is true wherever a convention is held or wherever there is a large gathering.

Mr. JAMES. Will the gentleman yield?

Mr. MANN. Certainly.

Mr. JAMES. The charges at Baltimore were nothing like as exorbitant as these charges. For instance, I had a room——

Mr. MANN. Oh, the gentleman from Kentucky at Baltimore was the chairman of the convention and one of the leading lights, and undoubtedly received very favorable rates made up at the expense of some other fellow who did not have his standing. That is the way that always is.

Mr. JAMES. In reply to that statement, of course that is not true so far as it applies to me, because I secured my room long before I was elected chairman of the convention.

Mr. MANN. But not before he was a leading light.

Mr. JAMES. Oh, there were other delegates from Kentucky, and all of them are leading lights I may say, who paid exactly the price I did and I had a room with bath for myself and wife at $16 a day. I had to take it for five days, but you can not get any such rate here.

Mr. MANN. I heard gentlemen say who came back from Baltimore that they did not get any such rates there, but they made vigorous complaints, whether they were justified or not I will not undertake to say. But here is a bill that proposes to say that the owners of hacks and taxicabs or other cabs can not charge a higher rate now than the usual rate, and yet only a few days ago we passed a bill in the House, which is now the law, which provided that the District Commissioners between the 28th day of February and the 10th day of March next should have the power and were directed to make all reasonable regulations necessary to secure such preservation of public property and protection of life and property and fix the fares of public conveyances, requiring them between those dates to fix the fares of public conveyances, and requiring them to advertise those rates. That has been done, and the law further contains this provision—

> Any person violating any of such regulations will be liable to both a fine and imprisonment.

We are put in this attitude by the House a few days ago passing a law requiring the District Commissioners to fix prices of fares between the 28th day of February and the 10th day of March and making a penalty of imprisonment against one who did not comply with those regulations, and to-day we propose to pass a bill requiring that anyone who does comply with those regulations shall be imprisoned. For God's sake, what will happen to the fellows? If they do, they go to jail; and if they do not, they go to jail; that is wise legislation.

Mr. O'SHAUNESSY. Mr. Speaker, I believe that some consideration should be given to the objection urged by the gentleman from Illinois if the purposes of those interested in this bill are to be attained.

Mr. DYER. Why does the gentleman make that statement, may I ask him?

Mr. O'SHAUNESSY. From my reading of section 2 I think a man who would be quartered upon a hotel or boarding house might after his litigating experience here find it very difficult to prove his case, inasmuch as he would be put to the trouble of proving that he was charged more than he was charged four years ago. That is the conclusion at which I arrive.

Mr. JOHNSON of Kentucky. I would suggest the burden is upon the other fellow.

Mr. O'SHAUNESSY. I would suggest that the words "in use in such places on such holidays or special occasions" be stricken out so as to make it read that the hotel keepers should observe the usual rates they charge anybody at any time and not upon special occasions or upon holidays.

Mr. RAKER. Will the gentleman yield there? Take the words in line 15, "on such holidays or special occasions," and insert them after the word "charges," in line 13, and then you would have the sentence read as follows:

> That, in the case of hotels or restaurants or other businesses which usually maintain in their places of business printed or written tariffs or schedules of prices, a schedule or tariff of charges on such holidays or special occasions greater than the prior usual rate in use in such places shall constitute prima facie evidence that such prices were increased.

Now, if you put it in that way, it makes it specific that if they put their rate higher on these holidays than the usual published rate you cover the question beyond doubt.

Mr. O'SHAUNESSY. That might effect the purpose. I am for anything to effect the purpose of the bill.

Mr. JOHNSON of Kentucky. I believe the amendment offered by the gentleman from California [Mr. RAKER] is a wise one and should be adopted.

The SPEAKER. There is already an amendment pending, offered by the committee, and the Clerk will report it.

The Clerk read as follows:

> Page 2, at the end of section 2, insert the following:
> "And every such increase or advance of price is hereby made a misdemeanor and shall be punishable as such in any court of competent jurisdiction."

The SPEAKER. The question is on agreeing to the amendment.

The question was taken, and the amendment was agreed to.

The SPEAKER. The Clerk will report the amendment of the gentleman from Pennsylvania [Mr. BURKE].

The Clerk read as follows:

> Add as a new paragraph at the end of line 19, on page 3, the following:
> "This act shall in no way affect contracts already made and now in existence."

The SPEAKER. The question is on agreeing to the amendment.

Mr. JOHNSON of Kentucky. Mr. Speaker, I hope the House will not adopt that amendment.

Mr. BURKE of Pennsylvania. Mr. Speaker, it seems to me that if this legislation, with all the unusual features that attach to it, is to be enacted at this late hour it ought in fairness to the people of this country who are coming here on the 4th of March to carry with it this proviso which I have offered. There is no expressed restriction that I can find in the Constitution upon us against impairing the obligation of a contract. The constitutional prohibition only applies to the States and imposes only upon them that restriction. It is possible, and I believe it has been decided by the Supreme Court, that the obligation rests upon us to observe in the District of Columbia the same provision that we have imposed upon the States in that regard. But here is the situation: There are people leaving California, people leaving the home of the gentleman from Washington [Mr. HUMPHREY], people leaving the Pacific coast to-day for the city of Washington, and there are thousands of these contracts in existence at this hour, every one of which would be revoked the moment this legislation became effective. And if that were to occur the contracts would be annulled, and the hardship would not be alone upon the hotel keepers of this city, but it would be on every man, woman, and child whose contract has been made in good faith and who is still willing to carry it out. Who is the aggrieved party? Assume that you, Mr. Speaker, have made one of these contracts and are willing to pay the amount provided under the terms of the contract; there is no grievance, and you wish to go to your home immediately after the inauguration of the next President of the United States; there will be imposed upon the District Commissioners the obligation of instituting criminal proceedings, following which would come the necessity of subpœnaing and, necessarily, of attaching you to

appear as a witness in a court of justice. I say, therefore, that it is a very serious problem for us to attempt to enact this legislation at this date, when people with these contracts are on their way to the Capital of the Nation and whose arrangements regarding their accommodations would probably as a consequence be thrown into a state of hopeless confusion.

The SPEAKER. The question is on agreeing to the amendment.

The question was taken, and the amendment was rejected.

Mr. RAKER. Mr. Speaker, I offer the following amendment.

The SPEAKER. The gentleman from California offers an amendment, which the Clerk will report.

The Clerk read as follows:

On line 15, page 2, strike out the words "on such holidays or special occasions" and insert the same words in line 13, after the word "charges."

The SPEAKER. The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the resolution.

The resolution was ordered to be engrossed and read a third time, and was read a third time.

The SPEAKER. The question is on the passage of the resolution.

The question was taken.

The SPEAKER. The Chair is in doubt. Those in favor of passing the resolution will rise and stand until they are counted. [After counting.] One hundred and nineteen gentlemen have risen in the affirmative. Those opposed will rise. [After counting.] Sixty-five gentlemen have risen in the negative. On this vote the ayes are 119 and the noes are 65, and the joint resolution is passed.

The title was amended so as to read as follows: "Joint resolution to direct and empower the Commissioners of the District of Columbia to revoke licenses under certain conditions."

On motion of Mr. JOHNSON of Kentucky, a motion to reconsider the vote by which the joint resolution was passed was laid on the table.

DISPOSITION OF INAUGURAL TICKETS.

The SPEAKER. The gentleman from Missouri [Mr. RUCKER] asks unanimous consent for five minutes in which to make a communication to the House in which all the Members are interested. Is there objection? [After a pause.] The Chair hears none.

Mr. RUCKER of Missouri. Two minutes, I think, will be amply sufficient. I desire, Mr. Speaker, to make an announcement to the House with reference to the distribution of tickets to the inaugural platform in front of the Capitol.

The tickets are now ready for distribution. The distribution will begin to-morrow. The tickets will be distributed from the room of the Committee on Election of President, Vice President, and Representatives in Congress—my committee room—located in the southwest corner of the House Office Building, on the first floor, room No. 127, immediately opposite the Varnum Hotel.

The committee in charge of the distribution deems it proper to request that each Member call in person for his allotment of tickets. If for any reason the Member himself can not come, the committee requests that he send written directions to deliver the tickets to bearer. It is hardly necessary to say that the reason for this is to protect ourselves in the discharge of a somewhat delicate duty.

Mr. DYER. Will the gentleman state how many tickets?

Mr. RUCKER of Missouri. I will in a moment. Word has reached us that tickets have already been advertised in this city for sale. Of course, no tickets have thus far been delivered. The committee is determined that the full allotment of tickets due to each Member shall be delivered to such Member, and we shall be glad if each Member will take time to open the envelope containing the tickets before leaving my committee room and satisfy himself that his full allotment is there. I hope gentlemen will not interrupt me for a minute or two. After that I will be glad to answer any questions.

Heretofore Members of the House have received for this platform—the platform east of the Capitol—four tickets, and one additional ticket which admits the bearer to the gallery of the Senate. This year, through the persuasive influence and the fidelity of my associates, Mr. GARRETT, of Tennessee, and Mr. MCKINLEY, of Illinois, we succeeded in extorting from the Senate seven platform tickets for each Member and two tickets, in addition, to the Senate gallery. [Applause.] You gentlemen are indebted to Mr. GARRETT and Mr. MCKINLEY for this success.

Mr. MANN. And to you.

Mr. DYER. And to the chairman.

Mr. RUCKER of Missouri. I thank the gentleman from Illinois [Mr. MANN] and the gentleman from Missouri [Mr. DYER].

If I can claim your attention, gentlemen, a few moments longer, I desire to make this particular statement: Each Member of the Sixty-second Congress—this Congress—is entitled to seven platform tickets for seats on the platform in front of the Capitol, east of the Capitol, and one ticket to the gallery of the Senate. The ticket to the Senate gallery also admits the bearer to the reserved portion of the platform east of the Capitol. All Members of this Congress and gentlemen who are elected to the next Congress who are not Members of this are entitled to the privileges of the Senate floor and need no tickets for themselves. Hence each Member has eight tickets, which he can dispose of and give to whomsoever he pleases.

Heretofore gentlemen elected to a succeeding Congress who are not Members of the current Congress or, as we call them, new Members, have been allotted but one ticket to the platform. Through the persistence of my colleagues on the committee each new Member, each Member elect to the Sixty-third Congress who is not a Member of this Congress, will receive two tickets instead of one as heretofore. And in this connection I want to say that I speak seriously and solemnly when I say that I regret exceedingly that one of my colleagues to whom I have referred will not be my colleague in the next Congress. [Applause.] Members elect who are not Members of this Congress do not, however, get a ticket to the Senate gallery, and for the obvious reason that there was no space in the gallery to allot to them. The Senate treated the House with generosity and liberality in the division of space in the Senate gallery. We got practically one-half of the entire Senate gallery for the use of the House, and there was no space to allot in the Senate gallery to the gentlemen who will be Members of the next Congress but who are not Members of this Congress.

I trust no gentleman will take the least exception when I say and seek to impress upon your minds that we have given rigid instructions to those who will be in charge of the distribution of tickets to deliver them only to Members or to such messenger as comes to us with a written order from a Member, and even then the messenger must be known to one of the parties in charge. Those in charge will be Mr. MCKINLEY's secretary, Mr. GARRETT's secretary, and my secretary, and I assume that they know practically every present Member of the House. Let me invite gentlemen who have their successors or future colleagues here, new Members, if you can conveniently do so, to come with them, so there will be no embarrassment because of the fact that gentlemen in charge of the distribution of tickets may not be acquainted with them.

I again say the place of distribution will be at my office room, No. 127, at the southwest corner of the House Office Building, at any time after 9 o'clock to-morrow morning. Each Member will be expected to sign a receipt for his tickets when he gets them.

Mr. MANN. Will the gentleman yield for a question?

Mr. RUCKER of Missouri. I yield.

Mr. MANN. Do the tickets that are delivered to Members call for reserved seats, or reserved sections, or reservations in any way?

Mr. RUCKER of Missouri. I am glad the gentleman has called my attention to that. You will observe that this huge platform out here is built in three sections, a middle section, a section north of that, next to the Senate wing, which section is designated as section A, and another section south of the center and next to the House end of the Capitol, which is designated as section B. All tickets distributed by Members of the House will be to section B of the platform. That is the section of the platform next to the House end of the Capitol.

The section in the middle and immediately in front of the main east steps of the Capitol is the section reserved for those who have the privilege of the Senate floor, which includes all Members, Members-elect, governors, Cabinet officers, and so forth.

Mr. MANN. The Senate floor and the Senate gallery.

Mr. RUCKER of Missouri. All persons who are entitled to the privileges of the Senate floor, and also all those who have tickets to the Senate gallery. After the ceremonies in the Senate Chamber are completed, all persons admitted to the Senate and all admitted to the Senate gallery will march, if they please to do so, to this central reservation between sections A and B. As I have stated before, section A will be occupied by those holding tickets distributed by Senators, and section B will be occupied by those holding tickets distributed by Members.

Mr. BARNHART. Did I understand the gentleman aright when I understood that each Member would have eight tickets for distribution?

A MEMBER. Seven.

Mr. RUCKER of Missouri. The gentleman from Indiana [Mr. BARNHART] is right and the gentleman who interrupted him is also right to this extent——

Mr. BARNHART. Let me ask further, does the gentleman mean by that that the Members of the House who are admitted to the floor of the Senate will be admitted to the central platform without the use of tickets?

Mr. RUCKER of Missouri. I have tried to make that clear. The gentleman is correct. Everybody who is entitled to enter upon the Senate floor and everybody who has a ticket to the Senate gallery will be admitted to this central part of the platform without tickets.

Mr. MANN. In other words, if the gentleman will permit, after the Vice President is sworn in, those on the floor of the Senate, followed by those in the Senate gallery, can march to the place reserved for them, without tickets.

Mr. RUCKER of Missouri. I said without tickets, and I mean without tickets other than the one which admits to the Senate gallery.

Mr. MANN. And that ticket will have been taken up, so they will march out without tickets.

Mr. RUCKER of Missouri. I do not know whether the tickets will be taken up or not, but am informed by the Sergeant at Arms of the Senate that tickets to the Senate gallery will not be taken up when persons enter the gallery.

Mr. MANN. Yes; they will.

Mr. BARNHART. If they are taken up, then the occupants of the Senate galleries will march out without tickets to the central stand.

Mr. ROBERTS of Massachusetts. Do the seven tickets allotted to each Member of the House call for reserved seats in section B of the stand?

Mr. RUCKER of Missouri. They do not.

Mr. ROBERTS of Massachusetts. Then, it is first come first served in section B?

Mr. RUCKER of Missouri. It will be first come first served. Let me answer the question more fully. I believe there are now actually sitting 382 Members of the House, and with the 156 Members elect the tickets allotted will make an aggregate of approximately 3,000 tickets. Now, if we should undertake to number all the seats on the platform and give a particular ticket to a certain Member, necessarily there would be favoritism. Somebody would have a good seat and somebody else would have a bad seat as a result of the action of the committee. Hence, the committee thought it would be unwise to attempt such distribution, and concluded to give tickets to this section without attempting reservations. Necessarily those who come first will get better seats than those who come last.

Mr. AUSTIN. Let me ask the gentleman who will be admitted to the Capitol Building on that day?

The SPEAKER. The time of the gentleman has expired.

Mr. GARRETT. I ask unanimous consent that the gentleman from Missouri have two minutes more.

The SPEAKER. The gentleman from Tennessee asks that the gentleman from Missouri have two minutes more. Is there objection?

There was no objection.

Mr. RUCKER of Missouri. I desire only enough time to answer the question of the gentleman from Tennessee [Mr. AUSTIN]. My understanding is that, following the usual custom, nobody will be admitted to the Capitol on that day except those entitled to the privileges of the floor and Capitol employees.

Mr. AUSTIN. And those admitted to the gallery of the Senate. Can those who are admitted to the gallery of the Senate go through from the House end?

Mr. RUCKER of Missouri. They must enter at the Senate end; they can not go through this way at all.

Mr. CARY. Will the gentleman state what becomes of the tickets after they are taken at the gate?

Mr. RUCKER of Missouri. What gate?

Mr. CARY. As they go into the stand.

Mr. RUCKER of Missouri. My understanding is that the tickets are exhibited and taken up. We have the absolute assurance that every man that has one of these tickets printed under the authority of this committee will have a seat on that platform.

Mr. CARY. I would like to make the suggestion that it would be a good idea for persons holding tickets to keep the tickets and merely exhibit them as they walk in?

Mr. JAMES. The trouble about that would be that the tickets might be passed out again to others.

Mr. RUCKER of Missouri. That is a detail that the Senate committee has worked out. I am informed that tickets will be taken up as parties go upon the platform, but that anyone who desires to retire after once going upon the platform can call upon any gatekeeper—that is, any officer who takes up tickets at the entrance to the platform—and get back a ticket which will admit him again to the platform. I am also advised that at the conclusion of the ceremonies all persons when leaving the platform, upon request, will have a ticket returned to them, which can be kept as a souvenir of the occasion.

NAVAL APPROPRIATION BILL.

Mr. PADGETT. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 28812, the naval appropriation bill.

Mr. JOHNSON of Kentucky. Mr. Speaker, I hope that the House will not agree to that motion; this is perhaps the last day that the District Commitee will have.

The SPEAKER. The motion is not debatable. The gentleman from Tennessee moves that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the naval appropriation bill.

The question was taken; and on a division (demanded by Mr. JOHNSON of Kentucky) there were 133 ayes and 51 noes.

Mr. JOHNSON of Kentucky. Mr. Speaker, I make the point of no quorum.

Mr. MANN. I ask that the Chair count.

The SPEAKER. That is what the Chair was about to do. [After counting.] Two hundred and twenty-three gentlemen present, a quorum.

Mr. JOHNSON of Kentucky. I demand the yeas and nays.

The question of ordering the yeas and nays was taken, and 33 Members arose in favor thereof.

The SPEAKER. Not a sufficient number, and the yeas and nays are refused. The motion of the gentleman from Tennessee is agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. ALEXANDER in the chair.

The CHAIRMAN. The House is now in Committee of the Whole House on the state of the Union for the further consideration of the bill of which the Clerk will report the title.

The Clerk read as follows:

The bill (H. R. 28812) making appropriations for the naval service for the fiscal year ending June 30, 1914, and for other purposes.

Mr. TRIBBLE was recognized.

Mr. GREGG of Texas. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. GREGG of Texas. On Saturday I was recognized for one hour, and I yielded 20 minutes to the gentleman from Texas [Mr. DIES] and 30 minutes to the gentleman from Illinois [Mr. GRAHAM]. Mr. DIES used his time, but the House adjourned before Mr. GRAHAM used his, and he is still entitled to 30 minutes.

The CHAIRMAN. The Chair will recognize the gentleman from Georgia first, and then the gentleman from Illinois [Mr. GRAHAM].

Mr. MANN. Mr. Chairman, may I ask whether under the arrangement with the House, or with the Chair, two hours of general debate is to be divided between the two sides?

The CHAIRMAN. There is no arrangement whatever.

Mr. MANN. Then the arrangement is with the Chair.

The CHAIRMAN. The Chair has control of it, and the Chair will try to do that as well as he can.

Mr. HOBSON. A parliamentary inquiry, Mr. Chairman.

The CHAIRMAN. The gentleman will state it.

Mr. HOBSON. Is two hours the limit for general debate?

The CHAIRMAN. It is, for general debate.

Mr. MURRAY. A parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MURRAY. Does that include or leave out the 30 minutes to which the gentleman from Illinois [Mr. GRAHAM] is entitled?

The CHAIRMAN. It includes it.

Mr. TRIBBLE. Mr. Chairman, I desire to quote from the remarks of the gentleman from Illinois [Mr. FOSS], the former chairman of this committee under a Republican administration, on Saturday last, and I read this for the benefit of the Members on the Democratic side of the House. He was speaking of the naval policy which obtained in this country prior to the present Congress. In other words, the chairman of that committee gives

us his approval, from a Republican viewpoint, voicing the policy of the Republican side. On page 3687 of the RECORD of Saturday he makes this statement:

What is more, it continues the naval policy which obtained in this country prior to the time that the present Congress came into power.

This bill suits him. It carries more for expenses without a battleship than his last bill carried with two battleships. In 1911 the appropriation was $126,000,000. This bill appropriates $127,000,000 before reaching ship construction. Two battleships will run the bill up to $148,000,000. Speaking for myself, I do not want the approval of the gentleman. On the next page he shows his love for the Democratic policy of this committee. He chides us to our faces, and yet Members upon the Democratic side of the House sit in their seats and never raise their voices to cut down the expenses of this bill. What does he say? I quote his exact words. He says:

For years on that side of the House they have said to us that we have been extravagantly appropriating for the maintenance of the Government, and they have said to the people of the country: "Let us get into power, and we will cut down the appropriations, and we will give you an economical administration." They are finding out now that the appropriations are running higher and higher, until I am told they will be at least $100,000,000 more than they were two years ago, the high-water mark under Republican administration. And before we get through with this session of Congress they may reach $200,000,000 more. That is the reason why. You are beginning to see that you can not carry out your promises to the American people.

Just such statements will be the slogan of Republicanism before the country. Gentlemen, what will you say?

Mr. Chairman, I propose to stand here to-day and appeal to this side of the House to carry out their promises to the American people. If you will give me your attention, I will show that this bill contains anywhere from fifteen to twenty million dollars more for expenses than it should contain. I realize the fact that a man who deals with cold figures and facts and puts them in the face of his colleagues when they do not want to hear them gets no applause. I might stand here on the floor of this House as well as other gentlemen and pay beautiful tributes to Perry, Clarke, Dewey, and other naval officers and receive applause, but I am going to give you the cold facts. I am going to show you that the Republican side of this House has administered the affairs of the Navy with anywhere from ten to fifteen million dollars cheaper than the Democratic side of this House proposes to do it. I am going to show you some facts which, if you will pay attention to, will stagger you. "Oh," they say, "we are building battleships, and we are building larger battleships, and therefore it costs more money." We built one last year and propose to build two this year. Since 1896 the Republican administration built an average of two each year. The chairman of this committee knows, and every member of this committee knows, that contracts for battleships are let by tons displacements, and therefore the amount of construction that each carries is measured by the displacement. You may not understand that proposition unless you study these books, and I call on you to get a Yearbook and see if I do not tell the truth. The displacement tons in 1912 were 66,860.

Now, turn back to 1899 and you will find that the displacement tons were 105,084. In that year, in 1899, the program of the Republican side of this House was nearly twice what it was in 1912. I call the attention of the chairman to what I am saying. They appropriated then $48,000,000. If we should add on two battleships now, Mr. Chairman, in this program, as we propose this year, it will not go to 105,000 tons of displacement. The battleship that the gentleman talks about that is costing so much is not so much larger than others in this book. It has a displacement of 31,500 tons; considering the accessories that are carried in the bill carries it up to 68,000 displacement tons. If you add one more to that, which we are going to do this year, it would not come to 105,000 tons. It will run about $148,000,000 or $150,000,000 to build those two battleships and pay expenses.

Mr. BATHRICK. Mr. Chairman, will the gentleman yield?

Mr. TRIBBLE. I will yield after a time. Mr. Chairman, I desire to call attention to 1908. That is only four years ago. I see that the gentleman from Illinois [Mr. Foss], the ex-chairman of the Naval Committee, is present in the Chamber. The chairman of this committee at the present time is also present, and they both know I am telling the truth. The displacement last year was 66,000 tons. Four years ago, under former administration, the displacement was 123,480 tons—twice as much as it is this year. That was in 1908, and that appropriation for that year was $122,000,000. My colleagues should consider these facts. It is contended that we have to provide for construction of ships. Where is the construction? This book tells the truth. These are facts. I will read the report from the Navy Yearbook, including three years, to wit:

1899 (55TH, 3D)—AUTHORIZED.

Mr. Chairman, they say, "Oh, we have a monster battleship to build this year." I carry you back to 1898. In that year we built six battleships. The total ton displacement for the six was 81,000 tons, while the battleship construction for 1912 was 31,000 tons displacement. It cost more per ton to build a battleship in 1898 than it does now. Gentlemen say it costs more now; I challenge that statement and say it cost more to build then, and the records will show it.

Mr. SHARP. Will the gentleman yield?

Mr. TRIBBLE. With pleasure.

Mr. SHARP. May I ask the gentleman as a member of the Committee on Naval Affairs what has come over the spirit of the majority of that committee that they now recommend two battleships where in the past they have been fighting for one?

Mr. TRIBBLE. Well, sir, I can not answer the gentleman's question. I will say to the gentleman frankly I have been misunderstood on this proposition. I have contended all the time, and I contend to-day, that the expenses of this bill, amounting to $128,000,000, should be cut down from $15,000,000 to $20,000,000, and it can be done in my opinion. I want to say

further as far as I am concerned I believe in the policy of battleship construction sufficient for our country's defense. I believe we ought to keep abreast with the times and keep our Navy up to date. In regard to the old battleships which we have now, commissioned 20 or 25 years ago, it is contended they are worthless for naval service. Thus I say dispose of them; put them in reserve for coast defense in case of war. On these old vessels there is a full complement of officers and men. Why burden the people with this expense if they are out of date? Put these old battleships in reserve, sell them or give them away, and build up-to-date battleships; and take the men from these old ships when men are needed to commission a new battleship instead of increasing an appropriation $2,000,000 for officers and men for new ships, as we have done in this bill. I am going to vote for one battleship.

Mr. HENSLEY. Now, it is the gentleman's opinion that items in this bill can be reduced over those mentioned in the minority report, as I understand the gentleman?

Mr. TRIBBLE. Yes; I certainly do.

Mr. HENSLEY. Now, I will ask the gentleman from Georgia if it is not a fact that for information for the committee we are dependent absolutely upon the Navy Department in that regard?

Mr. TRIBBLE. I will answer the gentleman by asking him if he has had any other information, and does not all information on this bill come directly from the heads of the Navy Department?

Mr. HENSLEY. That is the point to which I desire the gentleman to devote himself.

Mr. TRIBBLE. The only information furnished the committee comes from naval officers.

I will ask the gentleman if he had any part in making up this bill; was he a member of the subcommittee?

Mr. HENSLEY. I was not.

Mr. TRIBBLE. I was not on the subcommittee that made the bill and refuse to stand sponsor for it. The country knows where I stand as to this bill.

Mr. HOWARD. Will my colleague yield?

Mr. TRIBBLE. Let me answer this question and then I will yield to the gentleman. Now, Mr. Chairman, I want this House to know where I have stood in the committee in answer to the gentleman's question. My contention has been that the full committee should take up this bill from one end to the other, not a subcommittee, but the full committee, and go through it item by item and consider each item in the bill. Has that been done?

Mr. HENSLEY. It has not.

Mr. TRIBBLE. Well, the gentleman and I are together on that proposition.

Mr. PADGETT. May I interrupt the gentleman?

Mr. TRIBBLE. Yes.

Mr. PADGETT. I want to say that is just exactly what was done.

Mr. TRIBBLE. In what way?

Mr. PADGETT. After the subcommittee framed the second draft of the bill it was submitted to the full committee and opportunity given to consider every line and every word in the bill and to take it page by page until Members asked that we do not take the time to go through it that way, but that if anybody had objection to any one item, let him say so.

Mr. TRIBBLE. Yes, Mr. Chairman, the gentleman has gotten to the point. Opportunity was given to Members if they had objections to any item in that bill to offer them, and I made a motion then and there to go through this bill item by item and the gentleman voted against it. I can not see how he contends that such opportunity was given me when he, as chairman, voted against my motion. He knows I have stubbornly contended both years of my service to consider this bill item by item in full committee. There are several thousand items in the bill, each appropriating money. I voted against this bill in committee and shall vote against it in the House.

Mr. HOWARD. I would like to ask my colleague from Georgia whether or not he can give the committee any information as to where the great extravagances in the appropriations for the Navy Department have taken place, and if it is not a fact that the growth of extravagance in the naval program has been on the shore; that the United States Government is now spending about two or three times as much on her shore as any other country in the world?

Mr. TRIBBLE. Yes; that is true.

Mr. HOWARD. Right on that point, the gentleman from Missouri [Mr. HENSLEY] asked a question about the source of information. Is it not a fact all the information obtained by the Committee on Naval Affairs has been obtained from those in authority at the Navy Department, who directly benefit by extravagant appropriations?

Mr. TRIBBLE. Yes.

Mr. HOWARD. And is not their testimony warped and biased in their own interests?

Mr. TRIBBLE. Certainly.

Mr. CALDER. Will the gentleman yield?

Mr. TRIBBLE. I will answer the gentleman's question. I will answer it by an illustration. When that great leviathan of the ocean, the *Oregon*, steamed out of San Francisco Harbor, her great propelling arms moving her on the breast of the Pacific around the great South American Continent, well do we all remember how the hearts of the American people stood still. Ah, yes; when she moved into the Atlantic Ocean the school children throughout the country watched her movements with patriotic pride, and when she rushed to the scene of the strife and sent those Spanish vessels to the bottom of the sea the women of the country shouted with joy. Upon that great vessel was Admiral Clark and six associates. There were seven commissioned officers on that great vessel who carried her around the South American coast and destroyed the Spanish fleet. Now, the gentleman from Georgia [Mr. HOWARD] asked me where are the expenses? I use this illustration to give emphasis to my answer. There was the *Oregon*, destroying an enemy, with all the officers necessary. Look at the difference in this time of profound peace; the *Wyoming* has 50 officers aboard and a thousand men. All the battleships are loaded down with officers just as the *Wyoming*. Again, I will say to the gentleman from Georgia, at the Battle of Lake Erie, to which the gentleman from Pennsylvania [Mr. BATES] referred, there was Admiral Perry standing alone as commander without commission from the United States Government except the commission of patriotism, with men behind the guns, not 50 officers to superintend the guns.

Mr. SHERWOOD. And 22 years old.

Mr. TRIBBLE. And only 22 years of age, as the gentleman from Ohio, Gen. SHERWOOD, suggests. Who were his associates? The men behind the guns. Ah, the gentleman talks about the men behind the guns. The men are not behind the guns to-day. They are on the land drawing salaries, like Solomon in all his glory. They toil not; neither do they spin. How many of them go on the sea? There are 1,157 stationed on land, most of them doing nothing, but some of them, I concede, have employment and are essential to the efficiency of the Navy. There are over 1,000 of them on the retired list. Over 2,000 of our officers to-day are on land, and I believe the facts will disclose upward of 3,000 on land.

Mr. SIMS. How many on the sea?

Mr. TRIBBLE. I think I can answer that. There are about 1,200 on the sea, and they are calling for 3,000 more. What are they doing? Some gentlemen want to know what these officers are doing on the land. You have heard of "lame ducks," have you not? That term is usually applied to Congressmen. This is a new kind of "lame duck." This naval lame duck is supposed to go to sea, and necessarily he must have wings with which to fly; but these ducks have no wings, they do not go to sea. They are land ducks.

Mr. LOBECK. They can not swim, because they have no feet.

Mr. TRIBBLE. The gentleman suggests that they can not swim. Let me tell you what they can do, they can use the quills and write the bills by which Congress provides for their support. I have information of one officer being engaged two years on a bill for Congress. If I had time I could point out, item by item, gross extravagance contained therein. When we entered the Spanish-American War we appropriated that year only $30,000,000. You propose this year to appropriate $148,000,000. They say it is on account of the construction of vessels. In 1899 only $48,000,000 was appropriated, and in that year they were constructing six battleships. Ah, the gentlemen say, the battleships cost so much more now than they did then. Let us see about that. The *Oregon*, as the yearbook will show, cost $6,576,032.76. Recently constructed and put into commission was the *Michigan*, and she cost $6,795,332. The *South Carolina* was recently put into commission, and she cost $6,683,000. Last year we authorized one battleship. During the Republican administration they built navy yards for the purpose of constructing battleships. They appropriated the money to build those yards. We do not have to do that now. The other side of the House appropriated millions upon millions of dollars to build navy yards to construct battleships, and in the construction proposed we have the benefit of the yards, and it seems to me construction should cost less.

Mr. HOBSON. Mr. Chairman, will the gentleman yield for a question?

The CHAIRMAN. Does the gentleman yield?

Mr. TRIBBLE. I will yield to my colleague.

Mr. HOBSON. The gentleman has remarked about the extravagance of the bill, carrying $127,000,000 before the new construction program begins. I wish to ask the gentleman if he agrees with his colleagues who signed the minority report in stating that that part of the bill had been reported and adopted after a most careful and painstaking and effective investigation?

Mr. TRIBBLE. Who made that careful and painstaking and effective investigation?

Mr. HOBSON. I suggest to the gentleman to read the minority report. Does the gentleman agree with the minority report or not?

Mr. TRIBBLE. The gentleman from Alabama knows I do not agree with the minority report. I am nearer to the gentleman from Alabama on one proposition than I am to the minority report, because the gentleman from Alabama admitted on the floor of this House that the expenses of the Navy can be cut down one-third, and the minority report says not.

Mr. HOBSON. I just wanted to have the gentleman put that statement in writing. I was sure he was of that opinion.

Mr. TRIBBLE. That is where I stand, and I say to you to-day, Mr. Chairman and gentlemen of this House, that the only way you can get relief is to reconstruct the naval policy from bottom to top.

Why, gentlemen, it is conceded here that you have got to have a sufficient number of men, and it is conceded that you have got to have a sufficient number of officers, but why so many officers and men? Consult the Navy Yearbook at the time when the *Oregon* sent the Spanish fleet to the bottom of the sea and see how many they had on land duty then—not exceeding 250. There are 45 and 50 officers on the battleships of the *Wyoming* class this day of profound peace, when there is not a ripple to disturb the peace and quietude of the American people, except a little skirmish going on down here in Mexico. We could send one company of Union soldiers, such as fought against the Confederates, or half a company of Confederate soldiers down there [laughter] and drive the whole push into the bottom of the ocean. [Applause.]

Mr. GOODWIN of Arkansas. Will the gentleman yield?

Mr. TRIBBLE. In one minute. Why, Mr. Chairman, they tell you you must have these officers. As I have said, there are 50 officers on the *Wyoming*. You can see for yourselves by looking in the Naval Register. There are 50 officers on one ship sailing around over the sea. They say they need 3,000 more officers. Why do we need them? We now have near 2,500 stationed on land and the ships crowded. I want to say to you that if our old vessels are of no benefit, take the crews that are on the old vessels and put them on the new vessels that are being constructed. Educate these boys down here at Annapolis, if need be, a sufficient number of them. After they receive their diplomas select a part of them for service and return part into private life after a service of three or four years, but without retired pay. There are hundreds of them in my district who would be glad to come to Annapolis and get an education, serve the country four or five years without any compensation, just for the benefit of the education, and then retire to private life, subject to call to war service if the country ever needed their services to go upon these battleships.

Before I go further on that line, gentlemen say you can not fight a battle without trained soldiers; that all officers and men must have training for war service; that you must have trained soldiers; that you must have trained seamen; that you must have a thousand of them on each of these vessels; that you can not fight a battle unless you have got them. I want to say to the gentleman from Arkansas [Mr. GOODWIN]—and he knows it to be a fact—that the finest soldier that ever drew a blade, except the Confederate soldier, was the Union soldier, and he was drafted into the service from the hills, mountains, valleys, and plains. The Confederate soldier held at bay all the armies that could be brought against him for four years. Where did he come from? He came from the hills of North Carolina; he came from the mountains of north Georgia; he came from the valleys of middle and south Georgia, from the mountains of Tennessee, from the mountains of Kentucky, from the river valleys of Alabama, and from the plains and valleys all over the South. Most of them had never seen a company of men until they were enlisted. The scarcely knew the battle cry. The gentleman from Alabama [Mr. HOBSON] knows that the men who stood on the firing line and who were the most effective were the men who never fired an Army musket until it was handed to them when they enlisted as privates.

Mr HOBSON. The gentleman will recognize the fact that in that war both sides were armies of raw recruits, so that neither side had an advantage in that respect.

Mr. GREGG of Texas. I think the gentleman from Georgia is entitled to have a quorum present, and I make the point that there is no quorum present.

The CHAIRMAN. The gentleman from Texas makes the point of no quorum present. The Chair will count. Ninety-four Members present, not a quorum. The Clerk will call the roll.

The Clerk proceeded to call the roll, and the following Members failed to answer to their names:

Adair	Ellerbe	Kitchin	Reyburn
Ainey	Evans	Konig	Riordan
Ames	Fairchild	Korbly	Roberts, Mass.
Andrus	Ferris	Lafferty	Sabath
Ansberry	Focht	Langham	Scully
Anthony	Fordney	Lawrence	Slayden
Barchfeld	Fornes	Lewis	Smith, J. M. C.
Bartholdt	George	Lindsay	Speer
Beall, Tex.	Godwin, N. C.	Littlepage	Stack
Berger.	Goldfogle	Littleton	Stephens, Nebr.
Boehne	Gregg, Penn.	Longworth	Sterling
Bradley	Griest	McCall	Sweet
Brown	Gudger	McDermott	Switzer
Bulkley	Guernsey	McKinney	Talbott, Md.
Burnett	Hamilton, W. Va.	McMorran	Talcott, N. Y.
Butler	Harris	Mann	Taylor, Colo.
Carter	Harrison, N. Y.	Matthews	Taylor, Ohio.
Cline	Hart	Mays	Thistlewood
Conry	Helgesen	Moon, Pa.	Thomas
Copley	Henry, Conn.	Morgan, Okla.	Towner
Crago	Higgins	Mott	Townsend
Crumpacker	Hill	Needham	Vreeland
Danforth	Hinds	Nelson	Weeks
Davenport	Howell	Olmsted	Whitacre
Davidson	Howland	Parran	Wilder
Davis, W. Va.	Hughes, Ga.	Patton, Pa.	Wilson, Ill.
De Forrest	Hull	Peters	Wilson, N. Y.
Denver	Humphreys, Miss.	Porter	Wood, N. J.
Dickson, Miss.	Johnson, Ky.	Rainey	Young, Mich.
Dixon, Ind.	Johnson, S. C.	Ransdell La.	
Dupré	Kahn	Rauch	
Dwight	Kent	Redfield	

The committee rose; and the Speaker having resumed the chair, Mr. ALEXANDER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee having under consideration the naval appropriation bill, and finding itself without a quorum, he had directed the roll to be called; that 253 Members had answered to their names, and he presented herewith a list of the absentees.

The SPEAKER. The gentleman from Missouri, Chairman of the Committee of the Whole House on the state of the Union, reports that that committee having under consideration the naval appropriation bill, and finding itself without a quorum, he had directed the roll to be called; that 253 Members answered to their names, and he returns a list of the absentees. A quorum is present, and the committee will resume its sitting.

Accordingly the committee resumed its sitting, with Mr. ALEXANDER in the chair.

Mr. PADGETT. Mr. Chairman, before the gentleman from Georgia proceeds I want to state that I have been notified that a quorum must be present, and I beg to give notice to the House and ask Members to attend during the general debate, otherwise the point of no quorum will be made.

The CHAIRMAN. The gentleman from Georgia has 25 minutes remaining.

Mr. TRIBBLE. Mr. Chairman, my remarks are in noways a criticism of my colleagues on the committee. My attack is on the system that has grown up in this country, just as it has in all Republics from the beginning of time until the present day. I am attacking the system. My colleagues on the committee are faithful, they are worthy, they are competent, and the chairman of the committee is competent and worthy of the high position he now occupies on the committee. While frequently I do not agree with the chairman, he has a right to his views, as I have to mine. The work on our committee has been harmonious.

In 1896, when we went into conflict with the Spanish Government, we appropriated under the first section of this bill $8,000,000 for the pay of officers and men. At the present time we appropriate $39,000,000. Think of the increase in these few years. Why, Mr. Chairman, we appropriate nearly as much to-day for officers, active and retired, as was appropriated in 1899 for the entire naval expenses, when they were building six battleships. How can gentlemen on the floor of the House answer such a proposition as that? Eight million dollars for the pay of officers and men in 1896, and to-day thirty-nine millions for the pay of officers and men. Where does it go to? I have been trying to show you to-day. Some gentlemen have come to me since I have been speaking and asked me to point out where we could cut down these enormous expenses. Turn to page 195 of the hearings. Ah, gentlemen, I call attention of this side of the House again to the fact that the Navy Department itself seems to think that the Democrats are easy marks.

The amount recommended for Pearl Harbor before we came in was $10,115,000. Gentlemen may be surprised to know that we have spent $10,000,000 over on that little island. The gentleman from Texas says he does not know where it is. Now, the Democrats have come in, and since they have come in the Navy Department has raised it and asked us to give them $1,816,000 more—nearly $2,000,000 more—and we Democrats have agreed to it and have appropriated over a million in this bill. I quote from the report.

The increases under various items are—

Dock lengthened to 1,000 feet, from $2,700,000 to $3,486,500	$786,500
Floating crane, 150 tons instead of 100 tons, from $250,000 to $335,000	85,000
Marine railway, not originally contemplated	100,000
Naval hospital, from $211,000 to $300,000	89,000
Coaling plant, from $300,000 to $960,000	660,000
Fuel oil and gasoline station, from $45,500 to $131,000	85,500
Quarters, Marine Corps, estimate increased by	10,000
Total	1,816,000

Mr. PADGETT. Will the gentleman yield?

Mr. TRIBBLE. I will yield to the gentleman.

Mr. PADGETT. The authorization was ten millions, as the gentleman states, but we have not appropriated it yet. The one million that the gentleman refers to is a part of that original ten millions.

Mr. TRIBBLE. Yes; and in this bill is $100,000 for water front, $30,000 for another proposition, $65,000 for another, $24,000 for officers' homes. We have spent $93,000 for homes for officers there. Does the gentleman think we ought to spend $24,000 more building houses for officers at Pearl Harbor? Think of it! One hundred and seventeen thousand dollars for houses of officers on an island so remote from our continent.

Also, I see $50,000 for torpedo slips, $100,000 for a marine railway on an island where—the gentleman from Texas says he does not know where it is. Here is $30,000 for railway equipment, $100,000 for a dry dock, and the previous administration has spent $3,000,000 for a dry dock already.

Mr. GARRETT. Mr. Chairman, will the gentleman yield?

Mr. TRIBBLE. Yes.

Mr. GARRETT. Is it true, as the gentleman from Tennessee [Mr. PADGETT] has just stated, that this million dollars is a part of the original authorization and not an addition to it?

Mr. TRIBBLE. I say it is an excess appropriation this administration is called on to provide for, and we are to continue this appropriation at Pearl Harbor and spend in total $12,631,500.

Mr. PADGETT. It is part of the original $10,000,000.

Mr. GARRETT. Mr. Chairman, will the gentleman yield?

Mr. TRIBBLE. Mr. Chairman, I will ask the gentleman not to interrupt me now. I turn to page 4 of the hearings, under "Pay, miscellaneous," and I desire to call the attention of my colleagues to the fact that the Democratic Party has increased the expenses for court-martials. The previous appropriation was $51,000 and our appropriation is $62,000. Then go on down to another item and see the cost of special construction. Our appropriation is $9,000 and the previous appropriation was $6,000. Go down to the next item—postage, telephones, telegrams, and cablegrams—previous administration, $71,000; our appropriation, $81,000. Then, under the head of "Necessary incidental expenses"—and God only knows what that means—we have increased the amount from $235,000 to $264,000. How does this look for Democratic economy? I call the attention of the gentleman from Tennessee [Mr. GARRETT], who has always been very kind to me—and I am satisfied he wants light on this question—to miscellaneous, $136,000, under the head of "Contingent," previous administration, and $201,000 for the same purpose this administration, an increase in that item of nearly $100,000. In another item just above, typewriters, the previous administration $46,000 and ours increased to $59,000. That kind of economy does not suit me.

Mr. GARRETT. Mr. Chairman, this was the particular matter concerning which I desired information from my friend. There seems to be an issue between the gentleman from Georgia and the gentleman from Tennessee [Mr. PADGETT], my colleague, upon the million-dollar appropriation. It seems there was an authorization of some ten million of dollars.

Mr. TRIBBLE. Yes. Now it is $12,631,500.

Mr. GARRETT. The gentleman from Tennessee, the chairman of the committee, stated that this million which is appropriated is a part of the ten million, not an addition to it.

Mr. TRIBBLE. No; I do not so understand it; it is an increase.

Mr. GARRETT. That is the question.

Mr. TRIBBLE. I contend that they have asked for an addition of nearly $2,000,000 more, and that a Democratic committee has given it to them, or has started to give it to them, and has appropriated part of it in this bill. Mr. Chairman, I want to call attention to two or three more items. On page 65 of the hearings, you see such items as "stationery," and in the previous administration you will find $135,000, while under the present administration $182,000. Do you gentlemen blame me as a member of this committee for coming in here and crying out and crying out loud against such gross extravagance? This bill carries nearly $150,000,000.

Mr. GOODWIN of Arkansas. Mr. Chairman, will the gentleman yield?

Mr. TRIBBLE. Yes.

Mr. GOODWIN of Arkansas. Mr. Chairman, much has been said about the policy of this Government, and the policy with reference to naval construction. The gentleman is a member of the Committee on Naval Affairs. I am not in accord with him, as being in favor of one battleship. I favor none, but when legislating it seems to me that we ought to legislate with reference to a certain policy. The gentleman is an authority on naval affairs.

Mr. TRIBBLE. Mr. Chairman, I hope the gentleman will not take my time.

Mr. GOODWIN of Arkansas. I suppose the gentleman has some knowledge as to the policies that prevail in European countries, as respects the different alliances, the triple alliance and the quasi alliance. I shall like to have him direct his remarks, if it be in accord with his views, as to how we should meet, if we meet at all, those two policies that prevail in Europe.

Mr. TRIBBLE. Mr. Chairman, I wish I had time to answer the gentleman's question, but I have not. I state on the floor of this House in my opinion we have enough officers, including the retired, to furnish a complement of officers not only for our battleships but for every battleship in the world, and they would be well manned. In fact, I believe they would be equipped as abundantly as was the Oregon with the brave Clarke and his 7 commissioned officers. He had with him, also, 7 cadets, 3 ensigns, 7 engineers, and 2 surgeons and paymasters. I am here to say in conclusion that I am in favor of a good Navy. I stand for a sea-going Navy and not a land craft of officers.

Mr. Chairman, I have as much pride in the accomplishments of our Navy as any man in this House, and I yield to no man in loyalty to the Navy. Where is there a man in this country whose heart did not throb with admiration and pride when Admiral Dewey pushed his gunboats into Manila Bay and thrust aside those great German war vessels which lay alongside, growling like dogs and roaring like lions, but which dared not touch the flag he bore? [Applause.] For that kind of a Navy I stand. Therefore I shall vote for one battleship of modern structure, ready for the conflict should it suddenly come. [Applause.]

The CHAIRMAN. Does the gentleman reserve the balance of his time?

Mr. TRIBBLE. I yield the balance of my time to the gentleman from Missouri [Mr. HENSLEY].

Mr. HENSLEY. Mr. Chairman, I desire to say here and now that, if it were not for the fact that I feel deeply interested in this subject, I would not consume the time of the committee by making a speech in the closing days of this session with the calendar crowded as it is. But if ever I felt justified in taking a stand and in making a fight for a proposition it is upon this bill coming from the Committee on Naval Affairs, which carries something near $150,000,000, $20,000,000 more than any bill has carried heretofore. I feel that if ever a minority or a body of men were clad in the armor of a righteous cause, we are in this fight. We therefore proceeded to present the minority report to this House, regretting that it was necessary to do so. If we had not entertained positive convictions as to our duty in the premises, first, with respect to the Nation and incidentally to our party, by keeping inviolate the pledges made to the people, we would not have pursued this course. We did not therefore desire to sacrifice principle nor disregard platform pledges for the insufficient plea made for party harmony which we might otherwise seek to promote.

I can not subscribe to a great many things said by my colleague upon the committee, Mr. TRIBBLE, and perhaps he does not subscribe to some of the things for which I stand; but I do wish to say in this connection that I, too, stand for an adequate Navy. I favor an adequate Navy, not only for the glory of the Navy, but for the glory of the American people as well. I favor an adequate Navy that will protect all the legitimate interests of this great country of ours either at home or abroad. I do not believe, Mr. Chairman, that the American people desire to go further than this. I must confess that our Navy is inadequate for a great many purposes. It is inadequate for the purpose of conquest, and I believe that I am speaking the sentiment of the great masses when I say that the time has not arrived—and I

trust it will never arrive—when we should trample beneath our feet the principles laid down by the fathers of our country by increasing the tax burden in order that we might build a magnificent Navy and establish a large standing Army for purposes of conquest. If I believed that we are to face about upon these questions, it would be so abhorrent to my convictions that I would be ready now to resign my seat in this House and return to my home rather than violate those principles which I conceive to be so essential to the perpetuity of this free constitutional Government of ours. I am ready to confess that our Navy is insufficient and inadequate to meet the combined fleets of the whole world. It is also inadequate to gratify the greed and avarice of those who annually make millions of dollars out of the construction, repairs, coal, powder, armor, and armament which is used in the construction and to maintain our Navy, and I am constrained to believe that for this purpose the Navy would be inadequate, even though we had a thousand battleships. We can not hope by legislation to gratify the wild-eyed extravagance of those who measure all political wisdom by the magnitude of the fund to be squandered. For the purpose for which the Navy was intended, that of defending our country against attack by any nation on earth, I am convinced it is amply sufficient; and for any other purpose we need no Navy at all. I can not believe to merely increase the number of battleships will make our Navy effective. Our Navy is now sadly in need of additional torpedo boats and other auxiliaries so as to make our present battleships effective. Sufficient provision has not been made in this bill, the largest ever reported to Congress, to so equip our present battleships. It occurs to me as bad business judgment to build two additional battleships before we have equipped our present ships with proper auxiliaries in order to make them effective. I favor and shall vote for one battleship rather than authorize more at this time, and I trust and believe we will have sufficient votes to reduce this bill to an authorization of one battleship. It has been my policy, and I shall at all times continue to ascertain, if possible, the necessity for these large items of expense, not only with respect to the Navy but affecting all departments of Government, before I shall support any of such bills. I shall in no case impair the efficiency of any department.

The officers and enlisted men in our Navy number 65,614, and the vessels of all kinds number 277—38 battleships, of which 33 are ready for service and 5 are in process of construction; 11 armored cruisers; 63 submarines, of which 47 are complete and 16 are in process of construction; 28 torpedo boats; and 54 destroyers, and numerous other auxiliary vessels. The 38 battleships are equipped with 148 12-inch guns, 32 13-inch guns, and 52 14-inch guns, and, in addition to all these, we have guns of smaller caliber too numerous to mention. Take, for instance, that nation concerning whose warlike movement some of our friends are so much disturbed, Japan, we have 148 12-inch guns and Japan 84, a difference of 64 in our favor. Our Navy has 32 13-inch guns and Japan 56, a difference of 24 in their favor. We have 52 14-inch guns and Japan 12, a difference of 40 in our favor. Our Navy has in large guns, from 12-inch to 14-inch, 232 and Japan 152, a difference in our favor of 80 guns; and yet, in the face of this showing, some of our people are so disturbed they can hardly sleep because of fear lest Japan shall with one fell swoop destroy our Navy and thus victimize ninety-some millions of American freemen. From this comparison such a conclusion is too ridiculous to entertain. But let us follow this comparison a little further. The navy of France has 118 12-inch guns and the American Navy 148, a difference in our favor of 30. France has 54 13-inch guns, a difference of 22 in their favor. The navy of France has no 14-inch guns, which leaves a difference of 52 in our favor. In all we have 232 large guns and France a total of 172—60 in our favor—yet we are urged to build more battleships because other nations will build them. Take, for instance, the navy of Germany, one of the greatest on the waters of the earth. Germany has 198 12-inch guns, a difference of 50 in their favor. We have 32 13-inch guns and Germany no 13-inch guns. Germany has 40 14-inch guns, which leaves a difference of 12 in our favor. Including all the large 12-inch to 14-inch guns, our Nation has 232 as against 238 for Germany, leaving 6 guns in their favor; but, mind you, the fact that we have 32 more 13-inch and 12 more 14-inch guns beyond doubt makes our Navy the superior. England exceeds us 152 in 12-inch guns and 162 in 13-inch guns, but she has no 14-inch guns and we have 52, yet when we consider that in the event of war she would be compelled to divide her navy into a great many fleets or leave her vast possessions in every part of the world unprotected, it seems to me a clear proposition that she could not send against us any fleet which our Navy would be unable to resist.

Furthermore, the fact that our Navy is now divided into two fleets, one of which is called the active fleet and the other the reserve fleet, to be used only in case the active fleet should be defeated, proves the impossibility of using to advantage more than that number in one engagement. It is therefore plain that the victory in a naval battle does not depend on the number of ships, but on other conditions, such as the character of powder, of the guns, of the shells, and of the patriotism, courage, and skill of the men behind the guns. If the powder in our guns were superior in force and in uniformity of character, the shells from our guns would be propelled with greater accuracy and more destructive force. If the powder in our guns should propel the shells with sufficient force to penetrate the armor of the enemy's ships, and the powder in their guns were lacking in the power to cause their shells to penetrate the armor of our ships, it is manifest we would destroy their fleet, however superior it might be in numbers. Then how can you insist that the efficiency and adequacy of the Navy depends not on the conditions mentioned, but upon the further increase in the number of battleships, when there has been nothing advanced to prove it? In fact, this question received little or no attention in the committee, and no one has undertaken to tell us why we need more battleships. I believe we should exercise the same calm judgment in these matters as we would concerning our own private interests, and this shall be my course.

Again, the superiority of the guns is a condition that would determine the result of a battle. The size and mechanism of the guns is far more important than their number. A 14-inch gun has a destructive force 50 per cent greater than a 12-inch gun, and on account of the flatness of the trajectory, the winds, and other causes, explained to the committee by the experts, shoots with an accuracy 30 per cent greater than the 12-inch guns. In explanation of the difference between these guns, Admiral Twining, Chief of the Bureau of Ordnance, makes the following statement (p. 72, hearings, 1912):

The CHAIRMAN. What is the result of your tests of 14-inch guns? Are they entirely satisfactory?

Admiral TWINING. Yes, sir.

The CHAIRMAN. What is the comparison between the 12-inch .50-caliber guns and the 14-inch .45-caliber guns? I believe those are the calibers.

Admiral TWINING. The 12-inch 50-caliber is the latest type of 12-inch gun.

The CHAIRMAN. What do you regard as the destructive force—the power of those two guns—speaking relatively, at 10,000 yards?

Admiral TWINING. I suppose the destructive force of the 14-inch gun is 50 per cent greater than the 12-inch at that range.

The CHAIRMAN. What is the relative percentage of accuracy of the two guns at that distance?

Admiral TWINING. The 14-inch gun is probably 30 per cent more accurate at extreme ranges.

Mr. FOSS. What do you base that on?

Admiral TWINING. The flatness of the trajectory and the fact that the 14-inch shell, having almost twice the weight of the 12-inch, will keep its steadiness of flight much longer and be affected much less by winds and other external conditions toward the end of the trajectory. Whereas the comparison would be in favor of the lighter shell with greater velocity over the first part of the trajectory, in the latter part the comparison is in favor of the heavy shell.

The CHAIRMAN. What is the difference as to the destructive effect?

Admiral TWINING. That is based on the greater probability of hitting and the greater effect of a hit. A shell weighing 1,400 pounds will have more effect when it hits than a shell weighing 870 pounds, and its bursting charge is 50 per cent greater.

Mr. FOSS. How far will a 14-inch gun throw a projectile?

Admiral TWINING. We used to have a thumb rule that a gun would fire a mile for every inch of caliber. In that case the 14-inch gun would fire 14 miles, and I think it would not fall far short of that. In nautical miles that would be 28,000 yards, and I should judge it would do at least that. However, that would involve an angle of elevation that we can't use on board ship on account of the strength of the ship itself.

This is a positive showing in our favor that can not be disputed; and further than that, it does not take much wisdom to understand that the thousand miles of water separating us from these warlike countries is worth hundreds of battleships dotting the ocean, for we are not embroiled in the quarrels and the many difficulties these countries are engaged in by pursuing the policy of the survival of the fittest in the acquisition and protection of their distant territory. But the proponents of a large and magnificent Navy do not base their contention upon this comparison, but, instead, declare we ought to build more ships, not because our Navy is inadequate, but because foreign governments will build more. Now, let us see about that. The truth is that foreign governments have been struggling to keep up with us instead of us endeavoring to keep up with them. Within the last 10 years we have spent $410,553,321 more on our Navy than has France, $452,666,115 more than Germany, and $1,019,890,156 more than Japan. It seems to me if there ever was a deadly parallel drawn this certainly constitutes one.

Yes, I have not a doubt with reference to the system employed by the beneficiaries of this building program, both in this country as well as in others. Their representatives keep up a systematic campaign through the press of the country for a large navy without stopping to consider the fact that to-day we are short over 3,000 officers necessary to man the battleships we already have. This is a remarkable condition of affairs when you consider that we have about 1,000 naval officers on the retired list whose pay, notwithstanding they are ren-

dering no service to the American people and most of whom never saw the smoke of battle, far exceeds the pay of the officers in the service. The rear admirals on the retired list are drawing over $1,000,000 annually, a beautiful system of rendering service to the American people, garbed in a dress suit and crowded around banquet tables, putting in the most of their time campaigning with Members of Congress to have the amount carried in the naval appropriation bills increased. It was stated on the floor of this House last year by the ranking member on the Committee on Naval Affairs, the gentleman from Texas [Mr. GREGG], that it would take over $300,000,000 to build the necessary torpedo boats and other auxiliaries to equip the battleships we already have as fighting units. We need the auxiliaries badly. Men who know say that to put a battleship in line of action without being protected with the necessary auxiliaries would be a criminal policy on the part of our Nation. But the armor-plate people and the big interests are urging more battleships, costing sixteen to twenty millions, instead of these needed boats which will cost less than $1,000,000 each.

Mr. Chairman, on Saturday I listened most attentively to the speech made by the gentleman from Illinois [Mr. Foss], and I must say that I was to some extent amused by his remarks. He is the ranking minority Member on the committee, having served as the chairman of the Committee on Naval Affairs for a number of years. The gentleman from Illinois seemed to take special pleasure in criticizing the majority of this House because it had treated this subject as a party question and, as he stated, had assumed the attitude of partisans in connection with the national defense of our country. I most heartily agree with Mr. Foss that we should not approach this subject from a partisan standpoint; that it should be placed upon a higher plane than party politics. It was indeed amusing to see how quickly he turned from this splendid position and delivered one of the most partisan speeches I ever heard delivered on the floor of this House, in the course of which he declared that his party was a friend to the Navy and that the Democratic Party had never been in favor of a Navy. In the hour consumed by the gentleman from Illinois he could not have used stronger argument, nor have resorted to more effective methods to reduce this subject to the lowest plane of partisanship.

On Saturday evening I took occasion to go to my office and review the records of Congress and consult some of the speeches heretofore made by my friend, Mr. Foss. I found that on numerous occasions he had made almost the identical speech that he delivered here on Saturday. In some three or four speeches, covering as many Congresses, he refers to the position taken by the distinguished gentleman, Mr. Bryan, of Nebraska, who when a Member of this House delivered a speech in which he declared that the Navy was adequate to meet all the needs of this great country of ours. Can you dispute that proposition? Was not the Navy adequate and sufficient at that time, or at any time before or since, for that matter, to meet all the needs of our country? If that proposition can be successfully disputed, then I have not read the history of my country aright. The gentleman gives his unqualified indorsement to this bill, saying that it was framed along the line that he had framed bills heretofore; that it conformed to the building program of the Navy; and then turned around and attempted to deal the majority on this floor a blow, because of the very fact that this bill carries several millions more than any naval bill heretofore reported from this committee. Then he takes the aggregate of the appropriation bills pending and undertakes to show that the Democratic Party is going to violate every pledge made to the American people in the last campaign. With what consistency can the gentleman stand upon the other side of this House and compliment and congratulate the chairman of this committee upon the framing of this bill, which is based absolutely upon estimates received from the department of Government, wholly Republican, and then in the next breath criticize this Congress for doing that which he indorses? I agree with the gentleman that the bill carries too much money, and I appeal to him to not be actuated by partisan reasons, but to rise above those considerations and join those of us who are endeavoring by every means within our power to reduce the amount of this bill. [Applause.]

Mr. Chairman, I desire to call attention to some figures submitted by the gentleman from Illinois:

In 1897 our appropriation was $33,003,234.19.
In 1909 our appropriation was $136,935,199.05.

We should deal with this question, it seems to me, as business men as well as patriots. It requires as much patriotism to guard carefully the rights of our people in connection with the expenditures of government as it does along any other line. Away back in the district which I have the honor to represent there are citizens, humble though they may be, who contribute their mite toward the expenditures of this Government, and what is true in my district is true with respect to every other district in the country. We should keep them in mind. We should be patriotic enough to guard their interests, the humble citizen as securely as we would guard the interests of the most powerful and most influential. I hope to see the day when the revenues necessary to meet these enormous appropriation bills are derived from the wealth of the country by means of an income tax, instead of being wrung from the people, as it is now, by a system of taxes placed upon their foods and their wearing apparel. When that day arrives, in my opinion, you will find an increased number of economists on the floor of this House.

Now, let us examine the table of figures submitted by the gentleman from Illinois, showing the expenditures of the Government to keep up this department, covering a period of 12 years. From 1897, 12 years following, the naval expenditures of this country increased 400 per cent. Now, if the expenses increased in that time 400 per cent, what assurance have we that the bill 12 years from now will not carry four times as much as it does now. Mr. Chairman, it is not always safe to look to a thing itself in order to ascertain whether or not it is fallacious, for very often it is necessary to measure the distance and determine where the thing leads to; and I say to the membership of this House, if you take the present bill, carrying nearly $150,000,000, and increase it 400 per cent within the next 12 years, we will be appropriating over one-half billion of dollars for this purpose. Therefore I appeal to you to consider carefully this subject before you take your stand. If we reach the enormous sum of more than a half billion dollars in 12 years, the end will not be in sight, for you appreciate the fact that there is one of the most formidable lobbies maintained here in connection with the Navy that ever existed anywhere. Shall we feed them and pamper them and let them fatten upon the tax money that has been wrung from the American people, until we become less able to meet these important duties and successfully resist this great pressure in the future than we are to-day? Take, for instance, the Navy League. The president of this association in 1912 was Gen. Horace Porter; treasurer, J. P. Morgan, jr., son of J. Pierpont Morgan; and Herbert L. Satterlee, son-in-law of J. Pierpont Morgan, counsel. The purpose of this league is to keep constantly before Members of Congress arguments in favor of increasing the Navy and building more battleships. I am informed that they pay for newspaper space throughout the whole country in an effort to influence and educate the people as to the necessity for a large navy. It is the rights of the masses that should engage the attention of this Congress and not those things advocated by J. Pierpont Morgan and his crowd, who are supporting the Navy League in their efforts to secure larger appropriations for this department of Government. It does not require a Solomon to understand why these people are busying themselves in an effort to increase the appropriation bills coming from the Committee on Naval Affairs. You consult the items in this bill and observe the millions going for armor plate and for other purposes. It seems that that should indicate to you just why they are so insistent in their efforts to secure these increases.

All this prating about patriotism, the glory of the flag, the glory of the country, the glory of a large navy and a large standing army, in connection with the assumption that those who are engaged in this movement have a corner upon patriotism and love for country, is enough to disgust anyone. I yield to no man when it comes to patriotism and love for country. I was taught to revere the flag as the emblem of purity, of truth, and of liberty. I do not believe, Mr. Chairman, that simply because these gentlemen favor one, two, or more battleships that this, in just that particular degree, indicates their patriotism. I repeat, I yield to no one in admiration for the flag and love for country, yet I refuse to commercialize patriotism for the enrichment of the armor-plate people at the expense of the great body of our people who produce the wealth of our country and who safeguard her liberties. I therefore protest against establishing as the standard this inaccurate and grossly insufficient basis. We must give more attention to improving the conditions among the poor of our country, so as to bring comfort and happiness to the homes of our people in order to give the greatest potency to our flag.

We want a government so wisely administered in its every connection that the humblest citizen of the land will love the flag of his country, so that when called upon he will kiss his loved ones good-by, shoulder his musket, and sacrifice his very life in defense of his country. I do not believe that the respect accorded our flag and our country by the other countries of the world is due entirely to the fact that we have so many battleships carrying so many engines of destruction, or because we have a standing army of so many thousand men, but rather, I believe, Mr. Chairman, it is because we have ninety some mil-

lions of American freemen who have been reared under our beneficent institutions, and in whose breasts beat a patriot's heart. That is the position I take, and I repeat that I am for an adequate navy, not a top-heavy navy, my friends, as the gentleman from Alabama [Mr. HOBSON] seems to favor, and it is amusing to observe that when he wanders out into the broad domain of conjecture and guess, when he comes to dealing with those questions of what may or may not happen in the dim distance of the future he can make the most powerful argument I ever heard in my life. He insists upon four battleships, and while delivering his masterful speech last Saturday upon this subject someone on the other side of this House asked him the question, How are you to man the battleships we already have, when it has been stated and not disputed that we lack over 3,000 officers for this purpose? He never did answer the question. He was thrown back upon his resources, and he took the position and made the argument, so familiar to us all, that just as soon as we adopted his plan of national defense all will be well and we can then reduce the expenditures of government. That is the position he took and he never at any time answered the question. So I say to you that we want a navy and we want an effective navy, but we do not want a navy too large to be properly manned and properly equipped for service in case service is required. It occurs to me that if you were ever on one of these battleships you would better understand why naval officers desire more battleships.

The captains in charge of those battleships are monarchs of all they survey. Hundreds of men stand ready to answer their beck and call, and the boat in its every connection is a great floating palace, equipped for ye gods, as palatial as one can conceive of. It seems perfectly natural that the officers would insist upon large battleships instead of small boats, and, mind you, we are dependent upon the officers of the Navy for every bit of information we obtain, as well as for recommendations upon which we predicate the naval bill.

Mr. HOBSON. Will the gentleman yield at this point for a question?

Mr. HENSLEY. Yes; if the gentleman will not make a long speech about his national-defense proposition.

Mr. HOBSON. I will say to the gentleman that we have more than enough officers and men to man all the battleships, and any additional battleships that may be provided in this bill or any bill hereafter.

Mr. HENSLEY. Yes; Mr. Chairman, I remember that question has been put to the gentleman heretofore, and he has said that we can man the battleships we have, if we take the men from the torpedo boats and those auxiliaries, but I am told that it would be almost criminal to put these battleships in action without the necessary auxiliaries. Yes; that is the answer the gentleman made to this question on a former occasion.

Mr. HOBSON. Taking all the necessary destroyers and auxiliaries of the fleet——

Mr. HENSLEY. Oh, be candid, and say that the only way out of the situation is to adopt your plan of national defense. That is the position you have taken on every occasion I have heard you argue the proposition.

In conclusion, Mr. Chairman, I desire to say that the $33,000,000 carried in this bill for battleships represents just about the annual value of the wheat crop of Missouri. The amount necessary to build two battleships would construct about 11,000 miles of road at $3,000 per mile. It would give about $270,000 to each of the 114 counties of that great Commonwealth. At $3,000 per mile would build something like 90 miles of road in each county. This is the amount we propose to pay out with virtually nothing returning, at a time when it is not necessary, whereas internal improvements of this character would be of permanent benefit to all our people, and with good roads throughout our country the mobilization of troops in case of war would be a very simple matter. The increase in wealth resulting to our people because of improved facilities in marketing their produce would immeasurably strengthen our Nation from every standpoint. So I beg of you to vote with us for the construction of one battleship at this time.

The CHAIRMAN. The gentleman from Illinois [Mr. GRAHAM] is recognized.

Mr. GRAHAM. Mr. Chairman, I got the scare of my life in this Chamber on Saturday last as I listened horror struck and spellbound to lurid and eloquent description by the gentleman from Alabama [Mr. HOBSON] of the awful condition to which we would be reduced if we failed to appropriate for six battleships. Invasions from the east and invasions from the west. Germany would overrun us from one side and Japan from the other. My mind involuntarily went back to the days of the Goths and the Visigoths and Huns and Vandals. I could see Genserics and Alarics and Attilas pouring over our land as they poured over the valleys of the Rhine and the Danube 1,500 years ago. And on the other side I recalled Sennacherib and his host of Assyrians "who came down like wolves on the fold."

The cold chills ran up and down my spine as I thought of a repetition of those times, and I began for the first time in my life to regret that the country out in Illinois was so flat and rich and fertile. Oh, for some mountains or even hills, or some ravines or gorges or canyons or caves to hide in; but there are none; and when these invading hosts march up and down the banks of the classic Sangamon our case will indeed be desperate.

The gentleman from Texas [Mr. DIES] followed the gentleman from Alabama [Mr. HOBSON], and brought me some relief. His remarks were like first aid to the wounded. I shall always feel grateful to him for his timely assistance.

If Germany has designs on us, which I do not believe, has she not some stumbling blocks in her way near home? Are her relations with her neighbors such as to encourage her to provoke a quarrel with us?

What about the mad rivalry between her and Great Britain? What about her neighbor to the west? With Great Britain naval supremacy is not a matter of sentiment or even of ambition; it is a matter of food for her people.

We were told about German invasions and about Japanese invasions, and I could hardly help wondering what the outcome of it all would be. I wonder if it occurred to the gentleman from Alabama, as it occurred to me, after I got my breath, that Germany had matters to look after at home, that she entered into a mighty career of rivalry in naval construction with Great Britain and others of her neighbors, and that before she could give much attention to us she would have to consider conditions nearer her own door.

Mr. HOBSON. Mr. Chairman, will the gentleman yield for a short question?

The CHAIRMAN. Does the gentleman yield?

Mr. GRAHAM. I could not very well, unless my friend will agree to have my time extended, because I shall have more to say than I shall be able to say in the time at my disposal.

With Great Britain the case is very different from that of any other nation. I was in that country about 10 years ago, and in the neighborhood of Trafalgar Square I saw a great arch spanning the street, decorated with a variety of vegetable and forest products of Canada, our neighbor to the north, and over the arch was written the legend, "Canada, the granary of England," and the thought occurred to me then, as it often had before, What would England do if some power intervened and prevented her and her granary from having mercantile correspondence?

With England the question of a great navy is a question of food for her people. She must maintain her preponderance on the ocean or else sink at once to the position of a second or a third rate power. But that condition has no application to us. We can live at home and feed our people at home. We do not have to go overseas for a granary.

The gentleman told us about the possibility of invasion from abroad. Well, that did not alarm me much after I thought about it for a while. I recalled that once the great Napoleon invaded Russia, and that he made most careful and detailed plans for that invasion, but he omitted one point. He took no thought as to how he was going to get his army back. And I would respectfully suggest to any nation which has thought of invading the United States that they do not make a similar mistake.

The gentleman from Pennsylvania [Mr. BATES], arguing for more battleships, says many of our older ships are obsolete because of changes and improvements in construction since they were built. He says the world moves and we should move with it. In this he is right, of course; but I think the world has been moving faster than he realizes, so fast that the ships and the armament he pleads for are getting to be out of date. The world is rapidly leaving them behind. Before those already contracted for can be built they will be in the class he refers to.

There are two factors in the problem of naval warfare which have not received the attention in this debate which their importance demands—first, the question of projectiles, and, second, the question of motive power or propulsion.

I contend that changes have taken place in the former and are rapidly taking place in the latter, which must be reckoned with, as both call for radical changes in ship construction.

In naval warfare, as in encounters of every kind, the two main things to be considered are attack and defense. Since the introduction of armored ships there has been a very spirited contest going on between the manufacturers of projectiles and of armor plate. First, they made armor which could not be pierced by shells, then they made guns and shells which could pierce it.

They kept on increasing armor strength and gun power until now some ships are protected above the water line by armor plate 16 inches thick and so hard that a diamond would scarcely scratch it. And yet guns are made powerful enough to send shells through it. But the mere sending of a shell through the side of a ship—that is, merely making a hole 10 or 12 or even 14 inches in diameter in the side of a battleship above the water line—amounts to little. The ship could float and fight with a dozen such holes in it. The mere perforation is not the main purpose. The shell is intended to go through and explode after it goes through, and if it fails to do this it is comparatively ineffective. In making the guns powerful enough to pierce modern armor they necessarily make them powerful enough to carry a great distance, to have great range, and hence as a result of heavy armor plate we have long-range guns and long-range battles.

And here another element enters into the problem, namely, the modern torpedo, the most deadly enemy of the fighting ship, because it strikes and explodes below the water line, where there is no armor protection and where the blow means certain destruction. As the practical range of the torpedo now extends to 10,000 yards, it follows that a ship whose guns are effective only at a shorter range than that is, when in actual battle, in constant danger of destruction by torpedoes. Hence, the necessity for armament and shells which will be effective at a greater range than 10,000 yards. Indeed, they should be effective at 14,000 or 15,000 yards. These conditions confront those interested in perfecting naval attack and defense.

There has been much discussion and much experimenting to determine the relative merits of the different theories as to projectiles. First, the old theory of using shells intended to pierce the ship's armor and explode after penetrating, known as armor-piercing shells. Second, the theory that the shells should explode at the moment of striking and before penetrating and should contain some powerful high-explosive material, such as gelatin or guncotton. This explosion would have a racking effect calculated to shatter or drive in or tear open the side of the ship struck and disable or sink it.

Some points of superiority in the latter are at once apparent even to the layman. Where the damage caused by a shell results from the force of the explosion rather than from the force of the impact, a spent ball, having force enough to explode the shell, would be as effective as any, and such shell would be as effective at long range as at short range.

This would not be true of the armor-piercing shell, which would be comparatively harmless at such a range. Reference has been made to the Battles of Manila Bay and Santiago, but neither of these shed any light on the subject, as they were both fought at short range and before the perfection of the torpedo.

If we retain the armor-piercing shell, we should probably retain the heavy armor, even though we have to pay $452 a ton for it; but if we have the high-explosive shells, armor half as thick would do just as well. It is, therefore, fair to conclude that if the high-explosive shell is practicable it is preferable.

But its practicability and its destructive power are no longer matter of speculation. The historian of the Battle of the Yellow Sea, who was an eyewitness of what he described, says of them: "It seemed as if they were mines, not shells." Of their destructive power, he says:

> Such havoc would never be caused by the mere impact of a shell, still less by splinters. It could only be caused by the force of the explosion. In one instance, at least, they tore the side out of the ship, making not a simple hole, but a gateway, so that the vessel immediately sank.

To illustrate the mere force of these shells Assistant Naval Constructor Dashiel stated before the Senate Naval Committee in 1899 that two 12-inch service shells penetrated the Spanish cruiser *Maria Teresa*, exploding after penetrating, therefore having the maximum effect. In spite of this and other injuries the ship was afterwards started home. It was Mr. Dashiel's opinion that a single high-explosive 12-inch shell would have carried off her entire stern, leaving nothing of the ship to float. He also stated that these shells were entirely safe to handle and use, and that in his opinion they had revolutionized the use of high explosives in warfare.

Mr. Charles O'Neil, Chief of Bureau of Ordnance, who was opposed to the use of high-explosive shells, paid tribute to their destructive power when he said that "the result of a premature explosion of a 500-pound high-explosive shell is too dreadful to contemplate."

The use of such shells by Japan in the war with Russia was a severe surprise to that great power, and contributed largely to bring about her humiliation and defeat.

How much better it would have been for her had she known their destructive power in time either to arm her navy with them or to avoid the Japanese navy, which was armed with them. Shall we also delay their adoption till we learn their destructive power, as Russia did?

It is quite improbable that Japan is the only nation which adopted them. The Army and Navy Journal in 1907 said editorially:

> The fact is unmistakable that high explosives must be reckoned with. At least three navies carry picric shells afloat to-day. If we had trouble with Japan, we would soon learn what shimose is, and it would not be long before we were turning it loose on our own account.

It is fair to presume that those nations which have adopted its use and are familiar with its effects are devoting their energy to finding some plan of construction that will at least diminish its destructive power, but as our Ordnance Bureau is opposed to the adoption of high explosives they are practically estopped from considering plans of construction designed to meet this method of attack.

The other matter affecting naval construction in which the world is moving faster than we are is the matter of motive power—the question of propulsion.

Those who give any attention to ship construction must have noted the growing importance of this problem. Many well-informed people think changes of a revolutionary character are taking place and that they will necessarily cause a revolution in the construction of fighting ships.

The change I refer to is due to the invention of the internal-combustion engine, or the Diesel engine, in which crude oil is consumed—not in furnace, but in the engine's cylinders, thus doing away altogether with boilers, coal bunkers, and smokestacks, and even reducing the space necessary for the machinery.

Dozens of ocean-going steamers are to-day equipped with and driven by this kind of motive power.

In 1911 the *Toiler* and the *Christian X*, ships driven by internal-combustion engines, crossed the Atlantic. Two tons of crude oil furnished propulsion power equal to 8 tons of coal. The *Holzaphel*, a British ship of the same type, also went into trans-Atlantic commerce in 1911. The *Sclandia* and the *Jutlandia*, Danish ships of the same type, made their appearance in 1912.

Many such ships are now in course of construction, and the German Government is now building engines of this type for one of their new battleships.

In the present type of fighting ship fully one-third of the space is required for boilers, coal, and other paraphernalia relating to propulsion, nearly all of which is eliminated in the new type.

Mr. PADGETT. Mr. Chairman, will the gentleman permit an interruption there?

Mr. GRAHAM. I would rather not. What is the nature of it?

Mr. PADGETT. I will say we have a provision in this bill for the development of internal-combustion engines.

Mr. GRAHAM. In the present type the smokestacks offer a fine target to the enemy, and if injured or destroyed greatly interfere with the handling of the ship.

Even though they escape they furnish a target for the enemy; and if coal is used the smoke interferes with their own aim, while it informs the enemy of their location.

In the new type all these drawbacks are avoided. In the present type of ships the space for ammunition is greatly restricted. They can not carry a sufficient supply for battle use for lack of space. In the new type, with boilers and coal bunkers eliminated, more ammunition can be carried, and yet the size of the ship and hence the exposure reduced, without in the least impairing its fighting power.

The enemy's shells could not blow up its boilers, it would have none; and its engines could be thoroughly protected. In the heat and strain of battle its stokers and coal handlers could not give out; it would have only pumps.

With the changes already effected in projectiles and the changes now being made in propulsion which are certain to be perfected before any ships we would now authorize could be constructed, I can not bring myself to vote money for battleships which would be obsolete before they were built, any more than I would have voted to build wooden battleships after the appearance of the *Merrimac* and the *Monitor*.

Mr. Chairman, my position in this matter differs somewhat from that of some gentlemen who oppose the building of any battleships at this time. I do not oppose them merely to keep the appropriation down.

The American people are neither picayunish nor parsimonious. They believe in getting what they need and paying for it. But they want the best.

It was not large appropriations that defeated the Republican Party last November; it was defeated because continued success had made it drunk and it forgot its responsibility to the people and turned them and their Government over to big interests for exploitation.

That party had abdicated in favor of the trust magnates and the tariff grafters, and had grown so rotten that it broke in pieces, making its defeat easy. [Applause.]

I do not look for a great reduction in public expenditures right away. We have grown accustomed for these many years to extravagant methods of national housekeeping, and we must get away from them gradually.

I am not opposing the building of battleships merely to save the money they would cost. I oppose them because I am satisfied they do not constitute an efficient Navy. I oppose them because I believe they are of far more value to the Steel Trust and the Armor Trust than they are to the Nation [applause], and those concerns are much more insistent on building dreadnoughts and superdreadnoughts, and putting on them all the armor they can carry at $450 a ton, than the American people are, and I believe that the talk about foreign entanglements and about more battleships is due to the activities of their publicity bureaus rather than to any real public feeling. [Applause.]

A short time ago I received through the mail a little pamphlet, giving 67 alleged reasons why the United States should maintain a strong Navy. This pamphlet purports to be gotten out by the Navy League of the United States, an organization having headquarters in the Southern Building in this city. Mr. J. P. Morgan, jr., is the treasurer, and Mr. Herbert Satterlee, Morgan's brother-in-law, is its legal adviser. As recent investigations have fully disclosed the relations of the Morgan family to the Steel Trust, and as the Steel Trust has a special interest in the building of battleships, there are some who will suspect that the purpose of the Navy League is not wholly and disinterestedly patriotic. The league attacks the patriotism of those who oppose the three-battleship program, but when the carrying out of such a program would result in great financial benefit to some of the officers of the league and to business concerns in which they are interested, does it not lay their motives and their patriotism open to suspicion? Page 3 of this pamphlet gives the legislative program of the league as follows:

To provide a council of national defense, which will decide the country's naval policy and standard.
To make the necessary appropriations to carry out a continuing and consistent program of naval construction.
To increase the efficiency of the "personnel" of the Navy by a reformed system of promotion for officers.
To make the Naval Militia subject to the call of the President in time of war.
To provide a naval reserve which will include honorably discharged men of the Navy, the Naval Militia, and men from the merchant marine.
To encourage a strong merchant marine, which can serve as an auxiliary to the Navy in time of war.

In this program there is no suggestion of change or improvement in the matériel of the Navy, only in the personnel, and the league reminds Congress that it must not overlook the necessity of encouragement for a strong merchant marine. Is this a hint that a subsidy would be acceptable to help Mr. Morgan's Shipping Trust?

Mr. SHERWOOD. How about the Powder Trust?

Mr. GRAHAM. To what extent has this Navy League or kindred influences been dominating our naval policy? We pay $452 a ton for armor plate, and I am informed by very good authority that the best armor plate can be furnished at less than $200 a ton, with handsome profit. The more battleships we build and the bigger we build them the better for the concerns that furnish the steel and armor plate at such enormous profit. Has the Navy League one eye on this fact?

I quote a paragraph from the official organ of the league for October, 1912, showing how they go about their work:

In the coming fight for three new battleships, the league proposes to endeavor to enlist the voluntary services of 500 of its members, as newspaper correspondents, to write to their local newspapers, expressing their sincere convictions of our need of a fleet second only to that of England. About 50 members following such a plan accomplished much during the past year; but there should be 500 members, in at least 40 States, who will furnish their local papers with naval articles and letters. This is a direct, economical, and effective method of awakening public opinion. It calls for sincerity and wisdom in execution, but is entirely feasible.

Regardless of all this, if I were convinced that such ships and such armor constituted a really efficient Navy, I would vote for the necessary appropriation.

I yield to no man on this floor in the desire for such a Navy, a Navy worthy the genius of the American people, worthy of our traditions, worthy of the brave men who constitute the personnel of that branch of the public service.

I want to draw the line with the greatest clearness between the personnel of the Navy and its matériel. For its personnel, for those who man and command our ships, I have the most profound admiration and not a word of criticism. What men dare attempt they dare; what can be done they can do. They are worthy successors of the men who sailed with Barry and Jones and Decatur and Stewart and McDonough and Farragut. Too much can not be said in their praise. I yield to no one in admiration for their intelligence and valor. But the days of closing up and lashing opposing ships together, of boarding and carrying on hand-to-hand conflicts on the decks, have long since passed. In naval warfare as carried on to-day mere bravery may win plaudits, but it can not win victories. If a ship loses its buoyancy, if it refuses to float, no amount of bravery on the part of its officers and crew can bring success. Neither intelligence, skill, nor bravery, nor all these combined, can bring us the victory if the enemy's ships are armed with projectiles which are effective at a longer range than ours, so that they can sink our ship before it gets close enough to be dangerous to them. As I tried to show on a former occasion, that is just the condition which I was convinced existed then and which I am convinced exists still. Hence it is the matériel of our Navy, not its personnel, which I criticize and which I believe to be woefully deficient.

Last August we voted $3,000,000 for the purchase of armor-piercing shells of the kind now in use in the Navy, and I understand contracts have been already let covering this appropriation. Except for practice purposes, this is virtually a waste of money. I aver the fact to be that at a range of 12,000 or 14,000 yards all the ships of our Navy might turn their batteries for hours on a well-constructed vessel provided with water-tight compartments, hit it again and again with our present service shells, riddle it, if you please, without destroying its buoyancy—that is, without sinking it—whereas at the same range, with a high-explosive shell, such as is now used in some foreign navies, one hit would put it out of business and would probably sink it.

Under such conditions, in a war with a nation having a modern, well-equipped navy using these shells, our men would go to certain destruction, just as the Russians did in the Battle of the Yellow Sea. My contention is that our boys shall have a fair chance in case of war; that they shall be armed and equipped at least as well as their opponents; that they shall not be compelled to rely on inefficient weapons; that they shall not be forced to fight an enemy whose ships are fast enough to enable him to choose the battle range and whose guns throw shells of deadly destructive power, while ours, at the range chosen by him, are harmless. I protest against our men having to fight under conditions which make victory practically impossible and which make defeat, if not destruction, almost certain.

There may be—nay, there are—those who say that even though the facts are as I claim they should not be discussed in public. But why, pray? Oh, they say these conditions should be kept under cover until we can effect a change; we should not expose our own weakness.

It scarcely needs saying that a nation can not play the part of the ostrich in a matter of that sort. Other nations know quite well about the matériel of our Navy—far better, I think, than Congress knows about it—so that there is no force in that position; and keeping silent about it does not seem thus far to have effected any change for the better. It is publicity, not secrecy, which brings about the necessary changes in such matters. And this is a most appropriate time to ascertain the true situation.

The time is almost here when the property of the Government is to be transferred from one set of agents or managers to another set of agents or managers, and surely good business methods would suggest the taking of an invoice. In the last 10 years we have spent about $500,000,000 for a Navy. What have we to show for it? What will the party now in power, under whose management this money was spent, turn over to its successor as the result of this expenditure? The invoice will include a certain number of battleships, among other things. Are these ships successful fighting machines or are they good only for dress-parade purposes as they pass on their way from the shipyard to the scrap heap? Should we be unfortunate enough to have a war with a great nation having a modern navy, are they equal to such an emergency, or are they mere false pretenses, in which to send brave men to premature death and to bring defeat and humiliation to the country?

In hearings before committees, in the press, and in other ways we frequently hear of our battleships becoming and even being obsolete; we hear charges of improper construction, we even hear of the ships being wrenched and racked by the

firing of their own guns. How much of this is true? What knowledge has Congress on the subject?

Congress does know that one of the concerns which is now an important part of the Steel Trust deliberately defrauded the Government by putting defective armor on its battleships, and then concealing the defects with putty and paint, and afterwards when caught paying back a large sum in a compromise settlement of the fraud.

But I am told: The Ordnance Bureau is in favor of the present armor-piercing shells, and during the past year has contracted for $3,000,000 worth of them, and that they also favor the present type of battleship, and this bureau is composed of experts, while you are not an expert; in fact, know very little about such things. Are you not willing to yield your judgment to theirs?

Why should the bureau favor these things if they were not the best, if they were in any way defective or unfit?

I can not answer this question, but I can produce evidence made by the Ordnance Bureau, showing that they have opposed a change and that they have looked with disfavor upon experiments intended to find out what the truth of the matter is. I will not attempt to construe their conduct. I will let the House do that. Nor shall I give all the evidence, but I will give enough to convince any impartial man, and I think that Congress should not be satisfied until every bit of available evidence is gathered and all the facts developed. As the business agent of the American people, Congress should know all the relevant facts before determining whether any battleships, and if any, what kind of battleships and what kind of armament the country should have. And in this connection I want to emphasize the fact that Congress can not implicitly rely on the statements of bureau heads concerning this matter; that they have not been frank; that they have withheld valuable information, which Congress should have had to enable it to act intelligently.

Let me present to you some evidence in support of the very serious charge that information has been deliberately withheld from Congress.

Experiments were made with high-explosive shells at the naval proving ground as early as February 4, 1897, and were continued at intervals throughout the spring and summer of that year and the next year. Many of these experiments gave remarkable results; in one made in May 19, 1898, a piece of armor plate 17 inches thick was broken in two and both portions moved from their original position by the explosion of a single shell containing about 500 pounds of guncotton. This event happened six years before the battle in which the Japanese destroyed the Russian Navy, and probably blazed the way for that victory. It was a fact that Congress had a right to know. A knowledge of it would have materially aided in appropriating and expending the public money for an efficient Navy. But it was six years and nine months after the experiment that the House learned of it, and learned then only in answer to a specific resolution describing the experiment in detail and calling for a report upon it. Let me give a brief history of the matter in chronological order; it will be easier to follow in that way.

Two years after this experiment was made, on May 7, 1900, the United States Senate passed a resolution calling for all experiments with the Gathmann torpedo shell. Please notice the Senate asked for all experiments. Two days later that body received a report in reply to the resolution, accompanied by a letter from the Secretary of the Navy, Hon. John D. Long, as follows:

NAVY DEPARTMENT,
Washington, D. C., May 9, 1900.

SIR: Replying to the resolution of the Senate dated the 7th instant, requesting that the Secretary of the Navy send to the Senate report of all experiments with the Gathmann torpedo shell and gun, I have the honor to inclose herewith copies of the reports of experiments therein called for.

Very respectfully, JOHN D. LONG, *Secretary.*

The PRESIDENT PRO TEMPORE,
United States Senate.

The report and the letter were printed as Senate Document No. 343, Fifty-sixth Congress, first session, and cover 52 pages of closely printed matter. A number of experiments are described in it, and the conclusion drawn from all of them by Mr. O'Neill, then Chief of the Bureau of Ordnance, is that none of them had been completely successful. He says, in the opinion of the bureau, "the results of the explosion of the Gathmann shell on the two occasions on which they were exploded against 10-inch armor plate do not indicate that any great effect would be produced by such shell bursting outside of a ship," and he adds that the destructive effect of large quantities of guncotton against structures is vastly less than has been commonly supposed.

The remarkable thing about this report is that there is not one word about the experiment of May 19, 1898, then about two years old, and, of course, quite familiar to the bureau chief. Indeed, one of the experiments mentioned in the report was made on June 30, only six weeks later than the one omitted. The one that was not successful was reported; the one that was successful was suppressed.

Why did this bureau thus ignore the United States Senate? Why did it suppress information of such value? When Congress appropriates money for the making of such experiments, what right has the bureau to withhold the results and suppress them?

This bureau deceived Congress first by remaining silent and then by making a false report. Congress went on building and arming battleships in the old way. It relied on the bureau; but the Government of Japan knew better, and made very practical use of that knowledge.

After this false and misleading report to the Senate the matter remained dormant for five years—that is, till 1905.

Probably the use of high-explosive shells by the Japanese revived the matter at that time. However that may be, the matter was reopened, and on February 10, 1905, Congressman, now Senator, WILLIAMS introduced a resolution in the House, as follows:

Resolved, That the Secretary of the Navy is respectfully directed to send to the House of Representatives such information as is in his possession relating to experiments with Gathmann guncotton shells upon plate armor and other resistants, whether at Indianhead or elsewhere, under the supervision or under the cognizance of the Navy Department or of naval officers detailed for purposes of inspection. The Secretary is especially requested to give the House of Representatives such information as he may possess concerning the alleged complete demolition of 17-inch turret plates by the detonation of 500-pound-guncotton projectiles, Gathmann system, at Indianhead, on May 14, 1898.

You see he particularly describes the time, place, and circumstances of the experiment. He puts the bureau's finger on it, he makes it so plain they can not dodge or evade, otherwise the House might have fared no better than the Senate. On February 18 Acting Secretary of the Navy Darling sent a communication to the House in response to the resolution which was printed as House Document No. 353, Fifty-eighth Congress, second session. It contains the description of the experiment in question. I quote it complete:

NAVAL PROVING GROUND,
Indianhead, Md., May 19, 1898.

SIR: Referring to the bureau's indorsement, No. 4483, I have the honor to report that the experiment of exploding 500 pounds of guncotton against an armor plate has been made. Mr. Gathmann, his son, and Mr. McMullen, of the Gathmann Projectile Co., were present. The plate used was a piece of the 13-inch B. L. R. turret ballistic plate, representing group 4 of the armor for the *Kentucky* and *Kearsarge*. The part used was the left half, shown on photograph No. 689 N. P. G. Its thickness varied from 16 to 17 inches. Its weight was about 45,000 pounds.

The plate was on the river bank, north of the valley, against a bluff, resting on timbers held in position by chains secured to the hill above. The earth was dug away from the immediate rear of the plate.

The guncotton was packed closely in a stout, cubical, oak box, 26 inches in the clear, made at the navy yard under the direction of Mr. Gathmann. There were five spaces in the interior of the box, four of light pine. The central one was about 6½ inches square; the four others, dispersed symmetrically about the central one, were 6 by 1½ inches. The central air space was about half filled with guncotton; the others were more nearly filled.

The wet guncotton used was 810 cakes of Du Pont's manufacture, sent here for the purpose. The weight of a cake was seven-tenths of a pound; total weight of wet guncotton, 560 pounds; estimated weight of dry guncotton in main charge, 496 pounds (11.4 per cent water). The dry guncotton primers were supplied by Mr. Gathmann and weighed 4 pounds. These were placed in four thin boxes, prepared for them at the rear of the main charge, and so let into the main box as to be closely surrounded by the wet guncotton. The four primers were on diagonals of the base about equidistant from the center and the corners. The four fulminate detonators were of the torpedo-station type, and each contained 35 grains of fulminate of mercury. These were connected in series and were fired by service gun batteries.

The box had no cover. This open side was so placed that contact was made between the wet guncotton surface and the armor plate. The box rested on timbers so as to retain its position at about the central portion of the plate.

Referring to photograph 689 N. P. G., what is then the left edge of the plate was for this experiment the bottom, making the line of fracture of the original plate now the top.

There were on the beach two ¾-inch plates secured in an upright position, remaining there from a former experiment. The armor plate was between the two, 19 feet distant from one and 24 feet distant from the other.

On making the electric connection there was a loud but not specially sharp report. There was, however, a distinct shock, but not more than comes from a very heavy gun, an immense cloud of very black smoke, and considerable débris from the gravel, dirt, and adjacent timbers.

The armor plate was broken into two approximately equal parts, each part falling flat on the ground, the fracture running vertically as the plate stood. The left portion was turned over as a door opens, making what was the rear of the plate now the upper part. The other piece was turned as on an axis normal to the surface through about 180°. This position of the parts is probably due in a large measure to a landslide of the earth right in the rear of the plate, which was started by recent rains and the work of getting the plate in position. It was all ready to fall and completely buried the plate and extended several

feet beyond the original position of the plate. Its force was sufficient to move the parts of the plate about.

The upright 2-inch plate, situated 19 feet away from the guncotton charge, was lifted and driven 48 feet, resting above the sea wall toward the old bombproof. The plate was much bent, and a piece 3 by 2 feet was torn from the nearest end. The plate and structure, 24 feet distant, was entirely uninjured.

Photographs in duplicate are forwarded herewith. No. 694 shows the plate and charge just before explosion, No. 695 the scene immediately after explosion, and No. 696, after the dirt had been moved, showing the fragments of the plate.

Very respectfully,

A. R. COUDEN,
Commander, United States Navy,
Inspector of Ordnance in Charge.

CHIEF OF BUREAU OF ORDNANCE.
Navy Department, Washington, D. C.

True copy.

E. S. BRANDT,
Chief Clerk Bureau of Ordnance, Navy Department.

The explosive used in the experiment was not fired from a gun at the armor plate; it was simply placed in contact with the armor plate and exploded by a battery. There was no impact, no force but the force of the explosion, and yet the 17-inch plate was broken in two pieces, and both pieces moved some distance from the position they had been fastened in. Had it been on a ship's side at the time, as Capt. Semenoff said of the Russian ship, it is not a hole but a regular gateway the explosion would have made, and the ship would inevitably have sunk at once, as the Russian ship did.

Surely this was a very important experiment. Congress undoubtedly should have known about it. If these shells can smash armor in that way, has not the day of very heavy armor come and gone? If a single shell breaks a 17-inch armor plate like a piece of plate glass, how can you resist its destructive force? Can you use thicker armor? Scarcely. And if you did it would not avail. Some other plan of construction must be devised. Thinner rather than thicker armor placed in a different way will better meet this form of attack.

But do you expect the Steel Trust or the Navy League to advocate smaller ships or thinner armor? Vain expectation.

Bear in mind this experiment was made in May, 1898, was buried in the bureau archives, was called for by the Senate in May, 1900, and withheld from that body, remaining quietly in its pigeonhole grave till called for with such particularity by the Williams resolution in 1905.

Doubtless the bureau heads went before the Naval Committee year after year and told that committee what they wanted, gave the members such information as they saw fit, and withheld what they did not care to give. And on such information as they chose to give the committee fixed the appropriations.

How do we know they are more frank or candid now than then? Are we acting on half knowledge now, as they were then? Are material facts kept back now, as they were then?

Only a short time ago in an experiment the *Puritan*, an armored ship, was sunk by a single high-explosive Isham shell. Have you ever seen a report of that experiment? I have not. It seems to me that since Congress has to vote the money for ships and for experiments Congress has a right to know about these things, and bureau chiefs have no right to suppress such information.

There is a way to find out about them, and in my judgment Congress will fail in its duty to the people if it does not at an early day go into this question with absolute thoroughness, and find out whether the Navy League and the steel and armor manufacturers and the projectile manufacturers or the Government is running the Navy. If we are building obsolete types of battleships, we ought to know it. If we are buying millions of dollars' worth of shells that are practically useless, we ought to know it. If we are putting 16 inches of armor on when 8 or 10 would do as well, we ought to know it. If we are paying $452 a ton for what we should get at less than $200, we ought to know it, and if any influence or purpose other than the public good has found lodgment in any bureau, we ought to know it and the country ought to know it.

Throughout the reports furnished by the bureau there is an apparent effort to belittle the results of those experiments, when they were not entirely suppressed. In his report of July 8, 1897, to the chief of the bureau, Mr. Couden, who made the report, emphasized the things which the explosion of the shell did not do, but he had no word of commendation for what it did do. There are, however, two short and rather significant statements to be found in it. One of these statements informs us that a plate tapering from 16¼ to 9½ inches in thickness was fastened with 24 armor bolts to half-inch skin plates and all backed by 12 inches of solid oak. The other statement, in a different part of the report, tells us that the plate was swung somewhat on one end by the explosion, going to the front and leaving the target structure about 2 feet.

Had it been the side of a ship instead of a target structure, and the plate was pulled out 2 feet from it, the ship would surely be in grave danger. It would seem as if these two facts should have been placed in close context and connection in the report. On the contrary, they are so widely separated as to prevent notice of their relationship in a casual reading.

It is hard to find words not too offensive to characterize the action of this bureau. It is needless to seek a motive for it, as no motive could justify it. The importance of the experiment, which was thus with great deliberation kept from Congress, is hard to overestimate. If our naval authorities did not appreciate it, the Japanese did, and by the use of similar explosives on May 28, 1905, they literally destroyed the Russian Navy, sinking 22 ships and capturing 14, only 2 out of 38 escaping, and this they accomplished without the loss of a single ship.

In concluding, I repeat that with seven ships in course of construction or contracted for, with a shortage of auxiliary ships to attend the battleships, with a shortage of men to put on them, with a shortage of equipment for them, with little prospect of need for them, with a very strong probability that before those authorized can be placed in commission the present plans of construction and armament will be revolutionized, it would be little short of folly to authorize additional battleships of the present type at this time. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. GRAHAM. Mr. Chairman, I dislike very much to trespass upon the time of the House, and yet I would like to proceed for 15 minutes longer.

The CHAIRMAN. The Chair will state that that request is not in order. The time has been definitely fixed by the House.

Mr. FOSS. Mr. Chairman, I yield to the gentleman from Massachusetts [Mr. GILLETT].

[Mr. GILLETT addressed the committee. See Appendix.]

Mr. FOSS. Mr. Chairman, I yield five minutes to the gentleman from New York [Mr. LEVY].

Mr. LEVY. Mr. Chairman, I believe in and am a strong advocate of a larger and greater Navy. Ever since the administration of Jefferson, who was the father of our Navy, it has met with brilliant and glorious victories in all contests in which the United States has been involved. The Navy fought and won the War of 1812, Tangiers War, and the Mexican War. The Navy decided the outcome of the Spanish-American War. The building up of our Navy after the War of 1812, during which struggle such heroes as Commodores Perry, Goldsborough, Rogers, and Decatur were in command of our ships, was the indirect cause of the building up of our commerce on the seas prior to the Civil War.

In his notes on Virginia, in referring to the Navy, Jefferson said:

> A land army would be useless for offense, and not the best nor safest instrument of defense. For either of the sea purposes the sea is the field on which we ought to meet the European enemy.

The naval tonnage of Great Britain, built and building, amounts to 2,478,152; that of Germany amounts to 1,124,257; while that of the United States amounts to but 898,345 tons. Mr. Chairman, I would be willing, and would not begrudge the expenditure of millions and millions to build up the Navy of the United States to the high standard of Great Britain. The total importation and exportation of the United Kingdom for 1910 amounted to over $6,000,000,000, while that of the United States amounted to a little over $4,000,000,000. This proves conclusively that trade follows the flag. The great merchant marine of Great Britain in total tonnage amounts to approximately 20,000,000. Our merchant marine is very small as compared to that of Great Britain, amounting to but 8,000,000 tons. In this connection allow me to quote from Jefferson in writing to James Monroe. He said:

> We ought to begin a naval power if we mean to carry on our own commerce.

Great Britain absolutely controls the seas, both in trade and merchant marine, as foregoing illustrations show.

One of the most beneficial effects was derived by the trade of the United States when former President Roosevelt ordered the White Fleet to sail around the world. From a commercial standpoint it was of more value to us than the value of the fleet itself, and I sincerely hope that we will continue our policy of building at least two battleships a year in order to maintain our place among the nations of the world and aid our commerce. [Applause.]

Mr. FOSS. I yield five minutes to the gentleman from New York [Mr. AYRES].

Mr. AYRES. Mr. Chairman, the principal objections urged against the two-battleship plan seem to be these: First, that a battleship wears out; that after 10 years it is useless; second, that we have not men enough or officers enough to man the battleships that we now have, so what is the use of building

any more? I take it that these are, in the main, the contentions of the gentlemen who are opposed to our continuing our policy of two battleships a year.

Gentlemen, the very last construction of a modern battleship is on this basis: A battleship has two installations of motive power. It has engines which will produce the speed suitable for cruising, and then it has turbines, which cost a great deal to run, which give the possibility of great speed when it is needed. In the ordinary use of a battleship at a cruising speed it costs comparatively little to run. You might say that it is in a period of repose. When it is needed it has great speed at its command and then it costs a great deal more.

Our Navy as a whole should be run precisely on the same basis. The Navy Department in a time of peace should be run on an inexpensive basis, and yet at the same time we ought to have enough battleships so that when we need them we can use them. The point I am getting at is just this: In times of peace we do not need all these officers and all the men in commission. It would cost too much. But the very principle that has been used in the Navy has produced 30,000 or 40,000 men who have been through the Navy, who are equipped and able at any time to come to the support of the Navy, and who are now scattered throughout the country. The Navy is not paying them, but in case of immediate need in time of war we have them. We could not in the next five years build more battleships than we could man with properly trained and equipped men, who are now scattered all over the country, who could be had at any time if the Navy Department needed them. And that is precisely the case with the officers. I am credibly informed that the department has the addresses of something like 2,000 officers who are now not in active commission, who are under 50 years of age, and who, if a war should break out, would immediately volunteer for service. Already the hint of trouble in Mexico has led scores of these officers to write that they are ready for active service. There is not the slightest doubt that if we continue to build two battleships a year we will have plenty of men and officers to man these ships in time of need.

Now, with regard to the other proposition that has been so ably urged by the one-battleship men. Just think what will happen to our Navy if we continue at the rate of only one battleship a year. In 10 years we will have just 10 modern, up-to-date battleships, while in 10 years, if England continues her present program, she will have 60 battleships, Germany will have 40, and Japan between 35 and 40. Now, we have more property to protect, more commerce to-day than any nation in the world except England, and in 10 years' time we shall have a population of 115,000,000 to protect and more commerce than any other country in the world. Therefore I can not understand the feeling of some gentlemen that two battleships are too many. To my mind the only reasonable and patriotic policy that we can adopt is to continue the construction of two battleships a year. [Applause.]

Mr. FOSS. Mr. Chairman, there is no one on this side who desires to occupy time, and I suggest to the gentleman from Tennessee that he use the remainder of his time.

Mr. PADGETT. Mr. Chairman, if no one else desires to address the House, I ask that the Clerk read.

The CHAIRMAN. The Clerk will read the bill under the five-minute rule.

The Clerk began the reading of the bill.

Mr. GREGG of Texas. Mr. Chairman, are the two hours exhausted?

The CHAIRMAN. All requests for time have been exhausted.

Mr. GREGG of Texas. I want to yield some time to the gentleman from Arkansas [Mr. GOODWIN].

The CHAIRMAN. The gentleman from Arkansas is recognized for 20 minutes.

Mr. GOODWIN of Arkansas. Mr. Chairman, I am not a member of the Committee on Naval Affairs, nor do I appear before the Committee of the Whole with a prepared speech, but I entertain certain fairly well-defined ideas, so far as my own mind is concerned, with reference to what should be the attitude of this Republic toward peace as well as toward war.

We hear much these days about what should be the policy of the United States with reference to naval construction. We hear that in caucuses, it is told in cafés, it is recited in street cars, and private conversation is pregnant with it, but I have yet to hear the first proponent of a big American Navy enunciate or define his idea as to the American policy of naval construction. A policy certainly means a program, something outlined, something definite to be performed and accomplished. I have asked many Members upon this floor their conception of what the policies of Europe are as between the two great alliances in European countries, the triple alliance, upon one side, embracing Germany, Austria-Hungary, and Italy, and what is known as the entente cordiale or the quasi alliance represented by England, France, and Russia.

Now, Mr. Chairman, England has a policy and Germany has one also, and the friends of a big navy in this country seemingly anticipate an attack from one of these countries. Therefore they say, in consideration of a naval program or a naval policy, we must expect to rival one or the other of these countries in the way of naval armaments. England, as I say, has a policy, and it is known as the two-standard policy. Her naval strength must be equal to the combined navies of her two foremost rivals—Germany and the United States. Or, failing in that, her policy is to have a navy equal to her foremost rival, plus 60 per cent, which, after all, is about the same as the combined strength of Germany and the United States.

Germany's program, on the other hand, is to have a naval strength equal to her foremost rival and her superior, England, for the reason that if she ever approaches England in her naval strength she thinks she can become the proud mistress of the seas and stand supreme on England's dismantled navy. Germany has a greater interior than England and comparatively little coast and is largely self-sustaining agriculturally and industrially, whereas Great Britain may be attacked upon all sides from the sea and from the four quarters of the earth and agriculturally is not a self-sustaining country. She deals largely in manufactures and in exportation of goods, but she can be starved to death within three weeks by blocking her ports as well as her sea roads through which come her importations of food supplies. That was evidenced during the dockers' strike in the summer of 1911 when the dockers refused to unload the meat and grain and provisions and foodstuffs unless they were paid a higher wage. That dock strike finally became a sympathetic strike to the extent that all the labor unions in London sympathized with that strike. Millions and millions of dollars' worth of foodstuff lay in the ships with no one to unload them. Neither would the dockers take ice to preserve or keep the meats alive, so to speak. Therefore England arose to the realization that when her laboring people were united for ulterior reasons the whole of England might be starved to death, or at least over seven millions in the city of London might be brought to physical want in less than three weeks.

Now, if Germany can approach in size and strength the naval fleet of Great Britain, she expects to stand supreme in the councils of nations. Therefore her policy is, I repeat, to have a naval strength equal to the British Navy.

I suppose it is well known by most Members of the House that England has revised her naval policy four times within the past 15 months. About that time she announced that she would have a program as follows: Three battleships last year, four this year, three next year, four the next year, and three the next year, a total of 17 battleships of the *Dreadnought* type within five years from the beginning of 1912. But upon the announcement of that fact what happened? Germany began to lay down more keels and to commence the construction of a greater number of battleships, and then the rivalry which had already become tense rapidly assumed an interesting phase. England, ever jealous to sustain her title of mistress of the seas, once more revised her naval program, and it was not three, four, three, four, three, but it was four, five, four, five, four; making 24 *Dreadnoughts* within five years instead of 17. With the shifting of this plan, Germany became intensely alert and amplified her existing policy by the construction of more powerful *Dreadnoughts* and followed by greater preparation. Following Germany's activity England again increased her policy to five ships per annum, or 25 ships for the next five years. But that was not sufficient, Mr. Chairman, so intense became the rivalry. The Moroccan incident contributed to the situation, and when Germany sought greater trade concessions in the northwest of Africa, France, England, and Russia all said "no," and then it was that England began to revise again her policy, not to increase the number of battleships per annum, but to extend the number of years, five battleships per annum until 1920, inclusive; and that is the present English program. What it may be to-morrow, six months hence, or five years from now, I am not a prophet and can not foretell. But speaking to the friends of a big American Navy, I ask if any man upon this floor will now rise in his place and say that he is in favor of this Government following in the tracks and footsteps of either Germany or England as to their respective naval policies?

Mr. HOBSON rose. [Laughter.]

Mr. HOBSON. Mr. Speaker, I would like to reply to the gentleman, if he will permit me.

Mr. GOODWIN of Arkansas. Yes; if it be brief.

Mr. HOBSON. That my investigations have shown me conclusively—and I tried to set them out in full on Saturday last—that we can not safely, in view of the Monroe doctrine particularly, and the completion of the Panama Canal, together with the development of Central and South America, allow Germany to have control of the sea in the Atlantic. We know not what the mainspring of the program may be; but whatever it may be, our program for the Atlantic alone can not safely fall below that of Germany.

Mr. GOODWIN of Arkansas. Mr. Chairman, I expected my good friend from Alabama to accept my challenge. I desire to pay him this compliment: He never sidesteps any proposition when it comes to announcing his attitude with respect to a big Navy, and with the gentleman the bigger it is the better. Only last Saturday he accused the gentleman from Mississippi, Judge WITHERSPOON, of having merely pinfeathers, but the judge, in my opinion, did some flying, and my friend, Capt. HOBSON, is always in a great flight when speaking of naval armaments. The gentleman from Alabama [Mr. HOBSON] has no pinfeathers, I can assure the country, but with eagle's wings, when the Navy is mentioned, he takes his flight from sea to sea, from continent to continent, and upon every hill and mountain top he plants a *Dreadnought*, while at the same moment subverting and overturning every saloon in the valley below. [Laughter and applause.] I will strike hands with him as to the evils of the grogshop; but the distinguished gentleman from Alabama occupies two positions that are as diametrically and antithetically opposed as are the poles. In his fight against rum he would preserve the virile young manhood of the country, only to have it all sacrificed in an avalanche to the greed and avarice of the god of war [Applause.] Mr. Chairman, I speak always in the highest terms of my good friend from Alabama. I have great respect and admiration for him, and he knows it. Occasions have been too frequent for him to question my loyalty and fondness for him, for, Mr. Chairman, when the stress of war came he was willing to sacrifice himself and did become a hostage to a foreign foe, and had his name and fame not gone down in the annals of time on account of that great heroism, in the sinking of the *Merrimac*, he certainly would have become famous thereafter when many hundreds of beautiful young ladies all over the country Hobsonized him, and by their osculatory caresses and the entrancing glances of those beautiful lasses secured for him imperishable fame and immortality among earthly saints. [Laughter and applause.]

Mr. HOBSON. Mr. Chairman, will the gentleman yield again?

Mr. GOODWIN of Arkansas. I yield to the gentleman.

Mr. HOBSON. My impulse is not primarily to ask him what he would have done under the same circumstances——

Mr. GOODWIN of Arkansas. Oh, I would have surrendered. [Laughter.] I would have surrendered as abjectly as did my friend from Alabama—for "why should the spirit of mortals be proud?" [Applause.]

Mr. HOBSON. Mr. Chairman, after paying my compliments to all the delightful qualities of my friend from Arkansas, I was about to remark that it is unfortunate to discover the particular line toward which his thoughts seem naturally to trend. [Laughter.]

Mr. GOODWIN of Arkansas. Mr. Chairman, my thoughts at this time trend toward the dove of peace and not to the tocsin of war. [Applause.] But when interrupted, Mr. Chairman, I was about to speak and had proceeded at some length upon the two naval policies of Germany and England. I happen to be a subscriber to some of those papers over there, and I desire to read to the committee what would be the respective strength in 1915 of the navies of those two countries. On the 16th day of last December, Mr. Hall, a member of Parliament, asked the first lord of the admiralty, Mr. Churchill, what would be the relative strength if the present shipbuilding programs of those two countries were adhered to. I quote from the figures of Mr. Churchill:

Taking the middle of 1915, the figures asked for are as follows: Germany 23, Italy 6, Austria-Hungary 7, a total of 36—

That is the triple alliance—

Great Britain 37, France 12, Russia 4, a total of 53 dreadnaughts.

That is the quasi alliance. Still quoting from Mr. Churchill:

I would state that in the figures for Great Britain, New Zealand is included, but not Australia, and no account is taken of Canadian and Malayan ships.

Mr. Chairman, if we expect England as a foe, we may expect likewise the combined navies of all of the members of the quasi alliance—England, France, and Russia. But that is not all. Not only will we have this great armada of fleets to fight, but likewise every single, solitary dominion across the seas that flies the English flag, for all these are to-day contributing to the British imperial navy. Every Member on this floor should know that Prime Minister Borden of Canada, with five members of his cabinet, made a visit to London last summer. There they met in secret conclave for five or six weeks, and he returned to his country and announced that it had been agreed that Canada should contribute $35,000,000 toward the construction of three powerful *Dreadnoughts*.

Not only that, Mr. Chairman, but South Africa, which less than a dozen years ago was in a life and death grapple with England to maintain her integrity and independence, is now as loyal to England as Pennsylvania or Arkansas or Minnesota to the United States of America. New Zealand has likewise contributed her quota of ships, and, therefore, when we fight England, we fight not only the quasi alliance, but all of England's over-sea dominions, embracing a population of 435,000,000 and covering a territory of over 13,000,000 English square miles.

And if, upon the other hand, Mr. Chairman, Germany should become our implacable foe, we should be compelled not only to fight Germany, but the other two members of the Triple Alliance, Austria-Hungary and Italy, an alliance, sir, comprising 2,514,000 square miles of territory, and comprising a population of 167,520,000.

And, again, should the quasi alliance become our foes, the great countries of England, France, Russia, and their dominions and colonies, embracing a territory of 26,364,000 square miles, as well as a population of 705,340,000, or nearly 50 per cent of the population of the inhabitable globe, would be arrayed in mortal conflict with us. What a stupendous conception this would be, that this country, of only 90,000,000 of people, should be compelled to arm and equip itself in military and naval armaments to combat such a foe. Those European countries are taxed almost beyond their capacity to bear the heavy burdens now imposed upon them in the way of martial armaments, and the party that advocates our entering this list of naval rivalries and marching in the vanguard of their strides will have poured out upon its unprotected and defenseless head the outraged wrath and the maledictions of the American people.

No, Mr. Chairman, I think there is not the remotest possibility of anticipating an armed conflict with any one of these great powers, either England and her allied friends or Germany and her sympathetic neighbors.

We, sir, are at peace with the world, and all mankind; nowhere is the American sword to-day drawn, nor do we stand in any fear or trepidation of any encroachment upon our shores by a foreign power. Not so, however, with the war-like nations of Europe. They are armed to the teeth, and for many years the rivalries have become so great that the war lords are prophesying an impending conflict.

Germany embraces a territory of only 208,000 square miles—not so large as the State of Texas, whose territory as I recall is 265,000 square miles. Germany has a rapidly increasing population and the most highly trained people educationally and in the arts and sciences of any nation in the wide world. She is seeking, and is annually extending her wonderful commerce into all parts of the world; but she is likewise seeking additional territory and colonies to be occupied by her overcrowded population. But she has no eye upon the conquest of this country nor any of our possessions. If the conflict comes between her and her great rival, England, it will be in quest of England's territory, either in India, South Africa, or Australia, and with her own compact country and with but few scattered colonies, combined with the greatest and most efficiently trained army on the face of the earth, she may yet hope, when her naval strength shall have attained to that degree of efficiency, that England's supremacy may no longer prevail. For, only last summer, England was forced to withdraw that segment of her fleet stationed in the Mediterranean for the protection of her sea roads, and through which nearly 50 per cent of her foodstuffs annually come, placing it to join the greater part of her remaining fleet near her own shores in the North Sea as a protection and defense of a possible German naval invasion; thus leaving the Mediterranean entirely occupied by Austria-Hungary and Italy, her inveterate foes; and this great land-locked middle sea, which is said to be but as a lake compared to the North Sea, and as a pond in comparison with the English Channel, is so vital to the strength of England that it has been called the "linch-pin" of the British Empire.

Thus we see, Mr. Chairman, the great rivalry between England and Germany, and the consequent unrest of those peoples across the sea. They do not look upon us with a jealous eye, and there is no ill feeling on their part toward the United States; yet, while the mad rivalry is in progress over there, we are much agitated, it seems, lest we become engulfed in the vortex of war. I dare say we have only to be content with ourselves and attend to our own business, and if the fight must

come between England and Germany, let us maintain an attitude of independence and absolute neutrality.

But, Mr. Chairman, an increased Army and an increased Navy will make us but little more secure from a European attack than we are to-day, and this, Mr. Chairman, is the crux of our argument against increased public expenditures to build up a great American Navy in competition with that concert of European powers. For the very moment that England would undertake to strike us, that moment her inveterate foe, Germany, would pounce upon her; or the very moment that Germany set sail against us, just so soon would England and her friendly neighbors join in the attack upon the Fatherland. This, coupled with our extreme isolation and with the outstanding European jealousies, renders us practically free from attack.

Our strength and our security lie, Mr. Chairman, not in military and naval armaments, but in the peaceful pursuits of our people, in keeping down the heavy burdens incident to militarism and by extending our markets and products of our fields and of our factories in every land in every clime, making rich and bountiful the largess of the American people and bringing smiles and laughter into every home, instead of tears and distress, always incident to war.

Therefore, I ask again, Mr. Chairman, if any Member of this House or any great political party is willing to enter upon a policy of a useless expenditure of public moneys taken from the taxpayers of this country, adding to the burdens of government, already too onerous, not only in the preparation for wars, but, should wars follow as a sequel of our unnecessary armaments, to add a hundredfold to all the misery, depletion of our wealth, to the death roll of multiplied thousands of the flower of our young manhood, not to mention the misery and the woe and the multiplied hundreds of millions of pensions, and divers and sundry expenses too numerous to mention? No, Mr. Chairman, a thousand times no! But let the American people proclaim the gospel of peace and not the hell of war, and instead of the money that would be unnecessarily expended in preparation for war, if it must be taken from the pockets of the people, where it belongs, let us bestow it in building up the great interior of our country, in the improvement of navigable rivers, the drainage of our swamp and overflowed lands, to make cheaper the transportation of the things we are compelled to buy and lessen the transportation charges on our cotton and our lumber and our grain that we have to sell.

Or let us expend a great part of it in the establishment of great industrial and vocational schools, in order that our young men and our young women may be taught to become greater creators of wealth, trained artisans and craftsmen in the race of life, that the door of hope may be opened to all and closed in the face of none. Or in a dozen ways, sir, we could expend the money, if collected, in an infinitely better way than squandering it as a sacrifice to the Moloch of war.

For, after all, Mr. Chairman, the sacrifice of life is made not by our millionaires, because they can hire substitutes to bear arms in their stead, but the great rank and file of the strong, virile young manhood, taken from what is generally called our common people, bear the brunt and the burden of the day. They are the ones who bite the earth in the death grapple on the field of battle; they are the ones whose lives are sacrificed upon their country's altar, not that they or their posterity shall be benefited thereby, but to atone for the folly of the war lords of the land or to gratify the avarice and greed of Mammon.

And as for me, Mr. Chairman, I repel as abhorrent the thought of the possibility of war or continued heavy appropriations of the people's money to prosecute great wars when none are likely to follow; and for these and many other reasons I might assign, Mr. Chairman, I am neither for three, nor for two, nor for one battleship, at least at this session of Congress. For, as a great world power, the United States can afford as an earnest to renounce battleships for a season, thus hastening the oncoming of that day when the glad tidings may be proclaimed round the world, "On earth peace, good will toward men."

Mr. PADGETT. Mr. Chairman, I ask unanimous consent that all gentlemen who have spoken upon the bill may have five legislative days in which to extend their remarks.

The CHAIRMAN. The request is not in order in the committee; it can be made in the House.

Mr. PADGETT. I will renew it in the House.

The CHAIRMAN. The Clerk will now read the bill.

The Clerk read as follows:

PAY OF THE NAVY.

Pay and allowances prescribed by law of officers on sea duty and other duty; officers on waiting orders; officers on the retired list; clerks to paymasters at yards and stations, general storekeepers ashore and afloat, and receiving ships and other vessels; two clerks to general inspectors of the Pay Corps; one clerk to pay officer in charge of deserters' rolls; not exceeding 10 clerks to accounting officers at yards and stations; dental surgeon at Naval Academy; commutation of quarters for officers on shore not occupying public quarters, including boatswains, gunners, carpenters, sailmakers, machinists, pharmacists, and mates, naval constructors and assistant naval constructors; and also members of Nurse Corps (female); for hire of quarters for officers serving with troops where there are no public quarters belonging to the Government, and where there are not sufficient quarters possessed by the United States to accommodate them, or commutation of quarters not to exceed the amount which an officer would receive were he not serving with troops; pay of enlisted men on the retired list; extra pay to men reenlisting under honorable discharge; interest on deposits by men; pay of petty officers, seamen, landsmen, and apprentice seamen, including men in the engineers' force and men detailed for duty with Naval Militia, and for the Fish Commission, 48,000 men; and the number of enlisted men shall be exclusive of those undergoing imprisonment with sentence of dishonorable discharge from the service at expiration of such confinement; and as many machinists as the President may from time to time deem necessary to appoint, not to exceed 20 in any one year; and 3,500 apprentice seamen under training at training stations and on board training ships, at the pay prescribed by law; pay of the Nurse Corps; rent of quarters for members of the Nurse Corps; $39,264,662.

Mr. HENSLEY. Mr. Chairman——

Mr. FOSTER. Mr. Chairman, I make a point of order on the paragraph.

I observe in this bill a dental surgeon at the Naval Academy. Is that provided by law?

Mr. PADGETT. Yes; heretofore this has been paid under the appropriations for the Naval Academy.

Mr. FOSTER. And so it has just been transferred here?

Mr. PADGETT. And because of the passage of the law last year it has been transferred from the Naval Academy appropriation to this appropriation.

Mr. FOSTER. So it is not new?

Mr. PADGETT. No; it is just a transfer from one appropriation to another in pursuance of law.

Mr. FOSTER. I withdraw the point of order.

Mr. HENSLEY. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend by adding at the end of the paragraph the following:

"Hereafter the service of a midshipman at the United States Naval Academy or that of a cadet at the United States Military Academy who may hereafter be appointed to the United States Naval Academy or to the United States Military Academy shall not be counted in computing for any purpose the length of service of any officer in the Navy or in the Marine Corps.

"That so much of an act entitled 'An act to reorganize and increase the efficiency of the personnel of the Navy and Marine Corps,' approved March 3, 1899, which reads as follows: 'and that all officers, including warrant officers, who have been or may be appointed to the Navy from civil life shall, on the date of appointment, be credited for computing their pay with five years' service' shall not apply to any person entering the Navy from and after the passage of this act."

Mr. MANN. Mr. Chairman, may I ask the gentleman to explain just what his amendment accomplishes? I notice the first part apparently strikes out the services at the academies in reference to longevity pay.

Mr. HENSLEY. That is the first.

Mr. MANN. What does the second part do?

Mr. HENSLEY. It strikes out the services allowed to people who go there from civil life—the five-years' constructive service that is given them instanter upon their entrance; it does away with that.

Mr. MANN. Just explain what the constructive service means.

Mr. GARNER. May I ask the gentleman from Missouri a question which may give the gentleman from Illinois information? If I understand the amendment just read, it is the same as the amendment that was adopted on the military bill two years ago; am I correct?

Mr. HENSLEY. Last year; yes.

Mr. MANN. That did not become the law.

Mr. HENSLEY. It did become the law.

Mr. GARNER. It places the naval officers in the same status as the military officers with reference to the services at the academy.

Mr. MANN. But I understand this amendment covers both the Naval and Military Academy. The gentleman says it became the law last year, but I do not think it did. If it became the law last year, what is the object of repeating it?

Mr. PADGETT. If the gentleman will permit, in explaining the amendment, men enter from the Naval Academy and the Military Academy sometimes in the Marine Corps, and that covers that part.

Mr. MANN. I understand the first part of the amendment, but I do not understand the second part of the amendment. I take it the gentleman is willing to explain what his amendment accomplishes. Reading it hastily, it is very difficult to tell.

Mr. SISSON. I would like to have the amendment reported again.

Mr. MANN. Well, I have no objection to that, but I thought the gentleman ought to be willing to explain what the amendment accomplishes.

The amendment was again reported.

Mr. HENSLEY. Now, Mr. Chairman, the position I take is this: That when a boy is nominated by a Member of the House or by a Member of the Senate as a cadet to the Naval Academy at Annapolis, and he attends school there for four years at an expense, all told, of something like $19,000, this time should not be computed on the question of longevity. Under the present law, in connection with the naval establishment, the four years' time that the people of the country are paying for his training, equipping him for service to his country, is computed as service actually rendered to the country. The same law applied to the military department of the Government until last year, when Mr. HAY, chairman of the Committee on Military Affairs, while the military appropriation bill was under consideration, offered the amendment in the same connection I offer it with reference to the naval appropriation bill. That amendment became a law. I submit, Mr. Chairman and gentlemen of this committee, that when a boy who is fortunate enough to be designated to enter the Naval Academy, at an expense to this Government of something over $4,000 per year, during the four years' time while he is equipping himself is not service actually rendered and should not be so counted. The adoption of this amendment will effect an economy, as I am told, of $349,350 per annum, and will in no wise affect the administration of the Naval Academy, as this has been regarded as purely gratuitous. I venture to assert, Mr. Chairman, that there is not a farmer in my district who could educate his son at the enormous sum of $4,000 per year, and yet this is what they are forced to do for the boys who are fortunate enough to secure admission to the academy. Then, why should we not pass this amendment, which will mean a relief to the taxpayers? That is the position I take, and it occurs to me that if this practice should not apply to the military department, then it should not apply to the Navy Department.

Mr. COX. Will the gentleman yield for a question?

Mr. HENSLEY. I will.

Mr. COX. I think the amendment has a tremendous amount of merit in it. Is not this true now under the regulations of the Navy Department, that when a boy enters the naval school at Annapolis he is required to sign a written agreement that he will serve in the Navy for eight years?

Mr. HENSLEY. I think that is true.

Mr. COX. Now, is not this true—I am not clear whether this is so or not, but I believe it is—in getting credit for his eight years, he is entitled to the four years' term he served while in the naval school?

Mr. HENSLEY. On the question of longevity.

Mr. COX. Now, the gentleman's amendment proposes to cut him out of the Navy that four years when the country, in a general way, is paying for his education, and let him go ahead and sign up with the Government that he will serve for eight years after he is out of school.

Mr. HENSLEY. That is the point absolutely.

Mr. EDWARDS. Will the gentleman yield for a question?

Mr. HENSLEY. I will.

Mr. EDWARDS. I understood the gentleman to make the statement that it cost the Government $4,000 a year for each one of these cadets, or midshipmen, or whatever they may be called. How does the gentleman arrive at those figures? In other words, what makes up that cost?

Mr. HENSLEY. Well, it is every cost in connection with the schooling he receives there, just as an independent institution would have to figure the cost in connection with the schooling of a pupil.

Mr. SISSON. I think the statement made by the gentleman from Georgia [Mr. EDWARDS] is not exactly an accurate one, because the average cost per year of a student at the Naval Academy and the Military Academy is about $4,800.

Mr. EDWARDS. What I am trying to arrive at, if the gentleman from Mississippi can give me the information, is how these figures are made up?

Mr. SISSON. When the military bill was under consideration the chairman of that committee stated that he charged each student up with the cost of maintaining the academy, all of the professors, and their board, and their clothes, and all the necessary items of expense incidental to keeping up the institution, and so on.

Mr. PADGETT. And the interest on the $14,000,000.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HOBSON. Mr. Chairman, the substance of this amendment is to exclude the four years' service at Annapolis in reckoning the service of an officer. Before I refer to the question of service, I want to point out that if you do this your officers later in their careers, who would be retiring for length of service, would be serving on at higher pay four years longer and in many cases retire at higher rank, adding to the expense of the Government and detracting from the efficiency of the service, practically nullifying existing laws looking toward efficiency and toward economy. But in addition to that, I want gentlemen here to understand what the service at Annapolis is. As has just been brought out, a young man signs his papers of entrance, and they are as binding, if insisted upon, as that which an apprentice boy signs. From the day that he signs that paper he is absolutely in the control of the Federal Government. They order him to the Naval Academy. They order him on cruises. They order him away from Annapolis. In war time they send him to the front. They did it in the Civil War and they did it in the Spanish-American War. I have known of them to lose their lives at the front while they were midshipmen. I have seen them lose their lives in practice cruises. A classmate of mine was ordered to go over the masthead when a gale was blowing. Even a seasoned seaman ought not to be ordered to go over the masthead when a gale is blowing. He ought to go down on the lee side.

Mr. CALLAWAY. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. HOBSON. I regret I can not yield.

Mr. CALLAWAY. Just for a question.

The CHAIRMAN. Does the gentleman yield?

Mr. HOBSON. I can not yield.

Mr. CALLAWAY. I just wanted to ask the gentleman a question.

Mr. HOBSON. I can not yield.

The CHAIRMAN. The gentleman declines to yield.

Mr. MANN. The gentleman from Texas does not want to leave this boy still up on the masthead? [Laughter.]

Mr. HOBSON. No. You do not want to leave him there. This young man was a nephew of Admiral Schley and a classmate of mine. A gale was blowing and a high sea was running, and he was seasick, lying on the deck along with other midshipmen, and, in connection with other midshipmen, was ordered to go over the masthead. That meant he was to go up one side and down the other side. As the young man went up on the weather side and passed over the crosstrees the ship lurched, and he fell and struck the fore-topsail yard and fell overboard and was drowned, and six seamen were also drowned in trying to rescue him.

I saw another midshipman in the class ahead of mine who was ordered up to the light yards, when a squall struck the ship, and he fell from the fore-royal yard and broke his back, and the next year they turned him out a cripple for life.

Mr. GARNER. Who perpetrated these murders?

Mr. HOBSON. It should be understood that these midshipmen at Annapolis are serving in the Navy. They are under the strictest orders there. The orders are stricter than the orders to men serving anywhere—officers or enlisted men.

Mr. HENSLEY. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. HOBSON. I can not yield. They take the same chances and the same risks as all others in the Navy. Their service is as genuine a service at Annapolis as that of an apprentice boy. You might as well say that an apprentice boy at Newport or Norfolk should not be given credit for his apprenticeship as to say that a midshipman ought not to be given credit for his service at Annapolis.

Now I will yield to the gentleman from Missouri.

Mr. HENSLEY. Is his service in the Navy any more complete than that of a boy serving in the military establishment at West Point?

Mr. HOBSON. I am glad that the gentleman pointed that out. Apparently the gentleman has no more information on this subject than merely to follow the lead of some one else when it occurs to him, and when something seemingly bearing on this is pointed out with reference to the Military Academy he thinks it applies to the naval service also. At the Military Academy they do not order the boys out on cruises as they do at Annapolis.

The CHAIRMAN. The time of the gentleman has expired. The pro forma amendment will be considered withdrawn.

Mr. CALLAWAY. Mr. Chairman, I move to strike out the last two words.

The CHAIRMAN. The gentleman from Texas [Mr. CALLAWAY] moves to strike out the last two words.

Mr. CALLAWAY. This is the question that occurs to me: I reckon it had not occurred to the gentleman from Alabama [Mr. HOBSON] when he was talking about the boy going over the cross yards and going into the sea. That was a man actually in the service. That was not one of the boys at Annapolis in school. He ought to have credit for his service from the time

he entered the service, it matters not where that is. But it is a foolish idea to suppose that a boy at the Naval Academy is rendering any service to this country. It is beyond my reach of imagination. It is beyond the wildest dream that ever kicked me at midnight [laughter], and I take it that it is beyond the wildest dream of any man, unless it be a man who is absolutely infatuated by his connection with this naval service. The boys at West Point, who, as the gentleman said, are costing this Government $4,800 a year and are under the protection of instructors, surrounded by every beneficial influence the Government can surround them with, in order to make their stay pleasant and their work profitable, not only to them, but in the years to come to the Government. They are in school, equipping themselves for their future work under the protection of the Government; are not exposed at all, are not doing any work except that kind of work that equips them for the discharge of their duties when their real service begins.

He says you can order them out. All right; if you can order them out, then from the time they go out they are in the service. He says they are in the service when they are ordered on cruises. They are no more in the service when they are ordered on cruises than a boy in one of the civil schools of this country is on service when he is ordered to classes. It is all foolishness to talk about a fellow out on a lark, cruising over the world at enormous expense to this Government, being in the service, when he is being dined and wined and costing us $4,800 a year. Ye gods and little fishes, what kind of service? Service simply in equipping his body and his mind in training him for what he has chosen in life as his profession. It is no more service than the work of one who goes to law school is serving his country when he is trying to equip himself for the regular pursuit of the law. It is no more service to this country than the man in the academic schools when he is trying to equip himself so that he may go out and meet whatever obstacles come to him in following his chosen profession.

Mr. HAMLIN. A great many of them resign as soon as they get through.

Mr. CALLAWAY. I am not talking about the question of resignation. It is an unheard-of foolishness to say that being fed, fondled, and fuddled in school is a service to this Government.

The gentleman's cases do not apply at all. His claim is foolish that a fellow is actually in service because you can call him out. When they are called out they are in the service, but until they are called out they are not in the service.

Mr. HOBSON. I know the gentleman desires to be accurate. Will he yield?

Mr. CALLAWAY. Yes.

Mr. HOBSON. Because the midshipmen at Annapolis were ordered to the Spanish War. There were some 175 of them. They were midshipmen, and yet they were serving with the fleet in front of Santiago; and likewise in the Civil War they went out and fought battles, and were many of them killed while they were still midshipmen.

Mr. CALLAWAY. If they were ordered out, they were in the service then.

Mr. HOBSON. They were still midshipmen. The gentleman is mistaken. I am actually correct.

Mr. CALLAWAY. If all the aches in the gentleman's stomach are due to those midshipmen who actually rendered service, he might offer a provision in this amendment making it service when they were actually called out, and their service reckoned from that time. Has the gentleman the nerve to claim that the midshipmen who had been in the academy for three years and nine months before they were called out, and then rendered three months' service, were entitled to longevity pay for the three years and nine months they were not in the service?

Mr. SISSON. Mr. Chairman, I want to state at the outset that I am in favor of the amendment offered by the gentleman from Missouri, because it is almost identical with the one which was put upon the Army bill; but I should like to ask the gentleman from Tennessee [Mr. PADGETT], the chairman of the committee, a question in reference to the lump-sum appropriation.

I think it is a very bad method of appropriating money. The very first clause in this bill provides for the officers at sea and on other duty, and officers on waiting orders, without in any way separating the items, so that the Secretary of the Navy could spend all of the $39,246,662 for one of these items. Why is it that in presenting these bills the appropriation for officers on sea duty is not specified, and the officers on other duty, stating what the duty is, each in a separate item.

Mr. PADGETT. This is the method that has been pursued for many years. The estimates show the item. For instance, there are 3,806 officers on the active list. The commutation of quarters for officers is so much, allowance for light and heat so much, and all submitted and shown in the estimate.

Mr. SISSON. I realize that; and that would be true in reference to all the appropriations; but that does not answer my objection, which is that the whole fund of $39,000,000 is put in an attitude where the Secretary of the Navy, in his discretion, might spend more for one of these branches than for another.

Mr. PADGETT. No; he has got to pay all of them out of the appropriation.

Mr. ROBERTS of Massachusetts. The compensation of all these officers, whether on the retired or the active list, is regulated by law, and they can not be paid more than the law allows out of the $39,000,000.

Mr. SISSON. I realize that.

Mr. ROBERTS of Massachusetts. The answer is very simple. The amount that each one of these officers shall receive is fixed by law.

Mr. SISSON. That is quite true, but when your bill comes on the floor of the House the membership can not tell how much you are spending for officers on the retired list or officers on the active list, or how much for anything. Your bill makes a lump-sum appropriation of $39,000,000. Every one of the departments has been endeavoring to get lump-sum appropriations, and I have no doubt the gentleman from Tennessee has been besieged by the Navy Department to give a lump sum.

Mr. PADGETT. Not this year.

Mr. ROBERTS of Massachusetts. If gentlemen will read the Book of Estimates, they will find out how these moneys are spent in detail.

Mr. SISSON. But the Members do not have the Book of Estimates.

Mr. ROBERTS of Massachusetts. They are accessible to every Member.

Mr. SISSON. The gentleman from Massachusetts states that they are accessible to every Member of Congress. We do not have printed enough copies for every Member of Congress.

Mr. ROBERTS of Massachusetts. You can get them out of the document room.

Mr. SISSON. You can not get them in the document room in time. The membership has other duties to perform than reading the Book of Estimates. The Committee on Appropriations has adopted the policy of carrying forward in bills as nearly as it can statements of how the money is appropriated, and other committees ought to do the same. Now, the gentleman from Tennessee says that the Secretary of the Navy has not asked this year for an appropriation of a lump sum. I will ask him if it is not true that the Secretary before this has asked the committee to give him a lump sum—submit the hearings and get a lump sum for the entire Navy?

Mr. PADGETT. The Secretary of the Navy has never made a request of that kind that I know of.

Mr. SLAYDEN. Mr. Chairman, I have just come in, but my information is that the amendment pending is one proposed by the gentleman from Missouri [Mr. HENSLEY], a member of the Committee on Naval Affairs, and is in substance like the one adopted a year ago on the Army appropriation bill, and which forbade the counting of service of cadets at the Military Academy in computing for longevity service, and therefore for pay.

That was put into the law last year when we had an Army appropriation bill here, and there is no reason why we should make fish of one academy and fowl of another. There is no reason why there should be a discrimination in the payment of these officers. In neither case is service as schoolboys service in the Army or in the Navy, and it has only been twisted into that meaning to increase the pay. They are at these academies for training for the Army and the Navy, not in those services.

I am disappointed in the position taken by the gentleman from Alabama [Mr. HOBSON], because I thought we could count on his hearty support for a measure of economy like this, but I suppose he desires to maintain a consistent record, for there is no other reason that I can see why he should be opposed to the amendment.

I will say to the gentleman from Mississippi that the Army appropriation bill does segregate the items for the retired pay of officers and men and officers and men on the active list.

Mr. SISSON. And on commutation of quarters you segregate that.

Mr. SLAYDEN. We try to segregate everything.

Mr. SISSON. All items of that kind in the Army bill are segregated, and you do not make a lump-sum appropriation of $39,000,000.

Mr. SLAYDEN. Since I have had the honor of serving on the Committee on Military Affairs the policy has been to have every item explained as simply and as clearly as language could

put it for consideration. Mr. Chairman, I can see no reason on earth why this service as schoolboys should be counted as service in the Navy. I call on the gentleman from Alabama and other members of that committee, in face of the stupendous appropriations we are making, in the face of what it appears may be a shameful record in the way of extravagance—I call on them to stand for the people once in a while, although it be in so small an economy as this.

Mr. PADGETT. Mr. Chairman, I move that all debate on this item close in five minutes.

Mr. HOBSON. Mr. Chairman, I would like a minute or two.

Mr. MANN. This item carries the largest appropriation of any item in any bill presented to the House except in the pension bill.

Mr. PADGETT. I will withdraw the motion.

Mr. HOBSON. I move to strike out the last two words for the purpose of trying to clear up a misapprehension. There are two phases of this question that bear intimately on a rational adjustment——

Mr. MADDEN. Will the gentleman yield?

Mr. HOBSON. Yes.

Mr. MADDEN. When a young man at the Military Academy graduates after a service of four years he gets a commission, does he not?

Mr HOBSON. Yes.

Mr. MADDEN. Does that apply to the Naval Academy?

Mr. HOBSON. It is just beginning to apply.

Mr. MADDEN. I understood that he had to serve, after graduation, two years at sea.

Mr. HOBSON. He used to, but the new system is now in force.

Mr. Chairman, a midshipman at Annapolis is serving under orders, as I pointed out a moment ago, just as much as is an apprentice at Newport, or at Norfolk, or at Chicago, only the midshipman has to serve twice as long. His service there, it is said, is in equipping himself. That is true, but it is just as much service as the service of an officer ordered to gunnery instruction at the Washington Navy Yard, just as much as an officer ordered for instruction at the War College at Newport, just as much as gunners or gunners' mates ordered to the school at Newport, just as much as the petty officers at the schools of instruction in the Army and Navy. This service is military service. He is amenable to the military orders and discipline. He is not a schoolboy. They need not give him one day at Annapolis if they do not desire. They can send him out the day after his entrance, and send him to the uttermost corners of the earth, and this is no hypothesis. They do it. These young men have lost their lives at the front under orders from their Government, not a few of them, but scores and scores of them have gone to the front in time of war.

Again let me remind Members here when these pleas for economy are bantered back and forth, that what we want is real economy. It is for the economy of the service that officers after a certain length of time should be retired. It is for economy because they do not get to higher grades before being retired. Under this amendment when they finally retire they would be at an average higher grade, whatever it is, all the balance of their lives.

Mr. CALLAWAY. Mr. Chairman, will the gentleman yield?

Mr. HOBSON. Yes.

Mr. CALLAWAY. The gentleman speaks of efficiency and economy of service, and that when they reach a certain age they should retire. Could they not make it shorter instead of adding this schoolboy term to it?

Mr. HOBSON. Mr. Chairman, I think if the gentleman would go through the statutes that have been established for the Army and Navy of America and the armies and navies throughout the world he might possibly find some way in which, in a revision of the laws, he might get something of the same result; but with the laws as they are, the effect of this amendment would be that all of the officers on the retired list under the length-of-service limitations would be retiring four years later. In some cases they would have gone to a grade higher, and their retired pay would be that much higher all the balance of their lives. Furthermore, the time for this retirement has been fixed by the experience of the navies and armies of the world, to provide that younger blood should come up to the higher grades. You would postpone all the way down the line the time of advancement and promotion. You would change the results of experience of all the armies and navies. Take the 30-year-service retirement law: The officer retiring under that law would not then retire until 34. This offhand experiment for economy goes against the experience of ages.

Mr. MANN. Mr. Chairman, I think it is a sufficient answer to the gentleman from Alabama [Mr. HOBSON], in reference to adding four years to the retirement period of service, to say that all naval officers are now retired at the age of 62, regardless of the length of service.

Mr. HOBSON. The gentleman knows that I was not referring to the age limit. I was referring to the length of service.

Mr. MANN. The gentleman was referring to a provision which proposes to retire naval officers before they ought to be retired, slipped into the law at some time without the cognizance of Congress. [Applause.]

Mr. HOBSON. Mr. Chairman, will the gentleman permit an interruption?

Mr. MANN. In just a moment, I will be glad to yield. Last year the Army appropriation bill carried this provision:

> That hereafter the service of a cadet who may hereafter be appointed to the United States Military Academy, or the Naval Academy, shall not be counted in computing for any purpose the length of service of any officer of the Army.

The amendment offered by the gentleman from Missouri [Mr. HENSLEY] in relation to the Navy is similar. It does not apply to any officer now in the Navy or to any cadet already appointed to the Naval Academy. What are the facts in reference to this? In 1838 Congress passed a law providing for what is called fogey pay, an increase of 10 per cent for each five years of service until the limit of 40 per cent increase was reached. And from 1838 until 1881 or 1882 longevity pay was based upon the date of the commission entering the service, not the date of entering the Military Academy. By a decision of the Supreme Court in the early eighties it was decided that the longevity pay should be based upon the entrance to the academy, and in the case of naval cadets or midshipmen, when they went out of the academy and received their commissions, at the end of six years, incidentally they received a 10 per cent increase in the pay provided by law. We have now pending hundreds of claims to have Congress allow longevity pay based upon entrance to the academies going back to 1838, and there is a concerted and determined effort on the part of estates of officers, many of whom died in 1840, 1850, and 1860, to have Congress now pay this old longevity pay, never based on morals, never based on the intention of Congress, never based on justice, but only upon the persistent demands of certain officers that their pay should be increased. The gentleman from Alabama [Mr. HOBSON] narrates some circumstances that do not reflect credit upon the Navy, and I take it that those circumstances arose during the two years at sea; perhaps not.

Mr. HOBSON. If the gentleman will permit, it was on my plebe cruise.

Mr. MANN. Then they ought to have court-martialed some of the naval officers [applause] if what the gentleman says is true, and extend the service at Annapolis more than four years until a naval officer learns something.

Mr. HOBSON. But what good would that have been for the midshipmen who had to obey? My question that I was going to ask the gentleman is, Would he voluntarily to-day, if he had the power, change the age retirement for length of service from 30 to 34 years?

Mr. MANN. I certainly would. [Applause.]

Mr. HOBSON. Well, he is the only man I know of who would.

Mr. MANN. I will say if there is any way of getting it before the House the House will determine to extend that period so quickly it will make the gentleman's head swim. [Applause.] With a shortage of officers in the Navy, a constant complaint that we have not officers enough to command in the Navy, they are turning officers out now under retirement and under the plucking-board provision who ought to be retained in the Navy, a most scandalous condition of affairs, in my judgment. [Applause.]

Mr. HOBSON. I would like for the gentleman to specify some of those scandalous proceedings.

Mr. COX. Mr. Chairman, I rise to give the amendment offered by the gentleman from Missouri [Mr. HENSLEY] my heartiest approval.

The CHAIRMAN. Debate is exhausted.

Mr. COX. I move to strike out the last four words. I think it is legislation that merits the support of every man in this House who has given this matter any consideration whatever and particularly, Mr. Chairman, I want to address myself to the cost of educating these midshipmen at Annapolis. On May 23, 1911, I received a letter from Mr. Winthrop, Acting Secretary of the Navy, in which he reports to me it is estimated that the average cost of graduating midshipmen is $11,000. I have heard some gentlemen on the floor in the last hour make the statement it costs something like $48,000——

A MEMBER. No; $4,800 a year.

Mr. TRIBBLE. The hearings before the committee disclose it costs about $18,000.

Mr. COX. There is quite a discrepancy in the letter written to me by the Acting Secretary of the Navy and the testimony disclosed before the committee at the present time. I further asked the Acting Secretary of the Navy for some more information, and he reported to me at this time that there were 400 graduates of the Naval Academy now on the retired list drawing only retired pay. At the same time he reported to me there were 29 graduates of the Naval Academy now on the retired list who were drawing full pay on account of being engaged in active duty. That disclosed to my satisfaction that the Navy is topheavy, has a tremendously large number of officers upon the retired list drawing enormous salaries, and doing no good on earth. Now, what does this amendment propose to do, and what has been the rule heretofore? These young gentlemen are sent to Annapolis, educated at great cost to the public in the hope that we would get 100 cents in return from these young gentlemen after graduation.

Mr. HOBSON. Will the gentleman yield for a question?

Mr. COX. In just a moment. They are required to sign a written agreement that they will serve their country eight years after they are graduated. As a part of the eight years, I understand, they get credit for four years. Now, why should we, the representatives of the people, be instrumental in reducing the length of service which they are required to serve the people, to wit, eight years, down to four years?

Mr. HOBSON. My question was in connection with the gentleman's statement of the large cost of the retired list. The effect of this amendment would very substantially increase the average cost of the retired list.

Mr. COX. Well, I would take serious issue with the gentleman upon that.

Mr. HOBSON. If it is four years later when they retire from active service they would be on an average of higher rank.

Mr. COX. In my opinion, Mr. Speaker, instead of bringing about an increase of expenditure, it would bring about an economy. Besides, I am tired of seeing the naval program become top-heavy, with men retiring at the age of 62 drawing enormous salaries.

Mr. Chairman, I ask unanimous consent to print in the RECORD as a part of my remarks the letter from which I have quoted, written to me by Mr. Winthrop in May, 1911.

The CHAIRMAN. Is there objection?

There was no objection.

Following is the letter referred to:

DEPARTMENT OF THE NAVY,
Washington, May 23, 1911.

Hon. W. C. COX,
House of Representatives, Washington, D. C.

MY DEAR CONGRESSMAN: In reply to your letter of the 15th instant, I have the honor to advise you as follows in reply to the questions submitted by you:

First. Candidates for midshipmen before being received into the academy are required to sign articles agreeing to serve in the Navy for eight years.

Second. This is not a statutory requirement, but a regulation of the Navy Department.

Third. It is estimated that the average cost of graduating a midshipman is $11,000.

Fourth. A. There are 400 graduates of the Naval Academy now on the retired list drawing only retired pay. B. There are 29 graduates of the Naval Academy now on the retired list, but drawing full pay on account of being engaged upon active duty.

Fifth. The following table gives the retired pay of each grade of graduates from the Naval Academy:

Rear admirals (senior nine)	$6,000.00
Rear admirals (junior nine)	4,500.00
Captains	3,750.00
Commanders [1]	$3,150.00 to 3,375.00
Lieutenant commanders [1]	2,475.00 to 3,000.00
Lieutenants [1]	2,160.00 to 2,520.00
Lieutenants (junior grade) [1]	1,800.00 to 1,950.00
Ensigns [1]	1,402.50 to 1,657.50

Faithfully, yours,

BEEKMAN WINTHROP,
Acting Secretary of the Navy.

Mr. SAUNDERS. Mr. Chairman, this debate has brought out the scandalous monstrosities and inequalities which have been written into, and becomes a part of our military and naval system. The appointments to Annapolis and West Point are eagerly sought at the hands of Members of Congress. From the time that the appointees enter these institutions, throughout their service, and after they retire, they are made a class apart. They are so specially favored, so highly regarded in all our legislation that relates to them, that when anyone in this body undertakes to deal with them on a rational, practical basis, or to treat them as other officials in the Government service are treated, he is regarded in some quarters as actually lacking in patriotism.

When an effort is made in this House to deal with the military establishment, whether it is the naval, or the Army branch, as a business proposition, it is spoken of in military circles, and by their admirers as an attack upon the one or the other department as the case may be. As I have said, it is really deemed to furnish sufficient evidence of a decided lack of patriotism on the part of the men who offend in this respect.

The gentleman from Alabama is so enthusiastic an admirer of everything naval that he actually argues that preparatory instruction in a naval or military school is service itself.

We send these young men to those schools to learn how to render service, and yet it some way, as the gentleman from Illinois [Mr. MANN] has pointed out, the result has been reached that, this preparation is made service, to be taken into consideration in connection with and as a basis for longevity pay. This is something to which these parties are not fairly entitled, and the practice should be discontinued, as it will be when this amendment is adopted.

It is the opposition to reform of this character, it is the antagonism which the thick and thin advocates of the military department manifest toward every measure of rational reform that is directed toward either the Army, or the Naval Establishment that will ultimately bring about a revulsion in the public attitude and be the occasion of far more drastic and far-reaching reductions than are in present contemplation.

Mr. HOBSON. Will the gentleman yield to a short question?

Mr. SAUNDERS. Yes; I will yield.

Mr. HOBSON. Does the gentleman think that the British Navy, that counts the service of their midshipmen; the French Navy, that counts the service of their midshipmen; the German Navy, that counts the service of their midshipmen; and all the navies in the world, that count the service of their midshipmen, forms one world-wide conspiracy and scandal?

Mr. SAUNDERS. I know nothing about the attitude in this regard of the Governments to which the gentleman has referred. I know however perfectly well that one year ago we took up this same matter in relation to the Military Academy and passed a law for that institution precisely like the one now sought to be imposed on the Naval Academy. Surely no one will undertake to say that the young men who go to Annapolis are more deserving than those we send to West Point. The amendment proposed for West Point was thoroughly debated in this body, and it was well understood at the time that it was intended to correct a rule that should never have been established. After full discussion the amendment was adopted by a large majority. That action furnishes ample precedent for a favorable vote on the pending proposition. We desire to establish a condition of equality between these two academies in this respect.

Mr. HOBSON. I am asking the gentleman if he is aware of the fact that the Naval Committee considered this and rejected it?

Mr. SAUNDERS. Perfectly well. But that fact does not incline this body to reject this amendment. [Applause.] If we follow the lead of the majority of the Naval Committee, we would be bound hand and foot, with respect to this bill. No reductions or reforms would be possible. [Applause.]

Mr. BUCHANAN. Will the gentleman yield?

Mr. SAUNDERS. Yes.

Mr. BUCHANAN. I want to say that it is my opinion that if it had not been for the fact that I was engaged in the Committee on Labor temporarily at the time this question was voted on the Committee on Naval Affairs would not have turned it down, because it was a tie vote, and I would have voted for it.

Mr. SAUNDERS. I am glad that the gentleman affords this information at this time. The gentleman from Alabama [Mr. HOBSON] says he is in favor of real economy. Of course, it follows that we gentlemen who are earnestly and sincerely seeking to apply to this bill in the interests of economy, an amendment which was adopted a year ago in connection with the Army bill, are opposed to real economy. Will the gentleman from Alabama [Mr. HOBSON] look to the pending bill, and point out therein one section, or one paragraph, with respect to which he thinks we can exercise some real economy?

Mr. HOBSON. I will a little later. I will offer an amendment, which I hope the gentleman will support.

Mr. SAUNDERS. I am afraid that a proposition affording economy according to the gentleman's idea, is one that I will be unable to support.

The CHAIRMAN. The time of the gentleman from Virginia [Mr. SAUNDERS] has expired.

Mr. MURRAY. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MURRAY. Just how much latitude are Members supposed to have in regard to the discussion of matters that took place in committee?

The CHAIRMAN. It is generally accepted that what transpired in committee is not subject to repetition on the floor of the House, but the rule is not observed very often.

[1] Rate of pay of grade varies according to length of service of officer concerned.

Mr. PADGETT. Mr. Chairman, I ask for a vote on the amendment offered by the gentleman from Missouri [Mr. HENSLEY].

Mr. HENSLEY. Mr. Chairman, I only ask for just a few minutes.

The CHAIRMAN. All debate on this amendment is exhausted. What is the motion of the gentleman from Tennessee?

Mr. PADGETT. I ask for a vote on the amendment of the gentleman from Missouri [Mr. HENSLEY].

The CHAIRMAN. The question is on the amendment offered by the gentleman from Missouri [Mr. HENSLEY].

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

Mr. SISSON. Mr. Chairman, I desire to offer an amendment, which I am sure the committee will not object to. In line 15, page 2, in the word "serving" the letter "n" is left out. It would be well to amend it here now.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 2, line 15, by inserting the letter "n" in the word "serving."

Mr. SISSON. Now, Mr. Chairman, I want to ask the gentleman from Tennessee [Mr. PADGETT], the chairman of the committee, a few questions. In analyzing the pay of the Navy I find, beginning on the first page, officers on sea duty. How many are there of them?

Mr. PADGETT. Thirty-eight hundred and six.

Mr. SISSON. How many are there on other duty?

Mr. PADGETT. That is the entire active list.

Mr. SISSON. Now, of officers on waiting orders, how many are there?

Mr. PADGETT. The list is not divided so as to show those on shore and waiting orders.

Mr. SISSON. I presume that ought to be covered in one item on the appropriation bill.

Mr. PADGETT. The 3,806 officers embrace all of them.

Mr. SISSON. Does not the gentleman think it would be better legislation on the estimates sent up by the Navy Department to provide a separate item for each of those classes?

Mr. PADGETT. Well, an officer may be on the waiting list to-day and to-morrow he may be on the active list.

Mr. SISSON. The gentleman does not understand me, evidently. I want to group all of these items under one list, that should include all the officers who would be designated under that head.

Mr. PADGETT. The pay of the 3,806 officers on the active list is $10,770,000; the commutation of quarters for officers is $442,000; allowances for heat and light, $151,882; the pay of 900 midshipmen under instruction, $540,000; pay and allowances of 975 officers on the retired list, $3,189,761.

Mr. SISSON. That is the very point I wanted to get at.

Mr. PADGETT. Those are matters of calculation.

Mr. SISSON. Why is it that you do not carry those items that are provided for there by statute in separate items so that the House could see what is appropriated under each item?

Mr. PADGETT. The custom has prevailed, time out of mind, to carry them all in one item. It is so in the estimates, and they are so treated in the hearings.

Mr. SISSON. That is simply because the department time out of mind has desired to carry them in that way. Does not the gentleman know that in expending this money, if more were expended than was contemplated in the statements in the hearings for one of these items, the man responsible for it would violate no law? He would violate no law when he simply violates the hearings had before your committee. This law simply provides that a lump appropriation might be used for all of the various objects included here. Take, for example, the language—

Commutation of quarters for officers on shore not occupying public quarters, including boatswains, gunners, carpenters, sailmakers, machinists, pharmacists, and mates, naval constructors, and assistant naval constructors.

There is another paragraph, a distinct item, that ought to appear in your bill separately.

Mr. PADGETT. If you were to separate and make distinct all the objects that go into that paragraph, it would make I do know how many paragraphs.

Mr. SISSON. In other words, the gentleman understands that if a gentleman wanted to offer an amendment to this bill in reference to the amount of pay under a particular item, in its present shape he would need a report from the Secretary of the Navy as to exactly how much he could afford to take off from the total. For example, take the members of the Nurse Corps. You can not tell from this bill how many nurses there are nor how much can be used for the pay of nurses. You can not increase or diminish this item intelligently.

Mr. PADGETT. The pay of the Nurse Corps is $89,000.

Mr. SISSON. We get that from the hearings, and that is the information which the committee has; but it is information which I think the House is entitled to before it can act intelligently.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SISSON. I should like two minutes more.

Mr. PADGETT. I ask unanimous consent to extend the time of the gentleman two minutes.

The CHAIRMAN. The gentleman from Tennessee asks unanimous consent that the time of the gentleman from Mississippi be extended two minutes. Is there objection?

There was no objection.

Mr. SISSON. Take the amount for the hire of quarters for officers serving with troops where there are no public quarters belonging to the Government. There is no information as to this amount, nor can we offer an amendment to that without affecting the entire paragraph.

Mr. PADGETT. That amounts to $15,920.

Mr. SISSON. If these items were reported separately, then we could legislate very much more intelligently upon them. I am not criticizing the gentleman from Tennessee because this is a custom which prevailed when he came in, but I want to impress upon the House the necessity of separating, as far as possible, the different appropriations into separate items.

Mr. PADGETT. It is contemplated in the next Congress to report the bill more in detail.

Mr. SISSON. I hope the gentleman from Tennessee will effect that, and with the assurance of the gentleman that as chairman of that committee he will endeavor to give the House the items more in detail in the next bill I shall not discuss the matter any more.

The CHAIRMAN. The time of the gentleman has expired. The question is on agreeing to the amendment offered by the gentleman from Mississippi, which the Clerk will report.

The Clerk read as follows:

Page 2, line 15, insert the letter "n" in the word "serving."

The amendment was agreed to.

The Clerk read as follows:

That from and after the passage and approval of this act the pay and allowances that are now or may be hereafter fixed by law for officers of the Navy and Marine Corps shall be increased 50 per cent for such officers as are now or may hereafter be detailed by the Secretary of the Navy on aviation duty: *Provided*, That this increase of pay and allowances shall be given to such officers only as are actual flyers of heavier-than-air craft, and while so detailed: *Provided further*, That no more than 30 officers of the Navy and Marine Corps shall be detailed to aviation service: *Provided further*, That no officer above the rank of lieutenant commander in the Navy or major in the Marine Corps shall be detailed for actual flying: *Provided further*, That nothing in this provision shall be construed to increase the total number of officers now in the Navy or Marine Corps.

Mr. SISSON. Mr. Chairman, I reserve a point of order on that paragraph.

Mr. PADGETT. Mr. Chairman, I will say to the gentleman that this is the same provision that is incorporated in the Army appropriation bill, and identical with it, except that we put the grade of employment one grade lower than is provided in the Army bill.

Mr. SISSON. How much additional expense will this entail upon the department?

Mr. PADGETT. It will depend on how many are employed and of what rank. You can not employ more than 30, the same number that is fixed in the Army bill, and they can not be above the grade of lieutenant commander. In the Army the grade is fixed at colonel.

Mr. SISSON. What is the salary of a lieutenant commander?

Mr. PADGETT. About $3,600 or $3,700.

Mr. SISSON. Then a lieutenant commander detailed to this service would get not to exceed $7,200?

Mr. PADGETT. No; he would get not to exceed about $5,400.

Mr. BATHRICK. It is only while they are detailed to this service.

Mr. PADGETT. It is while they are detailed to this duty.

Mr. SISSON. Immediately upon retiring from that service they go back to their former compensation?

Mr. PADGETT. Yes.

Mr. MANN. Will the gentleman yield in that connection?

Mr. SISSON. I yield to the gentleman from Illinois.

Mr. MANN. A year ago or so the House passed a bill reported from the Committee on Military Affairs. I think that committee reported a 100 per cent increase in pay. I am not sure but it passed the House at 100 per cent increase.

Mr. ROBERTS of Massachusetts. It was reduced to 50 per cent.

Mr. FOWLER. It was reduced this year to 50 per cent.

Mr. MANN. If the gentleman will permit me, in the Army appropriation bill we carried a provision of a 50 per cent increase. When that bill went to the Senate the Senate struck out the item and passed the original bill, but providing for a 20 per cent increase. The House again put in the 50 per cent increase in the Army bill—or perhaps it was 100 per cent—and the Senate committee struck that out and passed the separate bill. In the separate bill the Senate reduced it to 20 per cent increase. I take it that there will be some agreement on the Army bill fixing the per cent of increase, the limitation as to number being 30, as it is in this bill. Now, it is quite evident that whatever provision goes into the Army bill as to that branch of the service must also be provided for the other branch of the service.

Mr. PADGETT. I will bear that in mind, and if the Army bill is changed we shall insist on this being changed in conference.

Mr. MANN. But the gentleman can not change this in conference unless the Senate changes it, and if it is changed, I take it that that will be done so that the pay will be the same in the two services. If it were not for that I should make the point of order.

Mr. SISSON. The gentleman will have to bear in mind that the pay in the Navy and the Army are not the same.

Mr. PADGETT. They run on parallel lines. It will enable them to pay the Army officer with the rank of a colonel, which is higher than a lieutenant commander in the Navy.

Mr. SISSON. There ought to be some similarity in the provision so that the increase of pay would be the same in both services.

Mr. PADGETT. As it was already in there, our committee thought that a grade high enough for flying ought to come from the younger officers and not from the older, and so we limited it to the grade of lieutenant commander.

Mr. SISSON. Mr. Chairman, I withdraw the point of order.

The Clerk read as follows:

That the accounting officers of the Treasury are hereby authorized and directed to allow in the accounts of disbursing officers of the Navy all payments heretofore made by them in accordance with orders or regulations of the Secretary of the Navy for commutation of subsistence to members of the Nurse Corps of the Navy at the rate therein specified, and that the Secretary of the Navy is hereby authorized, in his discretion, to hereafter allow members of the Nurse Corps of the Navy 75 cents per diem in lieu of subsistence when subsistence in kind is not furnished by the Government.

Mr. SISSON. Mr. Chairman, I reserve a point of order.

Mr. MANN. I make the point of order.

Mr. SISSON. I reserved it, Mr. Chairman, for the purpose of getting information. If the gentleman from Illinois desires to make it——

Mr. MANN. I will reserve it.

Mr. SISSON. I wanted to ask the gentleman from Tennessee what would be the effect of this provision?

Mr. PADGETT. We established heretofore a female nurse corps in the Navy to correspond with the one in the Army. The Secretary of the Navy made a regulation providing that these nurses should receive commutation of quarters at 75 cents a day, and they enlisted and served under that regulation, which they supposed to be valid. Afterwards the Comptroller of the Treasury, in one of the Army appropriation bills, decided that under the law they could only receive commutation at 40 cents a day, so that they had been paid 35 cents a day in excess of what the comptroller decided could be paid. Thereupon the accounting officers of the Treasury checked up the salaries of these female nurses to repay to the Government the 35 cents a day which had been overpaid.

Mr. SISSON. What is their pay now?

Mr. MANN. Fifty dollars a month with room, heat, and light.

Mr. PADGETT. Fifty to seventy-five dollars a month.

Mr. SISSON. What does the 75 cents for commutation add to their pay?

Mr. PADGETT. Over the amount allowed, 40 cents for commutation quarters, it would add $10 or $12, or in all about $21 or $22.

Mr. SISSON. In addition to what they get?

Mr. PADGETT. Ten or twelve dollars in addition to what they get under the 40-cent provision, and over what they supposed they were getting when they enlisted it would add nothing.

Mr. SISSON. How many are there in the Nurse Corps?

Mr. PADGETT. I think about 30 or 35.

Mr. MANN. May I ask the gentleman a question?

Mr. PADGETT. Certainly.

Mr. MANN. Who else in the Navy gets an allowance as high as 75 cents a day in lieu of subsistence?

Mr. PADGETT. None that I know of.

Mr. MANN. Anybody in the Army?

Mr. PADGETT. No.

Mr. MANN. Does the gentleman think that we can allow a small number in the Army or in the Navy this sum for commutation without allowing it subsequently to everybody else?

Mr. PADGETT. The committee thought 75 cents a day commutation was not unreasonable in view of the fact that their salaries ranged from $50 to $75 a month.

Mr. MANN. If the salaries are too small, increase them. Does it cost any more for subsistence of a nurse than for a quartermaster?

Mr. PADGETT. No; but when they go out and subsist themselves, and this is received in lieu of subsistence, I do not think they can live on much less than 75 cents a day.

Mr. MANN. If that rule is true, ought it not to be applied to everybody else in the Navy who gets an allowance in lieu of subsistence?

Mr. PADGETT. I appreciate the gentleman's suggestion. The matter was discussed in committee. The committee concluded that they would submit it to the House. The gentleman will notice that the provision has two clauses.

Mr. MANN. Yes; I had noticed, and I have no doubt the second clause grew out of sympathy for the first. They have all been allowed 75 cents a day, and now it is proposed——

Mr. PADGETT. I was going to ask the gentleman if he insisted on his point of order, to limit it to the second clause of the provision, and not to the first, which was under the terms under which they made their enlistment.

Mr. MANN. How much does it amount to?

Mr. PADGETT. It is a small amount.

Mr. MANN. I know that; but how much is it? If the gentleman desires it to go through, he ought to know what it is?

Mr. PADGETT. I do not recall at this time.

Mr. HOBSON. I think it is only a few hundred dollars.

Mr. SISSON. Mr. Chairman, I withdraw the point of order.

Mr. MANN. Mr. Chairman, I make the point of order.

The CHAIRMAN. Does the gentleman make it against all of it or just the latter clause?

Mr. MANN. Oh, I think if you start to allow 75 cents a day to anyone you will have to give it to everybody, and as it is only a very small amount, you better do it by special bill.

Mr. PADGETT. It is subject to the point of order, Mr. Chairman.

The CHAIRMAN. The Chair sustains the point of order.

Mr. HOBSON. Mr. Chairman, I offer the following committee amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

At the end of line 5, page 4, add the following:

"*Provided*, That all officers of the Navy who, since the 3d day of March, 1899, have been advanced or may hereafter be advanced in grade or rank, pursuant to law, shall be allowed the pay and allowances of the higher grade or rank from the dates stated in their commissions."

Mr. FOSTER. Mr. Chairman, I make the point of order against the amendment.

Mr. HOBSON. Mr. Chairman, I would like to discuss the point of order.

The CHAIRMAN. Does the gentleman from Illinois reserve the point of order?

Mr. FOSTER. I do not believe it is necessary, Mr. Chairman. We had this up one time before under unanimous consent.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

PAY, MISCELLANEOUS.

The Secretary of the Navy shall send to Congress at the beginning of its next regular session a complete schedule or list showing the amount of money of all pay under the provisions of this act and for all allowances for each grade of officers in the Navy, including retired officers, and for all officers included in this act and for all enlisted men so included.

Mr. MANN. Mr. Chairman, I move to strike out the last word, for the purpose of asking the gentleman how much is now paid for retired officers, as shown by the report of the Secretary. Will the gentleman put in the RECORD a brief statement and show the amount of pay and allowances in accordance with the report made by the Secretary under this paragraph?

Mr. PADGETT. Yes; we will put it in the RECORD. I will state that the pay of officers on the retired list is $3,189,761.

Mr. MANN. How much on the active list?

Mr. PADGETT. Ten million seven hundred and seventy thousand seven hundred and ninety-two dollars.

Mr. ROBERTS of Massachusetts. That is all to be found in the Book of Estimates.

Mr. GREGG of Texas. The $3,000,000 pay for retired officers is for 975 officers?

Mr. PADGETT. Yes.

Mr. GREGG of Texas. And the $10,000,000 for the officers on the active list is for 3,806 officers?

Mr. PADGETT. Yes.

Mr. GREGG of Texas. Has the chairman made a calculation of how much the average pay per year of the retired officer exceeds the average pay per year of the officer on the active list?

Mr. PADGETT. It is more for the reason that the officers on the retired list are retired in higher grades. You have many officers of the grade of ensign and first lieutenant and lieutenant of the junior grade on the active list.

Mr. GREGG of Texas. Can the gentleman tell exactly how much the average pay of officers on the retired list exceeds the average pay of officers on the active list?

Mr. PADGETT. It is a matter of calculation.

Mr. GREGG of Texas. I thought the gentleman had figured it out.

Mr. PADGETT. No; I have not. It is a matter of arithmetic.

Mr. MANN. Mr. Chairman, how many admirals are there on the retired list?

Mr. PADGETT. About 147 or 148.

Mr. MANN. Not more than that?

Mr. PADGETT. I think not.

Mr. MANN. How many on the active list?

Mr. PADGETT. There are some commodores on the retired list.

Mr. MANN. They are treated as admirals?

Mr. PADGETT. They have the same pay, but they are regarded as commodores. Under the personnel act they have the title of commodore.

Mr. MANN. Do they not now get the title of admiral?

Mr. PADGETT. No; not on the retired list.

Mr. BUTLER. There are 21 admirals on the active list.

Mr. MANN. And 140 or 150 on the retired list.

Mr. PADGETT. Under the law the active list of admirals is limited to 18, and there are 3 extra numbers growing out of the Spanish War. A few years ago there were 26 on the active list.

Mr. HOWARD. I would like to ask the gentleman from Tennessee a question. Has the gentleman from Tennessee any information as to how many of these admirals who are on the retired list have commanded as much as a big flat-bottom bateau?

Mr. PADGETT. No; I have no information as to whether they commanded a bateau or not.

Mr. HOWARD. As a matter of fact, not 1 per cent of those who are retired ever commanded a fleet or even a battleship in their life.

Mr. PADGETT. Oh, I think it is much larger than that; I do not think that stricture is at all merited.

Mr. CALLAWAY. Will the gentleman yield to me? The gentleman stated awhile ago you advanced their grade when retired.

Mr. PADGETT. No; formerly we did, but we repealed that law last year.

Mr. CALLAWAY. The gentleman stated that there are 21 admirals in the active service.

Mr. PADGETT. I said 18. As a fact, there were 21, but 3 of them are there by virtue of special legislation of Congress.

Mr. CALLAWAY. Is there any limit at all on how many you can have retired?

Mr. PADGETT. No; it is fixed by the number who reach the age of 62 years in their promotion, but as they reach it those on the retired list die.

Mr. CALLAWAY. Are all retired admirals 62 years old?

Mr. PADGETT. Yes; and more.

The CHAIRMAN. The time of the gentleman has expired.

Mr. CALLAWAY. And there is no retired admiral under 62——

Mr. PADGETT. There is none under 62, and I think one is nearly 90.

The CHAIRMAN. The time of the gentleman has expired.

Mr. BUTLER. Mr. Chairman, I ask this committee to give me five minutes in which to say something I have to say. I have listened with great patience and a little impatience to what has been said here on both sides and well said touching economy in the administration of the Navy. Millions have rolled lightly from their tongues as Members spoke of the abundance of the American Treasury. They have talked about officers and men with commissions, and used names which receive attention in the headlines of the newspapers, but not one man, with the exception of my old friend from Illinois, has ever rebuked the slander that has been visited by a foreigner upon the men behind the guns. I refer to a statement made by a man who was presumed to be at the time he spoke a member of the Canadian Parliament. If he is correctly quoted, he should not be a member of any parliament. I can not conceive how a free people would elect a man who is so boldly inaccurate, and if correctly quoted, so brutally untruthful. I refer to a speech reflecting upon our American sailors, said to have been made by some man whose name I do not now recall——

Mr. FOWLER. The Hon. Samuel Simpson Sharpe.

Mr. BUTLER. The Hon. Samuel Simpson Sharpe, my friend tells me. Right here I desire in this public place to commend the gentleman from Illinois for having taken an early opportunity to make a denial of this unfortunate comment upon 47,000 American sailors. In the course of his remarks the gentleman of the Canadian Parliament used this language:

Men who are not good socially, morally, and otherwise.

If these remarks should ever fall before this man's gaze, I hope that my rebuke will attend them, and that he shall know that there is one American citizen who is not afraid to denounce him as boldly untruthful. [Applause.] My friends, we have 47,000 enlisted men in the American Navy—give me your attention for a moment—I am simply making the defense for plain men who only speak through their performances and who in the affairs of our Government are taking a most important part. If this man were ignorant, I would deplore his lack of knowledge, but being untruthful I despise him. [Applause.] Gentlemen, this great fleet of ours, composed of 25 ships of war, went around the world making 25,000 miles of a journey within the last three or four years, and to the credit of its seamen who attended it not one case of misbehavior has been reported. [Applause.] It touched place after place in the world. It visited Japan, China, Siam, in the East, and all parts of the world in its route, giving a great object lesson for the people of the world that the American Navy was not built to live at home. Wherever this fleet touched these men were landed, and I repeat what I said before, to their great credit not one case of misbehavior has been reported against them. It is easy for us to talk of how our sailors on Lake Erie actually played with death and how at Santiago they were brave enough to taunt their enemy, but now when their morality and stability are assailed, when they are accused of being worthless and without character, I wish that every man in this House would be willing to bear testimony to the high esteem in which the American people hold them.

This same authority upon American morality has the effrontery to say that these men are principally foreigners. Perhaps he did not know of what he spoke; but if he did know, he was untruthful in his statement. Of the 47,000 men in the American Navy, or enlisted in the American Navy, 96 per cent are American citizens. [Applause.] Of the 96 per cent, 90 per cent are American citizens born in America.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. Mr. Chairman, I ask unanimous consent that the gentleman have five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BUTLER. Mr. Chairman, to repeat, of this 96 per cent, 90 per cent are native born; and of that 96 per cent, 4 per cent are composed nearly entirely of natives from the insular possessions, who are debarred from citizenship by a doubtful construction of the law by the courts. The 1 per cent is foreign born, and enlisted in our service more than six years ago, before the date of the law denying further enlistment of foreign citizens, and that 1 per cent patiently serve us as noncombatants.

Now, I think I have been able, at least I have endeavored, within the few minutes that you have accorded me, to show you that this statement, made by a supposedly responsible party and published generally in our newspapers, and which I have never seen denied by them—this reflection on the character of the American seamen is unworthy even of the man who was rash enough to make it. My friends, I have here in my hands a memorandum prepared by a man who knows the service well; a man who has soldiered with our seamen and bears honorable scars upon his body given him by the enemies of America. I requested him to give me a statement affecting the personnel, of its conduct and of its character, because he knows better than I do concerning these things, and with your permission I will make this statement of Lieut. Commander Tausig a part of my remarks.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

The following is the memorandum referred to:

FEBRUARY 15, 1913.

NOTES CONCERNING THE ENLISTED FORCE OF THE NAVY.

Recently in the Canadian Parliament a member of that organization made a reflection on the character of the American sailor. These remarks have been given widespread significance by the newspapers of this country and in foreign journals. Although refuted by an editorial in the Washington Post and in a speech made by the Hon. Mr. FOWLER,

of Illinois, on the floor of the House on the 30th of last month, the publicity given the Post editorial and this speech has been insignificant compared to that given the speech of the member of the Canadian Parliament.

The member of the Canadian Parliament said, in part:

"Few native Americans sign for the Navy, and those who do are desperate. Men who are no good socially, morally, and otherwise. A hard winter, hard times, and strikes make the best recruiting seasons for the United States Navy. Thus it becomes a sort of home for destitutes and moral degenerates. Deserters from foreign ships—Scandinavians, Russians, Finns, Austrians, and Latins—take kindly to the Yankee Navy, for in it they learn the language and a trade, and the life to them is easy compared with their previous existence."

It can be positively stated that these remarks are false.

What is given here is founded on facts as shown by official reports and statistics.

There are in the Navy to-day approximately 47,000 men, of whom 96 per cent are American citizens. This 96 per cent is composed of 90 per cent native-born, and 6 per cent naturalized citizens. The remaining 4 per cent is composed nearly entirely of natives of our insular possessions who are debarred from citizenship by a doubtful construction of the law by the courts. Less than 1 per cent of the total enlisted force of the Navy, the part not accounted for in the figures just given, are aliens. This 1 per cent is composed entirely of men who first enlisted more than six years ago, before the law was changed prohibiting the enlistment of foreigners. These men have been honorably discharged and reenlisted, as most of them have had long, faithful, and honorable service in the Navy of this country. These men, the foreigners, belong to the noncombatant element on board ship, such as musicians and messmen, and their numbers are so small their importance on board sinks into insignificance. From this it is seen that the sailors who man the guns, those who fire the furnaces, and those who handle the intricate machinery on board our men-of-war are American citizens.

It can be shown that these men are not low characters, but are men of excellent character, of good family, and far above the average.

The following are extracts from the Navy Regulations on the subject of recruiting:

"Every person before being enlisted must pass the physical examination prescribed in the medical instructions; and no one shall be enlisted unless pronounced fit by the commanding and medical officers. * * * Each recruit shall be required to declare on oath, in presence of the commanding officer of the ship or rendezvous, that he makes a true statement of his age to the best of his knowledge and belief * * *. No insane or intoxicated person and no deserter from the naval or military service * * * shall be enlisted in the naval service. * * * Except as provided in article 760, no person shall be enlisted who is not a citizen of the United State or a native of the insular possessions and who does not understand and speak the English language.

"Article 760 is the provision authorizing any man who has received an honorable discharge to reenlist within four months from date of discharge, and is the regulation by virtue of which the small per cent of foreigners are still in the service."

There are many other Navy regulations governing enlistments. The intent of all of them is to insure the enlistment of a high-class native element, on whom the country must depend for defense should there ever come another war.

The Bureau of Navigation, which has direct charge of recruiting, issues to all recruiting officers explicit instructions as to the intent of the regulations and insists that only men who come up to the requirements be enlisted. Once in a while a mistake is made and a man of low character slips through, but these exceptions are seldom, and it is not long before the man's true character is learned and he is discharged or dismissed.

That only men who are morally, mentally, and physically fit is shown by the fact that during the fiscal year ending June 30, 1912, out of 73,364 applicants for enlistment only 17,743 were accepted and allowed to enlist. These figures are significant in that they show our American sailors to be picked men. In many foreign countries all able-bodied men must serve for a certain length of time in either the army or navy. It is not to be supposed that the men of the services of such countries where all must serve can compare in character and physique with the men in our Navy, where only a few are chosen from the many who desire to enlist. The standard of the enlisted personnel of our Navy is the highest in the world. There are hundreds of cases on record in the files of the Navy Department that show the high character of the American sailor. These official documents comprise testimonials from our own people and from foreign sources.

A few of the many instances where the inherent bravery and natural worth of the American bluejacket is shown are given below.

There is not an instance on record where, in cases of emergency, the sailors have not arisen to the occasion and been willing to sacrifice themselves either in fighting for their country or in the saving of the lives of their shipmates and others. The eager rush of volunteers to man the *Merrimac* when it was known she was to be sent on a mission from which escape seemed well-nigh impossible, the difficulty of picking a crew from the thousands of volunteers, and the joy of the few who were chosen and the sorrow of the many who were not is an example. The manner in which these men behaved in the face of a terrible fire and how well they conducted themselves during their long confinement in a Spanish prison are matters of history. These men who composed the crew of the *Merrimac* were picked at random from the American sailors.

During the Boxer uprising in China in 1900 a column of 2,000 men composed of the sailors representing eight nations attempted to reach our besieged legations in Pekin. This column was overwhelmed by many times their number of Chinese soldiers, but they finally fought their way into Tientsin. In this encounter, lasting over a week, the American sailors and marines, under Capt. McCalla, were given the post of honor in the van by Vice Admiral Sir Edward Seymour, of the British Navy, who commanded the combined forces by virtue of his rank.

Vice Admiral Seymour in a letter to the commander in chief of the American fleet said:

"I desire to express to you my highest sense of the unfailing energy and zeal displayed under somewhat trying circumstances by the United States officers and men, whose courage was worthy of their high traditions and requires no words of men to describe."

The incidents referred to show us the American sailor in the stress of battle under modern conditions.

A few instances not under the stress of battle but dwelling on emergencies in time of peace are noted below:

In 1902 a fire broke out on board the gunboat *Petrel*. In this fire the commanding officer of the ship lost his life, but many sailors made heroic efforts to save him. In a general order, issued by the Secretary of the Navy, these men are mentioned by name. The order states:

"These men were themselves overcome by the smoke and had to be hauled up to the upper deck."

In 1906 a boiler on the gunboat *Bennington* exploded, killing many of the crew. After a thorough investigation the Secretary of the Navy issued a general order to the service. An extract from this order follows:

"Men grievously wounded forgot their own injuries and rushed back in the shower of scalding water, steam, and ashes to rescue their more unfortunate shipmates. Amid such a display of self-sacrifice and heroism it is difficult to select individual cases * * *."

The coolness and bravery of the sailors in the terrible accidents that happened in the turrets of the *Georgia*, the *Missouri*, and the *Kearsarge* when, in each case, a number of men exposed themselves to almost certain destruction in their endeavors to save human lives, are well known to all who have kept in touch with naval affairs.

In September, 1910, an act of bravery was performed by a number of sailors on the *North Dakota* when an explosion occurred while making a test with fuel oil. The general order on this subject, after giving the names of a number of men, states:

"On September 8, 1910, while making tests with oil as fuel, an explosion occurred, resulting in the death of three enlisted men of the Navy and greatly endangering the ship. The men named above hauled fires in the furnaces of boiler in No. 3 fireroom while the oil was burning on boiler 'I,' and took all precautions to prevent boiler explosions. They searched for and assisted in carrying out the bodies of the three men who lost their lives. This work was done in water up to their waists, in dense smoke, heat, and fumes from burning oil, and gas and steam arising from the hot coals and coke floating on the water."

These accounts, taken from records in the Navy Department, are founded on fact. These acts are only a few of the many on record and speak for themselves in showing to the country the true character of the American sailor.

There are numerous letters in the department, written from many varying sources, testifying to the good behavior of the sailors when on shore. The most notable incident is the recent cruise of the battleships around the world. In every port of the world where the fleet touched thousands of American sailors went ashore on liberty. In not one of these ports was it necessary for the local authorities to arrest a single American bluejacket. In every port the authorities and the newspapers made special comment on the excellent behavior of the American sailors; many foreign officials made official reports to their Governments on this subject, and some of them wrote direct to the commander in chief of our fleet. These letters are on record in the department.

Admiral Simpson, of the Chilean navy, who was present at Punta Arenas during the stop of the American fleet at that port, wrote to his Government:

"During the stay of the American fleet at Punta Arenas, Admiral Evans gave permission to the greater proportion of the sailors of his ships to go on shore, and, according to the official report made by the commissioner of police of Punta Arenas, a copy of which was given me by the governor of the Territory, the American sailors have shown a spirit of discipline and order worthy of praise. In spite of the fact that so many sailors had shore leave, calculated as 15,000 by the commissioner, there was no disagreeable incident to be complained of."

It will be remembered that shortly before the fleet went to Japan there had been misgivings about allowing the American sailors to go ashore in this country, owing to the ill feeling supposed to exist toward the Japanese sailors. The Navy Department did not have any apprehension on this score, but the public at large, through the newspapers, expressed grave fears of disturbances if the sailors were allowed to go ashore; but in Japan, as in all other places, there was not a single case of misconduct, and all the men of the fleet went ashore—as many as 3,000 at the same time. In fact, the behavior of the sailors while in Japan was so exemplary the commander in chief sent a special cablegram to the President of the United States commending their conduct.

On an average of about 10 times a year the attention of the department is called to some special noteworthy act of the sailors. Since the Congress provided for awarding medals of honor to men for deeds of gallantry and heroism in times of war and peace there have been over 700 of these medals issued to the men "who have shed luster on the service by upholding the honor of the flag in storm and battle, by their devotion to the country and to each other, and by their unselfishness in risking their own lives to save others."

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. LEE of Pennsylvania having taken the chair as Speaker pro tempore, a message from the Senate announced that the Senate had insisted upon its amendments to the bill (H. R. 28607) making appropriations for the Diplomatic and Consular Service for the fiscal year ending June 30, 1914, disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. CURTIS, Mr. SMOOT, and Mr. MARTIN of Virginia as the conferees on the part of the Senate.

NAVAL APPROPRIATION BILL.

The committee resumed its session.

Mr. SISSON. Mr. Chairman, the gentleman referred to the expenditures of money out of the Federal Treasury. I want to call the attention of my Democratic colleagues to the Democratic platform, in view of many of the appropriation bills which have passed this House and in view of the fact that it now seems as if these bills as they passed the House will aggregate something like $121,000,000 more than the last Republican Congress. When you take into consideration that the Committee on Appropriations is the committee that has saved something like $40,000,000 over the last Appropriations Committee, it seems to me that this language of the platform may be new in the minds of our Democratic friends. The last platform, on the subject of Republican extravagance, is as follows:

We denounce the profligate waste of the money wrung from the people by oppressive taxation through the lavish appropriations of the

recent Republican Congresses, which have kept taxes high and reduced the purchasing power of the people's toil. We demand a return to that simplicity and economy which befits a democratic Government——

Mr. MANN. I think you would be ashamed to read that now.

Mr. SISSON. It is with a degree of pain, I will say to the gentleman from Illinois, that I do read it; but I think it is proper, because we are coming into power in both branches of the Government, and I think it is well that Democrats should begin at the very beginning of the Democratic administration to try to carry out their pledges. The conclusion of our platform is as follows:

Our platform is one of principles which we believe to be essential to our national welfare. Our pledges are made to be kept when in office as well as relied upon during the campaign, and we invite the cooperation of all citizens regardless of party.

Now, I want to say to my Republican friends that you have helped out considerably in this matter upon the theory that the Democratic majority in this House is responsible for the appropriation bills as they leave the House. And when an effort has been made as a rule, with some exceptions, the majority of our Republican friends have helped to put us deeper in the hole. But I want to say to my Democratic colleagues, that if we do not want to put a check upon these appropriations, unless we find a new method of taxation, according to the income of the Treasury to-day, Woodrow Wilson, during his second, if not the first, year of his administration, will be confronted with a bond issue. I therefore call upon Democrats here and now to do what they can to prevent in conference any more additions to these bills. And if they make an effort in another body to put large additions to these bills, I believe it would be the duty of every Democrat here to see that these bills are not passed, and that they be taken up under the next Democratic administration, because this Government is provided for up until the 1st of July, and if the Congress is unable then to make appropriations by that date, we then can pass resolutions, as we have frequently done, from month to month, reappropriating the amount carried in the last appropriation bill, and save to the American people millions of dollars and carry out our pledges to them, and be able to go home and look the honest electorate squarely in the face, and say that we have kept the faith. [Applause on the Democratic side.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. MANN. Mr. Chairman, will the gentleman yield?

Mr. SISSON. I yield to the gentleman from Illinois.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. MANN. Mr. Chairman, I ask unanimous consent that the gentleman from Mississippi [Mr. SISSON] have two minutes more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection

Mr. MANN. I understand that the recommendation of the gentleman is that, instead of trusting to a Democratic Congress to pass the appropriation bills, they will just pass a joint resolution extending the appropriations made under a Republican President for fear they will be too extravagant if they make them themselves? [Laughter.]

Mr. SISSON. No; because we do not have time now, and perhaps we would have time to pass them before the 1st of July.

But I will say to the gentleman from Illinois that when I came here I was very much more of a partisan than I am now. I want to say that economy as practiced on this side of the House is not altogether a virtue applicable and attributable only to the Democrats. The Republicans have exercised some economy, and I realize now how difficult it is to keep down the appropriation bills. But since the time when we denounced you in our platform eight years ago and four years ago for extravagance for spending $90,000,000 more than you did in the preceding year—and I have not the time now in the two minutes allowed me to read the platform declaration where we denounced you because you had expended $90,000,000 more than you expended in the preceding year—the question arises, Why on earth have the Democrats the right to denounce Republicans for extravagance in the future? For the life of me I can not see. [Applause and laughter.]

Mr. MANN. For years the stock in trade of the gentleman's party has been to denounce the Republicans for extravagance.

Mr. SISSON. Yes; and if I had my way about it, I would make good our pledges and in that way put you in a hole, and not ourselves. [Applause on the Democratic side.]

Mr. MANN. Oh, the gentleman can not say that. You Democrats are all extravagant. You denounce extravagance one day and become extravagant yourselves the next day. [Applause on the Republican side.]

Mr. SISSON. Oh, the gentleman need not shake his gory locks at me, because if I have made any reputation here among my Democratic as well as Republican colleagues, it has been because I have made an honest attempt to practice economy and advocate the practice of economy on the part of others. [Applause on the Democratic side.]

Mr. MANN. Oh, the gentleman from Mississippi is just as anxious to put through a lot of stale claims as anybody I know of on his side of the House. [Laughter.]

Mr. SISSON. I am anxious to prevent the payment of stale claims, and I will remind the gentleman from Illinois that I have helped him prevent the payment of stale claims in this House, and every one of them was from the Southern States, because I did not think they were just and honest claims.

Mr. MANN. The gentleman has remarked that the bills already sent over to the Senate would exceed in the aggregate the highest Republican appropriations by $120,000,000.

Mr. SISSON. That is an estimate, but it is not far from accurate.

Mr. MANN. If the gentleman's party has succeeded in going $120,000,000 above the highest limit reached by the Republicans while the Democratic Party has had control of only one House, how much does the gentleman suppose his party will exceed the total appropriations attained by the Republicans when his party shall have control of both House and Senate? [Laughter.]

Mr. SISSON. I say that is the reason why we should consider in the future what we have done and try to do better in the next Congress; and I say that I have reached that point in my life where I shall expect and endeavor to serve my country, even though some of my party colleagues here complain when I state the truth in the House.

Mr. MANN. Mr. Chairman, will the gentleman yield again?

Mr. SISSON. Yes.

Mr. MANN. Last year the Members on the Democratic side held a caucus with a view to keeping down the total of the naval appropriation bill. Has my friend from Mississippi called such a caucus this year for that purpose?

Mr. SISSON. I will say to the gentleman from Illinois that there was such a call, and I was in entire sympathy with it.

Mr. MANN. Yes; it was called, but nobody came. [Laughter.]

Mr. SISSON. The trouble was that those who believed in faithfully carrying out the pledges of our party platform did attend, but the balance stayed away, and the men who believed in a two-battleship program succeeded in breaking up the meeting. [Laughter.]

Mr. MANN. Those who stayed away were so much more numerous than those who came that those who did attend the meeting could not do anything. The economists on your side are in a minority, and always were, except on the stump. [Laughter.]

Mr. HOWARD. Mr. Chairman, a parliamentary inquiry.

Mr. SISSON. I want to say, Mr. Chairman, to the gentleman from Illinois [Mr. MANN]——

Mr. MACON. Mr. Chairman, I rise to a question of order. The gentlemen are not discussing the bill. I make the point of order.

Mr. SISSON. The other gentlemen were not discussing the bill, either.

Mr. MANN. We were discussing the extravagance of the Democratic Party incident to the discussion of the naval appropriation bill.

Mr. SISSON. Just one word more, Mr. Chairman. I want to say that I do not believe the statement made by the gentleman from Illinois is by any means correct. I know that repeatedly on this floor a majority of the Democrats have voted for economical measures when nearly a solid vote appeared on the other side against those policies. [Applause on the Democratic side.]

The CHAIRMAN. The time of the gentleman has expired. The Clerk will read.

MESSAGE FROM THE SENATE.

The committe informally rose; and Mr. LEE of Pennsylvania having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Crockett, one of its clerks, announced that the Senate had insisted upon its amendments to the bill (H. R. 22526) to amend section 8 of an act entitled "An act for preventing the manufacture, sale, or transportation of adulterated or misbranded or poisonous or deleterious foods, drugs, medicines, and liquors, and for regulating traffic therein, and for other purposes," approved June 30, 1906, disagreed to by the House of Representatives, had agreed to the conference asked by the House on the disagreeing votes of the two Houses thereon, and had appointed Mr. OLIVER, Mr. LA FOLLETTE, and

Mr. SMITH of South Carolina as the conferees on the part of the Senate.

The message also announced that the Senate had passed the following resolutions:

Resolved, That the Senate has heard with deep sorrow of the death of the Hon. WILLIAM W. WEDEMEYER, late a Member of the House of Representatives from the State of Michigan.

Resolved, That as a mark of respect to the memory of the deceased the business of the Senate be suspended in order that proper tribute may be paid to his high character and distinguished public services.

Resolved, That the Secretary communicate a copy of these resolutions to the House of Representatives and to the family of the deceased.

Also—

Resolved, That the Senate expresses its profound sorrow on account of the death of the Hon. GEORGE HERBERT UTTER, late a Member of the House of Representatives from the State of Rhode Island.

Resolved, That the business of the Senate be now suspended in order that fitting tribute may be paid his high character and distinguished public services.

Resolved, That the Secretary communicate a copy of these resolutions to the House of Representatives and to the family of the deceased.

Also—

Resolved, That the Senate has heard with deep sorrow of the death of the Hon. ISIDOR RAYNER, late a Senator from the State of Maryland.

Resolved, That as a mark of respect to the memory of the deceased the business of the Senate be now suspended, to enable his associates to pay proper tribute to his high character and distinguished public services.

Resolved, That the Secretary communicate a copy of these resolutions to the House of Representatives and transmit a copy thereof to the family of the deceased.

Also—

Resolved, That as a further mark of respect to the memory of Mr. RAYNER, Mr. UTTER, and Mr. WEDEMEYER the Senate do now adjourn.

NAVAL APPROPRIATION BILL.

The committee resumed its session.

The Clerk read as follows:

For commissions and interest; transportation of funds; exchange; mileage to officers while traveling under orders in the United States, and for actual personal expenses of officers while traveling abroad under orders, and for traveling expenses of civilian employees, and for actual and necessary traveling expenses of midshipmen while proceeding from their homes to the Naval Academy for examination and appointment as midshipmen; for actual traveling expenses of female nurses; for rent of buildings and offices not in navy yards, including the rental of offices in the District of Columbia; expenses of courts-martial, prisoners and prisons, and courts of inquiry, boards of inspection, examining boards, with clerks' and witnesses' fees, and traveling expenses and costs; stationery and recording; expenses of purchasing paymasters' offices of the various cities, including clerks, furniture, fuel, stationery, and incidental expenses; newspapers; all advertising for the Navy Department and its bureaus (except advertising for recruits for the Bureau of Navigation); copying; care of library, including the purchase of books, photographs, prints, manuscripts, and periodicals; ferriage; tolls; costs of suits; commissions, warrants, diplomas, and discharges; relief of vessels in distress; recovery of valuables from shipwrecks; quarantine expenses; reports; professional investigation; cost of special instruction at home and abroad, in maintenance of students and attachés; information from abroad, and the collection and classification thereof; all charges pertaining to the Navy Department and its bureaus for ice for the cooling of drinking water on shore (except at naval hospitals), telephone rentals and tolls, telegrams, cablegrams, and postage, foreign and domestic, and post-office box rentals; and other necessary and incidental expenses: *Provided*, That the sum to be paid out of this appropriation under the direction of the Secretary of the Navy for clerical, inspection, and messenger service in navy yards, naval stations, and purchasing pay offices for the fiscal year ending June 30, 1914, shall not exceed $280,000; in all, $1,000,000: *Provided further*, That the same construction shall be made of the law applying to leave of absence of all per diem employees of the classified service of the clerical, drafting, inspection, messenger, and watch force paid from appropriations made in this act: *Provided further*, That employees while taking their leaves of absence shall not receive compensation for services rendered during the period of such leave of absence in addition to leave pay.

Mr. SISSON. Mr. Chairman, I reserve a point of order on the new matter which I can point out in this paragraph. On page 4, in line 22—

For rent of buildings and offices not in navy yards, including the rental of offices in the District of Columbia.

The proviso on page 5, the proviso beginning in line 1 on page 6, and the other proviso, beginning in line 5 on page 6.

The CHAIRMAN. Does the gentleman refer to the words in parentheses in lines 5 and 6 on page 5?

Mr. MANN. The gentleman can reserve a point of order on the paragraph.

Mr. SISSON. A portion of it is not subject to the point of order.

Mr. MANN. The gentleman can reserve a point of order on the entire paragraph.

Mr. SISSON. I will reserve a point of order on the entire paragraph. I notice on page 4, in lines 22 and 23—

For rent of buildings and offices not in navy yards, including the rental of offices in the District of Columbia.

Mr. PADGETT. The words "including the rental of offices in the District of Columbia" are new matter. This is not a new charge or a new appropriation. For a number of years they have been paying rent out of this appropriation, amounting to $3,996 a year.

Mr. SISSON. Is that authorized by law?

Mr. PADGETT. They have been renting offices here for years, and officers have been occupying them, and they have been paying for them out of this appropriation.

Mr. MANN. We can not hear the gentleman's statement.

Mr. SISSON. I asked the gentleman concerning the words:

Including the rental of offices in the District of Columbia—

Which words are new. I want to know whether that is authorized by law or not; and if so, why it is necessary to put these words in the bill.

Mr. PADGETT. I stated that for years the department has been renting quarters here in the District of Columbia, the amount of the rental being $3,996 a year. This is adding nothing to the expense.

Mr. SISSON. Is that the total rent?

Mr. PADGETT. That is the total rent. There is an act, passed some years ago, which reads:

Hereafter no contract shall be made for the rent of any building or part of any building to be used for the purposes of the Government in the District of Columbia until an appropriation therefor shall have been made in terms by Congress, and that this clause be regarded as notice to all contractors or lessees of any such building or part of building.

We thought that in view of that language there ought to be an express stipulation here, so that there would be no quibble with the accounting officers. Nothing is added. These quarters have been rented for many years.

Mr. SISSON. And this is solely for the purpose of making it legal?

Mr. PADGETT. For the purpose of making it plain, so there will be no quibble on the part of the accounting officers.

Mr. SISSON. Is the matter on page 5 new matter?

Mr. PADGETT. Not at all.

Mr. SISSON. On page 6 there is new matter?

Mr. PADGETT. On page 6 there is new matter. I will state to the gentleman that I received a letter, dated January 24, from the American Society of Marine Draftsmen, in which they call attention to the fact that if a clerk works up here in the department he is credited with 30 days' annual leave with pay. If a per diem employee works a year he is credited with 30 days' leave of absence with pay.

Mr. SISSON. Is this for the purpose of equalizing?

Mr. PADGETT. Yes. I want to give an illustration. If they detail this same man down at the navy yard to do their work there they only credit him with 15 days. To give you a concrete case, a draftsman in the Bureau of Yards and Docks worked in the department from January 1 to May 29 and was credited on the basis of 30 days' leave. He worked from May 29 to December 31 at the navy yard, doing the same work, and was credited at the rate of 15 days.

Mr. SISSON. In other words, when he works in the navy yard he only gets 15 days' leave, whereas if he works in the department he gets 30 days' leave.

Mr. PADGETT. Yes; doing the same work in both.

Mr. SISSON. How many men will this affect?

Mr. PADGETT. Not a large number, but I can not give the gentleman the number.

Mr. SISSON. It will affect everybody who works in the navy yard in the District of Columbia only, will it?

Mr. JOHNSON of South Carolina. No; in all the navy yards.

Mr. PADGETT. In all the navy yards of the country.

Mr. SISSON. Can the gentleman give any idea how many men will be affected by it?

Mr. PADGETT. Not a great many. This letter I have here states that they know of no law giving the per diem employees in the departments 30 days' leave.

Mr. SISSON. I know that this is solely for the purpose of construing the present statute.

Mr. PADGETT. To equalize it.

[The time of Mr. PADGETT having expired, by unanimous consent his time was extended five minutes.]

Mr. PADGETT. Now, if a man gets 30 days in the department, we thought he ought to get 30 days in the navy yard, but if he is entitled under the law to 15 days we are not raising it.

Mr. SISSON. I have no objection to that provision. I would prefer to change the law so as to make it 15 days instead of 30 throughout the entire service, but I am not going to make a point of order on the paragraph. The latter part of the paragraph I would like to have explained.

Mr. PADGETT. Our idea was that where the clerk gets 30 days' leave of absence it is for the purpose of resting and recuperating, to put himself in a position to do better service for the other 11 months. But we found cases where they would be credited with 30 days' absence, paid for the 30 days' leave, and then would actually work and get pay for that 30 days besides, so that they really got pay for 13 months. The latter part of

the item is to compel them to take the leave of absence and rest up and be prepared to do better service for the other 11 months.

Mr. SISSON. What assurance has the gentleman that they would not work outside of the department that extra 30 days?

Mr. PADGETT. We have no assurance, but they could not work for the department.

Mr. SISSON. Mr. Chairman, I withdraw the point of order.

Mr. MANN. Mr. Chairman, I renew the point of order. I regret to say that we could not hear what the chairman of the committee, the gentleman from Tennessee, was saying in the center of the Hall.

Mr. PADGETT. I want to say that my voice is in very bad condition owing to an attack of laryngitis.

Mr. MANN. I understand that, and I do not want to distress the gentleman. I want to ask him what is the meaning of the word "same" in this language: "That the same construction shall be made of the law applying to leave of absence of all per diem employees of the classified service," and so forth?

Mr. PADGETT. The department has construed that under existing law the per diem employees, working in the Navy Department, are entitled to 30 days leave of absence, but if that same employee is detailed to work in the navy yard, and paid from the same appropriation, and does the same work, he shall be entitled to 15 days.

Mr. MANN. Assuming that is true, how does this help it?

Mr. PADGETT. This says that if they construe one 30 days they shall construe the other one 30 days.

Mr. MANN. And it says if they construe the one for 15 days they shall construe the other for 15 days.

Mr. PADGETT. That is what it does.

Mr. MANN. But how do you know which way they will construe it? You can not construe the law that way. You say they shall construe it the same, but they may not be able to do it unless they change the law.

Mr. PADGETT. The gentleman who calls my attention to it in this letter says that the Judge Advocate General of the department made a ruling in which he stated by analogy the per diem employees were entitled to the same leave as the per annum employees.

Mr MANN. That is not what this section says.

Mr. PADGETT. He further says: "This ruling has never been construed to include the navy yard." Now, he says, "However, to my knowledge there is no law which grants 30 days' annual leave to a per diem employee in the Navy Department."

Mr. MURRAY. Who says that?

Mr. PADGETT. This clerk or secretary of the American Society of Marine Draftsmen, Washington, Navy Yard branch.

Mr. MANN. This paragraph is grammatically deficient. Here is a provision that the same construction shall be made of the law applying to leave of absence to all per diem employees of the classified service of the clerical, drafting, inspection, messenger, and watch force paid from appropriations made in this act. What does the word "same" have reference to?

Mr. PADGETT. That they shall make the same construction with reference to leave granted to those working in the department and those working in the navy yard who are paid from this appropriation; for the reason that they will be the same men, they will allow the same men while working in the Navy Department 30 days' leave, and when detailed to the navy yard only 15 days.

Mr. MANN. If you have one law that says one thing and another law that says another thing, and then you say the officers shall construe the different laws to mean the same thing, what do you mean by it?

Mr. ROBERTS of Massachusetts. That they will either get 15 days' leave or 30 days' leave.

Mr. MANN. Then change the law. This is no way to do that.

Mr. PADGETT. There is no express law for it.

Mr. MANN. Oh, the officers do not make the law. They take the law as we make it; and when the gentleman says there is no law on the subject——

Mr. PADGETT. I said no express statute.

Mr. MANN. There must be an express statute upon which they base this decision.

Mr. GARNER. They get that decision by analogy.

Mr. MANN. Very well. They get it from a statute. This does not mean anything.

Mr. PADGETT. Mr. Chairman, I can only tell the gentleman what language was used by the Judge Advocate General.

Mr. MANN. I am inclined to think that the result of this would be to cut off the 30-day leave now given to the various employees of the Government, who ought to have it, and reduce it to 15 days, and I make the point of order.

Mr. ROBERTS of Massachusetts. It will give the 15-day men 30 days.

Mr. MANN. But it does not say so.

Mr. ROBERTS of Massachusetts. The gentleman need not be alarmed but that they will construe it that way.

The CHAIRMAN. Does the gentleman make the point of order?

Mr. MANN. I made the point of order to the first proviso, on page 6.

Mr. PADGETT. Mr. Chairman, the point of order is well taken if the gentleman insists upon it.

The CHAIRMAN. The point of order is sustained.

Mr. COX. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 6, line 8, after the word "pay," at the end of the line, insert the following:

"*Provided*, That officers while traveling under orders in the United States shall be allowed only their actual mileage and no more."

Mr. MANN. Mr. Chairman, on that I reserve the point of order.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I reserve the point of order.

Mr. MANN. What does the gentleman mean by that?

Mr. COX. If the gentleman will observe the language on page 4, beginning with line 15—

Mileage to officers while traveling under orders in the United States,

I mean to reach that particular language.

Mr. MANN. Officers while traveling under orders in the United States?

Mr. PADGETT. They get 8 cents a mile now, and that covers Pullman and hotel bills and meals and other expenses. Does the gentleman's amendment limit it to the actual railroad ticket?

Mr. COX. Yes.

Mr. MANN. Is that the gentleman's amendment? Let us have it reported again.

The CHAIRMAN. Without objection the Clerk will again report the amendment.

There was no objection, and the Clerk again reported the amendment.

Mr. MANN. What does that mean?

Mr. COX. Actual mileage, train fare, and steamboat fare.

Mr. MANN. That is not what it says. They are only allowed actual mileage.

Mr. COX. But they are paid at the rate of 8 cents a mile.

Mr. MANN. That is true, but that is the mileage.

Mr. COX. And whatever that can buy?

Mr. MANN. Then, that is not the gentleman's amendment. They are allowed 8 cents a mile for their actual mileage, and they would still be allowed that even if the gentleman's amendment prevailed.

Mr. MADDEN. Mr. Chairman, I ask to have the amendment again reported.

The CHAIRMAN. Without objection the Clerk will report the amendment.

There was no objection, and the Clerk again reported the amendment.

Mr. COX. Mr. Chairman, if the gentleman will temporarily withdraw his point of order, I will ask leave to modify my amendment.

Mr. MANN. Oh, let the gentleman withdraw his amendment and offer another.

Mr. COX. Mr. Chairman, I ask unanimous consent to withdraw my amendment with permission to offer another.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. COX. Mr. Chairman, I now offer the amendment as follows:

Provided, That officers traveling under orders in the United States shall be allowed mileage not to exceed 5 cents a mile.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I insist that the gentleman put his amendment in writing.

The CHAIRMAN. The gentleman must prepare his amendment in writing.

Mr. COX. I would be very glad to do so, if I have the time.

Mr. SISSON. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Indiana has the floor. If the Clerk has the amendment in writing he will report the same.

The Clerk read as follows:

Page 6, line 8, after the word "pay" insert the following:

"*Provided*, That officers while traveling under orders in the United States shall be allowed mileage not to exceed 5 cents a mile."

Mr. MANN. Mr. Chairman, on that I reserve the point of order.

Mr. COX. Mr. Chairman, I do not desire to take up very much time in discussing this point of order. I think it is clearly in order under the Holman rule adopted at the beginning of the present Congress.

If the Holman rule means anything at all, then the amendment is clearly in order. If it does not mean anything at all—and it was put in the Democratic rules at the time the Democrats captured the Congress—we had better repeal it and get rid of it. The Holman rule provides that an amendment or legislation is in order on general appropriation bills where it tends to reduce expenses or to retrench expenditures. Now, Mr. Chairman, under the law officers of the Navy while traveling under orders are allowed 8 cents a mile. It was argued out once before on the floor of this House, and the Chairman knows that it does not take 8 cents a mile to travel in this country. I made the statement when the Army bill was before this House, and I take opportunity now to reiterate it, that you can buy a ticket from here to Seattle, Wash., for $73; that is, including Pullman fare. Five cents a mile is a sufficient amount. That is the amount of money we allow witnesses in going to and coming from the Federal courts and for travel under the orders of the court. Five cents a mile is the amount we allow our ambassadors and consuls while traveling to and from their destinations. The Department of Commerce and Labor is the only department in this Government that has had the nerve to come out and recommend that their employees be put upon an actual expense basis. The Department of Commerce and Labor has a few employees, I think inspectors, who travel at the rate of 5 cents a mile, and that department reports that if their employees were put on an actual expense basis, so far as mileage is concerned, they would save $15,000 a year. Now, Mr. Chairman, if that department's employees, drawing only 5 cents a mile, by being put upon an actual expense basis can save $15,000 a year, upon the same principle why can not we save that much or more if this class of officers were put under the same rule? I want to again draw the distinction, Mr. Chairman. While my amendment provides they can be allowed 5 cents a mile, that is the total amount that is now allowed to employees of the Department of Commerce and Labor, and yet they say by cutting that down to an actual mileage basis it will save $15,000 a year.

Mr. LEVY. Will the gentleman yield?

Mr. COX. I will yield.

Mr. LEVY. How does the gentleman expect them to pay for their Pullman?

Mr. COX. This 5 cents a mile will pay it.

Mr. LEVY. How does the gentleman expect them to pay the traveling expenses of their families?

Mr. COX. Five cents will pay for it all over the United States.

Mr. LEVY. How will they pay for their baggage?

Mr. COX. Five cents a mile will cover the entire amount, and still have money left.

Mr. LEVY. It is not half enough.

Mr. COX. Yes, it is enough; and more than enough.

Mr. HOBSON. Does the gentleman think that Members of Congress ought to have 20 cents a mile——

Mr. COX. I do not, and I have offered amendment after amendment here to reduce it, and I hope the gentleman has voted with me. I have offered to put it on an actual expense basis, and have offered to put it at the rate of 5 cents per mile, but I have always been defeated; and if any of my amendments had carried it would have saved over $200,000 per year.

Mr. HOBSON. I have not voted with the gentleman.

Mr. MANN. Will the gentleman yield for a question?

Mr. COX. Yes.

Mr. MANN. The allowance now of a naval officer for travel is 8 cents a mile.

Mr. COX. That is the statute.

Mr. MANN. And then in addition to that he is allowed the freight charges on 8,000 pounds of baggage.

Mr. COX. I think that is true; I know that amount is allowed to Army officers.

Mr. MANN. I assume that it is the same.

Mr. HOBSON. There is no allowance to a naval officer, I will say to the gentleman, except the 8 cents a mile.

Mr. MANN. The gentleman is usually correct; I hope he is this time, although I doubt it. I have never known the Navy to get any way behind the Army. The Public Health Service was making a great roar here a short time ago to the effect they were not receiving as much as the Army and Navy. Now, if the gentleman's amendment would prevail it would not only reduce the amount of mileage but it would also cut off the allowance for furniture and so on.

Mr. COX. I did not know that they use any part of this to pay cost of transporting freight.

Mr. MANN. But the gentleman's amendment, as I understand, limits the amount that can be paid to the officers traveling to 5 cents a mile.

Mr. COX. So far as his own personal traveling expenses are concerned.

The CHAIRMAN. The time of the gentleman has expired.

Mr. PADGETT. Mr. Chairman, my information is that while the Army and Marine Corps get an allowance for freight, the Navy does not have an allowance of that kind. Theirs is embraced within the 8 cents the officers get, and they do not get the freight privilege that is accorded to the others.

Mr. COX. Well, we do not take any part of this mileage of 8 cents a mile to pay the cost of transporting freight?

Mr. HOBSON. All has to come out of it.

Mr. PADGETT. When they move from place to place, out of that they have to pay their cost of moving.

Mr. MANN. Mr. Chairman, I make the point of order. Under the Holman rule, Rule XXI, it is provided:

Nor shall any provision in any such bill or amendment thereto changing existing law be in order, except such as being germane to the subject matter of the bill shall retrench expenditures by the reduction of the number—

Which this amendment does not do—

and salary of the officers of the United States, by the reduction of the compensation of any person paid out of the Treasury of the United States, or by the reduction of amounts of money covered by the bill.

It does not do the last, and the only way it can be held in order is as a reduction of the compensation of the officers paid out of the Treasury. I take it this is no part of the compensation of an officer. It is allowed to him to cover the expense of traveling.

Mr. COX. Will the gentleman yield now? What does the gentleman say on the question of the germaneness of my amendment to the bill?

Mr. MANN. I think it is germane, so far as that is concerned.

Mr. COX. If the gentleman thinks it has no place except in the manner just indicated, how does the gentleman differentiate between the case now under consideration and the Nurse Corps, which was under consideration a moment ago, where it is proposed that a nurse is to receive 75 cents a day, as to whether or not that did not increase their salary?

Mr. MANN. That provision was a direct provision to have the auditing officers allow the salaries that have been paid to the officers heretofore. It is a direct change of law.

Mr. COX. The gentleman will admit, will he not, if it became a law it would have increased the salary of the Nurse Corps?

Mr. MANN. That provision was subject to a point of order.

Mr. COX. It was, and went out; but what I am trying to do is to get the gentleman to admit it, if I can.

Mr. MANN. If it is true, I admit it.

Mr. COX. But if it had become law, it would have increased the salary of the nurses, would it not?

Mr. MANN. It would have made an allowance to them. It would not have increased the salary.

Mr. COX. In other words, it would have given them an opportunity to save all their salaries and have the Government pay their board.

Mr. MANN. There is no doubt about that.

Mr. ROBERTS of Massachusetts. I would like to ask the gentleman if he considers the mileage of Members of Congress a part of the salary?

Mr. COX. A part of the emolument and compensation of the Members of Congress; yes.

Mr. ROBERTS of Massachusetts. Does the gentleman think the three document boxes and his clerk allowance a part of it?

Mr. COX. I do not know as I do.

Mr. ROBERTS of Massachusetts. It is an allowance.

Mr. COX. Just one word, Mr. Chairman. I contend that under the Holman rule the amendment which I have offered is germane to the matter to which my amendment relates. I further contend that it is clearly in order, because it tends to reduce expenditures, and, if it does, that my amendment is germane and not subject to a point of order.

The CHAIRMAN. The Chair is of the opinion that the amendment is in order, under paragraph 2 of Rule XXI, providing as follows:

Nor shall any provision in any such bill or amendment thereto changing existing law be in order, except such as being germane to the subject matter of the bill shall retrench expenditures by the reduction of the number and salary of the officers of the United States, by the reduction of the compensation of any person paid out of the Treasury of the United States, or by the reduction of amounts of money covered by the bill.

The point of order is overruled. The question is on the amendment.

Mr. HOBSON. Mr. Chairman, I would like to be heard on the amendment, simply to point out, so that Members will un-

derstand, that there are no allowances for expense money where mileage is allowed in the Navy. For instance, a naval officer ordered from the Navy Department here to the navy yard in New York, would be under the necessity of transporting his family, to pay his railroad fare, and the Pullman fare, and excess baggage. He would get no aid from any Quartermaster's Department as would the Army and the Marine Corps, and no allowances for any freight he might ship. Take, for example, the officers traveling year in and year out. I do not believe that 8 cents would even approximately defray the actual expenses they incur in moving from one station to another under orders.

Mr. GREEN of Iowa. Mr. Chairman, will the gentleman yield.

The CHAIRMAN. Does the gentleman yield?

Mr. HOBSON. Yes.

Mr. GREEN of Iowa. Do I understand the gentleman to say that 8 cents a mile is all that they can receive?

Mr. HOBSON. Yes; 8 cents a mile is all that they can receive. The process is a simple one. I have traveled many thousands of miles under orders, and they simply note the number of miles by the shortest route, and then indorse on the orders the compensation at 8 cents a mile for that many miles traveled.

Mr. GREEN of Iowa. Then, if this provision were added, 5 cents would be the rate?

Mr. HOBSON. Yes; 5 cents would be substituted for 8 cents, and it would not meet the actual expenses of those officers. I want to say that there is really very much more hardship than gentlemen understand in traveling on the part of officers and their families.

Mr. JOHNSON of South Carolina. Is there not a good deal involved in traveling, on the part of officers, outside of traveling with their families?

Mr. HOBSON. Yes, sir.

Mr. JOHNSON of South Carolina. Suppose an officer were sent to San Francisco to make an inspection?

Mr. HOBSON. Yes.

Mr. JOHNSON of South Carolina. Then this rule would apply?

Mr. HOBSON. If I were ordered to New York, and then ordered to return to Washington, the 8 cents would more than cover the railroad fare and the Pullman, and I would save a little on that. But it would not cover the expenses one would probably be put to in providing for his own subsistence on a longer journey.

Mr. MANN. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. HOBSON. Certainly.

Mr. MANN. Is the full 8 cents allowed in every case, or is it an uncommon thing to provide that only the actual expenses are allowed?

Mr. HOBSON. That is very frequently the case when travel is required in regular duty, and when you travel abroad in a foreign land only actual expenses are allowed.

Mr. MANN. When an officer is ordered to travel the order is issued, and is it not quite common to provide that he shall be paid only his actual expenses?

Mr. HOBSON. It depends on the kind of duty in this country. It is usually a straight order on which 8 cents is collected. If they send you abroad, they will supply you with a ticket and then defray the actual expenses, of which you are required to keep a memorandum.

Mr. COX. They are paid under different statutes here and abroad, are they not? They are paid here under a different statute?

Mr. HOBSON. They get no mileage at all; they get actual expenses abroad.

Mr. COX. They get no mileage at all, but actual expenses?

Mr. HOBSON. Yes.

Mr. COX. The mileage applies only when they are traveling in this country?

Mr. HOBSON. Yes.

Mr. PADGETT. If the gentleman will permit me——

Mr. HOBSON. Certainly.

Mr. PADGETT. There are certain cases where, when they are traveling in this country, they receive only actual traveling expenses, while in other cases they receive 8 cents a mile. In those cases where the travel is only going from one point to another without a change of duty they get actual expenses, but where they move from one point to another, where the movement involves a change of duty, they get 8 cents a mile. I asked Admiral Cowie, the Paymaster General, this question and he answered:

The law now provides reimbursement for actual necessary expenses for most travel not involving a change of station and duty.

Mr. HOBSON. Take the case of officers serving on the inspection board.

Mr. PADGETT. They get only actual expenses——

Mr. HOBSON. When their duty requires their movement from place to place.

Mr. COX. But when they are drawing 8 cents a mile, that is when they are traveling under orders, is it not?

Mr. PADGETT. Yes; when they are traveling under orders and it involves no change of station. For instance, if a man is stationed in Washington, and he is assigned elsewhere——

Mr. COX. My amendment applies only to people who are traveling under orders in the United States.

Mr. PADGETT. Just a moment. When he is traveling under orders, which involves a change of station and duty, he is allowed 8 cents a mile.

The CHAIRMAN. The time of the gentleman has expired.

Mr. HOWARD. I ask unanimous consent that the time of the gentleman from Tennessee be extended five minutes.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent that the time of the gentleman from Tennessee be extended five minutes. Is there objection?

There was no objection.

Mr. PADGETT. The Army officers get 7 cents a mile; and in addition, where they have household furniture not exceeding, I believe, 7,000 or 8,000 pounds, they get the privilege of having it transported for them. Officers of the Navy do not have the privilege of having their furniture or household effects transported, but they get 8 cents a mile. Now, when an officer is just sent on current duty he gets actual expenses, but if he is sent under orders involving a change of station and duty, then he gets 8 cents a mile. If he is stationed at Washington and his station is changed to South Carolina or to Cincinnati or some other point where he has naval duty, and it involves a move where he has to take his family and his household furniture, he is allowed 8 cents a mile, but if he is serving on recruiting duty or other duty where he goes and remains only a short time, then he is only allowed his actual traveling expenses. I think it would be very wrong to change this law and to adopt the amendment offered by the gentleman.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Indiana [Mr. Cox].

The question being taken, on a division (demanded by Mr. Cox), there were—ayes 27, noes 60.

Accordingly the amendment was rejected.

Mr. SISSON. I move to strike out the last two words. I want to call the attention of the gentleman from Tennessee again to the lump-sum appropriation carried in this paragraph. I do not think there is any more vicious way to legislate. As I said a moment ago, I am not censuring the gentleman from Tennessee, but I think there is no more vicious method of legislation than to make lump-sum appropriations. There is only one way in the world in which Congress can keep control of these appropriations. There are at least 18 different items that ought to be carried under different subheads in this section. The Secretary of the Navy might, in his discretion, expend all of this money for the item—

Special instruction at home and abroad, in maintenance of students and attachés.

And he would violate no law. You leave it absolutely within his discretion to spend these various amounts upon any one of these various items, as he sees fit and proper.

Mr. PADGETT. He could not do that, because there would be nothing left to pay all the other items.

Mr. SISSON. That is true; but he would violate no law in doing it. Now, serving as I do on the Committee on Appropriations, where these things come up almost every day, I find that it is with a great deal of difficulty that we can get the departments to make up these various items in such shape that the officials can not expend them for various purposes as in their discretion and good judgment may seem fit and proper. I want to commend the gentleman from Virginia [Mr. HAY] and the Military Committee for the effort they have made and the progress they have made in the separation of the various items so that Congress can control them.

Mr. SLAYDEN. The gentleman is discussing that part of the law which authorizes an expenditure for the students and attachés, is he not?

Mr. SISSON. This paragraph involves at least 18 different subheads, and there is a total of $1,000,000.

Mr. SLAYDEN. If the gentleman will permit me, I want to say that the Senate put that on the Army appropriation bill this year for the first time and alleged as a reason for it that it is done for the Navy. The gentleman's service here has been long enough for him to know that one service is played against the other. They say, "We must have this for the Army, because you have given it to the Navy," or "We must have this

for the Navy, because you have given it to the Army." The Senate put that on, and this circumstance arose that compelled them to do it.

Mr. SISSON. I am glad the gentleman from Texas gives me that information, but before I sit down I want to ask what is meant by these "attachés"? What sort of employees are they?

Mr. PADGETT. We have naval attachés who serve in foreign countries gathering information.

Mr. SISSON. Do they attend personally upon naval officers as a valet would do?

Mr. PADGETT. Oh, no; not in that sense.

Mr. SISSON. It is possible under this appropriation for an officer to employ one, two, or three of these valets, and the Secretary of the Navy has a million dollars with which to pay for them.

Mr. PADGETT. Oh, no.

Mr. SISSON. He does have it, because there is absolutely nothing in this appropriation that would prevent it. It is left in the discretion of the Secretary of the Navy. I am unwilling, so far as I am concerned as an individual Member, to vote for appropriations made by this Congress of the people's taxes to be spent within the discretion of any Cabinet officer for any bureau; that is my objection to it.

Mr. HOWARD. Mr. Chairman, I move to strike out the last three words. A few moments ago I listened with interest to the gentleman from Mississippi [Mr. SISSON], and he read an extract from the Democratic platform as to economy, and so forth. I thoroughly agree with the gentleman that all of these items ought to be segregated, and that we ought to know what we are spending the money for in each particular branch of the service and each particular item specified in these bills.

But the gentleman will come back to the very place he started from in making these criticisms on the committee in making up the bill when he said a while ago that we were spending money extravagantly and charged it up to this side of the House. I do not agree with what the gentleman says about wanton and willful extravagance of this side of the House.

The gentleman has been here longer than I have, and he is on the great Appropriation Committee of this House, and he knows that every single, solitary Member is absolutely dependent upon the officials in the different departments of the Government for information upon which they act and upon which they predicate every fair and wholesome appropriation.

Mr. SISSON. And, notwithstanding that fact, the Appropriation Committee on the sundry civil bill reduced the estimates $33,000,000.

Mr. HOWARD. And you have received the congratulations of every Democrat on this side of the House, and you deservedly received those congratulations. But you did not deal in the sundry civil bill upon the same basis that other gentlemen on other committees have been dealing with these departments. Who is this Democratic committee dealing with? In the first place, you have got 21 Members on the Naval Committee, 7 of whom are Republicans, and then you have got on that committee, so I have been reliably informed, three or four or five gentlemen who would be willing to issue bonds to the extent of sixty billions per annum and spend it on battleships. These men are cooperating with the seven Republicans on that committee.

Mr. ESTOPINAL. I do not know where the gentleman gets his information, but I want to say to him that it is not true.

Mr. HOWARD. I am glad to know that there are not five, but I am informed that there are four. I will accept the statement of the gentleman from Louisiana and say that he is honestly in favor of economy, but the matter I am trying to get before the committee is that the gentleman from Mississippi says we are chargeable with this extravagance, when as a matter of fact we are relying on the heads of Republican departments of this Government, upon the Republican administration, to give testimony to a Democratic committee as to the amount of these expenditures, and I say that they have to depend upon this department, and so does every other committee in this House, with the exception of the great committee headed by the gentleman from New York [Mr. FITZGERALD], upon which my distinguished friend from Mississippi [Mr. SISSON] is a member. All these appropriation committees are dependent for information upon the departments.

Mr. CALLAWAY. Does the gentleman think the heads of these committees are excusable for taking without reserve the statement of the heads of departments? Does not he think they ought to take them with a grain of salt?

Mr. HOWARD. Suppose they did not do it; the department could make omnipresent and omnipotent fools out of any committee that did not take their estimate. The committees are absolutely dependent on them.

Mr. CALLAWAY. Does the gentleman think that the heads of these committees know nothing about the expenditures and that they are wholly dependent on the heads of these departments?

Mr. HOWARD. We have been blindly doing it ever since and long before either the gentleman from Texas or I came to this Congress.

[The time of Mr. HOWARD having expired, by unanimous consent his time was extended three minutes.]

Mr. HOWARD. Mr. Chairman, in reply to the gentleman from Texas [Mr. CALLAWAY], I want to say that I am as much in favor of economy as is he or any other Member of this House; but I say that by the methods by which great appropriation bills in this Congress are made up you can not charge the Democrats for extravagance for which they are not guilty.

Mr. MURRAY. Will the gentleman state what plan he has for the correction of this evil?

Mr. HOWARD. I have a plan, but it is not an original plan with me. It is the plan of a man who has developed into—and will be so long as he remains in public life—one of the greatest leaders of men, the greatest constructive statesman that this country has produced since the Civil War, OSCAR W. UNDERWOOD.

Mr. MURRAY. Will the gentleman state what it is?

Mr. HOWARD. To have the Congress of the United States represented in the departments in obtaining information by an expert, so that we may intelligently make up appropriation bills. Congress is not represented by these men who seek to have their salaries boosted, these men who seek to obtain special privileges, these men that appear before these committees biased and selfish, asking for and seeking to obtain greater appropriations year by year. If you will take the history of the growth of these appropriations, you will find that the personnel represented in the appropriation bills have gotten their hands deeper and deeper into the Treasury each year since this Government has existed, and it is no departure now if this bill be extravagant in its proportions.

Mr. PADGETT. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. Certainly.

Mr. PADGETT. I just want to say to the gentleman that the Naval Committee in this bill cut down the estimate more than $22,000,000.

The CHAIRMAN. The time of the gentleman from Georgia has expired.

Mr. PADGETT. Mr. Chairman, I ask that the Clerk read.

Mr. SISSON. Mr. Chairman, I move to strike out the words "and attachés," on page 5, line 13.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 5, line 13, amend by striking out the words "and attachés."

Mr. SISSON. Mr. Chairman, I just want to say a word. I made a statement a moment ago with reference to the extravagance of this Congress, and I want to say that I had no intention of making the Naval Committee the goat. I simply put them in the same class with the other committees that have reported these bills, and I do no want to do the gentleman from Tennessee any injustice.

Mr. HOWARD. Mr. Chairman, will the gentleman yield?

Mr. SISSON. Yes.

Mr. HOWARD. The gentleman will admit that even his own committee is dependent absolutely on Republican officeholders for the estimates upon which they act.

Mr. SISSON. We depend upon them for information.

Mr. HOWARD. And this committee cut the original estimate $22,000,000.

Mr. SISSON. I decline to yield further. We are dependent upon them for information, but when you go at these men right I have found nearly all of them will give you the information, and if you make up your mind you are going to cut things down at the right place, they will tell you where to cut. That has been our experience in the Appropriation Committee. We may not deal with the same people that these other committees deal with. I hope this amendment will prevail.

Mr. PADGETT. Mr. Chairman, I simply want to say to the committee that these naval attachés are abroad. They are experts. They render a service that gets very essential and very important information for the Government and the departments, and I hope the amendment will not prevail.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Mississippi.

The question was taken; and on a division (demanded by Mr. SISSON) there were—ayes 25, noes 61.

So the amendment was rejected.

The Clerk read as follows:

Contingent, Navy: For all emergencies and extraordinary expenses, exclusive of personal services in the Navy Department, or any of its

subordinate bureaus or offices at Washington, D. C., arising at home or abroad, but impossible to be anticipated or classified, to be expended on the approval and authority of the Secretary of the Navy, and for such purposes as he may deem proper, $46,000: *Provided*, That the accounting officers of the Treasury are hereby authorized and directed to allow, in the settlement of accounts of disbursing officers involved, payments made under the appropriation "Contingent, Navy," to civilian employees appointed by the Navy Department for duty in and serving at naval stations maintained in the island possessions during the fiscal year 1914.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I have been somewhat wearied by hearing the gentleman from Mississippi [Mr. SISSON] criticize the make-up of the naval appropriation bill and hold up as the model for this committee to follow the Army appropriation bill that recently passed the House. I have sent for that bill and now have a copy of it in my hand. The criticism made of the naval bill by the gentleman from Mississippi is that we do not itemize, that we have 40 or 50 items in a lump-sum appropriation, and that the appropriation can be expended, as he says, for any one of the items. If he will take the Army appropriation bill and look on page 5, he will find a lump sum of $375,000, with 16 lines of special items, for any one of which that can be expended, as he maintains. On page 19, equipment of Coast Artillery, he will find a lump sum of $275,000, with 11 lines of special items that that money may be expended for. If he will go further on, to page 22, he will find a lump-sum appropriation of $9,140,000, with two whole pages of individual items, for any one of which, upon his argument, the whole $9,000,000 may be expended. If he will go still further on, page 25, he will find another lump-sum appropriation of $7,660,000, with three and a half solid pages of individual items for which that can be expended. Then, still further on, page 40, he will find a lump-sum appropriation of $775,000, with a page and a half of individual things for which that can be expended, for any one of which, as he argues, that lump sum can be expended. I want to say to this committee that the naval bill is itemized more in detail, with the one exception of the men and officers, than the much-vaunted Army appropriation bill.

Mr. SISSON. Mr. Chairman, I want to say to my friend from Massachusetts [Mr. ROBERTS] that I did not hold up the Army bill as an example. I simply held up the Army bill as an evidence of the efforts that the gentleman from Virginia [Mr. HAY] had made to have his bill more properly itemized, but the gentleman will not find in the Army bill a single item that approaches in amount the $29,000,000 carried in this bill. Not only that, but the items to which the gentleman referred, several of them, were classifications which would properly fall within one item in the bill, but the items in this bill are not so logically arranged, because there are 18 different items in one of these paragraphs which have no immediate relation with each other. I can understand how appropriations for Coast Artillery, where the appropriation is to be spent by one set of officers who have charge of the work might be made in one lump-sum appropriation for that specific service, but where it ranges over the entire range of naval appropriations we ought to know what each particular branch of the naval service is costing, how much and why; but under this bill that can not be ascertained unless one should go over the hearings.

And I might say now when I got to the hearings on this bill I found that only the new items, as a rule, are the ones about which a single question has been asked and when I go over the hearings I find that some member of the committee or the chairman will say, the next new item we find in this bill is over on page so-and-so, and item after item is skipped and not a single question asked about it. I do not know whether the Army bill does the same thing or not, but if they do it I have as much opposition to that, and the committee upon which I have the honor to serve is a committee where I am just as much opposed to lump-sum appropriations wherever they occur as any other lump sum. I am not attacking the Navy bill here as such. I am simply attacking the system that prevails, and I would like for Members of the House to join in a businesslike way in having these departments give this legislative body some information about what the people's money is expended for.

Mr. ROBERTS of Massachusetts. Will the gentleman yield for a question?

Mr. SISSON. I yield to the gentleman, but the gentleman declined to yield to me.

Mr. ROBERTS of Massachusetts. No; I did not decline to yield.

Mr. SISSON. If I have the time.

Mr. ROBERTS of Massachusetts. I did not decline to yield.

Mr. FOSS. How long has the gentleman been on the Committee on Appropriations?

Mr. SISSON. Two years.

Mr. FOSS. I understood he had been on it only this session?

Mr. SISSON. Well, that is two years on the 4th of March.

Mr. FOSS. Does not the gentleman think he is assuming a pretty large contract, in view of his short membership upon the committee, to state the distinguished chairman of the Committee on Naval Affairs, who has been on that committee for ten or a dozen years——

Mr. SISSON. I know some gentlemen, by reason of their long service and long continuance of abuses, are unwilling to admit there is anything wrong in the past. The man who sits supinely by and is willing that these things may continue is a man who never made any progress and never did his country any service. [Applause.] I do say that no business man, no banker, no railroad president, no man legislating in his own interest, in his own business, would so legislate.

There is no reason why the membership of this House should not have the same information that the members of the committee have, and I am favoring now in the Appropriations Committee, and I hope they will do so in the next session of Congress, the putting of every new item and every new change in italics in the bill for the information of the House, so that each individual Member might have the same information that the members of the committee have.

The CHAIRMAN. The time of the gentleman has expired.

Mr. SISSON. I ask for one more minute. I do not believe that the committee has any other function to perform other than to make recommendations to this House, and every Member of the House has an equal right to all the information that every member of the committee has, and I do not believe that it is proper that men should endeavor to conceal in bills things that commend themselves to the committee and endeavor to slip it through the House, and then congratulate themselves that the House never discovered it.

Mr. PADGETT. I want to say to the gentleman that every single new item in this bill is in italics.

Mr. SISSON. Not in the one you presented to the House; that one you hold in your hand is for your own information. That is what I am complaining about; you are willing the membership of the committee should have the italicized new items, but you do not give it to the House, and I am not criticizing the gentleman because no committee is doing it now.

Mr. ROBERTS of Massachusetts. Is not that true of the Committee on Appropriations?

Mr. SISSON. Absolutely; and I am complaining of that committee. I am not making any complaint against the Naval Committee, but make it against every committee. I do not stand by that committee, if I think it is wrong. I do not even stand by my party, if I think it is wrong. Does the gentleman say the same thing? Will you say the same thing?

Mr. ROBERTS of Massachusetts. Yes, indeed.

Mr. MANN. When my distinguished friend is translated to the other end of the Capitol will he remember to do that?

Mr. SISSON. I will if you transfer me over there.

Mr. RODDENBERY. Mr. Chairman, I move to strike out the last word in this paragraph. It is for the purpose of calling the committee's attention to the very important question that is raised touching making of appropriations in the lump sum.

Mr. SISSON. Will the gentleman permit me just one interruption?

Mr. RODDENBERY. Yes; just one.

Mr. SISSON. I want to call the attention of the House to one subcommittee of the Committee on Appropriations—the Subcommittee on the District of Columbia—which italicized every new item in the District appropriation bill.

Mr. RODDENBERY. I want to call the committee's attention to a bill that is ideal, according to the measure of the gentleman from Massachusetts [Mr. ROBERTS] and other gentlemen. All these large bills you bring in here carry many unitemized, lump-sum appropriations, running as high as and over $10,000,000 each. If you will get the public buildings bill and turn to it, you will find every item specifically stated. It shows specifically whether it is a site, an additional site, a site and a building or an extension, itemized fully and completely, so that the House knows exactly what it is. Consequently, when our committee brings a bill in we do not consume the time of the country here in endless debate. We call up our bill, and, under the rules, without resorting to the chairman of the Committee on Rules [Mr. HENRY] for a gag rule, and pass the bill. We do not rely on a simple majority, but put it through the House by more than a two-thirds vote, and everyone knows exactly what he has in the bill.

Mr. MANN. Will the gentleman yield?

Mr. RODDENBERY. I yield.

Mr. MANN. If the other appropriation bills should be itemized as the public buildings bill was, would the gentlemen in

charge of it be afraid to have it discussed on the floor of the House?

Mr. RODDENBERY. It would not be necessary. They could inquire into it beforehand. And as to the public-building bill, you take my friend from Mississippi [Mr. SISSON] or my friend from Texas [Mr. DIES], when the bill goes over to the Senate; if the reckless Public Building Committee of the House has given to his district an amount that he thinks is too much, or that he ought not to have, he can say to the Senator from Mississippi or to the Senator from Texas, "Senator, there is tainted meat in that bill; cut it out." My friend from Mississippi [Mr. SISSON] had a little pork in the House bill that was strung up a trifle under age, yet I see it still hangs in the Senate bill. And when my friend from Texas [Mr. DIES] introduced his two bills in the House, one for $75,000, we applied the rule, and gave him the maximum of $55,000. And for his Orange site bill we gave him $10,000, though his bill did ask modestly for $20,000. I was, however, astonished when I read the Senate bill to find that his tainted pork, instead of being hauled out and buried, went back to the Senate in the bill. Not only that, but at Orange, Tex., where the House committee, by giving him only half the pork he asked for, in the sum of $10,000 for a site, created a stench in the nostrils of the people, so he says, nevertheless, I perceive it now shows up in the Senate increased to $60,000 for a site and building. And my friend from New York [Mr. FITZGERALD], when in a virtuous and economic mood, entreated our committee to expunge Brooklyn from the House bill. It was malodorous pork, and he would not have it. The House committee, with due regard for his refined sensibilities, did it. But, behold, in the Senate bill, Brooklyn, smelling to high heaven, shows up with that same $350,000 worth of pork, notwithstanding there has already heretofore been appropriated for the same building, in Brooklyn, $1,080,000. And I find that the city of New York has a side of tainted meat of the alleged value of $3,000,000. Of course, if a Republican Senator had put the $3,000,000 in the bill in the Senate, I would have thought that my friend from New York, chairman of the Appropriation Committee [Mr. FITZGERALD], was helpless to prevent it; but when a Democratic Senator, whose own hand helped write the Democratic economy platform at Baltimore, puts it in, I am astounded that Brooklyn, the home of my colleague from New York, does not rise in revolt against being the dumping ground for tainted pork. [Applause.] The city of New York has already had $20,000,000 of pork in public buildings. And yet it will not do for a rural Member to look with longing eyes even upon a small slice of bacon. Gentlemen, if any of you——

The CHAIRMAN. The time of the gentleman from Georgia [Mr. RODDENBERY] has expired.

Mr. BUTLER. Mr. Chairman, I ask that he have an hour.

Mr. RODDENBERY. Mr. Chairman, I ask for two minutes more.

The CHAIRMAN. The gentleman from Georgia asks unanimous consent that his time be extended for two minutes. Is there objection?

There was no objection.

Mr. RODDENBERY. And if some gentlemen had not been so busy scenting out tainted meat in the naval bill they would have had time to have studied the rules of the House a little more, and they would know how to pass a naval bill. Why, in the last days of Congress you are taking up day after day in considering this measure and studying the rules. But when you have a bill you should bring it in like the Public Buildings Committee, who understand how to pass legislation and do business—do business. [Laughter.]

If any of you gentlemen who urged the House committee to give you some public-building pork, and after they did it and you knew it would pass, your stomach got too weak to digest the meat, you can go to the Senate and vomit it up. Indeed, it will give me pleasure, as a member of that committee, to go to my able Senators from Georgia and ask them to cooperate with your Senators in the Senate and expunge from that bill this "rotten meat" that the House Committee on Public Buildings and Grounds have rammed through you without a chance to investigate. [Laughter.] You need not carry any pork back home with you if it is so abhorrent to you. That bill has not passed the Senate yet. There is not a member of the House Committee on Public Buildings and Grounds who will not cheerfully go in person to the Senate, or in writing, and help any of you outraged gentlemen get your spoiled meat out of that bill that is alleged to be a stench in the nostrils of the people of the country. [Laughter and applause.] Brethren, I offer you my services, and if you do not desire me to go with you I will promise you not to make a point of no quorum while you are at the other end of the Capitol disgorging. [Laughter.]

Talk about "tainted meat." Let me read from the naval appropriation bill: "Rhode Island; Philadelphia, Pa.," spoiled meat; "Newport, R. I."; "Portsmouth, N. H."; "Boston, Mass."; "New York, N. Y."—more pork. Oh, it is a small sum. It is just $270,000; that is all. [Laughter.]

Mr. MURRAY. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. Does the gentleman yield?

Mr. RODDENBERY. I regret I can not yield.

The CHAIRMAN. The gentleman declines to yield.

Mr. RODDENBERY. Pork again, "Philadelphia, Pa.," only $270,000 worth. The last-named two big coast cities in two items in this bill are gulping down more naval "pork" in one year than 50 per cent of the inland States have had in the history of the Government for public improvements. [Applause.]

Again I read from the naval bill, "Norfolk, Va." It is only $260,000. "Charleston, S. C.;" "Mare Island, Cal.;" "Rhode Island" again; "California;" "Mare Island, Cal.;" "Rhode Island" again; "New York Harbor;" "La Fayette, N. Y.;" "Lake Denmark, N. J." "Pork, pork; more pork!" [Laughter.]

Gentlemen, how comes it that the people of the country who want public buildings for adequate, needed postal services are just getting "pork"? What-in-the-name-of-God kind of varmint is this you naval statesmen are figuring to feed on? Is it possum? [Laughter.] From what the gentlemen have said it must be polecat meat, commonly called "skunk." [Laughter.]

I read again. "St. Julian Creek;" "Mare Island, Cal.;" "Hingham, Mass.;" "Philadelphia, Pa.;" "Boston, Mass." Oh, to be sure, it is only a quarter of a million dollars, but that is only a small sum. [Laughter.]

Mr. MURRAY. Mr. Chairman, will the gentleman yield?

Mr. RODDENBERY. I can not yield. But let me read on through this essay on "pork," gentlemen, and you will find "Portsmouth, N. H.," again, and "Boston, Mass.," again. Why they have got it cut up into sides, in quarters, in middlings, in jowls, in joints, in link sausages, and in unrid guts. [Laughter.] Here is "New York" again.

The CHAIRMAN. The time of the gentleman has expired.

Mr. RODDENBERY. Mr. Chairman, I would like to have one minute more.

Mr. FOSTER. Mr. Chairman, I call for the regular order.

Mr. ROBERTS of Massachusetts. Mr. Chairman, I ask unanimous consent that the gentleman may have five minutes more.

Mr. GUDGER. I ask that the gentleman be given five minutes.

The CHAIRMAN. The gentleman from Georgia [Mr. RODDENBERY] asks unanimous consent for one minute more. Is there objection?

Mr. FOSTER. I object, Mr. Chairman.

The CHAIRMAN. The gentleman from Illinois [Mr. FOSTER] objects.

Mr. RODDENBERY. Mr. Chairman, I will finish these broken remarks again. [Laughter and applause.]

Mr. MURRAY. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The Clerk will read.

Mr. MURRAY. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. MURRAY. Is it in order for a gentleman to rise in his place in the House, here, in this committee, and ask recognition before the Clerk was directed to read?

The CHAIRMAN. The gentleman did not do that.

Mr. MURRAY. Is it in order?

The CHAIRMAN. It is in order.

Mr. MURRAY. Then, I assert that before the Chair had directed the Clerk to read, I stood up in my place and asked for recognition.

The CHAIRMAN. The gentleman asked to interrupt the gentleman from Georgia [Mr. RODDENBERY], but that gentleman's time has expired.

Mr. MURRAY. Mr. Chairman, I asked for recognition in my own right after the gentleman's time had expired.

The CHAIRMAN. The Chair did not understand the gentleman.

Mr. MURRAY. That is not my fault.

The CHAIRMAN. The gentleman will now be recognized.

Mr. MURRAY. Mr. Chairman, I yield one minute of the time I have to the gentleman from Georgia.

The CHAIRMAN. The gentleman can not do that.

Mr. RODDENBERY. Mr. Chairman, will the gentleman yield?

Mr. MURRAY. Mr. Chairman, I yield to the gentleman from Georgia [Mr. RODDENBERY] for a question.

Mr. RODDENBERY. I was reading from certain pages of the naval bill, and the gentleman from Massachusetts [Mr. MURRAY] is more thoroughly familiar with it than I am.

Mr. MURRAY. I want to say, Mr. Chairman, since I have had recognition, that every one of these items recommended by the Secretary of the Navy is recommended by one hostile to the Boston Navy Yard, and it is a ridiculous proceeding for the gentleman from Georgia [Mr. RODDENBERY] or any gentleman to stand here and object to appropriations for the maintenance of work that is to be done at the navy yard at Charlestown, Mass.

Why, it is only a year ago that the Secretary of the Navy announced that he is entirely in favor of the abolition of the navy yard at Charlestown, Mass., and it was only because of the activities of my colleagues from Boston, Mr. CURLEY, Mr. PETERS, and myself, backed as we were by the overwhelming public sentiment of the people of Boston, that we were able to make a successful fight for any appropriation of this character in this bill.

There is a great navy yard at Charlestown which could do much more splendid and efficient work for the maintenance of the American Navy than it is permitted to do because of the activity of a hostile Secretary of the Navy. It is all very well for the gentleman from Georgia [Mr. RODDENBERY], and it is all very fine for other Members to stand up here as captious critics, to point to what they describe as large appropriations, but we know the facts. The chairman of the Committee on Naval Affairs and the members of that committee, economists both real and alleged, will testify to the truth of my assertion that there is not one penny of money appropriated in this bill for Charlestown that is any greater than it should be.

I have received during the past few days a written request to have included in this bill an item for $200,000 to put the Charlestown Navy Yard in condition of equipment to build for the United States any battleship the Nation may require.

It is a wise request to make, and it would be a wise item to include in this bill. We know that battleships are costing this Government more than they should cost; we know that Great Britain and Germany are building their ships at a manufacturing cost that is estimated to be 30 to 40 per cent less than the amount for which we can buy like ships from private shipbuilders.

I believe sincerely that this Government can build in its own navy yards, once they are properly equipped, better ships at less cost than are being built in private shipbuilding yards.

You may tell me that a few years ago two ships for the American Navy were built, one at a Government yard and one at a private shipbuilding place; that the cost of the *Florida*, the first ship, was greater than the cost of the *Utah*, the second.

I reply to you that the comparison is not fair. I cite to you as a clear illustration of the unfairness of the comparison that the Government ship was built by workmen on an eight-hour basis and the private work was done by contractors, who did not observe the eight-hour rule of employment; that building was done before we passed the law requiring contractors doing work for the Government to observe the principle of eight hours as a day's work.

I regret that the temper of the times and the rules of this House make it impossible for me to get this appropriation of $200,000 at this time. We shall continue to fight for it, however, and I hope that the day is not remote when we may win. [Applause.]

Mr. TRIBBLE. Mr. Chairman, I move to strike out the last three words. The gentleman from Boston [Mr. MURRAY] may not think that the gentlemen from the South who are requesting appropriations and securing them in this Congress are rendering their constituents proper service. I am not surprised at that. For years and years nearly all the appropriations of this Government have been voted into the large cities, like Boston and New York, Chicago, and other places in the east and west. And because, forsooth, the people of the South are now coming into their own in small degree, and securing some appropriations, gentlemen who have been gobbling up everything all of these years come in here on this floor and criticize us for trying to get something.

Mr. MURRAY. Will the gentleman yield?

Mr. TRIBBLE. You get millions upon millions year after year. I got an appropriation through here for places in my district and some gentlemen have been chiding me on being inconsistent in supporting the building bill. Yes, I am for the building bill; not only that, I was not satisfied with the House provisions for my district. I went to the Senate and saw Senator SMITH and got three more building sites, and my constituents will commend me and praise me for doing it. [Applause.]

The Clerk read as follows:

Care of lepers, islands of Guam and Cullon; Naval station, island of Guam: Maintenance and care of lepers, special patients, and for other purposes, including cost of transfer of lepers from Guam to the island of Cullon, in the Philippines, and their maintenance, $14,000.

Mr. SISSON. I reserve a point of order. I want to ask if this increases the appropriation; it is a new item.

Mr. PADGETT. No; it is in pursuance of the law of last year transferring the lepers from Guam to the island of Cullon.

Mr. SISSON. What was the necessity of that?

Mr. PADGETT. They did not want to maintain two places, and they are putting them all at one place.

Mr. Chairman, I want to submit a request for unanimous consent. There are a number of Members that want to take a recess for an hour for dinner. I want to ask unanimous consent that if the committee will rise we may take a recess for an hour in the House, from now until 7.30 o'clock.

Mr. GREGG of Texas. Make it two hours. I can not get home and get anything to eat in less than two hours.

Mr. MANN. The gentleman knows that no agreement can be entered into in committee.

Mr. PADGETT. I am simply ascertaining if it meets with approval. If it does, instead of holding on, I will ask that the committee rise, and then I will ask for a recess until 7.30.

Mr. MANN. At which time it will take a motion to go back into Committee of the Whole.

Mr. PADGETT. I am going to rely on the good sense of the Members of the House not to use obstructive tactics.

Mr. BUTLER. It will require a quorum to get back into the House.

Mr. PADGETT. Mr. Chairman, there seems to be a number of objections around me, and I think I will not put the request, but we will proceed.

Mr. SISSON. I move that the committee do now rise.

The CHAIRMAN. The Chair thinks that that is in the hands of the gentleman from Tennessee, the chairman of the committee.

The Clerk read as follows:

BUREAU OF NAVIGATION.

Transportation: For travel allowance of enlisted men discharged on account of expiration of enlistment; transportation of enlisted men and apprentice seamen at home and abroad, with subsistence and transfers en route, or cash in lieu thereof; transportation to their homes, if residents of the United States, of enlisted men and apprentice seamen discharged on medical survey, with subsistence and transfers en route, or cash in lieu thereof; transportation of sick or insane enlisted men and apprentice seamen to hospitals, with subsistence and transfers en route, or cash in lieu thereof; apprehension and delivery of deserters and stragglers, and for railway guides and other expenses incident to transportation, $825,000.

Mr. SISSON. Mr. Chairman, I want to state that it seems to me that if we take a recess until 7.30 it will allow Members to come back with better vigor and we will save time.

The CHAIRMAN. That suggestion is not in order.

Mr. SISSON. I move to strike out the last word in order that I may make the suggestion. A moment ago I made a motion that the committee rise, and I think the motion ought to have been put. I have no disposition to delay the matter, and I have no objection to returning after recess.

Mr. MANN. The gentleman seems to be very hearty and vigorous; does he need anything to eat?

Mr. SISSON. I have been at work ever since 9 o'clock this morning, and I have not had any lunch.

Mr. MANN. Oh, the gentleman ought to be able to work 14 hours without anything to eat.

Mr. SISSON. Mr. Chairman, I make the motion that the committee do now rise.

The question was taken; and on a division (demanded by Mr. SISSON) there were 35 ayes and 55 noes.

Mr. SISSON. Mr. Chairman, I make the point of order that no quorum is present.

The CHAIRMAN. The Chair will count. [After counting.] One hundred and three Members present, a quorum.

So the motion was lost.

Mr. FOWLER. Mr. Chairman, I desire to offer an amendment to this paragraph by striking out the figures 825,000 and inserting in lieu thereof the figures 800,000.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend, page 7, line 16, by striking out the figures "825,000" and inserting in lieu thereof the figures "800,000."

Mr. FOWLER. Mr. Chairman, I understand that $800,000 was the amount carried by the bill passed during the last session of Congress. I have been looking into the expense of this item the best I can, and I have failed to see any good reason why the increase should be made over the appropriation of the last session of Congress. I can not understand, Mr. Chairman,

why this item should be increased, and I therefore request of the gentleman who is at the head of this committee to give me some reason why this item has been increased.

Mr. PADGETT. Mr. Chairman, last year we authorized 4,000 additional men, and we have enlarged the enlistment. The department asked for $50,000 on account of the need of transporting additional men, and the committee recommended $25,000. We have more men to handle and more officers to transport.

Mr. FOWLER. Was the entire $800,000 appropriated in the last bill expended?

Mr. PADGETT. Practically all of it.

Mr. FOWLER. What was the surplus?

Mr. PADGETT. It was a very small one. I do not remember.

Mr. FOWLER. I will be very glad to have the amount in the RECORD, if I can get it.

Mr. PADGETT. It is a very small balance. I have not before me the exact unobligated balance, because the returns are not yet all in.

Mr. FOWLER. In round numbers, does it amount to as much as $25,000?

Mr. PADGETT. I think not.

Mr. FOWLER. Mr. Chairman, I understand that there is an unexpended balance in this item for the fiscal year ending June 30, 1912. I am really in favor of giving the Navy every dollar that is necessary to make it efficient, but I am not willing to vote for a single dollar more. We are compelled, Mr. Chairman, to reduce ourselves to a condition of economy in these great appropriation bills, or the sum total will rise so high beyond our expectations, and the expectation of the people, that there will be no reasonable excuse for our conduct.

I am aware of the fact that there are some very able men upon this committee, men of long service, and all of the gentlemen are able men, but I exhort them, as well as members of the other great Appropriation Committees, that they take that precaution in making these appropriations that they said they would on the stump in the last campaign.

Mr. Chairman, I feel that if these appropriations should pile up as large as the estimate now shows, the people in the next election will unfold a tale, which will not only harrow up the political soul of some of the gentlemen here, but will freeze their young political blood and make their two eyes, like stars, start from their spheres, and their knotted and combined locks to part—

> And each particular hair to stand on end
> Like the quills upon the fretful porcupine.

[Applause.]

Mr. PADGETT. Mr. Chairman, I want simply to state that we have already reduced this appropriation last year $200,000, and this year they are asking for $50,000, on account of an increased enlistment of 4,000 men. We are simply giving them $25,000, which would make a net reduction from the former appropriation of $175,000. I ask for a vote.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois.

The question was taken, and the amendment was rejected.

Mr. SISSON. Mr. Chairman, I ask for a division.

Mr. BUTLER. Mr. Chairman, I make the point of order that the request comes too late.

The CHAIRMAN. The gentleman is too late. The Chair had already announced the result.

Mr. SISSON. Mr. Chairman, I rose as soon as I could. I was on my feet endeavoring to address the Chair. I make the point of order that there is no quorum present, and there manifestly is not a quorum present.

The CHAIRMAN. The Chair will count and see.

Mr. BUTLER. Mr. Chairman, I suggest that we have not done any business since the Chair ascertained there was a quorum present a few moments ago.

The CHAIRMAN. But there seems to be an intent not to do any business. The Chair will count. [After counting.] Seventy-nine Members are present—not a quorum. The Clerk will call the roll.

The Clerk called the roll, and the following Members failed to answer to their names.

Allen	Bradley	Cline	Davis, Minn.

The committee rose; and Mr. UNDERWOOD assuming the chair as Speaker pro tempore, Mr. ALEXANDER, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee, finding itself without a quorum, he had caused the roll to be called, and that 155 Members answered to their names, and he reported herewith the list of absentees.

The SPEAKER pro tempore. The Chairman of the Committee of the Whole House on the state of the Union reports that that committee, finding itself without a quorum, he caused the roll to be called under the rule, and 155 Members answered to their names—a quorum. The Clerk will note the names of absentees and the committee will resume its session.

The Clerk read as follows:

Recruiting: Expenses of recruiting for the naval service; rent of rendezvous and expenses of maintaining the same; advertising for and obtaining men and apprentice seamen; actual and necessary expenses in lieu of mileage to officers on duty with traveling recruiting parties, $130,000: *Provided*, That no part of this appropriation shall be expended in recruiting seamen, ordinary seamen, or apprentice seamen unless, in case of minors, a certificate of birth or a verified written statement by the parents, or either of them, or in case of their death a verified written statement by the legal guardian, be first furnished to the recruiting officer, showing applicant to be of age required by naval regulations, which shall be presented with the application for enlistment; except in cases where such certificate is unobtainable, enlistment may be made when the recruiting officer is convinced that oath of applicant as to age is credible; but when it is afterwards found, upon evidence satisfactory to the Navy Department, that recruit has sworn falsely as to age, and is under 18 years of age at the time of enlistment, he shall, upon request of either parent, or, in case of their death, by the legal guardian, be released from service in the Navy, upon payment of full cost of first outfit, unless, in any given case, the Secretary, in his discretion, shall relieve said recruit of such payment: *Provided*, That authority is hereby granted to employ the services of an advertising agency in advertising for recruits under such terms and conditions as are most advantageous to the Government.

Mr. FOSTER. Mr. Chairman, I make a point of order on the paragraph, especially to that part of the paragraph upon page 7 which provides for advertising.

Mr. ROBERTS of Massachusetts. What is the point of order?

Mr. FOSTER. I want to ask the gentleman from Tennessee if the Navy Department has authority under the law to advertise for recruits?

Mr. PADGETT. Yes; I think so.

Mr. FOSTER. If they have that authority by law, then I will withdraw that point, and I make the point of order on the second proviso.

Mr. PADGETT. Line 15, page 8?

Mr. FOSTER. Yes.

Mr. PADGETT. I will state to the gentleman that this has been operating for a couple of years past and has given very satisfactory results. It has been very beneficial and very helpful and has reduced the cost of recruiting and has worked very satisfactorily. I hope the gentleman will not make the point of order.

Mr. ROBERTS of Massachusetts. Will the gentleman yield?

Mr. MANN. How much is now paid for advertising in magazines and newspapers by the Navy Department?

Mr. PADGETT. I think we have a statement in the hearings, but I do not recall it just at the moment.

Mr. COX. I think it is about $28,000.

Mr. PADGETT. I think it is somewhere around there, but I do not remember the exact figures.

Mr. FOSTER. I will state, Mr. Chairman, while I am not positive—and I am willing to take the statement of the gentleman from Tennessee that the Navy Department has a right to advertise for the recruits—that I do not believe that it is a good plan to enter into a scheme of this kind of going into advertising agencies for the purpose of securing recruits.

Mr. MANN. Will my colleague yield there? While I think we have authority, I do not think it is express authority, but only authority to obtain recruits.

Mr. FOSTER. If that is all, I make the point of order against this part in regard to advertising. I think I shall make that, Mr. Chairman.

Mr. ROBERTS of Massachusetts. Mr. Chairman——

Mr. FOSTER. I will make the point of order on page 7, line 19, "advertising for and."

Mr. MANN. "Advertising for and."

Mr. FOSTER. "Advertising for and," and also the proviso on page 8.

Mr. PADGETT. Mr. Chairman, I can not put my hand on it just now, but that language has been in the bill time out of mind, advertising for recruits, and I think it is authorized by law, for the simple reason that the department must have some means of letting the public know that they need recruits and must have them.

Mr. FOSTER. I take it that they establish recruiting stations and those recruiting stations usually advertise in the community where they are established by their presence, but I will say to the gentleman frankly that I am opposed to this manner of obtaining recruits for the Navy. I think it is a bad practice to put out all sorts of alluring advertisements to get young men to go into the Navy, and after they are in there for a few months they become dissatisfied and many of them are unable to get out, and the result is they desert and our prisons have been filled by these young men on account of their deserting.

Mr. PADGETT. The desertions are decreasing every year.

Mr. FOSTER. I will say to the gentleman from Tennessee I would rather see fewer men, fewer boys, enlist in the Navy and have those boys satisfied with the position they occupy than I would to have the prisons of the country filled by young American citizens.

Mr. PADGETT. The desertions are reducing every year, and there are now only about 3¼ per cent, I think——

Mr. MURRAY. Mr. Chairman, I inquired into this same item last year, and I found the reason for this item was because under the old system they had to have separate vouchers and separate clerical work for each bill from each newspaper or magazine that was presented. That is the reason for requesting this authority, in order that a great many newspaper advertisements or magazine advertisements might be cared for in one voucher.

If the gentleman's objection is as to the practice of advertising at all, I think it is probably well taken, but if his objection is to the advertising-agency feature of it, I think there is a wise economy in the advertising agency. I made an inquiry, not in the debate last year, but as an independent proposition, of the chief of the bureau, because it attracted by attention, as it seems to have attracted the attention of the gentleman from Illinois [Mr. FOSTER].

Mr. ROBERTS of Massachusetts. I want to suggest to the gentleman from Illinois [Mr. FOSTER] that if his point of order is well taken and it should be sustained and strike out the advertising authority, there would be no way left for the Navy Department to get recruits. If we absolutely prohibit them from any form of advertising, they could not even hang out a sign over their recruiting station in a city saying that recruits were wanted.

Mr. FOSTER. I will say to the gentleman from Massachusetts I see no harm in that, and I do not think there is anything wrong in it, but I do believe that it is absolutely wrong for the Navy Department to put out great colored posters describing all the wonderful things a boy can obtain by enlisting in the Navy, inducing those boys through that advertisement to enlist when they ought not to do so.

Mr. ROBERTS of Massachusetts. Let me suggest to the gentleman that very little of that is being done by the department now.

Mr. FOSTER. I will say to the gentleman from Massachusetts that he can go to any post office throughout the country——

Mr. ROBERTS of Massachusetts. A great deal of it is done through the magazines.

Mr. FOSTER. The gentleman can go to any post office throughout the country, perhaps not in the city in which he lives, but the city in which I live, and out through the interior of the United States, and he will find these colored posters placed in the post offices with all sorts of alluring advertisements of what these boys may see around the world by enlisting in the Navy. And when they get a young boy at the age they go into the Navy under those circumstances he does not make an efficient man and, in my judgment, we fill our prison ships with this kind of young men, who ought not to be there. I make the point of order, Mr. Chairman.

Mr. GALLAGHER. I want to call the gentleman's attention to a condition that exists in large centers which I think is deplorable. If this appropriation carries with it a provision to employ men of the Army and the Navy who in dress-parade uniform stand out in front of recruiting offices and who are simply decoys to rope in young men, I am against it.

Mr. FOSTER. I will state this, further, Mr. Chairman——

Mr. GALLAGHER. I want to say, further, that these recruiting offices in large cities are located in some of the worst sections, over saloons, and in a majority of cases these decoys stand outside for the express purpose of inducing young men to join the service.

Mr. FOSTER. I have found in the district that I have the honor to represent that fathers have written to me requesting that the Navy Department should stop the sending of this literature to their sons; that they did not want them to enlist in the Navy, but that the department was continually sending this literature, describing all the wonderful things that were to be had by enlisting, and it made the boys dissatisfied. And I have had to go down to the Navy Department to stop that sort of practice. I believe it is wrong.

Mr. BURNETT. Will the gentleman yield to a question? I have had cases where, after they had gotten them in by that kind of a decoy, and you would go to the Navy Department to get them out, they would say, "We will turn them loose, but we will prosecute them for perjury."

Mr. PADGETT. That was changed some years ago. I do not think the words "advertising for and," on page 7, are subject to the point of order. The proviso is subject to the point of order, if that is made.

The CHAIRMAN. Has the gentleman from Tennessee [Mr. PADGETT] the law authorizing the advertising for recruits?

Mr. PADGETT. I have not, sir. All I know is that it has been in the appropriation bills time out of mind.

The CHAIRMAN. Unless there is some law, the point of order will have to be sustained in both instances.

Mr. MURRAY. Did the Chair sustain the point of order in the absence of proof that there is no law? Does the Chair rule in the absence of any affirmative proof of the existence of the law that the point of order should be sustained?

The CHAIRMAN. The burden is on the committee to show the law authorizing the appropriation.

Mr. MURRAY. Rather than on the gentleman's suggesting the point of order?

The CHAIRMAN. That is the ground on which the Chair rules. The Clerk will read.

The Clerk read as follows:

Contingent: Ferriage, continuous-service certificates, discharges, good-conduct badges, and medals for men and boys; purchase of gymnastic apparatus; transportation of effects of deceased officers and enlisted men of the Navy; books for training apprentice seamen and landsmen; maintenance of gunnery and other training classes; packing boxes and materials; and other contingent expenses and emergencies arising under cognizance of the Bureau of Navigation, unforeseen and impossible to classify, $15,000.

Mr. SISSON. Mr. Chairman, I move to strike out the last word. I desire to ask the gentleman from Tennessee a question. I believe this appropriation is the same as it was last year?

Mr. PADGETT. Yes, sir.

Mr. SISSON. How much of this appropriation is carried for good-conduct prizes and medals? Is there a statement showing what these different items cost?

Mr. PADGETT. No; the amount that is expended for badges is but a small proportion of the $15,000.

Mr. SISSON. Does the gentleman believe that these badges and trophies, as they are denominated here, have a good effect upon the men?

Mr. PADGETT. They have a very admirable effect. It is a stimulation to them to get these badges. It is a token of honor and efficiency in the Navy, and the amount is very small.

Mr. SISSON. If it performs a good service to the Navy, I have no objection. The amount is small enough. I have no objection to the amount. I withdraw my pro forma amendment.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Gunnery exercises: Prizes, trophies, and badges for excellence in gunnery exercises and target practice; for the establishment and maintenance of shooting galleries, target houses, targets, and ranges; for hiring established ranges, and for transportation of civilian assistants and equipment to and from ranges, $100,000.

Mr. SISSON. Mr. Chairman, I move to strike out the last word. I want to ask the gentleman from Tennessee another question. I notice here that he has an appropriation for prizes and trophies again. Is that for the same service?

Mr. PADGETT. This is for the gunnery exercises.

Mr. SISSON. The other is for good-conduct badges, and this is for excellence in marksmanship?

Mr. PADGETT. Yes, sir.

Mr. SISSON. How many shooting galleries have been established?

Mr. PADGETT. This is on board ship, and the shooting is carried on when they go out in their annual and semiannual practices, in the cruises. For instance, they have recently been down at Guantanamo in their winter practice.

Mr. SISSON. Was this amount $67,000 last year?

Mr. PADGETT. It was $167,000 last year, and we have reduced it to $100,000.

Mr. SISSON. You have reduced it $67,000?

Mr. PADGETT. Yes.

Mr. SISSON. I withdraw my pro forma amendment.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Aviation experiments: For experimental work in the development of aviation for naval purposes, $10,000.

Mr. MANN. Mr. Chairman, I move to strike out the last word. What other appropriations are there in the bill that are available for aviation?

Mr. PADGETT. Those under the Bureau of Steam Engineering and the Bureau of Construction and Repair in the lump-sum appropriations. They are inserted this year without limitations. In the hearings this year it was stated that perhaps each one would require $50,000.

Mr. MANN. Do you contemplate experiments to be carried on by three different branches of the service?

Mr. PADGETT. Yes.

Mr. MANN. I think that would be a very expensive proposition.

Mr. PADGETT. This is under the Bureau of Navigation. This $10,000 has largely to do with the personnel, and the meeting of emergencies and repairs. Under Steam Engineering they have charge of the engines and the machinery. Under Construction and Repair they have charge of the construction and building of what you might call the body of the biplane.

Mr. MANN. Does the Navy intend to construct airships itself?

Mr. PADGETT. Yes. They are experimenting with them and constructing both the engines and the body of the planes, but on a very limited scale.

Mr. MANN. I do not feel that I am in a position to make any criticism of such a matter, but from the way the Navy divides up its work I should think it would be a very expensive way to make experiments to have three different branches of the service working on it under three different appropriations.

Mr. ROBERTS of Massachusetts. I think the gentleman from Illinois misunderstands how these experiments are being carried on. There is an officer in charge of aviation. He has charge of the experiments, and when he wants any repairs to the flying machinery he goes to the appropriate bureau of the department to make those repairs. If he wants parts of the flying machine reconstructed he goes to the Bureau of Repairs and has the plane reconstructed, and if he wants repairs to the steam engine he goes to the Bureau of Steam Engineering to install the motor.

Mr. MANN. How many machines have they now?

Mr. ROBERTS of Massachusetts. I think they have three.

Mr. MANN. How many officers are there detailed on this work?

Mr. ROBERTS of Massachusetts. My recollection is, from statements made by Capt. Chambers, that there are eight all told who are working or under instruction. I think there are about five under instruction.

Mr. MANN. I noticed in one of the Washington newspapers yesterday what purported to be a statement made by Capt. Chambers, which is impudent and impertinent to the highest degree. I do not know whether he made the statement or not; but if he made the statement attributed to him he ought to be court-martialed and dismissed from the Navy.

Mr. ROBERTS of Massachusetts. What was it?

Mr. MANN. Reflecting upon Congress, and everybody else that he could think of.

Mr. ROBERTS of Massachusetts. I do not know about this particular matter, but I do know that Capt. Chambers is a very courteous officer.

Mr. BUTLER. I should be very greatly surprised if Capt. Chambers was correctly quoted, because I know him to be very civil toward everybody.

Mr. MANN. It looked as though the captain had written a statement and furnished it to the press. It was in that form.

Mr. ROBERTS of Massachusetts. I will state to the gentleman from Illinois that the amount for aviation has been kept down in this bill below what some members of the committee would like to have seen appropriated, because Capt. Chambers requested it. He said the Navy was proceeding slowly in this matter; that they had given out to the inventors of the world certain requirements that they wanted in the ideal flying machine for naval purposes, and he did not propose to expend a great deal of money or invest any considerable money in flying machines until they had come nearer the ideal than anything at present in existence.

Mr. MANN. Very likely he was not correctly quoted in the papers.

Mr. ROBERTS of Massachusetts. As stated by the gentleman from Pennsylvania [Mr. BUTLER], I should be very much surprised if he said anything that was impertinent or impudent.

Mr. RODDENBERY. Did I understand the gentleman from Illinois to say that he read the Washington Star yesterday?

Mr. MANN. I did.

Mr. RODDENBERY. On Sunday?

Mr. MANN. I did. I read the Post, too.

Mr. RODDENBERY. On Sunday?

Mr. MANN. Yes; and then afterwards I read the Times.

Mr. RODDENBERY. When we had up the bill to prohibit the delivery of mail at the post offices on Sunday, I thought I heard the gentleman from Illinois say that he did not read any mail on Sunday, and that he did not even read the newspapers, and I wondered if in this Democratic administration he had learned to follow our bad example. [Laughter.]

Mr. MANN. I did not read any letters yesterday, and I did not open any mail yesterday, and if the gentleman should spend no more time reading the papers than I do on Sunday, he would not spend very much.

Mr. KENDALL. This was Sunday's Star, but it was read this morning before breakfast. The gentleman misunderstood the gentleman from Illinois.

Mr. MANN. I did not so state. Being a man who is not afraid of what he has done, however foolish it may be, I read the Star, in the way that I read the papers, and afterwards I read the Post, and then by inadvertence in the afternoon I read the Times.

Mr. RODDENBERY. Did the gentleman see anything in any of the papers concerning pork?

Mr. MADDEN. They say pigs have gone up from $6 to $9 a hundred.

Mr. MANN. Yes; I read something about pork, because I keep track of the market as to pork, thinking perhaps I may be able to get a considerable slice of pork before Congress adjourns, and dispose of it in that way; and if the pork barrel keeps on, I might be able to sell my share of the pork at a high price. [Laughter.]

Mr. RODDENBERY. I wish the gentleman would advise me when he thinks the top of the market is reached. I should like to dispose of my oversupply.

Mr. MANN. The gentleman has an oversupply, if all I have read is true.

Mr. RODDENBERY. I am not raising any question about that; and I may want to get rid of the surplus before it spoils.

Mr. MANN. The gentleman can turn it over to the gentleman from Mississippi [Mr. SISSON]——

Mr. LEVER. I will take it.

Mr. MANN. Or he can turn it over to the gentleman from Tennessee [Mr. GARRETT], or some of the other gentlemen in the House who opposed the public building bill when it passed the House, and then promptly went over to the Senate and got their Senators to include items in the Senate which were much larger and more expensive than those in the House. I do not refer to the gentleman from Mississippi [Mr. SISSON] in that respect.

Mr. SISSON. Mr. Chairman, I deny the mild impeachment of the gentleman from Illinois.

Mr. MANN. I said I did not refer to the gentleman from Mississippi in that respect.

Mr. RODDENBERY. I hope the gentleman——

Mr. MADDEN. Did I understand the gentleman from Georgia [Mr. RODDENBERY] to say that he had gone to the Senate to ask for accommodations there?

Mr. RODDENBERY. No. "The gentleman from Georgia" took such good care of himself on his own committee that it was unnecessary.

The Clerk read as follows:

Outfits on first enlistment: Outfits for all enlisted men and apprentice seamen of the Navy on first enlistment, at not to exceed $60 each, $800,000.

Mr. SISSON. Mr. Chairman, I move to strike out the last word, and I want to ask the gentleman how much was left over from this appropriation last year?

Mr. PADGETT. I think we reduced it about $100,000.

Mr. SISSON. How much was left over?

Mr. PADGETT. I have not the exact figures.

Mr. SISSON. I have a note here of $317,900.

Mr. PADGETT. Oh, no; it was that much two years ago, but we reduced it last year and then again we reduced it this year. They spent, as I remember it, in the neighborhood of $800,000 last year.

Mr. SISSON. Was the $319,900 covered into the Treasury, or reappropriated?

Mr. PADGETT. It was covered into the Treasury.

Mr. SISSON. The law allows $60?

Mr. PADGETT. The law allows that as the cost of the outfit. They figure on the cost of the outfits for the year as $944,400, and not expecting that they could enlist them all at the time, we made a reduction to $800,000.

Mr. SISSON. I notice that this will take care of over 13,000 enlistments. Does the gentleman think that it will take that much during the fiscal year?

Mr. PADGETT. Yes; last year we had, I think, about 15,000 enlistments.

Mr. SISSON. If a man enlists does he get the $60 outfit immediately?

Mr. PADGETT. He does on the first enlistment, and if he is discharged at the end of the first year he has to refund. He enlists for four years, and if he is discharged at the end of the first year he has to repay the cost of that first enlistment.

Mr. SISSON. I had no idea that there was as many as 14,000 enlistments. In making the computation I see that this will take care of 13,333, and I thought that that was a large enlistment.

Mr. PADGETT. We have enlisted more than that at times. The estimate was made on fourteen thousand and some hundred enlistments.

Mr. SISSON. And the committee cut that down from $900,000 to $800,000?

Mr. PADGETT. Yes.

Mr. SISSON. So, I presume, the estimate is not too large.

Mr. GOODWIN of Arkansas. Mr. Chairman, I ask unanimous consent that I may extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Arkansas asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

The Clerk read as follows:

NAVAL TRAINING STATION, CALIFORNIA: Maintenance of naval training station, Yerba Buena Island, Cal., namely: Labor and material; buildings and wharves; general care, repairs, and improvements of grounds, buildings, and wharves; wharfage, ferriage, and street car fare; purchase and maintenance of live stock, and attendance on same; wagons, carts, implements, and tools, and repairs to same; fire engines and extinguishers; gymnastic implements; models and other articles needed in instruction of apprentice seamen; printing outfit and materials, and maintenance of same; heating and lighting; stationery, books, and periodicals; fresh water, and washing; packing boxes and materials; and all other contingent expenses; maintenance of dispensary building; lectures and suitable entertainments for apprentice seamen; in all, $70,000.

Mr. SISSON. Mr. Chairman, I want to ask the chairman of the committee if this is the usual annual appropriation?

Mr. PADGETT. Yes.

Mr. SISSON. Is it for the entire expense of the Naval Training Station?

Mr. PADGETT. This covers only the maintenance charges.

Mr. SISSON. It does not cover the clothing and salary of the men, and so forth, but is simply for maintenance? How many men have you there?

Mr. PADGETT. We keep from 1,500 to 2,500 men there in training.

Mr. SISSON. Does this take care of not only the quarters of the men but also the training grounds, rooms, and so forth?

Mr. PADGETT. The training rooms; repair of apparatus, furnishing new apparatus, and everything of that kind.

Mr. SISSON. What sort of training do they have there?

Mr. PADGETT. They have their drills, gymnastic exercises for physical development, and on the water they have the training in the small boats and larger boats, and signaling, and everything of that kind that goes to fit and qualify and train the boy for a seaman.

Mr. SISSON. Does the number of men vary?

Mr. PADGETT. It varies; sometimes running very high, and then they go aboard ship and others come in.

Mr. SISSON. I notice the last two years there has been appropriated $70,000; I did not go back of that.

Mr. PADGETT. That has been the appropriation for some time and we would not increase it this year.

Mr. MANN. Mr. Chairman, will the gentleman answer a question?

Mr. PADGETT. Yes.

Mr. MANN. How many of these naval training stations are there, and how many apprentices?

Mr. PADGETT. We have a naval training station at Norfolk, one at Newport, one in California, and one on the Great Lakes at Chicago. At Newport the total during the last fiscal year was 5,573; at Norfolk, Va., 2,381; at North Chicago, 1,717; and at San Francisco, 2,312.

Mr. MANN. Where did you carry the appropriation last year for maintenance of the training station at Norfolk?

Mr. PADGETT. Under "Yards and docks."

The Clerk read as follows:

Naval training station, Rhode Island: Maintenance of naval training station, Coasters Harbor Island, R. I., namely: Labor and material; buildings and wharves; dredging channels; extending sea wall; repairs to causeway and sea wall; general care, repairs, and improvements of grounds, buildings, and wharves; wharfage, ferriage, and street car fare; purchase and maintenance of live stock, and attendance on same; wagons, carts, implements, and tools, and repairs to same; fire engines and extinguishers; gymnastic implements; models and other articles needed in instruction of apprentice seamen; printing outfit and materials, and maintenance of same; heating and lighting; stationery, books, and periodicals; fresh water, and washing; packing boxes and materials; and all other contingent expenses; lectures and suitable entertainments for apprentice seamen; in all, $85,000: *Provided*, That the sum to be paid out of this appropriation under the direction of the Secretary of the Navy for clerical, drafting, inspection, and messenger service for the fiscal year ending June 30, 1914, shall not exceed $5,701.60.

Mr. SISSON. Mr. Chairman, may I ask the gentleman from Tennessee the reason for this proviso in reference to permitting the Secretary of the Navy to have $5,701 for clerical, drafting, inspection, and messenger service?

Mr. PADGETT. This is a limitation on the amount that he may use.

Mr. SISSON. Why should he be permitted to use these boys in this way at all?

Mr. PADGETT. He does not use the boys. These are civilian clerks. They are not enlisted men.

Mr. SISSON. I understand. These are the men in training there?

Mr. PADGETT. No; he does not use them. This is a clerical force.

Mr. SISSON. Does he have a clerical force that costs more than $5,701?

Mr. PADGETT. He has a clerical force there, and in order to prevent him from using more than that amount this limitation is placed.

Mr. SISSON. Where do they use this clerical force?

Mr. PADGETT. In running the establishment there. They have clerks, and they make reports to the department, and they have a regular clerical establishment there.

Mr. SISSON. Does he have a clerical force there that does any other service than to look after this particular establishment?

Mr. PADGETT. Not except this establishment at this place.

Mr. SISSON. I was rather struck with the amount of money expended for clerical force when the total appropriation was only $85,000. This does not include the management and the pay of professors and teachers?

Mr. PADGETT. No; this is the clerical force—messengers, drafting, and a force of that kind.

Mr. SISSON. I thought that was a rather large appropriation. It is a very large overhead charge for an appropriation of $85,000.

Mr. PADGETT. They have the whole management of that institution.

Mr. SISSON. You do not know how many he has there in that service?

Mr. PADGETT. I think there are two clerks, two messengers, two watchmen, or one watchman.

The Clerk read as follows:

Naval training station, Great Lakes: Maintenance of naval training station: Labor and material; general care, repairs, and improvements of grounds, buildings, and piers; street car fare; purchase and main-

tenance of live stock, and attendance on same; motor-propelled vehicles, wagons, carts, implements, and tools, and repairs to same; fire apparatus and extinguishers; gymnastic implements; models and other articles needed in instruction of apprentice seamen; printing outfit and material, and maintenance of same; heating and lighting, and repairs to power plant equipment, distributing mains, tunnel, and conduits; stationery, books, and periodicals; washing; packing boxes and materials; lectures and suitable entertainments for apprentice seamen; and all other contingent expenses: *Provided*, That the sum to be paid out of this appropriation under the direction of the Secretary of the Navy for clerical, drafting, inspection, and messenger service for the fiscal year ending June 30, 1914, shall not exceed $44,553.36; in all, naval training station, Great Lakes, $98,457.

Mr. SISSON. Mr. Chairman, why is it that for the same service at the naval station on the Great Lakes as there was allowed in the Rhode Island station, $5,701, you should have $44,553.36?

Mr. PADGETT. The naval training station on the Great Lakes was recently constructed and is a very large establishment. It is many times larger than the other one. The one on the Great Lakes has an outlay of several million dollars in buildings or improvements that have been made there, and there is a much larger force employed in the clerical force and the messenger service.

Mr. SISSON. Is it eight times as large?

Mr. PADGETT. I should say more than that in investment.

Mr. SISSON. There is $44,000 in one for clerical services, drafting, and inspection, and in the other only $5,000. That makes a difference of over eight times as much in favor of the Chicago station. If they are using the clerical help necessary to maintain the establishment, you have over half or nearly half the entire appropriation for the maintenance of the station in clerical force there, while in the other you have only one-sixth.

Mr. PADGETT. Yes.

Mr. SISSON. Or less than one-fifth. Why should there be that difference in the clerical force at the Great Lakes from the one at Rhode Island?

Mr. PADGETT. The one on the Great Lakes, as I stated, is a much larger establishment, with much more pretentious buildings.

Mr. SISSON. I could understand how it would cost more to maintain it, to feed and clothe the men and the professors and trainers. I can understand that; but I can not understand how the clerical force should be so out of proportion with the clerical force needed in the naval station at Rhode Island. That is what I would like to have the gentleman explain, if he can.

Mr. PADGETT. I have not the details upon that phase of it, as to the exact number.

Mr. SISSON. Did the gentleman's committee inquire into why they wanted so much clerical force at one place and so much less at the other?

Mr. PADGETT. This is a new station, which was completed last year, and we are cutting down the maintenance. We have reduced it below what it was last year $7,000 or $8,000.

Mr. SISSON. What was your limitation last year on the clerical force?

Mr. PADGETT. I think it is the same as in this.

Mr. SISSON. You cut your maintenance down and yet left the expenditures for clerical force at this large sum of $44,000?

Mr. PADGETT. That is the same as last year.

Mr. SISSON. Now, in the Rhode Island station you had two clerks and two messengers——

Mr. PADGETT. I said about that number.

Mr. SISSON. I mean that is about what it was. Now, how many do you have here to absorb this $44,500?

Mr. PADGETT. I do not know, sir.

Mr. SISSON. I do not understand how this committee would give this sum for that purpose unless they knew the number of employees and what we were doing with those employees.

Mr. PADGETT. It has been the same as it was there last year, and, as there was no increase in it, the station is just getting well under way, and this work is going on, so we left it just about the same.

Mr. SISSON. Of course I understand this is a new station, and it is quite possible you may have a number of expert mechanics, and so forth, to complete the station, but such information ought to have been provided and——

Mr. PADGETT. We did not go into those items this year, as it was the same as last year.

Mr. SISSON. In view of the fact this station was near completion, as the gentleman said awhile ago, this clerical force, or drafting force, ought to have been very materially reduced if the committee had gone into it.

Mr. PADGETT. These estimates were sent in regularly and we did not go——

Mr. SISSON. The gentleman understands when these items are sent in from the department they will always, as his experience as chairman of that committee would tell him, as of all the other committees, unless you inquire into this they will take the same amount of money.

Mr. PADGETT. They reduced the total expenditure $8,000 or $10,000.

Mr. SISSON. Why could not they reduce the $44,000 instead of the total amount?

Mr. MANN. If the gentleman will permit me to suggest, in view of the reduction made in the total amount and the fact they may be short, this entire $40,000 can be expended for that purpose.

Mr. SISSON. I see; I understand that; and I asked the question, Why should they appropriate so much for the clerical services at this naval station and such a small amount in the others?

Mr. MANN. I apprehend the fact is that amount of $44,543 is not for that purpose.

Mr. SISSON. Possibly not.

Mr. MANN. If it is used for maintenance it is not a large sum.

Mr. SISSON. The limitation is that they shall not use more than $44,000 for clerical help. I understand how it can be used.

Mr. MANN. The total sum appropriated is not a large sum for maintenance.

Mr. SISSON. Of course they could divert it from this and every bit of the appropriation be used for maintenance.

Mr. MANN. Under this limitation they can not go above this amount for clerical help, but not that it must be expended for clerical help.

Mr. MADDEN. There is one thing that must be taken into account and that is that these buildings are not all completed, and it might require a great many more men to act as receiving clerks and draftsmen and inspectors and such men as those.

Mr. SISSON. All that may be true, but I was simply asking as to the difference in these items.

Mr. MADDEN. That can be accounted for by the fact they are still constructing the building.

The Clerk read as follows:

Naval training station, St. Helena: Maintenance of naval training station; labor and material, general care, repairs, and improvements; and all other incidental expenses, $25,000.

Mr. SISSON. I desire to reserve a point of order. I will say to the gentleman I do not know whether it is subject to the point of order or not. The only thing there is, it is a new matter, and if it is the establishment of a new naval station there is no authority of law for that.

Mr. PADGETT. It is the same one I read to the gentleman a few moments ago. This is one of the best stations we have, and it is costing less. This is a new item put in here this year, because heretofore it has gone under the yards and docks appropriation, $25,000. Last year we cared for 2,381 men. We have a number of cheap buildings there, and this is the first year that we have given them——

Mr. SISSON. How long has this been maintained—several years?

Mr. PADGETT. For a number of years.

Mr. SISSON. You simply transfer it and make a separate item of it?

Mr. PADGETT. No; we have not transferred it, but it has been heretofore under the item of yards and docks, $25,000, and we have put this new item in here for maintenance of that existing building, so as to give them a fund for the maintenance of the building. That was formerly put in under yards and docks—for the maintenance.

Mr. SISSON. I want to congratulate the gentleman on segregating this item from yards and docks and putting it in a separate paragraph so we can tell about that. If the gentleman will do that in the next year's bill, I will commend him again.

The Clerk read as follows:

Naval War College, Rhode Island: For maintenance of the Naval War College on Coasters Harbor Island, and care of grounds for same, $23,750; services of a lecturer on international law, $1,500; services of civilian lecturers, rendered at the War College, $300; care and preservation of the library, including the purchase, binding, and repair of books of reference and periodicals, $1,300: *Provided*, That the sum to be paid out of this appropriation under the direction of the Secretary of the Navy for clerical, inspection, drafting, and messenger service for the fiscal year ending June 30, 1914, shall not exceed $10,250. In all, Naval War College, Rhode Island, $26,850.

Mr. SISSON. We are about through with these items, and I would like to ask the chairman one question: Why do you put on all these provisos a limitation as to inspection, drafting, messenger service, and clerical work, and so forth?

Mr. PADGETT. So that he could not use all the appropriation for clerical work.

Mr. SISSON. Has there been in years past any abuse of this?

Mr. PADGETT. Many years ago the practice was to appropriate for so many clerks, and they had so many named for this and so many here and so many there, so many at $1,000 and so many at $1,500, and they could not readjust it, and Congress changed from that and adopted his method of limiting the appropriation so much for the clerical, drafting, and messenger force.

The Clerk read as follows:

Naval Home, Philadelphia, Pa., pay of employees: 1 secretary, $1,600; 1 foreman mechanic, $1,500; 1 superintendent of grounds, at $720; 1 steward, at $720; 1 one store laborer, at $480; 1 matron, at $420; 1 beneficiaries' attendant, at $240; 1 chief cook, at $480; 1 assistant cook, at $360; 1 assistant cook, at $240; 1 chief laundress, at $216; 5 laundresses, at $192 each; 4 scrubbers, at $192 each; 1 head waitress, at $216; 8 waitresses, at $192 each; 1 kitchen servant, at $240; 8 laborers, at $360 each; 1 stable keeper and driver, at $480; 1 master-at-arms, at $720; 2 house corporals, at $300 each; 1 barber, at $360; 1 carpenter, at $846; 1 painter, at $846; 1 painter, at $720; 1 engineer for elevator and machinery, $720; 4 laborers, at $540 each; 2 laborers, at $360 each; total for employees, $22,288.

Mr. SISSON. Mr. Chairman, I reserve a point of order on the paragraph. I do it for the purpose of inquiring about the new positions created here in the item. I notice you have one painter at $720, and you have four laborers.

Mr. PADGETT. I wanted to offer an amendment for five. In the total it is for five. It is a misprint of "four."

Mr. SISSON. Now, have you any new laborers?

Mr. PADGETT. Yes, sir. There is one new laborer, and they are increased from $360 to $540 each.

Mr. SISSON. How many did you have in the last bill, where you have four laborers here now at $540 each?

Mr PADGETT. We had three.

Mr. SISSON. Now you want to make it five?

Mr. PADGETT. And we had one at $300. So there were three at $540 and one at $300, and we are making it five at $540. I wanted to say to the gentleman that the naval home is supported and maintained out of the interest upon the naval pension fund and does not come directly out of the Treasury, and the surplus from the interest of the Navy pension fund, after the maintenance of the naval home, is turned over to the Secretary of the Interior and goes to the Pension Office to pay pensions of the Navy.

Mr. SISSON. I have no doubt the gentleman will be just as careful about the expenditure of that sacred fund as he would of the other sacred fund out of the Treasury.

Mr. PADGETT. Just exactly so. For the comfort of these old men—the proof shows that these employees are needed to take care of the property. This painter is needed, and we did not feel that the salary of $300 was a sufficient compensation for a man to live on or that raising it to $500 was extravagant.

Mr. SISSON. Does that account for the increase of the appropriation?

Mr. PADGETT. Entirely.

Mr. COX. Does the Government pay interest on this?

Mr. PADGETT. Yes.

Mr. COX. What interest does it pay on it?

Mr. PADGETT. Four per cent. That fund was created many years ago out of the sale of the prizes captured by the Navy in battles, and the fund was turned into the Treasury as a trust fund, the interest upon which was to go to the maintenance of these old sailors who are taken care of out there in the home, and the surplus goes into the pension fund.

Mr. COX. And the Government pays 4 per cent interest on it?

Mr. PADGETT. Pays 4 per cent interest on it.

Mr. SISSON. Have you ever exceeded the interest in the maintenance or support of the home?

Mr. PADGETT. We pay five or six hundred thousand dollars a year into the pension fund.

Mr. COX. How much does the pension fund represent?

Mr. PADGETT. Something like $14,000,000. It is a fixed charge under the statute, unless the statute is changed. But it provides for the maintenance of the naval home, and that the surplus, which is $500,000 or $600,000, shall be turned over to the Secretary of the Interior to pay Navy pensions.

Mr. SISSON. It goes entirely to Navy pensions and not to the military?

Mr. PADGETT. To the Navy pensions; and to that extent reduces the amount which might be drawn from the Treasury.

Mr. SISSON. Mr. Chairman, I withdraw the point of order.

Mr. PADGETT. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Tennessee offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 13, line 14, strike out the word "four" and insert in lieu thereof the word "five."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

Maintenance: Water rent, heating, and lighting; cemetery, burial expenses and headstones; general care and improvements of grounds, buildings, walls, and fences; repairs to power-plant equipment, implements, tools, and furniture, and purchase of the same; music in chapel and entertainments for beneficiaries; stationery, books, and periodicals; transportation of indigent and destitute beneficiaries to the Naval Home, and of sick and insane beneficiaries, their attendants and necessary subsistence for both, to and from other Government hospitals; employment of such beneficiaries in and about the Naval Home as may be authorized by the Secretary of the Navy, on the recommendation of the governor; support of beneficiaries, and all other contingent expenses, $54,421; rebuilding river bulkhead, $5,500; total, maintenance, $59,921; in all, for Naval Home, $82,209, which sum shall be paid out of the income from the naval pension fund.

Mr. SISSON. Mr. Chairman, I reserve a point of order on the paragraph. I do not know that it is subject to a point of order, but I notice that it is a new paragraph.

Mr. PADGETT. No; it is not a new item. It is simply a change of the wording of the old item in order to save expenses of clerical help; expenditures in the department in the matter of bookkeeping.

Mr. SISSON. What was the change that was made?

Mr. MANN. The gentleman from Mississippi will notice that last year they carried various items specifically; "water rent and lighting, $2,000; cemetery, burial expenses, and headstones, $1,000; improvement of grounds, $1,000"; and another item, $1,000. This year it is all lumped.

Mr. SISSON. I have not the item before me, but I notice that you had $73,469 appropriated last year, and this year the amount is $82,209.

Mr. PADGETT. The river bulkhead is a new item, $5,500. The land is washing away, and washing into the stream; and under the laws of Maryland the riparian owner is required to repair and preserve the banks. The Government here is the owner, and we are putting in this appropriation for $5,500 for the construction of a bulkhead there, to preserve the land from falling in and washing into the stream.

Mr. SISSON. May I ask the gentleman from Tennessee why he adopts this language? Was it suggested by the department or was it conceived in the committee?

Mr. PADGETT. It was suggested by the governor and managers of the Naval Home, through the department. It came through them to the department, and was transmitted with the department's recommendation to the committee.

Mr. SISSON. Would the gentleman from Tennessee have any objection to an amendment carrying the amount in the language that was carried in the last bill, with the item added?

Mr. PADGETT. Not at all; except that it makes a greater cost of bookkeeping. Otherwise I would have no objection.

Mr. SISSON. But it would give Congress, which makes the appropriations, the information it desires, and it would continue the good practice of having the sums specified. I should have no objection to the item if it were carried in the language of the other appropriation.

Mr. MANN. Will the gentleman yield in reference to that?

Mr. SISSON. I will.

Mr. MANN. Last year the item was "Water rent and lighting, $2,000; cemetery, burial expenses, and headstones, $1,000; improvement of grounds, $1,000; repairs to buildings," and so forth, $1,000. The gentleman can see that if those items are segregated and one man is doing a part of the work on all four of them, the expense has to be charged on a separate account, which makes it rather expensive, after all. There were five items last year, and one of them was for $300, and they were segregated. After all, like many other things carried in the bill, this is carried in a lump sum for the purpose of avoiding bookkeeping and the extra service of different men accounted for on different items.

Mr. SISSON. I will say to the gentleman from Illinois that I have no particular objection to items of this character being grouped together in the maintenance of one home, but where they are in a different department and under different bureau chiefs I have some objection.

Mr. MANN. Of course, these are all together, and I think the committee is right this year in lumping them.

Mr. PADGETT. It was paid out of the same sum as the former item.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. SISSON. Mr. Chairman, I withdraw the point of order. I am rather in doubt as to whether it should not have been carried in the former language.

Mr. VARE. Mr. Chairman, I would like to ask the gentleman in charge of the bill what is the capacity of the naval home at Philadelphia? What is the number of members or inmates that it would accommodate?

Mr. PADGETT. I do not know, sir, but there is abundance of room. I do not know how many inmates it will accommodate. The gentleman has reference to the home at Philadelphia?

Mr. VARE. Yes.

Mr. PADGETT. They had last year, one day when I was there, some one hundred and odd members.

They had a capacity for a very much larger number, but I do not recall now what the number was.

Mr. ROBERTS of Massachusetts. At the time of the last annual report it was 72. It is varying all the time.

Mr. VARE. My information is that the capacity is 500.

Mr. PADGETT. I suppose it is.

Mr. VARE. And that the average number of inmates is approximately 75.

Mr. PADGETT. More than that, so they tell me.

Mr. VARE. And inasmuch as there are only 75 of these venerable old sailors occupying this very large institution, I want to ask the chairman of the committee whether he does not think it would be in line with good business policy to build a new home at the Philadelphia Navy Yard, which would have much more up-to-date improvements and conveniences, where these old sailors could be in close contact with the battleships in the reserve basin?

Mr. PADGETT. No; I think not. I was over at Philadelphia and I found there quite a sentiment in favor of transferring these old sailors over to the navy yard and the Government donating these many acres of land to the city of Philadelphia. I confess that the project did not commend itself to me.

Mr. BUTLER. These old fellows want to remain where they are.

Mr. PADGETT. The thing back of this is a proposition to give this property to the city of Philadelphia.

Mr. VARE. Then it is rather a question of appealing to the sentimental side rather than the idea of giving the old sailors a new home with more up-to-date accommodations?

Mr. PADGETT. No; they have as fine accommodations there and as magnificent a hospital and home as I ever saw, and they have beautiful grounds right in the city, much better located, and with shade trees and grass and everything, none of which they have at League Island.

Mr. VARE. Is it not a fact that the hospital in connection with the naval home is approximately about 4 miles from the Philadelphia Navy Yard, and that if a hospital was erected at the Philadelphia Navy Yard it would be in close touch with the employees of the Government there in case of accident?

Mr. PADGETT. That might be, but this is a naval home, and is not intended as a hospital for the employees of the navy yard.

Mr. VARE. It is a hospital on the grounds, is it not?

Mr. PADGETT. The hospital is on the grounds of the naval home, but not on the grounds of the League Island Navy Yard.

Mr. MANN. I move to strike out the last word. If it costs over $1,000 apiece to maintain these old sailors at this home, in addition to the overhead charges, subsistence, and clothing, would it not be a great deal cheaper and probably fully as satisfactory if the Government would pay for putting them in some of the old soldiers' homes throughout the United States? Is it not a rather expensive proposition to pay over $1,000 apiece for the maintenance of these men in this home, and besides that pay the overhead charges, the cost of living, and the cost of clothing?

Mr. PADGETT. These old soldiers who are carried there—decrepit old men—are well cared for, as I think the Government should care for them.

Mr. MANN. Everybody will concede that.

Mr. PADGETT. Of course, they could be cared for, by having less comfort and less convenience, in a cheaper way. I do not think these men should be farmed out to the lowest bidder.

Mr. MANN. I do not see how it is possible to spend as much money on these sailors at this home as is spent in the items in this bill, much less in addition to that the cost of clothing them and the cost of subsisting them and the cost of the naval officers or other officers of the home, and other overhead charges.

Mr. PADGETT. This item carries the support of the beneficiaries, $54,000. It is embraced as a part of the $82,000.

Mr. MANN. That means the subsistence?

Mr. PADGETT. Yes.

Mr. MANN. Who pays for the support of the officers of the home?

Mr. PADGETT. The head of this institution is a naval officer who is assigned there.

Mr. BUTLER. He is on the retired list, is he not?

Mr. MANN. And the other employees who work there?

Mr. PADGETT. They are paid out of these items that we have just passed.

Mr. MANN. "Support of beneficiaries"?

Mr. PADGETT. Fifty-four thousand dollars, and that number varies. When I was there a year ago my recollection is that they had about 120.

Mr. MANN. Well, it runs in the neighborhood of about $1,000 a person?

Mr. PADGETT. Some are in the hospital and some in the homes.

Mr. MANN. This does not cover medical attendance?

Mr. ROBERTS of Massachusetts. Yes.

Mr. MANN. That is an extra item. This home has become a gross extravagance.

Mr. LA FOLLETTE. Page 13, line 22, says:

Transportation of indigent and destitute beneficiaries to the Naval Home, and of sick and insane beneficiaries, their attendants, and necessary subsistence for both—

And so forth.

Mr. MANN. That is not medical attendance.

Mr. ROBERTS of Massachusetts. It comes out of this appropriation.

Mr. MURRAY. I would like to ask the gentleman if there is any system by which the seamen contribute out of their monthly pay, as they do in the Army, for the maintenance of this or a similar home?

Mr. PADGETT. Yes; they contribute 20 cents a month; but that is a hospital fund, and no part of it goes to the maintenance of this home.

Mr. MURRAY. For what purpose is that fund used?

Mr. PADGETT. For the maintenance of hospitals throughout the country at different places. I think there is one near Boston.

Mr. MURRAY. Is it possible to use any part of that fund for the payment of the expenses at this home?

Mr. PADGETT. No; they are separate funds.

Mr. MURRAY. I wondered if there was any fund collected through the payment of these monthly payments that could be applied to this establishment?

Mr. PADGETT. No; it does not need it; they have a surplus of five or six hundred thousand dollars that is turned into the general pension fund to pay Navy pensions after the cost of the maintenance of the home. The 20 cents contribution a month out of the pay goes into the hospital fund for hospitals scattered about the United States.

Mr. MURRAY. That sum raised is much greater than needed to maintain the hospitals?

Mr. PADGETT. No; it is not greater than needed, but the balance goes to build additional hospitals.

Mr. MURRAY. The number of hospitals located now is large enough to carry on the work, is it not?

Mr. PADGETT. The committee thought so, and you will find later on a provision amending the statute that gives the Secretary absolute control over that fund and its expenditure, and it provides that hereafter new hospital buildings shall not be erected nor sites purchased except as authorized by Congress. Under the law as it now exists the Secretary has the power to erect new hospital buildings or to purchase new sites without consulting Congress.

Mr. MURRAY. I suppose the new arrangement the committee has in mind will result in wise economy.

Mr. PADGETT. We hope so.

Mr. MURRAY. I will ask the gentleman whether or not the money that can be so saved may not well be used for the purpose of maintaining the Naval Home at Philadelphia?

Mr. PADGETT. If it is more than needed I think the better way would be to reduce the contributions required of the men.

Mr. MURRAY. I think there is no complaint from the men of the Navy about the contribution of 20 cents a month. I know I never heard any complaint when I was in the Army. It seems to me that it might be used to maintain this home in Philadelphia.

Mr. PADGETT. If that was used to maintain the home at Philadelphia it would make a larger surplus in the Naval Home fund.

Mr. MURRAY. But this item comes out of the Treasury of the United States.

Mr. PADGETT. No, it does not; it comes out of the interest on the naval pension fund.

Mr. MURRAY. I am referring to the item in this bill on page 13 of $82,000.

Mr. PADGETT. That comes out of the naval pension fund of $14,000,000, which is a trust fund upon which the Government pays interest at 4 per cent.

Mr. MURRAY. And no part of this $82,209 mentioned on page 14 comes out of the Treasury of the United States?

Mr. PADGETT. No; except as the Government pays interest on the trust fund which arises from the sale of prizes captured by the Navy in years gone by.

Mr. MURRAY. I am obliged to the gentleman.

The Clerk read as follows:

Ordnance and ordnance stores: For procuring, producing, preserving, and handling ordnance material; for the armament of ships; for fuel, material, and labor to be used in the general work of the Ordnance Department; for furniture at naval magazines, torpedo stations, and proving ground; for maintenance of the proving ground and powder factory and for target practice, and for pay of chemists, clerical, drafting, inspection, and messenger service in navy yards, naval stations, and naval magazines: *Provided*, That the sum to be paid out of this appropriation under the direction of the Secretary of the Navy for chemists, clerical, drafting, inspection, watchmen, and messenger service in navy yards, naval stations, and naval magazines for the fiscal year ending June 30, 1914, shall not exceed $458,000. In all, $5,800,000: *Provided*, That hereafter no part of any appropriation shall be expended for the purchase of shells or projectiles for the Navy except for shells or projectiles purchased in accordance with the terms and conditions of proposals submitted by the Secretary of the Navy to all the manufacturers of shells and projectiles and upon bids received in accordance with the terms and requirements of such proposals: *Provided*, That hereafter the Secretary of the Navy is hereby authorized to make emergency purchases of war material abroad: *And provided further*, That when such purchases are made abroad, this material shall be admitted free of duty.

Mr. MANN. Mr. Chairman, I reserve the point of order on the paragraph.

Mr. SISSON. Mr. Chairman, I believe that that is the provision in the bill that buys the armor plate.

Mr. PADGETT. No; this buys the ordnance—shells and projectiles.

Mr. SISSON. I notice here a provision for armament of ships. What does that mean?

Mr. PADGETT. That means the guns, not the armament, the projectiles.

Mr. SISSON. What does the steel, out of which these guns are made, cost?

Mr. PADGETT. I do not know how to answer that question. A 14-inch shell costs, if I remember correctly, about $500 or $600.

Mr. SISSON. That is, to make the shell complete? What sort of steel do they make it out of?

Mr. PADGETT. Of the very hardest that can be manufactured.

Mr. SISSON. Did the gentleman inquire into the price that they are paying for this steel?

Mr. PADGETT. They buy the projectile itself.

Mr. SISSON. They buy the entire projectile? Does the Government make none of these projectiles?

Mr. PADGETT. They make the guns.

Mr. SISSON. I thought they made some projectiles.

Mr. PADGETT. I think not.

Mr. SISSON. The Government makes some of these torpedoes.

Mr. PADGETT. This does not embrace torpedoes.

Mr. SISSON. I was trying to ascertain whether the Government made any of this armament.

Mr. PADGETT. The Government may make some of the subordinate matters here, but the projectiles themselves are purchased.

Mr. SISSON. In the markets?

Mr. PADGETT. Yes; and hence there is the provision that the gentleman sees here that it must be in pursuance of bids submitted in the open market.

The CHAIRMAN. Does the gentleman from Illinois make the point of order?

Mr. MANN. Mr. Chairman, I reserve the point of order for a moment. I notice the gentleman proposes this year to put into permanent law the provision that no appropriation made at any time can be used for the purchase of shells and projectiles unless the Secretary of the Navy submits the terms and conditions of the proposals for bids to all the manufacturers of shells and projectiles. Of course that has been carried in the bill as far as this appropriation is concerned. Is it not quite conceivable that at almost any time some one may devise a shell or projectile which it is not desirable to make known to the world?

Mr. PADGETT. Mr. Chairman, I will say to the gentleman that so far as the permanent law is concerned the committee submitted it for the purpose of seeing whether or not we should carry it in the bill every year as it has been done. I have no objection to striking out the "hereafter."

Mr. MANN. I ask for information. If the terms and conditions of proposals were submitted to all of the manufacturers of shells, I do not know how far those terms and conditions would disclose any process or shell which it might be desired to keep secret. I can easily conceive that the Navy Department might want to buy some shells or projectiles for experiment or otherwise from some one who thought he had something very good. I believe we are now under a contract with some one, made a good many years ago, that has cost us a million or two dollars without any good results.

Mr. ROBERTS of Massachusetts. Mr. Chairman, the gentleman is aware that the department always makes its own specifications with regard to these shells. The department specifies just what it wants. If some one comes in with a patented shell, something that is new, the Navy Department can make its specifications to cover that particular shell.

Mr. MANN. And then give them to everybody else?

Mr. ROBERTS of Massachusetts. Give them to everybody else. They have complied with the law.

Mr. MANN. The chances are that the man who had a good shell would sell it to some foreign government, and would not disclose to this Government the needed specifications.

Mr. ROBERTS of Massachusetts. He does not have to disclose them. It is the Government that names the specifications, and if the shell comes up to the specifications, the Government accepts it. If it does not come up to the specifications named by the Government, they do not take the shell. The man who has a patent in connection with it does not have to disclose that patent to come in and bid under this provision of law.

Mr. MANN. I do not know whether he would or not. The specifications would have to be such that it would cover the patent.

Mr. ROBERTS of Massachusetts. Oh, but the specifications, as the gentleman well knows, can be so worded as to the particulars of the shell——

Mr. MANN. So worded that it means something to one man and not to another?

Mr. ROBERTS of Massachusetts. No; it would mean the same to all, but only the man with the patented shell could comply with those specifications. That is frequently done in all Government contracts. The law does not allow them to advertise specifically for some given patented article, but they make their specifications in such a way that only the man who has the patented article can successfully bid under those plans and specifications.

Mr. MANN. I do not desire to put my judgment up against the experts on the Committee on Naval Affairs, but I should think that it was not desirable to put in permanent law a provision that would not permit the Navy at any time ever to purchase a shell which was perhaps a patented shell or made by a secret device.

Mr. ROBERTS of Massachusetts. I will say to the gentleman that since I have been on the Committee on Naval Affairs we have sought to please the House as far as we could in the form of our bill. If the gentleman will remember, we used to report a bill without this provision put in it and there was a fight on the floor of the House and the provision would be put in for that particular year.

Mr. MANN. I do not remember, but the gentleman so states.

Mr. ROBERTS of Massachusetts. And we concluded we would put that in of our own volition in order to save that much fight on the floor, so we did that for a year or two and we thought perhaps it would avoid discussion and dispute if we made it permanent instead of reiterating it from year to year.

Mr. MANN. I will not make a point of order on the first proviso, but I make a point of order commencing in line 6 down to the end of the paragraph.

Mr. CHAIRMAN. Will the gentleman state his point of order?

Mr. MANN. The Chair means what the point of order is?

The CHAIRMAN. Yes.

Mr. MANN. Oh, well, it is a change of existing law.

Mr. PADGETT. Mr. Chairman, before the gentleman makes his point of order may I state to him that from the letters of the Secretary and his hearings and the chief of bureau there are many things that it is very important that he should have the right to purchase abroad and bring in without paying duty. For instance, torpedoes. He can purchase torpedoes abroad for about $3,500. The duty on them is 45 per cent. The effect of it is to take out of the appropriation for the Navy 45 per cent on $3,500 and turn it back into the Treasury and to carry on a

lot of bookkeeping and expense that accomplishes nothing, and then it is often necessary for the department to purchase some war material abroad.

Mr. MANN. I think it accomplishes a very good purpose if we pay a duty on an article which comes from abroad which calls attention to the high duty on the article and furnishes campaign arguments for our Democratic friends, for they are going to be mighty short of that in the next campaign.

Mr. PADGETT. Well, I am not dealing with it as a partisan but as a business question for the Government, and I think that it is a very judicious proposition, and the department approves it very heartily, and the department is Republican. I think it is only a business proposition.

Mr. MANN. But the Navy Department has no politics except naval politics.

Mr. PADGETT. The administration has charge of the Navy Department, and that is Republican, and strongly recommends this provision. We carried it last year, except the word "hereafter" was not in. If the gentleman objects to the word "hereafter," just let us strike it out and not make it permanent law and carry it simply as a provision.

Mr. MANN. I think the item had better go out, and I make the point of order.

The CHAIRMAN. The point of order is sustained.

The Clerk read as follows:

Purchase and manufacture of smokeless powder, $1,150,000: *Provided*, That no part of any money appropriated by this act shall be expended for the purchase of powder other than small-arms powder at a price in excess of 53 cents a pound.

Mr. BUCHANAN. Mr. Chairman, I desire to offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 15, line 15, after the word "pound," insert the following: "*Provided further*, That in expenditures of this appropriation or any part thereof for powder no powder shall at any time be purchased unless the powder factory at Indianhead, Md., shall be operated on a basis of not less than its full maximum capacity."

Mr. MANN. Mr. Chairman, I reserve a point of order on that. Is it not sufficient to have that in one law?

Mr. BUCHANAN. The other amendment on the fortifications bill, I presume to which the gentleman refers, applies to the Picatinny Powder Factory. There has been recently some improvements and extensions there.

Mr. PADGETT. And it has increased its output. And Admiral Twining states in the hearings and also in a letter which he sent to me last year that, operating 300 days in a year, its capacity would be about 2,500,000 pounds. And this year they have made in new powder nearly 1,500,000 pounds, and they have made in reworked powder over 900,000 pounds. So that they have practically had 2,400,000 pounds out of a maximum of about 2,500,000. So I think that that would be a cumbersome amendment and a limitation when the factory is operating to-day at more than 80 per cent of even its theoretical capacity.

Mr. BUCHANAN. I would like to state, Mr. Chairman, if I may——

Mr. ROBERTS of Massachusetts. Will the gentleman yield for a question?

Mr. BUCHANAN. While the gentleman from Illinois [Mr. MANN] reserves his point of order, I would like to state in the meantime—

Mr. ROBERTS of Massachusetts. Will the gentleman yield for a question?

Mr. BUCHANAN. I would like to make a statement first, and then I will yield. This amendment was declared in order by the chairman of the committee when the Army appropriation bill was being considered. I will say further that it will tend to reduce expenses, that Admiral Twining has stated that the Government is producing powder at 30½ cents a pound, and to operate to the full capacity would add nothing to the overhead charges and insurance that the Government mills are carrying.

Mr. MANN. While I think the form of the amendment is subject to a point of order, it would be easier for my colleague to put it in shape so that it will not be, and I withdraw the point of order, because the question would have to be passed on anyhow by the committee.

Mr. ROBERTS of Massachusetts. Will the gentleman yield to me for a question?

Mr. BUCHANAN. Yes.

Mr. ROBERTS of Massachusetts. I notice the gentleman uses the words "full maximum capacity" in his amendment. I would like to ask him just what he means by that. Does he mean running three shifts a day and 24 hours a day?

Mr. BUCHANAN. I do.

Mr. ROBERTS of Massachusetts. And 365 days in the year?

Mr. BUCHANAN. No.

Mr. ROBERTS of Massachusetts. That is full maximum capacity, I suggest.

Mr. BUCHANAN. That would be working on holidays and Sundays.

Mr. ROBERTS of Massachusetts. I asked the question because if the gentleman does not mean to compel that factory to run on Sundays and holidays he should modify that language and not say "full maximum capacity."

Mr. BUCHANAN. I believe the full maximum capacity is 24 hours a day on the workdays of the year. I do not think it can be construed to include Sundays and holidays.

Mr. MANN. Will my colleague yield for a question? Suppose that there was a breakdown, would that affect the full maximum capacity?

Mr. BUCHANAN. No. In a breakdown it would have no capacity.

Mr. MANN. What I wanted to get at was the same question I asked when this matter was up before. Does this language mean the actual capacity or estimated capacity?

Mr. BUCHANAN. It means the actual capacity, certainly, and not the estimated capacity.

Mr. MANN. A statement was made here some time before that the actual capacity was only about one-half.

Mr. BUCHANAN. I am informed that they produce powder cheaper by running 24 hours a day than running a less time than that, and that it is to the advantage of the manufacturer of powder to run the factory continuously.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the chairman announced that the Chair was in doubt.

So the committee divided; and there were—ayes 51, noes 28.

So the amendment was agreed to.

Mr. MADDEN. Mr. Chairman, I move to strike out the last word. I would like to ask the chairman of the committee how much of this $1,150,000 has to be used for manufacturing powder and how much has to be used for the purchase of powder?

Mr. PADGETT. It varies. Last year we manufactured 1,500,000 pounds and reworked—I am speaking in round numbers—900,000 pounds.

Mr. MADDEN. How much did we buy?

Mr. PADGETT. And we purchased, if I remember, during the last fiscal year about 1,500,000 pounds.

Mr. MADDEN. How much does it cost the Government of the United States to make powder?

Mr. PADGETT. The inventory cost is about 30½ cents, but Admiral Twining stated that with certain other charges he paid out of other appropriations, it ran up to about 41 cents and a fraction. That is my recollection.

He states that the cost of the manufacture of powder to a private concern, taking in certain items of cost that he does not estimate in his manufacture, would be about 48 cents and a fraction. We have limited the cost here to 53 cents.

Mr. MADDEN. What was the information upon which the committee based the limitation of 53 cents?

Mr. PADGETT. There was a very full hearing had by the Committee on Appropriations.

Mr. MADDEN. Was that the information upon which the committee based its judgment?

Mr. PADGETT. We acted upon the information contained in the hearings.

Mr. BUCHANAN. Mr. Chairman, will the gentleman yield?

Mr. PADGETT. Yes.

Mr. BUCHANAN. I wish to inquire of the gentleman from Tennessee if it is not a fact that in the committee, when the question was asked of a private manufacturer, he answered that he had no information on the matter?

Mr. PADGETT. No. He gave us a table.

Mr. MADDEN. I wish to ask the gentleman from Tennessee, in charge of the bill, whether the 53-cent limitation was fixed as the price at which powder could be sold to the Government at a profit to the seller, on the basis of constant and full operation of the plant manufacturing the powder, or whether the price fixed as a limitation is based upon the operation of the plant haphazard, at odd times, as the Government may think proper to purchase the powder?

Mr. PADGETT. Fifty-three cents was fixed by the Naval Committee upon the basis of hearings had by the Committee on Appropriations, in which Admiral Twining and Col. Buckner and a private citizen named Waddell and the Chief of the Bureau of Ordnance of the War Department all participated.

Mr. MADDEN. Did they all agree?

Mr. PADGETT. No; they did not agree. Mr. Waddell's statement was very much at variance with the statement of the

chiefs of two bureaus, and also with the statement of Col. Buckner, and, acting upon that testimony upon the fortification bill, the House fixed the price at 53 cents.

Mr. MADDEN. What was Mr. Waddell's statement, for example?

Mr. PADGETT. I think he said they could make powder at about 19 cents a pound.

Mr. MADDEN. What was the other testimony?

Mr. PADGETT. As I stated, Admiral Twining said that the manufacturing cost at a private establishment would be about 48 cents and a fraction.

Mr. MADDEN. Was that based on a calculation that the establishment would be working continuously, or just periodically?

Mr. PADGETT. Continuously.

Mr. MADDEN. If a plant is working not continuously but periodically, and putting out only one-quarter of its capacity—one-quarter of its maximum output—what would be the cost to manufacture it then?

Mr. PADGETT. I do not know.

Mr. MADDEN. Suppose the gentleman himself were running a manufacturing institution, and it had a capacity of 45,000 tons, and you ran only at one-fourth of your capacity and produced only one-fourth of your maximum output?

The cost of that one-fourth of the maximum output might be double the amount of the total receipts. Would you think the cost under such circumstances the cost on which you would want to base the price of your commodity?

The reason I am asking these questions is this: I am afraid that with all these limitations imposed by the Government we shall find ourselves in trouble one of these days if the powder companies should dismantle their plants on account of the price at which the Government will purchase their powder. We may find ourselves in the position where we will not be able to buy powder in an emergency. I think we should go rather carefully in a question of as great importance as this, and not decide it in a haphazard way.

The CHAIRMAN. The time of the gentleman has expired.

Mr. MADDEN. Mr. Chairman, I ask for a few minutes more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. MADDEN. I am not interested in any wise whatever in anybody who is manufacturing powder, either directly or indirectly, and I do not know anybody who is in the business of manufacturing powder. I would not know them if I saw them coming along the sidewalk with a signboard on them. But I do know this, that to anybody in the manufacturing business, no matter what the business is, whether making powder or any other commodity, if he is running only one-quarter of his capacity, the product will cost him twice as much as he can sell it for. If the plant is working at only one-quarter of its capacity, it could not pay the fixed charges on the value of the plant or the men who are employed. When manufacturing plants are putting out only half their capacity, half their possible output, they are still putting out that output at a loss, and they do not begin to make any profit on any products that they make until after they have passed 70 per cent of their maximum capacity; and all the profit that is made in any great manufacturing enterprise in America is made on the last 30 per cent of their capacity to produce.

So it is easy to be seen that if this Congress goes on haphazard, limiting the plants from which we are obliged to buy one of the most important commodities used in the Navy and the Army, so that these plants will be dismantled and we have to depend entirely upon the plants which the Government itself has, and these plants are not sufficient to meet the needs of the Government, we may find ourselves in a very embarrassing situation some day when we ought not to be in that situation. I advise the use of greater care by Members of the House in placing limitations on the powers of executive officers in the discharge of important and responsible duties.

Mr. PADGETT. If the gentleman will permit a moment, the provision in the Army bill in reference to the Picatinny powder factory was that it should operate one-half of its maximum capacity. I want to call attention to the fact that Indianhead is now and has been for a year or more operating at least 80 per cent of its capacity.

Mr. BUCHANAN. Mr. Chairman, I move to strike out the last two words. To relieve my colleague from Illinois [Mr. MADDEN] from his fears, I want to say that it seems to me these Government contractors are continually losing money, but yet they are rather anxious to continue to lose that money.

Mr. MADDEN. I want to say to my colleague that I would not take a contract from the Government of the United States at any price under any circumstances.

Mr. BUCHANAN. I do not yield at this time, Mr. Chairman. I wish to say that since the Government started to manufacture its own powder and to build some of its own battleships and to manufacture some of its other supplies, it has been found that these corporations that the Government has been buying from have continued to drop their prices. They have said that they could produce a little more cheaply. In my judgment, the fact is that the criminal Powder Trust of this country, which we are so much concerned about at times, for fear they might stop their mills and so forth, are producing powder much more cheaply than the Government is. We have information that the Government is producing powder for 30½ cents a pound. I want to say that I have enough private information to convince me that the Powder Trust is producing powder still more cheaply than that, but it is purposely keeping us in the dark. When Admiral Twining was asked about it, he said he had never had any figures or information as to the wages paid employees, not only by the Powder Trust but by the Shipbuilding Trust, and therefore he had no knowledge as to the real cost. When they are asked for that sort of information they close their books against our Government officials. We are now paying the Steel Trust $450 a ton for armor plate that can be produced for less than $200 a ton. I suppose, if somebody should start a movement to have the Government establish a plant to protect itself against that exorbitant price, somebody would say that we would not be safe unless we relied on some criminal trust for our supplies in time of war.

Let me say to my colleague and to every Member here that if you want to be safe in time of war let the Government provide its own plant for emergency cases, because, if I read aright the signs of the times, if we get into war in this country it is not going to be the fault of any nation that has been referred to as being ready to jump at our throats; it is going to be due to these greedy financial pirates and highbinders who are trying to keep their clutches on the throats of the people and rob and plunder them, and continue to keep their arms in the Treasury up to their elbows. Do not permit yourselves to be deceived, or try to deceive others, that you are going to be protected by relying on some criminal trust or private corporation in these emergencies. Provide for plants under the control of the Government, and then you will be safe, and that is the only way in which you will be safe. I am in favor now of providing emergency powder plants and emergency other supply plants for use in case we get into a war. I claim it is absolutely unsafe to rely on the present corporations of this country, because they are liable to be up in arms against the Government whenever their clutches are shaken loose from the throats of the people. They are the men who have always made trouble in the history of the world. There is where the trouble has started, and nine-tenths of all the wars have been due to greed and graft.

Mr. SISSON. Mr. Chairman, I move to strike out the last three words. I want to state to the gentleman from Illinois [Mr. MADDEN] that this matter was gone into very thoroughly by the subcommittee that examined into the Panama fortifications, of which subcommittee the gentleman from Kentucky [Mr. SHERLEY] is chairman, and for quite a number of days this matter was gone into very thoroughly on the floor when that appropriation bill was up; and in order that these items of appropriation might be the same in all the bills, the Naval Committee followed the conclusions which were there reached.

Mr. MADDEN. All I wanted to be sure of was that the Government was not going to be embarrassed if a warlike situation arose.

Mr. SISSON. Mr. SHERLEY reported that all the overhead charges, the capacity of the plant, the cost of depreciation, the renewals, explosions, dangers, and the hazardous business were all gone into, and it gave them ample margin so that there could be no question of there being an ample profit in the manufacture of powder.

The Clerk read as follows:

For Naval Gun Factory, Washington, D. C.: New and improved machinery for existing shops, $125,000.

Mr. SISSON. Mr. Chairman, I notice in the hearings that this item has been carried for quite a while. I notice that the gentleman from Massachusetts [Mr. ROBERTS] asked Admiral Twining when we would ever get through building the shops, and it seems that the admiral stated that they would always want the $125,000. I would like to ask the chairman if all the information that the committee had about it are the two statements that the admiral made, on page 368 of the hearings. It seems that the chairman wanted to know when they would ever get through constructing the plant.

Mr. PADGETT. It is not for construction; it is for maintenance. It is for machinery that wears out and for improved machinery.

Mr. SISSON. The gentleman does not get what is in my mind. I will read:

The CHAIRMAN. The next item is "For Naval Gun Factory, Washington, D. C.: New and improved machinery for existing shops, $125,000." That is the same as the item last year?

Admiral TWINING. Yes, sir.

The CHAIRMAN. Will you need all of that amount to carry on the current improvements, repairs, etc.?

Admiral TWINING. Yes, sir.

Mr. ROBERTS. Will the time come, do you think, when you can cut that item out? Will that foundry ever be equipped with new machinery?

The CHAIRMAN. This is the whole of the shops?

Admiral TWINING. This is the whole gun factory, all of the shops. I think that ought to be appropriated every year.

Now, it seems that with that statement the chairman leaves this matter. Does the gentleman know whether they bought any new machinery or what they have been doing with $125,000?

Mr. PADGETT. Buying machinery every year.

Mr. SISSON. Where is the information?

Mr. PADGETT. The statement that we have every year. It is about 4 per cent on the cost of the plant they have there. It is for manufacturing guns and gun carriages.

Mr. SISSON. I can understand how they manufacture them. I want to know if this is the only information the gentleman has about how the $125,000 was spent last year?

Mr. PADGETT. Certainly, and any man would know that 4 per cent is a very small depreciation for the wearing out of machinery and the purchase of new machinery.

Mr. SISSON. That depends on what sort of machinery it is and how old it is. If it is an old plant, 4 per cent might not be enough, and if it is a new plant, where the machinery is all new, 4 per cent would be enormous.

Mr. PADGETT. Not at all; not for machinery that is cutting iron and for a foundry that is melting iron for the furnaces, and so forth.

Mr. SISSON. The gentleman is assuming that, because he does not get it out of the hearings.

Mr. PADGETT. Oh, we have gone into this years before. I have been through the factory a number of times, and I know what is there and the character of the work that is done.

Mr. SISSON. The gentleman may have the information personally, but it is not in the hearings.

Mr. PADGETT. It seems to me that for a gun factory and a foundry, knowing the character of the work done, anyone would know that 4 per cent was a very small amount for keeping up the old machinery, replacing worn-out machinery, and buying new machinery.

Mr. SISSON. I want to know of the gentleman if there is anything in the RECORD or the hearings that shows how they expended the $125,000?

Mr. PADGETT. I do not know whether it was stated this year.

Mr. SISSON. Nor is there anything in the hearings that shows how the $125,000 was spent?

Mr. PADGETT. If they did not expend it, it was covered into the Treasury, because it is limited.

Mr. SISSON. If it was covered into the Treasury, did the committee ascertain how much was turned into the Treasury?

Mr. PADGETT. No; it did not.

Mr. SISSON. The committee made absolutely no investigation and took it for granted?

Mr. PADGETT. The admiral stated that for this year they would need that amount to keep up the gun factory, and, as I have said, it is only 4 per cent on the investment.

The Clerk read as follows:

Ammunition for ships of the Navy: For procuring, producing, preserving, and handling ammunition for issue to ships, to be available until expended, $3,850,000.

Mr. MANN. Mr. Chairman, I reserve the point of order on the paragraph.

Mr. SISSON. Mr. Chairman, I intended to reserve it.

Mr. MANN. The gentleman can reserve it.

Mr. SISSON. Mr. Chairman, my objection to this paragraph is that it permits $3,850,000 to be available until finally expended. I do not think that the appropriation of that amount of money should be left entirely at the disposal and discretion of the Secretary of the Navy or anyone connected with the Government.

Mr. PADGETT. Mr. Chairman, I will state to the gentleman that heretofore it has been regarded as a continuing appropriation, but last year the Comptroller of the Treasury held that it was an annual appropriation. When they give a contract for these shells and projectiles, they can not always be manufactured and delivered within the time. If the gentleman objects to its being available until expended, if he would consent to its being available for two years, we would be satisfied.

The gentleman can see at once that when they make their designs and specification and advertise for bids and carry out the contract, that by the time they consummate them they may not be able to manufacture these shells and other munitions and deliver them within the time.

Mr. SISSON. Mr. Chairman, my objection to that is this: That it carries with it the absolute right, without being compelled to repeal a law, to control these appropriations. We have an annual session of Congress under the Constitution, and each Congress ought to have the right, without being at all embarrassed and without having to repeal a law, to control the appropriation.

Mr. PADGETT. Mr. Chairman, this only applies to this particular appropriation. It does not have any effect whatever upon next year.

Mr. SISSON. I am sure of that, because it is only one item that is affected; but I do not care to discuss the matter further unless the gentleman has some other reason for it, because all of these departments, as a rule, would like to have all of the appropriations for the public buildings, for rivers and harbors, and all the other expenses of the Government made available until expended or until the work is completed. This is a bad precedent.

Mr. PADGETT. For public buildings and rivers and harbors they are, by law.

Mr. SISSON. But they are not all, because they frequently have a deficiency.

Mr. PADGETT. Not public buildings and rivers and harbors.

Mr. SISSON. But notwithstanding the fact that the law does authorize the expenditure of $50,000 on a public building, so far as I know not a building has been constructed and all of the money made available. On the contrary, the money is appropriated just as they need it and just as they make estimates for it, and the architects would be glad to have all of the money available, but even when it is specifically authorized by law Congress has never appropriated more than the amount of money that can be consumed during the fiscal year in order that it may always have control of the purse strings of the Government.

Mr. PADGETT. As a matter of fact, the appropriations for public buildings are continuing until used; and about a year ago we authorized a public-building bill and made appropriations in the sundry civil appropriation bill for numbers of public buildings, on not one of which an hour of work has been expended, and in the present bill, which was passed a few days ago, there were other appropriations for public buildings in addition to the ones last year not yet used.

Mr. MANN. Mr. Chairman, will the gentleman yield?

Mr. SISSON. Yes.

Mr. MANN. What is covered by the term "ammunition for ships"?

Mr. PADGETT. Powder, projectiles, shells, explosives, and so forth.

Mr. MANN. We have already had an appropriation for powder.

Mr. PADGETT. Yes. This is for the new ships that come into commission; that are authorized.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. MANN. Mr. Chairman, I ask unanimous consent that his time be extended for five minutes.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MANN. We have already had an item for the purpose of manufacturing smokeless powder, $1,250,000. Why put in another item to get smokeless powder?
